| 1998 | 2.6802      | *The doing of the thing; the brief brilliant whitewater career of Buzz Holmstrom*. Flagstaff, Arizona: Fretwater Press, 291 pp. [Hardbound and paperbound states.] [N.B.: 4th paperbound printing (2003), 400 copies, with a slight color shift in the cover, mistakenly eliminated both “3” and “4” on the edition line, thus the 4th printing is erroneously indicated as “5th printing 2003”. The true 5th printing of 2,012 copies, with a new ISBN number, is stated “5th printing 2004”; it includes minor modifications to illustrations, type resetting, and the correction of mistakes and typographical errors. (*Fide* Brad Dimock, Fretwater Press.)*

MAJOR POWELL’S PARTY PERISHES IN THE COLORADO.
19 Drown. John Sumner Is The Sole Survivor.

From the outset of explorations on the Colorado River and its tributaries, whether by prospectors, trappers, or bona fide explorers, mishap and death were present. In 1869, while John Wesley Powell’s government-supported expedition of exploration was descending the Green and Colorado Rivers, news came of the disastrous drowning of the entire party but one. Newspapers across the country reported the disaster—and the subsequent revelation of a hoax. Just as newsworthy was the arrest of the perpetrator, John A. Ridson, or Risdon, alias Miller, alias Clark, in Lincoln, Illinois—not for the hoax but as a horse thief and a petty thief.

Until recently, the rich historical resources of The New York Times were widely available, but only on microfilm, an example of which is shown here. Blemishes and poor reading quality were just as much due to rough treatment of the films as they were the quality of the original images. The advent of digital resources has allowed for significant improvements in the quality of reproductions. But readers should remember that for a good part of the 20th century this represented the ways and means of historical researchers.
Grand Canyon and lower Colorado River articles and reports in *The New York Times* from 1851

*The New York Times* has been widely available on microfilm, and now in digital format. Its comprehensive and authoritative editorial view of national affairs, as well as its traditionally well-respected writing, makes it a useful resource on national perspectives of events and issues in the Southwest. The longevity of this newspaper also allows it to serve as a Grand Canyon-Colorado River bibliography back to the time of the first expeditions through what would be Arizona, by Lorenzo Sitgreaves (1851), and on the Colorado by Joseph C. Ives (1857-1858) and John Wesley Powell (1869).

For book reviews, see [Part 30. Reviews](#).
Items with by-lines have writers’ names in bold within the citation.

|New York Times|

1851 3.604 (October 10) Santa Fe. Indian depredations—Dispute about a building—Election for delegate to Congress—The Boundary Commission, &c. From the St. Louis Republican. (p. 1) [Includes note of Sitgreaves expedition in the field.]

1858 3.611 (May 10) Arizona Territory. Character, resources, &c., of the country—Its application for territorial organization. By "Patria". (p. 4)

1858 3.337 (May 13) From Washington. The new Territory of Nevada—Its extent, boundaries and character—Reasons for its organization, &c.—The new volunteer regiments. (p. 4)

1858 3.6 (May 14) Progress of the United States survey of the Colorado. (p. 2) [Excerpt from a letter from Joseph C. Ives, dated March 14.]

1858 3.491 (June 21) Latest by telegraph. From Washington. Arrival of Colonel Kane—Governor Cumming's Dispatches. Intended resignation of Minister Reed—Success of the Colorado Expedition—The Overland California Mail. (p. 1) ["A report has been received by the War Department from Lieutenant Ives, setting forth the entire success of his exploration so far as he has gone. The navigation of the Colorado is entirely safe for large steamers. The health of his men is good." —Entire item.]

1858 3.7 (June 24) Latest by telegraph. Important from Washington. * * * First news from the Colorado expedition—Lieut. Ives' report. (p. 5)

1858 3.8 (August 4) The Colorado expedition. (p. 3) [Signed "Randolph." Filed from Lawrence, Kansas, July 21.]

1858 3.612 (October 11) Southern California. Fort Yuma—Its growth and prospects—Cost of ferriage—The Indians—A feud between two tribes. By "L." (p. 2)

1858 3.622 (November 3) Physical geography of North America. Number six. The Cordillera of the Sierra Madre. By W. Gilpin. (p. 8) [Includes reference to the canyons of the Colorado Plateau as "water gaps"].

1858 3.613 (December 22) The Ainsa case—Memorial sent to Congress in regard to Mexicans outrages. By Edward E. Dunbar. (p. 1) [Includes references to lower Colorado River.]

1858 3.9 (December 27) Colorado exploring expedition. Preliminary report of Lieut. Ives. (p. 3) [Abridged but mostly complete text of Ives (1858), as cited in Part 2 of bibliography.]

1859 3.614 (January 6) Arizona and Sonora... No. II. The mining interests of the country—Topographical features—Climate. By Edward E. Dunbar. [Ellipsis is part of the title.]

1859 3.615 (February 5) Lecture by Lieutenant Mowry. The geography and resources of Arizona. (p. 8)

1859 3.492 (March 14) California. Steamer Day and its peculiarities—Rainy weather—The Colorado expedition—The steamer Uncle Sam in a storm—United States property thrown overboard. (p. 1) ["The Expedition to the Colorado, under the command of Col. Hoffman, of which I spoke in my last, was dispatched on the 11th in the steamer..."
Uncle Sam." Stormy weather ensued, and the ship lightened by disposal of coal, supplies, and gear, and one of 200 mules before the ship settled and the order countermanded. Item signed "Podgers" (not Rodgers).

1859 3.493 (May 17) Exploring expedition—Mexican affairs—Equador [sic], &c. (p. 5) [Assignment of expedition to explore for a connection between Santa Fe, New Mexico, and Utah, along the San Juan River. Also a note about Lt. Joseph C. Ives.]

1859 3.494 (June 1) The Colorado expedition. (p. 1) ["The War Department have [sic] just received a communication from W. S. Clark, Brigadier General, of California, dated Los Angeles [sic], May 2, 1859, informing them of the complete success of Lieut. Col. Hoffman's United States Colorado Expedition, and adds that the troops engaged in the expedition, with the exception of two companies, were then in march for economical stations on the seaboard.—Washington Star."—Entire item.]

1863 3.617 (March 10) The new Territory of Arizona. (p. 4)

1869 3.10 (July 5) The Powell Expedition. The loss of the members in the Colorado — Statement of the sole survivor. (p. 5) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

1869 3.12 (July 7) The Powell Exploring Expedition. Risdon's story probably a hoax — Letter received from Major Powell since the date of the pretended disaster — Statement of Mrs. Powell. From the Detroit Tribune, July 5. (p. 8) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

1869 3.13 (July 7) A card from Mrs. Powell — She looks upon the story as a fabrication. (p. 8) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

1869 3.15 (July 9) The Powell Exploring Expedition. Another story that it is lost — Nine men drowned — John Sumner, the survivor, and John A. Risdon, an impostor. From the Omaha Republican, July 2 & 3. (p. 5) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

1869 3.16 (July 9) Dispatch from Mrs. Powell — Who is Sumner? (p. 5) [cited=GCNHA Monograph 8: page 11-5]

1869 3.18 (July 13) The "sole survivor" of the Powell Expedition arrested and lodged in jail. From the Springfield (Ill.) Journal, July 10. (p. 5) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]
1869 3.623 (July 18) News from the Powell Expedition—The rapids are safely passed—“All Well”—The Congressional Committee in the West. (p. 1) [Congressional Pacific Railroad Committee.]

1869 3.21 (July 23) Letter from Major Powell's brother, giving an account of the starting and progress of the expedition. (p. 2) [cited>GCNHA Monograph 2: page 110 | cited>GCNHA Monograph 8: page 11-5]

1869 3.23 (July 25) [Note from Howland] (p. 8) [cited>GCNHA Monograph 2: page 110 | cited>GCNHA Monograph 8: page 11-5]

1869 3.338 (September 4) Carvalho's painting of the Grand Canyon of the Colorado River. (p. 4) [S. N. Carvalho, New York exhibition.]

1872 3.624 (May 5) The canoe pastime. Canoes in ancient as well as modern days. English clubs for the promotion of the sport—Hints on the construction of the canoe, the proper costume for the sportsman, and directions as to management. (p. 1) [Includes comment about buffalo hide-covered canoes, “The explorations of the great canions of the Colorado were accomplished in these kind of canoes.”]

1873 3.625 (June 2) Programme for this summer's work—Objects for the survey. From the Denver (Colorado) News, May 28. (p. 8) [George M. Wheeler explorations.]

1873 3.339 (July 10) By mail and telegraph. (p. 5) [“Major Powell, explorer of the Grand Cañon of Colorado [sic], leaves Salt Lake City to-day, to complete his work.” —Entire item.]

1873 3.340 (August 7) The land of Mormon. Three hundred miles through Utah—Spanish Fork Canon—Mount Nebo—Out-door bedrooms. From our Special Correspondent. (p. 2) [Notice of departure of the correspondent with John Wesley Powell and Thomas Moran, from Salt Lake City, “for a visit to the Grand Cañon of the Colorado River”; filed from Toquerville, N. T., July 23, still short of the canyon.]

1873 3.626 (August 15) Flooding the desert. (p. 8) [Chapman Expedition, lower Colorado River.]
(August 18) The Colorado Valley. The attempt to flood the desert—Interesting explorations by the Chapman Expedition. (p. 4)

(October 22) The Colorado canon exploration. (p. 1) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

(May 19) Washington. The legislative appropriation bill. (p. 1) [See "The Western Surveys Inquiry".]

(July 9) Washington. The threatening Indian depredations. (p. 1) [See under "Personal": "J. W. Powell, the explorer, is seriously ill here, and it is feared his illness may delay the departure of some portions of his expedition." —Entire item.]

(June 12) Far western explorations. Major Powell's expedition—Its organization and what it hopes to accomplish—The section of country that will be visited. (p. 1)

(September 12) Major Powell's exploring party. (p. 12) ["Major Powell's exploring party in charge of A. H. Thompson have arrived at Gunnison, Utah, en route for home, having finished their exploration for the season." —Entire item.] [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

(November 19) Prof. Hayden's surveys. (p. 1) [Includes notice of J. W. Powell's report.] [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

(June 11) Fashion amid the fossils. The natural history museum. Many prominent persons examining the specimens at Manhattan-Square—A pleasant and largely-attended reception. (p. 8) [Spring reception at the American Museum of Natural History. Includes notice of "five finely executed relief maps of the Cañon of the Colorado and Henry Mountains, presented by Prof. J. W. Powell".]

(November 26) The Geological Survey. First annual report of Director King. (p. 3) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

(September 19) Literary notes. (p. 3) [Includes notice of J. W. Powell as the "Director of Publications of the Geological Survey", with the comment, "Major Powell is the same venturesome officer who, many years ago, made the famous passage of the Rio Colorado in boats and penetrated the cañon district completely from east to west."]

(November 1) Great expectations. Enormous profits anticipated from the pearl fisheries of Lower California. From the San Francisco Chronicle, Oct. 24. (p. 3) [Includes note of the mouth of the Colorado River.]
1885 3.636 (May 25) The geology of the West. A report on the great plateau and mountain region. (p. 2) [Principally about Clarence E. Dutton's monograph on "Mount Taylor and the Zuni Plateau". John Wesley Powell identified as "Major Parnell".]

1886 3.637 (December 17) An ingenious swindler. Making a living by personating [sic] government scientists. (p. 6) [Clarence Edward Dutton impersonator.]

1889 3.758 (December 6) To redeem arid lands. A plan for irrigating a vast territory. Major Powell's address to the Chamber of Commerce on a subject of national interest. (p. 3)

1890 3.348 (April 27) The earth and the air. (p. 19) [Book review of "Aspects of the Earth", by N. S. Shaler, mentioning its frontispiece of the Colorado River.]

1890 3.618 (October 29) "Scribner" for November. (p. 4) [Includes note of Robert B. Stanton's article on survey of the Colorado River.]

1891 3.759 (May 26) The irrigation law. Major Powell tells what has been done to carry it into effect. (p. 9)

1891 3.760 (July 2) The Colorado's new mouth. Major Powell explains the inundation of Death Valley [sic]. (p. 5) [Salton Sea.]

1891 3.761 (July 22) The new desert lake. Major Powell, the well-known geologist, talks about it. (p. 8) [Salton Sea.]

1893 3.349 (December 26) Prof. Bickmore's holiday lectures. He talked on "Our Mineral Wealth" and exhibited pictures. (p. 8) [Albert S. Bickmore. Review mentions "vivid pictures from the Grand Canyon".]

1894 3.762 (May 11) Major Powell resigns. He will no longer be Director of the Geological Survey. (p. 5)

1895 3.350 (August 2) On a raft through the Grand Canyon. A preacher's perilous descent of the Colorado River. (p. 12) [Rev. David Utter; apparently a descent only of Black Canyon.]

1897 3.352 (August 6) Cars to the Grand Canyon. Lombard, Goode and Co. of Chicago backing a new railroad. (p. 9) [Brief item; also mentions electrical power production from "several waterfalls" for "an electric scenic road for sightseeing purposes" along the South Rim.]

1898 3.353 (August 6) Reviews of books. [See review of "Introduction to the Study of North American Archaeology", by Cyrus Thomas, which includes mention of Grand Canyon.]

1899 3.354 (January 25) Automobiles in Colorado. Horseless carriages soon to be seen in the Grand Canyon. (p. 4) [Everett-King Company contracted by Santa Fe Railroad for nine 18-passenger vehicles.]
1899 3.355 (December 22) The Grand Canyon Railway. Road to the copper mines to be finished in thirty days. (p. 4)

1900 3.356 (March 25) Burton Holmes on the Grand Canyon. (p. 16) [Lecture announcement.]

1900 3.357 (June 9) To explore Grand Canyon. Mistakes of other expeditions to be avoided—party well equipped. (p. 1) [Herbert E. Gregory, R. E. Dodge, William Morris Davis, Dr. Anderson, and Mr. Wetherill; expedition to the North Rim from Colorado Springs, Colorado.]

1900 3.358 (September 15) Items of the day. (Book Reviews, p. 14) [Includes notice of forthcoming publication of George Wharton James' *In and Around the Grand Canyon*.]

1900 3.359 (December 15) Items from Boston. (Book Reviews, p. 22) [Includes notice of forthcoming publication of George Wharton James' *In and Around the Grand Canyon*.]

1901 3.360 (August 18) Low rate tour to the Pacific coast. Another opportunity to visit California under the Pennsylvania Railroad personally conducted tour system. (p. 1) [Advertisement. Includes notice of Grand Canyon. Also reprinted August 22, p. 1.]

1901 3.361 (September 4) Brief railroad items. (p. 2) [Expected completion of "Grand Canyon Line" (Grand Canyon Railway) to the South Rim by the end of September.]

1901 3.362 (November 18) The California Limited Santa Fe. (p. 9) [Advertisement; apparently the Santa Fe's first advertisement in the *New York Times* to include Grand Canyon. Also advertises booklet, "Grand Canyon of Arizona", for ten cents. Also see subsequent 1901 advertisements, all with variations, on November 25, p. 10; December 2, p. 10; December 9, p. 10; December 30, p. 5.]

1901 3.363 (November 22) Brief railroad items. (p. 7) [Includes notice of Santa Fe Railroad's proposal "to establish a weekly standard sleeping car line between the Grand Canyon and Los Angeles, Cal."]

1902 3.364 (March 29) Boston notes. (Book Reviews, p. 29) [Includes notice of George Wharton James' *In and Around the Grand Canyon*, and lecture by James, with comment about contrived obituary notices of James' death in "his fatal battle with a rattlesnake encountered in a curiosity shop in Phoenix, Ariz." on February 1.]

1902 3.366 (September 21) Prof. J. W. Powell ill. He is Director of the Bureau of Ethnology of Smithsonian Institution, and a prominent geologist. (p. 3)

1902 3.367 (September 24) Noted ethnologist dies. Major J. W. Powell, connected with Smithsonian Institution, passes away in Maine—Explored Grand Canon. (p. 9)

1903 3.628 (January 10) Colorado River. Mr. Dellenbaugh's story of it and the canons it has sculptured along its course. (Book Reviews, p. 7) [Review of Dellenbaugh's *Romance of the Colorado River*.]

1903 3.368 (April 4) Books received. (Book Reviews, p. 15) [Includes notice of *Glimpses of the Grand Canyon of Arizona*, by Henry G. Peabody, published by Fred Harvey.]
1903 3.369 (April 12) Coney Island rejuvenated. A "world's fair" to be the feature this summer. (p. 28) [Includes notice of new "shows" [sic, short plays], including "The Grand Canyon".]

1903 3.370 (April 23) High-grade tours to the Pacific coast at low rates. (p. 2) [Advertisement, Pennsylvania Railroad Co.; includes Grand Canyon.]

1903 3.371 (May 2) Colorado River. Mr. George W. James's descriptions of its Grand Canyons. (Book Reviews, p. 3) [Book review of James' In and Around the Grand Canyon.]

1903 3.372 (May 7) Mr. Roosevelt sees the Grand Canyon. He pleads for the preservation of the wonderful chasm. People of Arizona gather to hear the President, who talks on irrigation and other topics. (p. 2)

1903 3.373 (June 27) Excursion to Canyon of Arizona. (p. 3) ["The Santa Fé will run a big excursion from Denver to the Grand Canyon of Arizona, after the International Convention of the Christian Endeavor Society in Denver, July 13. A very low rate will be made, not only to the Canyon but also through to California." —Entire item.]

1903 3.374 (September 6) Bankers' western trip. Group VIII. of New York body going to San Francisco. Special vestibuled train to take them to the American Bankers' Association convention. (p. 10) [Includes notice of stop at Grand Canyon.]

1903 3.375 (October 17) About authors. What some of them are saying, writing, or planning. (Book Reviews, p. 20) [Includes notice of George Wharton James and brief biographical note.]

1903 3.1005 (December 5) Holiday books. Some aspects of the trade in books for gifts—New and old works in demand—Two lists of desirable books. (pp. 884, 886, 888, 890, 892) [See p. 892, review of George Wharton James' The Indians of the Painted Desert Region.]

1903 3.1006 (December 19) Boston notes. Chaucer's "The Parliament of Foules"—Some January books. By Stephenson Browne. (Book Reviews, p. 13) [Includes notice of George Wharton James, on lecture circuit, addressing the Appalachian Club on the Havasupai, with notice of work toward a new book.]

1904 3.376 (June 4) Coronado. The first explorer of the West's own story of his exploits. By Frederick S. Dellenbaugh. (Book Reviews, p. 369) [Review of The Journey of Coronado—1540-1542, by George Parker Winship.]

1904 3.377 (December 11) Willcox, New York's new Santa Claus. Character sketch of the man chosen by President Roosevelt to take the New York Post Office out of politics and run it on a strictly business basis—Young and self-made—His park record. (New York Times Magazine, p. 2) [William R. Willcox. Includes quote about a secretive book agent, "he seemed to be afraid of disclosing his business except by the roundabout way of Colorado and the Grand Canyon." —Entire note in this context.]

1905 3.379 (June 11) Henry van Dyke, optimist and old-fashioned philosopher. (New York Times Magazine, p. 3) [Includes note of his first visit to Grand Canyon.]

1905  3.763  (November 12) Explain Salton Sea puzzle.  Engineers declare it is fed from the Colorado River.  (p. 1)

1905  3.381  (November 12) Save Niagara Falls, Roosevelt will say.  Intends to make a strong plea in his message.  Delegation shows dangers.  Plans of various power companies would result in destruction of the American Falls.  (p. 4)  [Includes mention of “the Grand Canyon of Colorado”.]

1906  3.764  (April 1) Nature’s packing plant.  Salton Sea freezes, salt gathers—and there you are.  (p. 1)

1906  3.765  (June 16) Boston notes.  (Book Reviews, p. 399)  [Includes notice of forthcoming publication of George Wharton James’ *The Wonders of the Colorado Desert*.]

1906  3.383  (July 1) Trainload of teachers to cross the continent.  Start in five Pullmans for a 30-day trip to the coast.  100 from New York City.  Convention of National Educational Association turned into sight-seeing trip.  (p. 4)  [Includes note of Grand Canyon.]

1906  3.766  (July 4) Railroad to retreat.  Salton Sea again compels Southern Pacific to move its main line.  (p. 1)

1906  3.767  (July 22) Wonders of the petrified forest of Arizona.  One of nature’s mysteries which amazes the layman, fascinates the geologist, and inspires the poet.  By Lilian Whiting.  (New York Times Magazine, p. 3)  [Includes mention of Grand Canyon.]

1906  3.31  (August 12) In Arizona’s wonderland — Grand Cañon of the Colorado.  By Lilian Whiting.  (Section 3, p. 3)  [cited=GCNHA Monograph 2: page 110]  [cited=GCNHA Monograph 8: page 11-5]

1906  3.768  (August 18) In the Colorado Desert.  (Book Reviews, p. 510)  [Notice of forthcoming publication of George Wharton James’ *The Wonders of the Colorado Desert*.]

1906  3.769  (August 25) Salton Sea to disappear.  Engineers now diverting the Colorado say it will soon dry up.  (p. 7)

1906  3.770  (November 2) Salton Sea doomed.  (p. 11)

1906  3.771  (December 14) Millions for a dam.  People to aid Southern Pacific in checking Colorado River’s rampage.  (p. 8)

1907  3.772  (January 13) President asks action to curb the Colorado.  Tells Congress that 700,000 acres are menaced by river.  Vast wealth may be saved.  But quick and permanent work is necessary—California development promoters denounced.  (pp. 1-2)
1907 3.384 (January 10) Santa Fe is indicted. Accused of giving rebates to an Arizona lime concern. (p. 1) [Grand Canyon Lime and Cement Co., Nelson, Arizona.]

1907 3.773 (January 20) Bill to harness river. Senate committee authorizes a report on the Colorado. (p. 12)

1907 3.774 (January 20) The problem of the Salton Sea. Great lake formed by overflow of Colorado River usurps lands worth 500 millions of dollars and capable of supporting half a million people. (New York Times Magazine, p. 5)

1907 3.775 (February 12) The Colorado controlled. River turned back from the Salton Sea—Levees being built. (p. 1)

1907 3.776 (March 7) Harriman ends policy of silence. He will take the public into his confidence concerning the railroads. Says all must be rebuilt. Improvements will cost billions—He is in favor of tariff and currency reforms. (pp. 1, 3) [Includes Salton Sea.]

1907 3.385 (July 6) Gossip of authors. (Book Reviews, p. 436) ["Frederick S. Dellenbaugh . . . is spending the Summer in and about the neighborhood of the Grand Canyon, refreshing his memory on the topography of that region and collecting illustrations for a new book, which he is about to write for Putnam's Sons, giving a detailed description of the Powell expedition, of which he was a member. Dellenbaugh is a sportsman and an artist as well as an author, and his book, which will be a real story of Western adventure, will appear this November.” — Entire note. The book is A Canyon Voyage.]

1907 3.778 (July 7) We seek land from Mexico. Report that we are after territory for new naval stations. (p. 2)

1907 3.386 (September 20) Longworths have two exciting days. Member of their party, Mrs. Charles Joy, lost at Grand Canyon. Found after 15 hours. Later, Roosevelt's daughter centre of uproar in Pullman over right to use drawing room. (p. 1) [Representative and Mrs. Nicholas Longworth (daughter of Theodore Roosevelt), and Mrs. Charles Frederick Joy.]

1907 3.387 (September 21) Joy himself lost looking for wife. Found after many hours by search parties sent to look for him. She walked twelve miles. The Longworths held previous reservation for the disputed Pullman drawing room—Russians hissed. (p. 5) [Representative and Mrs. Nicholas Longworth (daughter of Theodore Roosevelt), and Mrs. Charles Frederick Joy.]

1907 3.388 (December 22) In the Grand Canyon of the Colorado. By James Oppenheim. (New York Times Magazine, p. 3) [Poem.]

1908 3.1361 (January 14) Hurled through cataract. Two miners who lost their boat escaped without injury. [Charles S. Russell, Edwin R. Monett; report from Louis Boucher.]

1908 3.32 (February 9) Two go through the Grand Canyon. Russell and Monet [sic] reach the Needles after a perilous journey in gorge. Modest over their feat. One carried down rapids in an overturned boat—Refuse to talk of gold finds. (Section 2, p. 2) [Charles
1908 3.389  (February 10) Canyon voyagers will brave ocean. Plan to come to New York from the Needles in their small boat. Funds from mine owner. Course would lead them to Panama, New Orleans, Chicago, Halifax, and to this city. (p. 3) [Charles S. Russell, Edwin R. Monett.]

1908 3.1007  (March 21) New light on the Indian race. (Book Reviews, p. 151) [Includes notice of George Wharton James' forthcoming book with the (working) title "What the White Race May Learn from the Indian"; including mention of Havasupai.]

1908 3.390  (October 31) Down the Grand Canyon. (Book Reviews, p. 639) [Notice of publication of Frederick S. Dellenbaugh's *A Canyon Voyage.*]

1908 3.629  (November 8) Welcomes our professors. Berlin hears inaugural addresses by Felix Adler and W. M. Davis. (p. C1) ["Prof. Adler drew a graphic word-picture of the Grand Cañon of Colorado [sic] and the river surging 5,000 feet beneath for an outlet `to light and liberty' to illustrate the irresistible struggle going on in the American Nation for better political National ideals."]

1909 3.779  (January 24) May not pay Harriman. Senators likely to vote to send Salton Sea claim to court. (p. 10)

1909 3.780  (February 21) No money for Harriman. Congress will not pay him $2,000,000 at this session. (p. 4)

1909 3.33  (March 15) Burroughs writes of petrified forest. Naturalist also describes a trip through the natural wonder of the Colorado. (p. 5) [John Burroughs.]

1909 3.630  (June 5) Among the authors. (Book Reviews, p. 354) ["Prof. W. M. Davis, who has a volume of geographical essays with Ginn & Co. for early issue, received the Collom gold medal of the American Geographical Society of New York when he lectured recently before the society on `Lessons of the Colorado Canyon.'" —Entire note.]

1909 3.781  (June 6) Airship was a mirage. Dwellers on the Salton Sea were deceived by nature. (p. 18)

1909 3.391  (August 15) Taft sees Col. Lyon; census list held up. (p. 2) [Includes notice of President William Howard Taft's plan to visit Grand Canyon on October 14.]

1909 3.392  (October 15) Taft spends day at Grand Canyon. Takes trips about the rim, but hasn't time to go down the trail. (p. 8) [President William Howard Taft.]

1910 3.393  (January 5) Mother Earth still young. Not 100,000,000 years old, but only 60,000,000, says Prof. Davis. (p. 1) [William Morris Davis. Includes note of Grand Canyon.]

1910 3.394  (February 5) Among the authors. (Book Reviews, p. 6) ["James Paul Kelly of Charleston, West Va., has recently become interested in some of the traditions connected with the Grand Canyon. As a result of his study of these he has written a novel called 'Prince Izon,' in which he imagines the discovery of a remnant of the
Aztec race that had been hidden in an unknown spur of the Grand Canyon until the present day.” —Entire item.

1910 3.395 (February 18) Weston a day ahead of schedule. (p. 8) ["Edward Payson Weston, the pedestrian, left [for] Grand Canyon early to-day on his walk toward New York. Weston is in fine condition and is one day ahead of his schedule.” —Entire item. Transcontinental walk, Los Angeles to New York.]

1910 3.396 (February 19) Weston to reach here May 10. (p. 13) [Includes note of Weston at Grand Canyon.]

1910 3.397 (February 20) Weston rolls over steep embankment. (p. 20) [Slight accident near Flagstaff. Includes note of Weston's walk from Williams to Grand Canyon.]

1910 3.782 (March 13) Arrested, drowns himself. Train robber leaps from window into the Salton Sea. (p. S2)

1910 3.398 (March 23) The “billionaire special.” Mrs. Sage, the Goulds, and Carnegie party's private train from Pasadena. (p. 1) [Includes note of planned stop at Grand Canyon.]

1910 3.399 (April 16) Yucatan ruins Asiatic. Traveler Diosy's theory—He found a similarity to Far Eastern remains. (p. 9) [Includes notice of visit to Grand Canyon.]

1910 3.400 (May 5) Japanese amazed at America's size. Our plains, streets, and houses so vast, and even our women are not small. 56 here on a world tour. Statesmen, bankers, students, and professional men among them—To see Taft, but not the Czar. (p. 5) [Notice that "The Japanese were greatly impressed by the Rocky Mountains and Niagara Falls, but were unable to see the Grand Canyon"].

1910 3.401 (May 8) Queries from the curious and answers to them. (p. X8) [Includes query about age of the earth, with mention of Grand Canyon, apparently taken from the January 5, 1910 item.]

1910 3.783 (June 14) Nearly million for claims. House committee reports unfavorably 200 bills carrying $2,000,000 more. (p. 13) [Salton Sea.]

1910 3.402 (June 21) Signs with eagle feather. Thus Taft does his part toward making Arizona and New Mexico states. (p. 3) [President William Howard Taft uses an eagle feather to sign his surname to Congressional bill creating states of Arizona and New Mexico. Of note is the presentation of the blotter to Ralph Cameron by Secretary Norton, taking "that occasion to reward Mr. Cameron for saving his life fifteen years ago. The story was then told to President Taft. One night fifteen years ago while travelling alone in the Grand Canyon of Arizona, Mr. Norton became ill. When he could crawl no further he sank down, expecting to die. A mner discovered him and hurried to Mr. Cameron’s home for help. Mr. Norton was taken there and cared for until he recovered."]

1910 3.784 (December 25) Cross-country touring. Westgard's transcontinental trip develops interesting statistics. (p. C10) [Includes note of highest gasoline price at Colorado River, 50 cents per gallon.]

1911 3.403 (January 26) Another Roosevelt tour. The Colonel's itinerary for March extends to the Pacific coast. (p. 3) [Itinerary lists March 17 at Grand Canyon.]
1911 3.404 (March 12) Sportsmen dine “Buffalo Jones”. Intrepid big game hunter shows them pictorially his feats in the wild. Call for new game laws. Speakers say the time has come when steps must be taken for conservation in the woods. (p. 8) [Includes notice of films of capturing animals “on his ranch in the Grand Canyon of the Colorado”.]

1911 3.405 (March 17) Roosevelt at Grand Canyon. Passes night there with Gov. Sloan as guide. (p. 7) [“Williams, Ariz. March 16.—Theodore Roosevelt passed through this place today for the Grand Canyon of the Colorado, where he spent the night. He has been joined by his son Archie. Gov. Sloan, who guided the Roosevelt party through the Grand Canyon, discussed with him the recently adopted Constitution for Arizona. Mr. Roosevelt disapproves of several things in the document, but at Flagstaff he said that Congress should have granted Statehood, no matter what the Constitution contained.” —Entire item.]

1911 3.785 (September 24) A desert where extremes meet. Superlatives demanded in this spot, wherein “the body of things lies naked.” (Book Reviews, p. 573) [George Wharton James’ The Wonders of the Colorado Desert.]

1911 3.1008 (October 29) Where primitive people are more hospitable than New Yorkers. Friendly customs of Africans, and others which may seem strange to us here. (New York Times Magazine, p. 14) [Includes discussion of Havasupai; in context, apparently from or by George Wharton James.]

1911 3.786 (November 4) Rodgers to finish his flight to-day. Reaches Imperial Junction, 167 miles from Los Angeles, after night at a desert station. His longest single flight. Travels 133 miles over mountains without landing—Engine trouble forces him to come down. By C. P. Rodgers. (p. 1)

1911 3.787 (November 5) Rodgers held back near end of flight. Motor trouble forces him to landing at Banning, only 67 miles from Los Angeles. To end air journey to-day. Great welcome awaits him—Flies 100 miles after a hard start from Imperial Junction. By C. P. Rodgers. (p. 13)

1911 3.406 (December 3) Around the world on book wings. Volumes which will carry the reader to many climes and many peoples. (Book Reviews, p. 764) [Includes George Wharton James’ In and Around the Grand Canyon.]

1911 3.788 (December 10) Notes and gleanings. (p. 16) [Includes note on Colorado River and Salton Sea.]

1912 3.407 (March 24) Auto battles with snow. President Joy has exciting experience in New Mexico. (p. XX 3) [Henry B. Joy, president of Packard Motor Car Co. Passing notice of visits to Grand Canyon and Yuma, with comment on “Not a drop of water between Ash Fork and the Grand Canyon!”]

1912 3.408 (April 27) Obituary notes. (p. 15) [“William Henry Bonnett, who died in the Grand Canyon of the Colorado” [December 21, 1911], aged 81.]

1912 3.409 (June 2) Autoists build road. Seventy-mile stretch constructed for motor car tour. (p. C10) [“The new road connects the railroad of Ash Fork with the Government reservation at Grand Canyon.” The road was built “under the direction of the veteran ‘Bill’ Bass [William Wallace Bass], who antedates the railroad, building in that region,
and has been locally credited on many occasions with having dug the Grand Canyon himself."

1912 3.410  (June 19)  Tell of vast riches in the Grand Canyon. Men engaged in gold dredging operations expect to astonish the world. Have overcome obstacles. Steamboat placed in the great chasm—large capital only can extract the gold from silt. (p. 11) [Lees Ferry and Marble Canyon.]

1912 3.631  (August 25)  Geographers start on their long tour. European scientists have praise for the wonderful sights of New York. Will cross the continent. American geographers will accompany them on long trip and act as guides and hosts. (p. 9) [No direct mention of Grand Canyon; Transcontinental Excursion of 1912. Includes list of American participants and photograph of organizer William Morris Davis.]

1912 3.413  (October 20)  National parks ill kept. Cost and difficulty of reaching them deter many travelers. By F. G. Schwartz. [Letter to the editor.]

1912 3.414  (November 6)  Artist Schneider a suicide in hotel. Hangs himself by trunk strap at the Latham—Recently returned from West. Suffered from insomnia. Year and a half of sleepless nights, he wrote, made life unbearable—Attempted suicide at Grand Canyon. (p. 24) [William G. Schneider, water-color painter.]

1912 3.415  (December 1)  Models for travel show. 267 mile mountain range among exhibits to be offered. (p. 8) [Travel and Vacation Exhibition, New York, including miniature representations of "great natural wonders" including Grand Canyon.]

1913 3.416  (January 13)  Grand Canyon in motion pictures. (p. 11) ["An exhibition of motion pictures taken along the Grand Canyon of the Colorado by E. C. Kolb and E. L. Kolb, who have just finished a 101 days’ trip with their cameras, following the journey of Powell in 1869, will be made before the American Scenic and Historic Preservation Society at its meeting Wednesday evening at Delmonico’s." —Entire note.]

1913 3.417  (January 23)  Moving views of Colorado canyons. (p. 11) ["The travelogue, describing the photographic exploration of the canyons of the Colorado River, with scenes by moving picture of the shooting of the rapids, will be given again to-day at the Berkeley Theatre. The engagement of the Kolb Brothers, who made the trip, was originally for Monday, Tuesday, and Wednesday, matinées and nights, but at the close of last night’s performance it was decided to extend the exhibition another day, owing to the interest taken in the production. There are also moving pictures and illustrated slides from the Grand Canyon of Arizona." —Entire note.]

1913 3.1390 (January 26)  This week’s free lectures. (p. XX 6). [Includes "Grand Canyon of Arizona, by Dr. Thomas Edward Potterton, at Public School 63, Fourth Street, east of First Avenue, 8:15 P. M." —Entire note.]
1913 3.418 (March 9) Pennell on the pictorial possibilities of America. The famous etcher believes there is a big opportunity for artists to do something American for America if they have the eyes to see and brains to understand what lies near them. By Joseph Pennell. (p. 59) [Includes mention of the recently-deceased Louis Akin.]

1913 3.419 (June 26) Roosevelt's two trips. Will keep him away from city campaign, except for one week. (p. 4) [Includes note, "On July 8 the Colonel, with his sons, Archie and Quentin, will take a two months' camping trip in the Grand Canyon of Arizona."]

1913 3.420 (July 11) Bryan pays tribute to Brazil's envoy. [Lauro Severiano Müller, Minister of Foreign Affairs of Brazil. (p. 9) [Includes note, "Dr. Müller considered the Grand Canyon the most marvelous thing he saw in his travels."]

1913 3.421 (July 13) Roosevelt in New Mexico. Starts for Grand Canyon and later will see the Snake Dance. (p. 1) ["Theodore Roosevelt and his sons, Archie and Quentin, left here [Albuquerque] at noon to-day for the Grand Canyon of the Colorado, where they will spend a week. After that they will start with a pack train for the Hopi and Moki Indian villages to witness the snake dances and to visit the Painted Desert." —Entire note.]

1913 3.422 (July 17) Roosevelt in electrical storm. (p. 7) ["A terrific electrical storm, the worst experienced in this region in several years, raged about Col. Theodore Roosevelt and his party yesterday as they crossed the Colorado River in Bright Angel Cañon, on the way to the Bad Lands hunting grounds. The crossing was made in the cage suspended from a cable 800 feet [sic] above the river. Lightning played about the cage. The Colonel and his sons, Archie and Quentin, were drenched, but suffered no other mishap." —Entire note.]

1913 3.423 (August 3) 1915 exposition rising rapidly. (p. X 12) [Panama-Pacific International Exposition of 1915, San Francisco. Of note: "The Santa Fe Railway will expend $300,000 upon a concession in which the Grand Canyon of Arizona will be shown."]

1913 3.424 (September 14) Happenings and activities of motordom. First side car crosses continent. Five weeks of running bring Le Roy Snodgrass and his wife to New York. Desert and mountains fall to daunt couple—Incidents of their 5,600-mile trip. (p. X 16) [Includes passing mention of a side-trip to Grand Canyon.]

1913 3.789 (October 26) Topics of the week. (Book Reviews, p. 580) [Includes mention of Henry Van Dyke and "Daybreak in the Grand Canyon of Arizona"].

1913 3.425 (December 26) 7,304 Panama Canals; are represented by the Grand Canyon of the Colorado River. By D. E. Clapp. [Letter to the editor. Volume of the Grand Canyon calculated at 424,403,807,000 cubic yards, or the equivalent of 7,304 Panama Canals. Other comparative calculations are included.]

1914 3.426 (February 10) Hearst seeks Senate? Said to be after Arizona nomination—Buys land for hotel. (p. 1) [William Randolph Hearst, who plans "to erect a modern hotel that will be one of the most palatial and commodious in the entire West."]

1914 3.427 (March 6) Outdoor life seen under palace roof. Travel, Vacation, and Sportsmen's Show here for ten days' stay. (p. 9) [Of note: 'yard upon yard of painted canvas, serving as a background, depicts a panoramic illustration of the Grand Canyon, the Rocky Mountains, and other big game regions.']
1914 3.428 (September 27) News of books. (Book Reviews, p. 408) [Of note: "The Macmillan Company will publish next week an account of a trip 'Through the Grand Canyon from Wyoming to Mexico' by Ellsworth Kolb."]

1915 3.429 (May 7) Maharaja to see country. On his way to Frisco in private car he will visit big cities. (p. 9) [Maharaja of Kapurthala. Includes notice of planned stop at Grand Canyon.]

1915 3.430 (May 24) Whitman's trip West. Governor's party starts for exposition Wednesday—Return June 18. (p. 18) [Includes notice of New York governor's planned stop at Grand Canyon.]

1915 3.431 (May 27) Whitman starts for the big fair. (p. 6) [Includes notice of planned stop at Grand Canyon.]

1915 3.432 (July 6) Elks leave for coast. Special train for New Yorkers starts for Los Angeles reunion. (p. 9) [Includes notice of planned stop at Grand Canyon.]

1915 3.433 (August 22) Back-to-the-land a theme in fiction. * * * Recent novels from well-known authors. (Book Reviews, p. 302) [Includes review of Zane Grey's *The Rainbow Trail*.]

1915 3.434 (September 13) Crazed in Grand Canyon. New Hampshire tourist wanders without food or drink. (p. 16)

1915 3.790 (November 6) Brings $3,000,000 in gold. Arizona research investigator also returns on Cameronia. (p. 6) [Notice of arrival of lower Colorado River researcher Godfrey Sykes aboard the S.S. *Cameronia*, returned from a trip to England to research water records.]

1916 3.435 Travelers who choose America. Recent books that point out features of interest, especially in New England, for the tourist. (Book Reviews, p. 35) [Reviews include *First Through the Grand Canyon*, by John Wesley Powell (edited by Horace Kephart).]

1916 3.436 (June 11) Notes and items of the automobile trade. (p. XX 4) ["From Dodge Brothers, Detroit, Mich.: 'We have been notified that 'Death Valley Dodge,' driven by O. K. Parker of Los Angeles, has successfully made a trip to the bottom of the Grand Canyon of the Colorado and back to the tim. This is the first time in the history of motoring that the feat has ever been performed. It was impossible to use the burro trails, and Mr Parker made a new route to the bottom of the gorge, being compelled in many places to blast enormous rocks out of the way. The canyon is more than a mile deep at the point where the descent was made.'" —Entire note.]

1916 3.437 (November 16) To link national parks by one road. Aims of National Park-to-Park Highway Association approved by Interior official. (p. XX 2)

1917 3.438 (January 14) By air to national Parks, Wright says. Makes this prediction at Motoring Day meeting at Washington. (p. XX 4) [Orville Wright. Includes comment about Grand Canyon.]

1917 3.439 (July 15) "Redskin Rembrandt" paints western scenes. Blackfoot Indian achieves striking effects, partly with his thumb instead of brush. (p. 68) [Lone Wolf. Includes note of a picture that "is a study of color effects in the Grand Canyon."

1918 3.34  (May 18)  To unveil Powell tablet.  Lane to dedicate the Grand Canyon memorial on Monday.  (p. 15)  [cited*GCNHA Monograph 2: page 110]  [cited*GCNHA Monograph 8: page 11-5]

1918 3.441  (November 24)  Visits Indian city hidden in canyon.  New York traveler goes down into 3,000-foot Arizona chasm and studies a primitive civilization.  (p. 43)  [Leslie Spier studies the Havasupai.]

1919 3.35  (May 25)  Touring in national parks.  (Section 3, p. 5)  [cited*GCNHA Monograph 8: page 11-5]

1919 3.442  (May 28)  End 3,300-mile flight from Texas to Pacific.  (p. 3)  [Ellington Field “Gulf-to-Pacific” squadron of DeHaviland Four planes under command of 1st Lt. R. O. Searle.  Includes a flight into Grand Canyon.]

1919 3.36  (June 18)  Dr. Butler to tour West.  (p. 23)  [Nicholas Murray Butler.]  [cited*GCNHA Monograph 8: page 11-5]

1919 3.443  (October 20)  Aged Indian chief greets King Albert.  Picturesque meeting at Gallup—Squaws loath to pose for the Queen.  (p. 3)  [Includes note of visit to Grand Canyon, and injury to brakeman L. H. Cockrum, subsequently visited by the king and queen and decorated with the Order of Leopold II.]

1920 3.791  (January 11)  Why Salton Sea is salt.  (p. 78)

1920 3.444  (June 22)  Vick sees Tammany party.  Says the convention won't "pussy-foot" on wet plank.  (p. 2)  [Democratic Convention party strategy meeting.  Story filed from Grand Canyon, regarding Walter Vick, campaign manager for New Jersey Governor Edwards, and note of a “burro” trip into the canyon and a rim drive.]

1920 3.445  (August 1)  Latest works of fiction.  (p. 51+)  [Includes review of Richard Barry's *Fruit of the Desert*, noting a portion of the book takes place in Grand Canyon.]

1921 3.446  (March 13)  Mme. Curie sails May 7.  Discoverer of radium to receive one gram from American friends.  (p. E1)  [Includes note of plan to visit Grand Canyon.]

1921 3.447  (March 13)  Who's who in Senate.  Careers of fourteen new members summarized—Several picturesque characters.  (p. XX 2)  [Includes Ralph H. Cameron of Arizona.]

1921 3.448  (April 3)  Vast irrigation project.  Southwest pushing plan to reclaim 3,000,000 acres of desert land.  (p. 108)

1921 3.450  (May 29)  Memorial Hospital greets Mme. Curie.  Visit, intended to be quiet, is turned into an ovation for woman scientist.  Warned by her doctors.  Told that she must not overtax her strength—Social plans to be curtailed.  (p. 16)  [Includes note of plans to visit Grand Canyon.]
1921 3.451 (May 31) Mme. Curie to start West. Health improved, she will leave tomorrow for the Grand Canyon. (p. 6)

1921 3.452 (May 29) Air route for the Grand Canyon. (p. 11) ["The possibility of opening up an aerial passenger service through the Grand Canyon of Colorado [sic] is being planned by the War Department, it was learned here [San Antonio, Texas] today. Lieutenant Alexander Pearson Jr., transcontinental flier, has been ordered to make an investigation to find landing fields and to ascertain air conditions at various times of the day." —Entire note.]

1921 3.453 (June 3) Mme. Curie to rest at Grand Canyon. (p. 15) ["Mme. Marie Curie, accompanied by her daughters, Irene and Eve, and Harriet I. Eager, left here yesterday for the Grand Canyon where she will rest for several days. She will visit a number of cities on her way back East and will sail from this city for France on June 25." —Entire note.]

1921 3.454 (June 25) Mme. Curie finds America a marvel. Generosity, care for the young and for people's pleasures impress her in New York. Praises for our institutions. On eve of departure the scientist tells what she thinks of various cities. (p. 11) [Includes Curie's comment on Grand Canyon, "which, despite the heat, was a rare pleasure".]

1921 3.455 (July 10) Fixes Western Pacific valuation, $66,730,011. Road capitalized at $172,720,912—Account requires adjustment, says commission. (p. 91) [Grand Canyon Railroad valued at $1,359,398.]

1921 3.456 (August 17) Topics of the times. (p. 7) [Recounting Marie Curie's visit to America, and her quote of the "magnificent, savage aspects of the Grand Canyon".]

1921 3.457 (November 21) Foch Legion's guest at public reception. Hippodrome crowded and Marshal is praised by various speakers. (p. 17) [Marshal Foch feted by American Legion. Includes note of planned visit to Grand Canyon.]

1921 3.458 (December 3) Wilson's breakdown and the attempt to oust him. * * * Woodrow Wilson as I know him. By Joseph P. Tumulty (thirty-fifth instalment). (p. 15) ["Chapter XLI. The Western Trip." Includes note of a planned week's vacation to rest at Grand Canyon, subsequently declined by the President.]

1922 3.459 (January 20) Obituary notes. (p. 14) ["Moses Mosler, President of the Mosler Safe Company, died suddenly yesterday in the Grand Canyon, Arizona. He had lived at the Hotel Savoy in this city."]

1922 3.37 (February 24) Assails park concessions. (p. 12) [cited=GCNHA Monograph 2: page 110] [cited=GCNHA Monograph 8: page 11-5]

1922 3.1118 (March 2) Plan for Imperial Valley. Secretary Fall recommends development by irrigation. (p. 32)

1922 3.460 (March 19) Hoover in Grand Canyon. He and other officials inspect site for proposed Colorado River dam. (p. 17) [Herbert Hoover, then Secretary of Commerce, in Black Canyon as Chairman of the Colorado River Commission.]

1922 3.792 (May 26) Major H. W. Patton. (p. 18) [Obituary. "While on a trip for The San Francisco Examiner in 1891 he discovered the Salton Sea . . . ."]
1922 3.461 (August 10) Alights in Grand Canyon. Lieut. Thomas makes first airplane landing, 3,000 feet below the rim. (p. 13) ["The first airplane landing in the Grand Canyon of Arizona was made today [August 9] by Lieutenant R. B. Thomas, Officers’ Reserve Corps, of Kansas, at Turtle Head, Ponto [sic] Plateau, near El Tovar, the National Park Service announced. The landing place was 3,000 feet below the rim of the canyon.” —Entire note. Royal H. Thomas.]

1922 3.462 (August 13) Overland motoring joys. Many pleasures for well equipped tourists seeing America by automobile. (p. 91) [Includes note of travel from Maine Station to the canyon.]

1922 3.463 (October 9) Anna Gould here after ten years. Arrives with her husband, the Duke de Talleyrand, on trip around the world. Held up by Chinese troops. The Grand Canyon, Duchess says, most wonderful of all sights she has seen. (p. 12)

1922 3.38 (October 22) Insect menace checked. Destruction of Grand Canyon forests averted, says Forest Service. (Section 10, p. 12) [cited»GCNHA Monograph 2: page 110] [cited»GCNHA Monograph 8: page 11-5]

1922 3.39 (November 15) Mountbattens found Hollywood virtuous. Grand Canyon finest sight he has seen, says friend of the Prince of Wales. (p. 40) [cited»GCNHA Monograph 2: page 110] [cited»GCNHA Monograph 8: page 11-5]

1922 3.464 (December 14) Dr. Arthur W. Dow, noted artist, dies. Professor of Fine Arts at Teachers College, Columbia, for 18 years was 65. (p. 21) [Includes note that "his exhibition of a series of Grand Canyon paintings and other works attracted wide attention."]

1923 3.40 (December 29) Carbon from the air baffles scientists. (p. 3) [American Association for the Advancement of Science meeting. Includes brief summary of presentation about Grand Canyon by William Morris Davis.] [cited»GCNHA Monograph 2: page 110] [cited»GCNHA Monograph 8: page 11-5]

1923 3.41 (January 13) Dog in Grand Canyon debated by Cabinet. Harding must decide if lone postmaster may keep his pet despite the law. (p. 3) [cited»GCNHA Monograph 2: page 110] [cited»GCNHA Monograph 8: page 11-5 to 11-6]

1923 3.465 (May 15) Stereoscopic movies on single film strip. Walter Parkes shows the possibilities of his new camera in scenes of Grand Canyon. (p. 22)

1923 3.466 (September 6) Langdon Gibson dies; explorer-scientist. Brother of illustrator spent 18 months with Peary on northern coast of Greenland. (p. 15) [Gibson here noted to have been "one of the seven members of the Stanton expedition, which completed the first exploration in 1890 of the Grand Canyon and the Colorado River [sic]".]
1923 3.467 (September 9) Motoring East from the Pacific can be done at small expense. Eight-thousand-mile tour by two young men in small car, including dash into Mexico, at average of eight cents a mile—Motor trails in Great American Desert. (p. XX 12) [Includes note on the road from Bryce Canyon to North Rim of Grand Canyon through the "Khiabab forest" [sic].]

1923 3.44 (September 16) Adventure in the canyon. [Editorial.] (Section 2, p. 4) cited>GCNHA Monograph 2: page 110| cited>GCNHA Monograph 8: page 11-6

1923 3.45 (September 23) Asks plane to seek canyon explorers. Acting Governor of Arizona appeals to Geological Survey to help locate missing party. Drifting boat is seen. Rescuers to hunt for ten men charting flooded river in Grand Canyon. (pp. 1, 5) cited>GCNHA Monograph 2: page 110| cited>GCNHA Monograph 8: page 11-6

1923 3.46 (September 24) Canyon explorers not yet heard from. Arizona officials discuss sending a rescue party on foot from Diamond Creek. (p. 2) cited>GCNHA Monograph 2: page 110| cited>GCNHA Monograph 8: page 11-6

1923 3.47 (September 25) Patrol starts hunt for canyon explorers. Boat found floating down Colorado River was not used by the Survey party. (p. 9) cited>GCNHA Monograph 2: page 110| cited>GCNHA Monograph 8: page 11-6

1923 3.48 (September 26) Thinks canyon party safe. Director Birdseye declares disaster to explorers "inconceivable". (p. 5) cited>GCNHA Monograph 2: page 110| cited>GCNHA Monograph 8: page 11-6

1923 3.468 (October 21) World's wild life is fast vanishing. Many species extinct. Civilized man's weapons too much for the jungle folk. Automobile as a menace. Makes distant fields accessible to hunters and helps to reduce the game supply. (p. XX 4) [Includes plan to introduce pronghorned antelope herd to the Tonto Plateau.]

1923 3.469 (November 4) Brief reviews. (Book Reviews, p. 24) [Includes review of Mary Roberts Rinehart's The Out Trail.]

1923 3.470 (December 23) Deer in national forests. (p. XX 10)

1923 3.471 (December 28) Must lower rail fares. Lines in Southwest ordered to keep rate down to 3.6 cents. (p. 25) [Grand Canyon Railway exempt.]

1924 3.51 (January 29) Survey lecture repeated. Two crowds hear description of work in Grand Canyon. (p. 6) cited>GCNHA Monograph 2: page 111| cited>GCNHA Monograph 8: page 11-6

1924 3.55 (October 23) Daniels sees graft in the Grand Canyon. Accuses Republicans of planning to give profit of $1,000,000,000 to private interests. (p. 3) [cited»GCNHA Monograph 2: page 111] [cited»GCNHA Monograph 8: page 11-6]

1924 3.56 (November 23) Restoring wild antelope to Grand Canyon plateau. (Section 8, p. 12) [Tonto Plateau.] [cited»GCNHA Monograph 2: page 111] [cited»GCNHA Monograph 8: page 11-6]

1924 3.481 (December 21) Parlor car motor train may make regular trips to coast. (p. X 13)

1925 3.329 (February 15) Forest reserve becomes a range of death: Great deer herd, isolated on an Arizona plateau, is dying rapidly of starvation. By William A. Du Puy. (Magazine, p. 8)

1925 3.482 (March 29) Mapping a nation. (p. E6)

1925 3.794 (March 29) America’s Dead Sea is curbed forever. Since man locked the inland ocean created by the Colorado, it has been shrinking. By Roger W. Birdseye. (New York Times Magazine, p. 11) [Salton Sea.]

1925 3.483 (April 22) City brevities. (p. 38) [Of note: “The expedition of the United States Geological Survey through the Grand Canyon of the Colorado in 1923 will be described and illustrated by Lewis L. K. Freeman, explorer and author, tomorrow at 8:15 P. M., in the Doremus Lecture Hall at the College of the City of New York.”]

1925 3.484 (May 31) Curtain rises on nation’s park show. Automobile ushers the way to Uncle Sam’s vast scenic playgrounds in the Rocky Mountain region, and two million visitors are expected this year. By William A. Du Puy. (New York Times Magazine, pp. 4-5)

1925 3.1009 (June 19) Stone picks are dug up. Implements, 100 feet deep in earth, are found in Arizona. (p. 9) [Discovery at Camp Verde. “The discovery . . . corroborates evidence furnished by pictographs in Havasupai Canyon that man existed in the age of the dinosaurs.”]

1925 3.57 (August 10) Charge mishandling of Grand Canyon. Senators Ashurst and Cameron report concessions monopolized, funds squandered. “Tourist camp a disgrace.” Roads declared few and wretched, despite expenditure of over $700,000 since 1919. Indian agents assailed. Stockmen complain of Forest Reserve Service in Arizona and plead for a change. (p. 3) [cited»GCNHA Monograph 2: page 111] [cited»GCNHA Monograph 8: page 11-6]

1925 3.485 (August 12) Coolidge holds up Cameron land suits. Consents to postponement until Arizona Senator gets reports from mining engineers. (p. 3)

1925 3.486 (September 13) Many Scouts have seen America this summer. Vacation trips have proved educational as well as recreational—Panama sent twenty-five youngsters to the Maine woods. (p. X 12)
1925 3.487  (September 20) Mapping the states.  (p. E6)

1925 3.1121  (September 28) Arizona divides on "Cameron cases". Government suits against Senator's relatives and friends opens a bitter battle. "Frame-up" cry is raised. But opposition asks why criminal instead of civil action was not based on charges. Valuable claims involved. Senator's race for re-election enters into calculations of his supporters and foes.  (p. 8)

1925 3.488  (November 8) Gold in our waters. Engineer finds recoverable minerals at paying value in our flowing streams—Declares the gold in the sea is thus derived. By C. E. Holland.  (p. X 14) [Letter to the editor. Includes some discussion of the Colorado River and the Grand Canyon.]

1925 3.489  (December 6) To act without Arizona. Six states will ask Congress to approve Boulder Canyon Dam.  (p. 4)

1925 3.59  (December 6) Ellsworth sees Grand Canyon. Explorer expresses his reverence for the age-old story that Nature has written in its mighty rocks and cliffs. By Lincoln Ellsworth.  (Section 9, p. 6) [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1925 3.60  (December 27) Grand Canyon's bold cliffs to be bridged by man. Engineers to conquer the great chasm with a span that would be the highest of its kind in the world.  (Section 4, pp. 8, 21) [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1926 3.61  (January 13) Prints of first land animal discovered in Grand Canyon.  (p. 2) [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1926 3.62  (February 7) Deer flourish at Grand Canyon.  (Section 7, p. 15) [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1926 3.63  (February 24) Seeks ancient footprints. Dr. Gilmore will continue researches in the Grand Canyon.  (p. 7) [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1926 3.1122  (March 5) In lieu of Boulder plan. Senator Cameron's bill advocates an irrigation scheme in Arizona.  (p. 42) [Ralrh Cameron. Glen Canyon and Bridge Canyon Dams as substitute for Boulder Canyon project.]

1926 3.495  (April 18) Mr. Flagg goes journeying at home. [Book review by Llewelyn Powys. Review of James Montgomery Flagg's Boulevards All the Way—Maybe!]  (Book Reviews, p. 7)

1926 3.496  (May 4) House passes bills to enlarge national parks.  (p. 22)

1926 3.619  (May 16) La Hoh, Indian healer, dies in California. Body of venerable sage is lashed to burning raft and sent down the Colorado River.  (p. 16) [Report filed from Needles, California; reference to Mohave healer.]

1926 3.497  (May 25) Swedish royalty due here Thursday. Walker to greet Crown Prince and Princess, who will tour country until Aug. 1. White House visit listed. Heir to throne to break precedent by giving press interview—Also to indulge in archaeology hobby.
1926 3.498 (June 6) Radium uncovers new clues to earth’s age. Scientists using radioactive elements as time clocks now estimate that certain rocks were more than 1,100 million years in the making. (p. XX 4)

1926 3.499 (June 6) Motor influx to national parks. Yosemite to celebrate diamond jubilee by opening first paved highway—Road policy improving. (p. XX 16) [Includes note of roads funding for Grand Canyon.]

1926 3.64 (June 9) Smithsonian gets animal footprints. Age of fossilized tracks from Grand Canyon is reckoned in millions. (p. 23) [cited] GCNHA Monograph 2: page 111 |cited| GCNHA Monograph 8: page 11-6|

1926 3.500 (June 16) Geology Pullman ready. Princeton’s summer school on wheels to travel 10,000 miles. (p. 24)

1926 3.501 (July 17) Gustaf Adolf rides mule. He and princess enjoy climb to rim of Grand Canyon. (p. 28)

1926 3.502 (August 2) Authority of Bible on science denied. Rev. Mr. Cotton says it has failed to meet problems of modern times. (p. 20) [Includes note on receipt of fossil footprints from Grand Canyon by Smithsonian Institution.]

1926 3.503 (August 8) Africa to have a solar station. Dr. Abbot of the Smithsonian is building one to measure radiation—Scientists of museum have been busy in the field. (p. XX 8) [Includes notice of receipt of fossil footprints from Grand Canyon.]

1926 3.1123 (August 22) Johnson’s campaign now in full swing. By Alfred Holman. (p. E3) [Senator Hiram Johnson. Includes Colorado River dams.]

1926 3.504 (August 25) Host of Americans invite Queen Marie. But she cannot accept any because she will be guest of nation on tour. Will visit President first. Official itinerary of her trip will be given out Sept. 1—King is too ill to come. (p. 9) [Queen Marie of Romania. Includes note of plan to visit Grand Canyon.]

1926 3.505 (August 27) Thomas Moran dies; painter of the Rockies. (p. 17)

1926 3.1124 (August 29) Boulder Dam plan dragged to front. Hiram Johnson injects issue into his primary campaign in California. Project called hopeless. Seven states unable to agree on scheme which would be of benefit to all. Los Angeles still grows. City called wonderful except for its politics—The restored Santa Barbara. By Alfred Holman. (p. E3)

1926 3.506 (September 1) A painter of the Far West. (p. 22) [J. B. Gilder, letter to the Editor; about Thomas Moran.]

1926 3.507 (September 5) Says Rockies excel Alps. Italian hotel man, after tour of America, praises scenery. (p. 13) [F. C. Rota, general manager, Grand Hotel, Naples.]

1926 3.508 (September 12) Bernheimer hits dinosaur trail. Exploring party sights prehistoric tracks in Arizona. (p. X 13) [Charles L. Bernheimer.]
1926 3.509 (October 12) Marie’s detailed itinerary. Schedule of Queen’s American tour, all but her trip South. (p. 22) [Queen Marie of Rumania. Includes Grand Canyon.]

1926 3.510 (October 16) Queen Marie meets Mrs. Wilson’s party. With son and daughter, she is a guest at birthday tea aboard the Leviathan. Most of day in her suite. Queen accepts program to quit ship at quarantine and land at the Battery. (p. 1) [Include quotation regarding Grand Canyon.]

1926 3.65 (November 15) Big tourist year seen. Grand Canyon travel barometer records increase of visitors. (p. 25) [cited=GCNHA Monograph 2: page 111] [cited=GCNHA Monograph 8: page 11-6]

1926 3.511 (November 16) Maharaja of Indore here. Indian ruler, traveling incognito, reaches Salt Lake City. (p. 24) [Includes note of plan to visit Grand Canyon.]

1926 3.512 (November 17) Ex-Maharaja here despite scandal. Deposed ruler of Indore, in Utah, is silent on nautch girl and two murders. Entered using incognito. He wants to see America quietly—Moral-turptitude rule is recalled. (p. 1) [Includes note of plan to visit Grand Canyon.]

1926 3.513 (December 8) National park grabs. Shifting of boundaries by Congress has been quite general. By W[illard] G. Van Name. (p. 26) [Letter to the Editor. Includes comment on on timber on South Rim of Grand Canyon. Also see response by Stephen T. Mather, December 19, and rejoinder by Van Name, January 9, 1927.]

1926 3.514 (December 19) National park boundaries revised after long study. Director of the Service gives details of work done by the Commission on Outdoor Recreations and reasons for action. By Stephen T. Mather. (p. XX 12) [Response to letter by W. G. Van Name, December 8.]

1927 3.516 (January 9) More about the national parks. By Willard G. Van Name. (p. XX 8) [Rejoinder to Stephen T. Mather response of December 19, 1926.]

1927 3.1125 (January 11) Will urge Coolidge to push Boulder Dam. Western legislators seek speedy action on the Colorado River project. (p. 31)

1927 3.1126 (January 22) Boulder Dam backers see victory for bill. House supporters expect passage at this session—Hearing on special rule is held. (p. 4)

1927 3.1127 (January 22) Smith ridicules Roosevelt speech. Governor calls latter’s attack on water power policy a “comic monologue”. Recalls broken pledges. Executive tells Albany woman’s club power authority plan insures state control. (p. 30) [Includes Boulder Dam.]

1927 3.517 (January 23) Feminine ideal prevails. Softer lines, elaboration and unusual treatment of materials point way. (p. X 15) [Includes comment on Grand Canyon and Colorado River as a style of weaving.]

1927 3.518 (January 23) Sheer stuffs are very modish. (p. X 15) [Includes comment on “[p]ussywillow crêpe printed in one of the Grand Canyon all-over patterns”, referring to a weaving style.]
1927 3.1128 (January 26) Changes on Boulder Dam. Amendments to bill are asked to safeguard Utah rights. (p. 6)

1927 3.1129 (January 30) Boulder Dam bill plea. Governor of California urges Coolidge to help get it adopted. (p. 18)

1927 3.1130 (January 31) Boulder Dam. (p. 16) [Editorial]

1927 3.519 (February 1) The world's seven wonders as listed by Will Rogers. Signed, “The Mayor”. (p. 29) [Letter to the Editor; in part, a parody.]

1927 3.1131 (February 1) Boulder Canyon bill pressed in the House. Co-author asserts that power companies are working for its defeat. (p. 31)

1927 3.1132 (February 6) House hotly debates Boulder Dam bill. Advocates predict right of way and vote soon, and foes warn of a fight in the courts. (p. 17)

1927 3.520 (February 6) The social use of English. Difference of pronunciation by educated classes has made language a fascinating study. By Lawrence Grant. (p. X 16) [Letter to the Editor. Includes comment on story heard at Grand Canyon.]

1927 3.1133 (February 9) Press House to act on Boulder Dam bill. Advocates of the measure warn of danger of flood by delay of the project. (p. 2)

1927 3.1134 (February 12) Longworth favors Boulder Dam action. Glad to have bill come before the House, Speaker tells the supporters of measure. (p. 2)

1927 3.1135 (February 13) Boulder Dam opposed by merchants' group. Its Public Utilities Committee doubts electric power can be sold profitably. (p. E3) [Merchants' Association.]

1927 3.1136 (February 13) Seven states dispute over Boulder Dam. Vast Colorado River power and water project faces another sharp test in Congress. By L. C. Speers. (p. XX 5)

1927 3.1137 (February 20) Asks Senate to save the Imperial Valley. Hiram Johnson declares Boulder Dam a necessity to protect 60,000 residents. (p. 2)

1927 3.1138 (February 22) Filibuster started on Boulder Dam bill. Arizona and Utah senators seek to defeat measure—Author make invoke closure. (p. 3)

1927 3.1139 (February 23) Senate filibuster forces arrest call. Quorum is finally obtained at 2:41 A.M. after 14-hour battle over Boulder Dam bill. Absentees' queer excuses. Sergeant-at-Arms tries hard to round them up as Johnson presses fight for bill. (pp. 1, 3)

1927 3.1140 (February 24) Renew fight today on Boulder Dam bill. Truce in Senate filibuster after a session which lasted 29 1/2 hours. Danger in the contest. Senators fear that it will prevent passage of appropriation bills before March 4. (pp. 1, 4)

1927 3.1141 (February 25) Closure is asked on Boulder Dam. Senate by 46 to 30 receives Johnson petition and will vote on it tomorrow. Ashurst twice overruled. Tyson's plea to shut off debate on emergency officers' bill also goes to desk. (p. 2)
1927 3.1142 (February 25) Sloan raps dam proposal. Brooklyn Edison head sees move for federal power business.  (p. 2)

1927 3.1143 (February 26) Filibuster threat stirs up senators. Reed of Missouri demands vote on extending life of his Campaign Fund Committee. Will get it on Tuesday. Closure petition for Boulder Dam bill to be taken up Monday at Johnson's request.  (p. 2)

1927 3.1144 (February 27) Senate rejects closure moves. Refuses to end debate on the Boulder Dam and officers' retirement measures. Both seem to be doomed. Upper branch is in parliamentary jam, with adjournment only four days away.  (pp. 1, 16)

1927 3.1145 (February 28) Dying hard.  (p. 18) [Editorial.]

1927 3.1146 (March 12) Confer on Boulder Dam and Muscle Shoals. Senators and others decide on summer campaign to educate the public.  (p. 2)

1927 3.1147 (March 15) Committee to advise on Boulder Dam plan. Secretary Work announces that fact-finding body will go into whole project.  (p. 16)

1927 3.1148 (March 21) Pinchot pictures monopoly in power. Declares in letter to governors that is is forming with lightning swiftness. Seeks state regulation. Letter asserts that nation-wide trust beat Boulder Dam and Muscle Shoals bills.  (p. 21)

1927 3.1149 (March 22) Water power clash brings recess hint. Knight intimates legislature will wait adjournment on commission report. Senate passes measure. Downing declares interests that blocked Boulder Dam project fight governor's policy.  (p. 13)

1927 3.521 (April 24) Our national parks become universities. In the first decade of their organization public attendance has increased fivefold—Nature is the teacher and textbook in the great laboratories. By Stephen T. Mather.  (p. X 15)

1927 3.522 (June 19) When the Gibson Girl was young. (Book Reviews, p. 16) [Review of Una Hunt's Young in the "Nineties", including note of author's Washington life, with John Wesley Powell's visit to her home.]

1927 3.701 (June 20) Sports of the Times. By John Kieran.  (p. 17) [Includes reference to boxer Jack Dempsey in training, "going to Colorado [sic] to push back the walls of the Grand Canyon a bit."

1927 3.524 (July 2) "Phantom" outlaw tells life story. Matthew Kimes, terror of Oklahoma, is resigned to fate as deputies guard him. He had two close escapes. Once when pursued, bandit says, he stole a car, found a baby inside and returned it.  (p. 6)

1927 3.525 (July 6) Gets fossil footprints. National Museum receives marks made 25,000,000 years ago.  (p. 22) [Grand Canyon collections of Charles W. Gilmore.]

1927 3.1150 (July 12) A new move on the Colorado.  (p. 24) [Editorial.]

1927 3.66 (July 21) German ambassador calls Grand Canyon model for America's new style of skyscraper.  (p. 9) [cited=GCNHA Monograph 2: page 111] [cited=GCNHA Monograph 8: page 11-6]
1927  3.526  (July 24) Western bandit is at last taken. Matt Kimes, who robbed banks in Oklahoma, led the officers of four states a long chase—His bold gang broken up.  By Edward H. Smith.  (p. XX 2)  [Includes portrait of Kimes.]

1927  3.527  (August 19) The open book.  (p. 16) [Editorial. Comments on John Campbell Merriam's plans for "educational and inspirational" uses of the national parks.]

1927  3.1151  (August 28) Hoover's plan to harness our waters. They are the nation's greatest undeveloped resource, says the Secretary of Commerce, whose program embraces seven major development projects—He forecasts a rich harvest in wealth.  By L. C. Speers.  (pp. XX 1, 8)

1927  3.68  (September 11) "Letting down": One of the boats of the Eddy Expedition negotiating a turn in the swift current of the Colorado River where falls are numerous and submerged rocks a constant danger.  (Rotograveur Picture Section)  [Clyde Eddy expedition.]  [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1927  3.69  (September 11) "The nine who pulled through": The members of the expedition which successfully navigated the rapids of the Colorado River at high water. Clyde L. Eddy, who led the party, is in the centre.  (Rotograveur Picture Section)  [Clyde Eddy expedition.]  [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1927  3.70  (September 11) One of the six hundred rapids of the Colorado River: The Marble Canyon, which had never before been run successfully, negotiated by the Eddy Expedition on its trip from Greenriver, Utah, to Needles, Cal.  (Rotograveur Picture Section)  [Clyde Eddy expedition.]  [cited=GCNHA Monograph 2: page 111]  [cited=GCNHA Monograph 8: page 11-6]

1927  3.1152  (September 28) Will Rogers for Boulder Dam, but flood victims come first.  [Signed, "Will."]  (p. 27)

1927  3.1153  (October 2) Accord is near on Boulder Dam. Arizona withdraws four years' opposition, assuring project's early adoption. Some details still wait. Conference of seven states presses for action, foreseeing new claims by Mexico.  (p. E1)

1927  3.1154  (October 9) West still divided over Boulder Dam. Conference of states takes a month's vacation to let turmoil settle. Setback for power plan. Big electricity buyers' interest wanes—Coast politics begins to warm up.  By Chapin Hall.  (p. E6)

1927  3.1155  (November 11) Charges huge lobby against Boulder Dam. Johnson says "multi-millionaires" seek to stab Imperial Valley people in the back.  (p. 2)

1927  3.1156  (November 13) Boulder Dam.  (p. E4)  [Editorial.]

1928 3.80 (January 15) With a pilgrim in the Grand Canyon. There the record of earth's history is written boldly in the rocks. **By Lincoln Ellsworth.** (Section 5, pp. 10-11) [cited] GCNHA Monograph 2: page 111 | cited] GCNHA Monograph 8: page 11-6

1928 3.1160 (January 22) Labor federation for Boulder Dam. But council believes federal commission should control operation of development. Favors a power inquiry. Wires Senator Watson any investigation should be of a non-partisan character. (p. 17)

1928 3.530 (February 19) Mail for near-by town goes 1,025 miles. (p. 30) [Inauguration of Kaibab Forest, Arizona, post office.]

1928 3.1161 (March 17) Boulder Dam measure revised for Senate. Irrigation Committee, with only Ashurst dissenting, reports favorably on amendments. (p. 13)

1928 3.531 (April 8) Lieut. Thomas plans endurance flight. Flier who landed in Grand Canyon will make attempt in Bellanca plane. (p. 24) [Royal H. Thomas.]

1928 3.1162 (April 8) Boulder Dam. (p. E4) [Editorial.]

1928 3.532 (April 15) Searchers for Lindbergh find new plane in Arizona with note, "Gone to Lunch". (p. 9) [News item from Williams, Arizona. Appended is a separate news item filed from Grand Canyon, noting Charles A. Lindbergh stop at Grand Canyon landing field.]

1928 3.533 (April 15) The family goes up for a flight. Fathers, mothers and children are now seen at the airports—Other aviation items. (p. 150) [See item, "Flights to National Parks".]

1928 3.534 (April 16) Lindbergh drops in, surprising Denver. Unheralded, he alights among 3,000 watching military air manoeuvres. Flew from Grand Canyon. There he abandoned recent reticence and talked of previous visit on muleback. (p. 16) [Charles A. Lindbergh. Includes appended news item filed from Grand Canyon.]

1928 3.1163 (April 21) Engineers score plan for one Boulder Dam. Committee here bases recommendation on the study of present project. (p. 30)

1928 3.535 (April 22) Hotels in rail valuation. Commerce board reconsiders and decides for Santa Fe. (p. 52) [Includes notice of decision that El Tovar and Bright Angel hotels "were essential items of that railroad's carrier equipment".]

1928 3.536 (April 22) Model consulate planned in Spain. One of our buildings at the Seville Exposition will be permanent. Cost is placed at $200,000. After exhibits are removed the structure will go to the Consular Service. (p. 60) [Consulate will incude a scale model of Grand Canyon.]

1928 3.1164 (April 27) Harnessing the Colorado. (p. 24) [Editorial.]

1928 3.795 (April 29) Colorado River waits for the engineer's curb. While it remains unbridled the possibility of floods is a menace—Seven states unable to agree over the plan to control its waters. **By L. J. Burrud.** (p. XX 10)

1928 3.1165 (April 29) Imperial Valley's menace declared to be very real. Mr. Entenman gives data from official reports and surveys to refute Mr. French's arguments. **By Paul M. Entenman.** (p. E5) [Letter to the Editor.]

1928 3.1167 (May 22) Will Rogers thinks Congress all wrong on Boulder Dam. By Will Rogers. (p. 29) [Letter to the Editor.]

1928 3.1168 (May 23) Boulder Dam plot charged to Hearst. Leatherwood, in House, calls measure a “steal” for publisher’s papers. Senate takes up measure. Johnson disputes Smoot’s figures on cost—Proponents there insist on vote before adjournment. (p. 6)

1928 3.1169 (May 24) Boulder Dam battle holds House interest. Douglas of Arizona strongly opposes measure, while Swing of California defends it. (p. 2)

1928 3.1170 (May 24) Boulder Dam. (p. 28) [Editorial.]

1928 3.1171 (May 26) Boulder Dam bill passed by House. $125,000,000 project accepted without a roll-call after recommitment is lost. Senate vote is demanded. Johnson’s threat to keep chamber in session for it appears likely to be thwarted. (p. 2)

1928 3.81 (May 27) Utah and Nevada in the news. [Discovery of cave in “...the Utah end of the Grand Canyon”; Roaring Springs Canyon.] (Section 3, p. 4) [cited>GCNHA Monograph 2: page 111] [cited>GCNHA Monograph 8: page 11-6 to 11-7]

1928 3.1172 (May 28) Johnson to fight on for Boulder Dam bill. Says he will hold up other business till senate votes on measure. (p. 17)

1928 3.1173 (May 29) Senate filibuster on Boulder Dam goes on all night. Foes tie up the Senate, but agreement is in sight to adjourn today. Deal for December action. Dawes had defeated setting final hour by a vote against leaders on a tie. Ashurst holds the line. By Richard V. Oulahan. (pp. 1, 3)

1928 3.1174 (May 30) Congress ends session with Senate in uproar over Boulder Dam bill. Filibuster rasps nerves. Bruce starts tumult in which fiticuffs are threatened. Attempt to cry him down. Johnson wins an agreement for action on Boulder Dam in December. By Richard V. Oulahan. (pp. 1, 3)

1928 3.1175 (May 30) Senators battle over Boulder Dam. Bruce spurs Johnson and Robinson to anger by his opposition tactics. Session becomes bedlam. Marylander charged deal to adjourn grew out of preferred position given to bill. (p. 3)

1928 3.537 (May 31) Lindbergh in Arizona. Dines at Grand Canyon as he follows air mail route. (p. 21) [Charles A. Lindbergh.]

1928 3.82 (June 10) Uncle Sam buys the Bright Angel. (Section 3, p. 4) [Bright Angel Trail.] [cited>GCNHA Monograph 2: page 111] [cited>GCNHA Monograph 8: page 11-7]

1928 3.538 (June 17) Secrets of planet Mars to be revealed by a huge telescope at Grand Canyon. (p. 45) [Plans for telescope at Desert View by "N. W. Ritchey" (i.e., G. W. Ritchey, q.v.).]

1928 3.796 (July 8) New map shows land below level of sea. Geological Survey issue chart of Salton Basin, 250 feet lower than ocean. (p. 4)

1929 3.1207 (May 10) Against "Hoover Dam" plan. President opposes naming the Boulder project after him. (p. 22)

1929 3.547 (May 19) Men who carry America's divining rods. Mapmakers of the Geological Survey have for fifty years searched the land for its hidden sources of wealth. By Don Glassman. (New York Times Magazine)

1929 3.548 (May 29) Miss Stinnes here on world auto trip. Daughter of German financier tells of long journeys over trackless wastes. Traveled 27,000 miles. Dynamited path over the Urals—Has lost 28 pounds on tour—Hails industrial progress of America. (p. 12) [Clairenore Stinnes. Includes note of having visited Grand Canyon.]

1929 3.549 (June 2) California adds to her pageantry. Spectable based on Indian lore staged at Perris this year. Such shows dot the state. Some have their background in religion—Arizona reports continued prosperity. By Chapin Hall. (p. E2) [Includes comments about Navajo Bridge, to be opened in June.]

1929 3.95 (June 23) Bridge now spans the Grand Canyon. Historic and surveying backgrounds of towering steel structure are traced. Marble Gorge straddled. Near there the Mormon renegade Lee hid from pursuers—Adventures of 1923 surveying party. By Lewis R. Freeman. (Section 3, p. 7) |cited»GCNHA Monograph 2: page 112| |cited»GCNHA Monograph 8: page 11-7|

1929 3.1208 (June 24) Promises start on Boulder Dam. Wilbur assures people of Las Vegas, who face an unemployment problem. Workers swarm to city. Residents have had to provide for hundreds camped in tents and shacks in the desert. (p. 43)

1929 3.1209 (June 26) Hoover proclaims Boulder Dam pact. President makes the project effective on ratification of six of the seven states. Hopes Arizona will enter. Then, he explains, the question of Colorado River water rights will be settled. (p. 19) [Includes text of proclamation.]

1929 3.550 (June 29) Air-rail riders reach Los Angeles. Party of ten that left here Wednesday night arrive in time for dinner. In flight for 2,000 miles. Guests of Transcontinental Air Transport, ahead of schedule, look down on Grand Canyon. (p. 2)
1929 3.551 (June 29) Two Army fliers die in collision of planes. Lieut. W. G. Plummer and cadet killed in fall at Riverside, Cal.—Other craft escapes. (p. 2) [Plummer is noted to have been one of the pilots who looked for the missing Hydes on the Colorado River, and who sighted the Hydes' scow.]

1929 3.96 (June 29) Bridging the untamed Colorado. [Editorial.] (p. 16) [cited>GCNHA Monograph 2: page 112] [cited>GCNHA Monograph 8: page 11-7]

1929 3.97 (June 30) In: Ask city to remove Lindbergh beacon. By Chapin Hall. (p. E2) [See "A New Link Forged"; about Navajo Bridge.] [cited>GCNHA Monograph 2: page 112] [cited>GCNHA Monograph 8: page 11-7]

1929 3.1210 (July 14) More hope is seen for Boulder Dam. Southwest is encouraged by late developments despite Arizona's attitude. Reform for Los Angeles. By Chapin Hall. (pp. E1-E2)

1929 3.1211 (July 29) Law-abiding town planned at Boulder Dam; government leases will bar bootleggers. (p. 1)

1929 3.1212 (August 4) Boulder Dam act faulty. First issue to be settled is declared to be that concerning division of water. By G. E. P. Smith. (p. E5) [Letter to the Editor.]

1929 3.1213 (August 4) Mexico to demand full water share. Will insist on equality basis at conference on Boulder Dam distribution. (p. 19)

1929 3.1214 (August 18) Boulder Dam lands. Warning against the high prices asked for useless tracts. (Real Estate section, p. 15)

1929 3.1215 (September 24) Higher Boulder Dam is now proposed. Secretary Wilbur orders study of project for 25-foot rise to add power and safety. (p. 3)

1929 3.1216 (October 3) Seek Boulder Dam power. Western companies and states will take all generated. (p. 55)

1929 3.1217 (October 27) Boulder Dam. (p. E4) [Editorial.]

1929 3.1218 (November 6) Arizona and the Colorado. (p. 24) [Editorial.]

1929 3.1219 (December 27) States will confer on Boulder Dam. (p. 48)

1930 3.1220 (January 4) Wilbur will speed Boulder Dam work. Will sign contracts for sale of power regardless of state governors' action. (p. 3)

1930 3.1221 (January 10) Harrison teases Smoot over dam. Evokes Senate chuckles by urging "Hoover-Johnson" as name instead of "Boulder." (p. 26)

1930 3.1222 (January 29) Wilbur assailed on Boulder Dam. Norris tells Senate that the secretary would allocate all power to corporations. (p. 32)

1930 3.1223 (February 23) Boulder Dam plans wait state accord. $165,000,000 project, baffling in its details, really easy to explain. But difficult to settle. Principle problem is allocation of water and power among seven states involved. By Chapin Hall. (p. 52)
1930

3.1224  (February 27) Navigate Colorado River. A. W. North takes wife and daughter through treacherous waters. (p. 48) [A. W. North, daughter Mary, aged 10, and civil engineer George Brayman; from above Boulder Dam site to Parker, Arizona. \textit{N.B.}: Mary Remsen North also authored \textit{Down the Colorado, by a Lone Girl Scout} (New York and London: G. P. Putnam's Sons, 1930); see Item no. 6.172.]

3.1225  (March 9) California agrees on Boulder Dam. That is, Imperial Valley and Los Angeles are now united against Arizona. Likely to ask court rule. Los Angeles County supervisors embarrassed by $21,000,000 they cannot spend. By \textit{Chapin Hall}. (p. 56)

3.1226  (April 10) Progress on the Colorado. (p. 23) [Editorial.]

3.552  (April 27) Much of nation unmapped. Wide areas of the United States still uninhabited. (p. 192)

3.1227  (April 28) Sign for Boulder Dam. Three Los Angeles lessees contract for 64 per cent of power. (p. 42)

3.1229  (June 8) Princeton plans wide geology tour. Five international scientists and 16 students to go 11,000 miles in this country. (p. 31)

3.1230  (June 24) Fight $10,660,000 for Boulder Dam. Arizona senators continue opposition to bill carrying appropriation for work. (p. 5)

3.1231  (June 27) Lose fight on Boulder Dam. (p. 7)

3.1232  (July 8) Work is started at Boulder Dam. Telegraph flashes order from Washington setting waiting men at their tasks. Wilbur hails a new era. Conquest of desert, new mining activities, industrial growth in three states are cited. Dam will be the largest. To dwarf Elephant Butte—Railway, road and town will be built first. (p. 3)

3.1233  (July 12) Bars canyon plants. Federal board rejects projects as conflicting with Boulder Dam. (p. 26)

3.1234  (July 13) Boulder Dam begins its mighty career. Construction is started of a vast engineering project rivaled only by the building of the Panama Canal, signalizing our conquest of the great American desert and opening a new era of development. By \textit{Elwood Mead}. (p. 117)

3.1235  (July 14) Boulder Dam jobs filled. Wilbur warns unemployed it will be months before forces increase. (p. 4)

3.1236  (July 27) Arizona is annoyed at Boulder Dam case. Feels California got more than her share in allotment of water and power. (p. 49)

3.1237  (July 27) Hits Boulder payments. Arizona charges dam disbursements are illegal. (p. 17)
1930 3.1238 (August 17) Need 14 engineers at Boulder Dam. (p. 40)

1930 3.554 (August 31) Dr. Field reviews geologists' tour. Princeton's International School traveled 15,000 miles during this summer. Studied delta drainage. Most trying experience was night in Grand Canyon with temperature above 100 degrees. (p. N1) [Richard M. Field, director of International School of Geology, Princeton University.]

1930 3.555 (September 7) Are we going to the dogs? By W. E. Farbstein. [Letter to the Editor, regarding lack of original thinking; includes comment about William Morris Davis's [obvious] conclusion "that the Grand Canyon of Colorado [sic] is rapidly disappearing".]

1930 3.1239 (September 18) Wilbur renames Boulder Dam for Hoover and starts work on $165,000,000 project. (p. 1)

1930 3.1240 (October 15) Hoover to speed dam. President says Arizona suit will not hold up construction. (p. 26)

1930 3.1241 (October 26) New pioneers in old West's deserts. The prospect of work at Hoover Dam lures men from many states, and they trek in ramshackle autos. By Duncan Aikman. (New York Times Magazine, pp. 7, 18)

1930 3.556 (November 16) Invitations from here fluster Frau Einstein; says she won't let savant land in New York. (p. 1) [Including note of Albert Einstein plan to visit Grand Canyon in February.]

1930 3.1242 (November 27) Holds alien ban legal in Boulder Dam labor. McCarl says contract favoring ex-service men would comply with 1928 law. (p. 28)

1930 3.1243 (September 17) To begin Boulder Dam line. Merritt-Chapman gets contract for 22-mile railroad in Nevada. (p. 11)

1930 3.1244 (December 21) Biggest of dams. (p. 47) [Editorial.]

1931 3.1010 (January 4) Books in brief review. (Book Reviews, p. 10) [Includes review of Hoffman Birney's Roads To Roam.]

1931 3.1245 (January 10) Hoover Dam in Black Canyon displaces name of “Boulder”. (p. 34)

1931 3.702 (January 24) Questioning Meteor Butte. In: Topics of the Times. (p. 13) [Includes reference to Frederick S. Dellenbaugh and Powell Expedition.]

1931 3.557 (March 2) Einstein is “Great Relative,” Hopis decide on his theory. (p. 5) [At Grand Canyon, Hopi inquiry into the “business” of Albert Einstein is told of the theory of relativity.]

1931 3.1246 (March 12) Hoover Dam job let at $48,890,999. Wilbur accepts the Six Companies' offer for construction of Boulder Canyon project. (p. 5)

1931 3.1247 (March 13) Begins 6-year work at the Hoover Dam. Chief engineer sets men to building camps—Plans to start the railroad soon. Full activity by July. Force will reach 2,400 as soon as power is available to begin huge structure itself. (p. 16)
1931 3.1248 (March 14) A big dam out West.  (p. 18)  [Editorial.]
1931 3.1249 (March 21) First Boulder Dam financing to consist of $2,000,000 bonds.  (p. 28)
1931 3.558 (April 12) Will visit Grand Canyon.  Japanese couple's itinerary also includes trip to Yosemite.  (p. 16)  [Prince Takamutsu, brother of Emperor Hirohito, and Princess Kikuko.]
1931 3.560 (May 17) Celebrities in fancy dress.  Here as abroad costumes are often used to further a cause or cater to love of pomp.  (p. 87)  [Includes note of Albert Einstein's visit to Grand Canyon.]
1931 3.798 (June 21) Treasures and amenities of our rivers.  Great wealth flows in their tides, also the subtler values of life.  By R. L. Duffus.  (pp. 12-13, 21)
1931 3.1250 (June 28) Irrigation: Miracle of the arid West.  It has transformed many deserts, but much still remains to be done.  By Ray Lyman Wilbur.  (New York Times Magazine, p. 8-9, 20)
1931 3.562 (July 26) Princeton geologists start tour tomorrow.  22 undergraduates will study natural resources in West and in Canada.  (p. N6)
1931 3.1251 (July 26) A Wild West town that is born tame.  Boulder City, where Hoover Dam workers will live, offers contrasts with frontier's old "hells-on wheels".  By Duncan Aikman.  (pp. 6-7, 15)
1931 3.1252 (August 19) Labor asks fair pay on Boulder Dam job.  A. F. of L. council forwards protest from Nevada workers to Doak, urging him to act.  Wage cutting is charged. Contractors on federal project accused of going far below prevailing rates.  Wide unrest described.  Fear is voiced that reductions will spread if sanctioned on government work.  (p. 23)
1931 3.1253 (August 22) Seeks to relieve Hoover Dam labor.  Doak acts on complaint of Las Vegas body forwarded to him by Green.  Offers conciliator's aid.  Federal Employment Service also takes up churge that wages debar "decent living."  (p. 4)
1931 3.1254 (August 22) [Imperial Irrigation District of California ready to negotiate government contract for All-American Canal.]  (p. 4)
1931 3.563 (November 7) Envoy gives Hindenburg book of views of American parks.  (p. 22)  [Includes quotation of German President von Hindenburg, mentioning desire to visit Grand Canyon.]
1932 3.565 (January 3) Princeton outlines geological survey. 10,000-mile transcontinental tour of inspection of soil to start next summer.  (p. N8)

1932 3.566 (January 30) The screen. By Mordaunt Hall.  (p. 13) [See "In the Grand Canyon", a review of the film, "The Rainbow Trail", based on Zane Grey's novel of that title, produced by Fox Film Corporation.]

1932 3.567 (February 7) Plaque to honor Stephen T. Mather. Unveiling ceremony will be held in Mount Rainier National Park on July 4. Other sites being chosen. Series of tributes will be placed in honor of founder of National Park System. (p. N2) [Includes note of plaque to be placed at Yavapai Point, and possibly also on the North Rim.]

1932 3.1255 (February 11) Flood waters halt Hoover Dam work. Cloudburst speeds up Colorado River, sweeping bridge away and filling tunnels. (p. 24)

1932 3.799 (April 3) New canal for desert to water great area. Project recently approved in connection with the Hoover Dam will give relief to Imperial Valley. (p. XX 7) [All-American Canal.]

1932 3.1256 (April 11) At Boulder Dam. By Theodore Dreiser. (p. 14) [Letter to the Editor.]

1932 3.568 (April 16) Dr. F. E. Miller dies; throat specialist. Physician, 73, had made a deep study of the scientific phases of vocal art. Wrote books for singers. Inventor of electric system of tone production succumbs after ten days' illness. (p. 15) [Frank Ebenezer Miller. Includes note that he wrote "The Goal", dealing with the fall of Lucifer, for which he gained inspiration at the Grand Canyon.]

1932 3.569 (July 5) The Mather memorials. (p. 14) [Editorial.]

1932 3.570 (September 2) Canyon hotel destroyed. Union Pacific lodge is burned with loss of $1,000,000. (p. 30) [Grand Canyon Lodge.]

1932 3.1257 (September 7) Mr. Rogers makes a report on the Hoover-Boulder Dam. By Will Rogers. (p. 21) [Letter to the Editor.]

1932 3.571 (November 13) Arizona is divided on highway project. Proposed transcontinental road would divert tourists to central section. North and south object. $15,000,000 sought from R. F. C. for irrigation program would ease unemployment. By E. J. Webster. (p. E5)

1932 3.1258 (November 14) River is diverted at Hoover Dam site. Water is turned from the Colorado's bed into hole in canyon wall to permit excavation. First step in huge task. Bore represents a year's toil and the dam construction will require three years more. (p. 12)

1933 3.572 (January 1) Miscellaneous brief reviews of recent non-fiction. (Book Reviews, p. 10) [See "The Colorado River", review of Robert Brewster Stanton's Colorado River Controversies (edited by James M. Chalfant).]

1933 3.1259 (February 19) Big copper cable deals. Los Angeles Water District orders 3,000,000 pounds. (p. N13) [Colorado River Aqueduct.]
1933  3.573  (May 5)  Age of earth put at 2,000 million.  Dr. Merriam says new data may add eons to period of planet’s existence.  Cites the Grand Canyon.  Time has already destroyed some of its vital evidence, he says in lecture here.  (p. 34)  [John C. Merriam.]

1933  3.574  (May 7)  This hoary earth.  (p. E4)  [Editorial.]

1933  3.1260  (May 11)  Scrip barred at Boulder Dam.  (p. 6)

1933  3.1261  (May 14)  Name of “Boulder” restored to Hoover Dam by Ickes to end controversy in the West.  (p. 31)

1933  3.575  (June 11)  Ellsworth in trim for rigors of trip.  Daily schedule of wrestling keeps him fit for flight across the Antarctic.  Plans a ship gymnasium.  Explorer also intends to command his vessel on voyage South—50 books in library.  (p. 26)  [Lincoln Ellsworth.  Includes comment about hiking Grand Canyon trails.]

1933  3.1262  (June 12)  Boulder Dam is shown.  Other Trans-Lux scenes include Mrs. Roosevelt’s trip to West.  (p. 20)  [Newsreel.]

1933  3.1263  (June 19)  Boulder Dam will contain huge refrigerating system.  (p. 1)

1933  3.1011  (July 2)  Miscellaneous brief reviews.  Indians in the Southwest.  (Book Reviews, p. 9)  [Includes review of Mrs. White Mountain Smith’s *Indian Tribes of the Southwest*.]

1933  3.576  (July 9)  Latest works of fiction.  (Book Reviews, p. 13)  [See “Western Gold”, a review of George B. Rodney’s *The Canyon Trail*.]

1933  3.1264  (July 11)  Boulder Dam post goes to A. P. Davis.  Ickes appoints him consulting engineer of the Bureau of Reclamation.  (p. 8)

1933  3.577  (July 16)  Ten fleet hours from coast to coast.  Pilot Hawks pictures a voyage ten years hence, high above areas of storm.  By Frank M. Hawks.  (New York Times Magazine)

1933  3.1267  (August 8)  A. P. Davis is dead; eminent engineer.  Known as “father of Boulder Dam”—Served government for twenty-one years.  Built big Soviet plant.  Hydroelectric system in Russia his last large job—Expert on Panama Canal plan.  (p. 17)  [Arthur Powell Davis.]  

1933  3.1268  (August 29)  W. A. Bechtel dies in Moscow hotel.  The head of six contracting companies building the Boulder Dam was 61.  Entered railroad construction with team of mules and branched into roadbuilding.  (p. 17)
1934 3.1269 (January 2) Work on Boulder Dam gates. (p. 35)

1934 3.98 (February 18) Park's visitors increase. Trend is taken to indicate returning prosperity. (Section 10-11, p. 12) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1934 3.1271 (March 4) Dam ahead of schedule. Boulder project to be finished early in 1936. (p. E6)

1934 3.1272 (May 13) The government proceeds with its construction work. (p. E7)

1934 3.1273 (May 27) Honor for engineer. Wyoming to recognize Dr. Mead's work in reclamation. (p. XX 5) [Elwood Mead.]

1934 3.1274 (June 10) Fisherman's paradise is to be created in the waters of vast Boulder Dam zone. (p. N2)

1934 3.579 (June 18) Grand Canyon scene will mark "park" stamp. (p. 8)

1934 3.580 (July 14) Off for canyon today. (p. 14) [Clyde Eddy.]

1934 3.581 (July 18) To tour Grand Canyon. Party headed by Clyde Eddy plan trip by boat. (p. 21)

1934 3.582 (July 22) By boat through Grand Canyon. Clyde Eddy leads group through 250 treacherous rapids. (p. 23)

1934 3.583 (July 27) Eddy and Dr. Frazier run Colorado rapids. Explorers complete first leg of hazardous journey to Boulder Dam. (p. 19) [Clyde Eddy and Russell G. Frazier.]

1934 3.584 (August 19) Rapids explorer ends third trip. Clyde Eddy, back from latest Grand Canyon experience, to write new book. Is anxious to return. But would not use a boat, as he prefers land route to study cliff dwellings. (pp. N1-2)

1934 3.585 (August 28) Prince of Japan says no. Arizona woman asks if he knows sister's houseboy in New York. (p. 12) [Prince Kaya at Grand Canyon.]

1934 3.1275 (November 18) Arizona again fights the Colorado project. The state's effort to halt work on Parker Dam recalls its attitude toward water diversion. (p. XX 9)

1935 3.1276 (January 6) Arizona worried by water compact. To insist on its rights may block federal assent to funds. Fights a lone battle. Secretary Ickes's rejection of Colorado River agreement caused dismay. By E. J. Webster. (p. E6)

1935 3.586 (January 30) F. S. Dellenbaugh, explorer, is dead. A founder of noted club here, was active as author and artist at 81. Pioneer of Southwest. Took part in Major Powell's trip through Grand Canyon—Last work on Indian opera. (p. 19)

1935 3.587 (January 31) Frederick S. Dellenbaugh. (p. 18) [Editorial.]

1935 3.1277 (February 2) First water runs into Boulder Dam. Colorado River harnessed as engineers close tunnels that diverted stream. Will form 115-mile lake. Project is eventually expected to develop 1,850,000 horsepower of electricity. (p. 15)
1935 3.1278 (February 22) Last concrete poured into main Boulder Dam. (p. 44)

1935 3.588 (February 24) Two airlines start scenic flights; Boulder Dam, Grand Canyon on routes. (p. X 19) [United Airlines and TWA.]

1935 3.1270 (March 3) Will on on dam inquiry. PWA investigator to examine Boulder City fraud charges. (p. 15) [Public Works Administration.]

1935 3.1280 (March 10) The biggest lake ever created by man. (Rotograveur Photos, p. 2)

1935 3.589 (March 16) Post's own story of dash in the sky. 34,000 feet was too high for engine, so he made landing as "sanest" course. Best time at 30,000 feet. He is elated to learn that backer will stick until he crosses nation in 7 hours. By Wiley Post. (p. 3) [Includes passing comment on Kaibab Plateau and North Rim.]

1935 3.590 (March 24) Speedways of the stratosphere. Wiley Post's record trip from the coast proves the feasibility of high-altitude transport and on the basis of the known facts the swift passenger flight of the future is envisioned. By Russell Owen. (New York Times Magazine, pp. 3, 17) [Imaginative trip, including mention of Grand Canyon.]

1935 3.1281 (April 7) Boulder Dam. (Rotograveur Photos)

1935 3.591 (April 19) La Guardia peers over canyon rim. Mayor orders mule for 7-mile ride down the Bright Angel Trail to Colorado River. (p. 3) [Fiorello H. La Guardia.]

1935 3.592 (April 20) La Guardias arrive at home of Navajos. Mayor visits Painted Desert on way to reception planned at Presscott, Ariz. (p. 11) [Story filed from Grand Canyon.]

1935 3.593 (April 21) Old Arizona home acclaims mayor. All of Prescott out to welcome La Guardia back for visit after 37 years. He revels in old scenes. Exchanges reminiscences with school friends and recalls days as columnist. (p. N4) [Includes photograph of Mr. and Mrs. Fiorello La Guardia with several Hopi said to have come to greet them at "the National Reservation", but photo is at Grand Canyon.]

1935 3.594 (April 22) Observance at Grand Canyon. (p. 11) [First Easter sunrise service at Grand Canyon.]

1935 3.595 (May 1) Robot plane sets mark from coast. "Mystery" craft here from Los Angeles in 11 hours 5 minutes, record for transports. Pilot seldom in charge. Takes control only for three short periods during the 2,400-mile flight. (pp. 1, 3) [TWA. Includes note that pilot D. W. Tomlinson flew through part of Grand Canyon to avoid a storm.]

1935 3.596 (May 1) Story of flight as told by pilot. Airliner is surrounded by storm-shrouded peaks as it passes over Rockies. Met with dust clouds. Regular service at 20,000-foot elevation is predicted for near future. By D. W. Tomlinson. (p. 3)

1935 3.99 (May 5) A catalogue of ruins. (Section 9, p. 17) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

</table>
1935 3.1294 (October 31) Roosevelt profile is seen on stamp. Philatelists say they find features of president on issue showing Boulder Dam. (p. 14)

1935 3.1295 (November 2) See things on dam stamp. Philatelists report Liberty Bell, September Morn and “U. S.” (p. 17)

1935 3.1297 (December 15) A new scenic wonderland opened up in the West. (Rotograveur Photos, p. 10)

1936 3.1298 (January 28) Tribute paid Mead by the President. Condolences sent to widow of the U.S. Commissioner of Reclamation. He is eulogized by Ickes. Secretary sees Boulder Dam as one of many monuments of services to nation. (p. 20) [Elwood Mead.]

1936 3.1299 (February 14) To accept Boulder Dam March 1, 2 years ahead. (p. 12)

1936 3.1300 (February 17) Government to take Boulder Dam March 1. Contractors have finished job two years ahead of schedule—Will get $51,950,000. (p. 2)

1936 3.100 (February 23) Grand Canyon Lodge. Structure on northern rim of the canyon now being built. In: Notes for the Traveler. (Section 11, p. 5) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1936 3.1301 (March 1) Boulder ready for work. Great dam on the Colorado will soon start making power for Southwest. By Mildred Bray. (p. E11)

1936 3.1302 (March 1) “It’s yours,” says one engineer to another, and thus government gets Boulder Dam. (p. 3)

1936 3.602 (March 7) Shaw sees Grand Canyon; reminds him of religion. (p. 11) [George Bernard Shaw.]

1936 3.1303 (April 10) Ickes sees collusion in 20 bids on cable. Offers also “identical” on cement for western dams, he reports. (p. 9)

1936 3.603 (April 13) A. F. Bemis is dead; housing expert, 65. Injuries suffered at Grand Canyon fatal to former Boston bank director. [Three-story fall from hotel room obviously at El Tovar.]

1936 3.638 (May 3) New trails in our parks. Facilities for the traveler have been vastly extended by relief workers. By Duncan Aikman. (p. XX 2) [See "Grand Canyon Highways"].

1936 3.1304 (May 3) New Mecca opened up. Lake Mead, created by Boulder Dam, becomes tourist objective. By Fitzhugh L. Minnegerode. (p. XX 6)

1936 3.639 (June 21) Coconino’s nine wonders. Escape from a routine vacation assured visitors who really explore Arizona. By Tom White. (p. XX 14)
1936 3.1305 (July 19) Dam’s effect studied in a miniature river. Clearing of water speeds up scouring of sand bed below. (p. E10)

1936 3.640 (August 2) Three new monuments. The Park Service acts to preserve great western areas. (p. XX 10) [Plans for canyonlands protected areas. The canyonlands of Utah are referred to as “the Grand Canyons of the Colorado”.

1936 3.1306 (August 13) Will open Boulder Dam. Roosevelt to start power plant while addressing conference. (p. 25)

1936 3.1307 (August 19) Boulder Dam lake cools air for over 100 miles. (p. 9)

1936 3.1308 (August 23) “Wild West” town near Boulder Dam. (p. XX 10)

1936 3.1309 (September 12) Roosevelt calls for abundant life in this power age. “We must do some things in different ways,” he tells world power parley. For income distribution. “Vicious circle” holding sales of electricity down and costs up “must be broken.” Sets Boulder Dam going. Presses golden key on rostrum, starting first generator and opening gate valves. (pp. 1, 3)

1936 3.1310 (September 12) Giant Boulder Dam begins operation. President starts first flow of current by pressing key in capital. Thousands watch scene. Double waterfall, 13 feet higher than Niagara, pours from walls of canyons. (p. 3)

1936 3.1311 (September 12) The text of President Roosevelt’s address at World Power Conference. (p. 3)

1936 3.101 (September 13) Air view of the Grand Canyon. (Section 11, p. 7) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1936 3.1312 (September 20) Lake site yields old relics. (p. XX 8) [Moapa Valley.]

1936 3.1313 (October 4) Boulder Dam set to turn on power. World’s largest plant will start electric service for Los Angeles on Wednesday. Current to go 266 miles. 115,000-volt generator which will send it is one of 15 to be installed. (p. 30)

1936 3.1314 (October 10) Los Angeles illuminated by Boulder Dam; 7,200,000,000 candle power is released. (p. 5)

1936 3.102 (November 15) Projects speeded at Grand Canyon. (Section 12, p. 10) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1936 3.1315 (November 29) $165,000,000 spectacle: Boulder Dam attracts sight-seeing thousands. (Rotograveur Photos, p. 2)

1937 3.641 (January 7) Blizzards strike western states. Coldest weather of winter so far extends from Rockies into North Texas. (p. 23)

1937 3.642 (January 8) Record snowfall sweeps Arizona. Heaviest storm in 20 years covers wide area and grounds planes. 49 below at Meacham, Ore. Up-state New York and Pennsylvania are crippled for hours by icy weather. (p. 21)
1937 3.643 (February 14) 100 held captive by western snows. Crews work desperately to rescue storm victims and to locate 7 missing men. 32 facing food shortage. Occupants of a Grand Canyon camp fear another storm—Radio guides searchers. (p. 22)

1937 3.644 (February 16) Dust storms bury Southwest states. "Black blizzard" sweeps across parts of Colorado, Kansas, Texas and Oklahoma. Vermont buried in snow. Arizona and Minnesota are digging their way out of huge drifts. (p. 25)

1937 3.645 (March 27) Thousands to attend national park rites. Easter sunrise services at many places are to be broadcast tomorrow. (p. 11)

1937 3.103 (May 2) Map trip to study "living evolution". American Museum scientists plan expedition to tops of Grand Canyon mesas. Mammals long isolated. Contrasting species held clue to theory — plateaus have been cut off since glacial age. (Section 2, p. 2) [Shiva Temple.] [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1937 3.1316 (June 6) Boulder Dam now a play area. It is rapidly becoming a popular vacation resort, and near by are some of the world's greatest spectacles of nature. By Meyer Berger. (p. 193)

1937 3.1317 (July 11) New recreation spot in Boulder Dam area. Big artificial lake offers unusual facilities for many aquatic sports, reports bulletin. (p. 32)

1937 3.649 (August 27) Scientists to seek mountain secrets. Two museum expeditions next month—One to hunt blue sheep in British Columbia. Arizona peaks goal also. Second group to scale Kaibab Plateau in search of traces of prehistoric life. (p. 17) [Shiva Temple.]

1937 3.650 (September 5) New ruins sighted in Arizona mesas. College expedition reports traces of old civilization along Utah border. (p. 25) [Rainbow Bridge-Monument Valley Expedition. Also note of the forthcoming Shiva Temple expedition.]

1937 3.104 (September 14) "Island in the sky" defies explorers. Plane of Anthony party seeking to scale Shiva's Temple in Grand Canyon can't land. (p. 25) [Shiva Temple.] [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1937 3.105 (September 16) Scientists start sky island climb. Group goes over rim of Grand Canyon on way to prehistoric Shiva Temple. Area covers 300 acres. Party hopes to study animal and plant life left behind by the ice age. (p. 27) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]

1937 3.106 (September 17) Scientists reach top of sky island. Climber reports evidence of animal life on plateau isolated since Ice Age. But no water is found. Two of party remain on Grand Canyon's Shiva Temple for studies—Set traps. (p. 27) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-7]
(September 18) Island in the sky. [Editorial.] (p. 18) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 18) Sky island yields left-eared mice. Grand Canyon naturalist brings tiny rodents from isolated plateau for study. Arrow chips also found. Indicate an early people there—Dr. Anthony, still on mesa, gets supplies by plane. (p. 21) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 19) Pair on sky island ask ammunition. Grand Canyon superintendent believes Dr. Anthony has found “sizable animals”. Scientists lack water. Woman flier fails in attempts to land supply by parachute on isolated, arid mesa. (p. 44) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 20) Plane drops food to sky island pair. Dr. Anthony plans stay of a week or ten days to study animals on high plateau. Quest called a success. Expedition postpones ascent of Wotan’s Throne till scientist quits Shiva Temple. (p. 25) [cited=G CNHA Monograph 8: page 11-7]

(September 20) [Photograph] The island in the sky that has been reached by scientific expedition. (p. 25) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 21) “Shiva Daily Gazette” issued from “island”. Scientists complain of mosquitos and ants — trap animals, but not ones wanted. (p. 27) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 22) Shiva Temple yields wealth of specimens. Meanwhile, attempt to scale Wotan’s Throne is mapped by Wood for tomorrow. (p. 28) [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 24) Nearly 100 animals caught on sky island. Dr. Anthony plans descent tomorrow — party to climb Wotan’s Throne today. (p. 23) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 26) Animals appear pale on sky island. Dr. Anthony prepares to descend from Shiva Temple with specimens after 9-day stay. New climb is opposed. W. A. Wood Jr. reports Wotan’s Throne too dangerous for museum scientist to scale. (p. 41) [cited=G CNHA Monograph 2: page 112] [cited=G CNHA Monograph 8: page 11-7]

(September 26) Topics of the Times. (p. 70) [Shiva Temple.] [cited=G CNHA Monograph 2: page 112]

</table>
1939  3.664  (October 24) Zane Grey, 64, dies suddenly on coast. Wrote more than 50 novels, most of them dealing with western adventure. 17,000,000 copies sold. Noted for his catches of game fish—Once a dentist, won fame after hardships.  (p. 29)

1939  3.665  (November 19) For amateur photographers. Southwest in pictures. It is a fascinating land for the camera man in fall and winter.  (p. XX 7)

1939  3.666  (December 25) Blind girl's dream fulfilled in play. Lillian Hillman gets a bit part in production—"Living on clouds," she says. Playwright picked her. Young actress takes her role so seriously she visited clinic to study it.  (p. 20)  [Includes recollection of experience at Grand Canyon.]

1940  3.667  (January 2) America's Don Quixote. Coronado in his gilded armor charged at a glittering mark and found it was a glorious sunrise over the prairies.  By Donald Culross Peattie.  (New York Times Magazine, pp. 14-15, 21)

1940  3.120  (January 21) Hearst sues over land for park.  (p. 2)  [cited»GCNHA Monograph 2: page 112]  [cited»GCNHA Monograph 8: page 11-8]

1940  3.668  (March 31) "Old Bob" of Grand Canyon dies.  (p. 20)  [Last of Grand Canyon's stagecoach horses, 36.]

1940  3.669  (May 12) Says dwarf horses roam hidden valley. Cattleman reports 90-pound animals in Grand Canyon.  (p. 12)

1940  3.1321  (May 26) Lake Mead black bass. Fish vie with scenery in the waters back of Boulder Dam.  By Tom White.  (p. XX 5)

1940  3.670  (May 26) To scenic canyons of Arizona. Improved highways now lead the tourist to a region rich in the grandeur and peace of mountain and desert.  By John F. Mortimer.  (p. XX 6)

1940  3.121  (August 18) The Grand Canyon inspires thoughts of the Infinite.  [Frank Healy, letter to the Editor.]  (Section 6, p. 7)  [cited»GCNHA Monograph 2: page 112]  [cited»GCNHA Monograph 8: page 11-8]

1941  3.671  (January 2) Chas. F. Whittlesey, noted architect, 73. Expert in reinforced concrete built many edifices on coast.  (p. 23)  [Obituary. Whittlesey noted as architect of El Tovar Hotel.]

1941  3.672  (May 10) Grand Canyon.  By Roland Ryder-Smith.  (p. 14)  [Poem.]

1941  3.673  (June 1) Col. C. H. Birdseye, topographer, dies. Chief of the federal Geological Survey's Division of Engraving and Printing was explorer. Mapped Kilauea volcano. Led expedition through 300 miles of Colorado River—Officer overseas in war.  (p. 41)  [Claude Hale Birdseye.]

1941  3.674  (June 8) On touring the Rockies. Scenic are Grand Teton, Cedar Breaks, Kaibab Forest regions.  By Blackburn Sims.  (p. XX 8)

1941  3.675  (July 20) West coast, round trip. The seventeen-day journey by rail gives a panoramic view of the nation.  By Whitford Carter.  (p. XX 12)
1941  3.132  (August 17) New Lake Mead lodge—Fessenden Park at Roanoke—More clipper flights. By *Diana Rice*. (p. XX 8) [Hualapai Lodge.]

1942  3.122  (June 7) "Thy woods and templed hills". (Section 7, pp. 20-21) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1942  3.123  (June 17) Distance hath charms. *In: Topics of the Times*. (p. 22) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1942  3.124  (July 5) Random notes for travelers. Service to the national parks continues in spite of the war—Notes. (Section 2, p. 9) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1942  3.125  (July 19) Grand Canyon tourists linger. War restrictions encourage the visitors to stay at national park, where horseback trips and “explorations” are much in demand. By *John L. Mortimer*. (Section 9, p. 1) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1942  3.676  (September 23) Grand Canyon line halted. (p. 33)

1942  3.679  (November 22) Dr. Schuchert dies; a paleontologist. Retired curator of geological collections at Yale was professor emeritus. Never attended college. He was one of world’s leading collectors of prehistoric invertebrate remains. (p. 53) [Charles Schuchert. Includes notice as first discoverer of fossil footprints in Grand Canyon.]

1943  3.126  (May 2) Army invades the national parks. By *Isabelle F. Story*. (Section 2, pp. 13-14) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1943  3.680  (June 22) Dr. H. C. Bumpus, 81, zoologist, is dead. Former American Museum of Natural History director stricken in California. Was president of Tufts. Once professor at Brown, his alma mater—On science faculty at Columbia. (p. 19) [Includes notice of work on constructing museum at Grand Canyon.]

1943  3.127  (July 4) Ickes sees curtailed park use. By *Harold L. Ickes*. (Section 2, p. 11) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1943  3.681  (November 5) Dr. Milton Fulle. Mining geologist obtained print casts of early land vertebrate. (p. 19) [Obituary. Includes notice of having collected plaster casts of fossil footprints at Grand Canyon in 1926.]

1944  3.682  (April 23) Miss Mackintosh engaged to wed. Daughter of late architect to become bride of Alexander G. Grant Jr. on May 28. Fiance a Harvard man. Grandson of Frederic Delano is known as explorer—Has served in Navy. (p. 37) [Includes note that Grant made trip on Colorado River through Grand Canyon in a folding kayak.]

1944  3.128  (May 28) In the field of travel. National parks, some with services cut, will welcome visitors once more. By *Diana Rice*. (Section 2, p. 9) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]
1944  3.683  (May 29) Miss Mackintosh becomes a bride. Wed to Alexander Grant Jr., a grandson of Frederic Delano, in Church of Ascension. (p. 11) [Includes note that Grant made trip on Colorado River through Grand Canyon in a folding kayak.]

1944  3.684  (June 27) 3 fliers stranded in the Grand Canyon. Men who parachuted from bomber await rescue. (p. 21) [Army fliers.]

1944  3.685  (June 30) 3 fliers in canyon start long climb out. Ranger and teacher reach men and guide them toward top. (p. 23) [Army fliers had parachuted into canyon.]

1944  3.686  (July 1)  Canyon climbers save 3 Army fliers. Two experts use route traced from plane to end 9-day perch on mile-deep ledge. (p. 16) [Fliers had parachuted into canyon.]

1945  3.687  (September 29) Dr. C. W. Gilmore, expert on fossils. Curator at National Museum since 1923 dies—Rebuilt skeletons of dinosaurs. (p. 15) [Charles W. Gilmore. Includes summary of Grand Canyon work.]

1945  3.129  (October 21)  This changing world. By W. E. Farbstein. (Section 6, New York Times Magazine, p. 54) [cited=GCNHA Monograph 2: page 112] [cited=GCNHA Monograph 8: page 11-8]

1945  3.688  (October 31) Dr. Merriam dead; paleontologist, 76. Former president of Carnegie Institution for 18 years held science boon to mankind. (p. 31) [John C. Merriam. Includes note on Grand Canyon.]

1946  3.130  (January 27)  In the field of travel.  National parks will open again on June 1—Vermont's Snow Bowl reopens. By Diana Rice. (Section 2, p. 8) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1946  3.689  (May 19) Arizona's canyon Shangri-la. By Harold Butcher. (p. X 9)

1946  3.691  (September 16) Falls into Grand Canyon. Woman designer grips ledge 50 feet down and is rescued. (p. 7) [De De Johnson.]

1947  3.131  (July 20) Grand Canyon's popularity grows. Motorists outnumber all other visitors during month of June. (Section 2, p. 11) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1947  3.693  (July 27) J. F. Stone Sr. dies; manufacturer, 92. Head of Seagrave Corp. was president of research group at Ohio State University. (p. 44) [Julius F. Stone, Sr.]

1947 3.133 (August 31) Tourists go west, figures indicate. (Section 5, p. 7) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1948 3.694 (March 4) Dr. N. H. Darton, an oil geologist. Member of U. S. Survey for 37 years dies—Won several honors for findings. (p. 25)

1948 3.134 (June 6) Roamin’ the Rockies. Prices are reasonable in this region where there is ample elbow room. By Marshall Sprague. (Section 10, p. 30) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1948 3.696 (June 25) Dr. F. E. Matthes, glacier expert, 74. Member of the U. S. Geological Survey for 51 years dies—Wrote of his findings. (p. 23) [François E. Matthes.]

1949 3.135 (January 2) Utah Parks expansion. Union Pacific subsidiary to increase facilities. (Section 2, p. 16) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1949 3.1090 (March 28) Combats impairing of national parks. Head of federal service hits plans for dams, cutting of trees and grazing. (p. 10) [Newton B. Drury opposition, including Bridge Canyon Dam and the Kaibab tunnel.]

1949 3.697 (May 8) Deep canyons in Arizona’s highlands. Wonders of the Southwest expected to awe six million tourists. By Lee Ackerman. (p. XX 26)

1949 3.136 (June 19) Far west’s big four. Grand Canyon, Bryce, Yellowstone and Zion parks anticipate busy summer. By Jack Goodman. (Section 2, p. 15) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1949 3.137 (July 10) On a conducted tour to the Rockies. By Jack Goodman. (Section 1, p. 15) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1949 3.138 (November 6) Grand Canyon is already clad in snow. 500 out-of-season tourists daily find the spectacular gorge at its best. By Jack Goodman. (Section 2, p. 17) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1950 3.698 (May 7) From rim to rim. A safe yet spectacular 213-mile drive circles around the Grand Canyon. By Jack Goodman. (p. 299)

1951 3.699 (April 15) Atomic-age sight-seeing way out West. By Gladwin Hill. (p. 266)

1951 3.700 (April 29) National park jobs. Young students may find summer work with Park Service and concessionaires. By Harry W. Malm. (p. X 15)

1951 3.705 (June 10) Navigating the western river gorges. By Jack Goodman. (p. XX 30)

1951 3.1012 (September 23) Other reviews. By R. P. (p. 118) [Reviews of phonodiscs, including Willard Rhodes’ American Indians of the Southwest, which includes the solo, “Havasupai Stick Game”.]
1951 3.139 (November 4) News notes from the field of travel. By Diana Rice. (Section 2, p. 19) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1952 3.1013 (March 23) News notes from the field of travel. By Diana Rice. (p. X 17) (See "Havasu Canyon").

1952 3.801 (March 30) Coast's inland sea rises; mystery spreads havoc. (p. 4) [Salton Sea.]

1952 3.706 (May 4) Getting to know the Grand Canyon. By Thomas B. Lesure. (p. X 21)

1952 3.707 (June 15) Doing the Grand Canyon trails on foot. By Winifred Luten. (p. X 26)

1952 3.802 (November 20) Sabrejet sets a record; 699.9 m.p.h. average. (p. 46) [Salton Sea.]

1952 3.708 (November 27) Dr. Sven A. Hedin, explorer, 87, dies. Charter of central Asia areas found Brahmaputra, Indus sources, visited Tibet. (p. 31)

1953 3.1014 (February 8) News notes from the field of travel. By Diana Rice. (See "Hitting the Trail", about wilderness trips to Havasu Canyon.)

1953 3.709 (February 13) Ralph H. Cameron, leader in Arizona. A former Senator, he backed statehood movement for the territory—Dies in capital. (p. 21)

1953 3.710 (May 10) Vandals at work. Childish or vicious, they despoil national parks. By Howard G. Spalding. (p. XX 33)

1953 3.711 (May 31) Mystery 'chutes stay in canyon. (p. 39) [Parachutes found in Grand Canyon.]

1953 3.803 (September 29) Jet speeds 742.7 m.p.h. But flier fails to set mark because margin is too small. (p. 18) [Salton Sea.]

1953 3.804 (October 4) U.S. jet sets mark; flies 753.4 m.p.h. Navy hero recaptures world speed leadership—Bests week-old British record. (p. 72) [Salton Sea.]

1954 3.140 (March 22) Tourist aid near at Grand Canyon. 100 million contract planned by U.S. said to call for wide improvements. Auto travel rise cited. 860,000 persons visited the park in '53—Bigger "take" for government likely. By Gladwin Hill. (Section 10, p. 36) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1954 3.141 (April 5) Grand Canyon National Park hurt by fund cut as popularity rises. By Gladwin Hill. (pp. 1, 32) [cited=GCNHA Monograph 2: page 113] [cited=GCNHA Monograph 8: page 11-8]

1954 3.143 (May 9) Geology for fun. Short course in the earth's history is given to Grand Canyon visitors. By Gladwin Hill. (Section 10, p. 36) |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1954 3.144 (September 11) Grand Canyon facilities grow. (p. 32) |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1954 3.713 (September 19) Project at Grand Canyon. Overcrowded facilities at South Rim village to be expanded. By Gladwin Hill. (p. X 25)

1954 3.714 (October 31) At the floor of the canyon. By Angie Debo. (Book Reviews, p. 26) [Review of Flora Gregg Iliff's People of the Blue Water.]

1955 3.146 (January 23) At Grand Canyon. Extensive improvements undertaken on both the North and South Rims. By Susan Marsh. (Section 1, p. 27) |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1955 3.1091 (March 28) New fight raging for the Colorado. 7 states take bitter war for waters of river into high court and Congress. (p. 19)

1955 3.717 (July 16) Grand Canyon head named. (p. 24) [John S. McLaughlin, Superintendent.]

1955 3.806 (September 7) A.E.C. reveals secret A-bomb testing base. Behavior of falling missiles is studied on the Salton Sea. By Gladwin Hill. (pp. 1, 24)

1956 3.147 (June 3) Conservation: Pollution control. Congress considers bill to strengthen fight for clean rivers. By John B. Oakes. (Section 2, p. 37) [See included article, "Shrine of the Ages."] |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1956 3.148 (July 1) Two airliners carrying 128 vanish in West; wreckage of one sighted in Grand Canyon. No sign of life. 70 on crashed T.W.A. plane — United craft is still missing. (pp. 1, 42) |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1956 3.149 (July 1) Record toll seen for air disaster. Total of 128 deaths in two missing planes will exceed 1950 Wales crash by 48. (p. 42) |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1956 3.150 (July 1) List of those on two planes. (p. 42) [Also see revised list, July 2.] |cited=GCNHA Monograph 2: page 113| cited=GCNHA Monograph 8: page 11-8|

1956 3.151 (July 2) All 128 on 2 airliners found dead; craft presumed to have collided before crashing in Grand Canyon. 'Copter at scene. Plans are laid to fly out victims' bodies—
Inquiry starts. (pp. 1, 14) | cited=GCNHA Monograph 2: page 113 | cited=GCNHA Monograph 8: page 11-8

1956 3.152 (July 2) C.A.A. scans logs for clue to crash. Official says radio reports by pilots will be studied—T.W.A. changed altitude. (pp. 1, 14) | cited=GCNHA Monograph 2: page 113 | cited=GCNHA Monograph 8: page 11-8

1956 3.153 (July 2) No large pieces of craft sighted. Charred rock on knoll with bits of metal and paint only remains of DC-7. Bodies are not visible. 3 in helicopter see wrecks about a mile apart—Some debris buried. (p. 14) | cited=GCNHA Monograph 2: page 113 | cited=GCNHA Monograph 8: page 11-8

</table>
The final resting places of J. W. Powell (1834–1902) and his wife, Emma (1835–1924), and of “Buckey” O’Neill (1860–1898) are near each other in the original section of Arlington National Cemetery, in Arlington, Virginia. Major Powell was a wounded veteran of the Civil War; Captain O’Neill, one of Colonel Theodore Roosevelt’s “Rough Riders” and once mayor of Prescott, Arizona, was killed in action at San Juan Hill, Cuba, during the Spanish–American War. Powell of course was the champion of the Colorado River. O’Neill was instrumental in early settling and development at Grand Canyon.
MEMORIALS

Necrologies, obituary notices, and similar biographical memorials that refer to the Grand Canyon and lower Colorado River

This part lists only obituary notices and commemorative or retrospective memorials, listed by author. Such sketches are cited here only if the citationist refers to the Grand Canyon or the Colorado River. Obituary notices and memorials upon the death of a person are listed here. A few pertinent miscellaneous biographical sketches of prominent persons in the history of the area are also included. Traditional biographies as books and articles are listed in PART 2, GENERAL PUBLICATIONS.
On June 30, 1956, two eastbound commercial airliners collided over the eastern Grand Canyon and plummeted into the chasm. It was the world’s worst aircraft disaster at the time, 128 persons losing their lives, and the impetus for creating the modern air traffic control system we have today. Many of the remains from United Airlines flight 718 were placed in a common burial at the entrance to Pioneers Cemetery at Grand Canyon; and for some reason photographs of this memorial are most often used to commemorate all those who lost their lives. On the other hand, the remains recovered from TWA flight 2 were placed in a common burial in Flagstaff Cemetery, with few remembrances today, at least in print. Of all those who perished, few remains were identified and returned to kin and homes.

Throughout this bibliography are items that report contemporary activities regarding the accident and recovery of remains, as well as items that include notes pertaining to air traffic safety, and to ongoing investigations of the crash sites immediately west and southwest of the confluence of the Little Colorado River.

(See also overleaf to title-sheet for Part 15 herein.)

1890 4.363 The late Anson Call. Deseret News, (September 13):1 [issue pagination]. [Includes note on the establishment of the Mormon colony at Callville, Nevada.]

1891 4.364 Daniel H. Wells. Deseret News, (April 4):9 [issue pagination]. [Includes note of crossing Colorado River at Lees Ferry in summer 1876, when Bishop L. W. Roundy was drowned.]

1894 4.352 George Huntington Williams. Scientific American, 71(22)(December 1):337, 343. [George Huntington Williams.] [See p. 343: "Professor Williams was also a member of the International Congress of Geologists, and when that congress met in Washington in 1891 [5th International Geological Congress] he was one of the managers who conducted its members on the excursion to the canyon of the Colorado."

Tactile media such as Braille are regretfully not as easily available as are even large-type materials for those with limited vision. Nonetheless some publications have been rendered into these media, and those that have been located are included here:

See end of this part for transliterations.
MEDIA FOR VISION-IMPAIRED USERS

Works or references produced especially for vision-impaired people

This section includes tactile, visual, and audio products prepared for individuals with functional handicaps that make viewing difficult or impossible. A few citations are print items that relate to products for the vision-impaired.

Many citations are from the Library of Congress Information System. Dates given may be either for the recording production date or for the printed volume; given as cited.

(Anglog format abbreviations: "rpm" = revolutions per minute; "ips" = inches per second.)

See PART 27. AUDIO WORKS for conventional mass-market audio recordings.

Zwinger, Ann

1997  5.74  *Downcanyon; a naturalist explores the Colorado River through the Grand Canyon* (Jill Ferris, narrator). [Washington, D.C.]: National Library Service, 2 sound cassettes, 15/16 ips, 4 track. (Talking Book Publishers, recording agency and distributor.)
Transliteration of texts that appear as the Frontispiece to Part 5

TACTILE MEDIA SUCH AS BRAILLE ARE REGRETFULLY NOT AS EASILY AVAILABLE AS ARE EVEN LARGE-TYPE MATERIALS FOR THOSE WITH LIMITED VISION. NONETHELESS SOME PUBLICATIONS HAVE BEEN RENDERED INTO THESE MEDIA, AND THOSE THAT HAVE BEEN LOCATED ARE INCLUDED HERE.

MOON TYPE IS ANOTHER TACTILE MEDIUM, OF WHICH NOTICES OF MATERIALS PERTAINING TO THE GRAND CANYON REGION ARE CITED HEREIN.
One of the joys of young-reader products is whimsy. One might be hard pressed to conceive how a three-dimensional “pop-up” Grand Canyon could be created on paper, yet here it is in Geraldyne Clyne’s 1942 gem, The Jolly Jump-Ups Vacation Trip. When the panel is opened, even the mounted trail groups pop up in relief as they weave their ways down Grand Canyon-scale pyramid blocks, and the Colorado River winds into the deep shadows of the Great Unknown. While the timing of the theme of vacation touring was inopportune, with the coming of war-time rationing and curtailed travel, one may see a few moments of reflection in an adult reading the stories to a child. On the other hand, one may also imagine a child’s more immediate frustration when a little brother or sister’s eager hands grasp hold of the delicate paper pop-ups!

WORKS FOR AND BY YOUTH

Non-fiction and fiction for young and adolescent audiences that includes the Grand Canyon or the lower Colorado River, including works created by younger authors

This part includes all those works traditionally referred to as "juvenile"; it includes works that also are appropriate for "young adult" audiences. Both non-fiction and fiction are grouped together in order to provide complete, contiguous coverage in this special literary genre. If the context of the title does not clearly indicate whether the item is fiction or non-fiction, a notation is appended to explain it. Also included here are works created by younger authors.

See PART 26. AUDIO-VISUAL WORKS for "juvenile"-category films.

1904 6.708 The Bradys at Fort Yuma; or, The mix up with the "King of Mexico". New York: Frank Tousey, 32 pp. (Secret Service, No. 272. April 8, 1904.) ["By A New-York Detective". "Old and Young King Brady, Detectives" series.]

1923 6.691 Chef de la tribu des Havasupai d’une vallée du Grand Canyon de l’Arizona. *Jeunesse*, (March 8):.

2006 6.412 National parks trivia; did you know? *Junior Ranger Gazette* (U.S. National Park Service, National Park Foundation, and Unilver), 1:[5].

2008 6.496 Rock star; it’s a great year for the Grand Canyon. *Weekly Reader*, 77(May/June):cover, .

John Wesley Powell  
Answers a Question from the Audience

‘Yes indeed . . .

‘had to dig it all out just to see the insides!’

A SECTION OF COLORADO CANYON.

With appreciation to Captain John Hance

(Top) "Climbing the Grand Cañon." Sketch by Thomas Moran. Engraving by F. S. King. John Wesley Powell, Exploration of the Colorado River of the West and its Tributaries. Explored in 1869, 1870, 1871, and 1872, under the direction of the Secretary of the Smithsonian Institution (U.S. Government Printing Office, Washington, 1875), Figure 34 (detail).

(Bottom) “A Section of Colorado Canyon.” Albert D. Richardson, Beyond the Mississippi: From the Great River To the Great Ocean (American Publishing Co., Hartford, Connecticut, 1867), p. 472. (Adapted.) The stratigraphic column portrayed here was taken from the seminal geological survey of Grand Canyon by John Strong Newberry, attached to the Ives expedition of 1858; a schematic rendering as viewed at Diamond Creek.
Fiction for adult audiences that includes the Grand Canyon or the lower Colorado River

This part lists only works of fiction, including folklore. However, special-interest subjects that can be considered by many to be works of fiction—such as those relating to UFOs and Creationist topics—are considered to belong either to "General" subjects or to the specific subject to which it purports to belong (e.g. Geology).

See PART 6, Youth for "juvenile"-category or young-reader fiction.
Anonymous

____ 7.125 Buffalo Bill's spy shadower; or The hermit of Grand Canyon. The Buffalo Bill Stories, no. 69. [Author is Prentiss Ingraham (q.v.). Weekly serial, Street and Smith, New York, with stories authorized by William F. Cody. 1902? (series began 1901).]

1922 7.483 [Anecdote.] In: The Silversheet [section]. Sunday Life (Life, Sunday Edition, New York), 80(September 3):24. [Entire issue is satire. "While 'out on location' at the Grand Canyon for his new photodrama, 'The Old Home Town,' Jackie Coogan pulled a good one. As he gazed into the mighty abyss, age-old as time itself, the youthful star remarked: 'Say! That looks like a swell place to throw your old safety razor blades.'" (entire item)]

2006 7.259 The face in Matkatamiba Canyon. Waiting List (Grand Canyon Private Boaters Association Quarterly), 7(3)(Spring/Summer):45. [Item signed, "Anonymous".]

Abbey, Edward

1967 7.550 Sunflowers. Western Review, 4(1)(Summer):.

1876 7.528 Oakshott Castle: Being the memoir of an eccentric nobleman. A new edition. London: Chatto and Windus, 338 pp. [See, in passing: p. 318, “the affair on the ford of the Colorado”; p. 320, Oakshott speaking of his cousin, “the wound which he got on the passage of the Colorado, where he saved my life”; p. 324, an American officer speaking, “That lunatic Oakshott is by far the greatest lunatic which you nation ever turned out. He wanted to take his daughter down the cañon of the Colorado in a dug-out.”]

Kingsolver, Barbara

Knibbs, Henry Herbert

1921 7.386 Partners of chance. Boston and New York: Houghton Mifflin Co., and Cambridge, Massachusetts: The Riverside Press, 281 pp. [See p. 266: “Arizona is a mighty surprisin’ State, in spots. Most folks from the East think she’s sagebrush and sand, except the Grand Cañon; but that’s kind of rented out to tourists, most of the time.” (entire note)]

Knight, William H.

“High over the Mohave Desert and the gleaming Colorado River it flies, then bending its course to the northward, follows the windings of that wonderful gorge—the Grand Canyon. Here the passengers gain birdseye views, never before vouchsafed to the eye of man, of the magnificent scenes in that profound cleft of the earth’s surface, and from a vantage point never undreamed of by Major Powell who first penetrated its deep mysteries.” (entire note)

1992  7.108  Exhuming a dirty joke. New York Times [newspaper], (July 12). [An essay relating to the author’s novel taking place in 19th century America, Peter Doyle (New York: Random House, 1991), the seminal idea for which was the factual relic that is the purported penis of Napoleon Bonaparte. Vernon writes, “The item was last seen in my novel floating down the Colorado River toward (what else?) the Grand Canyon.” However, the novel does not cite there these geographic names. Here we have an instance of an author elaborating later on implied expressions of a work of fiction. (Referred to on the books section of the “New York Times on the Web” Internet site, http://www.nytimes.com/books.)]

“Peach Springs Stage Office”

“Climbing the Grand Cañon.”

Sketch by Thomas Moran. Engraving by F. S. King. John Wesley Powell, Exploration of the Colorado River of the West and its tributaries. Explored in 1869, 1870, 1871, and 1872, under the direction of the Secretary of the Smithsonian Institution (U.S. Government Printing Office, Washington, 1875), Figure 34 (detail).

“Bright Angel Hotel”

Grand Canyon

*America: Her Grandeur and Her Beauty. Part Four. Grand Canon.* Union Book and Publishing Co. (Chicago and New York [1894]). One of the earliest general-travel publications for Grand Canyon. (See overleaf of title-sheet to Part 9 for another illustration.)
TRAVEL GUIDES

Informational guides to routing, attractions and accommodations of hiking, camping, and land-, water-, and air-travel in the Grand Canyon region and the vicinity of the lower Colorado River (excluding Colorado River guides)

This part includes only those publications which provide route-finding information, seasonal or other data on accommodations, and time-limited information such as fees; specifically for hiking, camping, auto or air travel, lodging, restaurants, commercial recreational and educational opportunities, and scenic attractions.

See PART 2, GENERAL PUBLICATIONS for essays on travel, hiking, and river-running, and essay-type guides that largely omit information on locations, fees, hours of operation, and other such time-limited or guidance information.

See PART 10, COLORADO RIVER GUIDES for travel guides to the Colorado River.

See PART 23, GEOLOGICAL FIELD GUIDES for specialized geological guides to the Grand Canyon and Colorado River.
“Sunset from Bright Angel Hotel”

no date 9.1  *Lees Ferry and Lonely Dell Ranch historic districts; a walking tour guide.* Page, Arizona: Glen Canyon Natural History Association, 12 pp. [N.B.: Also see Anonymous (1983) for same item released with Grand Canyon Natural History Association dated imprint; typography identical, but Grand Canyon NHA version is two-color, Glen Canyon NHA version is black ink only; cover stock is different.]

no date 9.870  *Lake Mead Adventure Parkway; explore the crystal blue shores of Lake Mead just minutes away from the Las Vegas Strip.* [No imprint], folded brochure. [Boulder City to Moapa Valley, Nevada.]

1923 9.804  A large percentage of visitors to Grand Canyon are repeaters; it is vastly more than a one-day look-and-leave spectacle. *The Santa Fe Magazine* (Chicago), 17(12)(November):31-34.

1994 9.9  
*Road trip USA; the road traveler’s complete guide to America’s best scenic drives* (foreword by Chuck Woodbury).  Aurora, Colorado: Roundabout Publications, 296 pp.  [See Diamond Bar Road, p. 21; Kaibab Plateau-North Rim Parkway, p. 23.]

1994 9.10  
*Southwest Circle Tour roads and bridges; Zion, Bryce, Grand Canyon North Rim national parks, Cedar Breaks, Pipe Spring national monuments; Kaibab, Dixie national forests.*  [No place]: U.S. National Park Service, folded sheet.

1995 9.11  
(Lorraine Reno, project coordinator) 100 travel adventures from *Sunset*.  *Sunset* (supplement) (see “The Grand Canyon”, pp. 2-3).

1996 9.12  
Cyberguide; travelogue.  *NetGuide*, 3(5):136-138.  [Includes note of travel information on Grand Canyon National Park Internet website.]

1982  9.150  South Rim day hikes and walks. Folded pamphlet. [cited=GCNHA Monograph 8: page 1–Special Section 1–2]

Grand Canyon Railway

1989 9.152 [News release packet; current plans, and history from 1882; with 9 glossy photos and complimentary ticket.] Williams, Arizona: Grand Canyon Railway, 18 pp. [cited*GCNHA Monograph 8: page 1–Special Section 1–6]

Grand Canyon Stage Line

no date 9.153 Grand Canyon Stage Line; the Ash Fork route, open all the year round. The Grand Canyon of the Colorado River in Arizona. How to reach the most scenic views[,] the exquisite water falls, etc. of Cataract Canyon[,] the Yava Supai villages[,] cliff dwellings, etc. Ash Fork, Arizona: Grand Canyon Stage Line, 24 pp. [including covers]. [Sometimes cited as by William Wallace Bass, proprietor of the stage line, and who no doubt did produce this; but bibliographically, his name does not appear as author. On p. 9, the name of the stage company appears as "Grand Canyon Stage Company". Printed by The Hicks-Judd Co., San Francisco. Regarding the date of publication: On the back cover is an advertisement for books, photographs, and lantern slides of the Grand Canyon, available from W. W. Bass, Ash Fork, or from Grand Canyon Photo Co., Pasadena, California; there is also notice of G[eorge]. Wharton James' The Grand Canyon of the Colorado River, said there to be "now in the press" and which was published in 1900. The Special Collections and Archives (SCA), Cline Library, Northern Arizona University, Flagstaff, hold the original of a photo of a Havasupai mother with child next to a wickiup (photo 91.15.18), which is another view of the one published in the Grand Canyon Stage Line booklet (p. 16); the date for it is given by SCA as 1899. Thus, the date of this booklet is most likely latter 1899 or early 1900. —Spamer] [cited*GCNHA Monograph 8: page 1–Special Section 1–6]

Grand View Hotel

no date 9.627 The Grand Canyon of the Colorado River in Arizona and excursions in and about the canyon and forest from Grand View Hotel; H. H. Smith, Manager; P.O., Grandview, Ariz. ("Illustrations from Photographs by Putnam & Valentine, Los Angeles, Cal."). [Grandview, Arizona]: [Grand View Hotel], 20 [22] pp. (The Knickerbocker Press, New York.) [Ca. 1900-1909?]

Always sage advice (and the title of a book cited in this bibliography), this scene of lonely corroboration from the Powell expedition is nearly lost in gray grandeur. While modern river guidebooks cannot serve for navigation in the ever-changing regime of water flow and shifting debris fields, they do function as guide posts, alerting river travelers of things to come—of which Powell’s party, of course, had no idea on the 1869 Colorado. This was in fact the region where (some had heard) the river disappeared into subterranean passages, and death awaited foolish wayfarers.

“Granite Falls. – Kaibab Division. – Grand Cañon.”
Sketch by Thomas Moran
Engraving by H. H. Nichols

Clarence E. Dutton, Tertiary History of the Grand Cañon District (U.S. Geological Survey Monograph 2, 1882), Plate XXXI.
COLORADO RIVER GUIDES

Informational guides to travel on the Colorado River between Glen Canyon Dam, Arizona, and Mexico (excluding geological guides)

This part includes "strip maps" and other such specific guides for travelers. Also included here are pertinent historical overviews of published river guides.

See PART 23, GEOLOGICAL FIELD GUIDES for specialized geological guides to the Colorado River.
During the 1871–1872 second Powell Expedition on the Colorado River, the travelers wintered over in Kanab, Utah, having stored their boats near the mouth of the Paria River, where Lees Ferry would soon become an important link for travelers between Utah and Arizona, established by Mormon expansionists. When Powell and party set out again into the Grand Canyon, they left behind one boat, the *Nellie Powell*. It survived throughout the time that the ferry was an active locale. In 1938, a set brush fire burned the field where the boat had been; this fragment is all that remains. The photograph here pictures it in the Grand Canyon National Park Museum collections in 2010.

FQ21:415
Approximate geographical area covered in THE GRAND CANYON, embracing the Grand Canyon and Lower Colorado River regions, Glen Canyon Dam to the Colorado River delta. (See herein the section Coverage and Format for notes about variance in geological coverage.)

Approximate division between “Grand Canyon” and “Lower Colorado River” thematic regions as portrayed by this bibliography (see Contents).

Base map of Colorado River drainage basin adapted from U.S. Bureau of Reclamation, Glen Canyon Dam Adaptive Management Group. The Upper and Lower Colorado River Basins delineate the apportionment of the waters of the Colorado River basin in the Colorado River Compact of 1922; divided just downstream from Lee’s Ferry, Arizona, at the confluence of the Paria River. Dams and impoundments are indicated on the map. Light-gray areas, not labelled, are American Indian reservations. Basin boundary is not depicted in Mexico.
LOWER COLORADO RIVER REGION
SPECIAL INTEREST SUBJECTS
An early geologic map of the United States by Jules Marcou, 1855, pre-dates the earliest scientific explorations conducted in the Colorado River region of the American Southwest. This detail from Marcou’s map depicts the Colorado River corridor fairly in its entirety, which naturally is largely subjective in its display of rock types throughout the region. It is based upon extrapolations from few observations in the field; and the course of the Colorado, too, at this time remained to be determined through the canyonbound regions of today’s Arizona and Utah. Note that the territory of New Mexico includes what today is southern Nevada as well as Arizona. Note also that the map labels areas thought to be inhabited by certain groups of Native Americans, and that the mostly geologically unmapped region south of the Rio Gila is labeled “Arrisonia” and “Pimeria Alta”.

LOWER COLORADO RIVER REGION

NATURAL HISTORY, ENVIRONMENT AND SPECIAL ISSUES

Natural history, environment, and geography specifically about the lower Colorado River corridor and adjacent lands below Grand Canyon — from Lake Mead, Arizona–Nevada, and through the Arizona–Nevada–California corridor to the Colorado River delta in Baja California–Sonora, Mexico

[See the map herein that delineates the region labelled here as "Lower Colorado River"]

This part includes only those references about all disciplines of natural history (geological and biological), environment, and geography, topically restricted to the region along the lower Colorado River corridor, from Lake Mead to the delta. It includes hydrologic investigations of the river-proper, as limited to this reach, including studies of that part of Lake Mead that has inundated the lower Grand Canyon. Selected archaeological and early ethnological investigations of the river corridor are also included. This part also lists natural-history and environmental studies related to the Salton Sea area. Water-quality and health issues relating to the waters of the lower Colorado River, below Grand Canyon, are also included.

See PART 2. GENERAL PUBLICATIONS for general and historical works pertaining to the lower Colorado River.
See **PART 12. LOWER COLORADO RIVER—WATER MANAGEMENT** for water-supply issues relating to the lower Colorado River.

See **PART 13. ADMINISTRATION** for water-supply issues (e.g., ground water) directly affecting Grand Canyon National Park.

See **PART 21. GEOLOGY AND PALEONTOLOGY** for surface-water supply documents pertaining to the Colorado River basin.

A Highway to the Sea

Aerial view of Hoover Dam in the Colorado River astride the boundary between Arizona (foreground) and Nevada, looking westward. Most clearly visible are the Arizona spillway (by the parking lot), the Arizona highway’s snaking approach to the dam, and the four intake towers in Lake Mead. Also visible are the Bureau of Reclamation’s visitors center (the white and copper-colored cylindrical structures on the far (Nevada) side. The Colorado River downstream is not visible from this vantage but the penstock outlet works on the Nevada wall can be seen near the base of the cliff.

(Once)  

All photos U.S. Bureau of Reclamation

Also see illustration at the end of Part 12 (page 2807) that depicts a longer aerial view of Hoover Dam and Lake Mead

(Left)  
The nearly finished Hoover Dam and intake towers brood over a rising Lake Mead, 1935. Note the driftwood and construction debris ponded in slackwater beside the barge. (The location of the yellow arrow denotes the position of the boat in the photo at right.)

(Right)  
On 19 June 2002* Brad Dimock rows past the upstream Nevada intake tower in his self-built replica of a boat used by Haldane “Buzz” Holmstrom, who in October and November 1937 had rowed the Green and Colorado Rivers all the way to the back of Hoover Dam. In 2002 Dimock retraced the Grand Canyon–Lake Mead leg of that trip and reenacted Holmstrom’s historical physical bump against the dam, ending the journey. Dimock’s approach to the dam was with permission and in the presence of Bureau of Reclamation personnel. With Vince Welch and Cort Conley, Dimock wrote a biography of Holmstrom, *The Doing of the Thing: The Brief Brilliant Whitewater Career of Buzz Holmstrom* (Fretwater Press, Flagstaff, 1998) [see Item no. 2.6802 herein].

*Date from Bureau of Reclamation photo database. Dimock recalls it was a couple of months later (fide Brad Dimock, 4 January 2012).
LOWER COLORADO RIVER REGION
WATER MANAGEMENT

Engineering projects, water management issues, and related topics in the Colorado River corridor below Grand Canyon — from Lake Mead, Arizona–Nevada, and through the Arizona–Nevada–California corridor to the Colorado River delta in Baja California–Sonora, Mexico — and proposed and existing engineering projects in the Grand Canyon

[See the map herein that delineates the region labelled here as “Lower Colorado River”]

This part includes all references that deal with the dams and their appurtenant structures, and water-control procedures and facilities in the lower Colorado River, from Lake Mead to the delta. Material not pertaining to water-management issue per se but directly related to the management of structures are also included. Some legal issues relating to the Law of the River and similar administrative considerations are included in this part. Also included are documents related to irrigation, flood-control measures, and human-controlled water supply in the lower Colorado River; among them are project-specific documents and articles about the accidental Colorado River breakout and the inundation of the Salton sink during the first decade of the 20th century. Further included in this part are items relating to administrative attention to water supply in the lower Colorado River, water apportionment to political entities in the Southwest, and constructions relating to the execution of water control and distribution. General commentaries on water management in the region are also included. Selected items pertaining to the construction of Glen Canyon Dam may also be found in this part.
As a means to accommodate the literature on proposed dams and diversion structures in Grand Canyon and Marble Canyon, but which were never constructed, documents relating to them are included in this part, as also being projects in the Lower Basin of the Colorado River.

Certain selected items that relate to the area, conditions and operation of Glen Canyon Dam will be found in appropriate other categories, depending upon whether the subject is related to, for example, administration, physical ecology, biological ecology, geology, or general interest.

For additional comments in the Introductory Notes click here.

See PART 12. LOWER COLORADO RIVER—NATURAL HISTORY, ENVIRONMENT AND SPECIAL ISSUES for items relating to sedimentation and salinity in the lower Colorado River.

---

**Hoover Dam**

**Inside the Upstream Nevada Intake Tower**

This view was taken during maintenance on the intake tower, 27 September 2001, with one of the stoplogs suspended from crane. Note the original control indicator (*inset*), its casing marked in raised letters, "U.S.B.R. 1935".

Ingersoll-Rand Company

The story of the Hoover Dam. New York: Ingersoll-Rand Co., 5 separately-dated volumes. [Articles reprinted mostly from Compressed Air Magazine, 1931-1935, but one also from Western Construction News and Highway Builder. Volume One with title-page, apparently to serve as title-page for collated and bound volume. Various reprintings of each volume.] • [N.B.: Library of Congress catalogue includes an entry with date "1932-" and with note, "Reprinted from Compressed Air Magazine (1931- and Western Construction News and Highway Builder of Nov. 10, 1932."). Printings of original five-volume series thus far seen by compiler: Volume One, April 1, 1932; 3rd printing, December 1932; [another] 3rd printing, February 1, 1934; 4th printing, February 1934; Volume Two, July, 1932; December 1932; Volume Three, no date; Volume Four [with series title change to The Story of the Boulder Dam], no date; Volume Five, no date. Printings may also be indicated by a hyphenated code found on the last page of the text; in some cases month and year are indicated (e.g., "7-32" for July 1932), but in other cases an abbreviated month and year may be indicated (e.g., "3-3" for March 1933). Codes thus far seen: Volume One, 4-32 (with "April 1, 1932" on first page), 2-4 (with "February 1, 1934" on first page, but copy seen has wrap with "Fourth Printing, Feb. 1934"); Volume Two, 7-32 (with "July, 1932" on first page), "3-3" (with discordant "Dec., 1932" on first page, but copy seen has wrap with "Third Printing, Jan. 1934"); Volume Three, "6-3"; Volume Four, no code; Volume Five, "3-6".] • [Also five volumes reprinted in facsimile in one volume, no date (ca. 1988, by Nevada Publications, Las Vegas [see Item no. 12.589]), but without most of the advertising pages.] • [cited=GCNHA Monograph 2: page 36] • [cited=GCNHA Monograph 8: page 2-8] • [Farquhar 102] • [FQ6:111] • [FQ9:116] • [FQ10:63] • [FQ12:89] • [FQ12A:56] • [FQ13:97] • [FQ18:207]

HOOVER DAM AND LAKE MEAD
BLACK CANYON, ARIZONA–NEVADA

Hoover Dam Bypass highway and bridge under construction

U.S. Bureau of Reclamation Photo
9 June 2004
HUMAN AFFAIRS IN THE GRAND CANYON REGION
National Park rangers are one of the beloved American images, and ranger-led tours and talks are popular and expected administrative duties for the visiting public. While women rangers were unusual in the early years of the Park Service, they were present even during the earlier park days at Grand Canyon. At left, ranger-naturalist Polly Patraw speaks to a group on an auto caravan trip along the East Rim Drive in June 1931. Below, three quarters of a century later a ranger discusses the ceremonial purposes of an ancient American Indian kiva, excavated at the Tusayan Ruin Museum site near Desert View.

For 38 years John Riffey (left) was the lone ranger at Tuweep, the remote Toroweap section on the northwestern corner of Grand Canyon National Park. A rangerman and pilot both, he worked the land and loved it, to his last day. It was the only job he ever had with the Park Service. He was charged with overseeing thousands of acres of national park lands, often by air, a unique responsibility in a vast landscape. He was a steadfast friend to nearby ranchers, dependable aid to wandering travelers, and the well-deserved subject of Jean Luttrell’s biography, John H. Riffey: The Last Old Time Ranger. The Park Service accorded him a lasting honor, allowing his remains to be buried near Tuweep Ranger Station.

Oh, Ranger! is the title of a book on the national parks by Horace M. Albright and Frank J. Taylor, in print through multiple editions during the Depression era and later in reprinted form.
Administration and related subjects pertaining to Grand Canyon National Park and adjacent Federal lands (including Grand Canyon–Parashant National Monument, Vermilion Cliffs National Monument, and that part of Glen Canyon National Recreation Area between Glen Canyon Dam and Lees Ferry, Arizona), and specific documents relating to adjacent Native American, state, and private lands. Also included here are selected items of legal affairs, and selected administrative items relating to Lake Mead National Recreation Area, Nevada–Arizona, and, more broadly, to issues pertaining to the State of Arizona and the United States of America; with occasional items of pertinence to the States of California and Nevada as they relate to the region covered here.

This part comprises items broadly relating to the administration of the national park and earlier administratively sectioned lands. This part lists more than documents pertaining to bureaucratic procedures and regulations. Included here are references that pertain to land- and water-use practices affecting the politically defined unit; some items relating to historic structures; management documents derived from environmental studies on public lands, or official commentary on studies and policies; public comments on, and responses to, proposed and implemented studies and management decisions; and general articles and published opinions that relate to legislative issues affecting the protection, operation, and public use of the lands of the political unit. Also included are some items that pertain to cession of sovereign territories and boundary issues that historically pertain to the Grand Canyon-lower Colorado River region.

For similarly related items, see also:
PART 12. LOWER COLORADO RIVER—WATER MANAGEMENT; for administrative items pertaining to water-use and apportionment concerns in the lower Colorado River region between Lake Mead and the delta and items relating more generally to the Colorado River basin

PART 14. HUMAN AFFAIRS for sociological, recreational, and economic analyses of visitation profiles, visitor experiences, and social and economic concerns of authorized concessions in the national park, and for similar analyses of the impact of legislatively mandated operational changes to the economic and power supply mandates for Glen Canyon Dam

PART 15. HEALTH AND SAFETY for issues relating to human health and safety, including those that discuss and contribute to administrative decisions on management issues

PART 18. ENVIRONMENT for ecological studies that discuss and contribute to administrative decisions on management issues

PART 19. BIOLOGY for ecological studies relating to management of living organisms

PART 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

PART 21. GEOLOGY AND PALEONTOLOGY for physical and geological studies of environment that discuss or contribute to administrative decisions on management issues

“...we crane over its terrible brink and gaze upon the water of the river full 3,000 feet below.”

no date 13.2  *Teachers guide to resource management issues.*  [No imprint, distributed by National Park Service, Grand Canyon], [18] pp.  [Copy received from Grand Canyon, 1995.]

1893 13.2817  [Proclamations by President Harrison noted.]  *The Nation,* 56(March 2):153.  [Creation of Grand Canyon Forest Reserve noted.]

1893 13.2818  [Proclamations by President Harrison noted.]  *Garden and Forest,* 6(March 15):120.  [Creation of Grand Canyon Forest Reserve noted.]

1893 13.2815  The preservation of the forests.  *The Manufacturer and Builder,* 25(5)(May):100.  [Notice of forest reserves declared by President Harrison, including "1,850,000 [acres] in Arizona, comprising the grand cañon of the Colorado River, the site of the most rugged and magnificent scenery probably in the world“ (entire note of pertinence)]

1903 13.2892  Trip was futile.  Representatives Morris and Johnson return without the “Strip”.  *Deseret News,* (February 18):1 [issue pagination].  [Annexation of Arizona Strip by Utah.]

1903 13.2895 The Arizona Strip. Senator Kearns may offer amendment to statehood bill for its cession. This in case of a vote on it—Arizona Legislature protests against its annexation. Deseret News, (November 21):1 [issue pagination]. [Thomas Kearns, Republican U.S. Senator from Utah, 1899-1904.]

1905 13.2899 Arizona Strip causes trouble. Amendment to statehood bill may keep New Mexico and Oklahoma out of the Union. For at least another year. It has mixed things up badly and dampened hope of the most sanguine. Republicans to hold caucus. Will probably result in adhering to April resolution, two states shall be formed of four territories. Deseret News, (February 10):1 [issue pagination]. [Regarding annexation of Arizona Strip.]

1905 13.2901 Utah delegation sees President. They discussed with him the Strawberry reservoir reclamation project. Game them encouragement. That work on it would be resumed shortly—Also talked of national game preserve. Deseret News, (December 6):1 [issue pagination]. [Senators Reed Smoot and George Sutherland and Representative Joseph Howell called on President Theodore Roosevelt. Among discussions was proposal to establish a game preserve at Grand Canyon.]

1906 13.2906 Value of the Arizona Strip. Congressman Howell speaks of proposed national park and game preserve. To the Washington Post. Says if Strip’s geography had been known it would have been made part of Utah. Deseret News, (January 12):5 [issue pagination]. [Joseph Howell.]

1906 13.2907 Fredonia, Arizona [news]. Snow fast disappearing. People of “Strip” anxious for annexation to Utah. Deseret News, (January 19):9 [issue pagination]. [“The ‘Strip’ is anxiously watching Congress to see what disposition is made of the territories; and to see, more especially, whether the Colorado river will be allowed to assert itself as the boundary line between Utah and Arizona.” (entire note)]

1906 13.2908 Fredonia, Arizona [news]. Deseret News, (February 28):11 [issue pagination]. [“No statehood for Arizona yet! And no annexation! The people here cannot hold their breath much longer.” (entire note)]

1906 13.2910 Three measures of interest to Utah. Deseret News, (June 27):1 [issue pagination]. [“Senator Sutherland’s bill to create Grand Canyon forest and game preserve” and other bills to go to President Roosevelt for his signature. (No further details.)]

1907 13.2913 “Utah should annex the Strip”. Rep. H. J. Meeks from Kane County offers a number of reasons. Both sections would gain. With this state’s schools in excellent shape sentiment in favor of consolidation grows. Deseret News, (February 19):10 [issue pagination].

1908 13.6 The Grand Canyon set aside. Forestry and Irrigation, 14 (February):69. [cited=GCNHA Monograph 8: page 7-7]

1908 13.2915 Kanab [news]. Deseret News, (March 3):3 [issue pagination]. [“word has come from Washington, D. C., that the president has set aside the Grand canyon of the Colorado...
as a national monument, together with as much of the forest reserves north and south as is necessary for the preservation of the beauty of the great gorge. The Grand canyon national monument is to take precedence over the forest reserves within which it is situated.” (entire note)]

Nevada. Legislature, Assembly

1871 13.2882 *The Journal of the Assembly during the Fifth session of the Legislature of the State of Nevada, 1871, begun on Monday, the second day of January, and ended on Thursday, the second day of March*. Carson City: Charles L. Perkins, State Printer. [See p. 112, “By Mr. Hatch”, a resolution requesting that U.S. congressional representatives of Nevada “be requested to use such effort as may seem to them necessary to secure the annexation to Nevada of all of Utah lying west of the thirty-fourth degree of longitude [from Washington, D.C.]; also, all that portion of Arizona lying north of the Colorado river.” (no further details). Also see p. 135, address of Committee of the Whole to the House, in part noting “Assembly Joint Resolution No. 136, relative to our representatives in Congress to make effort for the annexation for a portion of Utah and Arizona to the State of Nevada . . .” (no further details). Also see p. 222, Thomas H. Williams, Chairman, Standing Committee on Federal Relations, noting the return to the House by the Senate “Assembly Joint Resolution No. 136: In regard to the annexation of Utah Territory; the majority of the committee, Mr. Savage dissenting, recommend that the resolution do not pass.” (entire item).]

Zielinski, Elaine Y., and Neubacher, Patricia L.

A symbolic view of journey’s end for the second Powell expedition in 1872, the boats dragged part way into Kanab Creek from the Colorado River, emptied, and left to the elements and ages. But this was actually the beginning for thousands of journeys into Powell’s “Great Unknown” of the Grand Canyon. His reports, publications, and lectures would fix the canyonlands and the Colorado River into the minds of geographers, legislators, citizens and adventurers the world over. A century later, Colorado River trips through Grand Canyon were reaching a point of crowding that the issue became the subject of studies on the sociological qualities of river trips and about group and human–environmental interactions along the river. These led as well to the creation of special-needs river trips, offered to individuals with physical, medical, or social concerns who otherwise may never have had — or imagined they could have — the experience of living in a near wilderness, participants on Powell’s whitewater trail of adventure. And within the community of Colorado River boatmen also arose attention to emotional and general health concerns, with the establishment of The Whale Foundation offering these men and women assistance, support and education.
Commentaries, themes and analyses relating to sociological, recreational, educational, and economic issues for Grand Canyon and vicinity

This part lists analytical studies and reports that relate to socio-economic concerns, including visitor appreciation and social "quality of wilderness" studies, and items pertaining to teaching and program instruction about the human and natural history of the Grand Canyon and Colorado River. Also included here are items relating to community issues of human health.

For related items, see also:

**Part 13.** Administration for public-lands overview and management decision documents that relate to recreation and aesthetics

**Part 18.** Environment for quantitative studies of environmental quality

**Part 20.** GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

NOT WANTED!

INFAMOUS COLORADO RIVER RUNNERS

With an increase in the number of people running on the Colorado River through Grand Canyon during the later part of the 20th century, unexpected (and avoidable) outbreaks of intestinal illnesses were reported; if not with regularity then with some certainty due to the close quarters of river trips and casual attention to cleanliness. Shigella and Giardia are two kinds of infectious organisms that have been encountered on river trips, resulting usually in bouts of fever and diarrhea. Increased federal, state, and county agency oversight and training for boat crews of commercial river-running companies, and fastidious attention to clean food preparation and waste management during river trips, has reduced reported incidents of illness.

(above) Photomicrograph of stool exudates from a patient with shigellosis or so-called “Shigella dysentery”. The bacterium is Shigella, which many researchers today consider to be more properly related to Escherichia, of which E. coli is the most commonly recognized in public venues.

(right) Scanning electron microscope image of Giardia lamblia, a flagellated protozoan parasite that lives in the intestines of infected animals, including humans, before being passed back into the environment to reinfect another host.

(Images: U.S. Department of Health and Human Services, Center for Disease Control and Prevention, Public Health Image Library)

▲ TREAT YOUR WATER — WASH YOUR HANDS ▲
HEALTH AND SAFETY

 Issues relating to human health and safety in the Grand Canyon or on the Colorado River through the Grand Canyon and in Lake Mead, and selected citations relating to the lower Colorado River

This part lists items relating to human health and safety in the national park and immediate vicinity and selected works pertaining to the lower Colorado River. It also includes documents on accident investigations.

For related items, see also:

PART 3. NEW YORK TIMES for pertinent accounts published in The New York Times (e.g., aircraft accidents)

PART 12. LOWER COLORADO RIVER—WATER MANAGEMENT for items relating to dam safety and management

PART 13. ADMINISTRATION for aspects of safety issues that have resulted in discussion or management decisions relating to Federally administrated areas

PART 14. HUMAN AFFAIRS for aspects of community issues relating to human health

PART 17. NATIVE AMERICANS for aspects of health concerns and of legal litigation relating to human-health research among tribal members

PART 18. ENVIRONMENT for aspects of environmental monitoring of the physical environment

PART 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
In 1948 this Arizona Helicopter Service aircraft crashed with relatively minor damage while enroute to Supai, in Havasu Canyon. This is a testimonial to just how early commercial air service in the Grand Canyon came about. In this bibliography, Item no. 2.12882 takes note of this air service starting commercial tours in the canyon. Today, the air-tour industry is a prominent fixture in the Grand Canyon region, with frequent air tours over the canyon chiefly from Tusayan, Arizona, and Las Vegas, Nevada.

(National Park Service, Grand Canyon National Park)
The most well-known and far-reaching Grand Canyon accident was the collision of two commercial airliners at an altitude of 21,000 feet over the eastern part of the canyon, on June 30, 1956. The accident was the result of a chain of circumstances, including a late departure of one of the airliners, and the absence of air traffic control over most of the country. The accident instigated the creation of modern air traffic control. One hundred twenty-eight people perished.

United Airlines Flight 718, flying the Douglas DC-7 City of Vancouver (N6324C) was enroute to Chicago from Los Angeles. Trans World Airlines flight 2, flying the Lockheed L-1049 Super Constellation Star of the Seine (N6902C) was enroute to Kansas City also from Los Angeles. After colliding, the two aircraft fell uncontrolled into the canyon west and southwest of the confluence of the Little Colorado River. The DC-7 crashed into the south wall of Chuar Butte; the Super Constellation crashed near the base of the northeast slope of Temple Butte.

This bibliography contains numerous articles and books that relate aspects of the accident and later investigations. In the 1970s the National Park Service had removed most of the wreckage, although fragments and the occasional personal object may still be encountered. Most of the remains of the victims were placed in common burials; the United passengers at Pioneers Cemetery, Grand Canyon National Park, and the TWA passengers at Flagstaff Cemetery, Flagstaff, Arizona (see overleaf of the title-sheet for Part 4 herein).

1909 15.596 Market fruits and disease. *In: Proceedings of the thirty-sixth Annual Convention of the Horticultural Society of Central Illinois held in Hoopeston, Ill., Wednesday and Thursday, Dec. 18 and 19, 1908. Illinois State Horticultural Society, Transactions, new series, 42 (for 1908):312-318. [See p. 313: “The potato plant itself contains a very active poison, though there is little or none of the substance in the tubers as they are brought to the table. When, however, these esculents are exposed to the sun, the poison develops rapidly and the acrid taste becomes pronounced. Major Powell relates that in his exploring trip down the canon of the Colorado river when the party had lost most of their food supplies, they boiled some green potato tops, a patch of which they found at a camping place, and ate them as greens. All were made desperately sick—a result that should not be surprising, at least to a botanist.” (entire note)]]

Archaeological sites abound in the Grand Canyon; a few have been studied and prepared for public exhibition. (Top left) Walhalla Glades site on the North Rim at the Walhalla Overlook near Cape Royal; (top right) Bright Angel site overlooking the Colorado River near the mouth of Bright Angel Creek. One of the more recognizable artifacts found in the Grand Canyon are split-twig figurines (center), which were kinds of hunting charms, although no one can miss the exquisite charm of a well decorated pottery bowl (left). Not all historical relics are ancient; the park is also charged with protecting its 20th century history, too. Below is the WEN, one of the boats made by Norman Nevills for his new commercial river-running business on the Colorado. In 1938, in the WEN and two other boats, academic botanists Elzada U. Clover and Lois Jotter were the first women to travel the river, participants in Nevills’ first commercial trip. At right Clover poses with Nevills (wearing hat) and Miner Tillottson, Grand Canyon National Park’s superintendent.

ARCHAEOLOGY AND CULTURAL PRESERVATION

Archaeological history and research in the Grand Canyon region, including historical and cultural archaeology of 16th- to 20th-century activities

This part includes items that relate to archaeological surveys and studies of human remains, artifacts, and cultures during the period from early human inhabitation of the Grand Canyon region to recent historical activities of the 16th to 20th centuries.

This illustration from John Wesley Powell’s record of his explorations in the Colorado River country foretells his growing mastery of ethnological studies of the American Indians, particularly in the Southwest, his own expertise developing through repeated encounters with Ute and Paiute people. These interests evolved into his directorship of the Smithsonian Institution’s Bureau of American Ethnology. Interestingly, Powell’s account does not otherwise mention Sai’-ar nor the linguistic assistants of his early encounters.

John Wesley Powell, *Exploration of the Colorado River of the West and Its Tributaries* (Government Printing Office, Washington, 1875), Figure 13 (facing p. 42).
NATIVE AMERICANS

Native Americans of the Grand Canyon and issues concerning Native American culture and activities that relate to the canyon, the Colorado River, and the national park

This part includes all documents that pertain to the Havasupai and Hualapai tribes, traditional residents of the Grand Canyon, including social and other concerns of these tribes. Other Native American tribes are included in this part only with respect to their activities in the Grand Canyon or with respect to the canyon in their heritage. Items relating to tribal cultural claims to the Colorado River are also included.

See also:

PART 2. GENERAL PUBLICATIONS for publications of broader interest that relate at least in part to Native Americans and the Grand Canyon, including general accounts of travel into the American Indian lands

PART 11. LOWER COLORADO RIVER—[SPECIAL ISSUES] for occasional publications relating to Native Americans of the lower Colorado River region (however, such coverage is not comprehensive)

PART 16. ARCHAEOLOGY for publications relating to Native Americans prior to European contact, or to archaeological documentation Native American heritage claims to the Grand Canyon

PART 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

PART 26. AUDIO-VISUAL WORKS for films and videos that relate at least in part to Native Americans and the Grand Canyon

SCIENCE IN THE
GRAND CANYON REGION

C. Hart Merriam is often credited, correctly, for having demonstrated the principle of life zones as a function of slope exposures and thus of localized climatic conditions. In 1889 he was the first to empirically study the principle in the field, in the San Francisco Peaks region of northern Arizona, including a venture into the Grand Canyon on the [Old] Hance Trail. Many publications repeat this credit to Merriam, but one should be aware that the premise was not wholly new to environmental observers, as shown by these contrasting examples (below) by Arnold Guyot of Princeton University, which preceded Merriam’s work by two decades. Guyot was a geologist and an early climatologist whose accomplishments led to the establishment of the U.S. Weather Bureau.

PHYSICAL ENVIRONMENT

Physical, chemical, biophysical, or biochemical aspects of land, water, and atmospheric environments; overviews of principally non-biologically focused research of the environment and conservation; and multi-disciplinary or methodological environmental research and findings not based principally on organismal research; all relating to the Grand Canyon region and the Colorado River corridor through the Grand Canyon.

This part includes ecological studies that are not organismically specific, and environmental studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region, including studies of climatological influences on water supply. Multidisciplinary studies of environmental and direct human impacts together in the Colorado River corridor are included in this section. This part also includes general articles that pertain to general environmental issues in the Grand Canyon region.

For items pertaining to astronomy see:

PART 2. GENERAL PUBLICATIONS

For items pertaining to natural history and physical environment in the lower Colorado River corridor beginning at Lake Mead/Hoover Dam, see:

PART 11. LOWER COLORADO RIVER—NATURAL HISTORY
PART 12. LOWER COLORADO RIVER—WATER MANAGEMENT
For related items, see also:

**PART 13.** ADMINISTRATION for items on policy input and management documents drafted as the result of environmental studies, and public comments on these documents

**PART 14.** HUMAN AFFAIRS for economic and sociological impacts of dam operations and river flows

**PART 15.** HEALTH AND SAFETY for human health issues of environment in Grand Canyon and on the Colorado River

**PART 20.** GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

**PART 21.** GEOLOGY AND PALEONTOLOGY for physical and geological environmental issues

**PART 22.** HYDROGEOLOGY for environmental studies on the hydrogeological regime of the Colorado River

Abert’s Squirrel

The ecology of the Kaibab Plateau on Grand Canyon’s North Rim is an enticing historical and scientific story. A panoply of biological, climatic, evolutionary, and human-history vectors converge here. The Abert’s squirrel (above), found widely in the West, was first scientifically described from a specimen taken in the San Francisco Peaks area of Arizona during the Sitgreaves Expedition of 1851. A “cousin”, the white-tailed Kaibab squirrel endemic to the Kaibab Plateau (below), is considered by some systematists to be either a subspecies of the Abert squirrel, as *S. aberti kaibabensis*, or a separate species, *S. kaibabensis*.

In the 20th century a federally organized game-management debacle all but eliminated the natural predators of the Kaibab (see overleaf to title-sheet of Part 19), leading to widespread famine among the deer as the result of overpopulation and grazed defoliation of food plants. While the extirpation program was widely acclaimed at the time, and notably featured in the writings of author and novelist Zane Grey and items about “Uncle Jim” Owens, it is today a classic case study in environmental management worldwide.

Kaibab Squirrel

(National Park Service, Grand Canyon National Park)

See also overleaf of title-sheet for this Part
BIOLOGY AND BIOENVIRONMENT

Studies of organismal biology, biological ecology, and modeling and research applications relating to biological communities in the Grand Canyon ecoregion including the Colorado River corridor through the Grand Canyon; and general items relating to organismal resources in the region

This part includes documents on biological censuses and the biology and ecology of animal, plant, and protist organisms as occurring in the Grand Canyon region. This part also includes biological reports and studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region. Also included here are general articles about organismal-related information and resources; for example, fishing, hunting, and conservation.

For items pertaining to natural history in the lower Colorado River corridor below Lake Mead/Hoover Dam, see:

PART 11. LOWER COLORADO RIVER—NATURAL HISTORY

For related items, see also:

PART 13. ADMINISTRATION for items on policy input and management documents drafted as the result of environmental studies, and public comments on these documents

PART 14. HUMAN AFFAIRS for economic and sociological impacts of dam operations and river flows

PART 15. HEALTH AND SAFETY for human health issues of environment in Grand Canyon and on the Colorado River

PART 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

PART 21. GEOLOGY AND PALEONTOLOGY for items pertaining to the paleontological record, including non-present Holocene records and studies of organisms

PART 22. HYDROGEOLOGY for studies of the physical characteristics of, and research relating to environmental impacts in, the hydrogeological regime of the Colorado River
“DeMotte Park.”

At “Grand Canyon West”, the touristy attraction on the Hualapai Indian Reservation, visitors at Guano Point are offered a “barbeque” lunch. When we seated at a lone picnic table on the rim away from the crowd, this butterfly immediately flew in and, without so much as hovering, set down to feed from the plate.

(Earle Spamer photo, 3 October 2007)

(right) An instructional sign at Grand Canyon National Park, on the rim outside Bright Angel Lodge, a long-time feeding “trouble spot” due largely to the abundance of rock squirrels.

(Earle Spamer photo, 6 October 2007)

1892 19.3272 Personal notes. Psyche, 6(July)(195):292-293. [Includes notice of embarkation of C. H. Tyler Townsend "on a field trip by wagon from [Las Cruces] to the Grand Cañon of the Colorado via Flagstaff" where they will also meet another party under Prof. Toumey.]

1899 19.3231 [Forest fire on Kaibab Plateau.] In: Forest Fires [section]. The Forester (American Forestry Association), 5(7)(July):168. ["Kanab, Utah.—Three immense forest fires swept Buckskin mountains, in northern Arizona and southern Utah. Over 100 square miles of timber on the Grand Canyon forest reserve were destroyed." (entire note)]

1899 19.3279 [T. H. Macbride plans to work at Grand Canyon.] In: News [section]. Botanical Gazette, 28(1)(July):79. ["... Professor T. H. Macbride will probably spend the
summer in the Grand Cañon of the Colorado, studying the forest problems there for report to the United States Department of Agriculture, and incidentally picking up the fungi of the region.” (entire note)

1906 19.3531 Fredonia, Arizona [news]. *Deseret News*, (January 19):9 [issue pagination]. ["Col. Jones has his buffalo and cattalo 40 miles southeast from here. The country is turning into a primitive west. While the last drove of animals were being driven from Lund, one large buffalo bull was lost on the prairie near Rockville. No particular danger from stampede is anticipated, but it make take a Buffalo Bill to ‘round’ him in. Tourists will soon be able to find a veritable ‘Wild West Show’ in the Buckskin mountains.” (entire note) (Buffalo Jones.) (See also Item no. 19.3532.]

1906 19.3532 Fredonia, Arizona [news]. Only 20,000 sheep will enter reserve—Buffalo bull again at large [and other news]. *Deseret News*, (February 28):11 [issue pagination]. ["Supervisor Pratt of the Northern Division of the Grand canyon reserve is in possession of information that corrects a statement made in the ‘News’ some time ago to the effect that 30,000 sheep would be allowed to graze on the reserve. Twenty thousand is the maximum that will be allowed and these are limited to what is designated as district No. 3, a portion of the country that is suitable principally for winter range. ¶The buffalo bull lost on the desert near hear has been found and coaxed into a corral. But the animal seems to ignore such contrivances, so he simply smashed the posts and gained his freedom. he may get tender hearted when spring opens and let the boys round him in again.” (entire notes of pertinence)]

1906 19.3533 Fredonia, Arizona [news]. *Deseret News*, (July 10):9 [issue pagination]. ["The Buffalo and Catalo and Persian sheep are located on Bright Angel point where they are within reach of the telescopes of tourists sitting at the big hotel on the side where the railroad comes to the brink.” (entire note)]

1906 19.3534 Toquerville [news]. *Deseret News*, (September 4):3 [issue pagination]. ["A herd of buffalo and cattalo (the latter is a hybrid of the buffalo and the galloway cow), has been brought to Camp Woolley. The company owning them is capitalized at $100,000. Buffalo Jones, former game warden at the Yellowstone National park, is an
active member. Beside the buffalo, Persion sheep have been secured by the company. Deer in herds are to be seen in the pines and quaking asps. A movement is on foot to make the Buckskin mountains of this section a national game preserve." (entire note)]

1906 19.5 [Untitled note.] Nautilus, 20(7)(November):84. ["The Senior Editor of The Nautilus, in company with Mr. Jas. H. Ferriss, is on a collecting trip in Arizona. He expects to be absent about six weeks." (entire note) This was Henry A. Pilsbry and James H. Ferriss' trip that included the Grand Canyon region (see Pilsbry and Ferriss (1911).] [cited=GCNHA Monograph 8: page 4-31]

1907 19.3535 Mountain lion captured. Deseret News, (July 19):2 [issue pagination]. ["Buffalo Jones passed through Provo today with a mountain lion captured at Angel Creek in southern Utah [sic], about 15 miles from the point where the cable is being stretched across the Colorado. Two lions and cub were lassoed by the party, but the one Mr. Jones has and the cub are all that were finally secured. The other lion came so near getting away, while the capturing party were trying to secure him with chains, that it was found necessary to kill him or lose him, and he was killed. Mr. Jones will take the lions with him to use in the east as illustrations in a lecture on the Wild West." (entire item)]

1907 19.3536 "Buffalo" Jones here. Man who knows all about animals comes to town on visit. Deseret News, (July 26):10 [issue pagination]. [Buffalo Jones brings with him two mountain lions caught (refer to Item no. 19.3535).]

1908 19.3537 Kanab [news]. Deseret News, (March 3):3 [issue pagination]. ["A great many of the cattlemen of Kane county are contemplating going on to the forest reserve on the Buckskin mountain, and some of them have already put in their applications on the strength of the prospects of the government's building a fence across the north end of the reserve, so that the cattle can be kept on the mountains." (entire note)]

1909 19.6 [Untitled note.] Nautilus, 23(6)(November):84. [Entire note reads: "Messrs. Ferriss and Daniels are exploring the Kaibab and Kanab plateaus for shells and ferns. In this little-known country north of the Grand Canyon of the Colorado, they report beautiful scenery, a superb climate, and plenty of shells." (See Pilsbry and Ferriss (1911); also see Ferriss (1910) for a related article.)] [cited=GCNHA Monograph 8: page 4-31]

1913 19.3506 National Forest sale. The Timberman (Portland, Oregon), 15(3)(January):48. [Government authorization of "the sale of a billion feet of timber from the Kaibab forest in southern Utah and northern Arizona . . . ." Also notes authority for the construction of a railroad by the purchasers.]

1914 19.3507 [Kaibab Plateau timber sale.] In: Salt Lake and Utah [section]. The Timberman (Portland, Oregon), 15(7)(May):.

1914 19.3563 [Botanical field trip.] In: News Items [section]. Torreyia, 14(6)(June):113. ["Mr. W. W. Eggleston left New York May 8 for a trip, during May and June, to the Manti,
Fillmore and Fish Lake Forests, Utah and the Kaibab Forest, northern Arizona. This latter region, north of the Grand Canon, Arizona, is very little known botanically, having been visited by Mr. Ivar Tidestrom in 1909, but perhaps not previously, by botanists.” (entire item)

1915 19.3194 [Brief notice of killed mountain lion from Grand Canyon Game Preserve that measured ten feet from nose to tail.”] In: Forest Notes [section]. American Forestry, 21(1)(January):75.

1915 19.3483 [Huge mountain lion.] In: The Tree Top [section]. Recreation, new series, 52(3)(March):168. [“Speaking of beasts of prey—an outdoor magazine, in the first paragraph of the leading article of a recent number, tells about a mountain lion which measured ten feet from nose to tail.’ Think of it! An ordinary whopping big cougar might measure that much tail and all, and they have long tails. That old Grand Cañon tomcougar must have stood six feet high and had a yowl like a fohhorn.” (entire item)]

1924 19.3494 Estimate made of big game animals on national forests. California Fish and Game, 10(1)(January):36-38. [Kaibab Plateau game conditions noted, pp. 37, 37-38.]

1924 19.3495 Committee to help solve Kaibab deer herd problem. California Game and Fish, 10(4)(October):196.

[See p. 406, a quotation by Mélard from an 1897 committee report published by [U.S.] National Academy of Sciences (as printed in Gleadow’s translation): "(Page 20)—‘In the grand Canyon [sic] reserve of Arizona, 2 or 3 square miles at one point near the edge of the Canyon, and one square mile at another point, have been enclosed by settlers in the last two years, or since the establishment of the reserve. Considerable quantities of wood are cut for local use, and mining establishments have been set up along the slopes of the Canyon. In the summer of 1895, the Howard Beef Company of Flagstaff pastured 5,000 sheep in this reserve.[]’” (entire note)] [Gleadow’s translation is in installments in *Indian Forester*, beginning 27(6)(June):283.]

Rand, Patricia June

Rasmussen, Daniel Irvin

1997 19.2977 [Letter inquiring, "Why did Margaret Wertheim cite the mule deer in the Grand Canyon as an example of an introduced species that causes damage to a habitat?"] *From: Eating Machines. In: Peer Review [letters section]. The Sciences*, 37(1)(January/February):48. [Refers to: Wertheim, Margaret, "Unnatural Appetites: Training Bacteria to Snack on Plastic Waste", *The Sciences*, 36(3)(May/June), where the author mentioned, ", . . . and introduced species—from mule deer in the Grand Canyon to cane toads in northern Australia . . . ." Reply by Margaret Wetherim pertains only to other, unrelated letters. "Editor’s Note: Citing mule deer in the Grand Canyon as an example of habitat damage was not fault of the author’s. It was instead the result of an editing error."]

Vasey’s Paradise on the Colorado River, Marble Canyon, Grand Canyon National Park – home of the Kanab ambersnail, an endangered species first scientifically described in 1948 from a few specimens collected near Kanab, Utah, in 1909. The population living at Vasey’s Paradise is the only naturally occurring population of this land snail surviving in an environment largely unaffected by human activities. It was discovered living here in 1991 as the result of one of the research trips conducted under the Glen Canyon Environmental Studies program. See in the afterword herein for an essay that relates to the discovery of this snail both in Utah and in the Grand Canyon.

Kanab ambersnail, about actual size

Vasey’s Paradise photo by Earle Spamer, 25 July 1991, during a GCES research trip.
“GLEN CANYON ENVIRONMENTAL STUDIES” PROGRAM

Glen Canyon Environmental Studies program technical reports and related documents produced under the monitoring and research programs of the Glen Canyon Dam Environmental Impact Statement as mandated by Congress

[This section is no longer updated, the GCES program having ended.]

The Glen Canyon Environmental Studies (GCES) program was created to perform as an interagency body under the direction of the U.S. Department of the Interior, Bureau of Reclamation. It responded to a Congressional mandate to develop an Environmental Impact Statement on the effects of hydropower production at Glen Canyon Dam on the Colorado River and its riparian community downstream through lower Glen Canyon and the Grand Canyon. The EIS also examined the potential impacts of management decisions on social and economic issues. The GCES went through two phases, and the EIS was completed in 1995. Also see 13. ADMINISTRATION for various management issues and decisions related to the GCES.

GCES was such an important part of the scientific and cultural study of the Grand Canyon, specifically in the previously little-studied Colorado River corridor, that the products of these studies are a bibliography in their own right. Many of the documents are interdisciplinary, thus also a justification for listing them separately, rather than in several places throughout this bibliography. Historians of science will also notice in this list that some of the subjects were reported in other scientific publications. A few of the reports were also released in their entirety as U.S. Geological Survey Open-
File Reports or publications of the National Academy Press; these are itemized here. Most of the reports listed here, and voluminous supporting data, are archived at the Grand Canyon Monitoring and Research Center, Flagstaff, Arizona. Complete information for this list is still being compiled.

Enumerated entries following the sequence for this bibliography do not necessarily pertain to individual reports; some refer to study groups, various reports of which are archived.

For additional comments in the Introductory Notes click here.
Glen Canyon Environmental Studies Reports

Compiled by Richard D. Quartaroli

Glen Canyon Environmental Studies
U.S. Bureau of Reclamation
Flagstaff, Arizona

(Item numbers for Part 20 have been added in THE GRAND CANYON. Citations as they appear in the online edition differ in format.)

38. 20.38 (Bureau of Reclamation.) Glen Canyon Environmental Studies phase II and plan for implementation. PB89-180228/AS. 48 pp.

PHASE II

Most of these reports are archived; some have been distributed as “gray literature” of limited or restricted availability.

A. Arizona State University

Endangered Fish Study in the Little Colorado River
A  Ecology and conservation biology of humpback chub, Gila cypha, in the Little Colorado River, Arizona

Principal Investigators: Paul Marsh, Michael Douglas

A1(1) 20.40  Annual — 31 January 1993
A1(2) 20.41  Annual — 31 January 1994
A1(3) 20.42  Annual — 31 January 1995
A2(1) 20.43  Draft — 1 November 1995
A2(2) 20.44  Final — 1 February 1996

B.  Arizona Game and Fish Department

Native Fish Studies in the Mainstem Colorado River and in the Little Colorado River

B1  Ecosystem Level Process and Lower Trophic Level

B1(1) 20.45  Effects of different flow regimes on primary production and organic matter and nutrient loading rates and budgets for the Glen Canyon Dam tailwater to Lee's Ferry.
B1(2) 20.46  Effects of operations of Glen Canyon Dam on the Gammarus lacustris in the Glen Canyon Dam tailwater.
B1(3) 20.47  Effects of varying flow levels on the algal and invertebrate species of the Glen Canyon Dam tailwater.
B1(4) 20.48  Effects of varying flow levels on desiccation and nutritive quality of the exposed algae.

Principal Investigators: Dennis Kubly, Andy Ayers, Ted Angradi

20.48  Draft — 30 September 1993
20.49  Final — 31 December 1993

B2  Interim Flow Monitoring

Effects of the interim flows on the water chemistry and aquatic food base for Lake Powell and in the Lee’s Ferry tailwater.

Principal Investigator: William Persons

20.50  Draft — 30 September 1994
20.51  Final — 31 December 1994

B3  Trout Studies

B3(1) 20.52  Effects of the operations of Glen Canyon Dam on the loss of trout spawning in the reach between Glen Canyon Dam and Lee’s Ferry.
B3(2) 20.53  Effects of the operations of Glen Canyon Dam on the rate of stranding and mortality of naturally reproduced and stocked trout from Glen Canyon Dam to Lee’s Ferry.
B3(3) 20.54  Effects of fluctuating flows on the age and growth relationships of stocked trout between Glen Canyon Dam and Lee’s Ferry.
B3(4)  

*Effects of fluctuating flows on the behavioral response of trout in the Glen Canyon Dam tailwater.*

Principal Investigators: William Persons, Dennis Kubly

20.55 Draft — 30 September 1993
20.56 Final — 31 December 1993

**B4 Native Fish Studies**

B4(1) 20.57 *Identify the temporal and spatial distribution patterns and movements of early life history stages of fishes in the Little Colorado River.*

B4(2) 20.58 *Determine changes in environmental conditions in mainstream and tributary confluence areas for native fish rearing habitats under different flow regimes.*

B4(3) 20.59 *Determine the algal and invertebrate standing crops and their relative contributions to the diets of young native fish.*

B4(4) 20.60 *Determine the behavioral responses of larval to juvenile native fishes to changing environmental conditions in rearing habitats.*

B4(5) 20.61 *Determine the age structure and growth rates of native fishes related to hydrologic and thermal conditions.*

B4(6) 20.62 *Comparison of otolith edge chemistry of native fishes collected in tributary and mainstream habitats for use in growth and movement analysis.*

Principal Investigators: Dennis Kubly, Rob Clarkson

B4(7) 20.63 *Determination of the effects of limnological changes on the distribution of native fishes in the Little Colorado River and other tributaries.*

Principal Investigator: Rob Clarkson

B4(8) *Determination of thermal tolerance of young-of-the-year humpback chub.*

Principal Investigator: William Persons

20.64 Draft — 30 September 1994
20.65 Final — 30 November 1994

**B5 Propagation of Native Fish Study**

Principal Investigator: William Persons

20.66 Draft — 30 January 1993
20.67 Final — 30 November 1993

**C. Bio/West**

**Endangered Fish Studies in the Mainstem Colorado River**

C *Characterization of the life history and ecology of the humpback chub, Gila cypha, in the Grand Canyon, Arizona.*
Principal Investigators: Richard A. Valdez, W. J. Masslich, W. C. Leibfried

20.68 Annual — 31 March 1991
20.69 Annual — 31 March 1992
20.70 Annual — 31 March 1993
20.71 Draft — 31 March 1994
20.72 Final — 15 August 1994

D. U.S. Fish and Wildlife Service

Little Colorado River Endangered Fish Studies and Tributary Evaluation

D1  20.73 Habitat use by humpback chub, Gila cypha, in the Little Colorado River and other tributaries of the Colorado River, Arizona.

D2  20.74 Refinement of habitat model for the Little Colorado River.

D3  20.75 Quantification of Gila cypha habitat in selected tributaries in the Grand Canyon, Arizona.

D4  20.76 Determination of impacts of increased discharges to humpback chub habitat availability in the Little Colorado River.

Principal Investigators: Stuart C. Leon, Owen T. Gorman, O. E. (Gene) Maughn

20.77 Draft — 15 June 1994
20.78 Final — 30 September 1994

E. U.S. Geological Survey, Arizona District Office and National Research Program

E1  Eddy Deposition Study

Movement and deposition of sediments from the main channel to the eddies of the Colorado River in the Grand Canyon.

Principal Investigators: Jon Nelson, Ned Andrews

20.79 Draft — 31 March 1993 (anticipated)
20.80 Final —

E2  Velocity Field Simulations

Simulation of the velocity fields of the Colorado River in the Grand Canyon, Arizona (preliminary title)

Principal Investigators: James Smith, et al.

20.81 Draft — 30 June 1993
20.82 Final —

E3  Beach and Eddy Linkage
Linkage in the main channel and eddy dynamics of the flow of the Colorado River in the Grand Canyon, Arizona.

Principal Investigators: James Smith, et al.

20.83 Draft — 30 June 1993
20.84 Final —

E4 Sediment Transport Simulations

Sediment transport simulations, Colorado River, Grand Canyon, Arizona.

Principal Investigator: Jim Bennett

20.85 Draft — 31 March 1993
20.86 Final —

E5 Water Quality Characteristics of Lake Powell

Water quality characteristics of the Lake Powell forebay and draft tubes of Glen Canyon Dam.

Principal Investigators: Robert Hart, K. M. Sherman

20.87 Draft — 31 March 1993
20.88 Final —

E6 Channel Margin Stratigraphy

Internal structure of bars in Grand Canyon and evaluation of proposed alternatives for Glen Canyon Dam.

Principal Investigators: Dave Rubin, et al.

20.89 Draft — 31 March 1993
20.90 Final —

E7 Sediment Transport Study

Flow and sediment transport in the Colorado River between Lake Powell and Lake Mead.

Principal Investigators: Jim Smith, Steve Wiele

20.91 Draft — 31 March 1993
20.92 Final —

E8 Beach Deformation Study

Hydrogeology of sand bars 43.1L and 172.3L and the implications on flow alternatives along the Colorado River in Grand Canyon.

Principal Investigators: Michael Carpenter, Carruth, Fink, Boling, Brian Cluer

20.93 Draft — 30 June 1993
E9  Debris Flow Study

Magnitude and frequency data for debris flows in Grand Canyon National Park and vicinity, Arizona.

Principal Investigators: Ted Melis, Robert Webb

Draft — 30 September 1993

E10  Synoptic Water Quality Report

Synoptic water-quality experiments on the Colorado River in the Grand Canyon, Arizona.

Principal Investigators: Robert Averett, H. E. Taylor

Draft — 31 March 1993

E11  Sand Thickness in Grand Canyon

Measurement of sand thickness in Grand Canyon and a conceptual model for characterizing changes in sand-bar volume through time and space.

Principal Investigators: Dave Rubin, et al.

Draft — 31 March 1993

E12  Stanton Photo Reevaluation

A century of environmental changes in Grand Canyon: Repeat photography of the 1889-90 Stanton Expedition on the Colorado River.

Principal Investigator: Robert Webb

Draft — 30 June 1993

E13  Paria River Flood and Sediment Relationships

Relation of sediment load and flood-plain formation to climatic variability, Paria River drainage basin, Utah and Arizona.

Principal Investigators: Julia Graf, Robert Webb, Richard Hereford

Draft — 31 December 1992

E14  Traveltime and Dispersion

Traveltime and longitudinal dispersion at steady and unsteady flows, Colorado River, Glen Canyon Dam to Lake Mead.
Principal Investigator: Julia Graf

20.105 Draft — 31 March 1993

20.106 Final —

F1 Geoarchaeology and Mapping

Surficial geology, geomorphology, and erosion of archaeological sites along the Colorado River, eastern Grand Canyon, Grand Canyon National Park, Arizona.

Principal Investigators: Richard Hereford, Helen Fairley, Kate Thompson, Jan Balsom

20.107 Draft — 30 September 1993

20.108 Final — 31 December 1993

F2 Historic Climate Condition

Historic variation of warm-season rainfall, southern Colorado Plateau, southwestern U.S.A.: Climate change.

Principal Investigators: Richard Hereford, Robert Webb

20.109 Draft — 31 December 1992

20.110 Final —

F3 Geologic Report

Quaternary geology, geomorphology, and erosional processes in the eastern Grand Canyon.

Principal Investigator: Ivo Lucchitta

20.111 Draft — 30 September 1993

20.112 Final — 20 December 1993

G. HBRS, Inc.

Recreation and Economics Reports

G1 Recreation Studies

Evaluation of the recreation economic impact related to the operations of Glen Canyon Dam.

Principal Investigators: Michael Welsh, Richard Bishop

G2 Non-Use Value Studies

Evaluation of the non-use values of the Grand Canyon as related to the operations of Glen Canyon Dam.
Principal Investigators: Michael Welsh, Richard Bishop

20.114 Draft — 30 September 1993
20.115 Final — 31 December 1993

G3 Power Modeling Studies

*Evaluation of the impact of changes in the operations of Glen Canyon Dam on power resources.*

Principal Investigators: Michael Roluti, Power Resource Committee

20.116 Draft — 30 June 1993
20.117 Final — 30 September 1993

H. Hopi Tribe

Cultural Resource Studies in the Grand Canyon

H1 *Cultural resource inventory of the lower Little Colorado River.*

Principal Investigator: Michael Yeatts

20.118 Draft — 30 September 1994
20.119 Final — 31 December 1994

Principal Investigator: T. J. Ferguson

20.120 Draft — 30 September 1994
20.121 Final — 31 December 1994

H3 *Hopi Tribe interpretation and use of cultural sites in the Grand Canyon.*

Principal Investigators: Kurt Dongoske, Michael Yeats

20.122 Draft — 30 September 1994
20.123 Final — 31 December 1994

I. Hopi Tribe

Hydrology Study of the Little Colorado River

I *Assessment of the historic hydrology and water quality of the Little Colorado River.*

Principal Investigator: Ron Morgan

20.124 Draft — 30 September 1993
20.125 Final — 31 December 1993

M. Hualapai Tribe

Riparian Study

Monitoring and evaluating the impacts of Glen Canyon Dam interim flows on riparian communities in the lower Grand Canyon.

Principal Investigators: Brice Hoskin, Amis Holm

20.136 Annual — 31 January 1993
20.137 Annual — 31 January 1994
20.138 Draft — 30 September 1994
20.139 Final — 31 December 1994

N. Navajo Nation

Cultural Resources Study

A cultural resources inventory of the lower Little Colorado River and Grand Canyon.

An evaluation of the ethnohistorical use of the Grand Canyon by the Navajo Nation.

Principal Investigators: Alexis Roberts, Richard Begay

20.140 Draft — 30 September 1993
20.141 Final — 31 December 1993

O. Navajo Nation

Little Colorado River Endangered Fish Study

The development of a literature data base and geographic evaluation of the Little Colorado River basin.

Principal Investigator: Michael Tremble

20.142 Draft — 30 September 1993
20.143 Final — 31 December 1993

P. National Park Service, Grand Canyon National Park

Aquatic Productivity Studies

The effects of Glen Canyon Dam on the aquatic food base in the Colorado River corridor in Grand Canyon, Arizona.

Principal Investigators: Dean Blinn, Joseph Shannon, Lawrence Stevens

20.144 Draft — 31 October 1992
20.145 Final — 31 December 1992

P2 Riparian Studies
Impacts of Glen Canyon Dam on riparian vegetation and soil stability in the Colorado River corridor, Grand Canyon National Park, Arizona.

Principal Investigators: Lawrence Stevens, Tina Ayers

20.146 Draft — 31 January 1993

20.147 Final — 30 April 1993

P3 Sediment Studies

20.148 The influence of variable discharge regimes on Colorado River sand bars below Glen Canyon Dam.

Principal Investigators: Stanley Beus, Charles Avery

P3(1) 20.149 Mechanisms of erosion and a model to predict seepage driven erosion due to transient flow.

Principal Investigator: Muni Budhu

P3(2) 20.150 Beach face erosion in Grand Canyon National Park: A response to ground water seepage during fluctuating flow releases from Glen Canyon Dam.

Principal Investigators: William Werrell, Rick Inglis, Larry Martin

P3(3) 20.151 Daily responses of Colorado River sand bars to Glen Canyon Dam test flows, Grand Canyon, Arizona.

Principal Investigators: Brian Cluer, Lee Dexter

P3(4) 20.152 Analysis of sand bar response along the Colorado River in Glen and Grand Canyons to test flows from Glen Canyon Dam using aerial photography.

Principal Investigator: Brian Cluer

Principal Investigators: Jack Schidt, J. Clark, E. Kyle, P. Grams

P3(6) 20.154 Colorado River sand budget: Lee’s Ferry to Little Colorado River including Marble Canyon.

Principal Investigators: Gary Smillie, William L. Jackson, D. Tucker

P3(7) 20.155 The influence of variable discharge regimes on Colorado River sand bars below Glen Canyon Dam, Arizona.

Principal Investigators: Stanley Beus, Charles Avery, Lawrence Stevens, Matt Kaplinski, Hilary Mayes, Brian Cluer

20.155 Draft — 31 October 1992

20.156 Final — 31 January 1993

P4 Cultural Resource Studies

An inventory of the cultural resources of the Grand Canyon, Arizona.

Principal Investigators: Helen C. Fairley, Peter W. Bungart, Christopher M. Coder, Jim Huffman, Terry L. Samples, Janet R. Balsom
P5 Bald Eagle Report

*Influences of Glen Canyon Dam fluctuating flows on spawning rainbow trout and wintering bald eagles, with observations on the effects of human-bald eagle interactions on the Colorado River in Grand Canyon National Park, Arizona.*

Principal Investigators: Linn Montgomery, Charles van Riper III, Bryan Brown, William Leibfried

P6 Nutrient Cycling

*Influence on geochemical processes on nutrient spiralling within the recirculation zones of the Colorado River in the Grand Canyon.*

Principal Investigators: Rod Parnell, Jeff Bennett

P7 Historic Vegetation Changes

*Evaluation of the current and historical riparian vegetation trends in Grand Canyon using multitemporal remote sensing analyses at the Geographic Information System long-term monitoring study sites.*

Principal Investigator: Gwen Waring

P8 Fluvial Marsh Study

*Effects of interim flows from Glen Canyon Dam on riparian vegetation along the dam regulated Colorado River in Grand Canyon, Arizona.*

Principal Investigators: Lawrence Stevens, Tina Ayers

P9 Paleoflood Study

*A 4500-year record of large floods on the Colorado River in the Grand Canyon, Arizona.*

P10 Recreation Study

*Effects of the operation of Glen Canyon Dam on campsite size in the Grand Canyon, Arizona.*

Principal Investigators: Lisa Kearsley, Kathy Warren

P11 Evaluation of Daily Beach Changes

*An evaluation of the effects of the interim flows from Glen Canyon Dam on the daily change of beach area in Grand Canyon, Arizona.*

Principal Investigators: Brian Cluer, Lee Dexter

P12 Evaluation of Aerial Photography of Sediment Deposits

*An evaluation of the annual effects of the interim flows from Glen Canyon Dam on the sediment deposits in the Grand Canyon, Arizona.*

Principal Investigator: Brian Cluer

P13 Eddy Dynamics

*Evaluation of the effects of interim flows on the deposition of sediment in eddies in the Grand Canyon, Arizona.*

Principal Investigator: Brian Cluer

P14 Waterfowl Study

*An evaluation of the effects of the operations of Glen Canyon Dam on the waterfowl resources in the Grand Canyon, Arizona.*

Principal Investigators: Lawrence Stevens, Natasha Kline

P15 Willow Flycatcher Survey
Southwestern Willow Flycatcher surveys along the Colorado River in Grand Canyon National Park and Glen Canyon National Recreation Area, 1992.

Principal Investigators: Mark Sogge, Timothy Tibbitts

20.179 Draft — 7 December 1992 (draft ?)
20.180 Final —

P16 Lower Trophic Level Study

Interim flow effects on lower aquatic trophic levels in the Colorado River in Grand Canyon, Arizona.

Principal Investigators: Lawrence Stevens, Dean Blinn

20.181 Draft — 1 October 1994
20.182 Final — 1 January 1995

P17 Avifaunal Monitoring

Avifaunal monitoring during the interim flows, including the southwestern willow flycatcher, the bald eagle, and obligate riparian avifauna.

Principal Investigator: Mark Sogge

20.183 Draft — 1 October 1994
20.184 Final — 1 January 1995

P18 Recreation Monitoring

Monitoring the effects of interim flows from Glen Canyon Dam on sand bar dynamics and campsite size in the Colorado River corridor, Grand Canyon National Park, Arizona.

Principal Investigators: Stanley Beus, Matt A. Kaplinski, Joseph E. Hazel, Linda A. Tedrow, Lisa H. Kearsley

20.185 Quarterly Reports
20.186 Annual Reports
20.187 Draft — 1 October 1994
20.188 Final — 1 January 1995

Q. National Park Service, Glen Canyon National Recreation Area

Q1 Water Quality Study

An evaluation of the effects of interim flow operations on the water quality of the Colorado River from Glen Canyon Dam to Lee's Ferry, Arizona.

Principal Investigators: Clive Pinnock, C. Wood, D. Tinker

20.189 Draft — 30 June 1993
20.190 Final — 30 September 1993
Q2  Waterfowl Study

An evaluation of the effects of interim flow operations on the waterfowl in the Colorado River from Glen Canyon Dam to Lee’s Ferry, Arizona.

Principal Investigators: Clive Pinnock, C. Wood

20.191 Draft — 30 June 1993
20.192 Final — 30 September 1993

Q3  Cultural Resource Report

An evaluation of the effects of the operations of Glen Canyon Dam on the cultural resources from Glen Canyon Dam to Lee’s Ferry.

Principal Investigators: Christine Kincaid, Tim W. Burchett

20.193 Draft —
20.194 Final —

Q4  Paiute Ethnographic Report

An ethnographic evaluation of the use of the Grand Canyon, Arizona by the Paiute tribes of Arizona and Utah.

Principal Investigators: Richard W. Stouffle, David B. Halmo, Michael J. Evans, Diane E. Austin

20.195 1st preliminary draft — 24 June 1993
20.196 2nd preliminary draft — 15 July 1993
20.197 Draft —
20.198 Final —

Q5  Marsh Study

Effects of the interim flows from Glen Canyon Dam on the fluvial marshes of the lower Glen Canyon, Arizona.

Principal Investigators: Lawrence Stevens, Tina Ayers

20.199 Draft — 31 January 1993
20.200 Final — 30 April 1993

R.  Northern Arizona University

Trout Spawning Study

R  Impact of fluctuating water levels on early life history of rainbow trout.

Principal Investigators: W. Linn Montgomery, Kirsten Tinning

20.201 Draft — 28 February 1993 (3 August 1993)
20.202 Final — 31 May 1993
S. **Northern Arizona University**

**Humpback Chub Literature Review**

S  *Synthesis of information on humpback chub, Gila cypha, in the Colorado River basin.*

Principal Investigators: Linn Montgomery, Charles Minckley

20.203 Draft — 31 July 1993

20.204 Final — 31 October 1993

20.231 Draft — 1 May 1993
20.232 Final — 30 September 1993
The first geological explorations of the lower Colorado River region, including the Grand Canyon, took place during the Ives expedition in 1858 and the Powell expedition in 1869. Geologist John Strong Newberry, who accompanied the Ives party as naturalist and physician, gathered the first fossils from the region (left), which were described in his report of 1861. During the expansionist years of the federal geological surveys a decade after the Powell expedition, Clarence E. Dutton mapped out the first reasonably comprehensive geological charts for the Grand Canyon (top).

In the 20th century rich Pleistocene Period deposits were discovered in caves and sheltered areas of the Grand Canyon, providing perspectives life and of climatic conditions during and before the latest Ice Age in this part of North America. At right is a skull of the extinct Harrington's mountain goat, *Oreamnos harringtoni.*

National Park Service, Grand Canyon National Park

GEOLOGY AND PALEONTOLOGY

Geology and paleontology of the Grand Canyon region, including extralimital studies of the continuity of Grand Canyon strata, regional structure and tectonics, regional groundwater hydrology (excludes hydrogeology of the Colorado River), and the geological history of the Colorado River

This part includes works about the geology and paleontology of the Grand Canyon (excluding the hydrogeologic regime of the Colorado River), studies of Grand Canyon rock units and their stratigraphic continuity beyond the canyon-proper, studies of the structure and tectonics of southwestern North America where embracing the Grand Canyon region, historical investigations of the Cenozoic evolution of the Grand Canyon and the lower Colorado River, modern groundwater studies of the region, and general reports on mapping in the region. Some works relating to physical geography are also included here.

Also see:

PART 11. LOWER COLORADO—NATURAL HISTORY for geological works about the lower Colorado River region, Lake Mead, Arizona-Nevada, to the Colorado River delta in Mexico

PART 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

PART 22. HYDROGEOLOGY OF THE COLORADO RIVER for materials relating to the hydrogeologic regime of the Colorado River through the Grand Canyon

PART 23. GEOLOGICAL FIELD GUIDES for specialized geological guides to the Grand Canyon and Colorado River

PART 24. GEOLOGIC MAPS for all geologic maps within the Grand Canyon region.

PART 29. COMPUTER MEDIA for specialized products released for use in this environment
Ground water is one of the precious resources of the Grand Canyon. There are relatively few perennial streams here (other than the Colorado River); all have sources in groundwater recharge areas that release into the canyon through springs. Havasu Creek (top left) is the principal perennial stream on the South Rim, the lifesource of the Havasupai Tribe who live now on the Havasupai Indian Reservation; the village of Supai lies deep in Havasu Canyon. While geologically and environmentally important to the Havasupai people, Havasu Creek also holds deep cultural roots in Havasupai life. Today there are considerable concerns relating to Grand Canyon springs, which may suffer as-yet unknown adverse effects as the result of uranium mining activities on the rims of Grand Canyon, and new sources of groundwater withdrawal for planned residential and tourism growth such as at the South Rim’s nearby tourism-based community of Tusayan.

Havasu Creek is heavily charged with minerals, lending to it a well-known beauty that gives the Havasupai people their name, the People of the Blue-Green Water. At bottom left is a historic view of a now-unknown young Anglo girl perched atop a travertine stalagmite along Havasu Creek. Tendrils of travertine stalactites, some of which enrobe once-living plants, offer a peculiar stone beauty to the scene.
This mineral was first described from a specimen from the Last Chance Mine on the Grandview Trail, Grand Canyon (see Item no. 21.4820). It occurs as a secondary mineral to copper, which was the principal ore mined from the Last Chance prospect. Oddly enough, grandviewite was not recognized until 2008 and was first published in the *Australian Journal of Mineralogy*. It has very delicate radial crystals (seen more massively in this specimen), and the mineral is very soft, with a hardness of 2 on the one-to-ten Moh’s Scale. This specimen is in the Grand Canyon National Park Museum collections.

1875 21.6 [Abstract of comments by Clarence E. Dutton on a presentation by John Wesley Powell.] Philosophical Society of Washington, Bulletin, 2:76. [The “Colorado region” is noted. An abstract of the presentation by Powell appears on pp. 74-76, containing no direction mention of the Grand Canyon region. Other comments, and a concluding comment by Powell, appear on pp. 76-79, also without mention of the Grand Canyon region.]

[Notice of lecture by Charles D. Walcott at meeting of March 2, 1887.] Boston Society of Natural History, Proceedings, 23:342. ["The President [S. H. Scudder] then introduced Mr. C. D. Walcott of the U. S. Geological Survey, who gave an account of 'Trip through the Grand Cañon of the Colorado.' Mr. Walcott illustrated his remarks by showing many lantern pictures, presenting to the Society a continuous view of the geology of the Grand Cañon, which he has done so much in elucidating."

A great lode. In: Mining Matters [section]. The Journal "Industry", 2(23)(June):167. ["There was last month a great deal of excitement around the Flagstaff district in Arizona, over an alleged discovery of a wonderful ledge in the Grand Cañon of the Colorado. The accounts written are exciting and extravagant; so much so that we expect the paper and ink consumed are a dead loss. The informant who wrote a letter to the Engineering and Mining Journal forgot even to mention what kind of mineral the wonderful ledge—far greater than the Comstock—contained. We are at loss to know how our contemporary finds a column to spare for such sensational recountal."

1892 21.5455 [Synopsis of lecture by Prof. Dr. Credner of Leipzig, on "Colorado-Plateau und dem Grand Cañon (sprich Canyon)."

Brooks, William E.

Broomfield, C. S.

Bross, William

1881 21.5724 Canyons. Their character and origin—Paper read before the American Association for the Advancement of Science, by the Hon. William Bross, of Chicago. *Chicago Daily Tribune*, (August 25):3. [Postulates a catastrophic origin of canyons. Published by title only in the AAAS *Proceedings*; see no. 21.5723. Includes a concluding paragraph pertaining to an AAAS meeting presentation by Clarence E. Dutton on the Grand Canyon (see 21.916); this paragraph reproduced in full here since this is the only published source for this paper: "Let me add a very few words in conclusion upon a paper on the geologic history of the Colorado River and the plateau of it, read at the St. Louis meeting by Col. E. C. Dutton [sic], of Washington. This canon, as described by Maj. Powell who has the honor of braving almost incredible dangers to explore it and to give the world their first knowledge of its wonders, is some 1,500 miles long; the perpendicular walls are a mile or a fraction of it apart, and are from 1,000 to 5,000 feet high. They are composed of nearly all the series in the geologic catalog, from the granit[e] all the way up to the highest igneous stratified rocks. Now this, by far the longest and in some respects the most wonderful cañon in the world, Col. Dutton described as having been worn down by the Colorado River. In view of the facts herein presented that conclusion seems supremely fanciful and absurd. Like all the others, it could only have been formed by some great convulsion of the earth’s crust, and through it the drainage of nearly a thousand miles along the western slopes of the Rocky Mountains finds its way to the Gulf of California.”]

1882 21.5723 Canons as I have seen them, with some thoughts as to their origin [title only]. From: Titles of other papers read in Section B. *In: Proceedings of the American Association for the Advancement of Science, Thirtieth Meeting, held at Cincinnati, Ohio, August, 1891*. Salem, Massachusetts: The Permanent Secretary [of American Association for the Advancement of Science], p. 256. ("Printed in full in Chicago Tribune of Aug. 25, 1881.” [see no. 21.5724])

1938  21.5736  A review of the geology of the Clovis finds reported by Howard and Cotter.  
[See pp. 122-123, an uncredited statement: “. . . it is now thought that the Brazos [River] of Texas once drained the area above the Grand Canyon now drained by the Colorado. When the Colorado diverted this water from the Gulf of the Pacific at about a net mile lower elevation [sic], it was the waters from the full-functioning drainage system which gave it the sudden load of headwaters necessary to dig the Grand Canyon. An encroaching stream, feeling for its headwaters in driblets, could not be expected to do such a thorough job at digging on bottom.” (entire note)]

Also, geographical, climatological, and statistical description of the great Northwest, showing an unoccupied territory of over one million square miles of rich country. Being a complete guide to the gold mines. By W. B. Horner.* Chicago: W. B. Horner (Wm. H. Tobey and Co., Printers, Chicago), 67 pp., map, advertisements. [Cover title: *Horner's Kansas and Nebraska gold regions, and new rail road and route map, to the gold mines. Published by W. B. Horner . . . .*] [See in Chapter 5, "Will Gold Be Found in the Mountains?"; p. 40, Colorado River and "Canon of the Colorado" noticed: "Moreover, the Colorado river, in escaping to the sea, pierces the Cordillera of the Andes diagonally, having rent its way by a chasm bored through the very bowels of the Cordillera, athwart from base to base. This chasm, four hundred miles in length, is known as the Canon of the Colorado. This canon presents the unique and novel fact to mankind, that a primary mountain chain whose summit is of the auriferous rocks, is thus gorged to its foundations, many thousand feet in depth! It is here upon the plateau, in the arcana of the mountain formation, and the activity of the stupendous forges of nature, that the precious metals may be sought to mass and position." (ABOVE) Stereoview of the Colorado River at the bottom of Bright Angel Trail at the mouth of Pipe Creek. View upstream toward pyramidal Zoroaster Temple on the skyline. Boulders of the toe of Bright Angel Creek delta are seen on the opposite shore, covered partly by river sands.

(RIGHT) “Rock Carved by the Colorado.” (Heliotype.) Water-sculpted fluting in metamorphic rock from the Lower Granite Gorge of Grand Canyon, an erosional effect of the river’s abrasive load of suspended sediment.

See also overleaf of title-sheet for this Part
HYDROGEOLOGY OF THE COLORADO RIVER

Hydrogeology of the Colorado River and some tributary surface waters in the Grand Canyon — including hydraulic investigations of the river, sedimentary studies in the river corridor, surface-water resources of the Colorado River mainstem below Glen Canyon Dam

This part encompasses all physical studies of the water flow (hydrology) of the Colorado River, applied research on its carried and bottom sediment, and the effects of the river’s fluctuating flow on the distribution of sediment on the banks of the river. Includes hydrogeological investigations in Glen Canyon National Recreation Area below Glen Canyon Dam.

Also see:

PART 11. LOWER COLORADO RIVER—NATURAL HISTORY for items relating to geological and hydrogeological studies and investigations in Lake Mead and the lower Colorado River downstream from Hoover Dam

PART 13. ADMINISTRATION for items on policy input and management documents drafted as the result of environmental studies of the Colorado River

PART 18. ENVIRONMENT for items relating to physical ecology as affected by the Colorado River through the Grand Canyon and climatic studies with hydrological applications

PART 19. BIOLOGY for items relating to biological ecology as affected by the Colorado River through the Grand Canyon

PART 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

PART 21. GEOLOGY AND PALEONTOLOGY for items relating to groundwater hydrology and to hydrogeological investigations of tributaries to the Colorado River
“It was just above Unkar Rapids that I decided to make a cross profile and velocity measurements. To record boat position one man on board held a stadia rod and I set up plane table and alidade on the right bank. Thus I could short distance by stadia. We had trouble getting the electrical system through the current meter cable—again a problem of being furnished old and decrepit gear from a local [U.S. Geological] Survey office. I vowed we would get a new reel and cable dropped to us by parachute.

“Smuss [Sylvester Allen] ran the boat—it was all he could do to keep the boat holding its own against the current even with the motor roaring at wide open throttle. Depth readings were obtained by cable and weight and a bed velocity recorded as well as surface velocity. Interestingly both at the bed and at the surface the readings were the same! 11.5 feet per second. This tells me something about what must happen in a big rapid. The main current must keep plunging downward as it comes off the lip of the shallow rapid, and creates strong bed current.”

* * * *

Farther downstream] “The De Haviland came over early, and above camp we climbed out on a set of minor hills where the parachute drops were to be made. There were 4 drops—the one with a case of beer the parachute failed to open. Half the cans were wrecked on the rocks. So also the lettuce arrived self shredded from the free fall. A new reel and cable for the current meter landed safely.” (Leopold, Journal, Vol. 7.)

Luna Bergere Leopold (1915-2006), a son of prominent conservationist Aldo Leopold (1887-1948), worked during seven decades to bring the field of hydrology and fluvial geomorphology into the conscience of urban planners and those who would restructure the flow of rivers and streams. He surveyed the Colorado River after the closing of Glen Canyon Dam, traversing Grand Canyon in 1965. From this work he was the first to scientifically analyze the hydrology of Grand Canyon’s rapids [see title-page at top left]. Shown above are a photo of Leopold surveying above Unkar Rapid, which serves as a frontispiece to Vol. 7 of his manuscript Journal; pages depicting the Unkar survey data from Vol. 37 of his field notes; and a corresponding passage quoted from his Journal; all from his papers in the American Philosophical Society, Philadelphia.

The field trip is the one most important instructional element to all students of geology, whether new to the study or long established in academia or profession. And the geological field guide is a staple of conducted trips to field areas of special interest.

In 1891, the 5th International Geological Congress convened in Washington, D.C., and afterward sponsored an ambitious rail trip to the Rocky Mountains, with a branch excursion of more than 800 miles from Denver to the Grand Canyon of Arizona. This was the first internationally attended geological field trip to the Grand Canyon.

The railroad had not yet been built from the main line to the canyon, so the field trip participants debarked in Flagstaff and rode stages to the South Rim, where they were guests at the rudimentary tent hotel of John Hance at the head of Red Canyon, which they enthusiastically, if temporarily, renamed Congress Canyon.

For more see overleaf of title-sheet for Part 23
GEOLOGICAL FIELD GUIDES

Geological field guides and road logs for the Grand Canyon and vicinity, and for the Colorado River corridor between Glen Canyon Dam, Arizona, and Mexico

This part includes all publications that are intended to serve as geological field guides to routes and specific localities in the Grand Canyon and vicinity. Included among them are all geological guides to the Colorado River through the Grand Canyon.

See also:

**PART 11. LOWER COLORADO RIVER—NATURAL HISTORY** for geological guides in the lower Colorado River region.

**PART 21. GEOLOGY AND PALEONTOLOGY** for "field guides" that are primarily textual chapter treatments of the geology of specific areas, as opposed to directional guides and descriptions for use in the field.

The distinction between "geological" and "geologic" depends upon whether the science of geology is the subject (geological) or whether the data of geology (geologic) is the subject; similarly for other adjectives of this kind.
THE COCONINO SUN.

VOL. IX.  FLAGSTAFF, ARIZONA TERRITORY, SATURDAY, SEPTEMBER 26, 1891.  NO. 2

GEOLOGISTS VISIT FLAGSTAFF

The Members of the International Congress of Geologists View the Wonders of the Grand Canyon and the Cliff and Cave Dwellers

On Wednesday evening a party of thirty-six members of the International Congress of Geologists arrived in Flagstaff for the purpose of visiting the Grand Canon of the Colorado and cave and cliff dwellers. The party traveled in the Pullman Palace cars Greylock and Corinthia and were in charge of Mr. Luther L. Holden of Boston, representing Messrs. Raymond & Whitcomb, who had charge of the excursion. The party left Washington, D. C., on Wednesday September 2, and have visited Chicago, St. Paul, Yellowstone National Park, Butte, Montana, Salt Lake City, Utah, Denver, Leadville and other mining points of interest in Colorado.

The excursion numbered on leaving Washington ninety-one members, and as the trip to the Grand Canyon was not originally intended thirty-six members of the Congress only could make the trip.

The following members of the Congress made the trip to the Grand Canyon, leaving here Thursday morning, and they will be absent five days: Dr. Alfred Bergeat, Munich, Germany; Mr. Henry M. Cadell, Bo'ness, Scotland; Mr. James C. Christie, Old Catheart, Scotland; Prof. Dr. Herman Credner, Leipzig, Germany; Prof. Dr. Rudolf Credner, Greifswald, Germany; Dr. Carl Diener, Vienna, Austria; Dr. F. Frech, Halle, Germany; Mr. G. K. Gilbert, Washington, D. C.; Prof. H. Golliez, Lausanne, Switzerland; Mr. Alfred Harker, Cambridge, England; Mr. Hobson Bernard, Manchester, England; Prof. T. McKenny Hughes, Cambridge, England; Mrs. Mary Caroline Hughes, Cambridge, England; Warren Johnson, U. S. G. S.; Prof. Dr. Emanuel Kayser, Marburg, Germany; Prof. Max Lohest, Liege, Belgium; Mr. Emm. de Margerie, Paris, France; Fred. K. Mixer, Denver, Col; Herr Felix Plieninger, Munich, Germany; Major Powell, U. S. G. S.; Herr Julius Romberg, Berlin, Germany; Dr. August Rothpletz, Munich, Germany; Dr. Xavier Stainier, Brussels, Belgium; Prof. August Streng, Strassburg, Germany; Dr. Emil Tietze, Vienna, Austria; Dr. Arnold Ulrich, Strassburg, Germany; Dr. G. Von den Borne, Halle, Germany; M. E. Van den Broeck, Brussels, Belgium; Prof. Dr. Johannes Walther, Jena, Germany; Dr. Bruno Weigand, Strassburg, Germany; Prof. George H. Williams, Baltimore, Maryland; Dr. Baron Sidney von Woermann, Livonia, Russia; Dr. E. A. Wulfing, Tubingen, Germany; Prof. Dr. von F. Zittel, Munich, Germany.

Major Powell, of the U. S. Geological Survey, and Major D. M. Riordan, of the Arizona Lumber and Timber Co., of this place, took charge of the party here and conducted them to the Grand Canyon. On their return they will visit the cave and cliff dwellers.

The party embraces many scientists of world wide reputation and is the most notable body of scientific men who have ever visited the United States. Among the men who stand highest in their profession are Prof. Dr. Herman Credner, of the University of Leipsig, Germany; Prof. Dr. Rudolf Credner, of the University of Griefswald, Germany; Prof. H. Golliz, Lausanne, Switzerland; Prof. T. McKenny Hughes, of Cambridge University, England; Prof. Hughes is accompanied by his wife. Prof. Emanuel Kayser, of Marburg, Germany; Prof. Max Lohest, of Liege, Belgium; Prof. August Streng, Strassburg, Germany; Dr. Emil Tietz [sic], Vienna, Austria; Prof. Dr. Johannes Walther, Jena, Germany; Prof. George H. Williams, of John[s] Hopkins University, Baltimore; Major Powell, Warren Johnson and G. K. Gilbert, of the United States Geological Survey.

The fifth meeting of the International Congress was held in Washington, D. C., on August last. The meetings are held every three years and the next meeting will be held in Zurich, Switzerland, in August, 1894, and, by special invitation of the Czar of Russia the seventh session of the congress will be held in St. Petersburgh [sic].

Seven of the party will go to California from this point, among them Dr. Walther, who has written several valuable works on deserts, will study the Colorado desert, and extend his trip through Southern Arizona to El Paso, Texas. He will be accompanied by Dr. Von den Borne.

The visit of this body of eminent men to this section is an interesting event in its history, and one from which it can and will profit in the near future.
Geologists Back from the Canyon.

The thirty-six members of the Fifth International Congress of Geologists, who went to the Grand Canyon on Thursday morning, returned last night, being just seven days in making the trip. Notwithstanding the unfavorable weather in that region at this time of the year, the party were highly pleased with the result of their labor. They left this morning for a trip to the Cliff Dwellers, accompanied by a number of Flagstaff citizens. Among those from Flagstaff who went with the geologists to the Canyon were: Dr. Brannen, Niles Cameron, Ed. Gale, R. A. Ferguson, Wm. Moats, A. C. Morse, D. M. Riordan, and Dr. and Mrs. Powers, of Los Angeles, Cal.

The party will leave this afternoon for Washington, on their private cars, in charge of Luther L. Holden, of Boston, representing Raymond & Whitcomb.

References to the “Cliff Dwellers” in these articles pertain to the archaeological ruins in Walnut Canyon, near Flagstaff; today’s Walnut Canyon National Monument.

“A remarkable peculiarity of [the Rocky Mountain] excursion was the fact that it was made at the expense of the visitors, the hosts charging each of them $265.”

[The Colorado River trips through Grand Canyon associated with the 28th International Geological Congress (Washington, 1989) cost its participants over $1,000 each, excluding travel costs to their meeting point in Las Vegas, Nevada.]

Geologic mapping in the Grand Canyon transformed itself during the latter part of the 20th century, not only in style but in purpose. No longer just the precise plotting of the kinds of rock outcrops and geologic structures, multidisciplinary techniques and objectives engage to describe, for example, the placement of sedimentary features and the effects of hydrologic regimes on those features and human occupational sites there. At upper left is a geologic map near the Palisades Creek area on the Colorado River in Grand Canyon; and at center right is a digital elevation model of part of this area. The area holds significant interest for studies of natural gullying and associated impacts on archaeological sites.

Effects of the flows of the river from Glen Canyon Dam have impacted the geological and biological character of the river corridor; studies of man-made flooding have been implemented to establish the means by which to restore some of the natural pre-dam conditions of the riverine environment (upper right). This reflects the changed mission of the U.S. Geological Survey, too, which now also studies the biological characters of the geological landscapes. For example, numerous Survey studies focus on the critical habitat of the endangered humpback chub (left, sources on which will be found, topically, in Part 19 of this bibliography). Throughout, geological maps convey details of observations and effects.

See also overleaf of title-sheet for this Part
Separately published geologic, geodetic, and special topographic maps of the Grand Canyon region, and summary studies relating to geologic mapping

This list includes only separately published maps, and atlas sheets. For a more comprehensive index to all published geologic maps, to 1992, that includes those that were published as figures within publications, see in:

For geologic maps in the lower Colorado River corridor, see in **PART 11. LOWER COLORADO RIVER—NATURAL HISTORY.**

The distinction between "geological" and "geologic" depends upon whether the science of geology is the subject (geological) or whether the data of geology (geologic) is the subject; similarly for other adjectives of this kind.
“Geological Map of the Western Part of the Plateau Province”

The first comprehensive geologic map of the “Great Stairway” region of Utah and Arizona, embracing the Grand Canyon and the San Francisco Peaks.

Zietz, I., and Kirby, J. R.

About as Unknown As It Gets (Short of Blank)

“Reduced Map of the Territory West of the Rocky Mountains By Capt. B. L. E. Bonneville U.S.A. 1837” (detail). Lithographed by J. Bien, New York.

This portion of an 1837 map by Capt. Benjamin Louis Eulalie de Bonneville, U.S. Army, one-time fur-trapper, embraces the region between the upper Gulf of California on the south and the present state of Utah on the north. While the lower Colorado River is fairly sketched, it becomes very generalized—guessed—in the reach through the canyonlands that lie in between. Perceptions such as this reflected not only the imprecise geographical understanding of the region but contributed to hearsay and legend. Note, too, the traditional, assumed proximity of the Colorado River’s course to that of the Rio Grande (flowing toward the southeast). Not until the expeditions of Sitgreaves (1851), Ives (1858), and Powell (1869) would the area start to be mapped with any kind of accuracy and precision.

See also overleaf of title-sheet for this Part
GENERAL MAPS

Separately published general and specialized maps, charts, and atlas sheets that include the Grand Canyon or the lower Colorado River region — excluding geologic and special topographic maps

There are hundreds more maps that surely could be listed here, but only those that have come to the compiler’s attention are included. The catalogues of map dealers include many maps that cover the Southwest; unfortunately, their citations are incomplete and often the illustrations are too small to read pertinent author and publisher data from the map.

Also see entries listed in Official map publications; a historical sketch, and a bibliographical handbook of current maps and mapping services in the United States, Canada, Latin America, France, Great Britain, Germany, and certain other countries, by Walter Thiele, under the direction of A. F. Kuhlman (American Library Association, Chicago, 1938, 356 pp.); and Vegetation maps of North America, compiled by A. W. Küchler and Jack McCormick (International Bibliography of Vegetation Maps, A. W. Küchler, ed., Volume 1, Anton W. Van Bekhoven, Naarden, 453 pp.).

In addition, online map services will be useful in examining separately published and atlas sheets from numerous sources; including those in the Library of Congress and various regional and private collections. As these sources continually emend their online holdings, the user will be more at advantage by conducting new searches at any time.

For Colorado River guides, see PART 10, Colorado River Guides.
Detail from “Map Drawn to illustrate the travels & from the Documents of the Abbe Domenech showing the actual situation of the Indian Tribes of North America [sic] and the road described by the author[,] P. Binetieu geographer del. 1860”. “Gravé chez Erhard/42 R. Bonaparte”. “Imp Binetieu R. Antoine Dubois 6”. Original is hand-tinted. Original map scale 25 French Leagues/cm, or ca. 170 miles/inch.

2010 26.464 Monuments of our land. [No place]: Worldwide Media. DVD.

WQED, Metropolitan Pittsburgh Educational TV

ZDF

Zielke, Oz, and Kerns, Ira
1966 26.440 Discover Greyhound America. [No place]: Modern Talking Picture Service. Fred A. Niles Communications Centers, producer. 16mm film. 10:06. [Extended version of 35mm CinemaScope production for Greyhound pavillion, New York World’s Fair.]
Although the musical record for the Grand Canyon and the Colorado River has seen more contributions in the later part of the 20th century, without a doubt the greatest of Grand Canyon composers was Ferde Grofé (1892–1972). Born Ferdinand Rudolph von Grofé in New York, he was brought up in a musical family but left home at age 14. In 1916 he visited the Grand Canyon and was inspired to put his experiences to music, though he did not get to this for more than a decade. His efforts, though, became his best-known piece, the *Grand Canyon Suite* (1929–1931). Composed of five captivating movements, it was first performed under Paul Whiteman at the Studebaker Theater in Chicago on 22 November 1931. Grofé later rescored it for full orchestra, which was performed in 1934. The movements are “Sunrise”, “Painted Desert”, “On the Trail”, “Sunset” and “Cloudburst”. And it is “On the Trail”, begun with an imaginative musical bray, that is probably the most immediately recognized even today. Its melody and clippity-cloppy cadence of a mule on the trail has been borrowed for tone poems in film and television soundtracks, even for commercial venues.
Audio works (reading and musical) — audio tapes, analog recordings, and audio-only digital disks (CDs, DVDs, etc.)—relating to the Grand Canyon or the lower Colorado River, and orchestral and other musical scores

This part lists audio recordings (reading and musical) and printed musical scores. Resources available only online are not included.

“Record” is an analog sound recording, or “phonodisc”; 78 rpm (revolutions per minute) format is on 10-inch plastic disks, 45 rpm format is on 7-inch plastic disks, and 33-1/3 rpm format is on 12-inch plastic disks. For tape speeds, ips = inches per second. Except for certain items especially identified to the artist or to the composer of musical works, names of producing agencies are used in the author field. Playing times are given in minutes:seconds.

See also:

**PART 27.** AUDIO-VISUAL for audio-visual materials incorporating Grofé’s “Grand Canyon Suite” in its entirety or in selected excerpts.

**PART 29.** COMPUTER MEDIA for products designed for use specifically on computers.

The Grand Canyon has long been used as an advertising backdrop. This brochure is actually a promotion for Doan’s Kidney Pills and related patent medicinal products, thinly disguised as a directory of U.S. cities. The fashionable young tourists are a vehicle by which readers are imaginatively drawn into the couple’s places; otherwise, the canyon is not mentioned inside.

*Doan’s Directory of the U.S. with Latest Census of Large Cities 1913 [-] 1914. Foster-Milburn Co. (Buffalo, New York, 1913), cover.*
MISCELLANEOUS IMAGERY

Miscellaneous art works and photographs that are not illustrative material in works of general, historical, literary, or biographical interest, but appear by themselves with or without legend

This section includes only single, extraneous items; for example, a reproduction of a single painting, or folios containing prints only, without accompanying text other than the legend. Photographs within articles or books that are credited to specific people or sources are not listed separately in this bibliography.

See PART 2. GENERAL PUBLICATIONS for more complete and critical material on art and photography of the Grand Canyon-Colorado River region.
At last we reach a huge pile of drift wood. Our rolls of blankets, two guns, and a barometer were in the open compartment of the boat, and, when it went over, these were thrown out. The guns and barometer are lost, but I succeeded in catching one of the rolls of blankets, as it drifted by, when we were swimming to shore; the other two are lost, and sometimes hereafter we may sleep cold.

A huge fire is built on the bank, our clothing is spread to dry, and then from the drift logs we select one from which we think oars can be made, and the remainder of the day is spent in sawing them out.

An illustration from the second Powell expedition down the Green and Colorado Rivers. (We know it portrays the second expedition because of the camera present [right].) Powell’s memoir, however, was written as though it was from the first expedition, in 1869; and it has never been satisfactorily explained why he so ignored the travels, and members, of the second river trip of 1871 and 1872.)

What even greater views might we imagine today from the second expedition, had convenient photographic methods been available in 1872 rather than the cumbersome, balky, and technical methods of wet-plate photography. Although the legend for this illustration captures the scene of a major geographical feature along the Green River in Utah, the artist portrays in secondary detail the repairing of boats and camp activities.

[cited=GCNHA Monograph 8: page 12-13]
An extract directly from the ASCII-format digital version of the 2nd edition of *Bibliography of the Grand Canyon and the Lower Colorado River* (Grand Canyon Natural History Association Monograph 8, 1990). The display here mimics that of an old monochrome, green-phosphor computer monitor. A number of diskettes were produced in addition to the loose-leaf inkprint and microfiche versions, specifically targeted to libraries that then were in the midst of the brief enthusiasm for space-saving, searchable digital files. The digital version was indeed searchable, but only one part of the bibliography at a time. While the format was inherently useful, an unaesthetic on-screen layout, the loss of italicization, and minor bumps such as rough breaks and characters with diacritical marks being substituted with odd symbols — and the fading enthusiasm for such products — all contributed to a meager distribution of the disk-based product. **Inset**: One of the set of five 5¼-inch diskettes, 1990 ed.
COMPUTER and INTERACTIVE MEDIA

Computer media and digital interactive media such as for personal-pad devices that include the Grand Canyon or the lower Colorado River

This section includes items that were released only in a computer-readable format, or in both hardcopy format accompanied by computer-readable versions or additional data in computerized format. Also included are announcements and similar items regarding media that are designed for digital personal-pad products such as iPhone, iPad, iPod Touch, or Android [some products as of 2012]. Further included here are articles that may explain how certain computerized media were created. Web-based media are excluded from this bibliography due to the likelihood of individual products being inaccessible in the future. Personal (hand-held) media such as Kindle editions of books are likewise excluded because of their narrowly restrictive limitations to proprietary products and inconsistent data on provenance and availability.

For audio-visual and audio-only disks, see PART 26. AUDIO-VISUAL WORKS and PART 27. AUDIO WORKS.

OTHER GUIDES
“Bad Commentators spoil the best of books”

— Benjamin Franklin

Poor Richard, 1735. An Almanack For the Year of Christ 1735 . . .
By Richard Saunders, Philom. [pseud.]
Philadelphia: Printed and sold by B. Franklin

Books are the foundation of learning and of knowledge of the world; poor as some may be, they still open minds and imaginations. We might have been enlightened in unexpected ways had Benjamin Franklin and his contemporaries known more than the barest geography of the land then known as New Spain, known to them in scattered books. Imagine what these men might have written about the scenes in this land, which were still unknown to most of the world. (See also the note about Alexander von Humboldt elsewhere herein). Franklin was, though, at least familiar with Miguel Venegas’s “Report on California”, probably from a recently published English translation, though he writes of the original published in Madrid* (see in the present bibliography under Venegas). There were hints of a quite different land than that frequented by those whose travels were limited to the lands just on either side of the Atlantic Ocean.

* B. Franklin to John Pringle (London, 27 May 1762); original in Princeton University

In 1803 Thomas Jefferson issued detailed instructions to Meriwether Lewis prior to the transcontinental expedition into Louisiana Territory in search of a river-dominant path to the Pacific Ocean, an exploration commanded by Lewis and by William Clark in 1803–1806. Jefferson’s orders (see herein under Jefferson and other notes under Lewis) offer up to us a tantalizing prospect of what discoveries or disasters might have been had Lewis and Clark turned southward. This bibliography has various comments or surprising connections to the history of the Lewis and Clark expedition as well. Search for “Lewis and Clark”.

And here is Meriwether Lewis’s eventual dismissal of the Colorado River, in his own hand, 14 August 1805:

from this narative I was convinced that the streams of which he has spoken as running through the plains and that on which his relations lived were southern branches of the Columbia, heading with the rivers Apostles and Collorado, and that the rout he had painted out was to the Vermillion Sea or gulph of Callifornia. I therefore told him that this rout was more to the South than I wished to travel, . . .

Heading westward, Lewis and Clark’s party had just passed over the Continental Divide at Lemhi Pass in today’s Idaho, where Lewis’s informant was Cameahwait, a Shoshone chief. The river “Apostles” was the conjectural, nonexistent Rio de los Apostolos, which was believed to drain the western slope of the Rockies. Further conjecture of the time called for a single, contained mountainous source area for all of the major waterways of the West. Regardless, the Colorado does not head in this region as supposed by Lewis and by the geographical sources known to him and to Thomas Jefferson—books and maps held to be in some measure, uncritically, reliable.
Critical reviews and notices of books, articles, films, and products about the Grand Canyon or lower Colorado River

This part includes critical reviews at length in scholarly publications, as well as promotional reviews and notices in general-interest publications and cursory editorial or readers’ notices. Reviews are included in this bibliography only if they relate to publications about the Grand Canyon or lower Colorado River specifically, or must mention the canyon or the river in the review of an item whose subject is geographically broader or less obviously pertinent to this bibliography. Product reviews include those for computer software.

See PART 2, GENERAL PUBLICATIONS for reviews whose authors mention the Grand Canyon or lower Colorado River, but where the publications being reviewed have no pertinence to the coverage in this bibliography.

The Guide is the informational newspaper distributed to all visitors to Grand Canyon National Park, published by the National Park Service with the cooperation of the Grand Canyon Association, the park’s not-for-profit partner. The various editions serve a diverse profile of the visiting public; those shown here are (clockwise from upper left) in English, Spanish, Korean, Japanese, Italian, German, French, and Chinese. The Guide has been distributed under various names and mastheads and in various formats. These smaller-format, paper-saving versions are from 2009; today The Guide is also available as PDF downloads. The linguistic diversity is a reflection of the widespread, international recognition and popularity of the Grand Canyon.
Newspaper Guide

Brief guide to newspaper titles of the Grand Canyon region (and a supplemental list for Yuma, Arizona)

See the introductory section, "Newspapers", for information pertaining to the overall newspaper coverage of THE GRAND CANON.
Introduction

Newspapers are a valuable resource to the historian. Long-running papers of any town or city are important historical documents, but researchers who bask in the thrill of finding the obscure and unusual anecdote, small-town and out-of-print newspapers are a mine of information.

This list of newspapers does not imply that it is exhaustive, nor is there any guarantee that all of them have had coverage of events or people of the immediate Grand Canyon or lower Colorado River regions. But within these regions it is likely that newspapers published there have had a higher frequency of Canyon- and River-related items than the newspapers of more distant places. This list provides a sampling of newspapers of northern Arizona, southern Nevada, and southern Utah. A special supplement to the Arizona list includes newspapers of that intersection of the far Southwest, Yuma.

Arizona
Ash Fork
Camp Verde
Cottonwood
Flagstaff
Fort Whipple
Grand Canyon
Holbrook
Kingman
Page
Peach Springs
Prescott
Williams
Window Rock
Winslow
(Window Rock, Winslow, and Yuma)

Nevada
Boulder City
Goodsprings
Henderson
Lake Mead National Recreation Area
Las Vegas
North Las Vegas
Pioche
Searchlight

Utah
Beaver
Cedar
Parowan
St. George

In the citations, places of publication are included in parentheses unless the name of the town forms a part of the title. In all, 59 titles are from Arizona (with 19 more in the Yuma supplement), 25 from Nevada, and 18 from Utah.

The earliest newspaper of the Grand Canyon region appears to have been the semiweekly Arizona Gazette (Prescott), beginning in 1866, although the Arizona Daily Miner (Prescott) began at about the same time. Several other newspapers started up in the late 1860s, and a majority of papers began in
the 1870s-1890s; most, however, were short-lived. In Yuma, the earliest newspaper was apparently the weekly Arizona Free Press, beginning in 1871.

Local libraries can assist the researcher in finding the repositories of these newspapers. Many of the publications may be available on microfilm. Several comprehensive guides are available, in which the repositories are listed:

Austin, Edward

Ayer Press [firm]

Gregory, Winifred

Luttrell, Estelle

N. W. Ayer and Son [firm]

Pettingill and Co. [firm]

1899 31.146 National newspaper directory and gazetteer. Containing: A complete classified directory of the newspapers and periodicals published in the United States; showing the name; frequency of issue and day of publication; class, year established; number and size of pages; subscription price; publisher’s name and the circulation of each. With colored railroad maps of each state and territory. Boston and New York: Pettingill and Co., separately paginated parts (632, 88, 214 pp.). [See ”Part I. Gazetteer, Maps and Newspaper Directory.”: "Map of Arizona", with text; "Arizona", pp. 25-26.]

Newspapers prepared by Grand Canyon companies of the Civilian Conservation Corps during the 1930s and 1940s

The Center for Research Libraries (www.crl.edu) provides access to newspapers produced by companies of the Civilian Conservation Corps; usually they were mimeographed and the series were short-lived. Robert W. Audretsch’s history of the CCC at Grand Canyon\(^{3}\) includes a synopsis of these productions as recorded by CRL, which is drawn upon and rearranged here for these citations. The dates given are ranges for individual copies noted by CRL’s sources. The list here is in alphabetical order. Audretsch notes, “more were likely published.”

Commemorative insignia manufactured aboard the U.S.S. *Grand Canyon* (AD 28, AR 28)

brass, and brass on wood
diameter 6½ inches
weight approx. 4 pounds

U.S.S. *Grand Canyon* was the only naval vessel named for the Grand Canyon. She was built as a Shenandoah class destroyer tender (designation AD 28) and later was reclassified a repair vessel (AR 28)

commissioned 5 April 1946
decommissioned 1 September 1978
sold for scrapping June 1980

Commemorative insignia such as these were made aboard many naval vessels, given to crew members and visiting dignitaries. Most were fashioned of plaster, but U.S.S. *Grand Canyon*, a repair and manufactory vessel, had its own foundry, thus the crew had the means to cast brass insignia. As such, brass medallions are met much less frequently among these kinds of naval memorabilia. (It is not known whether the wooden plaque on which the AR 28 medallion is mounted, right, was original or added later.)

(Author’s collection)
MARGINALIA

Items not about the Grand Canyon but having a Grand Canyon venue or otherwise borrowing the name "Grand Canyon", and items utilizing the Grand Canyon in non-metaphorical senses

This part contains citations which are themselves not about the Grand Canyon but refer to the Grand Canyon as a venue—for example, meetings and conferences about subjects other than the Canyon held at Grand Canyon—or as a projected destination, without certainty that the parties involved do actually reach the Grand Canyon. While these citations do not specifically contain information about the Canyon, that they took place there, or intended to take place there, makes them peripherally a part of the history of the Canyon. Also included here are some similarly marginal references to nearby Grand Canyon locales, which are embraced within this bibliography.

Appendix 1

Notes on the Leipzig Imprints of Balduin Möllhausen’s  
Reisen in die Felsengebirge Nord-Amerikas bis zum  
Hoch-Plateau von Neu-Mexico (1860, 1861)

by Earle E. Spamer

Balduin Möllhausen’s *Reisen in die Felsengebirge Nord-Amerikas* is partly his record of the exploring expedition under the command of Lt. Joseph C. Ives, U.S. Army Corps of Topographical Engineers. The expedition was to ascertain the head of navigation of the Colorado River. Once that objective was accomplished, the expedition split into two groups; one returned down the Colorado River, the other, under Ives, travelled eastward overland to Fort Defiance, New Mexico Territory. This second party, which Möllhausen accompanied, was the first exploring expedition to reach the Grand Canyon, in 1858. Ives’ formal report was published as a Congressional document in Washington, D.C., in 1861.

Möllhausen’s *Reisen* was published under two imprints in Leipzig, both consisting of two volumes. One imprint is that of Otto Purfürst (undated), the other is that of Hermann Costenoble (1861). A. Edelmann, Leipzig, was the printer for both

---

1. This Appendix was first prepared in the 1990s in the more traditional, descriptive style of bibliography. I would have used digital reproductions of all copies examined to illustrate actual features but did not then have broad access to this technology. I prefer to retain this older style of description here as a historical element of bibliography. It serves to illustrate an earlier methodology at a time of technological shift in the art of bibliographical compilation and description.

imprints as well as the printer of the lithographs. One contemporary notice has been found, which cites: “Möllhausen, Balduin v. Reisen in das [sic] Felsengebirge Nordamerikas. 2 Thl. 8. [octavo] Leipzig 1860.” 4 Advertisements were placed by Hermann Costenoble in other publications issued by that firm; for example, this display ad, though seemingly a pre-publication notice, was placed in an 1861 publication:

Im Verlage von Hermann Costenoble in Leipzig erschienen ferner:

A summary of one volume only of the Reisen was noticed in Leipziger Repertorium der deutschen und ausländischen Literatur in late 1860, specifying, “1 Bd. Leipzig, Costenoble. 1861, XVI u. 455 S. Lex.-8. (n. 3 Thlr. 12 Ngr.)” 6

In addition to the Leipzig editions, Wagner and Camp also cite, “Howes and Sabin list another German edition, Jena, 1861 . . . .” 7 Howes does not specify different

4 Notizen. Vierteljahresschrift der Naturforschenden Gesellschaft in Zürich, Vol. 6 (1861), no. 2, p. 211.
6 (2879) Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico . . . ., in Länder- und Völkerkunde [section], Leipziger Repertorium der deutschen und ausländischen Literatur, Vol. 71 (1860), pp. 19-23. [A Harvard University Library librarian’s cataloging notation for the bound Volumes 71/72 specifies that the foremost livraisons of Vol. 71 were received(?) 30 October 1860.] It is possible that the summary was written from an advance copy of Volume 1 of the Reisen, which is 455 pp.
imprints for the Leipzig printings. The 1861 Jena imprint I have not been able to locate; however, I do accept it on the authority of Howes and of Sabin.8

This title has also been reprinted in German and in translation (but not in English) (see the listings in the present bibliography).

The Pürfürst imprint has been attributed a date of 1860. If true, it is notable because it will have preceded by about a year the official report of this expedition by its commander, Lt. Ives. It thus would also contain the first scientific description of the Grand Canyon region; Möllhausen’s geologic observations would precede those published by John Strong Newberry9 in Ives’ report, although Möllhausen does credit his information to Newberry.

I have found also a notation of the availability of a Costenoble imprint for the two volumes in 1860. An anonymously written synopsis of the Reisen cites, Leipzig, H. Costenoble, [zwei starke Bände, gr Oct. [large octavo]] 1860.10

Storm, who misread the German Fraktur font in listing one imprint as Otto “Burfurst”, indicates, “The probable date of publication is 1860.”11 Storm, and Wagner and Camp, both list undated Pürfürst printings. Farquhar12 cites the 1861 Costenoble imprint. Howes does not list different imprints, although it is clear from his two citations that he had both the undated Pürfürst imprint (for which he listed the date as “[1860?]”) and the Costenoble imprint. The Library of Congress interprets the date “[1861]” for the Pürfürst imprint; it does not catalogue the other imprint. The National

Union Catalog, Pre-1956 Imprints\textsuperscript{13} lists both imprints, including the Library of Congress data for the Pürfürst imprint. The citation of a dated 1861 Pürfürst imprint in the print version of the present bibliography (2nd ed., 1990) is mistaken. The undated printing is the only documented Pürfürst imprint; the only 1861 dated imprints are that of Costenoble (Leipzig) and, apparently, the Jena imprint cited by Howes and by Sabin. The Costenoble imprint noted anonymously in an 1860 synopsis has not been seen, thus it is unknown whether or not the title-page carried a date.

The conjectural 1860 date for the Pürfürst imprint may be based on the signed date of Möllhausen’s preface, May 1860 (see p. xii), there being sufficient time to publish the book before the end of 1860. However, at this time I have seen no evidence that indicates even which of the two imprints, Pürfürst or Costenoble, was the first to be published; this despite the fact that p. [456] of volume 1 is an advertising page for publications of Hermann Costenoble—the page is present in both the Costenoble and Pürfürst printings. Specific accession dates of this title by libraries or individuals are presently not known. I note here that only the Costenoble imprint was noticed in the “Geographische Literatur” section of Petermanns Geographische Mitteilungen\textsuperscript{14}, a definitive contemporary compendium of world geographic information and literature; but that imprint may have been the only copy received.

Karl Klüpfel’s Literarischer Wegwiser für gebildete Laien for 1859–1860 includes an advertisement (p. 94) for the Hermann Costenoble printing of Möllhausen’s Reisen; and in the 1861–1862 edition (p. 48) the two volumes are listed specifically with the imprint, “Leipzig 1860, Costenoble”; the price was “6 Thlr. 24 Ngr.”

I examined the two volumes of the Pürfürst imprint that had belonged to historical bibliographer Wright Howes. They are in the Dechert Collection of the Rare Books Collection in the Van Pelt Library, University of Pennsylvania, Philadelphia. A writer, apparently Howes, has written inside the front cover of volume 1 (square brackets are those of that writer):

\textsuperscript{13} Library of Congress; and American Library Association, Resources and Technical Services Division, Resources Committee, National Union Catalog Subcommittee (compilers), \textit{National Union Catalog; Pre-1956 Imprints} (Mansell Information/ Publishing Ltd., [London], 1975), Volume 389.

Account of the 1857-8 Ives-Newberry Exped.—and has never been tr. into English Complete with map, facsimile + 12 plates in color ordinarily seen in dated edn. of 1861. Wagner-Camp 362—says this [undated] First Edn was probably pubd in 1860.

Wagner and Camp do not suggest a date of publication for this printing. Also written inside this cover is “Ed. 1.” Another notation indicates, “Wright Howes’s cop. bought by RD (Chicago, 1952) $40.00”.

I also examined the two volumes of the Costenoble 1861 imprint held in the library of the Balch Institute for Ethnic Studies, Historical Society of Pennsylvania, in Philadelphia. A note pencilled inside this copy indicates that it had a purchase price of $600.00 in 1972.

A third set of volumes was examined in the library of the American Museum of Natural History (New York City). Interestingly, volume 1 is the Costenoble imprint, and volume 2 is the Purfürst imprint. These volumes appear to have originally been a mixed set in another institution, in Europe, because both of them include the same stamping and ink marks. On both title-pages a large “605” had been penned, then covered by a piece of paper having on it an ornamental design with a lion and shield; surrounding the overlay is a stamped inked ring. Inside both front covers is noted in pencil, “8/19/1920 collated O.K.” Other notes relating to the American Museum copies are interjected below, as needed.

Comparing the text and illustrations of the two Leipzig imprints, there is no difference between them other than the few points noted in the following pages, regarding the imprint and plate placements in the Purfürst printing that do not exactly correspond to the list of illustrations (volume 2, p. [x]; see below). The paper used in the books, and the quality of printing of the lithographs, are the same in the two printings.

The bindings of the American Museum set are different. Vol. 1 is in boards with somewhat coarsely woven cloth glued to the spine and outside corners; the front and back boards are laid over with green paper, which wraps just to the inside margins of the boards. Volume 2 has on the front board a trimmed quadrangle of buff-colored paper on which is printed the same text block as that which appears on the title-page but with an ornamental border added. On the copy seen, there is no indication that volume 1 ever had the title overlay. This binding is not handsome.

The Costenoble imprint has been seen in boards with textured royal-blue cloth; a royal coat of arms is embossed in gold on the front covers; and the spine is black cloth, ribbed, with gold stamping. That the book was dedicated by Möllhausen to the
Prussian prince Friedrich Wilhelm Ludwig, and that there is greater care and expense of binding and plate collation in the Costenoble printing, is circumstantial evidence that this imprint would have been more suitable as presentation copies. That the Pürfürst imprint is much more cheaply bound may indicate that it is a more economical printing for wider distribution. Whether or not the miscollation of plates seen in the Wright Howes copies of the Pürfürst imprint is consistent in all copies distributed has not been determined, although Wagner and Camp also note miscollated plates. The Dechert Collection copies also contain pencilled annotations on the plate-list page (vol. 2, p. [x]), apparently by Howes, which notes miscollated plates.

The mixed-imprint American Museum set seems to have been rebound, as noted. They have dark-green marbled boards on both covers; the spine is textured brown cloth with gilt stamping in Fraktur. All three exposed edges of the text block are marbled. The inside front cover of volume 1 includes an inked stamp illustrating a book and the text in Hungarian, “Pozsony DRODLEFF RUDOLF Pressburg.”, thus indicating some of the provenential data for this volume.

The following pages provide comparative information for various points relating to the volumes examined for the two Leipzig imprints.
Verzeichnik der Illustrationen.

Erster Band.

1. Eingeborene im Thale des Colorado ......................................................... Titelbild.
2. Vegetation der Kiesebene und des Colorado-Thales ............................... S. 113
3. Schornsteifelsen oder Chimney peak ...................................................... “ 175
4. Felsformation in der Nähe der Mündung von Bill Williams fork ............... “ 238
5. Die Nadelfelsen oder Needles (von Norden gesehen) ......................... “ 274
7. Alexander von Humboldt’s Brief und Kartenzeichnung in Facsimile ....... “ 431

Zweiter Band.

9. Der Diamant-Bach .................................................................................... S. 49
11. Schluchten im Hoch-Plateau und Aussicht auf das Colorado-Cañon ........ “ 100
13. Vegetation des Hoch-Plateaus .................................................................. “ 223
14. Ruinen von Pecos .................................................................................... “ 294

[N.B. Plate 10 is illustrated in the Preamble, herein.]
Notes Regarding the Plates in the Leipzig Printings

The following points indicate how the text on the plates differs from Möllhausen’s list of illustrations ("Verzeichnik der Illustrationen"; see previous page). Plates not mentioned here appear exactly as listed in the illustration list. Except where noted otherwise, the information here pertains to both Leipzig printings.

[Plate 1]
Plate includes the labels “Wallpays.”, “Mohaves.”, “Yuma.”, “Chimehwhuebes.”, and “Apache.”

University of Pennsylvania copy of Purfürst: [Plate 1] is in volume 2 facing p. [x].

Faces p. 112.

[Plate 2]

[Plate 3]

Legend on plate adds a period after “Colorado”.

[Plate 7]
This is not a separate plate but is one leaf between pages 430 and 431, printed on two sides, interrupting the pagination of the signature. The legend on the plate has no apostrophe in “Humboldts”.

Legend on plate reads, “Eingeborene des nördlichen Neu-Mexiko.” Plate includes the labels “Moquis.”, “Navahoes.”, “Zuñis.”, and “Wallpays.”

Legend on plate reads, “Der Diamant-Bach (Diamond creek).”

[Plate 10]

University of Pennsylvania copy of Purfürst, and Balch Institute copy of Costenoble: [Plate 10] faces p. 54.

Legend on plate deletes the hyphen, “Hoch Plateau”, thus.

[Plate 11]

[Plate 12]
Folds out, facing p. 144; the caption continues, “zu Möllhausen’s ‘Reisen in die Felsenengebirge Nord-Amerikas’.”

Faces p. 222.

[Plate 13]

[Plate 14]
THE FOLLOWING PAGES IN THIS DOCUMENT ARE IN “LANDSCAPE” VIEW
Ellsworth Leonardson Kolb (January 4, 1876–January 9, 1960) and his brother, Emery Clifford Kolb (February 15, 1881–December 11, 1976), rowed down the Green and Colorado Rivers from Green River, Wyoming, to Needles, California, in 1911-1912, documenting their trip on still and motion picture film. In 1913 Ellsworth continued the voyage to the delta. Ellsworth’s book about their trip, with “Photographs by the Author and his brother” (as indicated on title-page), was first issued in October, 1914, by the Macmillan Company (New York). Through 1971, Macmillan issued 27 variants, differing principally in the number and arrangement of plates, and a minor (but contextually significant) emendation to the foreword by Owen Wister. In 1989, the University of Arizona Press (Tucson) reprinted the first edition in facsimile, adding a “new preface” by Barry Goldwater. However, the new printing contained errors, including misciting and misspelling the author as “Emory L. Kolb”. The errors were corrected for later sales of the volume (see in the notes on next page). A 2007 reprinting was issued by the Grand Canyon Association. Print-on-demand products in various formats, offered by several sources beginning in the 2000s, are transient and potentially inconsistent for each printer; they are omitted from this compilation of variants although the main bibliography does list the imprints that have been located. Illustrations of Macmillan imprint variant styles are placed at the end of this Appendix.

This list has also been verified by the late David Hellyer (original proprietor of Five Quail Books, Spring Grove, Minnesota), Daniel Cassidy (Five Quail Books, Prescott, Arizona), Karen Underhill (Special Collections and Archives, Cline Library, Northern Arizona University, Flagstaff, Arizona), and Earle E. Spamer (American Philosophical Society, Philadelphia, Pennsylvania).

<td>&quot;New Edition&quot; on title-page; &quot;Published October, 1914. Twelfth Printing 1952&quot; (for example) on verso title-page [number indicates printing as specified on leaf]</td>
</tr>
<tr>
<td><strong>Paper Re</strong></td>
<td>Paperback reprint (stiff pictorial wraps, facsimile text):</td>
</tr>
<tr>
<td><strong>Variant BB</strong></td>
<td>University of Arizona Press reprinting, 1989, first state. &quot;Emory L. Kolb&quot; listed as author [see CIP data on verso title-page] and Ellsworth Kolb indicated on title-page as brother; Barry Goldwater's preface (pp. xvii-xx) misspells Emory's name as &quot;Emory&quot; and also refers to &quot;Herman&quot; [for Norman] Nevills (p. xviii). Perfect-bound; trim size 21.3 × 14 cm.</td>
</tr>
<tr>
<td><strong>Variant CC</strong></td>
<td>University of Arizona Press reprinting, 1989, second state. These are corrected copies of existing stock of Variant BB, produced ca. September, 1990. Author corrected to &quot;Ellsworth L. Kolb&quot;, brother correctly indicated as Emery Kolb on title-page, and Nevills' given name corrected to &quot;Norman&quot;. Perfect-bound; trim size 20.9 × 13.6 cm.</td>
</tr>
<tr>
<td><strong>Variant DD</strong></td>
<td>Grand Canyon Association reprinting, 2007. Facsimile reprinting of Variant A, with the exception of verso title-page, which is Grand Canyon Association's copyright and publication-data page.</td>
</tr>
<tr>
<td><strong>cm</strong></td>
<td>Size in centimeters; first number is height of book, second number is thickness of text block (i.e. all pages without covers)</td>
</tr>
<tr>
<td><strong>Plates</strong></td>
<td>Number of photographic plates used as illustrations</td>
</tr>
<tr>
<td><strong>Plate Location</strong></td>
<td>&quot;insert&quot;: plates interleaved in text; &quot;end&quot;: plates grouped at end of text</td>
</tr>
<tr>
<td><strong>War Format</strong></td>
<td>On p. xvii, &quot;Due to war format all illustrations will be inserted at the end of the text.&quot;</td>
</tr>
<tr>
<td><strong>Advertisements</strong></td>
<td>Ads for other Macmillan Co. books; three pages at end of text</td>
</tr>
<tr>
<td><strong>Top Edge Gilt</strong></td>
<td>Top edge of text block gilt</td>
</tr>
<tr>
<td><strong>Page 2 Expeditions</strong></td>
<td>Extra leaf between pp. xiv-xv, titled, &quot;Kolb brothers’ second expedition&quot;, a note about other Kolb expeditions (U.S. Geological Survey expeditions—1921 in Glen Canyon, 1923 in Grand Canyon)</td>
</tr>
<tr>
<td><strong>Gilt No.</strong></td>
<td>No. &quot;56640&quot; in gilt at lower right rear cover (also in black print on lower-right rear dust jacket); a printer’s or publisher’s identification</td>
</tr>
<tr>
<td><strong>Intro. twofold/dogged</strong></td>
<td>Fourth word of first line of Wister’s foreword: &quot;twofold&quot; in original; &quot;dogged&quot; indicates censored version that also omits reference to Santa Fe Railway</td>
</tr>
<tr>
<td><strong>Pictorial Cover</strong></td>
<td>Colored picture applied to front cover. Suffix letters refer to ink color of ornamental border stamped around the picture (Macmillan issues only): o—orange; y—yellow, which printed on dark blue cloth may produce a color more like chartreuse. (See examples at the end of this Appendix.) Illustration on University of Arizona Press and Grand Canyon Association printings is a photographic copy of the Macmillan cover.</td>
</tr>
<tr>
<td><strong>Dust Jacket</strong></td>
<td>&quot;Yes&quot; to those actually seen; the assumption is that all Macmillan variants were released with dust jackets. Earlier dust jacket flyleaves and back have no printing; later dust jackets contain blurbs on the front flyleaf and on the back. See example illustrations at the end of this Appendix.</td>

*Affixed cover illustration on Macmillan printings is the same size in all variants (ca. 11 × 16 cm) regardless of cover size.

— Information not available   NA  Not applicable
Cover and Dust-Jacket Styles for *Through the Grand Canyon from Wyoming to Mexico* (Macmillan Imprints)

**Orange ornamental border**  
smaller format (Variants A–E)  

*Examples: Variant A*

**Yellow ornamental border**  
larger format (Variants F–O, Q–W)  

*Variant G*

**No pictorial cover; front cover stamped, not gilt**  
(Variant P)  

*Variant P*

Variations in cloth colors and the colors of the ornamental border and the affixed illustration may vary due to original production specifications, aging of individual copies, and the general effects of previous owners’ care. However, only two ornamental border colors were used (as indicated in the table above), orange and yellow.

*Illustration examples on these pages from the collection of Earle Spamer.*
No pictorial cover; front cover not stamped
(Variants X–AA)

Example: Variant X
Examples of dust-jackets, showing some style variations and the kinds of condition that may be expected today. Variations in colors may be due to original production specifications, aging, and the general effects of previous owners’ care. Not all variants have been seen with dust-jackets, although the presumption is made that all Macmillan printings were distributed with dust-jackets. Thus far no detailed study of dust-jackets on variants has been undertaken.

Dust-jacket from **Variant C**
Price printed on spine.

Dust-jacket from **Variant J**
Price at bottom of front panel flap has been clipped.

Compiled by Earle E. Spamer

Nelson Horatio Darton (1865–1948) was a geologist with the U.S. Geological Survey. He was commissioned by the firm of Fred Harvey to prepare a booklet on the geology of the Grand Canyon, first published in September, 1917. Fifty printings (editions) have been documented through 1987, making this title the longest-running among continuously available Grand Canyon–Colorado River titles, 70 years.

Copyright and edition information is printed on the bottom of the last page in all variants except the 1st. In the 5th to 33rd eds. the edition number and “Revised and Enlarged Edition” also appear on the title-page, but thereafter only “Revised and Enlarged Edition” is printed there. The text content was occasionally edited, but the geology was never updated except for some minor changes. The format, place of publication, and most notably the cover were changed from time to time. This is a complete itemization of all copies seen. There are variations of illustration placement throughout the series. The illustration as the frontispiece appears in all variants, but “frontispiece” is itemized in the pagination description only when it appears as a separate item in the pagination. Reorganization of illustrations, particularly the maps, is noted, but pagination is unaffected unless indicated otherwise. Variants for which no data are listed (―) have not been seen. See Notes at end of table for details on imprints, volume sizes, and wrap styles. Wrap styles are illustrated at the end of this Appendix.

"Item no." refers to the item number as listed in THE GRAND CANYON

Imprints
1st–13th eds.  Fred Harvey, Kansas City, Missouri
14th–50th eds.  Fred Harvey, Grand Canyon, Arizona

Volume Sizes (see wrap styles for additional information)
1st–11th eds.  21 cm
12th–32nd eds.  20 cm
33rd–50th eds.  19 cm

Wrap Styles — See following page for illustrated guide to styles

Spine title (1st–32nd eds. only): “Story of the Grand Canyon”. Spine titles run reverse (bottom to top) from American convention.

Style 1 (1st–3rd eds.): Plain paper; text only; ink colors blue and silver; text block side-stapled, wraps glued; wraps larger than text block

Style 2 (4th–9th eds.): Plain paper; text only; ink colors gray and silver; text block side-stapled, wraps glued; wraps larger than text block

Style 3 (10th ed.): Plain paper; pictorial, drawing of Hermit Camp; ink colors black and tan; text block side-stapled, wraps glued; wraps larger than text block; introduction of artwork on cover 4 (retained in all subsequent eds.)

Style 4 (11th ed.): Plain paper; pictorial, drawing of Hermit Camp; ink colors black and dark tan; text block side-stapled, wraps glued; wraps larger than text block; introduction of artwork on cover 4 (retained in all subsequent eds.)

Style 5 (12th–22nd eds.): Plain paper; pictorial, drawing of two mounted riders at Colorado River; ink colors black, blue, green, and orange (sky green); text block side-stapled, wraps glued

Style 6 (23rd–31st eds.): Plain paper; pictorial, drawing of three mounted riders at Colorado River; ink colors black, red, mauve, and blue (sky blue); text block side-stapled, wraps glued

Style 7 (32nd ed.): Plain paper; pictorial, drawing of three mounted riders at Colorado River; ink colors black, orange, purple, and blue (sky blue); saddle-wired, spine title retained despite saddle wiring

Style 8 (33rd–50th eds.): Glossy stock wraps and text block; wraps with pictorial, wrap-around color photograph of South Rim view; saddle-wired, spine title omitted

Illustration examples on these pages from the collection of Earle Spamer.
Detail of Style 7 (exterior view, fully opened), showing spine title printed on a saddle-wired binding edge, unique to the 32nd edition (gray arrows point to wiring.) Previous editions were perfect-bound, with spine titles printed in the gutter between covers 1 (lower part of view) and 4 (upper part of view). Subsequent editions, also saddle-wired, omit spine titles.

Detail of binding in Styles 1–4 (example from 9th ed., interior view, fully opened) showing side-stapled text block (black arrows at top point to staples). Flyleaves are stapled to the text block; wraps are glued to the flyleaves along strips parallel to the staple zone. (In the example shown here the rear flyleaf (gray) has been pulled off from the staples but is still glued to the rear-cover wrap beneath it. Normally this view is not seen in copies where the flyleaves are intact.) Front and rear covers, with gutter between, are a single sheet, glued to the flyleaves along the staple zone (beneath the flyleaf in this view). Note also the fashion in which the wraps are larger than the text block (more noticeable at the right in this view; see red arrows—upper arrow points to front cover, lower arrow to rear cover).
Appendix 4

Variants of E. D. McKee’s Ancient Landscapes of the Grand Canyon Region (1931–1985)

Compiled by Earle E. Spamer

Edwin Dinwiddie McKee (1906–1984) was the Park Naturalist at Grand Canyon National Park from 1929 to 1939. He later was Assistant Director for Research at the Museum of Northern Arizona, chairman of the Department of Geology at the University of Arizona, and Research Geologist in the U.S. Geological Survey. In 1931, he privately published a booklet on the geology of the Grand Canyon region, which to 1985 went through 30 printings. The text content remains largely the same, but the format, illustrations, printer, and most notably the cover, were changed from time to time. There are variations in title-page content, layout, and typography throughout the series. This is a complete itemization of all copies seen. Variants for which no data are listed have not been seen. See Notes at end of table for explanations of some columns. Styles of cover illustrations are depicted at the end of this Appendix.

END OF BIBLIOGRAPHY
THE BIGGEST MIRROR

“GRAND CANYON”
AS USED IN GEOGRAPHICAL NOMENCLATURE,
ANALOGY AND METAPHOR

These compilations collate numerous usages of the term, “Grand Canyon”, as applied to other physical features on Earth and other worlds, and as used in analogy and metaphor. As like THE GRAND CANON is a comprehensive collection of publications on the Grand Canyon, this appended material is a comprehensive gathering of the neological “other” Grand Canyons—physical, imaginary and literary—like a musical canon that has a melody and repeated imitations of it. In also extracting concepts of the physical Grand Canyon for other applications, each example in these compilations is a hypernym of the real Grand Canyon.

Part 1: Naming “Grand Canyons” Around the World, On Other Worlds, and In the Imagination
Part 2: “Grand Canyon” as Analogy and Metaphor and In Neological Construct
“This name has been repeatedly infringed for purposes of advertisement. The cañon of the Yellowstone has been called ‘The Grand Cañon.’ A more flagrant piracy is the naming of the gorge of the Arkansas River in Colorado ‘The Grand Cañon of Colorado,’ and many persons who have visited it have been persuaded that they have seen the great chasm. These river valleys are certainly very pleasing and picturesque, but there is no more comparison between them and the mighty chasm of the Colorado River than there is between the Alleghenies or Trosachs and the Himalayas.”

—Clarence Edward Dutton

“One, of course, is always called upon to compare this Grand Canyon of the Yellowstone with the Grand Canyon, that of the Colorado, in Arizona . . . . When Grand Canyon without the suffix is spoken of, government literature tells us that is meant. There are numerous Grand Canyons, but they all have a suffix.”

—Edward Ambler Armstrong

Artificial Features and Attractions—Applied Nomenclature

Fictional, Imaginary, Conceptual and Hypothetical Places

Alphabetical List
INTRODUCTION: FIRST AND OTHER GRAND CANYONS

As a wonder of the world (seventh, eighth or other), the Grand Canyon of the Colorado River in Arizona has attained the status of a nomenclatural source, copied and rephrased for hundreds of other features on all seven of Earth’s continents, in the oceans, and on celestial bodies. In some fashion, formally and (far more usually) in informal fashion, these places are called “The Grand Canyon”, the “Grand Canyon of” a certain place, and variously as “the other” or another Grand Canyon of some kind. There are “littler” Grand Canyons and a “baby” one or two, and, occasionally, “grander” canyons—even a “second Grand Canyon” in two different places in the world; and at least four “real” Grand Canyons, even though Arizona’s is puzzlingly subdivided into a “real” portion and one presumably less-real portion. There are fifteen places called “the other Grand Canyon”, but Arizona’s canyon is, astonishingly, not “the original Grand Canyon”! The Grand Canyon—Arizona’s main one, that is—also receives a gracious tip of the literary hat in a retitling of Arizona’s nearby Oak Creek Canyon as “the other canyon”. More disparagingly, Arizona’s big canyon is “that other Grand Canyon” in a promotional piece about Pine Creek Gorge, enviously, “Pennsylvania’s Grand Canyon”. Nevertheless, THE Grand Canyon is the inspiration for a genre now of interplanetary reach, not to mention serving as the de facto trademark of The Grand Canyon State (Arizona of course); and it is in promotional literature further implied to be the “official” Grand Canyon.

The Grand Canyon of the Colorado River may be the literary fount of ersatz Grand Canyons, but it is not the first place to be named “Grand Canyon” (not even in Arizona, as we shall see). These nomenclatural creations comprise a unique perspective of the extenuating powers of impression that THE Grand Canyon has conveyed ever since the first “other” Grand Canyon was named (in 1870, the Grand Canyon of the Yellowstone).
The compendium that follows herein contains the names of geographical, artificial, and imaginary features named in some fashion, "Grand Canyon". Formal and informal, current and archaic, names are listed. By far most of these names are off-the-cuff descriptive terms; few are legalized by official administrative actions. These nomenclatural expressions are taken from published literature and other published sources (like postcards), but a substantial number of them are from Internet websites; all document broad literary and imaginative applications of the term. Whereas anyone may hereafter add to this list by simply including it in (for example) a published essay, letter to an editor, printed postcard, or website posting, the names listed here are those that appeared without any such encouragement, already in place for the finding, before this list was first distributed as part of THE GRAND CANON. The list represents undirected, unreined creativity, without the temptation now to invent new “Grand Canyon” terms simply for the sake of adding to the list.

With few exceptions (principally those listed in official geographical nomenclators, or in locally or official promotional literature of chambers of commerce), the listings that appear here have in no way implied themselves—or for that matter have they been inferred by me—to be “official”, “sanctioned”, widely accepted, or even known to most people. Most of these listings are only cultural and impressionistic labels. Not including Arizona’s Grand Canyon of the Colorado River, there are 56 places thus far found that are labelled, “Grand Canyon” without any possessive qualifier (like the “Grand Canyon of —” or “—’s Grand Canyon”). There are 41 places that carry the name, “Little Grand Canyon”, and that does not include more Little Grand Canyons that also have possessive qualifiers (“Little Grand Canyon of — ”, and so forth). The nomenclatural record-holder is the “Grand Canyon of the East”: 14 locales carry that nominal term, 11 in the United States, and one each in Canada, India, and the People’s Republic of China.

One may argue that the focus on other nomenclatural Grand Canyons is more sensibly left only to those that have been formally named or as which have appeared in “proper” literature—published, in the conventional sense, discussionary at least, perhaps even peer-reviewed or having passed the muster of a professional editor. But as this list demonstrates, the Grand Canyon lies within a very broad embrace of the public imagination, worldwide.

Gustavus C. Doane upon the so-called Yellowstone Expedition of 1870”, U.S. 41st Congress, 3rd Session, Senate Executive Document 51, 1871, p. 9). Nathaniel Pitt Langford’s diary of the Washburn–Doane expedition first notes “the Grand cañon” in his entry for August 26, 1870 (Diary of the Washburn Expedition to the Yellowstone and Firehole Rivers in the year 1870, privately printed, 1905, p. 16). Thomas Moran’s monumental canvas, The Grand Cañon of the Yellowstone (1871–1872), studies for which he made during the Washburn–Doane expedition, may be the original source of the “Yellowstone” suffix. Notably, Moran did not use the (Arizona) Grand Canyon’s name for his equally large canvas, “The Chasm of the Colorado” (1873). Both paintings were purchased by the U.S. Government (each for $10,000), which originally were displayed in the U.S. Capitol and later transferred to the Department of the Interior. “The Chasm of the Colorado” is in the National Gallery of Art, Washington.
It is these writers (whomever they are, however widely read or not) who have seen the Grand Canyon fashioned in some other place, or to whom, as in the separate list of metaphorical expressions herein, some aspect of physical space, cultural surrounding, or imaginative concept has conveyed the image or idea of the Grand Canyon.

Some of the names in this list are nomenclatural synonyms; for example, in the nation of Oman three separately listed nomenclatural grand canyons are An Nakhur Gorge, Wadi Nakhr, and Jebel Shams, all of which seem to be one geographical locale. Likewise, some names may be listed for a general locale with the qualifier that a precise locale was not specified, but which actually may be one of the same features already in this list. But unique usages and attributions are accorded their own lines of entry because of the variations of nomenclature; a more concise, edited list will have to resolve these issues. Still many more items in this list are the creations of writers through error or as the result of geographical ignorance. (Even THE Grand Canyon has been geographically misplaced in Colorado [most memorably on a U.S. postage stamp, all copies of which have ostensibly been destroyed], Nevada, and New Mexico.) Nevertheless, all warrant a line in the list, which documents all uses as found in published sources, tangible and digital both. Each example conveys critical information, explicit or inferred, of personal or organizational perceptions.

Citations for the sources of these names are for the greater part not incorporated in THE GRAND CANON because they do not actually discuss or mention the Grand Canyon of the Colorado River. I hold in my files at least one example of each item, which document these hundreds of nomenclatural uses. References to “Grand Canyon” in analogy or metaphor or in neological construct are listed separately herein.

An early, rudimentary version of the geographical names list herein was published as “Doin’ the Canyon Shuffle”, by “Early C. Corax” and “C.V. Abyssus”, Colorado River boating-community pseudonyms of, respectively, Earle E. Spamer and Richard D. Quartaroli. Some sources were originally taken from the U.S. Geological Survey’s Geographic Names Information System and from gazetteers published by the Defense Mapping Agency. Since 1996, the list has been been hugely expanded from other published sources, from ephemera, and most substantially from Internet websites. A somewhat more extensive list was published by me in 2006, but for visual effect and parody, the list was purposely printed impractically in exceedingly small type.

---

20 “Doin’ the Canyon Shuffle”, Boatman’s Quarterly Review, Vol. 9, no. 3 (Summer 1996), pp. 6-7. Regarding these pseudonyms, see in THE GRAND CANON the section on pseudonyms.

THE EARLIEST KNOWN USE of the term “Grand Canyon” for a geographical feature appeared in James William Abert’s 1846 “Journal . . . from Bent’s fort to St. Louis, in 1845”. Abert wrote, “At noon we reached the Grand Cañon, which is referred to by Gregg is his ‘Commerce of the Prairies,’ as a source of great annoyance to early travellers.” Gregg himself had not used the term. Abert’s observation probably refers to what today is Mills Canyon, along the Canadian River in New Mexico.

“Grand Canon. Mountains of Chiricahui, opposite Head Springs Valle de Sauz Cienega.”

This is the earliest illustration of any place called Grand Canyon, in the Chiricahua Mountains of southern Arizona. One may argue that “Grand Canon” is simply the generic description of a “grand canyon”, but the text cites several times “Grand Canon” as a specific geographical feature.

Andrew B. Gray, *Survey of a Route for the Southern Pacific R. R., on the 32nd Parallel, by A. B. Gray, for the Texas Western R. R. Company* (Wrightson and Co.’s (“Railroad Record,”) Print., Cincinnati, 1856), plate facing p. 48. [Item no. 2.3008; included in THE GRAND CANON for its coverage in the lower Colorado River region.]

In Arizona, “Grand Canyon” was used first for a place name in the Chiricahua Mountains, in the southern part of the territory; here the name also appears on the first-ever illustration of any place named Grand Canyon (above). In 1855, Andrew B. Gray used the name in his travelogue of a survey for the Texas Western Railroad.

23 Josiah Gregg, *Commerce of the Prairies* (Henry G. Langly, New York, 1844). Although Gregg did not use the term “Grand Cañon”, he did employ the word “cañon”, perhaps for the first time in American literature, to describe deep ravines of the western prairies.
across southern New Mexico Territory (see citation with illustration on previous page). Others also took up that name for this locale.

THE GRAND CANYON OF THE COLORADO RIVER was first illustrated in print in 1853—the view, however, is from a great distance, a ghostly apparition at best, but still recognizably the canyon’s North Rim (below). The canyon was known then only vaguely anyway. The illustration, by the artist Richard Kern, was made during the 1851

"View Looking West, from Camp 16".

Boxed area (shown above, enlarged and digitally enhanced) depicts the Grand Canyon’s North Rim as viewed on the horizon about 70–80 miles from the San Francisco Peaks. (Lithograph, from a drawing by Richard Kern, 1851.) It is a stylized panoramic view northward (not to the west as the caption states) near camp.

The view is from the peak marked with the "CHOP" elevation benchmark on the White Horse Hills, Ariz., topographic sheet; elevation 7862 feet. [See footnote below.]

Site identified in Andrew Wallace, “Across Arizona to the Big Colorado; the Sitgreaves Expedition of 1851”, Arizona and the West, Vol. 26 (1984), pp. 325-364 [Item no. 2.6657].

Detailed survey control data for the CHOP station mentioned in the legend for this illustration can be retrieved from the National Geodetic Survey Data Sheet database online (http://www.ngs.noaa.gov/cgi-bin/ds_desig.pl; accessed 10 November 2011), including directions to the marker from U.S. Highway 89. The marker was set in 1965 in a boulder on the top of an unnamed, timbered volcanic cone about 19½ miles north of Flagstaff, Arizona, about 9½ miles north of Humphreys Peak; precisely, 35° 28’ 52.37352” N, 111° 40’ 16.36029” W (other coordinate system data are also provided on the Data Sheet). The Data Sheet indicates, “The horizontal coordinates were established by classical geodetic methods and adjusted by the National Geodetic Survey in 1993.”
expedition led by Lorenzo Sitgreaves, U.S. Army, from the pueblo of Zuñi across New Mexico Territory to the lower Colorado River. Sitgreaves’ party was going to follow the Little Colorado River to the Colorado, but upon reaching the Grand Falls on that streamcourse (also illustrated by Kern; see in the Preamble herein) northeast of present-day Flagstaff, Arizona, they were assured by guides that the river did in fact reach the main Colorado but within the inaccessible Big Cañon. With this information, Sitgreaves changed course and followed a route south of the San Francisco Peaks and westward. It was roughly through this area that another expedition two years later, under Lt. Amiel Whipple, would locate a wagon route that would eventually be traced by the Atlantic & Pacific Railroad (subsequently acquired by the Santa Fe Railway) and in the 20th century by legendary U.S. Route 66 and its faceless replacement, Interstate 40. The Sitgreaves party struck the Colorado River in the desert below Black Canyon.

In Kern’s view from the San Francisco Peaks (previous page) the distant horizon shows the North Rim of the Grand Canyon; probably what are some of the plateau outliers are also sketched into a somewhat stylized view. Samuel Washington Woodhouse, the physician and naturalist of the expedition, in describing the scene in his diary supposed that the canyon (which they did not visit) “must really be an awful yet grand spectacle”. In 1851, he may have been the first to use the adjective in describing our “Grand” Canyon.

WHO DID NAME THE GRAND CANYON?

The earliest appellation, “Grand Canyon” 28, thus far found with reference to Arizona’s Grand Canyon of the Colorado River appeared in 1857—more than a decade before John Wesley Powell staked the claim on behalf of American culture, science and law with his first canyon voyage in 1869. Some Colorado River historians previously had located instances of the name “Grand Canyon” that predated Powell’s expedition by only a couple of years. A separate notice later pushed the date to 1859. 29 However, here I report that Lorin Blodget’s Climatology of the United States 30 mentions succinctly and unambiguously in 1857: “The Grand Cañon of the Colorado as known to trappers and hunters, though not yet visited by scientific engineers, is placed by Sitgreaves in lat. 36°.” (See reproduction below.) This, as like the anonymous 1859 note, has not hitherto been noted by Grand Canyon historians.

Sitgreaves (Report of Exploration of Zuni and Colorado Rivers, 1851) describes the gorges and cañons of the Colorado as very formidable at the 36th parallel, and in several cases below this point, and gives figures of some of them. The Grand Cañon of the Colorado as known to trappers and hunters, though not yet visited by scientific engineers, is placed by Sitgreaves in lat. 36°.

28 For a brief overview of some early uses of the term, “Grand Canyon”, with notes on definitions of the words “grand” and “canyon”, also see Earle Spamer, “The Canyon Grand By Any Other Name”, Nature Notes (Grand Canyon National Park), Vol. 13, no. 1 (Spring 1997), pp. 7-9 [Item no. 2.5919.]

29 For example, the master Colorado River historian, Otis “Dock” Marston, has long been credited for noticing the first instance of “Grand Canyon”; in this case, on the map published with Gen. William Palmer’s Report of Surveys Across the Continent (Philadelphia, 1869; see Item no. 2.4981). In 1997 I had reported an instance of “Grand Canon” that appeared anonymously in 1859 (Item no. 2.5919; and see farther below in the present text).

Earlier in his *Climatology* Blodget indicated without elaboration that “the Colorado River [forms] the Grand Cañon, in regard to which little is positively known beyond this general fact”, and he described the Colorado’s drainage basin and canyon system in just two sentences.\(^{31}\)

The Colorado of California and its great branches, the Grand and Green Rivers, traverse these gorges through their whole course to within three hundred miles of the sea. A portion of this distance below the junction of Grand and Green Rivers is so nearly impassable because of these gorges, that the explorers who have traversed almost every other district, have been repelled hitherto, leaving much of it unknown.

So the locale, though not “positively known”, was not completely unknown, either. Blodget’s note of latitude 36° for the Grand Canyon cannot be confused with any other canyoned portion of the Colorado River, thus it must be the Grand Canyon as we know it today, the same canyon reach as that first glimpsed from afar by a few members of Sitgreaves’ party (*see farther above*).

Blodget did not give a source for the name “Grand Canyon”, although more likely than not he had gotten it from elsewhere. He not only described regional climates as the book title indicates, but gave some lengthy descriptions of the physiography of the nation, including some of the canyons of the West. It is tempting thus to suppose, too, that Powell had seen a copy of Blodget’s *Climatology* while researching the characteristics of the region he was going to explore, and that there he may have grasped the name. (*See more below.*) Alas, this is speculation.

Still, as we see, the name was in circulation—and in print—more than a decade before Powell’s expeditions; even before the Ives expedition started out. Other references have been located, too, but these in every case have been works in French. In referring to “Grand Cañon du Colorado”, they borrowed from J. C. Ives’ general report and John Strong Newberry’s geological report of 1861, where the name “Big Cañon” was used—*Grand Cañon* in French. Perhaps “Grand Canyon” is originally a now-forgotten French-trappers’ name, they only having meant “the big canyon”; as descriptive as was also their name for the Grand Tetons in present-day Wyoming. Regardless, “Grand Canyon of the Colorado” was in use, in English, at least by 1857.

\(^{31}\) Lorin Blodget, *Climatology of the United States* [see previous footnote], pp. 90, 97.
Lorin Blodget used a base map of the United States for several charts, on which he plotted precipitation summaries for the seasons. At right is a detail, showing the portion that is essentially the Colorado River basin. The “Great Colorado River” is seen reaching the Gulf of California in a traditionally portrayed estuarine embayment, after passing rather diagrammatically through the canyon lands downstream from sketchy Grand River and Green Rivers. The grayer overprints depict relative amounts of seasonal precipitation.

This offers an idea of what John Wesley Powell saw, if he indeed had studied Blodget’s Climatology while preparing for his descent of the Green and Colorado Rivers in 1869.

Despite evidence that the term “Grand Cañon” (or Canyon) for the Grand Canyon of the Colorado River in Arizona was in use early, it was neither formal nor consistent; so, too, non-nominative phrases were used. One of the first general maps of the Territory of Arizona was Hartley’s Map of Arizona (1865, detail below). There the Grand Canyon is labelled simply, “Canon of the Colorado R”. Note as well that the river is labelled both “Colorado River” (on the south) and (on the north, oddly enough) “Rio Colorado”.

Detail from “Hartley’s Map of Arizona. From Official Records” [Item no. 25.50], depicting the Grand Canyon and upper portion of the lower Colorado River. It is based on surveys of the Sitgreaves (1851) and Ives (1858) expeditions. The westward trace of the Sitgreaves expedition is seen (faintly) crossing the lower part of this detail; Ives travelled eastward more or less along the same route except in the western section. The rapids and “Head of Navigation” are noted from his river surveys. The Colorado seems to run from the north along the trace of Kanab Creek; the Little Colorado River is misgiven the tributary space of the whole eastern Grand Canyon. “Rio Verde” is the Virgin River, also somewhat misaligned. “Yampas Village” marks the village of Supai, on Havasu Creek (the Grand Canyon portion of Cataract Creek), here shown as a tributary of the Little Colorado River. The “North Side Mts.” labels the Kaibab Plateau. (Library of Congress)
The name “Grand Canyon” is also indirectly associated with the Ives expedition of 1858 (which began actually in the closing days of 1857 in the Colorado River delta). In December 1858 the U.S. Senate published Joseph C. Ives’ brief preliminary report of his exploration of the lower Colorado River and adjacent country, including a portion of the Grand Canyon’s South Rim. This was “Colorado Exploring Expedition” in A. A. Humphreys’ U.S. Army “Report on Explorations and Surveys”.32 Ives did not use the term “Grand Canyon” in his reports; he used the contemporary name, “Big Cañon”. Shortly after the Senate report was published, the February 1859 issue of the *Journal of the American Geographical and Statistical Society* printed a slightly abridged version of the preliminary report (omitting only some remarks about the American Indians).33 The title for the Journal's version of the report was slightly modified, and a subtitle was added to summarize the article’s coverage (as shown in the reproduction *at right*), which includes the name “Grand Canon”; that is, Grand Cañon. The titles and an introductory paragraph were probably written by the editor of the journal, or by whomever it was submitted the copy for printing. Yet who this was is not indicated in that issue. The name “Grand Canon” here seems to have been applied without geographical distinction to the entire system of the Colorado River’s canyons in the region explored by Ives’ party, in what now are Nevada and Arizona; but, significantly, it embraces “Big Cañon” of contemporary usage.

**OVER DECADES** in the 20th century Grand Canyon–Colorado River historians had plumbed for the earliest-known use of the term “Grand Canyon”, finding bottom only a year or so prior to Powell’s first canyon river trip in 1869. Some of their references were to maps, others to manuscripts like correspondence. Why their otherwise diligent work seems to have missed these uses of “Grand Canyon” long before Powell’s expeditions is curious, or, if purposely skipped over, not explained. Neither did they address the appellation “Grand Canyon” as applied earlier to geographical features elsewhere, like the canyon of the Canadian River or the one in the Chiricahuas; another mystery. And further, no one definitively identified an individual as the source of the name “Grand Canyon”.

32 U.S. 35th Congress, 2nd Session, Senate Executive Document 1, Serial 975 (December 1858), pp. 608-619. See Item no. 2.3582.
33 *Journal of the American Geographical and Statistical Society*, Vol. 1, no. 2 (February 1859), pp. 41-45. [Item 2.3583.]
The true originator of the term “Grand Canyon” for Arizona’s chasm, in the end, may be anonymous. The name seems to have come into use independently, perhaps on more than one occasion, in casual venues, adopted thereafter sporadically, occasionally in print. Even if it is shown someday that an even earlier “Grand Canyon” was applied by a named individual to “our” canyon, there is no assurance that all subsequent applications stemmed from this one.

Notably, even the early citations here mentioned were rather matter-of-fact in their use of the name “Grand Canyon”, as though the term had indeed come from somewhere else. Many writers over the years have commented that the canyon was long before Powell known to “trappers” or “hunters” or “prospectors” even. This apparently was based on that peculiar kind of “oral tradition” that is just someone else’s writing voice. No one cited their source. We see (here) that Lorin Blodget said the same about trappers and hunters. Ironically it is he who now commands the race to gain the citeable title of “the person who named the Grand Canyon”, even though he seems to be more precisely a close runner-up, having heard it somewhere else.

Literary inertia, mostly in the repetitive realm of popular works, continues to miscredit John Wesley Powell for the name. He may have contrived the name independently, or he could have learned it from casual usage in some mix of correspondence, printed sources, and oral discussion. Or he may have purposely selected it as the most appealing among several terms known to him, including “Grand Canyon”, “Big Canyon”, or some traveler’s name that has been forgotten. We will doubtfully ever know how Powell “discovered” Grand Canyon.

Nevertheless, Powell was the first to brand and exploit the Colorado River’s Grand Canyon and name. It caught on immediately, in the enthusiastic naming of natural features in the Yellowstone in 1870, spawning a “Grand Canyon” there for which, it seems, painter Thomas Moran attached the suffix, “of the Yellowstone”. Scientifically, the canyon and its river were known to the world through the writings of geologist John Strong Newberry and army lieutenant Joseph C. Ives, and some interest thus was generated in the circles of geologists and geographers. But from the appeal of adventure and derrin-do, it is Powell whom we thank for bringing the canyon into the parlors and lecture halls of the world. And so here we are today, looking back with some astonishment at the wealth of publications on the Grand Canyon and Colorado River; and with more amazement at the cultural breadth and literary ingenuity of using the name “Grand Canyon” around the world, beneath the seas, in outer space, and in analogies and metaphors galore.34

36 “The Blue Grand Canyon” was devised in 2011 in a marketing campaign by the Monterey County Vintners to distinguish themselves from other wine regions of California (Napa and Sonoma). The name derives from diurnal atmospheric influences and ocean beauty as influencing the climatological and aesthetic appeal of the Monterey wine region.

                                        Grand Canyon of China

38 A few of the “Grand Canyons” in the People’s Republic of China are based on publications originally in English translation, whose writers specifically borrowed the name of “the Grand Canyon”. Many more instances may derive from literal translations of “great canyon” or similar terms from the Chinese rather than as a precise comparison to “the Grand Canyon”. However, all names found have been listed here rather than following a subjective analysis of original intent, which in any case is not possible considering that they are largely from informal sources.

---

39 “The Blue Grand Canyon” was devised in 2011 in a marketing campaign by the Monterey County Vintners to distinguish themselves from other wine regions of California (Napa and Sonoma). The name derives from diurnal atmospheric influences and ocean beauty as influencing the climatological and aesthetic appeal of the Monterey wine region.

Part 2

“Grand Canyon” As Analogy and Metaphor and In Neological Construct

by Earle E. Spamer

© Earle E. Spamer 2012
INTRODUCTION

As with geographical uses of “Grand Canyon”, the Grand Canyon’s overwhelming attraction to comparison is wealthily displayed in the creative traditions of analogy and metaphor. Many of these expressions are taken from published literature and from Internet websites, attended by liberal doses both of imaginative and poor writing skills; sometimes whimsy and wackiness make their ways into the list. Some even are a Grand Canyon of a stretch of the imagination! Copies of all examples are in my files.

In this compilation, the spelling “cañon” is written as “canyon”.

Analogies are precisely formulated or other direct comparisons to the Grand Canyon, actual or attempted. Similes are included here.

Metaphors may be created to convey such various concepts and contemplations as physical greatness, temporal vastness, or ponderous characteristics of physical features, emotional states, or abstract philosophical and intellectual perspectives. The metaphors include euphemisms and the model or design names of commercial products or commercial venues. Many metaphors are tortuous attempts at simile, or the occasional offensive comment; but a few of the offensive ones are so sophomorically egregious that they are omitted from this collection, lacking even a liberal definition of literary merit. Also not included in the collection are references to “Grand Canyon” that borrow upon Arizona’s promotional name, “Grand Canyon State”40; for example, Grand Canyon University, Grand Canyon Council, Grand Canyon Chapter, or as associated with the names of clubs. Also omitted are declarative nomenclature such as street names or facilities (for example, Grand Canyon Avenue or The Grand Canyon Room).

Neological constructs include contrived words or phrases that embrace or are rooted in “Grand Canyon”, but which are not analogies or metaphors.

GO TO:  Analogies  Metaphors  Neological Constructs

ANALOGIES

defined

Descriptive phrases are quoted or paraphrased to accommodate alphabetization

A diminutive Grand Canyon
A face like the Grand Canyon from the air
A giant Grand Canyon like thing
A Grand Canyon of a smaller size
A Grand Canyon of death rather than a valley of death
A Grand Canyon of its own
A Grand Canyon of sorts
A Grand Canyon of them
A Grand Canyon under the sea [Sable Gully, Sable Island, Nova Scotia; submarine]
A kind of invisible Grand Canyon on the ocean floor
A kind of underwater Grand Canyon [Hudson Canyon; submarine]
A lesser Grand Canyon [Grand Canyon of the Yellowstone]
A little Grand Canyon [Oak Creek Canyon, Arizona]
A metaphorical Grand Canyon
A microscopic Grand Canyon
A miniature subterranean Grand Canyon
A really lame Grand Canyon wannabe
A shallow Grand Canyon
A shallow Grand Canyon of South Dakota [Badlands]
A small, three-dimensional model of the Grand Canyon—inverted
A two-dimensional Grand Canyon [aircraft runway]
A subterranean Grand Canyon
A truly Grand Canyon [Ithaca Chasma; on Tethys, a moon of Saturn]
Akin to calling the Grand Canyon a hole
An accident of chaos like the Grand Canyon
An underwater Grand Canyon
Appearance of the bottom suggested [this as a] process for the production of small-scale models of the Grand Cañon of Colorado [sic], inaccurate in detail, but faithful to the spirit [acid open-hearth manipulation in steel making].

Arizona [is] the country of the Grand Canyon, the wonderland of the South [sic].

As great as the Grand Canyon [impression].

As if peering into the Grand Canyon for the first time [expression of awe].

[A gunnery] barrage is like the Grand Canyon—it can’t be described better than the Grand Canyon [a woman describing her vagina].

The cockpit of the Basic-Trainer looks like the Grand Canyon full of alarm clocks.

Cleavage gaped like a Grand Canyon on the surface of some fleshy world.

Colorado River was playing the Grand Canyon like a fiddler plays a fiddle.

Conceptual Grand Canyon.

Cybernetic Grand Canyon.

Enough holes to make a copy of the Grand Canyon.

The even Grander Canyon [view from the Hualapai Skywalk].

Extravehicular activity in space like flying through the Grand Canyon as a bird.

The feeling of being a little molecule at the bottom of a galactic Grand Canyon.

Fissures appear to be the size of the Grand Canyon under the Scanning Electron Microscope.

Floating Grand Canyon. It was like a sky version of the Grand Canyon forming right in front of us [break in fog, seen aerially].

Gap between family-planning policy and fulfillment that makes the Grand Canyon look like a Texas creek.

Gigantic columns towering aloft like the awful battlements of the grand canyon of Arizona [marble structures in Washington, D.C.].

The gloomy grandeur of a great Pessimist is like the twilight of the Canyon of the Colorado.

Grand Canyon [grass cultivar of the genus Hosta, Family Liliaceae].

Grand Canyon as Buckingham Palace, representing source of unique American art, character, and culture.

Grand Canyon [Finnish style of interior design].

Grand Canyon (Death Canyon) [roller coaster (design only)].
The Grand Canyon is like a cliff
[A] grand canyon like a mini canyon
The Grand Canyon, the stereotype of what a canyon’s supposed to look like
Grand Canyon in character
Grand Canyon-like abyss
Grand Canyon-like appearance
Grand Canyon-like area
Grand Canyon-like atmosphere
Grand Canyon-like background [imagery]
Grand Canyon-like beauty
Grand Canyon-like canyon
Grand Canyon-like chasm [ideological separation]
Grand Canyon-like chasm [physical]
Grand Canyon-like cirque
Grand Canyon-like crater
Grand Canyon-like creation
Grand Canyon-like crevasse
Grand Canyon-like divide
Grand Canyon-like drop off
Grand Canyon-like effect
Grand Canyon-like environment
Grand Canyon-like environment in outer space
Grand Canyon-like equivalent [a comparison of canyons]
Grand Canyon-like expanse
Grand Canyon-like experience
Grand Canyon-like feel
Grand Canyon-like floor
Grand Canyon-like formation
Grand Canyon-like gap [ideological separation]
Grand Canyon-like gap [physical]
Grand Canyon-like gash
Grand Canyon-like generational divide
Grand Canyon-like gorge
Grand Canyon-like gulf [ideological separation]
Grand Canyon-like gulf [physical]
Grand Canyon-like hole
Grand Canyon-like landscape
Grand Canyon-like leap [of time]
Grand Canyon-like leap [conceptual, separating two events]
Grand Canyon-like leap [ideological separation]
Grand Canyon-like length
Grand Canyon-like “Lost Valley”
Grand Canyon-like margin [time]
Grand Canyon-like memory picture
Grand Canyon-like mining operation
Grand Canyon-like opening
Grand Canyon-like park
Grand Canyon-like piece of terrain
Grand Canyon-like potential landscape
Grand Canyon-like river
[A] Grand Canyon-like rock
Grand Canyon-like rock formations
Grand Canyon-like sandstone mountain landscape
Grand Canyon-like scar
Grand Canyon-like scene
Grand Canyon-like section
Grand Canyon-like site
Grand Canyon-like skin break
Grand Canyon-like span
Grand Canyon-like spread
Grand Canyon-like surprise
Grand Canyon-like surrounding
Grand Canyon-like texture
Grand Canyon-like valley
Grand Canyon-like view
Grand Canyon-like vista
Grand Canyon-like void
Grand Canyon-like wall
Grand Canyon-like window of opportunity
Grand Canyon of Art [art project]
Grand Canyon red [a natural color]
Grand Canyon ring around one's hair [as caused by a hat band]
Grand Canyon scale
Grand Canyon shape
Grand Canyon-type landscape
Grand Canyon type pectus excavatum [medical terminology, extreme eccentric canal type]
Grand Canyon views [not at Grand Canyon]
Grand Canyon with a roof over it [Carlsbad Caverns]
Grand Canyon with water [Lake Powell]
Grand Canyonee
Grand Canyoney
Grand Canyonish
Grand-Canyonized
[a] Grand Canyonly insurmountable loss
Grand Canony
Grand Ravine [World War I, map feature that "gave grave concern . . . [to those] who coupled it in their minds with the Grand Cañon of Colorado" (sic)]
GrandCanyonesque
grandcanyonesque
Grand than the Grand Canyon
grandish canyon
[A] Grand-like canyon
Grandy Canyon

His home office resembled the Grand Canyon, with a single, narrow path through the four-foot piles of books to his desk

I will beat him like a rented mule at the Grand Canyon [fishing contest] [with an internal metaphor!]
Imagine the Grand Canyon in a rain forest
Inspired by the silhouette of the Grand Canyon [style of hold for use on wooden climbing walls]
Internal Grand Canyon

[A] kind of invisible Grand Canyon on the ocean floor [Monterey Canyon, coastal California]
Land broken up with regular Grand Canyon effects
Landing a satellite on an asteroid “likened to landing a jumbo jet in a moving Grand Canyon”
Like a green Grand Canyon on a smaller scale [Pico Grande, Madeira]
Like a Grand-Canyon-y of some sort
Like a mini submarine Grand Canyon
Like a pebble resting within the great expanse of the Grand Canyon
Like a shallow Grand Canyon
Like a small Grand Canyon [numerous examples of geographic comparison and analogy]
Like an inverse Grand Canyon [Ayers Rock, Australia]
Like being in the Grand Canyon—height-wise
Like dropping a pebble into the Grand Canyon
Like hiking in an uncharted part of the Grand Canyon [emotional separation]
Like looking down into the Grand Canyon from the El Tovar balcony
Like passing through the Grand Canyon of Colorado [sic] [stock yard of a paving-brick plant]
Like swimming through a narrow Grand Canyon
Like the Grand Canyon filled with thick jungle
Like the Grand Canyon flooded
Like the Grand Canyon: it doesn’t matter if you love it or you hate it, it’s a huge landmark that you can’t pretend doesn’t exist
Like the Grand Canyon of San Diego [analogy for El Capitan Open Space Preserve]
[Like] the Grand Canyon under the earth [Skocianske Jame, cave in Slovenia]
Like the Grand Canyon underwater
Like the legendary “subterranean grand canyon” [putative UFO base]
Like walking around the Grand Canyon [construction excavation]
Look[s] like a crack in the pavement or the entrance to the Grand Canyon [perspective]

[A] miniature Grand Canyon [Verde Valley, Arizona]

New Mexico’s version of the Grand Canyon [Rio Grande Gorge]
Not unlike admiring the Grand Canyon while gazing through a straw
Noumes, New Caledonia, like a bit of Paris with the Grand Canyon for a background

Open like the Grand Canyon
Progress in health education about as rapid as erosion of the Grand Canyon

Query of Grand Canyon-size

Radio bandwidth is a national resource not unlike the Grand Canyon

[a] slightly-more-shallow Grand Canyon [Lake Havasu]
Snow drifts like driving between the walls of the Grand Canyon
Some kind of Grand Canyon but filled with water
[A] sort of Grand Canyon of Colorado [sic]
Sound like the Grand Canyon [snare drum]
[His] spiritual landscape was like the grand canon of the Colorado, with its heights and depths of God’s verities

Wintry version of the Grand Canyon
METAPHORS, euphemisms, and similes defined

Leading articles "a", "an", and "the" are retained only when they are needed for improved grammatical clarity, but are not alphabetized. Descriptive phrases are quoted or paraphrased

Abstraction grand canyon [humorous metaphor for the “abstraction gap” between application refining and its mapping; in digital-chip design and manufacturing]
[An] act of God, like the Grand Canyon
[An] actuarial Grand Canyon
The alternative Grand Canyon [Grand Canyon West, Hualapai Indian Reservation]
“Alps in Quality, Grand Canyon in Price”
America’s emotional Grand Canyon
[An] arctic Grand Canyon [cold Sabzak Pass, Afghanistan]
American “Grand Canyon” standard [noise reduction regulation for helicopters]
Arizona’s Grand Canyon, nature’s three-dimensional museum
Arrogance enough to fill the Grand Canyon
As deep as the Grand Canyon
As empty as the Grand Canyon
As one looks over the wooden parapets on Fourth Avenue down into the Grand Canyon of the Colorado at Union Square

[A] barrier raised between people as impassable as a canyon of the Colorado
Barry Goldwater as Grand Canyon
Bass [sound] that can fill up the Grand Canyon
[A] “Big Dig” [Grand Canyon analogy to the “Big Dig” highway construction project in Boston, Massachusetts]
Biological Grand Canyon of North America [Sky Islands region of Arizona]
[A] blank wall as thick as the Grand Canyon
Brooklyn's answer to the Grand Canyon [highway pothole]

Café Grand Canyon [Nazareth, Belgium]
[Grand Canyon as a/the] canyon of canyons
[Grand Canyon as a] canyon of canyons of canyons
Child actors’ heads can get bigger than the Grand Canyon
Choruses [sound] large enough to fill the Grand Canyon
Christian Grand Canyon [Creationist interpretation of Grand Canon genesis]
[As] completely isolated from a place as though the Grand Canyon lay between
Conceptual Grand Canyon [capitalized; metaphorical gap between two concepts]
[A] concrete and glass Grand Canyon of buildings
Confidence [enough] to fill up the Grand Canyon
The connoisseur’s Grand Canyon [North Rim of the Grand Canyon of the Colorado River]
Corruption [enough] to fill up the Grand Canyon
[Grand Canyon as the] cosmic vagina of our planet
Crack in her voice the size of the Grand Canyon
[Has] created a canyon of the Colorado
Credibility gap as wide as the Grand Canyon
Crimp into the plans about as big as the Grand Canyon
Crossing the Grand Canyon in two leaps [academic policy]

Delusions of grandeur big enough to fill the Grand Canyon
Difference between expectation and fulfillment is as wide as the Grand Canyon
[A] Digest of the American Grand Canyon hanging between sea and sky [Piana, Corsica]
Digital divide becoming the Grand Canyon
Ditch bigger than the Grand Canyon called sin
Dwarf Grand Canyon

Eastern version of the Grand Canyon [Delaware Water Gap, New Jersey-Pennsylvania]
Editorial and ethical Grand Canyon
Electric Grand Canyon [microelectronics]
Emotional Grand Canyon
Equatorial Grand Canyon [economics]

Fissures appear to be the size of the Grand Canyon under the Scanning Electron Microscope

[A] galactic Grand Canyon of difference
Gap between [ages] 40 and 50 is like the Grand Canyon.

[A] giant Grand Canyon
Gran Cañon Baja Bush Snapdragon [horticultural variety]
Grand Butter Pecanyon [ice cream theme flavor, Shamrock Farms dairy, Flagstaff, Arizona]

[A or the] Grand Canyon [metaphor for a large physical gap]
[A or the] Grand Canyon [metaphor for an impasse or obstacle between opposing viewpoints, or an ideological separation]
“Le Grand Canyon” [19th century men’s collar style; satirical]
Grand Canyon [amusement machine]
Grand Canyon [artificial masonry style]
Grand Canyon [beauty treatment style]
Grand Canyon [bicycle model]
Grand Canyon [boat model]
Grand Canyon [burger style]
Grand Canyon [ceramic tile model]
Grand Canyon [children’s recreational equipment model]
Grand Canyon [condominium model]
Grand Canyon [fireworks product]
Grand Canyon [home building model]
Grand Canyon [ink color]
Grand Canyon [laminated flooring style]
Grand Canyon [mattress model]
The Grand Canyon [menu item]
Grand Canyon [middle-class America]
Grand Canyon [motorcycle model]
Grand Canyon [paint color]
Grand Canyon [playground equipment]
Grand Canyon [porcelain tile style]
Grand Canyon [race identity]
Grand Canyon [recliner–rocker model]
Grand Canyon [recreational vehicle model]
Grand Canyon [roofing shingle model]
Grand Canyon [rug style]
Grand Canyon [tent model]
Grand Canyon [typographical font family]
Grand Canyon [wall mantel; electrical faux fireplace]
Grand Canyon: A gorge that separates science from ideology
Grand Canyon across eternity
Grand Canyon and aloneness

Grand Canyon of light
Grand Canyon of literature
Grand Canyon of local [small-region advertising efficiency]
Grand Canyon of longing [love]
Grand Canyon of love
Grand Canyon of lunacy
Grand Canyon of marxism
Grand Canyon of messes
Grand Canyon of metaphysics, the cleavage between Appearance and Reality

41 Ecclesiastical usages such as this have probably been mistakenly respelled from original phrases that pertained to canons, specifically “grand canons”, of Biblical writing or teaching. In this context I have also seen, in some older literature, references to “the grand canyon of —” a book or passage in the Bible. When not thus used in the metaphorical sense of “a grand canyon” of separation between philosophical views, etc., the writer should have penned “the grand canon of —”, perhaps also believing that all usages of “canon” should be pronounced and spelled “canyon”.

5142
Grand Canyon of misery
Grand Canyon of mistrust
Grand Canyon of morality
Grand Canyon of mutual disrespect and mistrust
Grand Canyon of my heart
Grand Canyon of nature places that aren't the Grand Canyon
Grand Canyon of need
Grand Canyon of needs
Grand Canyon of neglect
Grand Canyon of New Mexico [putative government "coverups" of Roswell, NM, UFO information]

ADDENDA

- Continuing — A “Foreword” in Pictures and Scraps
- Theodore Roosevelt’s Speech at Grand Canyon, 6 May 1903
- A Look Back, Around and Ahead . . .
continuing = = = A “FOREWORD” IN PICTURES AND SCRAPS

Lineups at John Hance’s inner canyon camp, Red Canyon. (Detail from scrapbook page 6 below.)
The directional sign between the fifth and sixth riders reads, "TOILET".
Also note the two figures in far background in line there (between the seventh and eighth riders).

As noted in the start of this Foreword, these photos record a train–wagon–mule trip to the Grand Canyon and down to the Colorado River on John Hance’s trail in Red Canyon. The person who assembled them is unknown, perhaps the one who signed two postcards “J.G.G.”, whose name may have been Gardner, perhaps Miss Gardner, who wrote that she accompanied her father. Which person she may be in this lineup (above) or in other views is unknown. ✷ ✷ ✷
Only the pages that contain original photographs are reproduced here
All aboard!

See next page for enlargements.
“On our way to Grand Canyon”
— J. G. G.

(TOP RIGHT) Line-up at John Hance’s inner canyon camp, Red Canyon.  
(Detail of this photo is used as a banner in this Foreword.)

(BOTTOM RIGHT) View at the foot of Bright Angel Trail.  
(Did the group also travel down this trail?)
(LOWER RIGHT) John Hance (SEATED FRONT LEFT, AND IN INSET) poses with his guests at the Hance hotel near the head of Hance Trail. See the Preamble herein for a larger view of this group picture.
END OF FOREWORD
"Leave it as it is."

Theodore Roosevelt

Grand Canyon, May 6, 1903

Excerpt from Roosevelt’s speech, in *The Coconino Sun* (Flagstaff), Vol. 20, no. 19 (May 9), pp. 1-2; transcribed by a reporter on the scene.

The complete text of the speech is on the following pages.
Mr. Governor, and you my Fellow Citizens, My Fellow Americans, Men and Women of Arizona:

I am glad to be in Arizona today. It was from Arizona that so many gallant men came into the regiment which I had the honor to command. Arizona sent men who won glory on hard-fought fields, and men to whom came a glorious and an honorable death fighting for the flag of their country, and as long as I live it will be to me an inspiration to have served with Bucky [sic] O'Neill. (Applause.) I have met so many comrades whom I prize for whom I feel only respect and admiration, and I shall not particularize among them except to say that there is no one for whom I feel more of respect than for your governor. (Applause.) I remember when I first joined the regiment that all of us were new to one another, but as soon as I saw the colonel (he was then major) I made up my mind I could tie to him. (Cries of ‘Good!’ Applause.)

It is a pleasure to be in Arizona. I have never been in it before. Arizona is one of the regions from which I expect most development through the wise action of the national congress in passing the irrigation act. (Applause.) The first and biggest experiment now in view under that act is the one that we are trying in Arizona. I look forward to the effects of irrigation partly as applied through the government, still more as applied by individuals, and especially by associations of individuals, profiting by the example of the government and possibly by help from it—I look forward to the effects of irrigation as being of greater consequence to all this region of country in the next fifty years than any other movement whatsoever. I think that irrigation counts for more toward the achieving of the permanent good results for the community.

I shall not try to greet in particular the members of my regiment now. I shall see them at half past five in my car. I have come here to see the Grand Canyon of Arizona, because in that canyon Arizona has a natural wonder, which, so far as I know, is in kind absolutely unparalleled throughout the rest of the world. (Applause.) I shall not attempt to describe it, because I cannot. I could not choose words that would convey or that could convey to any
outsider what that canyon is. I want you to ask you to do one thing in connection with it in your own interest and in the interest of the country—to keep this great wonder of nature as it now is. (Applause.) I was delighted to learn of the wisdom of the Santa Fe railroad people in deciding not to build their hotel on the brink of the canyon. I hope you will not have a building of any kind, not a summer cottage, a hotel or anything else to mar the wonderful grandeur, the sublimity, the loneliness and beauty of the canyon. Leave it as it is. Man cannot improve on it; not a bit. The ages have been at work on it and man can only mar it. What you can do is to keep it for your children and your children's children and for all who come after you, as one of the great sights which every American, if he can travel at all, should see.

Keep the Grand Canyon of Arizona as it is. We have gotten past the stage, my fellow citizens, when we are to be pardoned if we simply treat any part of our country as something to be skinned for two or three years for the use of the present generation. Whether it is the forest, the water, the scenery, whatever it is, handle it so that your children's children will get the benefit of it. Handle it that way. If irrigation, apply it under circumstances that will make it of benefit, not to the speculators to get profit out of it for two or three years, but handle it so that it will be of use to the homemaker; to the man who comes to live here and to have his children stay after him; handle it so as to be of use to him and those who come after him. Keep the forests in the same way. Preserve them for that use, but use them so that they will not be squandered; will not be wasted; so that they will be of benefit to the Arizona of 1952 as well as the Arizona of 1903.

I want to say a word of welcome to the Indians here. In my regiment I had a good many Indians. They were good enough to fight and to die, and they are good enough to have me treat them exactly as square as any white man. There are a good many problems in connection with the Indians. You have got to save them from corruption, save them from brutality, and I regret to say that at times we have to save them from the unregulated Eastern philanthropist, because in everything we have to remember that although perhaps the worst quality in which to approach any question is hardness of heart, I do not know that it does so much damage as selfishness of head. All I ask is a square deal for every man. Give him a fair chance; do not let him wrong anyone, and do not let him be wronged. Help as far as you can, without hurting in helping him, for the only way to help a man in the end is to help a man to help himself. Never forget that you have to have two sets of qualities; the qualities that we include under the names of decency, honesty, morality,
that make a man a decent husband, a good father, a good neighbor, fair and square in his dealings with all men, and in his dealings with the state: and then, furthermore, the qualities that have to be shown by every man who is to do this work in the world. Virtue is good, but the virtue that sits at home in its own parlor and talks about how bad the world is, never did anything and never will. I want to see the qualities that the men of '61 to '65 had, my comrades. You had to have a man patriotic in those days, but it did not make any difference how patriotic he was, if he did not fight he was no good. So it is with citizenship. I want to see decency and then I want to see the hardy virtues; the virtues we speak of when we describe anyone as a good man. I am glad to see you today. I wish you well with all my heart. I know that your future will justify all the hopes we have. (Cheers and applause.)
A look back, around and ahead

Riders on Hance Trail, Grand Canyon, July 1903. (Photographer unknown.)

DIGRESSIONS BY EARLE E. SPAMER

RETROSPECTION is an indulgence. An afterword offers one an opportunity to relive adventures and tribulations, and to bask in the warmth of having done something; an opportunity also to critique, apologize, or opinionate. And it frees one to imagine what comes next. Now that THE GRAND CANON is brought up-to-date, and the monographic presentation of earlier inkprint editions restored (albeit digitally), what are some things that have circulated around this work, and what may come afterward?

46 Photograph from the scrapbook featured in the Foreword. The photographer presumably was the person who had been mounted on the third animal from the left. Also note the practice of mounting the women immediately after the guide. The now amusing conical hats that some women wear had been for some time a popular style for such outings; see for example the published photograph from a decade earlier that is shown herein in the frontispiece to Part 9 of the bibliography.
Seated in my office just a half block from Independence Hall in Philadelphia, I am reminded of the nation’s bicentennial. In 1976, National Park Service workers hammered together a small wooden box and placed it on the sidewalk opposite the hall on Chestnut Street—a “Soap Box” (it said simply) on which anyone could step up and exercise the right guaranteed in the U.S. Constitution’s First Amendment—free speech and the right to petition one’s government without fear of retribution. The box did not last long—presumably the result of a litigious society’s right to be astonished that without due warning one may fall from a box on the sidewalk. A small, plain wooden platform—with a railing—replaced the soap box. Eventually, it disappeared and was forgotten.

Some 31 years later, in 2007, the Park Service laid over some of its Independence Mall green lawn with gray granite slabs, a city block removed from the old Soap Box site but still in view of the historic building where the Declaration of Independence and the Constitution were crafted. Groups may assemble in this specially demarcated First Amendment plaza to exercise their right to free speech. But, first one needs a permit from the National Park Service—a far cry from the intent of the original Soap Box. The dedication of this “people’s plaza” by the Park Service and local leaders took place on January 16, 2008, and one pre-selected individual was ceremoniously handed a permit. That day I wrote a letter to the editor of The Philadelphia Inquirer pointing out that it was ironic that a permit was required to assemble within sight and earshot of the original, impromptu, people’s plaza at the State House Square—where on July 8, 1776, Col. John Nixon of the Philadelphia Committee of Safety read publicly for the first time the nation’s declaration of independence from Great Britain. I asked the Inquirer’s editor if it was still permissible for citizens to express themselves in print without a government permit.47

---

On the very day when Col. Nixon read aloud the Declaration, 1,700 miles to the west in New Spain preparations were nearly finished in Santa Fe for the delayed departure of what is known today as the Domínguez-Escalante expedition, which set out to find a more northerly route to Monterey in California than the precarious one through the desert country. Although they eventually had to abandon the effort and return to Santa Fe in distress, Fray Francisco Antanasia Domínguez and Fray Francisco Silvestre Veléz de Escalante and their party circumambulated the Colorado Plateau. They failed on the return arc to ford the Colorado River at today’s Lees Ferry but were successful at a site farther north, the “Crossing of the Fathers”, now drowned in Lake Powell behind Glen Canyon Dam (see next pages).

Just two weeks earlier, in June, Fray Francisco Tomás Garcés, on his own trip from the lower Colorado River region, had in the company of Mohave guides visited the Hualapai and Havasupai people in the Grand Canyon. He was the first outsider known to encounter these people. Garcés also seems to have been the first outsider to visit the Grand Canyon since 1540, when about thirteen men under García López de Cárdenas, a detachment from the army of Francisco Vázquez de Coronado, had reached the canyon from the east with Hopi guides. Garcés saw the fire-smokes of Paiute people on the north side of the chasm, and he is the first European known to have given the canyon a name—Puerto de Bucareli, a patronage name. After Garcés there is no certain record of visits by outsiders to the canyon and the Havasupai until 1858.

49 A notable exception may be James Ohio Pattie (1804–?), a well-known trapper in the Rocky Mountains who ranged far into the Southwest as well. His sole Journal, reprinted numerous times,
notes a passage of having passed in 1826 through “horrid mountains” that many historians have interpreted to be the North Rim of Grand Canyon; others interpret a southerly traverse. Regardless, the notice is no more than a simple mention, and there is no further record of that geographical passage. One should remember, too, that if the interpretations are correct, Pattie was not likely to have traversed the rim of the canyon; that would involve far more route-finding and circumventing side canyons that would be practical for a traveler enroute to another place.

“Crossing of the Colorado River near Mouth of Paria Creek. (Eastern Edge of the Grand Cañon in the Distance.) 1873.” Fathers Domínguez and Escalante approached the Colorado River along the line of cliffs to the right.

[Detail from] “El Vado de Los Padres, Colorado River. 1872.”

when a U.S. Army expedition under Lt. Joseph C. Ives crossed the northern tier of what would in a few years become Arizona Territory. Where Ives’ topographers extrapolated incorrectly the position of the confluence of the Colorado and Little Colorado Rivers, Garcés understood that it was at the easternmost end of the Grand Canyon. Whereas Cárdenas’ chronicler had related almost nothing of the canyon, and Garcés very little, Ives wrote much more; so did John Strong Newberry, the geologist–physician on the expedition. The accompanying artist–writer Balduin Möllhausen and cartographer–sketchist F. W. von Egloffstein (both adventuresome German nationals) put form to the words of Ives and Newberry.

Thus began in earnest what is hugely collated here in *THE GRAND CANON*. We may have the First Amendment of the U.S. Constitution to thank mostly for such a prolific output of American-published material on the Grand Canyon and Colorado River. Certainly, though, it is due to the capitalist footing of every publisher, printer, and manufacturer represented by these publications and the materials from which they were made, not to overlook the authors’ time and effort expended in their original endeavors. Some publishers were bastions of the trade, well established and knowing their reputations; others might be amazed, or amused, that they are found or remembered at all in these pages; the same with the authors.

Were I to begin *THE GRAND CANON* today—if indeed I would not have been discouraged by the sheer volume of work and the time projected to accomplish it—there are dozens of things I would do differently. Properly thinking critics will find things at fault in the present work, evolved since the 1970s; of that I am sure. In fact, I am astonished that even I now see the first edition of this work (1981) as “mediocre”, a reflection of my limitations. This, in turn, makes me fearful of the reception *THE GRAND CANON* will receive in perfect retrospection decades from now. Even though I probably would agree with many of those critics, the job of improving things will have to be someone else’s, if indeed anyone’s.

I have not yet reached the breaking point in bibliographical work as like the prodigious Elliott Coues, but I must wonder how *THE GRAND CANON* will continue. It is “finished” insofar as this present format is concerned; from here on it seems that it will continue to simply add and emend. But it is also about the eighth revision that I
have prepared of this whole work, if one counts drafts and cut-and-paste temporary compendia. And of course I continue to emend the Internet Edition online, as I have continuously since 2000, which incidentally was based on one of those complete revisions I just mentioned.

Time will tell whether my arguments for the modern-day necessity of bibliographies are correct.\(^{50}\) I wonder, too, what technological inventions will come that will made the bibliographer’s craft a matter of intelligent automation; when people of that time will marvel at the sheer amount of time that had once been used in the process. But who, then, will have a command of the subject without being themselves immersed in it? What needs of that day will be met by a product less humanly crafted is hard for us to imagine. Because these questions foretell nothing, I will proceed with the task as I always have, because today it is a useful one. Even in the future, the present work will always remain a documentary of the writings, artistry and businesses of thousands, over centuries. It will be available to whomever has the need for that information. I cannot know who those people will be, nor the nature of their work.

When I began this work the Internet as we now know it, and the World Wide Web that constellates it, were still a decade or more in the future; personal computers, such as they were, were principally the contraptions of hobbyists; paper, typewriters and pens were the instruments of record. I began by writing citations on index cards—bought at a stationery store (corporate-behemoth kinds of office-supply stores were not yet in the picture). They were transformed into a typewritten manuscript, reaching print in 1981 (typeset, with galleys hand-checked before printing). The bibliography more than doubled in size during the decade between the first and second editions, and significantly more still in the ensuing decade before “going digital” in 2000. In the decade after that it doubled in size yet again, with the quality of citation styles greatly improved, presented here in \textit{THE GRAND CANON}. I think that it is a very good thing that the growth was progressive, not geometric; otherwise I may have, like Elliott Coues, abandoned the effort, overwhelmed. Far from just rolling ahead with citations of “newly published” works, a great many old publications—even many by the same authors already well cited—continued to come to light, a process that continues even

\(^{50}\) See herein the \textit{essay}, “’A necessary nuisance’—The Conventional Bibliography in a Digital Age”.
now. But in any case, it was the spread and reach of the Internet that dramatically change things.

A tremendous amount of material, including much that is astonishingly obscure, has been added to the bibliography due solely to the ability to research resources on the web. Furthermore, thanks to the web it is possible to cross-check information or search out missing information for a citation as a concurrent process, in real time, while working on the bibliography. Without the web, the diversity of citations would be greatly less, too. Despite my enthusiasm, I suspect that many users may be annoyed by the number of obscure, trivia-like items that do little to advance scholarly perspectives—except the user who seeks specifically the obscuriana of the publishing world, who will instead find this bibliography a boon. As I may and will often restate, one can never know what will be of specific interest to individual users, thus the drive toward comprehensiveness has eclipsed any desire to be selective. Once I become aware of an item, regardless of its practical perception as treasure or trash, I must add it to the bibliography. Each item documents some original purpose or use, regardless of a later reader’s evaluation of it. And it is the reader who is the arbiter of usefulness. They will be out-of-bounds to make any evaluation that discredits the original intent of the authors, producers, or publishers who created the works cited here. They may make evaluations only for tasks then at hand. So THE GRAND CANON, as a tool, will always remain impartially the evidentiary record of the work of individuals, organizations, institutions and government agencies.

I CAN IMAGINE continuing apace, ever fretful that some resources upon which I have relied will dwindle or disappear; human, published, and digital alike. In this scenario I would be inclined to stop, lest the work become unfaithful to the original goal of comprehensiveness. I can also imagine quitting outright, setting a cut-off date for THE GRAND CANON, allowing it to become a fixed record of past achievements, idling ever longer into years of being out-of-date. And I can imagine someone else taking over the work as Grand Canyon–Colorado River bibliographer—perhaps even (at last) expanding the work into the Upper Basin of the Colorado, a Grand, Green land of sagacious pioneers, sublime stone and storied dams. Each scenario somehow seems unlikely, although I have to admit that even the scenario of creating THE GRAND CANON in the first place might have been just as improbable 40 years ago.
Of course I tend to favor the first scenario, continuing apace. The Grand Canyon region and its Colorado River are integral parts of my life now. My own feelings and education make me a champion for preservation and conservation here, but as the impartial bibliographer I seem to be a herald also for the political, social, and economic forces that seek to alter lands and the ways of life.

More personally, I fear the subtle, fatal effects that more uranium mining may have on the natural resources of Grand Canyon, but I am eager to learn about the mines that are dug there. I astutely track the historical record of apportionment of federal lands in the region and the reservationing of the American Indians who have lived here for centuries, and I am honored to have prepared the detailed index to Steven Hirst’s story of the Havasupai people, *I Am the Grand Canyon*, a book the Havasupai people themselves use as a historical documentary of the time when their culture changed and their land-bound rights of livelihood were challenged in the marble halls of Congress far beyond their rising sun. I hold dear to the traditions of rowing the Colorado through the Grand Canyon without the buzz of outboard motors, and the quietness before the time of aircraft in and over the canyon, yet I studiously follow the economics of motor trips on the river and the wranglings about tourism overflights dawn to dusk. All these things will continue apace.

I have confessed—in print—to hypocrisy. I am both dismayed and buoyed by historical events in the control of the Colorado River; ravages and protection alike. First, I am dismayed by the environmental shambles of the hydro-, geo- and biologically deformed Colorado River corridor through Grand Canyon. This was not the result of progressive natural change, or the result of a sudden natural calamity, but the effects of the presence and operational methods of Glen Canyon Dam. The damage was done within decades, probably even more quickly. On the other hand, the invasion of exotic tamarisk (an import from the eastern hemisphere) into the riparian systems of the Southwest took place over a century, also as the result of human

---

51 Item no. 17.606.
52 Lest one think that the qualities of silence and quietude in the Grand Canyon are the result of "modern" environmentalists’ activities, consider that these perspectives have been held for more than a century, since 1911 at least when the canyon was beknighted "The Imperial City of Silence" (see Item no. 2.1506). In 1920 "the vast quiet of the Grand Cañon" was remembered in a novel (Item no. 7.409). And in 1921 an author riding the raucous New York subway drifted to recall longingly the silence of Grand Canyon (Item no. 2.13771).
53 Item no. 2.9811.
influences; in this case the natural escape of the first plantings to stabilize canal banks of the lower Colorado River. The prolific weedlike trees armor the sands and draw up water with self-preserving vengeance; they efficiently release their pink, wind-drifted seeds into the upstream breezes. In Grand Canyon National Park, welcome efforts are now underway to eradicate the tamarisk there, by employing benign beetles that voraciously favor the tamarisk, defoliating the plants and thus killing them. And yet, I cannot help but now be disturbed by the prospective sight of streambanks in Grand Canyon, not bare below the floodlines free of tamarisk as they once were, but colonnaded by ghastly miles-long ranks of delicate bushy skeletons. Some of these dead whips and wisps will be untouched because there still are no large seasonal floods like those that used to sculpt the sandbars and scour the banks. Instead, there are infrequent interventions where modern environmentalists meagerly mimic the Colorado’s seasonal floods with modest, legislatively negotiated and scheduled “controlled floods” moderated from Glen Canyon Dam’s jet tubes; and even those flows could never come again if the whims of legislation or overarching human needs preclude them.

In the early 1990s while the Glen Canyon Environmental Studies program under the U.S. Bureau of Reclamation was investigating the environmental effects of the structured outflows from Glen Canyon Dam, I joined a couple of the research trips on the Colorado River. In 1991 I prospected the river corridor and tributaries for mollusks, an aspect of the Grand Canyon fauna that had been unstudied in the canyon region in nearly a century, and was virtually not studied at all in the river corridor. The hunt found new occurrences, as expected, but wholly unexpected was the discovery of an endangered terrestrial snail, the Kanab ambersnail, living at Vasey’s Paradise in Marble Canyon. Although I was the prospector, it was not for another month or so that the identity of this snail was recognized by molluscan biologists; its full name, the “taxon”, to them is “Oxyloma haydeni kanabensis” Pilsbry, 1948”. The snail was named first in 1948 by Henry A. Pilsbry of the Academy of Natural Sciences of Philadelphia, the same institution in which I was working a couple of generations after him. The whole story of the discovery has hitherto not been told, even though THE GRAND CANON is filled with citations that lead up to, report on, and follow both Pilsbry’s work and my own. The discovery of the snail at Vasey’s Paradise, alongside the Colorado River, could have been a monkey wrench of a sort, one which could have upset the way in which Glen Canyon Dam’s powerplant was operated. But although it wasn’t a monkey wrench, really, it was surprisingly the source of quite a
lot of subsequent ecological and biological research. Rather than retell the story in another stretch of paraphrase, I append a separate, reasonably brief history farther below. It is a retrospective, written 20 years after discovering the ambersnail at Vasey’s. I had first intended for it to be a published report, then I planned to present it at a historical symposium; but other, pressing matters always preoccupied me, so rather than let my version of the story slip away, I add it here. After all, THE GRAND CANON does document all the work that led up to and has gone on since discovering the Kanab ambersnail at Vasey’s Paradise, the snail that could stand up to a dam.

I join many who would like to see Glen Canyon Dam removed, although I think that is very unlikely to happen. The water crisis of the American Southwest, if not one of the entire country west of the hundredth meridian, will ravage the next generation. The dams will be important probably in some ways we cannot now imagine.

Second, I have pride in Hoover Dam not so much for what it might do for our next generations, but partly because it represents an American spirit that I was taught as a schoolchild (even with Hoover Dam as an example). The other portion of pride’s wellspring is knowing that between 1930 and 1936 my granduncle, Earle C. Smith (1885–1965), was a Bureau of Reclamation field engineer on the Boulder Canyon Project. He was one of teams of government engineers who assured that tunnels and dimensions ran true and that the components of the dam were built to government specifications. From his own résumé: 54

54 Earle C. Smith, “Engineering Experience of Earle Covington Smith”, typescript in the possession of Earle E. Spamer; and from some information extracted from contemporary newspapers. Extract here is slightly edited for continuity and aesthetic appearance, but the words and information are Smith’s. The full résumé is reproduced on pp. II-449–II-451 in “Genealogy and Historical Notes of Spamer and Smith Families of Maryland. Part II. The Smith Family of the Eastern Shore” (Earle E. Spamer, privately distributed, 2008, 730 pp. + illustration pages interleaved); other pertinent citations are found on adjacent pages therein.

[Copies of the“Genealogy” are in the Family History Library, Salt Lake City [digital copy]; Baltimore County Genealogical Society, Towson, Maryland; and the Historical Society of Baltimore County, Cockeysville, Maryland [both with hardcopy and digital copy]. It is also available from the author. The complete work is approximately 3,500 pp. and accompanied by an extensive index. A “New Edition” (2011) on digital disk in PDF format, appends separately paginated “Additions & Corrections” [Smith Family volume, ccviii pp.], linked to by hyperlinks in the 2008 document. Note also therein the section, “Earle Covington Smith Documents and Artifacts Relating to His Engineering Career”, pp. II-479–II-481, most of which comprises the Earle Covington Smith Collection in the Boulder City Museum and Historical Association, Boulder City, Nevada (accession no. 003.031); biographical information also contributed to BCMHA. Regretfully, Earle Smith did not talk much about his work, and I was but thirteen years old when he died; most of my genealogical
Earle C. Smith (center, wearing hard hat) at Hoover Dam; date unknown. The other men are not identified.

(U.S. Bureau of Reclamation photo, annotated by Smith. From a scrapbook assembled by E. C. Smith, presently in the author’s possession.)

1930 Aug 11 - 1934 Nov 30:
U.S. Bureau of Reclamation, Boulder Canyon Project.
Assistant Engineer; railroad location and construction at Boulder City; in charge of parties on pioneer tunnels, excavation and lining of spillway tunnels, spillways and intake towers. $2600 [per annum], Grade 11 Professional.

1934 Dec 1 - 1936 Feb 26:
U.S. Bureau of Reclamation Boulder Canyon Project.
Associate Engineer; in charge of all engineering survey work connected with the construction of the spillways, spillway tunnels, intake towers and Arizona highway, involving supervision of four field parties. $2900, Grade 12 Professional.

Earle Smith, a World War I veteran, had had years of experience in mine and railroad surveys in the Rocky Mountains and civic surveys elsewhere. The “pioneer tunnels” were the four 12 × 12-foot bores, each nearly a mile long, that piloted the ways for the gigantic, 56-foot diameter diversion tunnels (then lined with three feet of concrete) through which the Colorado River was redirected while the dam was raised. Once the diversion tunnels were closed to the river and the dam finally went into operation, parts of the tunnels were used to channel water interiorly from the intake towers to penstocks and turbines, and to connect the spillways directly back to the river downstream from the dam. According to Smith’s résumé he did not work on the main part of the dam or the powerhouses, though by his involvement with the spillways and intake towers he is likely to have worked closely with the engineers and biographical work about him is from archival information and personal research.)

56 See the Frontispiece to Part 12 of this bibliography; and photos on next page.
assigned to penstock works feeding to the powerhouses and outlets. (After the Boulder Canyon Project, Smith was assigned to the Shasta Dam project in California.\textsuperscript{57})

Despite a goodly portion of family pride, I am nonetheless disappointed, too. Hoover Dam’s impounded Lake Mead flooded a little-known part of the desert Southwest, including the westernmost part of the Colorado River corridor in the Grand Canyon. There were rapids there, famous ones, that I shall never witness—Separation Rapid, Lava Cliff Rapid. It is my personal version of the more public and far-reaching anguish about the flooding of Glen Canyon, “the place that no one knew”.

I hold peculiarly dichotomous and opinionated views, looking upstream in the present with disdain and dismay, downstream to the past with pride. These are personal; but continuing apace, all of these views, pro and con, drive my search for “more stuff” about the canyon and the river and all the people who were there. The work will continue so long as the research resources hold out—and so long as the compiler holds out. It depends on access; none of it is due to original creativity, an idea distinctly at odds with the original drive represented by thousands of individually created items listed here in \textit{THE GRAND CANON}.

Looking keenly into this bibliography, there are things I would have done differently were I to start anew today—quite a few things, actually. The work, though, is too far progressed for one person to rewrap the package in finer paper, at the expense of continuing to update it. Perhaps if I were to begin anew I also would not strive for comprehensiveness; though knowing now what little gems would be omitted, somehow I doubt it. \textit{THE GRAND CANON} in hand is as good as I have been able to make it given the resources and time available to me. All the funny little eddies of history have as much a role as history’s greater currents. What is next will depend upon what inspires whom, when.\textsuperscript{58}

Would a less than infatuous approach lead me again in multidisciplinary directions? Would I have made as much of the snail-collecting fieldwork of Henry Pilsbry and James Ferriss a century before me at Grand Canyon? Would I have made hopeful suggestions to colleagues out West to prospect the malacologically virgin Colorado River corridor for mollusks?

\textsuperscript{57} His transfer papers are in the Earle Covington Smith Collection in the Boulder City Museum and Historical Association, Boulder City, Nevada.

\textsuperscript{58} And see herein the section, \textit{Ideas for Continued Work}. 
Returning to the Kanab ambersnail of Marble Canyon, the following is what did happen in one of these eddies of Grand Canyon history.

(left) Lake Mead at full pool, 20 July 1983. The crest of the Arizona spillway at Hoover Dam is seen on the opposite side of the pool. Mist can be seen rising from the water plunging into the spillway.

(U.S. Bureau of Reclamation photos)

(right) The Arizona spillway in use, 5 July 1983. An unexpectedly wet winter and early spring brought record amounts of water from the Rockies into the Colorado River basin. Lake Powell behind Glen Canyon Dam exceeded capacity and large water releases were delivered into the Lower Basin to Lake Mead. This view shows Hoover Dam’s spillway gates still in raised position, the first unplanned, natural overflow of Lake Mead.
George Vasey, Meet Henry Pilsbry: Adventures in Snail Paradise

A brief, partly bibliographical, partly biographical history of the Kanab ambersnail and company

Earle E. Spamer, 2011

Imagine my dismay when it dawned on me one day that the National Park Service at Grand Canyon National Park could arbitrarily, administratively, label Vasey’s Paradise “NO VISITATION”. And it would look like it was my fault just because (20 years ago now) I found an endangered species living there—a snail, of all things. Flummoxed park administrators might think heavy-footed tourists on the Colorado River may tread terror upon the snails and their fragile habitat. Then too, Bureau of Reclamation power brokers in their ivory dam upstream might imagine a reigned-in river, denied some of its profitable electricity-producing potential just because unregulated water pulses might drown the wee beasts. I envisioned ruffian river runners waiting for me at every campsite, and Reclamation managers looking to silence me. I imagined myself as the Salman Rushdie59 of the Colorado River, who dared violate the modern river’s status quo.

But it wasn’t my doing. Behind it was (clichés and all) a goateed, bespectacled, pipe-smoking scientist — a century ago, long before the park and the dam!

---

59 Somewhat unexpectedly, controversial author Salman Rushdie is also included in this bibliography. See Item no. 7.87.
THIS STORY of slimy detective work and monkey-wrenching begins in 1906. Henry A. Pilsbry (the one with the goatee) and friend James H. Ferriss stepped off the train from Williams, Arizona, at the Bass Station flag stop in the forest south of Grand Canyon’s rim. Pilsbry was from Philadelphia, Ferriss from Chicago, and they were malacologists—people who study mollusks. The canyon was just another stop for them in a years-long series of explorations through the Southwest. Pilsbry was the better known of the two, in his mid-40s and widely accomplished in his field. He was approaching the pinnacle of an ordinary career, little realizing that he would yet have 50 more years of work, world travel, and accolades coming to him.

Clambering down from the train Messrs. Pilsbry and Ferriss dropped to their knees. No, not from awe—the canyon was still miles away—but to rummage in the forest litter for some of the tiniest snails around, smaller than grains of rice.

They found them. Cheered with such bounty, they climbed aboard a stage for the ride to their hotel on the canyon rim miles away. Far from genteelly easing into sumptuous accommodations at El Tovar, the Santa Fe Railway’s brand new Fred Harvey–powered magnet hotel at Grand Canyon village, Pilsbry and Ferriss instead bounced into Grand Canyon’s science history, bound for rustic Bass Camp and Glen Canyon Dam.

Indeed, the very discovery of the snail that is the subject here may never have happened had Pilsbry and Ferriss stayed at Grand Canyon village, where they perhaps would have ventured into the canyon only on the Bright Angel Trail. Instead, the men spent a couple of days prospecting the vicinity of Mr. Bass’s hostelry on the Grand Scenic Divide—finding lots more land snails—before riding deep into the canyon. They
crossed the Colorado River on Bass’s wooden boat (the cable car didn’t come until
1908), climbed over the ridge to the north, and dropped into Shinumo Creek to Bass’s
sometimes mining campsite, sometimes rude dude ranch and orchard. Pilsbry and
Ferriss called it the “Thousand Mouse Camp”. During the next few days they went up
Shinumo and White Creeks, then returned across the river to Bass Camp with yet
more small bags of snails. For some scientists back in Philadelphia, Pilsbry also
gathered a few plants and bagged a few toads—which were “stupid and easily caught”,
he wrote in his sparse notes. This bountiful expedition inspired them to plan a repeat
trip, which as we shall see resulted in the discovery of a snail that stood up to a dam.

Both Pilsbry and Ferriss published, together and separately, about their work in
the Southwest; they did not work up their northern Arizona collections until 1911. The Grand Canyon trip, though, was just a part of a bigger picture, and Pilsbry and
Ferriss with colleagues drew out probably the greatest body of work on the malacology
in the Southwest ever done. Much has been done since those days by many
researchers, greatly enhancing and improving science’s overall understanding of the
subject, but nothing has met the far-reaching, far-traveling, pioneering scale as that
accomplished by Pilsbry and friends.

Three years after the Pilsbry–Ferriss trip to Mr. Bass’s camps, Ferriss repeated
the trip with colleague Lorenzo E. Daniels, a geologist from Indiana and amateur
malacologist. This time, they followed a more far-ranging itinerary. Although it seems
that they had expected Pilsbry to arrive on the North Rim sometime during their trip,
Pilsbry was busy at home.

---

60 See Pilsbry’s field notes, transcribed in an appendix to Item no. 19.1524.
61 Item no. 19.1336.
62 Ferriss wrote a letter to Pilsbry in 1910 outlining the itinerary of the trip and recounted many
observations to his friend (see Item no. 19.600). It seems Ferriss and Daniels did receive a letter
from Pilsbry during this time, and they were relieved that he had not gotten lost in trying to find
them somewhere on the Arizona Strip. As corroboration, no field notes are found for Pilsbry’s
activities in 1909; and a search of the computerized records for the Academy of Natural Sciences’
mollusk collections show that Pilsbry collected few specimens that year, mostly close to home.
Ferriss also had included an annotated topographic map that marked all of the collecting points for
mollusks he gathered on the trip, adding to it the stations at which Pilsbry and Ferriss had
collected in 1906. This important key still survives in the departmental archives of the Malacology
Department in the Academy of Natural Sciences, and which was used exhaustively in providing a
modern (1990s) update of early mollusk collections made at Grand Canyon (see in Item no. 19.1524).
Leaving the “Thousand Mouse Camp”—this time not so mousy, Ferriss reported in a letter to Pilsbry—the snail prospectors continued up Bass’s trail to the North Rim and looped through the Kaibab Plateau where they passed along and across numerous lesser canyons and gulches on the west flank of the Kaibab, visiting some of the infrequent springs there and passed through Ryan, the one-time copper prospect and smelter. They went out to the Powell Plateau, and (unexpectedly, Ferriss said) west to Mount Trumbull where collecting was a bust. Returning to the Kaibab they went along the Vermilion Cliffs to Pipe Spring, en route to Kanab, Utah, near where Ferriss also visited the watered gulches north of the town, gathering snails and tiny freshwater mussels.

When Ferriss returned home to Chicago he dutifully sent boxes of shells and jars of pickled mollusks to good friend Pilsbry in Philadelphia. The specimens would be used for identifications in their publications on the malacology of the Southwest; and in Pilsbry’s case those that were stored away would be returned to in decades to come. It was Ferriss’s opportunistic collection from north of Kanab that would eight decades later let me imagine myself as “Salman Rushdie” on the Colorado . . .

Glen Canyon Dam, Arizona

This view shows the dam during a test flow on 12 August 1984, after repairs were made to the spillway damaged during an emergency release in 1983 as the result of Lake Powell filling to capacity after record snowmelt in upstream tributaries. The four jet tubes are open as well as the spillway downstream from them.

On the edge of the Colorado River in Marble Canyon, Grand Canyon National Park, Vasey’s Paradise as seen on the day when the Kanab ambersnail was unknowingly discovered here.  
(Photo by Earle Spamer, 25 July 1991)

**Vasey’s Paradise** is a lush, green oasis nestled on a red-stained cliff, rising up in tiers for dozens of yards above the Colorado River in Marble Canyon, tucked into the easternmost edge of Grand Canyon National Park. Gorgeous cascades pop from openings dissolved in the limestone. Glistening water pours down a vertical face before splashing and sliding down ledges, pools, and chutes to the river. Occasional floods, sourced on the distant Kaibab Plateau, also send torrents through the plateau’s karst plumbing to burst into this bit of watery paradise. Here is one of the most diverse groupings of plants in the inner Grand Canyon ecosystem, a hanging garden clinging to a steeply inclined space of an acre or so. The springs’ cool, fresh water is a welcome respite from the chill, canned stuff drained into the canyon from Lake Powell. All around is desert and stone.

John Wesley Powell was the first to describe Vasey’s. It must have been a remarkable sight in 1869. The talus-lined river corridor, peppered with mesquites, bare of the invading wisps of tamarisks that smear the banks today, turns to the left and reveals, in the midst of a hall of ruddy river and magenta limestone, a diadem of
cheery silver water and green life. Powell, so delighted by the sight—as river runners have been ever since—named the place for George Vasey, a botanist friend back East who incidentally never saw it himself.  

Powell likely never saw one of the secrets of Vasey’s Paradise: the Kanab ambersnail, a small, seemingly inconsequential mollusk. Never mind the fact that the snail wouldn’t have a name until 1948. It might have been there in 1869, but we’ll never know. No one knows how long the snail has lived there, or for that matter how it got there (more on this later).

The Kanab ambersnail is listed by the U.S. Fish and Wildlife Service as an endangered species. The term is one both of eco-inspiration and administrative agitation, meaning very different things to conservationists and some landowners. On the one hand endangered species are a precious few of God’s creatures on the verge of being snuffed by humans subduing the earth; on the other they are interferences, the reason, for example, for a rancher’s loss of land use and livelihood through the bureaucratic meddling of “informed” policymakers wearing ties. The Kanab ambersnail also has the potential to monkey-wrench the plans of power brokers at Glen Canyon Dam.

We’re more emotionally responsive to the plights of endangered owls, ferrets, or tigers, because they are in the news. The prominently exposed creatures are usually cuter or sexier, too, occasionally attractively dangerous. But not all endangered creatures have friendly feathers, adoring eyes, or slick stripes and throaty growls. They can creep in tiny, fragile, overlooked packages, too. The modest Kanab ambersnail has a rotund, teardrop-shaped shell; the brownish animal inside has a

---

64 See Item no. 2.15823.
sometimes amber-colored translucence (hence its name). When fully grown, the shell still barely covers the diameter of a dime. Until 1991 this species was known to live only in two small, well-watered places a few miles north of Kanab, Utah, on privately owned ranch lands. James Ferriss in 1909 had called the place “The Greens”, but no one there today recognizes that name. Then in the summer of 1991 the Vasey’s colony was discovered, more than 60 miles away and “a flight down”, tucked just by yards within the protective, legislative boundary of Grand Canyon National Park.

Try as they might, biologists have not found another place where this specific kind of snail lives. And since 1991, the Vasey’s Paradise colony has been at the fine focus of studies by biologists from state and federal agencies. A breeding program was developed in cooperation with The Phoenix Zoo, and new colonies have been established elsewhere in Grand Canyon National Park. The more visible programs of transplantation of the endangered fish, the humpback chub, have in the mainstream literature overshadowed the programs for the Kanab ambersnail. (Fish are more familiar and usually talked about with more understanding.) The object of the Endangered Species Act is, after all, to promote the well-being of the species in such ways that they are no longer in danger of impending extinction.

Once designated “Endangered”, federal law protects an organism and its habitat. Had anyone in the Park Service decided that river runners pose a threat to the snail at Vasey’s Paradise, the locale may have been one more place marked on river guides as off-limits. Imagine the hapless private trip on the Colorado, running on a silty, storm-flushed river one summer monsoon day, approaching Vasey’s with delight and a few empty water jugs (treat your water)— except it’s marked on the river maps, “NO VISITATION”. The unwitting nemesis responsible for this hypothetical scenario is not me but Henry Pilsbry; he scientifically described the Kanab ambersnail, and so made it so. He lived nearly long enough to see Glen Canyon Dam, too.

When in 1909 Pilsbry’s friend Ferriss sent him a box full of mollusks from the latest southwestern trip, among the shells and pickled innards were a couple of dozen ambersnails from “The Greens” north of Kanab. At the time, both Pilsbry and Ferriss thought it was an already widely known species, checked it off, and moved on in their work; fooled by a shell.

By 1948 Pilsbry, now an elder statesman of malacology, was 88 years old and still showing up for work every day at the Academy of Natural Sciences, just as he had
been doing since 1885 (when he wasn’t snailing around the world). When Pilsbry took a look at the snails from Kanab again, knowing a bit more about the anatomy of the bodies of mollusks than he did in 1909, he realized that the small animals were a different species than he originally had thought. In fact, they were a sub-species entirely new to science. He named it for Kanab, where Ferriss had found it. A name is only the whim of a biologist’s momentary fit of brilliance, based on “Linnaean taxonomy”, the scheme of giving classical Latin or Greek names to living organisms that was officially started in 1753 by the Swede, Carl Linnaeus. In this case, the Kanab ambersnail’s scientific name is Oxyloma haydeni kanabensis—that’s why common names are invented—the Kanab ambersnail. And for the next 43 years, so far as anyone was concerned, that was that.

In 1991, the U.S. Fish and Wildlife Service was ready to designate this snail as Endangered. The two colonies north of Kanab were the only ones known then, living precariously on private land. A couple of thousand miles away, in Philadelphia, I was aware of the Kanab ambersnail only because it was something found during one of the early biological reconnaissances in the greater Grand Canyon region. Pilsbry’s reference specimens from Ferris’s original gathering in Kanab were in a drawer in the Academy’s Malacology Department, where he and I worked (more than 35 years apart). I never guessed that I was rushing headlong toward learning more than Pilsbry ever knew about the Kanab ambersnail.

In late July 1991, I stood at Lees Ferry with a group of students and professors from Northern Arizona University ready to leave on a 12-day research trip on the Colorado River. Our work was part of the Glen Canyon Environmental Studies program that was gathering and evaluating information toward an Environmental Impact Statement for the operation of Glen Canyon Dam. The students were conscripted labor, studying, among other things, the “biomass” that forms part of the food chain for the river’s creatures. I was a tag-along; my day job was to prospect for mollusks pretty much

---

65 Item no. 19.1331.
66 Pronounced Ahks-ee-low-ma hay-den-eye kan-ab-en-sis. (The species epithet, haydeni, had been named for another scientist, geologist Ferdinand V. Hayden, who incidentally also has named for him a canyon butte a few miles from Vasey’s Paradise, Mount Hayden.) Although in the field of biological systematics “O. h. kanabensis” is ranked as a subspecies, it is colloquially less ambiguous to refer to the organism itself as a "species".
everywhere I could reach in minutes, an “ambush” kind of biological investigation. It
was an aspect of biology that hadn’t ever been purposely studied along the Colorado
River. In fact, mollusks had not been studied in Grand Canyon anywhere for nearly a
century; not since Pilsbry and Ferriss were there.

By evening I was conscript labor, too. Sitting in the dark, we peered into flat
Petri dishes of river water set atop upended flashlights, picking out with forceps any
little, squiggly, living organism that was in there and separating out other organic
material, the biomass booty from the crew’s day work. Only once did I get the night off,
deep in the Upper Granite Gorge. On my birthday, the cook whipped up a Dutch oven
cake, and the revelry attracted some boaters from a private trip camped nearby. They
arrived out of the darkness with false Mexican accents and a bottle of tequila. Later
they went back into the darkness with their accents.

The students worked in the river and in wet tributaries, collecting water and
bottom samples, measuring physical characteristics of the channel, and recording
biochemical properties of the water. I rooted through talus and plants, darted up side
canyons, and stooped along streams and the river’s edge, finding quite a lot. But on
this my fourth river trip I still had the naïveté of an Easterner plopped down in the
bottom of the West. This wasn’t exactly the buzzing jungles of Borneo, so hazards of
hiking alone never entered my mind. We had camped for the night below the mouth of
Nankoweap Creek, which in the morning allowed me a longer time for prospecting
while the students were lectured on some geology for a change. Less than a mile up
Nankoweap I slipped on a rock, falling squarely onto my spine—a bowling ball-sized
rock with a water-worn wedge perfected to cleave my vertebrae. Stunned, my first
thought was whether I could be found; then I realized that anyone coming upcanyon
would trip over me easily enough. But nothing eventful had happened other than all
the wind knocked out of a now very sore me. To add insult to injury, the only snails I
found at Nankoweap were some very common aquatic ones that were in river pools at
the mouth of the creek—and those were first brought to my attention by a kayaker
who was working with us.

In 1991, the mollusk fauna of the Colorado River corridor in Grand Canyon was
virtually unknown. Mollusks are not a significant part of the food chain in the Grand
Canyon, so in earlier Colorado River surveys they tended to be overlooked; the focus
was more on the diversity of fishes and a few invertebrates that are a portion of the
fishes’ food sources. The fish here don’t eat a lot of mollusks. If snails were counted in
the gut contents of fish, they would have been only aquatic species and were usually just tallied under “Other Organisms”. Land snails (like the Kanab amber snail) wouldn’t be part of the diet, except a hapless few that may have dropped or rolled into the river and opportunistically eaten.

So for me, this was an expedition of exploration, much like was the expedition of Pilsbry and Ferriss 85 years earlier. Still, my survey was pretty cursory, having neither the expertise either of Pilsbry or Ferriss nor the luxury of the time they had. At daytime collecting stops on the 226 miles between Lees Ferry and Diamond Creek I rarely had more than an hour, more often only 15 minutes, although at Vasey’s I had had a luxurious hour and a half. At least it was all territory never explored even by Pilsbry and Ferriss.

When I collected mollusks from Vasey’s—it was July 25th—there was no shout of revelation. Although the information I gathered about mollusk distributions was new for Grand Canyon biology, and some new state records were gotten for Arizona, quick examination of the snails on the spot seemed to be species commonly encountered in other places. There wasn’t a lot of time to be focused on one snail or another. Only when I returned to Philadelphia would there be time for sorting and classifying. That’s where things came together.

One Saturday a few weeks later, Arthur Bogan (the brains here) and I were looking at the anatomy of the body of an enigmatic snail. Art and I had identified the snails from the trip, but we had a couple of dozen left-overs, all from Vasey’s Paradise. They just didn’t “key out”, a term biologists use when they are identifying things. The anatomy of the mollusk’s body inside the shell showed that it belonged to the genus called Oxyloma, a kind of ambersnail—and that didn’t make sense. You see, Oxyloma—the whole genus Oxyloma that is, comprising different species—wasn’t supposed to live in Arizona; but tell that to the snails. My first thought was that it had been artificially introduced there. Did it come along in the veggies of some river runners’ lunch box?

68 All the specimens I collected, empty shells and alcohol-preserved whole animals, are are in the collections at the Academy of Natural Sciences. They are accounted for in an appendix in Item no. 19.1524.
The whole family of snails to which Oxyloma belongs is hard to identify just by looking at the shells. Some professionals say it’s impossible. Variations in the shape of one species’ shell too often overlap with variations in the shells of related species. To identify these snails correctly one has to look at the body anatomy of the animal that lives in the shell, which requires a microscope and some pretty fine work with probes.\(^69\)

I had exhausted Art’s expertise (this was beyond mine) when we got as far as knowing these animals were Oxyloma. But what species? So we sent some of them to Shi-kuei Wu in Colorado, an expert in this family of mollusks, the Succineidae.\(^70\) One may not be surprised to learn that the box of snails arrived before the first-class cover letter telling Dr. Wu they were on the way. He phoned us, puzzled, because he hadn’t asked our department for any specimen loans recently. We filled him in on what they were, from where, and what had stumped us.

But being the inquisitive sort of scientist, before calling us Dr. Wu had already taken a look at the specimens anyway; he knew what they were. He told us that, yes, these were Oxyloma, but specifically they were the Kanab ambersnail, Oxyloma haydeni kanabensis. —— And oh yes, he added parenthetically, did we know that the U.S. Fish and Wildlife Service was about to place it on the Endangered Species list, based upon the colonies near Kanab, Utah?

That caught our attention! We opened the drawer containing Pilsbry’s original set of shells from Kanab. They were a dead-ringer for the shells from Vasey’s; yet the genus Oxyloma had never been found living in Arizona! We knew the problems with depending only on shells. Pilsbry had used some alcohol-preserved bodies of Kanab ambersnails, too (they were noted in his publications and they were recorded in the large, handwritten department catalogues), yet when we went into the alcoholic collections to find them we were dismayed to learn they were gone, probably dried out and discarded long ago. Although we were left with just shells that were Pilsbry’s set of original Kanab ambersnails (the ones from friend Ferriss in 1909), we also had Dr.

\(^{69}\) On the other hand, a few years later I discovered a way by which an investigator in the field may reliably determine the difference between all but the most youthful of Oxyloma and closely similar shells without sacrificing the snails, just by measuring two seemingly unrelated dimensions on the shell. Non-invasive identification is an important consideration when dealing with protected, endangered species. See Item no. 19.2223.

\(^{70}\) Pronounced suck-sin-ee’ ih-dee.
Wu’s authoritative identification of the newly collected Vasey’s snails, based on anatomy, the same anatomy first deciphered by Pilsbry in 1948.

One phone call led to more. One issue after another passed from one government environmental scientist to another. At the last minute, the colony of ambersnails at Vasey’s Paradise was added to the Fish and Wildlife Service’s decision to designate the Kanab ambersnail as Endangered\(^71\); it was, after all, the only population of this snail known to be alive in a pristine habitat.

\(*\)

**The discovery** at Vasey’s had come just in time. Legislative protection is not necessarily preemptive when a species lives on private lands. Shortly after being listed as “Endangered”, the smaller of the two Kanab ambersnail colonies north of Kanab was extirpated (snuffed out, that is); the several hundred snails left there had desiccated—parched to death—when their marshy land was drained. So the original population north of Kanab was down to one little locale. Vasey’s held the only real hope for stringing along the snail’s existence.

The Glen Canyon Environmental Studies program under the Bureau of Reclamation was collecting baseline information and formulating predictions about the effects of a large man-made flood from Glen Canyon Dam, then being planned. The flood would mimic (sort of) some of the floods that used to rush through the Grand Canyon before the dam was built. The object was to restore sand loads from the river bottom to the banks, a process of sedimentary gentrification that had effectively stopped after the dam blocked off the river’s overwhelmingly rich supply of sediment to Marble Canyon, Grand Canyon and points south. A large, controlled flood, although probably good for the overall river community, would have the potential to wipe out some of the endangered snails at Vasey’s Paradise—not quite the intention of the protective measures of the Endangered Species Act. (Never mind that the natural, pre-dam floods were much larger and must have impacted the snail every time, if it was there.)

Since 1991, lots of biologists and ecologists have gotten long mileage out of the Kanab ambersnail in Marble Canyon. Numerous study trips—some traveling by river,

---

\(^{71}\) See Item nos. 19.2415, 19.593.
others by long hikes into the canyon—went to Vasey’s Paradise to study in exhaustive detail the biology and ecology of the snail, which was almost wholly unknown. Simply put, the snail favors decaying monkey-flower stems and other vegetation in the mist-cooled environs of running water, does not generally seek seclusion, winters over in a kind of suspended animation, lives about a year and a half, is apparently not a favored food by any other animal, and sometimes is parasitized by a peculiar worm-like animal called a trematode. The size of the colony at Vasey’s is on the order of several tens of thousands of individual snails, depending upon the time of year and other conditions. For little snails, that’s not many. A flood of any magnitude would clearly wash away a significant number of them. Could this monkey-flower rasping (a kind of “licking” if you will) snail be a monkey wrench in the story of Glen Canyon Dam?

The Kanab ambersnail yielded more than just some notebook observations and agency memoranda. Two biologists based the research for their Master’s degrees on it. Numerous professional papers have been written. And logistically, research at Vasey’s provided exciting challenges. The site is filled with poison ivy, a deterrent to casual visitation; in fact, Vasey’s is just one of three places in the Grand Canyon “lucky” enough to host poison ivy. Workers entering deep into the site wear protective suits against the irritant toxins of the plant. To gain access to some parts of the site, rock climbers with technical gear played out across the sheer cliff face beneath Vasey’s bursting springs, dropping down into parts of the cliff-hugging vegetation. The site was precisely surveyed with laser instrumentation and plotted on computers; estimates were made of where flood flows would reach. In another study, individual shells had numbers placed on them; some were transplanted to higher levels just before a planned flood from the dam, and after the flood another census was taken. The collateral damage was within predictions; there were no adverse surprises.

Some snails were taken alive for breeding programs in Phoenix and at Northern Arizona University. Another nursery was set up, ironically, on the green-grass “football field” at the base of Glen Canyon Dam—almost taunting, up against the man-made monolith that threatens the snails’ riparian ribbon downstream. And at least one colony, descended from a group of snails transplanted to Upper Elves Chasm on Royal

---

72 At this point it is probably best simply to direct one to search the entire bibliography on the keywords "ambersnail" or "Oxyloma", and then to also examine pertinent citations nearby that were authored by the same individuals.
Arch Creek in the middle part of Grand Canyon, is now reproducing and thriving there.

Other studies, much more technical and far-reaching, look into the molecular bits and pieces that tell us of the genetics of the Kanab ambersnail and its taxonomic cousins. There is some evidence that these widely separated colonies are inhabited by distinctly different kinds of snails, not the same kinds. There are some other snail colonies in the Grand Canyon that are related to the species Oxyloma haydeni but which seem to be themselves genetically distinct from the others. All of which, it would seem, may make the Vasey’s population all the more special. We will see.

NOW, THE QUESTION BEGS, just how do these snails get into such widely separated, tiny locales? It’s not as if some of them miraculously led a multi-generation crawl from Kanab to Vasey’s or the other way.

The mechanisms of distributing mollusks to far-flung places on land and in fresh waters are not a complete mystery, but neither are they well understood or well documented. Some species of mollusks get caught in the feathers of aquatic birds, which fly from place to place. This is an especially reliable conveyance during migratory seasons. The tiniest of land snails can be lofted by strong winds too, but the Kanab ambersnails are too large to sail. Other kinds of mollusks, freshwater mussels, even have been known to reflexively close their valves onto the feet of birds that step on them, and they are airlifted to another body of water.

As for the Kanab ambersnail—who knows? We do not know either how it got where it lives, or how long it has lived in those places. But there it is, eking out a life at Kanab, and standing up to a dam at Vasey’s Paradise. Many published tales about mollusk dispersal are anecdotal, but today these kinds of notes are rarely given precious printing space in professional scientific journals. One malacological journal, The Nautilus, once relished such notes, peppering its pages of scholarly studies with these kinds of anecdotes and curious observations. That was during the many decades that it was edited and published by our friend, Henry Pilsbry.
It seems a very unlikely scenario, two fellows from the same museum department in Philadelphia, Pilsbry and me, generations apart, serendipitously discovering the same snail living in the Grand Canyon region. It wasn’t particularly big science, to be honest, but science doesn’t have to be Big to be interesting and useful. This little snail the size of a dime stood up to a big power dam’s managers, provided employment for researchers, and offered opportunities for volunteers, students and professors—a mighty mollusk, indeed. Because of the work by all these people and the establishment of new populations of the endangered Kanab ambersnail in locales elsewhere in the Grand Canyon, this creature now has a chance to continue its easily overlooked life as one of the Grand Canyon’s—in fact one of Earth’s—marvels of creation. All thanks to James Ferriss and Henry Pilsbry in the first place (and a tip of the hat to William Wallace Bass).

Still the unlikely scenarios do not end here. The Academy of Natural Sciences, the Kanab ambersnail, and the history of the Colorado River meet again in a quiet little eddy of history . . .
On 20 June 1955, friends Gus Scott and Robert Robertson put into the Colorado River at Hite, Utah, on a recreational exploration of Glen Canyon, known now in the Colorado River boating community as the Scott–Robertson expedition. (Robert did some botanizing on the trip, too.) The college men spent nearly a month on the river, taking out at Lees Ferry on 16 July having seen things that are drowned now beneath Lake Powell. They also visited Rainbow Bridge and made the long, inspiring climb to the top of Navajo Mountain. Gus Scott’s diary of the expedition was published in 2006.73

Leap ahead exactly 47 years: 20 June 2002. Gus, now a physician, and his wife, Sandra, paid a visit to long-time friend Robert in the Philadelphia area and came to the Academy of Natural Sciences. (The date was a coincidence.) Here Robert worked in the Department of Malacology—where I worked, too, and for 70 years Henry Pilsbry’s dominion. Oddly, despite many years bumping into Robert each day, I had for a long time no idea that he was a Colorado River “old-timer”, a participant in Glen Canyon history before Glen Canyon Dam.

And . . .

73 Item No. 2.15160.
... not wishing to pass up the opportunity for a staged photo, I posed Gus with some appropriate relics in the malacology collections ... 

Gus Scott (left) and Earle Spamer with an open drawer containing specimens of the Kanab ambersnail, in the Department of Malacology, Academy of Natural Sciences of Philadelphia, 20 June 2002.

Gus holds a container with one of James Ferriss’s 1909 gatherings from near Kanab, Utah; in it is the so-called “holotype”, the principal specimen that Henry Pilsbry selected from among the others to define the anatomical characteristics of the new subspecies Oxyloma haydeni kanabensis. Earle holds a container with some of the specimens of the Kanab ambersnail that he collected at Vasey’s Paradise in 1991.

(Photo by Sandra Scott)

All of the surviving shells of the Kanab ambersnail from Ferriss’s 1909 collection at Kanab, in the front of this drawer, were part of Pilsbry’s 1948 description of the new subspecies, O. h. kanabensis. They were not illustrated as a lot until 2002 (see Item no. 19.2223).

1984 Jeannette Spamer, Grand Canyon (Earle Spamer photo)
By 1916, George K. Davol, a San Francisco engineer, had approached the Santa Fe Railway with a proposal to build an aerial tramway across the Grand Canyon. Earlier ideas for the canyon had envisioned an inclined railway, rim-to-river trams down both sides of the canyon, and electric trolleyboats on the river, but none before had looked to span the chasm by “butte hopping” in the canyon. To raise financial interest in the project, Davol and 12 surveyors and packers conducted in 1919 a preliminary survey of the proposed tramway route, assembling promotional photograph albums. The photograph above shows some of the survey crew in camp on the Tonto Plateau. Little is known of the survey except in four thusfar-known albums, each somewhat different from the other.

Had the tramway been built, it would have affected virtually every aspect of the Grand Canyon as reflected in the arrangement of this bibliography—general writings (galore) about the experience of swaying over the canyon, filmed records, environmental impacts, administrative oversight of the national park concession, Native Americans’ cultural concerns, to mention a few; not to overlook safety issues.
