FAIR USE AND REPLICATION

No commercial or for-profit use of any part of this work is allowed without the author's permission. Not-for-profit organizations, government agencies, and educational institutions, as a part of their programs of education and outreach, may extract from this work for interpretive, educational, or administrative purposes. Scholastic or other individual researchers may copy selections for personal reference and may quote from this work following best practices of scholastic research.

Replication of this work in its entirety is permitted to create a conservational copy to mitigate physical decay or digital corruption, or to migrate to different software, or medium not now in existence, when the technology to use the original digital copy is obsolete. A documentary copy of this work on paper or other non-digital medium is permitted for reference use or to preempt the loss of the work due to technological change that no longer permits this work to be accessed in the digital medium for which it was created.

This statement does not pertain to, nor supersedes, copyrights held by the original sources of items cited in this work.

A Raven's Perch Digital Production

Raven’s Perch Philadelphia
The 17th and 18th centuries in this region recorded human interactions in a geographically far-flung but sparse field of publications, focused on the lower Colorado River regions in the river corridor from Glen Canyon Dam to the delta. The boundary in the Gulf of California includes Mexico’s Reserva de la Biosfera Alto Golfo de California y Delta del Río Colorado.

Approximate geographical area covered in THE GRAND CANON, embracing the Grand Canyon and lower Colorado River regions in the river corridor from Glen Canyon Dam to the delta. The boundary in the Gulf of California includes Mexico’s Reserva de la Biosfera Alto Golfo de California y Delta del Río Colorado. Approximate division between “Grand Canyon” and “Lower Colorado River” thematic regions of this bibliography [see Contents].

Base map of Colorado River drainage basin modified from U.S. Bureau of Reclamation, Glen Canyon Dam Adaptive Management Group. The Upper and Lower Colorado River Basins delineate the apportionment of the waters of the Colorado River basin by the Colorado River Compact of 1922; divided just downstream from Lee’s Ferry, Arizona, at the confluence of the Paria River. Dams and impoundments are indicated on the map. Lighter-gray areas, not labelled, are American Indian reservations. Basin boundary is not depicted in Mexico. See “Geographical Coverage” section within the introductory text for a map that delineates the natural Colorado River delta.
Satellite view of the Grand Canyon – Lower Colorado River Region

See Frontispiece 1 (facing) for bibliographical coverage area of THE GRAND CANYON outlined on map.
When we speak of ‘The Grand Canyon’ it must be understood that the Canyon does not start at the edge of the precipice. Nor is it an arbitrary line on a map, but rather it is the sum–total of the entire area surrounding those edges.

— Stephen Verkamp *

(From the “Geographical Coverage” section of THE GRAND CANON)

THERE ARE GOOD REASONS to embrace both the Grand Canyon and the extended lower Colorado River from Glen Canyon Dam to the sea, a region whose parts may be seen as topographically, geologically, ecologically, climatically, culturally, and politically dissimilar. In fact, their human histories ever since prehistoric times and, in written records from the time since the Spanish incursions of the mid-1500s, are entwined. Their natural histories overlap in numerous ways, too, particularly the recent geological history of the Colorado River even though it flows across two distinctly different physiographical provinces of North America. One can investigate one part of the region without having to attend to things that pertain to another area, but complex interrelations reveal themselves as one refocuses broadly or when the region is viewed from multidisciplinary perspectives. To thematically separate the lower Colorado River from the Grand Canyon is done easily; the historical separation, though, is difficult; geologically, environmentally or culturally, even more so. To separate Glen Canyon Dam from the desert Colorado River below Hoover Dam, or to separate Hoover Dam from the Grand Canyon upstream, overlooks the dramatic environmental influences these structures have all along the river’s passageway. To separate Native American cultures of the Grand Canyon region from those of the lower Colorado River diminishes traditional interactions and the impacts weighed upon all by Anglo activities over five centuries everywhere in the region. The Colorado River traces human heritages that arose and continue through understanding and participating in life in this land. The river runs through the physical land, delivering life, death, and rebirth in absolute, inspirational and spiritual ways. It holds histories to be discovered and discovered anew, and it seems to withhold answers. So likewise this bibliography—looking at all of this land, and the life, places and things therein, it records the work of thousands; they tell us what we can understand, opine and may never know. Without the whole view, the portions may fade as unessential memories.

RAVEN’S PERCH COLOPHON

“Camp—Colorado Plateau”, by Heinrich Balduin Möllhausen [details]
This bibliography appeared first in several published inkprint editions (1981, 1990, and a 1993 supplement) produced by the Grand Canyon Natural History Association. The 1990/1993 releases were also released in microfiche and digital (text-only ASCII format) media.

In January 2000 a greatly revised Internet Edition was posted as a field-searchable database on the Grand Canyon Association website, presenting work that had been completed in September 1999. Updates to the Internet Edition were made frequently during 2000–2014.

Preparations for *The Grand Canon* began during 2010. The object was to restore the monographic presentation of the entire bibliography and to incorporate added features not present online. The first edition in 2012 began a new series for the bibliography.

This Second Edition of *The Grand Canon* was produced in 2014. *The Grand Canon* and the Internet Edition are updated concurrently, although *The Grand Canon* is not formally available until a new edition is prepared and physically distributed. *The Grand Canon* contains many features, enhancements, and minor emendations to content and citation display that are not available online. The author regards *The Grand Canon* as the definitive version.
Editions Preceding *THE GRAND CANON*

Earle E. Spamer, compiler (*with* George H. Billingsley, William J. Breed, Robert C. Euler, and Grace Keroher)

Arranged in 10 parts. Print format only, paper wraps, perfect-bound.

[See Appendix A to Part 1 in the present bibliography for contents and arrangement of the 1981 edition.]

[The bibliography was begun in September 1974.]

**1990** Bibliography of the Grand Canyon and the Lower Colorado River; from 1540.

Grand Canyon, Arizona: Grand Canyon Natural History Association, *Monograph 8*, 12 separately paginated sections, with separately paginated front matter, in one volume, [370 pp.]

Arranged in 12 parts with additional special sections. Distributed in print format (loose-leaf, with binder and separator tabs, 1,000 copies), on microfiche (25 copies), and digitally on five ASCII-format 5.25-inch disks (25 copies). Contributors added introductory essays for parts of the bibliography or citations, or both.

[See Appendix B to Part 1 in the present bibliography for collated pagination sequence and tab placements for this edition and *Supplement 1*.]

**1993** Bibliography of the Grand Canyon and the Lower Colorado River; from 1540.

Earle E. Spamer, compiler (*with Daniel F. Cassidy and John Irwin*)

Distributed in print format (loose-leaf, 1,000 copies), on microfiche (25 copies), and digitally on two ASCII-format 5.25-inch disks (25 copies). No more supplements produced.

[See Appendix B to Part 1 in the present bibliography for collated pagination sequence and tab placements for 1990 edition and *Supplement 1*.]
2000–2015

**A Bibliography of the Grand Canyon and Lower Colorado River. Internet Edition.**

Earle E. Spamer, compiler and editor (with contributors Richard D. Quartaroli and Daniel F. Cassidy)

Arranged in 34 parts; later reduced to 32 parts. Available online only as a searchable database. First posted January 2000, and continuously updated thereafter.

[See Appendix C to Part 1 in the present bibliography for contents and arrangement of the Internet Edition.]

[Note: Two printed copies of the first state of the online edition were made by Spamer, 1,453 pp. One was given to the Special Collections and Archives, Cline Library, Northern Arizona University, Flagstaff (call no. F788.S636 2000); the other, bound, is in the author’s possession.]

---

2012

**The Grand Canon: 1548-2012. A Directory to 48,600 Published Items and New Content On the Grand Canyon and Lower Colorado River Region—Arizona, Nevada, California, Baja California, Sonora—Southwestern United States–Northwestern Mexico.**

[First Edition.]

Earle E. Spamer

Philadelphia: Earle E. Spamer (A Raven’s Perch Digital Production)

Digital product—Portable Document Format (PDF).

Updated bibliographical listing of items published worldwide in 55 languages. Enumerated and cross-listed to previous bibliographies and standard-reference lists. Extra features include introduction, commentaries, surveys of comparable works, and a nomenclatural appendix on the term “Grand Canyon” as used in geographical nomenclature, analogy and metaphor. Expanded and improved layout. [The subtitle published-item count will increase as the bibliography grows.]

Monographic version in 32 parts, periodically updated and concurrent with the Internet Edition. Updated and distributed periodically as searchable PDF (Portable Document Format) digital documents with hyperlinks. Separately dated versions, some with variant subtitles that update descriptive elements of subtitles. First formal publication on CD-ROM April 2012.

[See Navigation Page in the present bibliography for contents and arrangement.]

[Note: An informal, test release was prepared in February 2011 as the "Comprehensive Edition" and privately distributed on CD-ROM to a few users. It is not one of the sequence of formal editions.]

[Note: Two color-printed copies of the non-bibliographical components of the First Edition were produced by Spamer in 2012. One is in his possession; the other, bound, is in the possession of Richard D. Quartaroli.]

Philadelphia: Raven’s Perch

A Raven’s Perch Digital Production, Portable Document Format (PDF).

Updated bibliographical listing of items published worldwide in 65 languages. Enumerated and cross-listed to previous bibliographies and selected standard-reference lists. Extra features include introduction and the second edition of the nomenclatural appendix on the term "Grand Canyon" as used in geographical nomenclature, analogy, metaphor and neology. Expanded and improved layout throughout, with added features not available online.
A Bibliography of 65,000

Published Items in Printed and Other Media About or Including

The Grand Canyon & lower Colorado River regions

Arizona   Nevada   California   Baja California   Sonora

Southwestern United States–Northwestern Mexico
ORDINARILY, one would not think to begin a writing such as this with a concluding statement, but, against better judgment, I will: Earle E. Spamer’s online A Bibliography of the Grand Canyon and Lower Colorado River is the single most important tool for conducting research and reference concerning those two geographic entities. It also is more than a tool to resources, but a resource in and of itself. In my previous eighteen-plus years of employment as Research Librarian at the Glen Canyon Environmental Studies (GCES) and as The Special Collections Librarian at Northern Arizona University’s Cline Library Special Collections and Archives (SCA), a large part of my job was research and reference, to me two sides of the same coin—“you can’t have one without the other.” Almost daily, researchers or interested readers would contact me with questions regarding the Grand Canyon and/or the Colorado River. Since my retirement about four years ago, that does not happen as often but occurs at least once per week. If I don’t have a ready answer, and depending on the query, I often either start by searching online what Early (a nickname derived from malaprop of a colleague of mine at GCES that combines his first name and middle initial) and I have come to refer to as “The Bable” (another combination, somewhat respectively, of The Bible and Babel) or supply the URL link to it for my “patron.” It is essential for my interaction with those inquirers to supply them with the best citations for answers, but it is even more important for my continued research and obsession with all things published about the Grand and the Colorado.

If it is not already obvious, I am heavily biased toward “The Bable.” And I must admit that Early and I are friends as well as colleagues. Our personal association goes back at least twenty-five years, but I was aware of his (now forty years of) bibliographic work about ten years before that. I am referring to his two print bibliographies, published by the Grand Canyon Natural History Association: Monograph 2 in 1981 and Monograph 8 in 1990. I read every page of No. 2, looking for citations to works that I wanted to read or acquire, much as I used to do with “The Farquhar,” Francis P.
Farquhar’s 1953 *The Books of the Colorado River and the Grand Canyon: A Selective Bibliography* — a bibliophile’s wish list. I never did get through all the sections of No. 8 and its 1993 supplement, but did for the section on “Popular Works.” That was the part over which Early and I have had the most association. In the mid-1980s, I took a turn as a book scout, searching for out-of-print titles on request from interested parties. That served as a nice funding source for the building of my personal reading collection, and that’s how Early contacted me (prompted by our mutual acquaintance Bob Euler) with a request to write the “Introduction” to the “Popular Works” section of No. 8. I had been a commercial river guide on the Colorado River through Grand Canyon, having traveled my first trip as a passenger in 1973. In 1989, the International Geological Congress (IGC) had their second-ever meeting in the United States, with some of the attendees participating in two Grand Canyon river trips; back in 1891, with Colorado River pioneer John Wesley Powell leading, the IGC visited the South Rim, without the enjoyment and education of a Colorado River trip. Unfortunately, my outfitter did not schedule me on their trip, but my wife, with two degrees in geology and whom I met on a Grand river trip, talked her way onto it and there met Early, who was a passenger. In 1990, I was hiking to Thunder River, a tributary off a tributary to the main Colorado River, when Early dropped off the proof of the “Popular Works” to me via a couple of non-hiking passengers at the mouth of Tapeats Creek.

In the mid-1990s, Early and I did several Grand Canyon river trips together. At GCES I ran a support boat for researchers collecting water samples at a low Colorado River flow and needed a swamper, or assistant. We leapfrogged with the research boat, exchanging their samples for empty containers, back and forth. During the times we weren’t needed, we would stop at a random sampling of tributaries and springs, having a “looksee” for mollusks, part of Early’s ongoing interest; I called it “the great slug hunt,” though Early reminded me that these “slugs” had shells and were not my joking misnomer. Never did I realize that, to this day, I would be able to spot miniscule little critters in very shallow water. Included was a short hike to a hidden 19th century miners’ camp, one so pristine the National Park Service called it the “Movie Set,” and which Early was able to incorporate into a mining monograph he co-authored. Early was a geologist interpreter on a commercial river trip where I was a boatman, accompanied by my geologist wife and son. Besides “rock” stops, we also did our fair share of history interpretation, my favorite. On a private trip, we did a lot more historical investigation; one that stands out, was wading through the “Lava Lakes” swampy area trying to find a miners’ inscription, one I am still searching for, but what an interesting botanical area and experience.
Our interests extend to many facets of Grand Canyon knowledge, or myths, or obscuriana. I am a contributor to the online “Bable,” and, on occasion, Early would pronounce a new citation as the most obscure. The designation would change over time, of course, and I was not the only “winner”; at this time, I’m not sure who has the title or what the most obscure citation is, but Early will let me know if I come up with another. He is a very “punny” man, and we have bandied about plays on words for years, including “psychonyms,” pseudonyms with insider connotations. When I chose C. V. Abyssus, the former biological designation for the pink Grand Canyon rattle-snake, Early mentioned that he didn’t have a pseudonym or nickname. Although he had related to me his fixation on the common raven, he didn’t connect until I suggested Early C. Corax, and now you view *The Grand Canon* under the Raven’s Perch colophon.

*The Grand Canon*, of course, is not “The Bable,” and vice versa, though, as Early points out, there are many similarities and differences. Simply put, to me *The Grand Canon* is the more entertaining version of the online *Bibliography*, one to be able to sit and read, to enjoy, to share the stories. The *Bibliography* is the workhorse, the tool to resources, the searching, finding, and discovery, while *The Canon* is the rewarding result of all that hard work. Though the compiling and writing of those stories is very hard work in and of itself, that pays off in the well-written stories of human interaction with the Canyon and the River. Perhaps in a Foreword I should suggest people acquire this incredible canon that Early Spamer has authored, to convince them to spend some hard-earned money on it, for certainly it is essential to any complete library on our favorite subject. Those are moot points, though, as Early is sharing his work and his passion for place with all of us gratis, a generous and welcome gesture. You might want to print some sections and have them bound—I have two copies of previous versions, as it’s so pleasurable to have the feel of something visceral in hand. Early Spamer has provided something profound for Canyon lovers. When he decides to no longer continue this work, or has “run the last rapid” and can’t, will there be any one willing to carry on? Otis Reed “Dock” Marston collected every story he could find concerning the history of river running for the Colorado River and its tributaries. His manuscript languished from his death in 1979 until the end of 2014, when it was finally published. Since 1979, the increase in annual citations, as detailed by Early, is incredible, yet no one has taken Dock’s place as the all-encompassing collector. Early’s bibliographic work is the next best thing—I appreciate it immensely, and I hope you will, too.

**Richard D. Quartaroli**  
*The Special Collections Librarian Emeritus  
Northern Arizona University*
POSTSCRIPT, by Early

I have long since given up handing out the very subjective “Most Obscure Citation” awards. The first “formal” recognition of competition, if one may call it so, was to Diane Boyer (then Grua) for a citation from The Brine Line, the magazine of the American Potash and Chemical Corporation, which seized the obscure title from the sole holder, Richard. But since then, especially in the past decade or more, so many arcane—even surprisingly pointless but infatuating—citation sources rushed past in the rapidly rising bibliographical current that it was all I could do to keep moving camp, rather than to worry about measuring the flow. Thanks again to all of my (now more obscure) contributors.
THE GRAND CANON documents publications that relate wholly or in part to the Grand Canyon of the Colorado River in Arizona, and to the lower Colorado River region of Arizona, Nevada, and California (southwestern United States) and Baja California and Sonora (northwestern Mexico). It divides into 32 subject areas 65,000 items published worldwide during 473 years, from 1542 to 2014, in 65 languages. Items embrace the humanities; social, natural, physical, and environmental sciences; health and safety; engineering projects and water management; administrative oversight; legislative and judicial affairs; concerns of public-interest and special-advocacy organizations; interests and activities of indigenous peoples; and works for and by youth. Publications are in inkprint, special media for the visually impaired, and audio, audio-visual and some digital media. They have been published privately and in popular, academic, commercial and governmental venues. No comparable compendium exists for other historical, natural, recreational, or utilitarian areas overseen by federal and state agencies of the United States or Mexico.

From THE GRAND CANON subsets of citations may serve as foundations for specialized and applied uses, scholarly studies, and administrative analysis and record. Trends in personal, professional and official interests may be detected in citations spanning decades and centuries. THE GRAND CANON serves as a record for historians and other scholars and avocational workers. It may serve as a unique reference tool for administrators and resource managers who work within federal, state, Native American and other jurisdictions covered by this work, and for professionals in special-advocacy and not-for-profit organizations that have concerns in this region.

The Second Edition includes citations gathered through the early part of January 2015. Additional content includes a comprehensive accounting of broad geographical and literary applications of the appellation “Grand Canyon”, which document reuse of the term in myriad ways as seen from literary and cultural perspectives.

1 See frontispiece map.
This work began with bibliographical compilations first gathered in 1974. In 1981, the first formal publication appeared in inkprint. A new edition was published in 1990, with a 1993 supplement; these in concurrent inkprint, microfiche, and digital media. All were published by the Grand Canyon Natural History Association. Informal revisions and private redistributions were made during the 1970s and 1980s; these are unrecorded. In January 2000 a greatly revised Internet Edition was posted to the Grand Canyon Association website; it is a field-searchable database, frequently updated, that filters user-specified queries (www.grandcanyonbiblio.org). In 2010 the author began work to reinstitute the monographic format, in digital form; its first edition, in PDF, appeared in 2012 as THE GRAND CANON. It offers a complete bibliography, browsable and readable by users who require such contiguous access. Although it is a wholly new and separate work, it also strongly complements the Internet Edition.

THE GRAND CANON offers its users a variety of working positions. It lists everything that may be acquired through libraries or commercial and some web-based sources. In many cases, such as when a user is new to a field or is working on a historical overview, only a perfunctory review of everything that is available can provide a look at what has been done. THE GRAND CANON is divided into topical sections that anticipate diverse fields of interest that users will wish to examine. Users with specific agendas may want to cull from it subsets of publication data that meet criteria of special projects or needs. Certain inquiries will of course be expediently answered in the searchable Internet Edition; for example, lists for specific ranges of publication dates, or everything by a certain author whether they are listed as a first or subsequent author among many, and between various subject categories. On the other hand, THE GRAND CANON offers a definitive, contiguous list that retains its best use as a documentary work. There are decided advantages to speedily answered inquires through the online database, but very focused lines of inquiry by those who are afforded the time for more meticulous research will be answered by using the bibliography in its contiguous whole. Complementing the filterable powers of the Internet Edition, THE GRAND CANON provides an unobscured “big picture” that is not seen online.

THE GRAND CANON serves as a definitive accounting of publications about the Grand Canyon–lower Colorado River region. It is also a categorized reading list with which users may identify the items that may be of value to their work. Informational compilations are appended to citations, including detailed cross-listings to earlier bibliographies and standard-reference lists, which provide added value for historians, and other readers across a broad spectrum of activities. Together the components of THE GRAND CANON view in fine historical, cultural, and administrative detail an immense body of work published by thousands of writers, artists, officials, institutions and businesses, seated now in six different centuries.
MARKS FORTY YEARS since this bibliography was begun. A lot has changed in that time, for the compiler and the compiled alike. I have gained experience and opinion. Many specific topics recorded here are the product of technology, science, and social affairs unimagined in 1974.

In this extended Preface, I take the opportunity to delve into some ideas. I assert that bibliographies are not quaint curiosities among aged research tools, nor are they mortuaries for information about publications. Bibliographies are historical resources, too; they are not irrelevant to modern methodologies of research. They can serve up much more than just lists of things; they can direct its users toward resources with which a user may have been unaware; and they can showcase some resources that may have value to a user in completely different ways than for the purposes they had been published in the first place. All it takes is to present these resources to the user, who will evaluate what is useful for the task at hand. And before I proceed any farther, I affirm that I am a practicing enthusiast both of the burdensome, yet invigorating, world of paper resources and the dazzling, light-weight universe of digital products.

I am now keenly aware, from the professions in which I have worked for several decades, of less awareness among some present-day researchers who do not know of the useful tools that once had been regular focuses in the educational process (here I have in mind bibliographies). Such tools have been easily forgotten because there are rushed expectations gained from using powerful modern tools—those that deliver results promptly, such as databases, digitized holdings of libraries, and web resources.
But unbeknownst to their users, those same relied-upon resources may contain just a portion—indeed, a fragment—of everything that could possibly be useful, because a huge number of legacy documents still are not in digital formats, and some portion of them do not even appear in the catalogs and indices. This oversight by researchers may be due to resource compilers having overlooked or purposely left out some things, or more likely because some things just have not “been gotten to”. It may also be the fault of inexperience with query structure or insufficiently designed software. Nevertheless, overdependence on such resources manifests a weak point in research methods because the user must rely upon the work of others to bring forward the things that may be of use, and it is incumbent upon the user to ascertain what is of use from among what is presented to him or her. There are, in the midst of the great resources available digitally, far more resources that have not yet been (and may never be) made available in any digital form. If the user has not been made aware of something, they faultlessly proceed without knowing it. So, this Preface relights the process and product of comprehensive bibliography, while at the same time it explains the examples and utility of one product, *THE GRAND CANON*.

*THE GRAND CANON* began forty years ago simply as a droning recital of authors and titles; yet as we shall see, today it can be used for purposes beyond such a mundane, clerical accounting. Working with it, one can gain historical insights; for example, how do the thousands of citations preserve a record of the ways people, institutions, organizations and agencies view this geographical region? how had they interacted here? what did they accomplish? what did they hope for its future? how well did they communicate this? what has become useful? and what has become valuable, both intellectually and monetarily?

For the time being, I see an interactive use of this bibliography. Use the monographic volume of *THE GRAND CANON* to browse, condense, and see contiguous citations in the format I intend to serve as the long-term record; and concomitantly use the bibliography online ([www.grandcanyonbiblio.org](http://www.grandcanyonbiblio.org)), which is a frequently updated, searchable database. But at such time that the database may be taken off the web, it is *THE GRAND CANON* that will serve all the purposes I envision.

This bibliography is a record of *work*; that is, it accounts for the finished products of authors, artists, publishers, not-for-profit and governmental entities, and administrators (politicians included). It vouches for authenticity of publications—that they exist—but leaves it to the user to evaluate the value of these works and how they may be located. It includes without distinction the champion orations of great authors, the entablatured pronouncements of mighty publishers, and the superdocumentary efforts of government agencies, side by side with the voices and opinions of those who
would never have been heard were it not for their own industry. To these add the pedestrian whispers of the most modest, and otherwise forgettable, serials and newsletters. Their work—all of it, from the 16th to 21st centuries—embodies a history of a land and its people—indigenes, immigrants, and itinerants all. The bibliography summarizes their work and alerts users to the availability and potential uses of those publications. Here they are, for whatever reasons they are needed.

Concisely, *THE GRAND CANON*, within its geographic bounds, may see its best service for persons and agencies who require an understanding of things that have been reported and described within this region or portions of it, or within certain topics of activity. It can be useful to historians, who need a grasp of the ebb and flow of topics, investigators, audiences, and ideas (whether revolutionary, pejorative or perfunctory). It can be useful to administrators or resource managers who wish to ascertain the breadth and content of publications that have drawn on the resources of, or the specific kinds of work that have been conducted within, the geographically defined or politically administrated areas in which they have oversight. This is far more than a run-on list of “who wrote what when”.

Indeed, there are two kinds of historical record: 1) that which is followed in the current of *primary resources*—correspondence, diaries, memoranda and similarly unique documents that, while they are essential to historical research, are usually not available to researchers at the times when they were created; and 2) that which is followed in the current of *secondary resources*—publications that are usually available in numerous, identical copies, usually widely available when they were created, and today often held in many places. Scarcity of resources creates problems for those who would benefit from them, but for the purposes of a definitive bibliography (like *THE GRAND CANON*) scarcity of a resource is not a reason to consider omitting its citation.

The first current (primary resources) influences the second (published works) because it is followed by those who write and publish historical analyses and reviews, although usually long after the fact. It is, however, the second current that is the one experienced contemporaneously by those who are present at the time of the events (as well as by those who read them long afterward, who thus may see what was available at the times of those earlier events). Secondary sources are the mainstream of experience, even though reliability or truthfulness may have to be questioned. The public (among whom I will include historians and other specialists in numerous fields of interest) gathers its information—its news, subjective analyses of events, and edifying and entertaining readings alike—from secondary resources, which may be widely circulated or not, potentially enduring or ephemeral. And following in this current, past and present, are those who take advantage of the readers’ attention to promote their own
causes and agendas, thereby further influencing those who do use secondary resources in their research.

My thesis here is that bibliographies, when they seine the evidence of work from the current of secondary resources, document the published things that were available to readers at a given time; and thus individual citations corroborate the existence of the products of work done by individuals, agencies, and organizations. It is, however, always up to the individual researcher to ascertain, first, what published materials are of potential use to the investigation at hand; then, second, what amongst that material is actually pertinent and obtainable for the objectives of the researcher’s work. It is rarely the purpose of a conventional bibliography to evaluate the content of its citations. A conscientious bibliographer may elect to disregard something, too, but, in the end, little is more disadvantageous to the researcher or other user of the bibliography than to have not been informed in the first place.

Bibliographies provide the service of informing. They record individual items, of course, but they also preserve a collated record of widespread material, much of which will never be found in one place. Such records can be investigated further; for example, to find the works by specific creators (authors, publishers, or organizational or governmental agencies), or to implement studies of intellectual or cultural trends as exposed in the citations over time, or to identify trends that will indicate when things became known and how and where they became known. Bibliographies can also inform through intensive searches—browsing—that will uncover things of potential use about which the investigator was not aware. And bibliographies can be deconstructed to use for other, more specialized purposes.

One peculiar way of using a bibliography may be to search for what does not appear among the works cited therein; that is, what kinds of work seem not to have been published. As an example, I am compelled to take notice of what (to me anyway) is an interesting disparity in the kinds of musical productions that have been created in Grand Canyon venues, in contrast to the kinds of productions that have been presented in the written word. The Grand Canyon and the Colorado River have invoked writers’ expressions of grandeur and humility both. There is no lack for infused, gushing invocations of ultimate greatness represented by the canyon and its river, sometimes with glorying and emotional quotations from the Bible. Other writings metaphorically pause to kneel in quiet, thoughtful contemplation, too, or quote the Bible’s inwardly inspiring passages. But by and large most writings about the canyon take in and redigest its “Grand”ness and (at length) offer up its “inexpressible” qualities.

Contrarily, in music there are no sweeping batons and crashing orchestral stanzas that match the efforts of text publishers’ slave galleys sweating with enthusiastic prose and poem. Yes, there are Ferde Grofé’s individual movements of his
Grand Canyon Suite that focus on specific impressions—the creeping and waning splendors of “Sunrise” and “Sunset”, the flashing and roiling storms that beset the view in “Cloudburst”, the tone colors of “Painted Desert”—and of course there is the amusing and widely favorite clippity-clop of mules and their brawling cadences as they head “On the Trail” into the canyon. But to this day Grofé is “it”—the monopoly on broad musical expressions of the Grand Canyon to the world at large. If the Grand Canyon has its own folk music, this is it. There are some others, but they pale in recognition. Sometimes they simply borrow a famous composer’s well-known (and otherwise unrelated) work to drape some musical idea over the canyon.

More contemporary original sound pieces for the Grand Canyon and Colorado River (some of them even recorded in canyon nooks) are instrumental solos or with small ensembles. These are compositions for woodwinds and strings, the music of dripping water and the thoughts of the wind. They relax. Voices do not impinge. It is curious music for what otherwise is the world’s grand tableau in stone. Although decades ago the Mormon Tabernacle Choir celebrated worshipful broadcasts at the canyon’s edge, there are no quiet voice recordings from the canyon’s bosom that would complement the contemplative woodwinds and strings. Yes, there are individual pieces that sing of the Grand Canyon or the Colorado River, but they are ballads or simple stories in song, not so much the river’s confessions teased from the inner mind nor the sweet siren’s lure to secret places in the canyon. It is most peculiar, the relative absence from the Grand Canyon of both mighty scores and voices’ monastic moods in notes.

There are a few Native American recordings, some captured years ago by anthropologists or self-serving promotionalists, such as those where we may hear the Hopi performances outside Hopi House on the canyon’s rim. Although the “scientific” recordings are in some measure valuable to modern-day researchers, most of the other recordings were made at entertainment venues for tourists. In essence they all are a quite different sort of expression, not necessarily “about” the canyon and its river but of the meanings and needs of people’s presence in this world; they could have been (and were) performed anywhere. There is no need to set to music the spoken legend of Tiyo’s voyage of the heart down through Grand Canyon and the creation of the Colorado River.

I am not aware of any critical, comparative studies of these differences between the styles of the written word and musical notes as expressed for the canyon and its river. This is an example of one of the uses bibliographies can serve, that of bringing attention to underexplored areas of study.

One may follow in THE GRAND CANON the works of individual creators (whether human or organizational) and how interests and activities change through time. In its
whole, this bibliography is a record of a single history, one geographically, albeit artificially, confined to the great “L” of the lower Colorado River region.\textsuperscript{2} It reaches into the aeons of natural history and adds the recent embrace of human lives, their activities, interests, perceptions and philosophies. Individuals and social, cultural, academic, and governmental groups poured into it their thoughts, findings, conclusions and demands. They (almost all of them) did not have the big picture of the lower Colorado River basin in mind, yet their contributions help portray that very same picture. And similarly, it is up to a user of \textit{THE GRAND CANON} to discern what is important to the user’s immediate needs, today or a century hence. So, with the passage of time this bibliography, once it is no longer updated, will dwindle in temporal coverage, but it can always stand as a record of the histories and perspectives of the times it does cover.

What began as handwritten index cards and typewritten pages, this bibliography is now wholly digital, although bear in mind that every character is an analog press of a key or the click of a mouse. Searchable word-processed pages are now composed on personal computers, devices that were tinkerers’ models when the project began in 1974. The first published bibliography was printed in 1981 by what then was called the Grand Canyon Natural History Association. It was a part of the Association’s new Monographs series of publications, created the old-fashioned way, from typewritten pages sent to the editor, retyped by commercial, human compositors, proof-checked (by me) from galleys and returned to the editor before the printer’s “stripping” the galleys into page layouts, and—finally—printing, binding, boxing, shipping, unboxing, and distributing (shipping, again).

The 1990 edition and its 1993 supplement were offset-printed from so-called “camera-ready” pages composed with word-processing software, printed to paper, sent to the publisher (for the record, all by me) and from there to a commercial printer to be used for offset printing. The second edition and supplement also were produced at the same time on microfiche and as text-only digital files on 5¼-inch “floppy disks”.

By the end of 1999, an updated bibliography was created with “fields” of data disassembled from a digital copy of the bibliography, digitally re-encoded with field-bounding XML (Extensible Markup Language) entities for use in a searchable database; and in January 2000 the wholly digital content, utilizing a search engine, was posted to the Grand Canyon Association’s website as “A Bibliography of the Grand Canyon and Lower Colorado River”\textsuperscript{3}. So for nearly a decade and a half the Grand Canyon–Lower

\textsuperscript{2} The region, mapped north-upward by convention, actually is shaped more like the Greek capital \textit{gamma}, Γ; see the frontispiece map.

\textsuperscript{3} \texttt{http://www.grandcanyonbiblio.org}
Colorado River bibliography, still sponsored by the Grand Canyon Association and continuously updated online, lacked the familiar, contiguously monographic appearance such as it had had for nearly thirty years.4

To remedy the loss of the monographic presentation, I produced the first edition of *THE GRAND CANON* in 2012. Its hugely increased size required its publication as a digital product in PDF,5 but the user will see it is formatted with a book-like layout. As a digital product it includes electronically searchable features, of course, but I also intend it to serve as a traditional “book” product, browsable on a computer or in paper format should the work be printed out in whole or in part. Or, if worse comes to worst, should the navigational hyperlinks of the PDF become unusable the bibliography is still usable, digitally, as a browsable document.

*THE GRAND CANON* also makes available thousands of small fixes that do not appear in the online edition. It has also added more cross-indexes than had been inserted into the Internet Edition, and features aesthetic embellishments—all too numerous and too much of an encumbrance for one person to fix in the online database as well. Omitting these value-added features online has not, however, altered the factual content of the online citations themselves; the essential information of the bibliography is unaffected. Yet I had been dissatisfied with the general unavailability of these alterations and emendations, as well as the lack of a contiguously browsable content. Thus the PDF version makes all of this available again, with the added benefit that the PDF is searchable for those who use it in the digital environment.

The second edition of *THE GRAND CANON*, here, is also distributed in PDF. It brings the citations up to date again for the monographic presentation. More than 17,000 citations have been added since the first edition of *THE GRAND CANON*, and even more improvements are evident. While a second edition might not have been warranted so soon after the first edition was produced, I had wanted specifically to commemorate this project’s fortieth anniversary. So it is likely to be a while before another edition is produced.

---

4 See the [Appendices to Part 1](#) of the present bibliography, which outline the content and arrangement of all editions that preceded *THE GRAND CANON*.

5 PDF is the Portable Document Format created in 1993 by Adobe® Systems, Inc. It is a proprietary format that was released in an open standard in 2008, which has gained such widespread use, worldwide, that anyone with a computer may view, distribute, interact with, and print PDF documents. And the Adobe® Acrobat® Reader required to open PDF documents is available to all, free of charge. While these factors still may not assure longevity, the wide adoption and commitment to this format by individuals, corporations, and even the likes of the Library of Congress on a large scale, may insist that it is a format that will note fade peaceably, at least not without an equally large commitment to adapting billions of documents to a new and necessary platform.
THE GRAND CANON monograph and its online searchable-database counterpart recognize concomitant and utilitarian values. Both contain the same citations, naturally—books, serials, maps, and various forms of non-print media. While both are in digital formats, it is THE GRAND CANON that purposely resembles the pages of a printed volume while the online bibliography serves as the searchable database. (THE GRAND CANON is in PDF, the online bibliography is uploaded as XML [Extensible Markup Language] files that operate on the website with Adobe® ColdFusion® proprietary software.)

THE GRAND CANON restores the traditional, booklike appearance akin to the now out-of-print paper bibliographies published in 1981, 1990 and 1993. On the other hand, the PDF is, like the online bibliography, digitally searchable—but THE GRAND CANON is designed to be printed, browsed, and (most importantly) read. It is the definitive version because errors, now unknown, may have occurred during uploads and maintenance of the online bibliography; accordingly, the online database may be less reliable. And the monographic appearance will be preserved if the online bibliography is removed from the web and is no longer available, which I assume must happen eventually. The database format may be missed, but the whole will be preserved in THE GRAND CANON, which in any case may be deconstructed to create a new database.

I unabashedly hold tightly to the legacy of paper, but the utility of digital works has hugely enlarged the scope of this modern bibliography. Web-based resources caused it to grow explosively. They have allowed me to locate digital copies of publications that I doubt I ever would have discovered otherwise. This does not mean that I embrace a digital-only future for the world’s resources, nor do I feel that this bibliography is impertinent to those who have. Are the “born-digital” generation so fully electronic that the antique (quaint?) aspects of printed publications are doomed to disuse and ignorance? Not likely, especially in the realms of scholarly and avocational research.

Studies and opinions abound—in print and in digital format—that, for the time being, paper is even more prevalent and important in daily work than it was before the rise of the digital empire. One only has to (ironically) search online for numerous such resources and references. Of course, paper in the digital world is seen differently than when all there was was the mass accumulation of paper resources. Yet, for many tasks the world of purely paper resources is univocally necessary for work and

---

6 See herein the informational section on principal differences between THE GRAND CANON and the Internet Edition.
reference. In fact, most resources today remain only on paper; credible work still must rely on them. Other studies indicate that human nature, for many reasons, still favors and benefits more from the physical nature of paper and books, while seeing digital products as useful in some circumstances but not universally.

So it falls upon certain resources (like bibliographies) to guide readers to the treasury of materials that include the undigitized; they will also provide direction to many other materials that are superficially digitized (that is, they are just digitized copies of paper originals)—only occasionally to born-digital products. Intriguingly, bibliographies of the future may be digital in such ways that they can so reliably interpret queries so as to present the very documents themselves, in facsimile, allowing browsing. Such resources would provide means of anticipatory access that are customized to the user—and they are likely to take their users directly to a far more vast treasury of digital copies of original paper products than which exists today.

**The Grand Canon** cites more than 24,000 publications that were produced between 1542 and 1974 (the year this bibliography was begun). Of these, 1,300 were published before 1869, when John Wesley Powell and fellow explorers made the first river-run through the great canyons of Utah and Arizona. Most of those thousand items pertain to the lower Colorado River region, below the Grand Canyon, because before Powell’s era there was not much known (hence not published) about the Grand Canyon region, whereas things had been mentioned, often cursorily, about the lower region since the 1500s. From the period since 1974, some 41,000 publications are listed here; steadily approaching double the number of pre-1974 works in a tenth the number of years. The numbers and distributions that show runaway productivity by authors and the producers of publications in latter part of the 20th century are not surprising; comparable observations are reported from many fields of study. Yet this is clearly not everything that could be in this bibliography because citations continue to be found, old and new alike. Surely there are a great number more that have not come to light.

Where once I pored over printed indices to published literature, card catalogues, and the shelves of libraries and bookstores—and I still do, except for the card catalogues, which are nigh extinct—I now rely tremendously on web-based resources. They make it possible to find things that only serendipity and years of traveling about would otherwise require—indeed, were I to find these things at all. Another great consideration is that much of this work I can do at leisure in home or office, where the means to cross-check resources and the tools to fill out incomplete citations are also instantly available online.

What I have relied upon, heavily, are two kinds of web-posted materials: 1) those that are digital scans of items originally produced in print, and 2) those that are
presented in the format of printed pages, implying they may be printed as conventional pages as like in serials and books. The citations created from materials acquired through web searches are not from the constellation of ephemeral “webpages”, documents unto themselves not necessarily meant to mimic printed works nor intended for the life of decades and centuries. They may disappear at a moment’s notice, leaving no trace behind. Likewise, digitally garish, hyperlink-infused, and animated web resources are ignored. Such resources have no printed counterpart and will lack longevity, their relocatability not assured. It is, after all, the chief objective of a bibliography not just to preserve the record of what has been found by the compilers but to preserve the record of what can continue to be obtained far into the future. Web-posted, print-similar documents are cited in the bibliography because either they were originally produced as print documents or inferentially indicate that digital or physical copies can and have been made and preserved (such as I have done for my research collection). This is most noticeable when a digitally posted serial includes a page on which is space for a mailing address and postage.

Surely a significant number of print-similar items found on the web would never have been found because they would not have made it into library collections in the first place. Privately distributed publications, such as those produced by individuals and organizations, would not have been found because libraries would not have collected them—for that matter, they would not even have been known to libraries. Examples of such documents might be a minister’s church newsletter, wherein is described an inspirirational visit to the Grand Canyon; or a club’s periodical magazine distributed to its membership, reporting some members’ adventures on the Colorado River. The church or club might have saved copies for and amongst themselves, but who outside of them would have known of them? Today, however, these kinds of publications, current issues and back numbers alike, can be found because they are posted to websites, and so they find their ways into this bibliography, where before they may have been missed. One might object that in this way we are exposed unnecessarily to a vast gyre of flotsam, unessential for reading in it the essential drifts of literature, understandings of the world around us, and human ideas and ideals. I counter that it is such kinds of publications that will allow some researchers to investigate the work and observations of the hidden, submerged part of the human iceberg, those who may be marginalized as people with “just” ordinary things to say.

Intuitively, the vast number of publications that still remain unfound must lie in rich and interesting troves of print publications that simply have not been digitized to make them widely available through the web. These unlocated items are not limited to new and obscure newsletters; they will include old, extinct serials printed on paper but as yet not thought significant enough, or lacking the opportunity, to digitize and restore
their content for our attention. Then, too, there are serials, old and new, that remain obscure to this bibliography because they have been published outside of the mainstream sources of North America and western Europe, representing titles infrequently found in the libraries of these areas. Even more obscure titles are those that have been published in languages and alphabets that, even if digitized, do not as easily reveal their content because they are not as readily searchable by me and my contributors, if for the only reason that our first language is English. (Still, some 65 languages are represented now in THE GRAND CANON, even if most are represented only by single or a couple of citations. They promise more to be found.)

Gathering citations continues apace, and the acceleration of the past few years has astonished me. Even after the bibliography began to grow quickly in the second decade of the 21st century, I thought that reaching the 50,000-citation mark would come many years hence, perhaps as the bibliography approached its fiftieth anniversary in 2024. Instead, that mark was passed in 2012; and 60,000 in 2014. I believed, too, that the flood of newly gathered items, many of them publications produced long ago, had crested in 2010; that thereafter things would “calm down” somewhat. But the 2013 gatherings yielded more than 6,500 items, and 2014 surpassed 8,000, each year fully a tenth of the whole bibliography. The Internet—and the legions who post materials to the web—made this possible. Nevertheless, a crest seems to have come at last, signaling that the capture of older, missed citations will rise again only when previously inaccessible old resources are made available more widely via the web. It is an awkward way to grow a bibliography, considering that these older materials are already out there; but without the web resources the total of citations would lag seriously; the bibliography would languish with contentness. I can imagine a future time when even my efforts will seem to have been painstakingly long and incomplete—and perhaps they will be seen even as incredulously and unnecessarily time-consuming in the face of whatever resources exist in that far (or not so far) time.

The recent advances in the growth of this bibliography are based on publications that were first produced in the tangible format of paper, in multiple identical copies that should be found on library shelves, but which also have been digitized and made available through the web. One of the more remarkable resources for web-posted digitized versions of printed publications is GoogleBooks, which includes books and serials both. Another resource is Amazon.com, through which new titles, many of them with searchable contents, may be found. Amazon is also useful for locating on-demand publications, which otherwise might not be found. Then there is the global library database, WorldCat, whose usefulness is immense yet limited only to those libraries that participate (and similarly other web-based databases). There are many digital
resources that are similar to all of these as well, which have made contributions to this compilation.

I shall continue to avoid general web-based items because they are positively ephemeral; it is not likely that many of them will be found by users far in the future, despite the citation of the their URLs. Should anyone believe that the ephemeral nature of webpages is not a significant issue, consider the fact that the jurists of the Supreme Court of the United States have in recent times (and not far along in the digital era) incorporated webpage hyperlinks in their decisions, but some links have already failed due to the removal or migration of the linked material. This quite disconcerting matter is significant because Supreme Court opinions create legal precedent; their cited materials contain the evidence that contributed to those opinions and rulings, and which thus contain the facts that may be refuted at some later time.

Similarly, if a bibliography were to cite a webpage, it thus would convey a record of availability; if the webpage disappears, the information contained in that digital document is lost to researchers and other users, and the entry in the bibliography turned useless. There is no assurance that the document may be retrieved from another source. If it does remain available through another source, a search would have to be made for it, defeating the purpose of the citation and the bibliography. It is rather like going to a library’s recorded shelf location for a book, not finding it there, and having to assume that it either has moved elsewhere in the library, or discarded but possibly available elsewhere. So, I purposely have not identified the URLs of most of my online sources, except those that for one reason or another are essential to this bibliography; of course with the caveat that the document may be lost to future researchers. Those that are originally print products, with identifiable titles, dates, and so forth, feasibly can be found in various locations in their hardcopy formats, cataloged or otherwise identified by those data. Those works that may be exclusively digital might be located by searching for the data conveyed in the citation; if it is gone, a serendipitously available printed copy, in whole or in part, may exist somewhere, but we would have to have the means to locate it.

A bibliography containing links to dead URLs is useless except, ironically, as a documentary guide to lost materials, a frozen continent of memorials. Yet THE GRAND CANON tests these new waters, too, by citing a few exclusively web-based materials that are either solidly pertinent to this bibliography in a newsletter- or publication-like format, or that cite a print publication’s own links to supplementary materials.

---

7 URL = Uniform Resource Locator, usually comprising the protocol, domain name, and a filename or other extension; for example, http://www.grandcanyonbiblio.org/search.
available on the publisher’s website. Time will tell how long such links remain useful, if their contents have not been printed out and saved.  

“... [a compilation], being the result of the judgment of one man, cannot be expected to satisfy the judgment of every other man; but [this] Compiler has always worked on this principle: to insert not only those references which he himself considered to be of consequence, but also to insert those which he thought it possible for anyone else to consider of consequence.”

— John Faulkner Potts, 1888

At the start of this Preface I noted that I have gained opinions over the past forty years. During that time I have formed some ideas about what bibliographies are and what duties they can or should perform; that is, how they may specifically be insightful beyond their service as documentary lists focused on the past. My ideas are partly developed from experience, but crafted as well from conversations and in working with professionals in numerous fields of study. I have been fortunate, too, in having worked in the time before and after the advent of digital resources in common activities, and I freely draw from the strengths that have been held in both times. I stress that this is not enlightenment; rather it is my response to having come to view things during this time both as a researcher and an information provider, and likewise (calling upon my career paths) with the views of historian, scientist, editor, archivist, and (of course) bibliographer. Still, my ideas may be in some respects contrary to the usual perspectives (or biases) held of bibliographies.

The content of THE GRAND CANON reflects how I have sought out citations that are necessary for a trustable accounting of publications, but also those that could be of interest only under the most peculiar of research focuses. It is not restricted to works wholly, mostly, or significantly about the Grand Canyon–lower Colorado River region; for example, things as small as a casual, but perinent, remark in chapter, paragraph, or a single sentence are captured here. The scattered and numerous crumbs of small and passing notes are intellectual ephemera; they will more often be synthesized rather than used as insightful quotations by themselves. Do such minutiae belong in any bibliography? Yes—if it strives to be definitive. Even the briefest of pertinent notes

---

9 I have, incidentally, saved printed copies of, or selections from, these digital-only publications. This, however, does not assist other researchers unless the reference copies are made accessible in an appropriate location, or if some one else has done likewise. I have explored some of this in a paper published several years ago: Earle E. Spamer, “What a Woven Web: Archives, Websites, and the Coming Legacy of ‘Light Gray Literature’”, Provenance, Vol. 20 (2002), pp. 59-71.

demand a record not just because they exist but because each contributes to the history of its subject. Collated, they give resonance to the whole bibliography.

This kind of gathering anticipates that the citations will direct future users to source material for research projects that are as yet unknown. It is the future reader who may find that some of these items hold consequential value within a larger project; perhaps some items will inspire an altogether new project, and others may unveil some aspect of a local history hitherto unrecognized by the reader. Readers would otherwise never know of these bits were they not captured *en masse*. However, knowing how many of the citations in *THE GRAND CANON* were uncovered serendipitously—and serendipity is not a small part of the process of compilation—I wonder just how much is still undiscovered; quite a lot, I am sure. Thus I recognize that I am myself as much in the dark as are readers who know nothing of potentially useful material within and beyond this bibliography’s quiet snowfall of citations.

Some ideas I hold deviate from settled bibliographical traditions of the past century or so. Of course this is a personal justification after forty years of work, but, now that I am an older worker, I have gathered ideas and developed different perspectives partly by having watched and listened to others in several service- and research-oriented professions in which I have worked. In recent years I also have been able to introduce young, digitally savvy researchers to a few old but viable research methods and resources that no longer seem to be part of the regular flow of reading and research, little used or revealed in regular academic programs, nor (more tellingly) not learned as often from academic mentors. For them I offer another way into the realm of undigitized publications, exposing these readers to a world of already available resources that are only in need of modern technologies and new interests to reestablish broader usefulness and accessibility. Some of these younger workers are aware of such resources and may even use them, but the drift away from these resources by others is noticeable. Thus bibliographies are fine examples from a vast group of potential resources that need only new perspectives to regain forgotten uses, to dispell the notion that they are laborious analog tools, lumbering in a slick world of digitized resources.

Bibliographies do not have to be ones newly created to realize their usefulness. Old bibliographies—galore—are heritage libraries. They are full of data that can be used for some forms of current research. They are outdated only by the knife edge of publication dates, not by their content. As histories, they await use by today’s and tomorrow’s historians. When one searches library catalogues (digital ones usually) or, more rewardingly, manually handle the volumes on library shelves looking for bibliographies of any kind and any age, it is amazing how many have been done, a pantheon of scholarly and literary works now forgotten.
Now imagine the usefulness of a ponderous bibliographical compilation of hundreds of pages of small type printed in the late 19th century (the likes of which will not be produced on paper today) linked digitally to digital versions of the very publications they cite. It is one thing for today’s grand digitization projects to capture millions of publications whose word content can be searched globally, but such projects wholly lack the kind of organized guides that arrange groups of publications—or the grouped content within publications—that can be crafted only (at this time, anyway) by humans who analyze content and context together.

Writing is authentic; that is, it presents one’s thoughts or case the way the writer means them to be. Thus, published works, being what their writers mean them to be, are likewise authentic. The citations of printed works (and by extension also the citations of audio and audio-visual products, for example) convey a mass record of authenticity, too. It is these things, once brought to attention, that can be searched for, recovered, and examined for other purposes, whether for corroboration, self-edification, or to substantiate further points or cases being made.

If one senses here that bibliographies may be read as raw histories of work, one may see as well that historians can derive from them the ebb and flow of the kinds of work that have been done, and why, not just who did them and when they were created. At first glance, it may not seem to be a pleasant prospect, reading and synthesizing citations. But when keeping in mind the great flow of productions and by whom and how often, as well as the topics on which they touch, one may begin to gather in ideas on how areas of writing and research changed. One may also see anew specific points that may have already been homogenized by syntheses in earlier works, and thus find among them points (and the source publications) that are pertinent to a task at hand.

Publications are the memories of experiences, the establishment of goals, a broadcasting of ideas, and the confirmation of accomplishments. Citations of publications preserve the record of work by individuals, organizations, and agencies. Yet a bibliography of publications is only as useful as the resources it cites, though inferentially it comprises the set of citations that meet the purpose for which is compiled. “Comprehensive” bibliographies of course strive to list everything, though few are advertised as “comprehensive”; “selective” ones have no choice but to be subjectively restricted. By referring to and drawing from a bibliography’s citations, readers tacitly understand the bibliography’s limits and reflect their willingness to be guided within those limits. From among what these readers gather up, they recapture and revitalize

---

11 One may point out that printed transcriptions of testimony or spontaneous speeches reflect no reconsideration or thoughtful polishing. Although they are based on unscripted oral communication, offering only the speaker’s raw thoughts, the transcriptions still are themselves authentic, as documentary records.
the usefulness of the publications and reconfirm the purposes for which those publications were produced. If because of a bibliography's limitations readers miss some, or many, pertinent works they may not be faulted. It is incumbent upon the bibliography to try to be as useful as possible to its readers who come upon it, whether it is comprehensive or selective.

This bibliographical project began in September 1974. I had just returned to New Jersey from the second of two summer trips to the Grand Canyon—the South Rim first, in May, then the North Rim in August, including a three-day hike down and up the North Kaibab Trail and a drive to Point Sublime. Its current form, THE GRAND CANON gives little indication of the modest beginning, which was a casual handwritten gathering on index cards, collating publications just pertaining to Grand Canyon geology (I was then a sophomore geology student at Rutgers University). Naturally I had not imagined what the bibliography might become, either in size or in its scope of outreach. In fact, my idea of what bibliographies were was limited to the simple “record”—authors and their publications. It quickly grew into a more comprehensive bibliography of numerous subjects about the Grand Canyon and the lower Colorado River. In 1981 this gathering was published for the first time, and since then it has been continuously available to the public through new editions and continuous updates—in printed volumes, the web, and THE GRAND CANON on disk.

Now, a more perfect hindsight of forty years of gathering lets me see publications and records from many angles. I base this on my experiences in a variety of interrelated careers working in and taking care of scientific, historical and educational research collections and programs, and in scientific and technical publishing. Within these activities I have been immersed in centuries of publications as a researcher, author, editor, publisher, librarian, and administrator. I add to this mix a career as an archivist, which deals with collections of unpublished manuscripts and organizational records that embrace informational, documentary and potential values alike, how readers are guided to them, and how these readers are informed about their content. It is with the addition of this last career—the others having not been left behind—that has led me to realize that a bibliography is itself an archive because of the ways in which it may be arranged and how readers interact with it. In the parlance of archives, it is a “finding aid”, one especially like those that are categorized, although some archivists and other users may challenge this unconventional perspective.

Within the rigorous scholastic methods of modern times, bibliographies have been largely ignored. Those that were viable enough to be worth printing—certainly the
linear yards and meters of old bibliographies that line library shelves are some measure of this—are viewed now as elephantine “lists” stilled by time, their usefulness desiccated. Perhaps most disparagingly, bibliographies may be seen as works that “anyone” can produce—the inference is that bibliographies do not require much creativity and contribute neither to scholarship nor tangibly to one’s career. To a point it is true enough, yet it is a far plunge indeed from the heights, less than a century ago, when bibliographies were dependable, essential, and expected tools of research, some of them rigorously compiled by devoted authorities in various fields of study. There are many reasons for the decline, not the least of which is the dependence on digital resources as the means to locate, collate and interpret information.

The decline, though, began earlier than the digital age, when a newer kind of preoccupation grew among researchers that called for them to contemporaneously “advance” a field of study, even more vigorously than in the times of their academic mentors and forebears. When bibliographies could no longer maintain the kind of currentness needed to keep pace with ongoing research—the result of great numbers of far-flung researchers producing greater numbers of works that were not necessarily widely known—the bibliography’s utility as a research tool relaxed; not totally, as a number of monumental works continued to be produced, but they were fewer. A bibliography, if used, became a tool best used for looking at the past; certainly it was not seen as a source for reanalyzed historical or administrative data. So there was not much call to compile new bibliographies. (There are many exceptions to this summary statement, of course, but they are the result of the dedicated work of individual researchers who themselves felt the need, even the obligation, to produce new bibliographies.)

Coincidentally, during that time when bibliographies declined as recognized tools for research, the duties and performances of archivists gained higher levels of professionalism. But they did not carry forward with them a sense for bibliographies as an equivalent to the finding aids for records and manuscripts. This is the analogy I wish to argue for here, that bibliographies are like archives.

The separation between published and unpublished resources became pronounced as the professions of librarians (bibliographers included) and archivists became better defined and more separate. Then, too, scholarly fields of study, burgeoning with ever larger numbers of researchers, realized even more the primacy of original contributions to academic fields. Among them the importance of the generalism, “publish or perish”, holds sway. Ironically, bibliographies to account for these researchers’ productions may have been more greatly needed because of the huge increase in publications. But the laborious, even daunting, task of accounting for exponentially growing numbers of publications, not to mention the lack of credentialed
rewards for the compilers and the ever-busier lives and careers of potential users, reduced the status of most bibliographies. Only the superhuman efforts of the great Union Lists, such as the six-hundred volume printed catalogue of the Library of Congress, held their place among compilations of publications—but that was because they were extant card catalogues, and the Internet did not yet exist.

As archives became more widely accessible through the development of formalized finding aids, the wealthy realm of primary source materials (manuscripts and other unpublished materials) helped to change the course of research for numerous new students in many fields of study. Bibliographies were recognized only as capturing the resources of the realm of secondary (published) resources. Yet bibliographies can introduce readers to the foundation of research that had been done before them—and can contribute to historiographies dependent upon them. As the twentieth century rolled along, bibliographies were ever more distanced from the course of primary-materials research; their inherent values fell from attention, and most fell into obscurity. The research foundation was not there to allow them to take on any perspective other than the time-honed “list of publications”.

Thoughtful to the needs of readers today and far into the future, archives are dynamic. Unfortunately, a widely embraced misconception of archives is that they are warehouses “stuffed” with files, static, unused except when specific files are delivered to a user, and that archivists deliver and shelve. (This is the same perspective held of bibliographers, who are seen to simply assemble the records of publications for delivery through bibliographies.) Another misconception, repeated time and again even by professional writers and media reporters for its uninformed, theatrical imagery, is that archives are “dusty”, further implying disuse, mystery, and intellectual misery, places of worth only to a few tremendously focused (and stereotyped) researchers. Little more raises the ire of archivists! Good archives are neither dusty nor uncharted nor little used; most are good, accessible, and well used. As with every profession, there are best practices that are followed by archivists. Professionally devised procedures are employed to arrange the collections—importantly, without losing sense of how they were created because that information, too, is useful by informing the researcher how the collection’s creators saw and organized their own records. The resources of archives also provide the means for readers to understand what a collection contains without actually yet seeing it. Guides so produced allow readers to identify materials that may meet their needs; they attract researchers as well as direct them.

Archives are places where their users are introduced to the things that should be consulted for the questions they have about what has been done by others, often long before them. Once these materials have been examined and synthesized, the
researchers may begin to analyze the information contained therein, applying specific interpretations and findings to the project at hand. These readers did not know in advance what they will find once they get into the material listed in the collection guides; they may have been hopeful sometimes, they may even have had preconceived notions, but they did not know certainly. Thus, the utility of archives is only as good as the guides to them (the finding aids). Because so many avenues of approach may be taken in studying a collection, as each user will have a different objective, the finding aids must lay things out in such a way that the reader will discern possibilities as well as tangibles; that is, finding aids are not indexes, nor do they display every conceivable perspective of the content of the collections they describe.

Bibliographies collect and organize facts about the publications they cite; at their most basic, they document that these publications exist, and by their very nature those publications have been produced in multiple, identical copies. Usually, the interested reader does not have to visit a single location to use the material to which they have been led; only in rare circumstances is the material not available in more than one place. Thus we may see that citations of publications, assembled as a bibliography, acquire the core aspects of an archive: proof of record, and notice of availability of resources. Readers are directed to publications that may have raw information or, from numerous sources, information enough to be synthesized for a specific research need.

Sometimes, titles of publications are informative; other times not very much, so there are limits to the usefulness of a simple author-and-title bibliography. In the same fashion an archive’s finding aids describe generalities, leaving the specifics to discovery and unique application by individual users. More ambitious bibliographies will provide added values through categorization, annotations or other interpretive statements beyond the simple citation. Thus introduced, readers can evaluate which items may be needed for a specific project. Other users may “mine” data from the bibliography, another form of use of a bibliography that has been largely overlooked. As such it can be an administrator’s workhorse, too, for a bibliography can present in summary form the works that have resulted from an organization’s or agency’s work,

---

12 I must point out that one use that this bibliography—actually its second print edition from 1990-1993, the Bibliography of the Grand Canyon and Lower Colorado River (see the listing of previous editions)—was to collate some publications data for Stephen Pyne’s How the Canyon Became Grand (see Item no. 2.5257). Remarkably, this was done by hand from the printed volume. The digital, database-format Internet Edition that would be available just a couple of years later would have allowed Pyne to gather such data far more expeditiously. His broad statistical look at some publications still is an example of the value that bibliographies hold beyond the simple “list of publications”.
or which have depended on the areas of administrative oversight of that organization or agency.

Indeed, it is the researchers—and readers of all kinds—who will recognize the value of the portions of a bibliography they see and experience. How they interact with the bibliography determines how it is used by them. Few will use it in its whole, but the whole must be present to await the needs of any user. Without a whole perspective a bibliography depreciates in value as a resource. Thus, a “selective” bibliography (as many state they are in their titles), boasts a subjectively chosen list, probably of the more “important” or “relevant” works, a list presumably thoughtfully derived but still arbitrarily selected and intentionally incomplete. In no case, though, should a bibliography claim to deliver an accounting of “the best” among publications within its purview; it is doomed to antiquity within a generation and should be viewed critically.

Accounting for publications might be carried out for any number of reasons, but primarily, bibliographies are often personal endeavors. A bibliographer’s own interests, whether academic or avocational, will likely be the main reason that a bibliography exists in the first place. Some may be academic ventures related to one’s career, but still conducted largely as a personal venture. Comparatively few bibliographies, at least of any substance, are compiled as a matter of public effort because of long hours and attendant personnel costs. If a functionary within an organization or agency is assigned to track down resources to include in a bibliography, the personal interest may not be as well represented, and the time devoted to the project may be curtailed by administrative contraints. In turn, bibliographies will be used principally by individuals working on specific projects. They might be referred to by workers assigned to certain research duties by organizations or government agencies, but again, these are individual users.

Now the time is right to see bibliographies in a whole new light. They are archival records that hold the documentation of activities carried out by individuals whether professional or avocational, of organizations doing business within the purview of their missions, and of government agencies in the conduct of official duties.

Until the 1981 publication of *Bibliography of the Grand Canyon and the Lower Colorado River* (with also a second edition, *The Grand Canon*’s predecessor) there had been no attempt to create a bibliography of the Grand Canyon–Colorado River region since the Great Depression. And, tellingly, the earlier works were part of larger projects, such as those conducted by the National Park Service to account for published resources within the geographical regions of its administration. They were
products contributed to by the workforce of the great government programs designed to bolster the national labor force, economy and morale. The Depression-era bibliographies were adept, but modest even for the geographic areas and time periods they embraced.13

How the 1981 edition of the present bibliography grew during the four decades following its publication erected a documentary record that is now the Second Edition of THE GRAND CANON. It accounts for (as much as possible) every published work about, or that makes reference to, the Grand Canyon and the lower Colorado River region, from about the Arizona–Utah boundary to the river delta in Mexico. It is not restricted thematically, but is arbitrarily confined within geographical limits (see the frontispiece map). This bibliography is a personal (and volunteer) venture, one enthusiastically supported since 1980 by the Grand Canyon Association as part of its mission of educational and interpretive programs.

I find that a geographic, rather than a thematic, focus catches some readers off guard. By attempting to include everything about a geographic region I have heard disappointment in my having presented “more than is needed”, surely a subjective opinion being that most users are focused on specific areas of study. I even have heard a dismissal of this work: “It has no focus.” Indeed, the forest can not be seen for the trees that block the view!—despite its sectioning into 32 thematic parts (see the separate table of contents just for the bibliography). Yet, the critique is valid; for example, those who study butterflies may be encumbered in the part on biology by the great number of references that deal with fish. So, even within the thematic parts a similarly “unfocused” perspective may be seen. A database with contrived key words or labels will solve the problem, but at the expense of those who need to see the whole. The database will also place the unwitting user at the mercy of the competency of those who contrive those key words or labels, and with inferred assumptions that “everything that is needed” will be brought to their attention. It is, in fact, the user’s duty to ascertain what is pertinent to the task at hand.

As part of the geographic focus, I have had to declare that it is not a bibliography for the “Colorado River” because it restricts its citations to the lower stretch of the river that begins within the monolith of Glen Canyon Dam and runs to the sea. The myriad tendrils of the so-called “Upper Basin”—the Colorado, Green, and former Grand Rivers and their tributaries in Utah, Wyoming, Colorado, and New Mexico—are not included, thus also silent are the multitudes of publications and

13 See especially Florence S. Hellman’s 1935 The Colorado River, with Special Reference to the Boulder Dam (Item no. 1.49); Hazel Hunt Voth and Harold Gill’s 1939 Grand Canyon National Park; a Bibliography (Item no. 1.166); and Volume 2 of the U.S. National Park Service’s 1941 A Bibliography of the National Parks and Monuments West of the Mississippi River (Item no. 1.162).
voices from that vast, historically rich region. Frankly, I had to stop somewhere, and as I am far less conversant in matters of the Upper Basin it was easy to adopt the stone metaphor of Glen Canyon Dam as a northward limit to this bibliography, where conveniently the Grand Canyon’s rocks, features and histories also disappear.

This bibliography accommodates the histories, cultures and activities that play out along the Colorado River from the Arizona–Utah boundary southward. In this bibliography, Arizona-focused users may be disappointed in the great number of citations relating to the Colorado Desert region of California. Grand Canyonists may find the lower Colorado River parts of the bibliography superfluous. Historians of the early Southwest can be distracted by the proliferation of 20th- and 21st-century citations run together with the old ones. Biographers might be buried by avalanches of citations that have nothing to do with the parties they seek. Ecologists probably can dismiss poetry. The poets may wish to overlook audio-visual works. And so on. Turning the page, multidisciplinary workers, and those who study the region of the lower Colorado River on both sides of the river, will view this work less disparagingly; political boundaries are ignored. But once indoctrinated to the scope of this work, all should feel more at ease working around the things that are beyond their immediate focus, while realizing that supporting references may lie herein as well—perhaps some resources to inspire a new line of inquiry, too.

The Colorado River is the vital core of the region. It pierces the landscape without regard either for cultural dynamics or the contrivances of political geography. Of course the river is there in response to the actions and effects of climate and geology. In it and along with it during its run through plateaus and deserts is everything else: rocks, waters, atmosphere, plants, animals and people—and the myriad things people do. This bibliography grasps histories spanning centuries, millennia and eons.

Traditionally, most bibliographies list works alphabetically according to the names of the creators of the items cited, a sensible acknowledgment.\textsuperscript{14} Then, apportioning the citations of a bibliography to different categories according to subject, such as done here in \textit{THE GRAND CANON}, makes some topical sense of the multitude; but obviously it cannot anticipate more specialized focuses of studies and unusual subjects of interest. Ultimately, it is incumbent upon those who enter the bibliography to disassemble from it what is required for the tasks on which they are working. While

\textsuperscript{14} \textit{THE GRAND CANON} now contains 65,000 citations, of which “Anonymous” works approach 10,000; these unsigned items are represented mostly by short articles, news items, and such, which usually are editorially too mundane to have been credited to specific people or agencies, although there are indeed many lengthier items (books, even) that are ascribed the unsigned, “anonymous” authorship herein. Just a hundred or so items are known to have been written under pseudonymous epithets.
it may be the creators who determined the purposes for their publications, it is the reader who determines the usefulness of those purposes. A bibliography aids by calling proper attention to these resources.

I have worked with and around capable and industrious investigators for decades, in many kinds of research collections—study collections of preserved plants and animals, fossil and modern alike, from the microscopic to dinosaurs; rocks and minerals; and books, manuscripts, ephemera and fine art, from the insanely valuable (both intellectually and monetarily) to the most unassuming fragments. I began my careers in the world of index cards and ponderous handwritten ledgers, and now I whisk through an electrified world of digitized documents and databases (though sometimes with reference to the ledgers not far from hand). I have been, and am, a researcher myself, when time and opportunities allow (administrative and mundane affairs intervene at this stage of my career). Yet nothing challenges me more (in the invigorating sense of the term) than locating the resources to make one’s work productive and useful, whether it be my own work or in assisting others who seek to use the collections in which I work.

If there is any one greatest bit of learned advice I share with others with regularity, it is that only the researcher can ascertain what is of use for the work under way. The collection managers (including librarians and archivists) cannot do the “reading” for them, but they can at least introduce researchers to things of which the researcher may have been unaware. Accordingly, a work such as THE GRAND CANON should strive to be definitive, gather everything it can, and present it in such a way that its readers can cull from it the identifying characteristics of materials that promise to be, or suggest they may be, useful. For researchers, the greatest shortcoming is to be not informed.

I have also worked in publishing—technological and scientific, commercial and academic. Having seen what is needed by those who refer to the publications I helped produce allows me to apply the broad idea of users’ needs to the various kinds of collections with which I work. Thinking like a researcher rather than as a custodian is something that is not readily considered by the latter kind of workers (like collection managers, librarians, or archivists). What is best for revealing and promoting the information contained in a collection is not necessarily what the researcher seeks; and what the researcher believes they seek may not be all what they could use. So with no regret I run counter to some of the general principles of curation I have been taught. Instead, I look to the favor of researchers and other actual users of collections. This has resulted in comprehensive gatherings and the dissemination of information, which does not necessarily follow professionally stipulated methods of condensation and selection. Although in most cases there must be a pragmatic compromise between the
two, in some cases there is no substitute for definitive collations, especially when there is no other source. And that is the approach one finds in *THE GRAND CANON*.

What the reader finds in *THE GRAND CANON* is every published work that has thus far been found that relates, in some way large or small, to the Grand Canyon and the lower Colorado River country. The topically organized groups of the bibliography apprise the reader of publications that pertain to cultural, social, literary, technological, scientific, legal, and administrative aspects of this broad geographical region. It brings attention as well to various special-interest areas, such as publications for vision-impaired persons and materials for or produced by youth (youngsters and young adults both). Many uses beyond the bibliographical listings may be preferred, and to this end I provide some ideas in the section on “Ideas for Continued Work”. In these ways, users both individual and organizational may realize any number of value-added products based on *THE GRAND CANON* and its cited publications. Those who see this bibliography as a static list may be pleased with the definitive embrace of its subject; those who assemble from it more utilitarian tools and products will have embraced the bibliography’s mission as an archival record of previous work that documents the regional activities of legions of individuals, organizations, institutions and government agencies. It is one way to make a river, its landscapes, and the knowledges gained from them grander.

**E.E.S.**
January 2015

**POSTSCRIPT**

If I may indulge myself in one further, but predictive, comment. Those with whom I work know that I have spoken of the hypothetical case that future technologies, perhaps not too far in the future, will allow for the “scanning” of entire books without even opening them. This, in principle anyway, is as outrageous as would have been telling our great-great-grandparents about X-ray images of the body, or our grandparents about magnetic resonance imaging. With sufficient computer resources, a three-dimensional image of the interior of a book—its pages, its layers of ink particles on two sides of a page, and the specific properties that convey ink colors—would allow for the reassembly of its contents, even in facsimile. Likewise, folded pages might be digitally opened. Further mathematical approaches would account for warped pages, or even the mathematically complex, crinkly surfaces of centuries-old or damaged papers. The data so captured would allow for the digital re-representation of the book; even its reproduction in hardcopy with some form of what we call today
3-D printing, if one were so inclined. Such technology would make our current
technologies of page-by-page imaging unimaginably clumsy and arcane.

In January 2015—just as the finishing touches of this second edition of THE
GRAND CANON were being made, news outlets reported on the first readings of ancient
scrolls from the Italian town of Herculaneum that were thought to have been
irretrievably wrecked—carbonized—by incendiary gases from the eruption of Vesivius
in 79 A.D.\(^{15}\) The scrolls were excavated in 1752, part of a library in the magnificent
villa that was probably owned by the family of Lucius Calpurnius Piso Caesoninus,
Julius Caesar’s father-in-law. Using X-ray beams, researchers led by Vito Mocella of
the Institute for Microelectronics and Microsystems in Naples, have been able to start
reading individual letters from inside the scrolls without unrolling them. (Unrolling the
scrolls is virtually impossible and, when attempted, highly destructive.) The ability to
do so is made possible by the carbon content of both the carbonized papyrus and the
soot-based inks that were used two millennia ago; the technology itself is X-ray-
computed tomography, much like that used in CT scans of the body.

Who is to say that there will not someday be the means to look inside books—
with their hugely variant paper compositions and inks—in the same fashion? Making
these “book scans” available through bibliographical and other resources might indeed
increase the digital holdings of (and access to) publications by orders of magnitude.

\(^{15}\) For example, see Nicholas Wade, “Unlocking Scrolls Preserved in Eruption of Vesuvius, Using X-Ray
Beams”, The New York Times, January 21, 2015, p. A4. Also posted online at:
http://www.nytimes.com/2015/01/21/science/more-progress-made-toward-learning-contents-of-
erculaneum-scrolls.html?_r=0
THE GRAND CANON is a definitive record of publications about the Grand Canyon of Arizona, its vicinity, and the area bounding the lower Colorado River where it flows through the southwestern wedge of North America. I do not call this a “comprehensive” work because the number of older citations that are continually discovered nullify that claim. At this time the bibliography comprises a categorized listing of 65,000 published items, ample and cursory alike. The citations embrace more than four and a half centuries of international culture, study, reflections, uses, and administrative concerns. They are a means to access and assess literature and data, to lay out for users the resources that may be of use to the readers’ specific needs, and to allow users to compile information for historical or administrative analysis. The citations evaluate neither truth nor worth.

The monographic format of THE GRAND CANON, presented digitally in PDF (Portable Document Format), and the corresponding Internet Edition (A Bibliography of the Grand Canyon and Lower Colorado River, a field-searchable database online, www.grandcanyonbiblio.org), together are powerful tools for academic and casual readers, and for administrative managers in private and public sectors. With them they may identify previous work in general and works that may be pertinent to specific tasks at hand or for anticipated projects. The Internet Edition is expedient; THE GRAND CANON allows more detailed study and discovery. After all, it is incumbent upon those who are doing the work to ascertain what most usefully contributes to their objectives. The bibliography summarizes work and commentary that has been published, of course, but it documents precise citations so as to resolve the kinds of ambiguity that come from mis-citations and foreshortened citations in print, and other misunderstood or misquoted information. It serves also as a base upon which new, extended, and selective resources can be built. The bibliography is thus targeted to a world community of researchers and other readers, and to numerous governmental and administrative entities that exist in the region that it covers. ✤ ✤ ✤
Purpose, Administrative Context, and Utility of This Work

General Remarks
Purpose, Audience, and Benefits
Administrative Context and Perspectives
Utility of This Work
Concluding Note

*THE GRAND CANON* departs from its scholastic foundation as a plain bibliography. It is a definitive documentary on its subject matter, addressing its use to researchers and other bibliographers as always; now also it purposely beckons to a broad spectrum of administrators, resource managers, public-issues advocates, and avocational users. It is a *canon* of the worldwide work of individuals, organizations, and official agencies that relates to the Grand Canyon and the lower Colorado River. In addition to its original academic uses, it is directed now also to non-academic administrative and factual uses; it is no longer simply a compendium of past publications. The overall work further includes some investigations of applications that borrow the term, “Grand Canyon”, as it has been used for other localities on earth and other worlds and as used casually and formally in analogy, metaphor, and neological constructs.

Citations herein are source documentation for official activities, investigative and administrative projects, scholarly studies, activities of private organizations and public institutions, travel and other general pursuits by individuals; as well as personal reports, reflection, and opinion. The citations identify official records, items of directed research and investigations, and things for casual reading. Within 32 subject areas the citations embrace worldwide productions in 65 languages. They address the humanities; social, natural, physical, and environmental sciences; health and safety; engineering projects and water management; administrative oversight; legislative and judicial affairs; concerns of public-interest and special-advocacy organizations; and the interests and activities of indigenous peoples. It is the humanities that comprise the greatest number of publications—including but not limited to history, biography, literature (memoirs, essays, fiction, verse, and so on, including works for and by youth), visual and performing arts, philosophy, and religion; and works of analysis, criticism, and speculation. Publications are in inkprint, special media for the visually handicapped, and audio, audio-visual and digital media. Cited items include all reading age groups and levels of education. Productions have been made mostly as inkprint items but there also are productions in various other media. *THE GRAND CANON* serves current needs for documenting and assessing work published about activities and resources within the geographical area it covers. It provides the base material by
which more in-depth and customized lists may be constructed, as well as providing the foundation for value-added productions and critical overviews.

Geographically, the items listed herein focus first on the physiographic Grand Canyon of the Colorado River, covering some 2,400 square miles, adding to it extensive adjacent lands. Although a few citations pertain to extreme southern Utah, they pragmatically, geographically, or historically relate to their adjacent land in the Arizona Strip, which this bibliography embraces. The second geographical focus of the bibliography is the appendix formed by the lower Colorado River region from the mouth of the Grand Canyon to the sea. The river corridor covered by this work passes along some 800 miles—beginning in Glen Canyon below Glen Canyon Dam, through the lengths of Marble and Grand Canyons, then drifting through several dam-impounded lakes that straddle the boundaries of Arizona, Nevada and California, finally trickling out to sea in the river’s delta, now virtually dry, in the Gulf of California astride the Baja California–Sonora boundary in Mexico. Coverage in the bibliography also includes the dams erected in the Colorado River below Grand Canyon (with particular attention to Hoover Dam), their appurtenant works, and the plans for dams that were to be built in the midst of Marble and Grand Canyons. Coverage also spreads onto lands adjacent to the river, reaches into the tendrils of aqueducts built to quench desert farms and cities, and detours down into the ancient Salton Trough below sea level in desert California that has periodically for ages refilled naturally by Colorado River overflow, and most recently, dramatically, by an accidental breach of the Colorado’s man-made canalworks that flooded unchecked for nearly two years in the early 1900s.

There are good reasons to embrace both the Grand Canyon and the extended lower Colorado River from Glen Canyon Dam to the sea, a region whose parts may be seen as topographically, geologically, ecologically, climatically, culturally, and politically dissimilar. In fact, their human histories ever since prehistoric times and, in written records from the time since the Spanish incursions of the mid-1500s, are entwined. Their natural histories overlap in numerous ways, too, particularly the recent geological history of the Colorado River even though it flows across two distinctly different physiographical provinces of North America. One can investigate one part of the region without having to attend to things that pertain to another area, but complex interrelations reveal themselves as one refocuses broadly or when the region is viewed from multidisciplinary perspectives. To thematically separate the lower Colorado River from the Grand Canyon is done easily; the historical separation, though, is difficult; geologically, environmentally or culturally, even more so. To separate Glen Canyon Dam from the desert Colorado River below Hoover Dam, or to

---

16 See the frontispiece map that delineates the area covered by this bibliography.
separate Hoover Dam from the Grand Canyon upstream, overlooks the dramatic environmental influences these structures have all along the river’s passageway. To separate Native American cultures of the Grand Canyon region from those of the lower Colorado River diminishes traditional interactions and the impacts weighed upon all by Anglo activities over five centuries everywhere in the region. The Colorado River traces human heritages that arose and continue through understanding and participating in life in this land. The river runs through the physical land, delivering life, death, and rebirth in absolute, inspirational and spiritual ways. It holds histories to be discovered and discovered anew, and it seems to withhold answers. So likewise this bibliography—looking at all of this land, and the life, places and things therein, it records the work of thousands; they tell us what we can understand, opine and may never know. Without the whole view, the portions may fade as unessential memories.

This part of the world has given people much to talk about, as the content of *THE GRAND CANON* testifies. Those who are drawn here, whether residentially, recreationally, professionally, avocationally, economically, administratively or spiritually, can find uses in this bibliography, a mixture of vital and casual works. Items are written by, and aimed toward, greatly different audiences of all ages, who represent socially, culturally, scientifically, technologically, and temperamentally different communities and times, worldwide. In the present day, users of this bibliography—administrators and resource managers, workers in special-advocacy organizations, researchers in numerous fields of historical, scientific, and literary study, and general readers alike—will find here items that hold documentary, evidentiary and historical values, though the quality and overall usefulness of individual items and their values vary substantially and subjectively.

The works cited here were created by administrators, public-issues advocates, politicians, lobbyists, jurists, travelers, scientists, students, philosophers, clerics, entrepreneurs, employees, civil servants, and professional and lay writers, poets, artists, composers and thinkers from cultures, organizations and nations around the world. Some are people indigenous to the Grand Canyon region; most are wayfarers, transients, and observers from afar—great, notable, every-day, overlooked, and anonymous alike. The opinions, observations, censuses, consensuses, interpretations, and results are those of citizens and foreign nationals (adults and youth alike); the heads, agents, and representatives of governments (both American and foreign); and private, commercial, not-for-profit, professional, and spiritual organizations (again, American and foreign)—a melting pot of constituents, visitors, agendas, perspectives, philosophies, faiths, educational levels, and age groups.
PURPOSE, AUDIENCE, AND BENEFITS  

*THE GRAND CANON* provides a long-term record of publications, to be used by researchers, public servants, resource and public-issues advocates, and interested citizens wherever they may be. Compiling this document is a contribution to the stewardship of the Grand Canyon and the Colorado River, thus it is also a contribution to cultural resources of the world.

Completing the first installment of the Internet Edition of this bibliography during the autumn of 1999 coincidentally marked the 25th anniversary of the start of the Grand Canyon–Colorado River bibliographical project. *THE GRAND CANON* coincidentally marked the 30th anniversary of the first published edition by a test release, in 2011; and this second edition comes on the 40th anniversary of the start of the entire Grand Canyon–lower Colorado River bibliographical project, in September 1974. *THE GRAND CANON* is the authoritative, arbitrating version of the bibliography, upon which the continuously updated Internet Edition is based.

*THE GRAND CANON* is the evidentiary and cultural record of the activities of individuals, organizations and official agencies historically since 1539 and in print since 1542. That body of work relates in some way to the geographies, histories, and sciences of the Grand Canyon of Arizona and the reach of the Colorado River from the lowest section of Glen Canyon, through Marble Canyon, through the Grand Bend of the Colorado where it leaps through and out of the Grand Canyon, and dallies more warily through the Colorado Desert, pausing for the work of dams, to the river’s delta in the Gulf of California in Mexico; and there it sniffs the salt air and dies. Culturally, *THE GRAND CANON* also is the record, through modern studies, of human presence in this region since prehistoric times; and geologically, it is the intrinsic record of the land itself since time immemorial. As such, *THE GRAND CANON* cites publications that broadly document human perspectives, understandings, interpretations, activities, and uses of the resources in this landscape; aesthetic, philosophical, and tangible alike.

Of all of the items individually listed herein, each was produced in multiple, identical copies. One or another of these copies is available to interested parties somewhere, though pragmatically some items may stubbornly elude rediscovery or will be difficult to access because of a scarce number of originals, sparse distribution, lack of digital reproduction and access, or losses due to any number of reasons. Such limitations are, however, beyond the documentary purpose of the bibliography— with one notable exception, that of the entire run of a book, all but one copy, lost due to theft before it was distributed\(^\text{17}\) (though it was reprinted in a different format).

The purpose of *THE GRAND CANON* is to serve as a public collection of information that collates data about printed publications, audio-visual works, and published

\(^{17}\) Item no. 2.8541 (T. F. Dawson).
digital products. Within broad guidelines it includes everything that (in whole or in part) pertains to, or mentions in context, the Grand Canyon or the lower Colorado River. The material cited stops short of incessant newspaper listings and ephemeral Internet resources (see additional comments in the Excluded Items section herein). There is no other informational source like THE GRAND CANON, nor even anything truly comparable for any other landscape or real estate overseen by the National Park Service and other government agencies (see a separate study of this the 1st edition of THE GRAND CANON). It is built around a standard, monographic bibliography that now is electronically searchable. Divided into 32 categories by subject, it is the only categorized reference list about the Grand Canyon and the lower Colorado River.

The Internet Edition of the Grand Canyon–Lower Colorado River bibliography was different from an edition in the usual sense because, for the first time for this bibliography, the online version broke the binds of print. That was a leap of faith by everyone involved—compiler, publisher, and users. Most striking of that edition is the fact that there is one location for the bibliography, accessible by all who have access to the Internet. Each user will have a specific purpose for looking at it, but, unlike the print editions, no one will experience it in its entirety. And further, the Internet Edition has been updated frequently since 2000, allowing for hundreds of new, unstated “editions” within itself without the encumbrance of physical media.

Compared to its predecessors in the print medium, the ways in which the online bibliography is used was a dramatically new experience. There will, however, always be the need to browse; many people prefer to work that way. It is still the best way to locate everything of special and peculiar interest, by bringing attention to issues and topics that otherwise might be overlooked in a historical retrospective or administrative accounting of activities. But the Internet Edition immediately gave users the ability to search, sort and extract electronically, too, something previously impossible using the “hard copy” editions.

THE GRAND CANON recreates the format of a printed monograph. This is by design, in the event that it becomes the only surviving, current version of the bibliography. It contains hyperlinks, too, so that computers utilizing web browsers can provide the means to migrate between different parts of the document while that technological ability survives; but the hyperlinks are not necessary to the overall structure of the bibliography nor are they needed to access all of the citations. The bibliography still functions perfectly as a resource even if the hyperlinks are not active.

In a sense, the resources of the geographical regions embraced by THE GRAND CANON embody intangible cultural heritages. This reflects the preservational activities of such world bodies like the United Nations Educational, Scientific, and Cultural Organization (UNESCO), which seeks to safeguard those heritages on behalf of
indigenous peoples and world communities. UNESCO’s 2003 Convention for the Safeguarding of the Intangible Culture Heritage further strives to raise an awareness and appreciation for heritage at local, national and international levels. The convention focuses on the human aspects of cultural heritage (including oral traditions, performing arts, social practices, practices concerning nature and the universe, and craftsmanship). An analogous consideration of these efforts may see the Grand Canyon and Colorado River as the bearers of heritage and the stage for cultural practices; and indeed, the Grand Canyon itself is recognized as a World Heritage Site. There is extensive documentation of all of these aspects of culture in thousands of individual and organizational publications. THE GRAND CANON preserves this evidence.

The many parts of THE GRAND CANON ensure that administrators, scholars, students, and the general community within the American nation and among its indigenous peoples, and around the world, retain a permanent documentary record of ideas and work about the Grand Canyon and Colorado River. These ideas and findings have been made available through widely distributed publications and through productions with channels of limited distribution. Many are works of creativity and thoughtful reflection; many more are casual notes and comments. Others come from hard and studious research. And still others are derivatives of judicious evaluation and decision by government and other official agencies, or as the result of studies of policy options and officially sanctioned projects and investigations; and from legislative and judicial mandates. To these add as well critical evaluations and opinion of each, whether official or from an engaged citizenry.

One area of personal studies that often is overlooked in the great body of work of the humanities and sciences is genealogy. Whereas citations of purely genealogical works are rare in this bibliography, the panoply of authors’ names and of individuals addressed as subjects in these works may contribute to the sources sought by genealogical workers.

Only a user is in a position to recognize things that are pertinent to his/her task. It is easy to perceive here a huge, occluding nebula of impertinent works when one’s focus on a project is pragmatically narrowed by time and budgetary constraints, with the expectation of finding just certain shining stars, the perfectly fitted answers to the questions at hand. But one project will be very different from the next one. For THE GRAND CANON to retain its value to all users and purposes, it is created as comprehensively as possible, though by default it is only a definitive work. It will be used for an inestimable, probably lengthy yet finite, time by some historians, biographers, ethnographers, archaeologists, sociologists, biologists, ecologists, geologists, genealogists; in fact, any focused topical reader, whether they be administrators, advocates, students, professionals, the passing curious—or even those
rarely encountered individuals who are infatuated with bibliographies: bibliographiles. The most time- or budget-conscious users, like administrators, actually may not use the bibliography except in the most pragmatic summary form or for statistical compilations, but research tasks they may have assigned to their staffs will in turn result in those staff being more informed about the details of this work and the material that is generally available. In this sense it will be very useful toward locating sources that address administrative issues and needs over the entire period of time that work has been conducted in these regions.

**ADMINISTRATIVE CONTEXT AND PERSPECTIVES**  

The Grand Canyon has long been acclaimed as one of the unofficial Seven Wonders of the Natural World (sometimes homogenized simply as Seven Wonders of the World); even distinctly the “eighth wonder of the world” according to 20th-century Swedish adventurer Sven Hedin,\(^\text{18}\) and surely it is the first wonder to many aficionados of this land. The Grand Canyon and the Colorado River are recognized as having significant historical, cultural, geological, and biological resources. Grand Canyon National Park’s own “themes”, as generally outlined by the park in a 2011 “Park Themes” document, are “inspiration”, “water”, “geology”, “biology”, “preservation”, and “Native American connections”.\(^\text{19}\)

The Grand Canyon and surrounding areas have been accorded numerous official designations relating to cultural, historical, and other areas of significance. Grand Canyon National Park has been designated a World Heritage Site. In a UNESCO-assisted arrangement, the park and the Yuntaishan World Geopark in Henan Province, People’s Republic of China, established a sister-park relationship to pursue beneficial projects of technical and professional cooperation. The village of Grand Canyon, Arizona, is a National Historic Landmark District. A number of the structures there are individually designated National Historic Landmarks and more are listed in the National Register of Historic Places. The North Rim community is also a National Historic Landmark District. The Arizona Trail, a National Scenic Trail that travels from the international boundary with Mexico to the Arizona–Utah boundary, crosses the Grand Canyon on two of its most historic trails and passes through the Kaibab National Forest. Other human-made productions within the areas covered by

---

\(^{18}\) Item no. 2.11947. Later writers have also used the “Eighth Wonder” tag.

\(^{19}\) Item no. 13.2783 (U.S. National Park Service, Grand Canyon National Park).
and architecture, among other accords. Commemorative markers of all kinds abound throughout the region, on, by and inside structures, and along highways, walkways, and footpaths.

Efforts to designate the Grand Canyon as a national park began in 1882, when an unsuccessful federal proposal was made during the year when first appeared Clarence Edward Dutton’s magnificent text and atlas, *Tertiary History of the Grand Cañon District*. It was not for another decade that some measure of executive or statutory reserve was accorded to part of the canyon. In 1893 President Benjamin Harrison signed into existence the Grand Canyon Forest Reserve that protected a portion of the eastern Grand Canyon. In 1906 President Theodore Roosevelt established the Grand Canyon Game Reserve, enacting official protection of the wildlife there; then in 1908 he set aside the Grand Canyon National Monument by executive order. After several years of proposals in the United States Congress, and after the National Park Service was established in 1916, Grand Canyon National Park was created in 1919 (*40 Stat. 1175*). It was substantially increased in area to its present size in the Grand Canyon National Park Enlargement Act of 1975 (*88 Stat. 2089*, Public Law 93-620), embracing Marble Canyon and the western Grand Canyon exclusive of the Hualapai Indian Reservation.

Within the broader scope of *THE GRAND CANON*’s coverage of published works are found various other national monuments, recreation areas, and other federally designated lands and reserves. Most prominent among them are the Vermilion Cliffs and Grand Canyon–Parashant National Monuments, Kaibab National Forest, and Glen Canyon and Lake Mead National Recreation Areas. Also sharing boundaries with Grand Canyon National Park are the sovereign tribal lands of the Navajo Nation and the Havasupai and Hualapai Tribes, although other, geographically more distant tribes have cultural ties to the Grand Canyon.

So many official acknowledgments of cultural, natural, or technological significance pale against the intangible measure of popular acclaim. The Grand Canyon in particular, but also its surrounding lands and the lower Colorado River, have ever since the mid-19th century been in the top numbers of remarkable landscapes; remarkable for their aesthetics, topography, geology, ecology, history, and cultures. For more than a century a statement of encouragement by President Theodore Roosevelt has been quoted in popular, scholarly, and administrative venues.
Principal Federal Administrative Units of the Grand Canyon Region

(U.S. National Park Service)
In a speech at the Grand Canyon in 1903 Roosevelt said that the canyon is “one of the great sights which every American, if he can travel at all, should see.” And for those who cannot travel there—today this may include an interested worldwide clientele as well—there are innumerable books, travel guides, magazine articles, and audio-visual productions about the canyon and the river that bring the marvels into homes and classrooms, and through Braille and other tactile productions literally into the hands and minds of readers. In fact, even at the time when Roosevelt spoke to an assembled crowd in the fledgling village of Grand Canyon there already were large numbers of books and, particularly, articles about the canyon—not to overlook also travel advertisements galore.

The Colorado River in the Grand Canyon, in addition to falling under the purview of the National Park Service within the national park boundaries, is administered under other agencies of the U.S. Department of the Interior in the national recreation areas immediately up- and downstream of the national park. On the rims, neighboring landscapes and rangelands are also administered by the Interior department’s Bureau of Land Management. Immediately adjacent to the south and north, too, are the national forest lands administered under the U.S. Department of Agriculture’s Forest Service. Within Glen Canyon National Recreation Area the Interior department’s Bureau of Reclamation operates Glen Canyon Dam, the functions of which affect cultural, biological, and geological resources downstream in Marble and Grand Canyons. Accordingly, various protective legislations have been implemented in this part of the corridor, which partly direct how the dam’s power production facilities are operated. Multi-state compacts and international treaties (with Mexico) regarding water supply and use, dating as early as a century ago, further influence dam operations today throughout the Colorado River basin. During 1983–1996 (including phasing-in and -out periods), the U.S. Bureau of Reclamation conducted the Glen Canyon Environmental Studies (GCES) program, which, with the cooperation of other agencies and commissioned studies passing through two principal administrative phases, conducted the first truly comprehensive series of investigations in the Colorado River corridor relating to hydrology, fluvial geomorphology and sedimentology, resources of biology and physical ecology, and archaeology; all as contributing to the Environmental Impact Statement pertaining to the operation of Glen Canyon Dam. The Glen Canyon Dam Adaptive Management Program, also under the auspices of the Bureau of Reclamation, currently cooperates in the management of the dam with more than two dozen other stakeholders including

---

20 See entries for Roosevelt (1903) in Part 2 of bibliography. See also Item no. 2,5479 for a transcription of two versions of Roosevelt’s speech at Grand Canyon.

21 See Part 20 of this bibliography. Research documents and legislative materials pertaining to the GCES program and its activities will be found throughout THE GRAND CANON.
Native American tribes. The science-information provider for the Adaptive Management Program is the Grand Canyon Monitoring and Research Center, which had phased in at the end of the GCES program under the auspices of the U.S. Geological Survey, another Department of the Interior agency. Immediately downstream from the national park the Bureau of Reclamation operates Hoover Dam within Lake Mead National Recreation Area; its impoundment backs up into the national park in the western end of the physiographic Grand Canyon, which had affected the hydrological and ecological regimes there long before modern politically and socially organized responses to environmental concerns. The dams and their appurtenant works in the lower Colorado River are likewise operated by Reclamation. Farther downstream a variety of federal, state and local agencies line the Colorado River with recreation areas, wildlife refuges, natural resources areas, and public parks. In Mexico, the Colorado River (or at least its remnants) eventually passes into the Reserva de la Biosfera Alto Golfo de California y Delta del Río Colorado that embraces the northernmost portion of the Gulf of California, its southern boundary approximately spanning the gulf between San Felipe, Baja California, on the west and Puerto Peñasco, Sonora, on the east.

A significant portion of the Grand Canyon and the lower Colorado River corridor is administratively overseen by federal and state governmental agencies of the United States and Mexico, and by the tribal governments of indigenous peoples. Accordingly, THE GRAND CANYON aids these and other groups with its unique accounting for published research and reference materials that are available specifically about this linear region; and perhaps even more importantly it serves as a documentary record, international in scope, of the work done on, and the perspectives held of, the lands, waters, airspaces, resources, and human needs that are administered or protected by these agencies.

The administrative units with oversight of lands in the Grand Canyon–lower Colorado River region fall within different departments of the United States, Mexican, and Native American tribal governments. They can be noted in summary order as one passes through the geographical range of this work from the Arizona–Utah boundary to Mexico; and together they demonstrate the interlocking political and cultural characteristics of the region. The principal units are Glen Canyon National Recreation Area, Grand Canyon National Park, Vermilion Cliffs and Grand Canyon–Parashant National Monuments (both of which also are in the Bureau of Land Management's National Landscape Conservation System), Kaibab National Forest (portions of which occur both north and south of the national park), Bureau of Land Management acreages, Lake Mead National Recreation Area, Bureau of Reclamation facilities, Bureau of Indian Affairs, federal and state wildlife refuges, and Mexican national
interests; and throughout there are the sovereign lands, agencies and interests of Native American nations, tribes, and cultural groups. Near to the Grand Canyon there is also the formally established Little Colorado River Navajo Tribal Park in the Navajo Nation that abuts the eastern end of the physiographic Grand Canyon. In the western portion of the Grand Canyon the expansive Hualapai Indian Reservation occupies the southern side of the canyon. While the Hualapai Tribe has not designated tribal parks, they do operate a commercial tourist enterprise known as Grand Canyon West, a name that has since given this part of the Grand Canyon separate, de facto geographical status. On the Kaibab Plateau north of the canyon the Kaibab Squirrel National Natural Landmark spans the boundary between the national park and the Kaibab National Forest; and the U.S. Federal Highway Administration’s ceremonially designated Kaibab Plateau–North Rim Parkway (Arizona Route 67), a National Scenic Byway, guides travelers through a cultural and ecological scenery of significance along the way to the tourist community of North Rim on the brink of Grand Canyon. The region embraced by THE GRAND CANON also includes federally designated natural and wilderness areas and, along the lower Colorado River, wildlife refuges, including those of the Salton Sea region in California. In the river delta region of Mexico there are the Upper Gulf of California/Colorado River Delta Biosphere Reserve and the Pinacate/Gran Desierto de Alta Biosphere Reserve. To all these add the stakes of state agencies in Arizona, Nevada, California, Baja California, and Sonora, and local agencies in every city, town, and community of the area; as well as the rights accorded to commercial enterprises of all kinds and private-property owners. And to apply a broader oversight to all, add the legislative and judicial branches of governments that influence activities, holdings, and accountability, ranging from international treaties to federal and state regulations and local ordinances.

Even now there is a wholly new kind of administrative entity proposed for the greater Grand Canyon region; not one environmentally or culturally defined per se, but an administrative entity that would be created so as to protect the inherent environmental and cultural aspects of the land—on its surface and subsurface alike. This is the proposed Grand Canyon Watershed National Monument, which would proactively defend the regional aquifers and attendant environmental conditions on the surface from adverse impacts of human activities such as mining. Little more can be said at this time, as it is simply a grass-roots proposal upheld by some individuals, organizations, and American Indian tribes.

Much of the physiographic Grand Canyon is overseen by the U.S. Department of the Interior, particularly the National Park Service, but within the broader region covered by the citations in THE GRAND CANON there is a conglomerate of federal departments and agencies that have oversight over adjacent lands, waters, and
airspace. These include, but are by no means limited to, such diversely different government branches as the Bureau of Land Management, the Bureau of Indian Affairs, the Fish and Wildlife Service, the Federal Aviation Administration, and (on navigable inland waters) the U.S. Coast Guard. In addition, areas are overseen by state and local agencies, the people and governing agencies of Native American tribes, and various not-for-profit and for-profit organizations. Some areas are private inholdings like ranches, mines, and tourist enterprises. A few properties have been turned over to federal jurisdiction or given to the care of not-for-profit organizations. Incidental events also are overseen by federal agencies, such as National Transportation Safety Board investigations of air and highway transportation accidents.

Eleven federally recognized Native American tribes have historical and cultural connections with the Grand Canyon. The administration at Grand Canyon National Park in particular, as well as those of adjacent national monuments and national forests, hold formal inter-governmental consultations and have executed with tribes individual agreements that pertain to land and resource uses and protections on the federal lands:

- Havasupai Tribe, Havasupai Reservation (Arizona)
- Hopi Tribe (Arizona)
- Hualapai Indian Tribe, Hualapai Reservation (Arizona)
- Kaibab Band of Paiute Indians, Kaibab Indian Reservation (Arizona)
- Las Vegas Tribe of Paiute Indians, Las Vegas Indian Colony (Nevada)
- Moapa Band of Paiute Indians, Moapa River Indian Reservation (Nevada)
- Navajo Nation (Arizona, New Mexico & Utah)
- Paiute Indian Tribe of Utah
  - Cedar Band of Paiutes, Kanosh Band of Paiutes, Koosharem Band of Paiutes, Indian Peaks Band of Paiutes, and Shivwits Band of Paiutes
- San Juan Southern Paiute Tribe (Arizona)
- Yavapai-Apache Nation, Camp Verde Indian Reservation (Arizona)
- Zuni Tribe, Zuni Reservation (New Mexico)

Within the lower Colorado River region there are many more Native American tribes whose traditional and legislatively administered lands abut areas that are the focus of this bibliography, although these people do not have the same cultural identification with the Grand Canyon as do those to the north and east of them.

The apportionment and use of waters of the Colorado River is the result of a complex legislative and judicial history of negotiated regulation and responsibilities among the seven U.S. states within the Colorado River basin—Arizona, California,
Colorado, Nevada, New Mexico, Utah, and Wyoming—and through treaties ratified by the legislative bodies of the United States and Mexico. Concerns and usage variances go back more than a century, but which were first formalized nationally in the Colorado River Compact of 1922, which remains the principal document of domestic guidance among the seven cosigning U.S. states. National and international responses to natural and human-caused changes in water supply, water quality, and overall environmental conditions, have also dramatically affected interstate and international relations, beginning with devastating breakouts of the Colorado River after the turn to the 20th century, the result of failed levees, which allowed the river to flow unimpeded to the ancient lakebed of the Salton Trough. This came on the heels of a smaller, natural breakout that had occurred in the early 1890s. The outbreaks poured into the basin below sea level, now called the Salton Sea, where a geological history of river outbreaks was recorded in extensive salt flats. Since then, the means of water usage within the United States’ portion of the Colorado River basin has resulted in increases of salts and pollutants from irrigation waters taken from and redrained to the river, so Mexico now receives a far more brackish content of river water in greatly diminished flows. The desiccation of the Colorado River delta affects human cultures and the natural habitats of animals and plants. Now, too, we begin to face physical, economic and culturally debilitating, and politically challenging, effects of a natural return to more usual climatic conditions of protracted drought throughout the Southwest—nature ignores negotiated, legislated, and adjudicated schemes of apportionment.

The greater Grand Canyon region, and by extension the lower Colorado River corridor that begins within the Marble–Grand Canyon complex, is an arena of human interaction unto itself, affected by decisions and private uses made by its various administrators and owners; from environmental surveys to the surveys for dams, from the inventory of biological resources to the productions of mines. Into this region have come, for innumerable reasons, millions of new residents, and hundreds of millions of passers-by of all ages. A relative few of them have left written records of their impressions through exhaustive and casual publications alike, expounding on what they did or found there—in prose and verse from global commercial presses, government printers, and the smallest private concerns; in recorded impressions of music, sung and instrumental; in photography, still and motion-picture; in artistry through painting, drawing, and sketching; in maps of all scales, purposes, and accuracy; and in the tenuous medium of computer software.

While THE GRAND CANON lists numerous materials that relate to legislative acts, judicial decisions, and other official activities, it is not yet either comprehensive or definitive enough to declare that it preserves a conscientious, continuous record of decisions, policies, historical precedents, or technological procedures. Similarly, it is
not a perfect record of avocational activities of citizens and visitors. Neither is it a listing of unpublished resources, the traditional trove for historians and litigants. And for the time being, there is no central source for the interdisciplinary needs of managers, researchers and other readers who have responsibility for, or who work in, the regions covered by *THE GRAND CANON*, although by default this work serves partially this function.

*THE GRAND CANON* can stand both as resource manager’s reference and a resource for interpretation and education. It does not figure into Grand Canyon National Park’s “Foundation Statement” prepared in 2010 because the bibliography is not a National Park Service product nor sponsored by the Park Service; it is sponsored by the not-for-profit Grand Canyon Association, which cooperates independently with the park in educational, interpretive, and other outreach programs. The bibliography stands responsibly and responsively as it has for four decades. It constantly grows and is available to a world community of professionals and avocationists. It documents for all responsible interests the quantity and quality of human attention to the Grand Canyon–lower Colorado River region.

*THE GRAND CANON* further serves as a broad statistical base, from which evaluations and accountings of selected subjects, topics, or authors can be made. A chronology of any of these can likewise be ascertained by using this document. As for its administrative value, the citations herein direct users to pertinent works that are available to answer questions. In this fashion it provides the information to administrators who require an understanding of the scope and content of work that has already been done. Administrative key-point lists can focus resource managers on sources, arranged topically, that will be of greatest utility in understanding what kinds of previous research is more readily accessible, and to expose underserved or inadequately noted areas of attention.

Management and research issues continually change and refocus, as do public responses to and opinions on these issues. These in turn create new productions that pertain to this work. Lay productions about the Grand Canyon and the Colorado River follow a similar path, responding to official sanctions and decrees, or follow new paths and revisiting old ones to describe and reflect upon human emotions and needs that relate to these regions. Whereas research and reflection can and do change, the mission of *THE GRAND CANON* is not to anticipate and refocus such work, but to provide source lists for informed guidance in the work of administrators, academics, and any variety of private groups and individuals.

**UTILITY OF THIS WORK**  
While various bibliographies and reference lists for the Grand Canyon or the Colorado River had been compiled during the 20th century by
individuals and official agencies alike, they restricted the listings to principal works then available and noticed, resulting in predictably similar, albeit updated, products. None of them contained a comprehensive accounting of the profusion of periodical articles, although a few took notice of selected early items.

When Grand Canyon National Park was created in 1919, the Director’s report for the National Park Service that year included a “Bibliography of Books, Government Reports, and Magazine Articles on Grand Canyon National Park”—five pages containing 96 citations. This represented the official’s perspective of pertinent, available literature at the time when the Grand Canyon was made a national park. In some respects it is a microcosm of THE GRAND CANON in that it contains general, scholarly, and fictional works, books and magazine articles alike; but it differs in that all are in English. There is also no indication of how these items were selected; one may presume these were what was at hand or suggested to its compiler.

From the standpoint of administrative uses in the region covered by THE GRAND CANON, managers in federal and state units and agencies have had no open, definitive source to things that have been done within their jurisdictions other than the official and working reports generated by their administrative entities. In the general and professional literature both there is a tremendous amount of observation and opinion regarding the units these administrators and managers oversee, who often work at a disadvantage when required to manage disciplines with which they or their delegees may be less familiar. While often there may be insufficient time for exhaustively detailed analyses, a perspective of previous work can be gleaned from compilations like the present document, which may thus provide for these managers greater interpretive insight.

No comparably robust accounting of publications exists for any unit administered by the National Park Service, the National Forest Service, or other federal and state public-lands agencies. In fact, the only listing that approaches this one in size and content was the Greater Yellowstone Bibliography (GYB) online, hosted by the University of Wyoming Libraries, which apparently is no longer available online. However, the content, structure, and utility of the Yellowstone production differed greatly from THE GRAND CANON. Thus THE GRAND CANON is a unique, utilitarian

---

22 See Item No. 1.259 (Anonymous).
23 See the First Edition of THE GRAND CANON (pp. 298-299) for a detailed comparison of the two bibliographies. GYB was last accessed by me at http://www-lib.uwyo.edu/db/ynp/ (1 April 2012), but when revisited 28 May 2013 it was not found, nor was it anywhere on the University of Wyoming Libraries website. GYB had contained nearly 29,000 citations, though as a database it was not in any way visible as a contiguous, browsable whole. When it was last accessed it had not been updated in more than a decade.
research tool for administrators and for scholars like historians, scientists, and biographers, even other bibliographers. That it embraces now six different centuries, 16th to 21st, testifies to a long play of human affairs.

The 16th to 18th centuries in this region recorded human interactions in a geographically far-flung but sparse field of publications, focused on the lower Colorado River, produced by international parties with interests in the region. The 19th century saw the first sponsored explorers in three centuries spanning the region, discovering again the Grand Canyon. Later in the century came an inflow of scenery entrepreneurs, and scenic and cultural investigators among geologists and geographers, archaeologists and ethnographers, biologists and nascent ecologists—and a few permanent residents and curious, hardy travelers, who were the harbingers of throngs of tourists. The 20th century bore the infusion of greater permanent and transient populaces, and all manner of specialized researchers, in the humanities and sciences mostly. Plans for, and partial implementation of, a series of dams throughout the Colorado River basin brought beneficial and damaging effects to culture, environment, and administrative practices—not to overlook the positive and negative effects on the quality of life in general, including tourism, the irrigation of farms, and the safeguards of air quality and silence to mention just a few aspects. Thus far focuses in 21st century have generally shifted away from large-scale investigations to specialized, often short-term projects and, in the areas of water-management, increasing concerns over drought, climate change, and water apportionment.

Predictability and unpredictably, what happens in one part of the region affects something in another. For example, were it not for the tremendous efforts to irrigate farms in the American Southwest beginning in the late 1800s, implementing flood control in the lower Colorado River and realizing growing needs for widespread electrification in the 20th century, the drive during the mid-1900s to build dams that promised to flood the inner Grand Canyon was devastated by the power of public opinion. (To these one may add many poorly organized plans from the turn to the 20th century, which proposed relatively meager power production dams for areas inside the Grand Canyon, including Diamond Creek, Havasu Creek, and Bright Angel Creek.) Historical cause and effect is of course viewed in retrospect; the concept applies likewise to any region in the country or in the world. But overarching, current, multidisciplinary bibliographical accounts for specific areas are scarce, thus there is an argument for saying *THE GRAND CANON* occupies a unique *utilitarian* position within its scope of political and physical geography.

While activities and natural occurrences in the upper basin of the Colorado–Green Rivers of Utah–Colorado–Wyoming have clear impacts upon the lower basin and the greater Grand Canyon region, *THE GRAND CANON* judiciously excludes that
northerly part of the Colorado Plateau due only to my limitations of time, experiences and learning. Except in the area of water management and its thicket of legislative, legal, environmental, and cultural entanglements, the exclusion of the upper basin from THE GRAND CANON does not detract from the utilitarian value of the work. Even so, many of the water-management works cited herein do by their nature embrace the entire Colorado River basin, although such works are cited because they pertain to the lower basin.

Inasmuch as new citations continue to be added to this document—publications finished years ago as well as new ones—it is a work never finished, never absolutely comprehensive. Its strides toward comprehensiveness are made because it is a product that cannot anticipate what will be of interest or use to any user, today or a century or more from now. To repeat Louise Hinchliffe’s observation of the 1981 edition of this bibliography (see below), it must include both “treasures and trash”. It is my personal experience, as a researcher, as a librarian and archivist, and as an administrator, that once the assumption is made that “routine” or “redundant” items of research materials, having no enduring “useful reference purpose” or that will not be relevant to most anticipated kinds of queries, will soon enough be precisely the kinds of works called for by at least one researcher. And even things that may normally be deemed to be “out of scope” to a researcher’s current inquiry may have unexpected application or perspective on the inquiry, something which only reader–researchers will recognize. So for them as well as for overarching administrative needs THE GRAND CANON is definitive. And administratively, having such a resource in hand is a documentary support point for funding requests, for establishing work assignments, and for project challenges and to itemize accomplishments.

The burden of determining what is useful resides with the user. But what is available to the user is a decision that sits with those who have custody of that material. The custodians also must establish what is fiduciarily effective and responsible in response to an agency’s official responsibilities or institution’s mission, which purposes lie with the current administration that oversees the custodians. While this breakdown of perspectives and responsibilities are pragmatic, there are bound to be some aspects that fail the needs or expectations of one party or another. In any case, what is practical to keep or maintain may be at odds with what is useful to some potential users.

In the case of a reference work like THE GRAND CANON, preserving the intellectual asset contained therein is the same as respecting “collective memory”. Admittedly, some titles cited in this bibliography may be in scarce numbers and will be very difficult to locate if one needs to see a copy. Nevertheless, the object of THE GRAND CANON has been to provide a total accounting—a documentation of as many created
materials as can be found—regardless of rarity or convenience of access. This is meant to be, item by item, a definitive listing for scholars, administrators, and general users for any reasons they may have to use it.

An added utilitarian aspect of *THE GRAND CANON* is the addition of special sections on investigations into other uses of the term “Grand Canyon”. As a world wonder, the nominal attribute, “Grand Canyon”, has been copied and rephrased for hundreds of other locales, on Earth and on other celestial bodies. In some fashion, formally or much more often informally, these places are called “The Grand Canyon”, the “Grand Canyon of” a certain place, and variously as “another” Grand Canyon; occasionally even there are “grander” and “littler” canyons. By far most of these other nomenclatural grand canyons pass beyond the purely bibliographical purpose of *THE GRAND CANON* because a majority are extracted from Internet websites that otherwise are excluded from the bibliography; and for that reason, too, individual citations are omitted (see more in the respective introductions to these special compilations). However, they comprise a unique perspective of the extenuating powers of impression that the Grand Canyon has conveyed ever since the first “other” Grand Canyon was named, the Grand Canyon of the Yellowstone. Moreover, the Grand Canyon’s overwhelming attraction to comparison is wealthily displayed in the associative and creative traditions of analogy and metaphor; a separate listing herein itemizes many examples, likewise from published literature but chiefly from web-posted material. I believe that it is imperative to capture these numerous uses, at least in summary form, and complete lists are appended to the end of *THE GRAND CANON*.

**CONCLUDING NOTE**  
In her Foreword to the 1990 second edition of *Bibliography of the Grand Canyon and Lower Colorado River*, former Grand Canyon National Park librarian Louise Hinchliffe observed, “while a librarian’s budget or biases may limit accessions to ‘worthwhile’ books, the conscientious bibliographer must record impartially both treasures and trash, the enduring and the ephemeral”. Many bibliographies offer up things that are “worthwhile”, of course. For example, within the scope of this bibliography there are Francis P. Farquhar’s classic 1953 *The Books of the Colorado River and the Grand Canyon* and its half-century sequel by Mike S. Ford, *The Books of the Grand Canyon, the Colorado River, the Green River and the Colorado Plateau, 1953-2003*, both of them “selective” bibliographies, which together fill out the primary reference and want lists of librarians and collectors. Both works serve more generally as a critical list of significant and, if not so significant, particularly interesting publications in the field—each, though, reflecting the biases of its compiler.

*THE GRAND CANON* takes the further step, offering the lists by which librarians and collectors may fill out comprehensive reference collections, in whole or within specifically defined areas. It serves users who pursue any number of specialized, even
personalized, lines of inquiry; research which requires a broader compilation of sources that is not limited by those that may be high-profile, accessible and familiar. This work sails into the broad archipelago of articles, newsletters, pamphlets, booklets, and simply obscure monographs of all kinds; it sights the beacon in a Tower of Babel of dozens of languages; it encounters shallow literary harbors adrift with flotsam, too. This is a biblioscape more familiar to the users of interlibrary loans and photocopy requests—students, researchers, legislators, and legal aides—which is also the special domain of independent searches, fresh insights, novel interpretations, and the academic foodstuff for theses and dissertations of the next generations of historical, scientific, social, and cultural scholars. This vast grouping of materials also offers to administrative officers a broad historical look at the depth of interest and issues that concern the areas they oversee, not just the few shining stars. **THE GRAND CANON** surveys the main currents of literature, science, and administration, and reveals the undercurrents of activities, perceptions, reactions, and opinions of citizens, constituents, clients, and consumers.

Occasional items, whether from among “worthwhile” titles or from among the “flotsam” of mass-market and throw-away copies—and those that might be considered too trivial, worthless, ridiculous, or temporary—may nonetheless be key to a user’s search for pertinent sources of information or for perspectives on peculiar topics. For scholars and general readers both, commonplace and serendipitously found works may redirect lines of thinking or open new avenues of investigation. For administrators, the broadly important and the particular or obscure items all may help consolidate ideas of how the areas of their oversight are perceived and used.

**THE GRAND CANON** serves readers and administrators as a tangible record—an audit—of published materials about the Grand Canyon and the lower Colorado River. It is a resource with worldwide input on one geographical region, with the broadest possible span of private and public interests. It is the evidentiary and cultural record of incidental, casual, spontaneous, elective, creative, sponsored, and officially authorized activities of individuals, organizations, institutions and government agencies, published privately and in popular, academic, commercial and government venues. It is a record of perspectives, understandings and actions that pertain to cultural, environmental, literary, and administrative viewpoints of personal and societal interests. This is a readers’ tool; and it is a unique reference tool for resource managers who work within federal, state and other jurisdictions covered by this work, and for professionals in special-advocacy and not-for-profit organizations that have concerns in this region. The citations document for agency decision-makers sources that record resources and the utilization of the lands under their purview. Trends in personal, professional and official interests may be detected in analyzing citations spanning
decades and centuries. Subsets of citations may serve as foundations for specialized and applied uses, scholarly studies, and administrative record.

Why “GRAND CANON”? 

The title, THE GRAND CANON, I had contrived in the late 1990s for the ongoing, working copy of the Grand Canyon–lower Colorado River bibliography. It became the Internet Edition, “A Bibliography of the Grand Canyon and Lower Colorado River”, first posted online in 2000, superseding the print volumes of 1981–1993. The title was devised purposely, somewhat whimsically as we shall see, but at the time its use was prudently discouraged by the website host’s editor. How many casual visitors to the website, expecting a “bibliography” and unaware of the meaning of the phrase, might have seen the “The Grand Canon” as the metaphorical “Grand Canyon” of typographical errors!

Having been publicly available since 1981 in a more secluded, academic venue, this ever more voluminous project has redirected itself in steps to a more diverse audience. It is no longer exclusively a work either of or for scholarship, but one for broad and focused investigations both; for academic, managerial, and casual interests alike (see as well the Preface herein). While the database function of the online resource is an electronically searchable bibliography, THE GRAND CANON is seen in its contiguous whole. This calls for a title that is both more assertive and enticing than “A Bibliography of —”. So I recast “A Bibliography of the Grand Canyon and Lower Colorado River” as a “canon” — specifically, and specially, a grand canon.25 It is a

---

24 I can take further note either of the folly of my retitling this work, or resign myself to the human nature of inattentiveness. In February 2011 I informally distributed a test version of this digital product, which was cataloged into one library’s collections as “The Grand Canyon”. This may have been an excusable lapsus, perhaps not knowing of the word “canon”; however, my given and surname both also were misspelled, another party was attributed as publisher, and the description of the digital disk indicated that it contained sound (one assumes that the young[?] cataloger believed that all CD-ROMs are audio). I can imagine a researcher (or a collector!) relying upon such a catalog record, errors undiscovered, unwittingly sent on hunts for an elusive, “rare” variant or edition that does not exist. The errors were subsequently corrected.

25 The general idea is not wholly without precedent. In June 2013 I discovered a 1980 publication, “Grand Canyon Suite”, which outlines a “praiseworthy endeaveour” (its author’s term) that called for the process of “canon-building [a] presumed canon of [children’s] literature in general” (Perry Nodelman, “Grand Canyon Suite”, Children’s Literature Association Quarterly, (Summer 1980), pp. 1, 3-6). The intention (apparently not carried out) was to assemble a responsible “canon of important literary works”, but one that would be ever changing. It would embrace “works everybody should know”, not necessarily “important” or “good” ones; and it would not be assembled by committee. Nodelman thus reported that, by 1980, the Children’s Literature Association had toyed with the idea of a canonical list of publications. But then inexplicably he
documentary guide to the published productions about the region, one as definitive as possible (although it grows constantly).

By adding a descriptive subtitle that notes “published items” are listed herein, I engage potential users who are in non-academic occupations and avocations. The categorical term “bibliography” I feel now has to be avoided in the main title (the part that will be most often cited) because this work embraces so many things that are technically not like the familiar, bookish medium of inkprint; it may not attract the notice of those who may search for audio recordings or videos, for example. The work includes tactile productions for the vision-impaired, audio works, audio-visual works,

retired from the very definition of a canon by stating that it would not be “universally binding” (thus not a canon?) and that its own revisions would refigure the idea of what such a canon is and contains. So the definition of “canon” fails there. In THE GRAND CANON here, I counter with the principle that a bibliographical canon serves as a definitive and unbiased, permanent compilation (one not excluded from being added to), with which it is the researcher or other reader who discerns what is of significance generally, or pertinent to a specific task. Thus the principal failing of a canon would be in its omission of items that should have been included in it, whether the omissions were through oversight or by purposeful, but unadvised, exclusion. A bibliographical canon offers considerable discretion to users; they seek not so much subjective guidance among selected items but to be informed in the first place about what is available, thus they will decide what is best for themselves.

By “published” I mean productions reproduced in multiple copies either for wide or limited distribution, regardless of their intended audiences or cost to recipients. These include: inkprint (books, pamphlets, articles in journals and magazines, sheet music, maps, and so on); photographic products (like assemblages of photoprints in multiple copies, stereoviews, and so on); tactile products (Braille, or Moon type, for example); audio recordings (including analog phonodiscs ["records"] and audio tapes [like cassettes]); analog films (with or without sound, in various formats); transparency sets (like “slides” and “filmstrips”); digital audiovisual tapes (like VCR-format videos); digital disks (both audio and audiovisual, like CDs and DVDs); and computer software for public distribution and reuse (usually distributed on “floppies” [flexible disks, although later, smaller formats are enclosed in rigid housings], “CDs” [Compact Disks, more fully known as “CD-ROMs”, Compact Disk–Read-Only-Memory], and “DVDs” [originally Digital Video Disks but later, to also include data disks, Digital Versatile Disks]). Reproduction in “multiple copies” further implies that access will be possible to any of numerous, identical copies in various locations, and that copies may be transferred from place to place without loss or be reproduced again by photocopy or other means. Although some rare or scarce items—a few may now be unique due to the vagaries of misfortune—will be difficult to locate or to gain access to, such concerns are beyond the scope of the present work, which serves only to audit material that has been produced, regardless of original scarcity, subsequent survival, or access restrictions imposed by the repositories that hold them. Productions posted to or available from Internet websites, even if deemed to be “published”, are largely excluded from this compendium because they are ephemeral—there is no assurance that access to such works will always be possible; and even hyperlinks can be rendered useless when the target locations are changed in any way, even though the item may still be present elsewhere. Once these failings can be conveniently and reliably remedied, a webography for the Grand Canyon–Colorado River can be derived from the electric universe of “live” and archived websites. If for some reason none survive, it is a moot point and THE GRAND CANON will continue to serve as it always has.
and computer media—and it allows itself to embrace newer media that will be appropriate to add when they become available.

The word “canon” comes into the English language from a Greek noun that can mean “measuring rod”; it also appears in languages other than English. Usually a canon refers to bodies of scriptural works, ecclesiastical laws, rules, or guiding doctrines; but the term further embraces various literary and other expressive forms including music, which ironically includes a “grand canon”, and mathematical notation. A canon can be an authoritative or comprehensive list, or an indispensable body of material, particularly that which relates to an absolute sum of like references. In the case of THE GRAND CANON this is every publication that can be said to be in some fashion “about” the Grand Canyon or the lower Colorado River, in whole or in part. I think “canon” even may be defined generally, as a set of materials that has definitive usefulness, especially if the work is unique. If Wright Howes, editors notwithstanding, got away with his remarkably clumsy (yet precisely unavoidable) title U.S.iana for his master bibliography of books embracing the geographic area now known as the conterminous forty-eight United States, I am happy to sit in his good company with THE GRAND CANON.

THE GRAND CANON includes a nomenclatural appendix that collates numerous cultural usages of the term “Grand Canyon”, as applied to other geographical features and as used literarily in analogy, metaphor and other uses. This added material is like a musical canon that has a melody and repeated imitations of it, thus it fits well with the overall bibliographical sense of this work. In also extracting concepts of the physical and conceptual Grand Canyon for other applications, each example in these literary compilations is a hyponym to the real Grand Canyon as their hypernym.

Then, too, “THE GRAND CANON” of course recalls the spelling, “Grand Cañon”. During the mid- to late-19th century the Spanish word cañon appeared widely in non-Spanish publications, particularly in reference to the imposing declivities of watercourses (often ephemeral) in semiarid regions of the American Southwest. In this form cañon (and its cedilla-less canon) was used well into the 20th century, but as time progressed the transliterated canyon was favored. While the borrowed cañon appeared most often in publications written in English, other non-Spanish languages borrowed the word, too.

---

27 Wright Howes (compiler), U.S.iana (1650-1950); a Selective Bibliography in Which Are Described 11,620 Uncommon and Significant Books Relating to the Continental Portion of the United States (R. R. Bowker Co., New York, for The Newberry Library, revised, enlarged ed., 1962), 652 pp. [Ironically, even this revised edition’s title is not precise for its date of publication, for by then Alaska—also part of the “continental” United States—had entered into the Union.]
In America the word *cañon* had been acquired anew through long-time Spanish interests in the Southwest. There, explorers, interlopers and new residents encountered landforms—canyons—that were unlike those found in many parts of the world familiar to Europeans; and the long-resident Spanish of the Southwest had the word for it. As the use of *cañon* funneled into everyday and scientific literature and into the legislative and judicial dialogues of capitals and courts, it appeared typographically as often with as without the *tilde*, as *cañon* and *canon* both, though it was always to be pronounced *kan-yun*. (In many cases this was dictated by a printer’s available fonts or an editor’s choice. Instances can be found where, within the same item, lowercase “ñ” appears as such in plain text, but where set in bold “n” is used. Even, for example, in modern Spanish the capital letter Ñ may appear either as “Ñ” or “N”.) By the 1930s *cañon*, in non-Spanish publications, had essentially disappeared from use.  

In retrospect, I find the title, *THE GRAND CANON*, stands more clearly in text than does the phrase, “this bibliography” (or some such construct). Even when it is used in the same sentence with “the Grand Canyon”, “*THE GRAND CANON*” disambiguates itself; it is clear which is the place and which is the bibliography.

An overwhelmingly stodgy work like a bibliography would do well to embrace some whimsy, anyway.

---

28 Within the scope of *THE GRAND CANON* the latest Spanish-language publication thus far found that purposely used the spelling “cañon” throughout—though it was done apparently for artistic effect—is Barry Goldwater’s *People and Places* (Random House, New York, 1967) [Item no. 2.2955].

EACH CITATION in THE GRAND CANON is a receptacle for at least one fact regarding the Grand Canyon or the lower Colorado River—even for works of fiction because the “facts” there are the characters and scenarios of an author’s creative work. In sum the citations are a whole image of human experiences, activities and uses; elements of the natural world; and spiritual, emotional, analytical and critical responses through the activities of professions, avocations and livelihoods. One may take to heart that within THE GRAND CANON there are citations that will be superfluous to many users, but to one reader attending to a personal view of an obscure or overlooked area of human study, those same superfluous citations may provide the documentation to argue the case.

Throughout this chapter references are made to the two concomitant editions of this bibliography: THE GRAND CANON, which is the present document, and the Internet Edition, which is the searchable database version of this bibliography online at www.grandcanyonbiblio.org. The content of the two editions are essentially identical, but, as one might suspect from my having brought this up, they are rather different as well.

THE GRAND CANON in its monographic presentation is continuously updated by the author. New citations are frequently taken from it to be uploaded to the Internet Edition. However, THE GRAND CANON in PDF (Portable Document Format) is distributed only occasionally; each edition will supersede older ones. Thus the online Internet Edition, so long as it remains available and updated, will be somewhat more current than the latest edition of THE GRAND CANON. But, many added features in THE GRAND CANON are not present either in the Internet Edition nor to any of the predecessor bibliographies out of which these editions have grown. And further, there are
thousands (though uncounted) of very minor adjustments in format and presentation in *THE GRAND CANON*, as well as points that are of interest only to a very exacting few, which are not present in the Internet Edition.

The sections that follow are intentionally detailed, serving as a documentary record, anticipating the time when I am not present to answer questions.

---

**Topical Coverage**

A bibliography includes whatever its compilers wish to include. Francis Farquhar’s 1953 gem, *The Books of the Colorado River and the Grand Canyon: A Selective Bibliography* is celebrated by bibliophiles of the Southwest. But there really is no such
thing as a “selective bibliography”, only an incomplete one; there is always something more to add or to elaborate upon. Indeed, such a work can be criticized as “a poor excuse for selecting other scholars out.” Nonetheless, one should bear in mind the geographical realm of coverage (see the next section); this is not a bibliography of all works by an author. Thus, some users may decry that one important work or another by an author is not listed herein. A work is included here only if it mentions or embraces, even in part, the Grand Canyon or lower Colorado River region. If it does not, it is omitted, regardless of the prominence of the author, the worth of the work left out, or its applicability to studies of the Grand Canyon and lower Colorado River.

This bibliography began in 1974 as a short list on the subject of Grand Canyon geology; it grew to be the present product. My decision to exclude the upper Colorado River basin is based entirely on my personal preferences, which are directed in turn by the limits of my experience. I know far less of the Upper Basin; moreover, I have not traveled as much there. On the other hand, I have traveled quite a bit in Arizona, along the lower Colorado River, and in the Grand Canyon region. My seventeen trips on the Colorado River through Grand Canyon, between 1989 and 2001 (all but two through to Lake Mead), pale against the tallies of those who are boatmen and scientist-workers on the river, but at least now I am comfortable with recollections and references to specific places in the river corridor.

Within the region that THE GRAND CANON does focus upon, the topical coverage is nearly without bounds. Books, articles, and other items wholly about these subjects, and those merely of passing interest, all make their ways into this bibliography. The absolute criterion is that they must in some way make mention of the Grand Canyon or the lower Colorado River, in any context, however brief. This is partly a bibliography of subject-specific items, and partly an index.

I have observed and practiced for years that one cannot presuppose what is “most useful” to the user of a reference work such as this. The product must at least strive for absolute completeness, which means scouring everything for whole and included information. This also means that everything is added without regard to an artificial evaluation of either scholarly or practical merit. I do not feel that it is the purpose of this bibliography to selectively omit anything, because it may prove to be of value—even for reasons unknown or unimagined—to someone in the future.

The categories of this bibliography have evolved ever since work began on evermore expanded versions of the bibliography around 1975. Similarly, the print editions of the bibliography, first in 1981, had employed arrangements of categories that differ

from those of later editions, including *THE GRAND CANON*. [See the Appendix to Part 1 of the bibliography for a complete description of the arrangement of the previous bibliographies.] The selection of categories is partly routine (history, sciences, and so forth), and partly from the suggestions of others (human affairs, and health and safety, for example). My own predisposition to the earth sciences encouraged me to subdivide the geological field guides and geologic maps from the general listings of the rest of the earth sciences, which, as learned from feedback from geological workers, has been useful. Although subdivisions of other categories—for example, “Biology” could be subdivided into, at minimum, zoology and botany—I have deemed further divisions impractical because of the number of items that would thus fit into more than one category, replicating and greatly inflating the number of citations in the overall work. Clearly that is the job for subject headings incorporated into a database format, which has never been the intention of *THE GRAND CANON*. In its present format here and online, the bibliography is not arranged according to a set of predisposed subject descriptors. I have in many instances used subjective and unique comments as a suffix to the bibliographical citation, which in such cases more competently explain the item’s content or pertinence than can be discerned solely from its title. The online bibliography is queryable. This word-processed version, *THE GRAND CANON*, is browsable, which testifies to the longevity I foresee in it. For this reason the categories exist, and a few citations (here and online, now not more than a couple of hundred) are replicated in two or more parts because they wholly embrace multiple subject areas, as indicated even by their titles.³¹

Absent Citations. Some users may notice the absence of some publications. These omissions are usually not exclusions. Occasionally, too, there is a title that a user may think belongs here for good reason that it may relate to a nearby region or events there. However, if it does not touch upon either the Grand Canyon, its immediately adjacent lands, or the corridor of the lower Colorado River, it will not be included herein—even if the item appears in a periodical or book that is devoted to the canyon or the river. Still, the extent of bibliographical explorations by me and contributors go only so far. If something is not cited herein, and it clearly should be, we had not seen it; we have not chosen to omit it. Users who know of more things that should be listed here have the advantage over us.

³⁰ The distinction between “geological” and “geologic” depends upon whether the science of geology is the subject (geological) or whether the data of geology (geologic) is the subject; similarly for other adjectives of this kind.

³¹ For example, the report by Richard Hereford, Glenn E. Bennett, and Helen C. Fairly, “Precipitation variability of the Grand Canyon region, 1893 through 2009, and its implications for studying effects of gullying of Holocene terraces and associated archeological sites in the Grand Canyon, Arizona (U.S. Geological Survey, Open-File Report 2014-1006, 2014), is listed in this bibliography under Parts 16 (Archaeology), 18 (Physical Environment), and 21 (Geology).
Duplicate Citations. One may wonder as well if the total number of citations cited for this bibliography is exact. It is not. Because the bibliography is divided into subject headings, it sometimes was necessary to repeat a citation in two (or rarely, multiple) parts of the bibliography. For example, a geological work by its content that pertains both to the Grand Canyon region and the lower Colorado River will be listed in Parts 11 and 21 of this bibliography. Similarly, a work that deals with both geological and archaeological aspects of a certain locale will be listed in Parts 16 and 21 of the bibliography. Or, fisheries studies of the Colorado River that include both the Grand Canyon and lower Colorado River regions will cite such sources in Parts 11 and 19. An exact count of such duplicate entries is unknown, but the total is less than a low number of hundreds. While this necessarily inflates the total number of citations, it serves those who will study and extract only from certain parts of the bibliography. Compared to the tens of thousands of citations, the number of duplicate entries is not significant.

Following are some of the subject areas of the bibliography that require some further elaboration about their content beyond the descriptions provided at the head of each part and in the Content Guide.

General Publications  

PART 2 is by far the largest part of this work. It includes everything that is not categorized by other parts of the bibliography; most notably, everything that is classified as history or biography. It embraces popular and scholarly productions.

A great many publications include both the Grand Canyon and the lower Colorado River, in such ways that it is pragmatically unreasonable to segregate the works that focus on Grand Canyon versus those that focus on the lower Colorado River. And once this consolidation has taken place, it is just as unreasonable to exclude from the General part of the bibliography those works that are exclusively about the lower Colorado River with no substantive mention of the Grand Canyon. The “General Publications” part further includes most items that, in previous bibliographies, had been heaped into a “Miscellaneous” part that was an arbitrary and unhelpful category inasmuch as such items are as “general” as they are “miscellaneous”.

Also, there are so many works that are multidisciplinary, which are not convenient (when focusing on everything within geographical bounds) to segregate into one subject. These must be cited within all pertinent parts of the bibliography; but their numbers are relatively few. Were this bibliography rearranged into a database
format, artificial subdivisions could be employed to allow for more precise (though contrived) subject sorting; but as I have explained elsewhere herein, THE GRAND CANON is purposely in monographic format for now.

**Aids for Those Who are Vision-Impaired**  
**PART 5** contains citations mostly for items that are in large-print or Braille formats and audio materials made expressly by agencies who produce materials for the vision-impaired. Other, unusual formats are included, too; for example, tactile material in Moon Type. Many citations have been derived from Library of Congress catalogue records, and of course this part of the bibliography should not be construed to be comprehensive.

**Lower Colorado River Special Interest Subjects**  
**PART 11** (Lower Colorado River—Natural History, Environment and Special Issues) and **PART 12** (Lower Colorado River—Water Management) are purposely separated from the Grand Canyon focus of this bibliography to facilitate a more sensible breakdown for those users who may be interested only in the special issues of the lower Colorado River region.

**Part 11.** As indicated in the title for Part 11, this part embraces mostly scientifically oriented material. This consolidation means that, for example, geology, biology, and some ethnology items will be in the same part. It may seem more prudent to have separated out these disparate themes into separate subsections similar to the breakdown for THE GRAND CANON at large. However, I considered that approach to be counterproductive; otherwise there might have been a dozen short subsections that would seem to inflate the breadth of this bibliography, with unnecessary overlaps by placing some citations in more than one subsection. (For similar reasons, in the printed 1990 edition of this bibliography and its 1993 supplement I had incorporated “special sections” within some of the parts of the bibliography. This soon became inconvenient, the original objective being only to keep the number of loose-leaf separator tabs to a minimum.) It seems that readers interested solely on issues in the lower Colorado River may find a contiguous listing more advantageous, although this presumption is bound not to hold true for everyone. Still, a line must be drawn, and I have opted for the consolidated approach to the lower Colorado River. I have separated out into its own part only the water-management issues, which thematically makes sense.

As a matter of subjective decision, I have not included probably thousands of citations that would pertain exclusively to agricultural studies in the lower Colorado River region. These would best be the subject of a separate, specialized bibliography, which of course must be constructed from the start. Occasional agricultural items will be found in this bibliography, though. These are included for more specific focuses; for example, aspects of irrigation or taxonomic, ecological, or historical references.
Likewise arbitrarily added to Part 11 are specialized reports and articles that pertain to the U.S. Army Yuma Proving Ground and the U.S. Marine Corps Air Station Yuma.

**Part 12.** Water—its abundance (or lack thereof) and its quality and uses—will be the crucial concern of the world’s people in the 21st century. In the American Southwest concerns will become as dire as any known in the civilized world, just as humanly devastating as the shortages in small villages of other continents but with greater geographical and economic muddling from arbitrarily higher levels of “civilization” involved. References in Part 12 of the bibliography will give some case examples of how we in the American Southwest got to that point imbalanced between climate, technology, and legislation—and our perspectives, however limited right now, on what to do.

The water-management citations in Part 12 of the bibliography, restricted to the lower Colorado River corridor and its artificial extensions such as through canalization and powerline construction, must by default embrace partly the Grand Canyon. This is mostly due to the proposed construction of dams in the Grand Canyon, which ideas began with power-production facilities proposed for the Colorado at Diamond Creek in the closing years of the 1800s and in the heart of the canyon at the mouth of Bright Angel Creek in the early 1900s. Similar proposals continued for the entire Southwest through the dam-survey period of the 1920s mostly, during which Hoover Dam was built in the 1930s, and which came famously to a head politically and civilly in the 1960s–1970s with proposals to build two power dams that would have bracketed Grand Canyon National Park (then geographically smaller). Since the Grand Canyon dams never were constructed, a conundrum presented itself in *THE GRAND CANON* as to where to cite water-management citations that pertained to proposed facilities that were still inside the Marble–Grand Canyon section of the Colorado River. Since these structures, though never completed, were a part of more ambitious plans covering the Southwest, I deemed it more sensible to include these citations in the water-management part of the bibliography for the lower Colorado River.

Regarding the water-management facilities of the lower Colorado River—principally Hoover Dam–Lake Mead, Davis Dam–Lake Mohave, Parker Dam–Lake Havasu, Imperial and Laguna Dams–Lake Martinez—most citations in *THE GRAND CANON* pertain to the dams and their appurtenant works as well as to administrative aspects of the lakes impounded by them. In the case of Hoover Dam and Lake Mead, a substantial number of citations relate to them; fewer for dams and lakes farther downstream. Appurtenant works include, for example, power-production facilities and specialized construction facilities during the building phases. Bridges in particular may seem to be indirectly related to the operations and oversight of the dams and
lakes, but they, too, are here considered appurtenant works because, such as in the case of the Mike O’Callaghan–Pat Tillman Memorial Bridge on the Hoover Dam Bypass, completed in 2010, they were constructed to accommodate security and public safety at, and of, the primary facilities.

Aqueducts and irrigation canalworks in the lower Colorado River region are also covered in this part of the bibliography. But no special attempt has been made to provide comprehensive coverage because this material of course carries farther and extralimitally to the lower Colorado River region, and where in those destinations there are sure to be a separate bibliography’s worth of published material.

Items pertaining to the plans for, construction of, and physical structure of Glen Canyon Dam, as well as items pertaining to Lake Powell impounded behind the dam, are not included in *THE GRAND CANON*. Exceptions are selected items that relate to effects downstream in the Colorado River as the result of physical alteration of the dam and its appurtenant works or from alterations to the operation of the dam.

Archaeology and Cultural Preservation  

**PART 16** of the bibliography relates to archaeology and aspects of cultural preservation including 19th- and 20th-century activities. Some items dated during and after the later-20th century may be available to the public only in redacted versions, wherein culturally sensitive or specific geographical data are removed or physically blacked out. Unredacted versions will be in files accessible to qualified researchers and administrators. If no note regarding redacted parts appears with the document, or if there is no such note with its citation here, it does not necessarily mean that the document as seen or as available does not have data redacted. One may assume that modern publications in scholarly serials already have been written in such a fashion that sensitive or restricted data are left out. Documents or citations that may have been seen by the compilers that pertain to wholly restricted documents not available publicly are not cited in this bibliography. While thus not properly compiling the body of work of individuals, firms or agencies within the scope of this bibliography, the general unavailability of a document leaves no merit for inclusion within a work such as this one, which identifies publicly available materials. (As with documents that had been denoted as “classified”, “restricted” or “secret” for purposes of national security, but which later are reclassified for public release, only then are these and comparably secured documents included in this bibliography.)

Native American Tribes with Cultural Claims to the Grand Canyon  

**PART 17** of the bibliography relates to Native Americans of, and their relation with, the Grand Canyon. By default of residency at and in the canyon, the Havasupai and Hualapai people are the principal focus of this part of the bibliography. In addition, however, there are citations that relate in some fashion to the cultural relationships and claims
that other tribes and nations have with the Grand Canyon. However, this part is not comprehensive due only to the fact that there are many citations that either have not been examined for content pertinent to THE GRAND CANON or have not come to my attention. This is not a bibliographical listing for the tribes in general; only their relationships with the canyon, although as noted the Havasupai and Hualapai have the preponderant number of citations because they are current residents of the canyon. Some topics that may seem to be out of scope, insofar as the tribal relationships with Grand Canyon are concerned, are nonetheless included here. For example, some citations relate to Havasupai legal claims against Arizona State University, regarding some researchers’ unsanctioned use blood samples given by tribal members specifically for research on diabetes in this community, which disproportionately afflicts many of these people. While this in itself may seem unrelated to the Grand Canyon, other research was conducted with the samples, without the permission or knowledge of those from whom the blood was taken, which arrived at scientific conclusions and social statements, which were published, that were decidedly contrary to the cultural beliefs of the Havasupai people and their relationship with the Grand Canyon. The resolution of these legal issues has provided some positive outcome for the individuals and the tribe.

Not all of the Native American tribes who exercise cultural claims to the Grand Canyon may have citations listed in THE GRAND CANON, except in a general or summary fashion; only the publications that have come to our attention are cited herein. For the reader's information, the involved tribes are:

Havasupai Tribe, Havasupai Reservation (Arizona)
Hopi Tribe (Arizona)
Hualapai Indian Tribe, Hualapai Reservation (Arizona)
Kaibab Band of Paiute Indians, Kaibab Indian Reservation (Arizona)
Las Vegas Tribe of Paiute Indians, Las Vegas Indian Colony (Nevada)
Moapa Band of Paiute Indians, Moapa River Indian Reservation (Nevada)
Navajo Nation (Arizona, New Mexico & Utah)
Paiute Indian Tribe of Utah
Cedar Band of Paiutes, Kanosh Band of Paiutes, Koosharem Band of Paiutes, Indian Peaks Band of Paiutes, and Shivwits Band of Paiutes
San Juan Southern Paiute Tribe (Arizona)
Yavapai-Apache Nation, Camp Verde Indian Reservation (Arizona)
Zuni Tribe, Zuni Reservation (New Mexico)

**Physical Environment**  ❖ **PART 18** of the bibliography relates to the physical environment; that is, items of physical, chemical, biophysical, or biochemical aspects
of land, water, and atmospheric environments of the Grand Canyon region. These include non-biologically focused research of the environment in the Grand Canyon region and the Colorado River corridor through the Grand Canyon, and climatological and hydroclimatatological investigations relating to the Colorado River basin. With regard to the last subject area, it is necessary to expand the area of coverage from specifically the “Grand Canyon region” to embrace the entire region covered by this bibliography. This is because climatic investigations by nature often encompass rather large geographical regions. With regard to the area covered by this bibliography, many such investigations overlap the entire Colorado River drainage, or sometimes more specifically a portion of Arizona or the lower Colorado River region. In any case, all climatic studies, including those that cover the larger regions, are listed in this part of the bibliography for their topical context and the logical application of them to the artificially restricted area of the Grand Canyon and lower Colorado River.

**GCES (Glen Canyon Environmental Studies)**

PART 20 comprises a guide to reports and studies that were produced as part of the Glen Canyon Environmental Studies program under the U.S. Bureau of Reclamation; since ceased under that administrative entity. (The GCES programmatic responsibilities have continued as a part of the U.S. Geological Survey’s Grand Canyon Monitoring and Research Center, in Flagstaff, Arizona.) The program was implemented to study the effects of, and to contribute to administrative plans for, the operation of Glen Canyon Dam on the downstream environmental and cultural resources through Glen, Marble, and Grand Canyons. This part was compiled by Richard D. Quartaroli, then GCES Librarian, and incorporated in 2000 as a separate table in the online Grand Canyon–lower Colorado River bibliography. Since then, the entries have been reformatted and placed within the searchable part of the online bibliography; but the original tabular layout as conceived by Quartaroli is retained in *THE GRAND CANON*.

**Geology**

PART 21 comprises references to the geology (broadly speaking) of the Grand Canyon region. It includes regional studies that embrace the Grand Canyon. Noticeable among these citations are those that pertain to areas outside of the geographical coverage of the main body of *THE GRAND CANON* (see map). These extralimital references contain discussions of the same stratigraphic units as which occur in the Grand Canyon; important for their focus on correlative stratigraphic and sedimentological analyses that, in turn, reflect upon studies in the Grand Canyon. This is akin to examining the meteorological or climatological aspects of the greater Southwest (as in Part 18) as they pertain to effects observed also in the Grand Canyon. Part 21 further includes broad studies of the geologic history of the Colorado River basin, inasmuch as these studies all pertain in some measure to the Grand Canyon and, in turn, the history of the river in the lower Colorado River region.
Omitted from Part 21 are items that pertain to the San Francisco volcanic field. Although this area may be considered together with regional volcanism, such as that of the western Grand Canyon, I have considered the literature on the San Francisco Peaks too great for an area only of marginal interest to the Grand Canyon and Colorado River. Likewise omitted from Part 21 are discussions that may relate to the upper Paleozoic strata of Grand Canyon as occurring at Meteor Crater, east of Flagstaff, Arizona, since such discussions pertain to impact effects rather than stratigraphic or sedimentological relationships of those rock formations, which are in any case significantly and locally altered there.

Included in Part 21 are items that pertain to theoretical and practical computerized analyses of data that utilize the Grand Canyon topographic model. These are not mathematical modeling studies of the development or actual topography of the Grand Canyon but are landscape imaging studies. Because they use a Grand Canyon elevational data set to analyze the relationships of cells or sets of data points in two- and three-dimensional image representations, I include them within the geology subject area for their use of the topographical data set. But in as much as the cited publications do not usually pertain to studies of the actual Grand Canyon, nor are they products that pertain to the canyon, they are not considered for THE GRAND CANON’s separate section on Computer and Interactive Media.

Audio-Visual Works and Audio Works and Musical Scores  ❖ PART 26 (Audio-Visual Works) embraces products that employ the media of sight and sound, which include diverse products such as but not limited to films (silent and with sound), filmstrips, stereoview sets, and over-the-air broadcasts that have been made available on videotape. Similarly, PART 27 (Audio works and Musical Scores) limits itself to aural products and published musical scores. Citations within these sections have been encumbered by their un-booklike nature, by which even though there are some standardized means of citing them I have had to work around absent data for not having viewed many of them in their entireties. In these cases I have had to rely on data available on packaging materials, on product labels, and sometimes on external reviews or other notices.

Computer and Interactive Media  ❖ PART 29 embraces products that have been produced specifically for use on computers. While the definition of such products has blurred—for example, CD-ROM products including audio recordings can be construed to be “computer media”—the focus of this part of the bibliography is on graphical and interactive material; for example, map programs, interactive travel guides, older-style “screen savers”, and games.

While web-based media are omitted due to their ephemeral nature (see below), included here are announcements and similar items that pertain to digital personal-
pad devices ("apps", or applications, as they are known); this is to make known bibliographically the existence of these products through the publications that were used to promote them. The "apps" themselves are not cited because, as like their web-posted counterparts, the ability to acquire these things in the future will diminish to zero. Then, too, what to do with the proliferation of digital "citations" that are the square-targeted "QRC" (Quick Response Code, usually referred to as a "QR code") imprints that embellish publications, posters, signs, and virtually any other place that catches one’s attention? The example at right illustrates the QR code for the Grand Canyon Association, as of 2013. The 2013 volume that presented the proceedings of the 3rd Grand Canyon History Symposium was a first for Grand Canyon-related publications by including QR codes for the URL citations of web-based resources. These are not pertinent as bibliographical citations even if they were not web-restricted, because they are practically only machine-readable (that is, an extraordinarily talented few might be able to decipher the layout, alphanumeric symbols and error-correction bytes encoded there, inasmuch as once some people could read IBM punch cards that are orders of magnitude simpler).

**Web-posted Material** As a rule, items that are posted to websites are not included in this compendium (see remarks on excluded web items). There are, however, numerous organizational newsletters and comparable documents that have been posted to Internet websites in formats that are facsimiles of or otherwise mimic printed-format layouts; judged by appearance and, sometimes, the inclusion of volume and issue numbering. These items are usually posted as PDFs. Many such items have been included in *THE GRAND CANON* because it is not generally possible to distinguish between those that are available only online and those that have been printed (or otherwise distributed in paper formats); some are copies produced for paper distribution that also have been converted to PDF and posted to a website. One certain way of identifying those that have been distributed in paper format are items that include space for a mailing label and return address. One concession that eventually was made is for an obviously web-posted serial that continues a print version of the serial or which originates a volume/issue number scheme; these will be included since it is likely that they are intended to be printed out as necessary. Webpage formats that clearly do not reproduce or do not mimic traditional printed-format layouts have been ignored; these include crudely composed items that rely on basic HTML layout and graphics use, clearly designed for web presentation, as well as those that have garish,

32 The QR code is a trademarked form of two-dimensional, or matrix, barcode that is readable by portable digital devices, which redirect the user to pertinent websites and other digitally controlled sites. At present they are targets mostly for the mobile-phone user.

33 Item no. 2.19684 (R. D. Quartaroli).
HTML-composed coloring, animation, and other kinds of graphics that do not or cannot appear in printed works.

Geographical Coverage

When we speak of ‘The Grand Canyon’ it must be understood that the Canyon does not start at the edge of the precipice. Nor is it an arbitrary line on a map, but rather it is the sum–total of the entire area surrounding those edges.

— Stephen Verkamp

The principal focus of *THE GRAND CANON* is the region of the Grand Canyon of Arizona, and the Colorado River from Glen Canyon Dam, Arizona, to the river delta in the Gulf of California, Mexico (see frontispiece map and illustration at the end of this section). Here, the Grand Canyon region is taken to be the physiographic canyon and its surrounding landscape, approximately from a line north of the San Francisco Peaks northward about to the Utah border, and from the eastern end of the canyon (including the Little Colorado River gorge) westward to the Grand Wash Cliffs. The lower Colorado River is taken to be the physical river corridor from Glen Canyon Dam to the delta, as well as the surrounding landscape beginning at the Grand Wash Cliffs and Lake Mead and continuing southward with the river to its delta. It does not go far into the Mojave Desert of California, except to acknowledge the great siphon of the Colorado River Aqueduct (and others) and more constructions like the first power lines built to and, eventually, from the great Boulder Dam (political finagling finally settled on the name Hoover). But it does follow the natural paths of the Colorado River's occasional overflows into the Salton Trough, which, though, was last filled by an accidental, human-triggered breakout in the early 20th century, creating the present Salton Sea.

These are arbitrary limits, ones adopted for compiling a bibliography. They are partly for the convenience of the compiler, reflecting the limits of his geographic familiarity within a broad spectrum of subjects. Yet these limits also delineate a

---

35 The arbitrarily defined southern boundary bypasses the towns of Flagstaff, Williams, and others. However, the user will note that occasional citations appear for these and other extraliminal locales, though only when those citations make reference to the Grand Canyon.
manageably sized geographical region within which is a panoply of tangible and intangible interactions that people initiate and experience. The people are affected by the natural conduct of nature; the physical and ecological world of lands, waters and air, and the animals and plants that inhabit them. The people, through ideas and actions both, influence individuals and their communities, creating what we broadly call “history”; and likewise affected are the physical and ecological landscapes and the inhabitants therein. The people here, indigenous and immigrant, experience and continue cultures that are inherited, adopted, and imposed, which instruct from ancient and historical pasts; and with these the people embark in activities with which they search for the ways and means of the future. Every action, every assertion, corresponds to another.

There are good reasons to embrace both the Grand Canyon and the extended lower Colorado River from Glen Canyon Dam to the sea, a region whose parts may be seen as topographically, geologically, ecologically, climatically, culturally, and politically dissimilar. In fact, their human histories ever since prehistoric times and, in written records from the time since the Spanish incursions of the mid-1500s, are entwined. Their natural histories overlap in numerous ways, too, particularly the recent geological history of the Colorado River even though it flows across two distinctly different physiographical provinces of North America. One can investigate one part of the region without having to attend to things that pertain to another area, but complex interrelations reveal themselves as one refocuses broadly or when the region is viewed from multidisciplinary perspectives. To thematically separate the lower Colorado River from the Grand Canyon is done easily; the historical separation, though, is difficult; geologically, environmentally or culturally, even more so. To separate Glen Canyon Dam from the desert Colorado River below Hoover Dam, or to separate Hoover Dam from the Grand Canyon upstream, overlooks the dramatic environmental influences these structures have all along the river’s passageway. To separate Native American cultures of the Grand Canyon region from those of the lower Colorado River diminishes traditional interactions and the impacts weighed upon all by Anglo activities over five centuries everywhere in the region. The Colorado River traces human heritages that arose and continue through understanding and participating in life in this land. The river runs through the physical land, delivering life, death, and rebirth in absolute, inspirational and spiritual ways. It holds histories to be discovered and discovered anew, and it seems to withhold answers. So likewise this bibliography—looking at all of this land, and the life, places and things therein, it records the work of thousands; they tell us what we can understand, opine and may never know. Without the whole view, the portions may fade as unessential memories. These intertwining views formulated and directed the compilations of THE GRAND CANON.
The 17th and 18th centuries in this region recorded human interactions through a geographically far-flung but sparsely sowed field of publications, focused on the lower Colorado River. The 19th century saw the first sponsored explorers in three centuries to span the whole region, rediscovering the Grand Canyon. Later in the century came an inflow of entrepreneurs and scenic investigators, geologists and geographers, archaeologists and ethnographers, biologists and nascent ecologists, and a few permanent residents and curious travelers, the harbingers of throngs of tourists. The 20th century bore the infusion of greater populace, both permanent and transient, and all manner of specialized researchers, in the humanities and sciences mostly. Plans for, and partial implementation of, a regiment of dams in the Colorado River basin brought beneficial and damaging effects alike to culture, environment, law, and administrative practices—not to overlook variant effects on the quality of life in general, including tourism, the irrigation of farms, and the safeguards of air quality and silence to mention just a few aspects. Thus far in the 21st century focuses have generally shifted away from large-scale investigations to specialized projects and, in the areas of water-management, increased attention to concerns over the effects of drought and climate change.

I realize that the physiographic Lower Colorado River Basin, and by convention the political lower Colorado River, begins near the U.S. Geological Survey hydrologic gage at Mile 0.0 just downstream from the Lees Ferry boat ramp at the mouth of the Paria River. However, in that Glen Canyon Dam serves as a barrier both to the river and to the coverage of THE GRAND CANON, and that the encanyoned river downstream from the dam is now amputated from the body of Glen Canyon, I bibliographically extend the lower Colorado up to the dam.

Lees Ferry as a geomorphological crossroads is tangibly linked to the history of the entire Southwest, one of the few places the Colorado could be crossed before bridges, a passage from the Little Colorado River towns to the Mormon country of Utah. But now Lees Ferry is only at the end of a road, straddling the Glen Canyon and Grand Canyon political units. Bridges upstream and downstream supplant the ford and ferry; the river is no longer through-flowing, stumped momentarily by Glen Canyon Dam. Today, Lees Ferry serves as the sole unobstructed entrance to the
bottom of Glen Canyon and, in the other direction, the starting point for one of the world’s most remarkable natural and historical whitewater routes, through Marble and Grand Canyons. The distinctions of history and geography have been muddled here, too. An ironic example of this was an error in a large brown informational highway sign I saw in 1997 on the eastbound side of U.S. Route 89A, west of Marble Canyon. Riding atop piles of river equipment in the back of a stake truck, I had no way of stopping to picture the sign as we sped past, yet its ironic significance weighed on me: it alerted travelers to the ambiguous “Grand Canyon National Recreation Area”. Of course, there is no such entity. Fortunately, the sighting was photographically proved before the sign was repaired, when it would have slipped into the annals of hearsay.  

At the western end of the Grand Canyon, where the physiographic canyon is dramatically concluded by the Grand Wash Cliffs, Lake Mead slips in past the gateway up into the western part of the canyon, stealing the Colorado River’s historic identity there. In the 1940s it stilled some of the Colorado’s more famous rapids, like Lava Cliff Rapid and Separation Rapid. Lake Mead National Recreation Area fortunately does not also politically steal the lower Grand Canyon; its administrative boundary is pointedly if not necessarily permanently marked by a buoy in the river channel. The buoy likewise approximately delineates the two major portions of THE GRAND CANON, separating the coverage of the canyon-proper and its adjacent lands, and the region of the “lower Colorado River”.

Flowing with the river, a short way into the main body of Lake Mead west of the Grand Wash Cliffs is another historic river crossing, Pearce Ferry, also muted. This one is less a geomorphically constrained passage as like Lees Ferry, but substantially far more used in the 19th and early 20th centuries. Expeditions, trappers following the waters, and prospectors moving north or south within the promising ranges of the Basin and Range physiographic province crossed here; so too travelers dropping from the Old Spanish Trail, and Mormon colonists moving south from Utah to investigate and invigorate the commercial prospects of the lower Colorado. Everyone crossed here to avoid the Grand Canyon and the high, water-poor plateaus on either side of it.

The spot where the Lake Mead National Recreation Area’s “Pearce Ferry” is marked by official signs does not mark the historic ferry site, long since drowned and silted in beneath the surface of Lake Mead. When I first composed these paragraphs, I said that the recreation area’s “Pearce Ferry” slid tiredly into the warm waters of the lake. But the vagaries of climate and water-supply demands and allocations in the

---

36 Item no. 2.2548 (C. V. Equusasinus).
37 See the noticeable blue line on the western side of the map of Grand Canyon’s physiographic rim, illustrated farther below.
West caused the lake’s water elevation to drop drastically during the opening years of the 21st century, ladling away the waters for which Hoover Dam was built in the first place. A decade after my comment the beach was dry, the lake bottom in Pearce Bay reclaimed already to a desert bushland. Here, the Colorado River runs out of sight of “Pearce Ferry”, dashing through the silty lake bottom. In the process it created “Pearce Ferry Rapid”, a new, albeit temporary, rapid of the Colorado River; unrocky but requiring alertness and respect. Until the western waters upstream replenish the diminished Lake Mead, redrowning Pearce Bay and the river course in western Grand Canyon, the river continues to wend its way in search of its original channel.

And so the Colorado River through the Grand Canyon—as well as its history and science—is bracketed by two of the loneliest places in the country, places that only historians, river runners, and bibliographers could love.

Last, odd as it may seem, one may question how the Grand Canyon is defined; that is, where is the rim of the Grand Canyon? The location and extent of the physiographic Grand Canyon, or more precisely the edge of it, may seem to be an obvious definition for one who has stood on the edge and experienced the draw of the open abyss. Geomorphologically, the rim follows a tortuous course, tracing the topographic tendrils of every drainage, large and small and inconsequential, all of which converge upon the Colorado River. In some places more gently sloping areas may provide a more ambiguous location for the rim. But since there has never seemed to be a particular need to define the rim except in a few instances of describing land apportionments, the whole of the physiographic rim never was precisely located.

As part of extensive field mapping in the region conducted by George H. Billingsley of the U.S. Geological Survey, he plotted the approximate physiographic rim of Grand Canyon for a Survey map recreated digitally with Haydee M. Hampton and distributed in 1999 (see following this section, below). While the interpretation of the rim is subjective in some parts, and is not in any case a legal definition of the rim, it provides a first look at the true figure of the physiographic canyon without respect to definitions of political geography.

On examining the map one may be struck by the beauty of its general symmetry. A closer look brings to attention the incredible number of convolutions seen even at the scale of the map; and most notably, the different shapes and crenulation styles of the rims, with Kanab Creek noticeably entering from the north and, opposite it, Havasu Creek entering from the south; and as well the Little Colorado River entering from the east. One may suppose that the two rims, measured along the very extenuated line marking the edges on the north and south sides, must be of very different lengths, especially when one takes note of the much more highly crenulated north side, a function of the geological lay of the land. However, the authors had not
indicated the lengths of the two rims as drawn on the map. These subsequently were measured by Susan S. Priest (U.S. Geological Survey) using ArcInfo data points from Billingsley and Hampton’s data set. The north side measures 1,384 miles; the south side, despite the great asymmetry, is astonishingly an almost identical 1,373 miles.\textsuperscript{38}

\begin{center}
\textit{illustrations follow}
\end{center}

\textsuperscript{38} Data were first sent from Billingsley to Spamer in 2010. These figures were included in a publication by Spamer (see Item no. \texttt{2.14635}.\textsuperscript{2})
"Physiographic rim of the Grand Canyon, Arizona".

The physiographic rim is interpreted along both sides of the canyon, from Lees Ferry (on the Northeast) to the Grand Wash Cliffs (on the West), embracing Marble Canyon (from Lees Ferry nearly to the Little Colorado River that enters from the Southeast) and Grand Canyon. The rim is plotted not along lines of equal elevation as like topographic contours but along what can be construed as the "edge" of the canyon. While the precise "edge" may be subjectively defined in some areas, this map nonetheless for the first time displays the true figure of the canyon without respect to definitions of political geography or to stylistic generalities due to imprecision. By convention, the two sides of the canyon, separated by the Colorado River, are called the North Rim and the South Rim. Note that the physiographic rim also runs along the rims of significant tributaries, the most prominent ones of which are Kanab Creek (on the North), the Little Colorado River (on the East), and Cataract/Havasu Creek (on the South).

The Colorado River Delta forms a T-shaped area as shown in this 1933 map. Historically, occasional Colorado River overflows would descend to the northwest rather than to the south and the Gulf of California. During historical times the river has flowed twice into the Salton Trough, below sea level—once in the 1890s when it overflowed naturally to reform the Salton Sea, and again in the early 1900s when an accidental breach of canalworks flowed catastrophically unchecked for nearly two years to fill the present Salton Sea. For more than a century irrigation in the Imperial and Mexicali Valleys has provided rich farmland in the desert (note the latticework of canals and irrigation drains depicted on the map). The All-American Canal had not yet been built when this map was drawn.
**Content Accuracy**

*The Grand Canon* restores the monographic presentation of its predecessor editions. Between 2000 and 2014 the definitive version was the Internet Edition, a web-posting only. Transferring data to a separate file, adding HTML- and XML-formatting commands, and uploading data to the Internet Edition may have inadvertently introduced errors and omissions—the compiler’s fault. *The Grand Canon*, however, includes features and numerous minor edits that do not appear online, as well as citations that somehow may have been omitted online, thus it is the “official” version that arbitrates issues relating to content and accuracy. Should the Internet Edition not be properly updated, if for any reason it should be corrupted, or if it ceases to be updated, *The Grand Canon* will continue as the authoritative version.

From about 1988 until December 2003, the digital version I maintained for the bibliography was in WordPerfect 5.1 for DOS; then it was converted to Microsoft Office Word for Windows. It continues to be maintained in the Word format and will continue so until circumstances dictate a migration to newer, compatible software. In December 2008 the files were migrated to Word 2007, and, later, were in both Word 2007 and Word 2010 (in practice both compatible with each other). No hardcopy printouts of the content of this bibliography have been made since January 2000. So far as is known, no conversion resulted in loss of data.

In the manner of a disclaimer, any of the digital versions of this bibliography may have been unknowingly corrupted at one time or another, due to software malfunctions that are beyond my abilities to have known about. In rare instances where an operation “crashed”, sensible efforts were made to ascertain that when the document was restored it was wholly intact. I am not aware of data loss as the result of electronic mishap.

**Excluded Items**

Two principal resource areas are largely excluded in *The Grand Canon*, and two former parts of the bibliography have been removed.

“Unpublished” manuscripts, which include unique papers “on file” in administrative records, are not included in this bibliography. Some readers may confer the status of “unpublished” also to material that is in the “gray literature” genre of limited-distribution reports, but such items are available in more widely dispersed fashion even if in a limited number of (and possibly difficult to locate) copies. Similarly, dissertations and theses written in partial fulfillment of the requirements of
academic degrees are by definition “unpublished”, but such documents are frequently cited and copies are acquired for research so they are not excluded from this bibliography.

Newspaper articles are largely omitted because there are articles in all major, and many minor, newspapers; far too many even for a team of compilers to locate and cite. Exceptions to this rule of exclusion are The New York Times and early issues of Deseret News (Salt Lake City), as well as selected opportunistic citations from other titles (about which see more in the following section on Newspapers).

Archaeological documents from during and after the later-20th century may be available to the public only in redacted versions, where culturally sensitive or specific geographical data are removed or physically blacked out. Unredacted versions will be in files accessible to qualified researchers and administrators. Some items from during and after the later-20th century may be available to the public only in redacted versions, where culturally sensitive or specific geographical data are removed or physically blacked out. Unredacted versions will be in files accessible to qualified researchers and administrators. If no note regarding redacted parts appears with the document or its citation here does not necessarily mean that the document as seen or as available does not have redacted data. One may assume that modern publications in scholarly serials already have been written in such a fashion that sensitive or restricted data are left out. Documents or citations that may have been seen by the compilers, but which documents are not available publicly at all, are not cited in this bibliography. While thus not properly compiling the body of work of individuals, firms or agencies within the scope of this bibliography, the general unavailability of a document leaves it no merit for inclusion within a work such as this one, which identifies publicly available materials.

Internet resources are omitted because, at this time, the resources cannot be guaranteed to survive indefinitely, in the manner of printed publications catalogued into libraries. (Exceptions are noted below and in the subsection on “Web-posted Material”.) Internet resources can disappear without notice, either by a renaming of their URLs, by dismounting of the item or the entire webpage from the website, or through the switching off of the website altogether. Should anyone believe that this is not a significant issue, consider the fact that the jurists of the Supreme Court of the United States have in recent times incorporated webpage hyperlinks in their decisions, but some links soon failed due to the removal or migration of the linked material. This is a significant issue because Supreme Court opinions create legal precedent, and their cited materials contain the evidence that has led to those opinions.39 Similarly, a

bibliographical citation to a webpage conveys a record of availability; if the webpage disappears, the evidence contained in that original document is no longer available to researchers and other users. A bibliography containing such dead links is useless except, ironically, as a documentary guide to lost materials.

Libraries of course can (and do), in their prerogative, remove printed works from convenient access (such as storing them in remote locations from which they are retrieved if called for), or they may deaccession them altogether through sale or disposal. This is done in individual cases, though, and there almost always remain copies held in other repositories. Also, the records are removed from the library catalogs, unlike the constellation of broken links that populate millions of unupdated pages on the web. The disappearance of a library volume is unlike that of web-mounted material that disappears utterly. For web material there is, generally, but a unique “copy” of an item, accessible to all via a hyperlink until it is moved or removed. It might be worthwhile sometime to compile a webography for the Grand Canyon based on a reliable and unambiguous restoration and perpetuation of old and current URLs, but this is beyond the scope of the present work.

Included among the web-based exclusions from this bibliography are digital-only books available only as downloads; for example books digitized for digital-tablet readers such as the Kindle™ from Amazon or the Nook™ from Barnes and Noble (there are others, and the market continually shifts). This does not pertain to publications that are released in both print and digital formats; the restriction pertains only to those that are exclusively digital. Perhaps a separate portion of an even more expanded bibliography would do well to cite such books that have been made available for e-book readers, with or without a list of formats. However, this too is beyond the scope of the present work.

Exceptions to the web-exclusion criterion are accorded to very specialized online serials devoted exclusively to the Grand Canyon. These are:

1) The *Canyon Sketches* series from Grand Canyon National Park. These separately authored informational bulletins focus principally on park-related activities and history, which may be downloaded or printed. I have maintained a separate collection to record these items; pertinent links are embedded into citations in this bibliography. As of March 2012, 24 “volumes”, or issues, had thus far been posted to the national park’s website.

2) *Grand Canyon River Guides*, an electronic newsletter from the Grand Canyon River Guides begun with the “2010 Winter Issue” (December 2010). (It ambiguously reintroduced the title of the organization’s original newsletter, *Grand Canyon River Guides*, that is today the serial *Boatman’s Quarterly Review*. For additional
information see the section herein on Name Changes and Numerical Inconsistencies of Selected Periodicals and Serials.

**Part 33—“Other” Grand Canyons** is no longer updated and is not included in *THE GRAND CANON*. That part, which tracked uses of “Grand Canyon” in other geographical locales, was removed as a matter of pragmatic bibliography, not truly pertaining to the Grand Canyon except through nomenclature and comparison, analogy, and metaphor. These separately lists are now appended to *THE GRAND CANON* as literary compilations but otherwise they stand independently of the overall bibliography.

**Part 34—Miscellaneous Manuscripts** was removed from this version of the bibliography in November 2003; it was also removed from the Internet Edition online. Originally, I had believed it was prudent to include manuscript materials that were cited by other sources, in order to include those records in the bibliography. However, this is not the purpose of the bibliography; tracking manuscript and other primary source materials is an entirely separate project, one for someone else to pursue.

\*\*\*\*\*\*

**Newspapers**

As noted above, newspapers are not generally included in *THE GRAND CANON*. There are, however, some exceptions. *The New York Times* is accorded its own section in this bibliography (see below), and citations from the earlier years of the *Deseret News* (Salt Lake City) are placed within pertinent parts of the bibliography (also see below). In other instances a newspaper is cited in *THE GRAND CANON* if an article had been reprinted later in another periodical; the original source is acknowledged in a comment at the end of the citation. Special-interest newspaper-format periodicals are included in the bibliography, too; for example, *High Country News*. Weekly or other such newspaper magazines are also included; for example *Flare* from the *Arizona Daily Sun* (Flagstaff) and *Computerworld.*

**Part 31** of *THE GRAND CANON* (Newspaper Guide) comprises a listing of regional newspaper that titles that some readers may wish to use as an entry to locating local sources of published information.

*The New York Times*. From *The New York Times* as many pertinent articles as possible have been cited in so far as they relate to the Grand Canyon and lower Colorado River. This newspaper was published from the beginning of modern excursions into the region, in the mid-19th century. It is as well a well-recognized periodical that is widely available through microformed products and online. The *Times* is relegated to its own section of this bibliography, its citations arranged chronologically (see **Part 3**).
Deseret News. A purposeful comparison has been made in this bibliography to include citations from a western regional analog to The New York Times, this being the Deseret News (Salt Lake City), the oldest continuously published (now daily) newspaper in Utah. Citations from the Deseret News are included as appropriate within the subject-specific sections of the bibliography. The Deseret News's earliest years (1850-1910) are now freely available online, and a conscious decision was thus made for THE GRAND CANON to include pertinent citations from these years because, like the Times, they cover the period beginning with modern explorations of the region. Deseret News (originally a weekly, becoming semiweekly in 1865 and daily in 1899) also was published as The Deseret Weekly and Deseret Evening News, but it is cited herein as Deseret News. Its citations to 1910 I note include many articles and notes that relate to the geographical coverage area of THE GRAND CANON, much in the same fashion as does The New York Times. They are important to include herein because they have a Mormon perspective of concerted efforts of church and individuals to colonize and economically develop the resources of the region beyond the Utahn border, from Lees Ferry to deep along the lower Colorado River corridor. And as well, the selection of news items reflects Deseret News's editorial slants on activities in neighbor states and the lower Colorado River corridor. Most telling is the newspaper's own Prospectus, which intended the periodicals to be documents of record from the start: “A paper that is worth printing, is worth preserving; if worth preserving, it is worth binding; for this purpose we issue in pamphlet form; and if every subscriber shall preserve each copy of the ‘News,’ and bind it at the close of the volume, their children's children may read the doings of their fathers, which otherwise might have been forgotten; ages to come.”

Today, the idea of binding is the searchable digitized page; for the next age.

Since most of the citations from the Deseret News have been taken from the online postings of this newspaper, take note that the pagination reflects the pages as enumerated in each issue. In actuality, the newspaper is paginated, at least in its early years, consecutively through the entirety of a volume. As a result, notations have been inserted into the citations in this bibliography that note “issue pagination”, which begins with page 1 of each issue as denoted in the online postings. User who refer to an issue will have to count forward from the first page to reach the item in question.

---

Organization of the Bibliography

The bibliography is now divided into 32 parts by subject. This is significantly more expansive than the 10 parts of the 1981 edition (Grand Canyon Natural History Association Monograph 2) and the 12 parts of the 1990 edition (Grand Canyon Natural History Association Monograph 8). [See the Appendix to Part 1 of the bibliography for a complete description of the arrangement of the previous bibliographies.] The present 32 parts are more informative and useful groups, as shown in the Table of Contents. This was done partly in response to specific requests from users of the previous editions, and partly on my own initiative. For example, it seemed to make sense, from the standpoint of a reader interested in a specific subject, to segregate citations about hydrogeology from the rest of the geological citations, because of the great amount of work being conducted in the Colorado River corridor through the Grand Canyon. Some parts are exceedingly brief—the nature of the subject rather than oversight—while others are extravagantly rich with citations.

Creating 32 parts from the previous dozen may seem to be counterproductive by the users who search the entire bibliography for a particular author or journal title (to select two examples). In the print medium this would be true. But the utility of the search functions of the Internet Edition eliminate problems such as this; all occurrences of the search string, from across the entire bibliography, can be returned. The electronic medium is not perfect; some searches will yield false returns because the search string just happens to be present in another context from the one intended. These kinds of problems are bound to improve with time and with advances in technology. In the meantime, they are usually little more than annoyances. The 32 parts in print, or browsable digital format, make sense again for those users who do not wish to rely on key-word searches for their immediate need, or who wish to extract single parts for separate use. Neither is there any other satisfactory way for a reader new to the Grand Canyon and the Colorado River to grasp the whole body of work that has already been done than to peruse the whole body of THE GRAND CANON.

The “Miscellaneous” part of the original bibliography has been eliminated. As well-meaning as is any collection of “miscellanea”, a list composed of them will be overlooked; or, when it is examined, it is looked at as an afterthought or as a last resort. Most of the citations which appeared in the several subsections of this part of the bibliography have been transferred to Part 2. GENERAL because, after all, they are general in nature; a few were transferred to Part 32. MARGINALIA because they reflect upon the Grand Canyon’s history or historical uses but actually have nothing to do
with the canyon-proper, for reasons that are clear upon reading the citations (for example, an international meeting there of scientists who study polar bears).

Other subsections of Monograph 8, such as the “Special Section” appended to several parts of the bibliography, or the separately paginated “Bibliographies” and “Reviews” sections, now have their own enumerated parts of the bibliography. Of course they should have been organized that way also in Monograph 8. But recall that Monograph 8 was a loose-leaf product, so designed to accommodate supplements (of which one was published, in 1993) that continued the pagination of each part or section. The publisher also strived to keep the number of dividing tabs to a minimum, a matter of economy for the most part. Nonetheless, this failed to significantly reduce the thickness of the binder’s contents. By the time “Supplement 1” was published the binder was filled. No one (not even I) had anticipated so much more would be added to the bibliography so quickly. While plans went ahead to eventually publish a second supplement, it became clear that another binder would be needed. It would create a logistical problem for the hundreds of users who already had copies, and an expense for the publisher particularly since the Monograph series, while purposely of limited distribution, was also by and large distributed free of charge within the library and academic communities. Furthermore, users reported that even with just one supplement the bibliography was unwieldy, with now two places to look instead of one. So the prospect of an entirely new, third, edition looked toward being one that could be easily updated and corrected; in other words, a digital bibliography of some kind. The Internet Edition is the result; and from it, in turn, the concomitant monographic version titled THE GRAND Canon.

Citation Format and Content

When I began compiling this bibliography in 1974, the citation style was simple, mimicking a style with which I was familiar as a beginning student in geology; specifically, the editorial style adopted by the Geological Society of America. I also was mistakenly under the impression that, as shown in many scholarly journals, only the initials of authors’ given names were used; for example, “Powell, J. W.” I carried forward with this style for some time before abandoning it in favor of a style contrived more for displaying full titles and authors’ names wherever known. Not until I prepared sequel typescripts for what became the 1990 published second edition of the bibliography

---

42 Item no. 32.15 (International Union for Conservation of Nature and Natural Resources, Polar Bear Specialists Group).
Informal typewritten supplements followed the 1981 first edition, including in the late 1980s one supplement that was composed of cut-and-paste entries physically arranged on sheets and photocopied. The 1990 second edition of the bibliography saw the first large-scale re-editing of the bibliography, including new categories. “Supplement 1” to that edition, in 1993, carried forward in the same format. In the late 1990s, with the move toward a digital edition of the bibliography, I undertook a wholesale re-editing of the bibliography again; its citations as well as the categories represented in it. This became the Internet Edition, which as a searchable database was posted to the Grand Canyon Association website in January 2000; and to that edition emendations and additions online continue to be made to the present.

The Internet Edition makes some concessions to technology, partly in the content of citations, and partly through the way it is presented to the online user. The elasticity of websites countermands the permanence of inkprint, and I witness variations in display depending upon the computer used, and sometimes depending even upon the nature of the query. Be this as it may, the Internet Edition is exceedingly more useful for those who wish to query the entire database, although in the process one does not have the experience or the feedback that comes through seeing the whole product in contiguous format. *THE GRAND CANON*, which is the working and authoritative version of the bibliography, has continued to be improved in its digital manuscript form, with internal editing, revisions, and layout changes; this is the product that you have in front of you now. While the uniformity of citations is elusive without a tremendous effort of re-editing yet again, I am satisfied that it functions and is presented well enough to stand on its own. Nonetheless, there are numerous minor points that have not been incorporated into the otherwise concurrent Internet Edition online. *THE GRAND CANON*, then, is the “official” version of the bibliography if one must be designated; it is certainly the presentation I intend.

Bear in mind that the overall citation style in this bibliography is but one general style for citations; it is not a mandate. The main utilitarian purpose of citations is to provide the information necessary for readers to re-locate the item there cited, to provide documentary credit to the item’s creators and publishers/distributors, and to provide the kinds of information that may be summarized for administrative uses.

In compiling a bibliography, some key, arbitrary decisions must be made regarding the structure of the citations. The citations in *THE GRAND CANON* are constructed not so much for the use of bibliophilic collectors as they are for those who usually use library catalogues and online databases when they search for copies of items. Citations here do not carefully reconstruct the layout of title-pages nor record the
physical construction of the work, although any peculiar information that I have
deemed important or interesting will be appended to the citation as a note. Data are not
usually extrapolated from one citation to another; for example, to fill in within one
citation what it otherwise known actually or intuitively from other citations. This is done
so as to preserve the data present with a particular document, for it is with these data
that a document will usually be catalogued and made available in libraries and other
repositories (the catalogers having been depending only on what was before them).
When further data are in fact known, they may be added within parenthetical notes to the
citations in this bibliography, as a matter of assistance rather than one of systematic
bibliography.

One unsettling kind of encounter with indexed citations gathered from other
sources is the contrived title, where the compiler has restated or edited a published title
to convey some sense of additional information or perceived utility. This is not advised
for the proper citation of items; not just because it destroys the original but because it is
the original that will be cited by others who see it, and by which others later will use to
search for it. In some cases, a subtitle or explanatory note is added to a title, which in
turn a collator may rephrase; likewise, this destroys the original information. Following
are a number of examples from this bibliography, where I had originally depended upon
a fully collated index to publications but which, later, were found to be inaccurate. Most
of these examples are from a single serial, but there are numerous others. I have strived
to correct all such instances, but in the bibliography there surely are some others. At
least, the serial title and other pertinent information needed to locate the item are
correct. In these examples, the Item number is also given. In each case, the title as
originally taken and cited in this bibliography is shown, followed in **bold** by the title as
actually printed in the publication (discovered later and so emended in this bibliography).

**Oatman, newest gold camp, attracts thousands; steady motor procession traverses
eastern California roads to boozeless boom town in Bonanza District of western
[In this example, it seems that the original title had been selected to bring notice to a portion
of a sketch map of the region, which showed roads that may be traveled between the two
towns of Needles, California, and Topock, Arizona.]

12.87 Mechanical ditching a failure, Imperial Valley.
**Mechanical ditching not always cheapest.**

12.88 Cost of dredging ditches in Imperial Valley.
**Give costs of dredging irrigating ditches.**

12.89 Danger for Colorado River levees predicted.
**Predict danger for Colorado River levees.**
The author (or other creator, which may be an organizational entity or branch of government) is the distinguishing and responsible authority for a work. A bibliography should function as an evidentiary record of the work of individuals, organizations, and agencies. Of course, a bibliography does not mandatorily have to list things by author or creator, but inasmuch as this is a world investigated and manipulated by individuals, including those who populate organizations and agencies, it is sensible to account for their productive activities according to the names of the creators responsible for published works. These people or organizations may not be the actual writers (or creative sources) of items; for example, official notices in the *Federal Register* are signed by accountable administrators. Some items have been produced by numerous people as a function of their official duties and who are uncredited, but the signers (persons or organizations) serve as the acknowledging source or official reporter for the material; and in that bibliographical sense they are “authors”.

Second, a title usually must precisely replicate the title as shown in the publication. If it does not carry a title, as is the case of many news notes, a descriptive
title contrived for the bibliography is placed within [square brackets]. Authors’ and publishers’ conventions are retained as printed. Thus they record variances of spelling, misspelling, mispunctuation, and any other particular usage by the author, publisher, or other creator of the work. I have been as faithful as possible to the originals (within some arbitrary bounds of pragmatism) so as to communicate just what was seen when the work was entered into the bibliography. Certain notations are added as assists in identifying more precisely a specific work or its content, which will aid not only the user who seeks it but the librarian who may be asked to locate a copy. Inasmuch as different cataloging schemes are followed in various libraries (despite the existence of “standard” methods), the librarian may discern from the citations here just how a work may be found employing that librarian’s resources.

Spelling of proper names are likewise cited as they appear in the printed works; most noticeable herein will be the distinction between “Canyon”, “Cañon”, and “Canon” (lower- as well as upper-case). While I might have made it expedient for those who do electronic searches, by standardizing all of these as “Canyon”, it is not faithful to the original. Furthermore, there can be devised technological ways of returning all of these spellings in a generalized search for any one of them, albeit this may tender some expense of programming since this is not now the norm. I am in any case firmly of the belief that future technologies will accommodate these variances with greater ease, and there is no need to forego now the accuracy of precise title quotations. I wholly disagree with decisions that allow the limitations of current technology to determine the structure of a work; it makes the useful life of the work much shorter. (Some users may recall the days—not so long ago—when short or rigorously defined “field lengths” in databases required the invention of contorted abbreviations and other short-cuts for data that are now entered fully.) Present-day users will also have to forgive the cumbersome reliance on ASCII character entities, numerous subsets of which have been devised to accommodate the alphabets of foreign languages and special-needs fields of academia. The numerical character entities are used only for uploading citations to the Internet Edition of the bibliography. Some present-day search engines accommodate the use of diacritical marks seamlessly; they will locate “Société” or “Tiyo” whether spelled thus or as “Societe” or “Tiyo”. Unfortunately, the Internet Edition online is not that sophisticated at this time (which is not the fault either of the compiler or of the Grand Canyon Association). Still, the originals decide the usage herein, and it will be only a matter of time before technology will catch up for more widespread applications such as this. For that reason, if not just for the adherance to “original format”, I have avoided including dualtypographies in citations because they would be aesthetically unpleasing as well as ridiculously moot in the future.
Here in *THE GRAND CANON* many citations are in a somewhat cleaner, more consistent style than will be seen in the Internet Edition online. This is because I have indulged myself to make global and sporadic changes alike to this “official” version of the bibliography, which are not possible to make in the online version due to insufficient software capabilities. Nevertheless, these are stylistic variances, not changes to content. For the purposes of research and other exploratory ventures into the online bibliography, it is contextually the same as the version presented here.

And finally, the bibliography is presented in a less myopic type size, and in one column, than might have been used in a formally printed book. In digital form, there is no added expense to the increased number of pages. Older readers, or those with some sight limitations, may also appreciate the extravagance.

**Abbreviations**

One of the more noticeable edits that I have made to the citations since the 1981 edition is the elimination of all but the most standard abbreviations. The abbreviations “ed.” or “eds.” remain for editors, and likewise “ed.” remains for “edition” (in context, there is no confusion); spelling these out seems very peculiar anyway. All other abbreviations are spelled out so as to make these things unambiguous, especially for users who may not be familiar with the conventions, and for new users such as students who have not yet encountered the often-problematical proliferation of abbreviations in bibliographical citations (see next section).

I avoid the librarians’ standard (and widespread) use of “s.l.” and “s.n.” for citation information relating to absent places and names of publishers—“s.l.” is an abbreviation of the Latin *sine loco*, or “without a place”, indicating that the place of publication is not indicated in the publication or otherwise is undetermined; “s.n.” is an abbreviation of the Latin *sine nomine*, or “without a name”, indicating that the publisher is not indicated in the publication or is otherwise undetermined. While these Latin abbreviations are more internationally used and are “unambiguous” when used thus, they are unambiguous only within the library community and among readers who are already familiar with these abbreviations. They *are* ambiguous if one does not know what they mean, among whom I count new generations of researchers who for various reasons are no longer being routinely exposed to the usages employed by professionals in other fields. As like my avoidance of abbreviated citations to assist those who may not understand the abbreviations, in *THE GRAND CANON* I use “[no place]” for s.l., and “[no imprint]” for s.n. or for the absence of both place and publisher.

The use of “[sic]” for designating some precisely quoted information is retained by convention; there is nothing shorter nor devoid of ambiguity. Many writers, even casual users, still rely on *sic*; even when it is technically misused is it used with a specific intention that is presumed to be understood by all. Actually, *sic* is Latin for “thus”, meaning “exactly as used”; it is not an abbreviation. It does not always point out an
error, but rather to a distinguishing feature in a citation that may be misconstrued for something else. Its use corroborates that the passage or fact is correctly stated as shown in the citation.

In November 2013 I discontinued the use of the long-traditional “N.B.” (the Latin abbreviation for *nota bene*, or “note well”) to introduce interjected notes. Such notes now begin with an unambiguous “NOTE:” and have been replaced throughout this bibliography. (The online bibliography still retains the older usage, however, because there are too many for one person to change, and the current database does not provide for global changes within it.)

**Abbreviations of Periodical and Serial Titles**  
Nearly all abbreviations have been eliminated. The problems attending abbreviated citations in bibliography are well-known; I have discussed some in a different venue, but I revalidate those points here. Basically, for centuries the abbreviated citation was a convenience of typesetting economy, if not so much to save space on the printed page then to expedite labor when type was hand-set and redistributed to its boxes after the job was printed. It became needlessly a *caché* for scholastic prowess, too. In electronic media such economy is a moot point. And further, abbreviations are now less intuitively obvious. Today, readers cannot know of, much less be conversant in, the mnemonics of abbreviated citations in fields about which they are less experienced or which they are just entering, nor can all readers (or librarians) be expected especially to understand the abbreviations of foreign languages. All journal titles are spelled out in this bibliography (and about which see more below).

**Authors**  
In *THE GRAND CANON*, the author credit is the determining alphabetical index. This in turn may be seen in the citation styles of some publications, some of which, presumably for the sake of publishing space, omit titles of works that are published in journals; in this way, for example, they will cite First Author [*et al.* is appended if there are more], date, *Journal Title*, volume and pages.

The arrangement of citations by authors in *THE GRAND CANON* is not precisely alphabetical by all authors of a publication; an arbitrary decision. The format followed (as illustrated below) is: single-authors first, dual-authors second, and, third, all multiple (more than two)-author citations then in strictly alphabetical order regardless of the number of authors. Some dual-author citations may appear out of alphabetical order before the multiple-author citations (see below). This scheme is followed for the

---

reason that sometimes a reader must reverse-discern the authorship of an item without knowing all of the names. The reader may have in hand a citation only for “Author Name et al.”, which usually indicates three or more authors for the cited publication; thus will not have the complete list of authors. The citationist’s own full list of references cited may not be available, or the editorial style of a journal may systematically omit all multiple-authors’ names from citations (for example, in the mainstream journal Science, which also omits the titles of papers within cited journals), it is more difficult for the reader to determine who are the authors. In a very long list of publications (for example, the geological publications of Edwin D. McKee), searching through all of the author’s publications will be decidedly more tedious than searching through just the listing for multiple authors for which this author is the lead author (see McKee’s examples here).

Authorship listed as “Anonymous” indicates only that there is no signer. When in the rare circumstance that an item is actually signed, “Anonymous”, that fact is also indicated in a note to the citation. All “Anonymous” items within each part of the bibliography are listed first, preceding “A”.

Following are some examples of how authors are listed in THE GRAND CANON.

Single authors are listed first:
1. Smith, A. B.

Dual authors are listed second:
2. Smith, A. B., and Anderson, J. L.
3. Smith, A. B., and Zimmerman, J. L.

All multiple-author citations then follow in alphabetical order; they are separated from the others, when appropriate, by a list interjection in red:

Smith, A. B., et al.*

4. Smith, A. B.; Anderson, J. L.; Jones, C. D.; Smythe, M. N.; and Betson, A.
5. Smith, A. B.; Jones, C. D.; Smythe, M. N.; and Anderson, J. L.
7. Smith, A. B.; Smythe, M. N.; Zimmerman, J. L., and Jones, C. D.
8. Smith, A. B.; Zimmerman, J. L.; and Jones, C. D.

*The list interjection in red is used in this bibliography to separate groups of one- or two-author citations (for the same first-author name) from multiple-author citations in juxtaposition (according to the order depicted above). The concluding citation within the “et al.” group is followed by: “•” (in red, as shown directly above). The interjection is not used when only multiple-author citations are present for a particular first-author name (that is, no citations with the
In a strictly alphabetical sequence—**not used in this bibliography**—the citations shown above would be listed as follows (retaining the enumeration shown above):

1. **Smith, A. B.** [1 author]
2. **Smith, A. B., and Anderson, J. L.** [2 authors]
3. **Smith, A. B., and Zimmerman, J. L.** [2 authors]
4. **Smith, A. B.; Anderson, J. L.; Jones, C. D.; Smythe, M. N.; and Betson, A.** [5 authors]
5. **Smith, A. B.; Jones, C. D.; Smythe, M. N.; and Anderson, J. L.** [4 authors]
6. **Smith, A. B.; Jones, C. D.; Zimmerman, J. L.; and Betson, A.** [4 authors]
7. **Smith, A. B.; Smythe, M. N.; Zimmerman, J. L., and Jones, C. D.** [4 authors]
8. **Smith, A. B.; Zimmerman, J. L.; and Jones, C. D.** [3 authors]

Note that were one to have in hand a second-hand citation for “Smith et al. 1947”, not knowing the names of the other authors, one would in a strictly alphabetical list have to search the entirety of the Smith citations for a 1947 citation rather than just the multiple-authored items that would follow “Smith and Zimmerman”.

The alphabetization of authors’ names that include an abbreviation (for example, St. John) are placed in this document in the traditional location of spelling them as if they are spelled out (Saint John). I otherwise do not retain the classical card-file, phonetic but arbitrary, alphabetization of “M–”, “Mac–”, and “Mc–” preceding all “M’s”; I list each in the more modern, strictly alphabetical order. For example, the traditional (old-fashioned “office-school”) filing scheme (not used herein) would list, in order:

- M'Allen–MacAllen–McAllen (as if all were spelled “MacAllen”)
- MacClure–McClure (as if both were spelled “MacClure”)
- MacDougal–McDougal (as if both were spelled “MacDougal”)
- MacNally–Mac Nally–McNally (as if all were spelled “MacNally”)
- McPherson–MacPherson (as if both were spelled “MacPherson”)
- Mabrey
- Mackey
- Maclure (not “MacClure” nor “McClure” but may unwittingly be placed with the “Mac”s)
- Mellon

The more modern scheme (used herein) reflects letter-by-letter alphabetization. These authors will be listed in order as:
Alphabetization in some cases follows traditional bibliographical (or “library” or “filing”) schemes. For example, surnames beginning with “St.” are alphabetically positioned as if they were spelled in full, “Saint”. In the cases of “Van” versus “van”, and “Von” versus “von”, the capitalized form is alphabetized as “Van” or “Von”, while the lower-case form follows the name. For example, the full name “Ernst von Seydlitz” is alphabetically arranged, “Seydlitz, Ernst von”; similarly for others, and “vom” is always lower-case, as in “Gerhard vom Rath” (“Rath, Gerhard vom”). When a surname begins with a lower-case letter for a prefix that is not separate from the full name, it is alphabetized on the lower-case intial letter; for example, “deSaussure”. In some instances in this bibliography, inconsistent usages in the literature for the same individual are noted, as with “Le Conte” and “LeConte”, or “La Rue” and “LaRue”, and when possible the author’s own preferred or otherwise documented usage is followed. (See more, farther below.)

In the Internet Edition of this bibliography, online, queries retrieve results in strictly Boolean, alphabetical order, then (following programming) chronologically within each unique author string. The difference is one of technology versus tradition. Of course, an algorithm could be created to return even online results in the traditional fashion as shown above, but this is not necessary for the purpose of simply obtaining results. Inasmuch as the online citations are exported from the present document (THE GRAND CANON), I continue to maintain THE GRAND CANON in the format of a traditionally printed bibliography—a means by which to display the contiguous whole of the work, in a format that safeguards that of an aesthetically proper printed version, which thus can be produced if necessary.
An author’s name has been partly standardized, where, for example, it is spelled out but in different publications it may be spelled with first initials or even a nickname. Not all such instances have been standardized, however, since an attempt has also been made herein to preserve the names under which a particular item has been published (and by which a librarian’s request for a copy on behalf of a patron may be fulfilled). One example is the ecologist Lawrence E. Stevens, who also publishes as Larry Stevens, whether the item was one of formally published scientific content or one for a general, informal readership. In this bibliography his citations will be located under both names, sometimes with a cross-reference to one or the other. In the event that *THE GRAND CANON*’s author citations are fully standardized in the future, each instance will have to be accounted for.

One may expect a single spelling for an author’s name, but as this is not the case many libraries (including the Library of Congress) devise cataloging schemes that standardize as best as possible the names of authors. I, however, prefer to use an author’s usage when he or she may write under several different names in separate venues; for example, a full given name, a nickname, or a pseudonym. Where possible, I provide cross-references so that searches will find all pertinent citations. Another deviation I make from conventional cataloguing schemes like that of the Library of Congress is to acknowledge both text writers and illustrators in the author field, at least so far as when these attributes are acknowledged together on a title-page (but only when they are so acknowledged).

When I began compiling this bibliography in 1974, I had begun with the mistaken impression that a conventional citation style was to use only the initials for authors’ given names. I had gotten this impression from the house styles of some of the technical journals I was then reading. I continued this process for some time before realizing that it was not only unnecessary, but contributed confusion. Eventually, I retrocited most authors’ names, but there may be occasional instances throughout the bibliography where I am not aware that an author cited with initials had a fully spelled name in the publication, which I have not seen since or had relied upon another citation.

Care must be taken by the user in knowing, or making assumptions for, an author’s name that may be spelled in slightly different ways. The alphabetization scheme is precise, and precise spellings are unforgiving. One user of the bibliography was dismayed to find that I had not cited any of the important works by the early Colorado River hydrologist E. C. La Rue; but the user had not found the citations because the query had looked for “LaRue” (with no space). Oddly enough, they might likewise have had difficulty even in a traditionally published bibliography, where for example “La Rue” (space) would appear before “Laddon”, and “LaRue” (no space) would
appear after “Laddon”. The search software in the online bibliography is not so sophisticated as to return “La Rue” and “LaRue” together. And, even though a general literature search beyond this bibliography may find both “LaRue” and “La Rue” in citations, as well as published by-lines similarly spelled, I have adopted the author’s own preferred usage, “La Rue”, with the space.

I have used spellings as they appear according to authors’ usages, and from title-pages, rather than usages standardized by cataloguers. This is because I trust that the author’s own usage is authoritative and intentional, which conveys biographical information as well as bibliographical. In the rare occasions where an author’s name is in fact misspelled on a title-page or in a by-line, I have cited it in correct format with a notation of the incorrect spelling.

In instances where an article was written by one person, and illustrated by another, I list both names (or as many as which occur) in the author field so as to attribute the creative work of all contributors. If, however, an illustrator’s name is typographically separate and diminutive, or noticeably separate from the main by-line, only the author is cited in the author field; and in which case the illustrator will be added parenthetically within the citation. Again, the author’s or publisher’s intent is followed to convey truthful bibliographical information, rather than applying an arbitrary rule of conformity that eliminates that information.

An occasional, special circumstance arises whereby authors’ names are arranged according to the cultural specifics. Usually, Chinese and some other Asian names are written with surnames first, followed by given names; in the bibliography, a comma is interjected as appropriate to separate the surname from the given name to follow bibliographical convention only. For example, “Li Hongzhi” is bibliographically listed as “Li, Hongzhi”; in rewriting it the format should remain with the surname first (not “Hongzhi, Li”, which would be in error). In publications in Western languages the names of Chinese and some other Asians will have been already been transferred by convention to the surname-last Western style of name order; specifically for this example, the by-line in a publication will display “Hongzhi Li”. Occasionally, editorial discretion will list the name properly (Li Hongzhi), though no special notice will be made of this, and it will be up to the reader (or bibliographer) to ascertain the correct format. In the case of Icelandic names, proper bibliographical convention calls for the surname first but which should not include a comma, such that the name reflects the familial relationships thus indicated by this cultural usage. For example, the citation for the two-author item by “Ragnheiður Ólafsdóttir, and Halldóra Hreggviðsdóttir” remains as such; in these cases both authors are expressed as daughters of given individuals of particular families (click here to see the full citation, Item no. 13.2501). The comma is used to bibliographically
separate the two authors. (Within this bibliography the Icelandic characters of this example do not interfere with the alphabetical order of adjacent names. Were they to interfere, the character “ð” would be alphabetized as like the digraph “th” in the English word “them”, which is, more properly, a “voiced dental fricative”. Incidentally, in Icelandic ð never occurs at the beginning of a word or name. But this is probably more information than the reader wishes here!)

**Dates**  ❖ Only stated publication dates are used in *THE GRAND CANON*; that is, only years that are indicated on the title-page, or elsewhere in or on the publication in such a way that unambiguously records the *publication* date. For example, a communication dated 1862, compiled into a collection of communications for the year 1862 but not published until 1870, carries the date 1870.

If a date is not so indicated, “no date” is inserted in the date field of this bibliography. If a date is subsequently ascertained, or if one is interpreted or approximated, the information is included in a comment at the conclusion of the citation; “no date” remains in the date field. Items with “no date” are listed prior to dated items.

“Western” years are used in dates. When a document also provides a culturally different year (as in this Persian example), that date is included in a comment.

**Titles**  ❖ In every instance, the title of an article or book is authoritative. They are cited in *THE GRAND CANON* exactly as they appear in the published works, including misspellings and punctuation.

The only concession I made to a “house style” for *THE GRAND CANON* is the use of a semicolon between a title and a subtitle (for example, *The title is here; the subtitle here*.), except where the original work has used instead a period or a colon. This is a style that I had used since beginning the bibliography in 1974, and it is rather impossible to now retrofit the citations to a style more in keeping with those used by libraries, where breaks between titles and subtitles are separated by a colon that is itself between spaces (for example, *The title is here : the subtitle is here*). Applying a simple global replacement of my use of the semicolon in this bibliography is not possible because in some instances there really is a semicolon or a colon. Verifying each instance against the originals is now pragmatically impossible.

Capitalization in titles is not fully capitalized even where the typeset title has every main word capitalized. Such a citational style makes for a more easily read citation, and except in some historical or purely bibliographical venues the mostly lowercase style of title citation is conventional. The only concession to this rule is the retention of capitalized nouns in German.
In foreign-language titles, diacritical marks are displayed as printed. Sometimes the marks are omitted, as shown, or in some house printing styles diacritical marks are omitted from capital letters. No attempt has been made, in titles, to insert missing diacritical marks when they otherwise should be present according to proper spelling in that language. (Regarding diacritical marks in *THE GRAND CANON* more generally, see the section on diacritical marks.)

*Italics* convey the information under which the publication is most likely to be found in a library. Full, complex titles are cited unless special circumstances call for the use of an ellipsis (…), such as to omit lengthy lists of extraneous information on the title-page such as an author’s academic credentials or affiliations. (*THE GRAND CANON* does not strive to perfectly reproduce the bibliographical content of title-pages, but rather it conveys the *citational* data contained on title-pages, verbatim.) In some instances where the citations were received through another authority who used an ellipsis, and I have not examined the title myself, I retain the ellipsis without remark. Where an ellipsis is actually a part of the title, I so indicate with an annotation to that effect. Little standardization has been employed in citing article and book titles in this bibliography, so as to maintain precision; an exception is the insertion or spelling out of “Volume” where such is necessary (when it is not part of actual usage), and similar contextual changes. Typographical errors are denoted by the interjection or suffix “[sic]”.

Where I have had to contrive a title, such as when an item is not headed by one, I enclose the contrived, descriptive title within [square brackets]. In some cases a title may be ambiguous, uninformative, or seemingly not pertinent to the Grand Canyon–lower Colorado River region. In these instances I appended to the citation a square-bracketed comment that briefly explains the pertinent content.

I distinguish between periodicals (regularly issued publications) and serials (irregularly issued publications usually as separate volumes in a series of one name). Generally speaking (take note also of the italicization scheme in these examples), a periodical will be cited as like

Title of article. *Periodical Title*, volume(number)(date/time of year):pagination

while a serial will be cited as like

Title of work. *Serial Title, number*, pagination.

In the case of books that have been issued as part of a series, the series title is usually placed within parentheses at the end of the bibliographical citation, thus:

*Title of book*. Place of Publication: Publisher, pagination. (Series Title.)
Regarding the styles of citation for periodicals and serials, see the section, Periodicals and Serials Cited in the Bibliography.

**Editions**

Citations of books that have gone through more than one edition attempt to be comprehensive, insofar as only editions that contain material relating to Grand Canyon or the Colorado River are cited. However, not all editions of some publications have been examined; so, for example, if only a 3rd edition is cited, one should not automatically suppose that the 1st and 2nd editions omit coverage of the region of interest. In other instances, various editions have been prepared by different authors. In such cases, when possible a notation is included with the various editions that will point the user to the authors of the earlier or later editions, as appropriate.

**Publications Printed on Demand**

Since the latest part of the 20th century a broad effort to print publications on demand, rather than distributed from a warehoused stock, has expanded the availability of numerous publications. (While these are similar to the publications of “vanity presses” that publish works paid for by the authors, they differ in that individual copies are printed quickly when called for.) Some of these are recent titles that publishers do not see economy in keeping continuously available in their physical format. Numerous more are titles that are out of print, especially those that are now in the Public Domain (that is, their copyrights have lapsed). It is this latter venue that is most attractive to numerous distributors, who may reproduce these works at the cost only of immediate production and replication on an individually ordered basis. These may be either in facsimile or reproduced through optical-character recognition methods, or even through a outright resetting of text; some may include the original illustrations, many omit them (and usually without removing references to such illustrations). Some are very well done; others are embarassingly sloppy. The publication-on-demand market has become widespread even if not widely used by readers; yet another reason that its economy is sensible to its distributors. And as may be expected, the larger number of such publications are culled from the Public Domain simply because they are “ripe for the picking”. One good example of the diversity of both conventionally printed and on-demand publications may be found in Harold Bell Wright’s novel of the irrigation empire of the lower Colorado River, *The Winning of Barbara Worth*.

In *The Grand Canon*, titles that are published on demand are cited, but there has been no effort made to purposely find all such available titles; only those that have been found during other routine searches or serendipitously are included here. Because there are so many, and because the dates of publication are not necessarily authoritative, citations for publications on demand must be taken as strictly informational guides to what is available, bearing in mind the caveats just mentioned.
Scholarly Symposium Publications  ❖  There are many variations of titles of symposium proceedings, field guides, and other volumes from scholarly meetings—and about as many methods of citing them. This bibliography attempts to remain as faithful as possible to the ways in which the titles and additional publication data are written, rather than invent a standardized citation. This method may be more advantageous because some libraries may catalogue them in different ways which depend upon the skill of the cataloguers as well as the organizational schemes used in the library. In this manner, the actual title or data from the document can be referred to in such a way that the local librarian can examine it and determine how it might have been catalogued there.

Some such publications were more traditionally published, as separately citable, separately sold books that happen also to be symposia proceedings. Most, however, are quickly produced documents with limited distribution, such as to the conference attendees. Such forms of “gray literature”, while they are in turn cited in later publications, are especially problematical documents to those who try to find them. Listing them in a bibliography is as much a contextual approach as it is one of standardized procedures of cataloguing (and citation).

Sometimes, the titles of a symposium as published reflect an “officially sanctioned language” with which all official transactions and published communications were spoken and published. For example, early meetings of the International Geological Congress used French as their official language; today it is English. Possibly, publications distributed under such sanctions may, in some libraries, be catalogued according to their published titles; others may catalogue them by a standard which conforms to the home-language while taking in a verbatim quotation of the specific title. Thus, for example, the Compte Rendu of the “Sixième Congrès International de Stratigraphie et de Géologie du Carbonifère” may be catalogued as “International Congress of Stratigraphy and Carboniferous Geology, 6th, Compte Rendu” or “Congrès International de Stratigraphie et de Géologie du Carbonifère, 6th, Compte Rendu”, depending upon the cataloguing scheme.

The permutations seem endless. In the matter of a disclaimer, some citations have been taken on the authority of other researchers, whose citations may not be whole or precise; these have been cited in THE GRAND CANON in the best-adapted format.

United States Government Agencies  ❖  “U.S.” is used as a prefix to titles that are from federal government agencies of the United States of America, whether or not “U.S.” or “United States” is part of the name or title; for example, the Government Printing Office in Washington, D.C. is cited as “U.S. Government Printing Office”, or
the National Aeronautics and Space Administration is cited as “U.S. National Aeronautics and Space Administration”. In some cases, for standardization “U.S.” is used as a contraction in a serial title or agency name where “United States” is actually spelled out; for example, “U.S. National Academy of Sciences”. Another variant is the “Supreme Court of the United States”, which in THE GRAND CANON is alphabetized under “U.S. Supreme Court”. However, in book and article titles “U.S.” and “United States” are cited as they appear in the title; this includes variations of abbreviations, such as “US”, “U.S.”, “USA” and “U.S.A.” Similarly, abbreviations of any kind, when appearing in a title, are reproduced exactly as printed.

Within the scope of THE GRAND CANON the commonly encountered bureaus within U.S. governmental departments are attributed by the bureau names rather than as a subset of the department. For example, the U.S. Department of the Interior, Bureau of Reclamation, is cited in this bibliography as U.S. Bureau of Reclamation; and U.S. Department of the Interior, National Park Service, is cited as U.S. National Park Service; or, the U.S. Department Agriculture, Forest Service, is cited as U.S. Forest Service; and U.S. Department of Commerce, National Oceanic and Atmospheric Administration (often referred to as NOAA), is cited as U.S. National Oceanic and Atmospheric Administration. Some less commonly encountered agencies, or outdated uses, are cited with their departmental affiliations for greater administrative clarity; for example, U.S. Department of Commerce and Labor, Bureau of the Census. However, such conventions may not be consistent.

Places of Publication

City names in the place of publication are listed with the state in which they occur regardless of whether it is specified in the publication (for example, “St. George, Utah”). This is done to facilitate more ease of use among those who may be less well informed about American geographic locations, even though the additional information may not appear on the title-page or with publisher’s information. Exceptions are major world cities (for example, New York and London) and certain frequently cited major American cities, such as Chicago (Illinois), Denver (Colorado), Las Vegas (Nevada), Los Angeles (California), Philadelphia (Pennsylvania), Phoenix (Arizona), Salt Lake City (Utah), San Francisco (California), and Tucson (Arizona). “Washington, D.C.” is used for the District of Columbia.

Outside of the United States, with the exception of major world cities, the places of publication are listed as given in the publication, including where names are translated into another language (Latin, for example). Countries are added where they are known when it is prudent to do so.

No abbreviated state or province names are used, except in the cases of direct quotations of titles. Foreign readers should not be expected to understand, or to try to
find out the meanings of, the two-letter postal-code abbreviations for U.S. states and Canadian provinces (for example, “ME” for Maine, “MN” for Minnesota, or “NJ” for New Jersey) or their older contractions (“Me.”, “Minn.”, and “N.J.” for these same examples).

**DIACRITICAL MARKS**  In *THE GRAND CANON* diacritical marks are reproduced faithfully; accordingly they are omitted when *not* so printed even when the language properly uses them. Diacritical marks are reproduced in authors’ names, too, when so used. Characters with diacritical marks are alphabetized as if they do not have these marks; for example, O, Ó, Ò, Ö, Ø all are alphabetized as like “O”. (This is notable because in some languages, such as Swedish, letters with diacritical characters are alphabetized following “Z”; for example, O precedes Z as one expects, but Ø comes after Z.)

Diacritical marks present in *THE GRAND CANON* may not be displayed in the Internet Edition of the bibliography because some extended or special HTML entity codes were not accommodated in the conversion to XML format during earlier years of the online presentation. In those cases, the equivalent unadorned Latin letter was used. For example: ć as printed in *THE GRAND CANON* is c online, Ş is S, or ż is z. The same principle applies for diphthongs, like æ and œ [Latin] or ij [Dutch], which often will have been retyped for the online version of this bibliography as double-letter ae, oe and ij, respectively. I have sometimes preserved the use of diphthongs in citations, and adding if necessary a double-letter version in a square-bracketed phrase appended to the citation to allow conventional searches to locate these citations. However, I have not been consistent, given the fact that I am now beginning the fifth decade of compiling this bibliography; the inconsistencies lie with the older citations that do not reproduce diphthongs. Still, I have preferred to preserve original uses as much as possible because I believe that eventually the technological means will be available to conduct searches that will return in single searches the diacritical equivalents to plain-letter characters. In the meantime, users might consider using a shorter or modified search string or, if diacritical characters are known in their proper places, by using wildcards in the search string.

In a few instances, I have pasted a citation into *THE GRAND CANON* that reproduces the original, non-Latin typography of a title. For example, one Korean citation includes the Korean characters, and a Burmese citation includes special character entities that could not be replicated with the expanded entity lists generally available. For a group of non-Latin titles restricted to one author, see under the novelist Arthur C. Clarke. The non-Latin character strings, though, do not appear in the Internet Edition online; only here in *THE GRAND CANON*. 
Reviews ▶ The Reviews section of the bibliography (PART 30) contains critical and casual reviews of publications and products, listed by the author of the review. In retrospect, I should have preceded each citation with a square-bracketed notation, “[Review]”. Unfortunately, even though an online search in the Internet Edition retrieves the author’s name of a review, the fact that the citation also includes the author’s name of the publication under review has led some users to assume that the cited subject of the review is yet another publication by the reviewed-publication’s author. For example, the citation

Aiton, Arthur S.

could be misread as an item authored by Bolton in Hispanic American Historical Review—even though the author field clearly indicates “Aiton”. (An example like this was noticed and queried by a professional librarian, who should have determined the distinction without a special square-bracketed notation. So I must likewise assume that my oversight in not specifying “[Review]” may lead to confusion even among regular users of the online bibliography, where the only sure clue that a citation comes from the “Reviews” part is the “30.” prefix in the Item number.)

When using the Internet Edition of the bibliography one should always be aware of the section from which a citation has been retrieved, as indicated by the first part of the Item number. In this way not only can misconceptions like the example above be avoided, taking notice of the Part number that is incorporated as part of the Item number (before the decimal) will indicate whether the item is, for example, a general work (2.), fiction (7.), poetry (8.), an audio-visual work (26.), a review (30.), and so on. This is additionally useful for items that have a categorically ambiguous title, like “The Grand Canyon”.

Works in Foreign Languages ▶ The bibliography includes citations for works written in 64 languages other than English, including several Native American languages and the artificial language Esperanto. While some languages are represented by a large number of citations, such as French, German, and Spanish, others are represented by a few citations, many times by one. This does not mean that some languages have published only very few items about the Grand Canyon; it means only that few publications in those languages have thus far been found for THE GRAND CANON. Further discoveries will be either serendipitous or as the result of a concerted program of bibliographical research. The citations in this bibliography should not be construed to be “everything”—only everything that I and contributors have thus far found. Similarly, there are likely to be some languages not yet represented herein that
have pertinent publications about the Grand Canyon or the Colorado River. (A complete list of foreign languages cited in the bibliography at this time follows farther below.)

Lest one be perplexed by a foreign-language citation, the proliferation of online translators (for example, http://translate.google.com) will greatly assist with some of them. Many automated translations, particularly those for common languages, are quite satisfactory; and for those that are not so satisfactory, such as with languages very different from the European traditions, often they provide enough so that even if one is wholly unconversant in a language the gist of what is written can be discerned.

Foreign-language citations usually are cited as they appear in the originals, with the exception of languages that use non-Latin characters, which then are cited either in transliteration or parenthetical English translation, or both. Nevertheless, even though one user or another may not be able to read Norwegian or Welsh, for example, citations still are useable and, should the user need to follow up on some with assistance they may do so. In any case, translations of foreign-language titles are not often provided in THE GRAND CANON. Even though some reliable automated translation programs are available through the web, subtle nuances can be missed, so only professional assistance should be relied upon if translated titles are desired in future versions of this work.

The user is at an advantage if he or she is attuned to the typological or etymological appearance of different languages. One should be able to at least recognize in a general way common languages that may be represented among non-English citations, without having a notation indicating the language. For the most part, in THE GRAND CANON common languages like Dutch, French, German, Italian, and Spanish are not specially indicated by a comment (although a few citations carried over from older editions of this bibliography and overlooked during editing may include such comments). In other cases, languages perhaps less familiar to most users of this bibliography are indicated as a comment [see examples in Estonian, Finnish, Hungarian, and Welsh], which may be especially useful among languages that are outwardly similar [for example, Danish and Swedish; or Czech, Slovak and Slovenian]. In other cases, I have included a notation identifying the language so as to clarify citations that have been transliterated to Latin characters from non-Latin character sets [see examples in Arabic, Chinese (traditional and simplified character forms are not differentiated in this bibliography), Georgian, Greek, Hebrew, Japanese, Korean, Russian, Thai, and Ukrainian], or sets that contain additional characters not used in otherwise Latin alphabetic sets [see example in Icelandic]. Others are wholly contrived alphabetic sets based on Latin letters and diacritical marks [see examples in Burmese, Navajo, Southern Paiute, Thai, and Vietnamese]. In the case of transliterated citations,
particular schemes of transliteration are not indicated because the sources usually do not indicate that information. Occasionally, an English-language title may also be printed in a source that is otherwise in a foreign language. In such cases the English-language title is used as provided in the publication [see examples from Czech, Japanese and Hungarian]; occasionally I have had to clarify a translated title [see example in Korean]. In some cases only a translation within square brackets serves as the citation [see example of this kind for Japanese]. For the most part, detailed portions of foreign-language citations are not offered in English translation, but when a translation is also provided in the document is it included in the citation [see a full example in Vietnamese] or where a partial description was in English but an online translator was used to establish a fuller translation [as in an example in Macedonian]. In a very few cases in THE GRAND CANON (not in the Internet Edition of the bibliography), non-Latin foreign language scripts have been copied into the citation, but these have been opportunistic inclusions only and are not the norm [see examples in Chinese, Hebrew, Korean, Mongolian, Persian, and Russian; or, in an example in Greek that was originally in all-capital letters, transcribed for the bibliography as capital and lower-case Greek letters]. And in one instance a Latin character-based language with some diacritical marks not generally available in word-processing programs has been copied into the citation as an image, with a transcription without diacritical marks also provided [see example in Burmese]. And of course, the references here to “Latin” refer to the characters, although thus far one item published in the Latin language is noted herein, which reflects Latin having been a more universally used scholarly language centuries ago.

Listed below are the 64 languages, other than English, represented in citations in THE GRAND CANON. (Recall that a work need only mention the Grand Canyon or lower Colorado River cursorily for it to be included in this bibliography.) While for most of these languages only a few citations are listed (sometimes just one), they still represent the diverse spread of attention to the Grand Canyon and the Colorado River in publications worldwide. Surely more references may be found for those languages, and in additional languages that are not yet included here. Clicking on a name will take the user to an example in one of the several possible citation styles noted above:

Afrikaans
Albanian
Arabic
Basque
Burmese
Catalan
Chinese
Croatian
Czech
Danish
Dutch
Esperanto
Estonian
Filipino (Tagalog)
Finnish
Flemish
French
Frisian
Georgian
German
Greek
Haitian Creole
Havasupai
Hebrew
Hindi
Hualapai
Hungarian
Icelandic
Indonesian
Italian
Japanese
Kaqchikel (Mayan)
Kazakh
Korean
Latin
Latvian
Lithuanian
Macedonian
Maori [not counted\textsuperscript{44}]
Malay

\textsuperscript{44} No citation in this bibliography is in Maori itself. However, one serial in French from Tahiti gives its organization’s slogan in Maori (see Item no. 2.20643) (M. Pierre). Another example is a newsletter from New Zealand (Item no. 2.21536) (C. Orr). ("Maori" is not counted in the total number of languages represented in this bibliography.)
Mapuzugun (Mapuche)
Mongolian
Nahuatl ("Aztec")
Navajo
Norwegian
Persian
Polish
Portuguese
Romanian
Russian
Serbian
Slovak
Slovenian
Southern Paiute
Spanish
Swedish
Thai
Turkish
Tz'utujil (Mayan)
Ukrainian
Urdu
Vietnamese
Welsh
Yiddish
Yucatec Maya

In addition to these foreign languages, items produced with various forms of symbolic notation are also included in this bibliography. For example, Part 5 of the bibliography includes items printed in Braille and Moon Type. Another example is an item that was written in Eurospelling, which is one attempt to provide consistent spellings for pronunciations. Still another example displays an English text also in phonemic characters as part of a study of the phonetics of informal spoken language.

**Brief Content Entirely Quoted, and References passim and “in passing”**

- In some cases herein, when a pertinent reference to Grand Canyon or the Colorado River is exceedingly brief, I have chosen to quote the passage in full as a square-bracketed note. These remarks are clearly indicated with the comment, “(entire note)”, “(entire item)”, or some similar explanation. Generally, “entire item” is used to denote
that the entire text is quoted and is not an extract; “entire note” is used to denote the
quotation is the whole pertinent part of a longer item, about which the remainder is not
pertinent to this bibliography. This is done as a matter of placing the citation in context.
It is also a courtesy to the user, who thus may be spared the time (and expense,
probably) of acquiring or gaining access to a copy of the work, only to find there the
single, brief remark. Furthermore, the items often have generalized titles or no title at
all, which does not identify the content in the useful context intended by this
bibliography. The limit, though, is subjective; occasional short passages in print may not
be quoted in their entirety and thus not marked by a comment. Some citations compiled
during the early years of this bibliography will not have any brief-content notes.

If mention of the Grand Canyon or Colorado River is brief, it is so indicated,
usually with the notation, “in passing”, italicized to draw attention to it. These citations
are included when there is more than a “drop of the name” Grand Canyon or Colorado
River. For example, a writer’s passing remembrance of the “vast quiet” of the Grand
Canyon, is significant enough to include the reference in THE GRAND CANON (particularly
if the comment was made long before modern concerns of preserving the “natural quiet”
of the canyon45). But if a writer takes note only as a point of reference or comparison (for
example, “it reminded me of the colors of the Grand Canyon” or “it is like the Grand
Canyon”), the item’s citation does not warrant its inclusion here. The comment must
surely, even if only briefly, embrace some informational context about the canyon or the
river.

The phrase passim is used only where it is meant, “here and there”, which
indicates there are several or numerous, usually scattered, references to the canyon or
river. The term passim is often misused to mean “in passing”, implying one instance.
For a few scattered references in a large work, I usually indicate more clearly the
situation either by the citation of pertinent page numbers or by special remark, though
passim is used (correctly) when there are frequent references in the work that otherwise
is not chiefly about either the canyon or river.

Occasional notes of the presence of a person or a group of people at the Grand
Canyon will be included among the citations. These are accompanied by a note as to the
name of the person or group, as a means by which to document their presence at Grand
Canyon at the time indicated. Most often these references pertain to a part of an
itinerary rather than the Grand Canyon as ultimate destination. Usually, if a person
was renowned there may be a few additional comments, perhaps even a photograph or
two, in the cited item; for example, the visits to Grand Canyon by Albert and Elisabeth,

---

the King and Queen consort of the Belgians, and by Mme. Marie Curie the twice Nobel laureate in chemistry and physics.

**NOTES**  
Citations have notes appended to them within square brackets. These can be special bibliographical comments or my comments about the cited work that I deem to be important, explanatory, or in some way disambiguating. For example, as a matter of policy I make every attempt to spell out acronyms that appear in a citation but are not otherwise explained in the citation; the fully spelled phrase will appear in a square bracketed comment at the end of the citation, which may be useful for future times when the acronyms are no longer commonplace (in their field) or known to readers.

A special group of notes are those that are “see” notes, which refer the reader to specific pages within the publication that I have identified as pertinent to either the Grand Canyon or the lower Colorado River. Given the dual perspective of *THE GRAND CANON* (the Grand Canyon and the lower Colorado River region), I sometimes indicate whether some of the “see” notes pertain only to the lower Colorado River. By default, one may assume that if no special indication is made that the pages referred to pertain to the Grand Canyon, as opposed to the Colorado River corridor below Grand Canyon; although in some instances both regions may be embraced by the “see” note, which will usually be so indicated. Given that the earliest known *published* references to the Grand Canyon appear in the 1850s, “see” notes that precede this time will by default refer to the lower Colorado River region.

One of the efforts I have made in *THE GRAND CANON* that is in variance with the citations that are retrieved in the Internet Edition is to standardize most appended comments, including “see” notes, within square brackets. In the Internet Edition one may see some comments within parentheses, which reflects the inconsistencies of compilation over near forty years.

Occasionally, I have interjected a search-friendly rephrasing of a title so as to make an “expected” phrase locatable in a digital search. For example, Charles Francis Saunder’s *Finding the Worth While in the Southwest* will be missed if one does not know the precise spelling of the title, searching instead for “Finding the Worthwhile in the Southwest”. In the citation I have added the interpretive assist inside square brackets. Similarly, old-fashioned or misspelled words in titles will be properly spelled within a note so that the user may locate the item when properly spelling it and not knowing of the error.

**Comment on Typography**  
Super- and subscripts are used in this document. In a few rare cases, subscripts that have further, extra-subscripted characters are

---

46 Item no. [2.5652](#).
not typographically displayed as such, but as a single layer of subscript characters. In context, these are not ambiguous.

In the Internet Edition of the bibliography online, however, some limitations were met with HTML coding and the website’s parser, which failed to follow the coding for super- and sub-scripts. In that venue carets (^) have sometimes been used to indicate characters that are superscripts; subscripts are denoted online with an interjected “[subscript]” or similar notation. (See also the section on Diacritical Marks.) Again, THE GRAND CANON displays everything as actually published.

Undetermined Information  

In the matter of a disclaimer, this bibliography is always a work in progress. In a few places, informational parts of a citation include an underscore, _______, thus, which indicates missing information. Nevertheless, enough critical information is present, and deemed useful enough, to warrant including the incomplete citation in THE GRAND CANON. I was not able to see the complete information either because the document was not available or it was an imperfect copy; and should the information be obtained, the citation will be emended. It is useful in this fashion so as to alert users of potentially useful items that they may be able to locate for their work through other means.

Item Numbers

Every citation is accompanied by an “Item Number”; for example, 2,4598 is no. 4598 in Part 2 of the bibliography (GENERAL PUBLICATIONS). Item numbers were created for the Internet Edition of 2000; earlier, print editions of the bibliography had no enumerations. Within each part of the bibliography, items are enumerated beginning with “.1”. Additions within each part continue the enumeration for the part. To avoid any future confusion, item numbers for citations that are deleted from the bibliography, or are moved from one part to another (and so renumbered), are not reused.

While an item number provides a unique number for every citation in the bibliography, it is also useful when using the Internet Edition on the Grand Canyon–lower Colorado River website (www.grandcanyonbiblio.org). By taking note of the item number that accompanies a citation, a user can determine the Part of the bibliography in which the citation has been categorized. This is helpful online when citations are returned from multiple parts of the bibliography; except for the item numbers, parts (and hence subject areas) are not otherwise explicitly indicated onscreen. In some instances a title itself may not provide an indication of the item’s category or medium; for example, a title, The Grand Canyon, by itself is not informative in this regard, but an
item number beginning with “6.” would indicate that it is a Youth title, “7.” would indicate a work of Fiction, and “27.” would indicate an Audio-Visual Work. See the Content Guide for a complete description of parts of the bibliography.

Citations within each part of the bibliography are enumerated beginning with “1”; thus for example, Item nos. 1.1, 2.1, 3.1, etc., were the first enumerated items in Parts 1, 2, and 3, respectively, when the numbers were first assigned in late 1999. Because sometimes a citation is deleted from the bibliography, the last-used number with a part is not the number of citations within that part. Item numbers are not reused when a citation is deleted. Accordingly, not all consecutive item numbers in a given part of the bibliography will be present. Numbers are not reused as a precaution against duplicating numbers in error. (Once in a while a duplicate number is found in the Internet Edition, which was a mistake introduced by me while compiling citations. Duplicates, when discovered, are remedied, so that there should be no duplicate item numbers in the bibliography.)

Take note that item numbers are not in sequential order within any part of the bibliography. While they were sequential when the first state of the Internet Edition appeared on the Grand Canyon Association website in 2000, all subsequent additions have been made as inserts into THE GRAND CANON. Thus the numerical order of item numbers within each part is now random.

Actual enumerations applied after 1999 roughly (but not precisely) follow the chronology of additions to the bibliography; that is, higher numbers are later additions.

Cross-Listings to Print Editions of the Grand Canyon—Lower Colorado River Bibliography

THE GRAND CANON includes cross-listings to its earlier print first and second editions: Grand Canyon Natural History Association Monograph 2 (1981), and Grand Canyon Natural History Association Monograph 8 (1990) with its Supplement 1 (1993). The formats of cross-listings here and online differ, as is discussed below.

In THE GRAND CANON cross-listings to Monograph 2 are straightforward, citing listings by page number; for example, [cited»GCNHA Monograph 2: page 42]. The user who follows cross-listings will notice that corrections to citations have been made (some of them significant), that later emendations have expanded many citations, and that many citations were reassigned to other topical parts of the bibliography.
Cross-listings for page numbers from Monograph 8 reflect the individually numbered parts of that monograph; thus for example, a citation on page 53 of Part 1 of Monograph 8 is cross-listed as |cited>GCNHA Monograph 8: page 1-53|. Note that the physical pagination on those printed pages does include the part number, thus page “1-53”. Note also that the pagination for each part continues without interruption from the 1990 edition into “Supplement 1” of 1993. See Appendix to Part 1 herein for the collated pagination sequence and tab placements of Monograph 8 (the 1990 edition and Supplement 1).

The cross-listings to Monograph 2 and Monograph 8 are incorporated into THE GRAND CANON as a means to indicate citations that had appeared in the first and second print editions, before the bibliography went online in 2000. The different parts of the bibliography have, however, been completely rearranged and expanded from the outline of the printed volumes (see Appendix to Part 1). This does not mean that the citations are precisely as they appeared in the print editions; many citations have been edited or corrected since first being published. Cross-listings to Monograph 2 have never before been implemented in this bibliography; they are incorporated for the first time in THE GRAND CANON.

In the Internet Edition an abbreviated notation is used; for example, page 66 in Part 1 is >Mon. 8: 1-66< (only Monograph 8 was cross-listed in the Internet Edition). Unfortunately, this has been confused by some librarians who mistakenly infer in the haste of their busy duties that the notation pertains to a separate pagination scheme and that the publication there cited is, in some fashion, a “Monograph No. 8” in an unspecified series, thus pages 1-66 therein. In order to avoid such misperceptions, I have revised the citational style for these cross-listings (as shown farther above). To avoid confusion, the cross-references to GCNHA Monograph 8 are now, in THE GRAND CANON, fully spelled out and placed between arbitrary vertical bars (|) with additional disambiguating note; for example, |cited>GCNHA Monograph 8: page 1-66|.

Also take note that in the original compilation for the Internet Edition, I had marked these notations between outward pointing brackets, such that the notation in the example above appeared as <Mon. 8: 1-66>. But, in as much as the < and > characters are, in that order, reserved characters in HTML markup to enclose code tags, the brackets were reversed for use in the online bibliography in order to avoid the conflict (for example, >Mon. 8: 1-66<). In THE GRAND CANON, now, the cross-reference is unambiguously denoted. When this bibliography’s Internet Edition was prepared there were 9,519 instances of cross-references to Monograph 8, which now should be considered an approximation because oversights may have occurred and citations have been subsequently deleted or merged. ✤ ✤ ✤
Cross-Listings to Standard-Reference Lists

In the field of bibliography there are many standard-reference lists to which scholars and booksellers, as well as bibliographers, refer. The most common of these relate to the bibliography of American history, or some part of it. These reference lists usually have the advantage of uniquely enumerating each of the citations, and it is by these numbers that the titles are referred in published literature and correspondence.

The Internet Edition of this bibliography cross-lists its citations to several annotated bibliographies; these are:

Francis P. Farquhar (1953), *The Books of the Colorado River and the Grand Canyon: A Selective Bibliography*

David M. Goodman (1969), *Arizona Odyssey; Bibliographic Adventures in Nineteenth-Century Magazines*

Wright Howes (1962), revised, enlarged edition of *U.S.iana (1650–1950); a Selective Bibliography in Which Are Described 11,620 Uncommon and Significant Books Relating to the Continental Portion of the United States*

Colton Storm (1968), *A Catalogue of the Everett D. Graff Collection of Western Americana*

These titles were selected for their renowned authority and wide use, for the special precise and ancillary bibliographical data they convey, and for their annotations.

This bibliography also includes cross-listings to some booksellers’ catalogues, *viz*, Five Quail Books (for 1987–2013), and Guidon Books (1969). The one by Guidon Books is an important early list of publications relating to this region. That the catalogues also list prices provides some added utility as documents of econometric bibliography. Listings for Five Quail Books *Catalogue 18* and afterward are not included in the online version of the bibliography; the number of emendations required to add them to the Internet Edition became far too much for one person’s time. However, *THE GRAND CANON* does include cross-listings to all of the catalogues.

Two additional cross-listing titles have been included only in *THE GRAND CANON*, not in the Internet Edition: 1) Mike S. Ford’s 2003 half-century sequel to Farquhar, titled, *The Books of the Grand Canyon, The Colorado River, The Green River and The...*
Colorado Plateau; a selective bibliography, and 2) Marcia L. Thomas’s John Wesley Powell; an annotated bibliography. Their enumerated citations are omitted from the Internet Edition bibliography because the volumes were produced years after the online bibliography was first prepared. The effort needed to update both THE GRAND CANON and the online bibliography is too taxing for one person’s time at the expense of work that continues.

These titles were selected for the special bibliographical data they convey, or, in the case of Howes, which is only marginally annotated, because it is a standard list of publications to which scholars, booksellers, and other bibliographical readers and users routinely and conveniently refer. Each of these other bibliographies is numerically organized; it is by these numbers that users unambiguously refer to publications in question.

The omission of other notable bibliographies—for example, Yates and Marshall’s The Lower Colorado River: A Bibliography (1974) and Powell’s An Arizona Gathering II, 1950–1969: An Annotated Bibliography (1973)—is intentional because they are not annotated or have insufficient annotations to make a cross-listing to them meaningful as sources of more bibliographical information. This is solely a means of expediting a bibliographer’s work. The information included in these other publications is nonetheless valuable because they relate to materials or regions not covered by THE GRAND CANON. They provide additional worth through their existence as bibliographies; each is another bibliographer’s historical perspective.

The following section fully lists and describes the cross-listings to standard-reference lists used in THE GRAND CANON.

### Bibliographies and Catalogues Cross-listed in THE GRAND CANON

In the bibliography, cross-listed items are appended to the end of individual citations using the shortened forms listed in the left column below. This is followed by the numbered listing in the indicated publication. For example:

**FARQUHAR 17** is no. 17 in Francis P. Farquhar’s *The Books of the Colorado River and the Grand Canyon*

**FQ4:176** is no. 176 in Five Quail Books *Catalogue Four*

**FQ24/1:290A** is no. 290A in Five Quail Books *Catalogue 24, Volume 1*

To the aficionado of the Grand Canyon and the Colorado River, “Farquhar” is a household name. Although his was not the first bibliography of the subject, it was the first to provide some critical evaluation usable by bibliophiles and historians. Book collectors and dealers alike use the enumerated entries as a shorthand for unambiguously communicating to their audiences just which title to which they refer. Indeed, Farquhar’s volume is itself a collectible, one which demands increasingly higher prices. While the book is sought by many, its value as a bibliography is shortened both by its arbitrary, admittedly “selective” content and by the passage of time. It is nevertheless the gem among Grand Canyon–Colorado River bibliographies. As with other enumerated bibliographies, the numbered entries are often referred to in catalogues and bibliographical works. (A supplement for 1953-2003 was assembled by Mike S. Ford [see below].) [As an important Grand Canyon–Colorado River bibliography, the Farquhar numbers are listed in bold herein so as to bring attention to them in longer cross-listings.]

As the half-century sequel to Farquhar (above), Mike Ford’s volume continues the classic in the same vein. Typographically it is identical to the Farquhar volume. Unlike Farquhar, however, there are some citations that are extralimital to those of *THE GRAND CANON* and thus are not cross-listed therein (for example, items exclusively about the Green River). [As an important Grand Canyon–Colorado River bibliography, the Ford numbers are listed in bold herein so as to bring attention to them in longer cross-listings.]

FQ…

[Catalogues from Five Quail Books and from Five Quail Books—West. Catalogues 1–9 by Clement David “Dave” Hellyer. Catalogues 10–32 by Daniel F. Cassidy and Diane Cassidy. Denoted by volume or supplement number as listed below.]

The “Five Quail” series of catalogues are among the most useful overview resources on the availability of out-of-print (and some in-print) literature of the Southwest; specifically, the Grand Canyon and the Colorado River. Their purpose as catalogues is both a shortcoming and a strong point with respect to their use as bibliographical resources. They clearly cannot be a comprehensive list of titles because they record only those things that are offered for sale at a given time; but virtually all titles are extensively annotated with the booksellers’ comments—without these the catalogues would not be cross-listed in *THE GRAND CANON*. The information about pricing is also a useful guide for those interested in aspects of econometric bibliography. Also of interest
are the notations for offerings that are association copies, or copies inscribed to notable persons of Colorado River and Grand Canyon history, or copies in extraordinary bindings or other such states that may significantly increase their collector’s value. (In the present bibliography, however, neither pricing, association information, nor exceptional information are repeated.)

Occasional brief, interim catalogues and price lists were also distributed by Five Quail; these are indicated with alphabetical suffixes (e.g. FQ5A). Only those that contain annotations are included in the cross-listings here; those that are simple price lists are omitted.

[Dan Cassidy purchased the stock and name of Five Quail Books from Dave Hellyer. During 1995–1999 the business name under Cassidy was Five Quail Books—West.]

After the Internet Edition of the bibliography had gone online in 2000, I continued to update it with cross-listings to the Five Quail catalogues. By 2001, however, this procedure became too time consuming, so only Catalogues 1–17 have been cross-listed to the bibliography online.

In 1999 the Five Quail business name reverted to Five Quail Books.

Beginning with Catalogue 18, Five Quail Books Catalogues are cross-listed only in THE GRAND CANON.

GOODMAN

The brief annotations included with many of Goodman’s citations provide added value to this volume. Although there are errors throughout, the list is still a worthwhile and still the most comprehensive such working reference for all who deal with the subject. As with other enumerated bibliographies, the numbered entries are often referred to in catalogues and bibliographical works.

[NOTE: A few cross-listings to Goodman have likely been overlooked in the addition of pertinent citations in THE GRAND CANON between 2000 and the present.]

GUIDON

The very brief annotations to some titles add marginally more usefulness to this catalogue, but it is among the first such dealer’s lists—if it is not the first—about the literature of the Grand Canyon and the Colorado River. The list, as well as the pricing information, makes it a useful companion to the Five Quail catalogues that began in 1987.

HOWES

The title, “U.S.iana”, has rightly been looked at with cocked heads since it was first printed in 1954. Wright Howes defended his neological refocusing of “Americana” in his foreword (and he clearly was successful in defending it with his publisher’s editors). This is a bibliographical reference work widely used by book dealers; its enumerated citations have become a standard by which dealers and buyers can unambiguously refer to bibliographically well-researched and documented titles. As with other enumerated bibliographies, the numbered entries are often referred to in catalogues and bibliographical works.
STORM

This is as much a “selective” list as is Farquhar’s bibliography. It covers only the contents of one collection of books (however exquisitely comprehensive). Its enumerated, extensive bibliographical annotations make this a valuable reference work for those who have not seen the titles cited therein, or who have need to compare the bibliographical information among editions and printings. As with other enumerated bibliographies, the numbered entries are often referred to in catalogues and bibliographical works.

THOMAS

This is the definitive Powell bibliography. It includes all of Powell’s works and ancillary productions as expected, but goes further by adding manuscript and archival sources, photograph collections, map collections, audio-visual works, and Internet resources and digital archives. (In the present bibliography, of course, only those citations that pertain to Powell’s published works relating in some fashion to the Grand Canyon–Colorado River region are cross-listed.)

WAGNER–CAMP

The generous type size used throughout this volume makes this a handsome work, though one does question its lack of economy given its original $150.00 price. The precise bibliographical citations make it the closest substitute for having the title-pages in front of the reader, an approach easily remedied today by digital reproduction. As with other enumerated bibliographies, the numbered entries are often referred to in catalogues and bibliographical works.
Principal Differences Between *The Grand Canon* and the Internet Edition

Some users inquire how *The Grand Canon* differs from the concurrent Internet Edition online. Every citation in *The Grand Canon* should be found in the field-searchable Internet Edition—omissions may be the result of oversights (unknown, of course) in the uploading of citations. There are differences in appearance. In *The Grand Canon* the most noticeable difference from the online version is its cleaner, more pleasing and informative typographical presentation through the use of fonts, color and layout. It also contains thousands of inconsequentially small edits thought not to be worth the time to edit online. There are many cross-indexed references that had been begun online but which the limited time and resources of a single compiler made impossible to continue except only in *The Grand Canon*. There is also the possibility of citations not removed from the online bibliography, which have been removed from the PDF edition. For overall precision *The Grand Canon* is the document of record and is displayed as intended by the author; thus, *The Grand Canon* is the definitive version of the bibliography. Nonetheless, the power of the Internet Edition is its use as a searchable, filterable database.

How this bi-bibliographical approach came about is simple. To remedy the loss of the monographic presentation created by the migration to the databased Internet Edition in 2000, I produced the first edition of *The Grand Canon* in 2012 to replicate the book-like appearance of the whole bibliography, with many added features. By necessity, due to its hugely increased size, the publication is a digital product in PDF, but formatted to create the appearance of a book. As a digital product it includes electronically searchable features, of course, but I also intend it to serve as a traditional “book” product, browsable on a computer or in paper format should the work be printed out in whole or in part. *The Grand Canon* also makes available thousands of small fixes, added more cross-indexes than had been inserted into the
Internet Edition, and features aesthetic embellishments—all too numerous and too much of an encumbrance for one person to fix in the online database as well. Omitting these value-added features online has not, however, altered the factual content of the online citations themselves; the essential information of the bibliography is unaffected. Yet I had been dissatisfied with the general unavailability of these alterations and emendations, as well as the lack of a contiguously browsable content. Thus the PDF version makes all of this available again, with the added benefit that the PDF is searchable for those who use it in the digital environment.

*THE GRAND CANON* is a monographic presentation of the whole bibliography; it is “readable”. With *THE GRAND CANON* one may conveniently browse the whole, or individual sections, or contiguous citations; and most importantly, one may browse it to discover those things that may be of special interest or to gather an overall sense of these thousands of writings about the Grand Canyon and lower Colorado River region. But, as like its printed predecessors, it is not easy to single out specific subsets of citations from the whole monograph.

The Internet Edition is a searchable database. With it one may search for individual author names, strings of information as which appear in citations, and dates. From it customized-search lists can be produced expediently. For example, in the Internet Edition one may find the name of an author regardless of where he or she appears in the order of listed coauthors (first, fifth, and so on). One may find, for example, all publications that appeared in 1883, or between 1858 and 1919. One may find all publications whose dates of publication are unknown. Or one may find all articles that appeared within one periodical (or, with different search parameters, articles in a given periodical within a specific date range, and/or written by a certain person). These are the kinds of searches that are not possible in the monographic format, at least not without a very time-consuming and methodical search and tally through the entire work. But it is not easy to see the whole in the Internet Edition, or to browse the whole.

So, *THE GRAND CANON* and the Internet Edition are distinctly different approaches to the same set of data. Each is indispensable in its own way, but the former is the more comprehensive.

Some inherent software limitations in the Internet Edition were inherited from the late 1990s. They preclude global editing online by the compiler, and accordingly some sweeping edits have been made to *THE GRAND CANON* that are not present online. For example, I have made consistent all references to “new series” and references to “series 2” in the citations for some periodicals (that is, the runs of serials that saw multiple series); they all refer to “new series” now. I have also made consistent
numerous other points in citations that are simply matters of editing and informational presentation that are not corrections to content.

There are numerous minor edits to citations that, for the sheer number of them and the limitations of the compiler’s time, have not been made online; many are corrections to inconsequential typographical errors. (All corrections to author names and proper nouns have, however, been made online consistently.) Many more modifications to the information contained in citations have been made; none subtract from the information in the Internet Edition, but they produce a complete citation that I think is more proper, certainly more preferable. And numerous minor points and adjustments have been made that have no significant bearing on the content of the same citation in the older ones in the Internet Edition. Obviously, the most recent citations herein reflect perfectly in the Internet Edition, since these citations are uploaded online from \textit{THE GRAND CANON}.

The inclusion of numerous cross-listings to previous print editions and to standard-reference lists, many of which do not appear in the Internet Edition, greatly enhances the utilitarian functions of \textit{THE GRAND CANON}. The manner in which the cross-listings to the print editions have also been emended in \textit{THE GRAND CANON} are explained in the “Cross-Listings” section herein.

Again, a great number of minor “tweaks” are not reproduced in the Internet Edition because of the limitations of time. I find it no longer conscionable to expend time to recreate every small adjustment in the Internet Edition; that it is better to maintain the “authoritative” version in \textit{THE GRAND CANON}, which can be exported, reused, and subdivided at will while retaining all of the intended changes and modes of presentation. Furthermore, the \textit{THE GRAND CANON} will survive past that time when the ephemeral Internet Edition no longer exists.

Another significant difference between \textit{THE GRAND CANON} and the Internet Edition is the disparity of the number of citations listed in each of these venues; there are, at least at this time, several hundred more citations in the Internet Edition. This is due to the presence there of items that no longer are part of \textit{THE GRAND CANON} but which were a part of the original 2000 posting of the database. Due to software limitations it will be labor-intensive to remove them from the Internet Edition; for now they remain there. Two parts of the bibliography are no longer present and which only partially have been removed in the Internet Edition: Part 33 (“Other” Grand Canyons) and Part 34 (Miscellaneous Manuscripts). As explained in the introductory material herein, Part 33 was discontinued as a bibliographical list but is now greatly expanded and reformatted as “\textit{THE BIGGEST MİROR}”, an addendum to \textit{THE GRAND CANON}. Although Part 34 was entirely removed from the online bibliography, working
limitations with the online database have left the citations for Part 33 in the database even though they are no longer present in *THE GRAND CANON*.

Not reflected in the count of citations in the Internet Edition online are most of the citations in Part 31, Newspaper Guides. Due to the summary nature of those citations they not included in the online database.

**About “The Biggest Mirror”, The Nomenclatural Appendix to *The Grand Canon*: All the Grand Canyons**

Appended to the end of *THE GRAND CANON* are lengthy compilations of literary uses and applications of the term, “Grand Canyon”; specifically, in geographical nomenclature, analogy, metaphor (including trademarks) and neology. They pertain mostly to the uses of the term “Grand Canyon” where they do not refer to the Grand Canyon of the Colorado River in Arizona; that is, where the term has been borrowed or reused. The number of places and phrases recorded here dramatically emphasize the tremendous attraction that the Grand Canyon has had on people from the time that the first “other” Grand Canyon was named after it. Most examples are informal, yet they have been used and thus I feel they should be accounted for as a matter of literary and cultural record.

The shortcoming of the lists that follow is that it is impractical to embed the bibliographical citations for each one, particularly since many instances have been captured from the nebula of ephemeral web pages posted on the Internet. (Web-based resources are excluded from this bibliography, as explained in the Excluded Items section herein). I previously had simply kept photocopied pages and webpage printouts in my personal files, which were delved into for a couple of whimsical publications on the subject. However, it did not seem sensible to me to retain the lists in an inaccessible place; and given the venue of *THE GRAND CANON* as a documentation of the creative work of individuals I have decided to append them here.

---

Ideas for Continued Work

A bibliography, particularly in today’s work environments of enhanced or “value-added” products, should not be a static “list” of items. Accordingly, THE GRAND CANON can provide foundations for all kinds of ambitious and utilitarian works. Given the amount of time that I must dedicate to the existing bibliography as well as to other avocations and daily responsibilities, and due also to the limitation of the length of life, few of these recommendations are likely to be pursued by me.

1. There is certainly a need for a database of citations organized in such a way that it is an encyclopedic index to all pertinent subjects within every publication. Although such organization would be only as powerful as the competency of those who create it and the number of usefully indexed entries, its overall value would be immense. THE GRAND CANON can serve as a foundation for such a comprehensive work: the groundwork has been laid through the compilation of the sources, some of them with analytical remarks. One has “only” to peruse them and take the work from there.

2. Compilers of anthologies may do well to use THE GRAND CANON as a source by which to identify works that are beyond those that are collected (again and again) for a Grand Canyon or Colorado River anthology.

3. More closely focused bibliographies (simple or complex) can be created by excerpting citations from THE GRAND CANON. For example, for the geographical region covered by THE GRAND CANON one may create a bibliography restricted to the science of entomology. Or, one may use Parts 11 and 12 of this work to create a separate bibliography that focuses only on the lower Colorado River below Grand Canyon, subdivided into subject areas in the same fashion as is THE GRAND CANON as a whole.

4. An annotated bibliography would take THE GRAND CANON to far greater usefulness. An annotated bibliography of one subject area may also use THE GRAND CANON as a foundation.

5. One may consider using the citations within THE GRAND CANON to serve as roots for digital links to digitized copies of the works there cited. Whether selections would

---

One should not depend on the Internet Edition to extract definitive subsets of data as a wholly new product for permanent use. This is because, as elaborated upon elsewhere herein, there are thousands of small adjustments to citations and their informational content that are preserved in THE GRAND CANON but not in the Internet Edition.
be made from the citations, or a massively comprehensive digital library were to be assembled, are logistical and financial considerations.

6. A thorough examination of some especially pertinent serials is in order. For example, the entire runs of *The Deseret Weekly*, *Arizona Highways*, *Sunset Magazine*, *Santa Fe Employes’ Magazine/Santa Fe Magazine*, and numerous other regional and specialized serials should be examined against this bibliography to list all pertinent items that may relate to the Grand Canyon and lower Colorado River region. Likewise the special exception to the exclusion of newspapers in the citation of items from the *Deseret News* (Salt Lake City) through 1910 would do well to continue the effort to the present, at least for the non-daily component. Specialized serials should likewise be selected and searched consistently; for example, *Engineering News-Record*, *Reclamation Era*, *Mining and Scientific Press*, or various early railroad journals will likely contain far more items pertinent to technical and engineering projects in the lower Colorado River region, specifically mining, dams and irrigation works. Other specialized works, like the annual reports of the Atlantic & Pacific Railroad and the Atchison, Topeka & Santa Fe Railway Company, will have information that has not as yet been looked for to include in this bibliography. In addition, important government serials, most notably the *Federal Register* and *The Congressional Record* should be searched in their entireties. I have not found everything because, except for a very few titles, I have not been able to examine very many whole runs, contiguously. Many serials would likely benefit from such a conscientious comparison.

7. This bibliography’s coverage of legislative documents (other than the *Federal Register* just mentioned) is only a fortuitous gathering. There is a huge body of material that can yet be listed from federal and state official records alike, perhaps most richly among the legislative acts and affairs regarding water supply in Arizona and California. These items would include legislative bills, hearings, laws, and in fact everything that one may consider a part of legislation—all surely a daunting task to compile. Similarly, legal documents pertaining to activities in this region are scattered widely; a comprehensive accounting of them will be a very large task.

8. Standardizing author names may be worthwhile, even though in some instances the fashion in which an author’s name appears will differ from the way in which it is

49 Many runs of Utah newspapers are now available online at [http://digitalnewspapers.org](http://digitalnewspapers.org).

50 *Desert Magazine* was examined in its entirety in 2013–2014.

51 With regard to the *Federal Register*, searches of the years since the mid-1990s to date have already been done through the online availability of issues from these years. The *Congressional Record* has not thus far been searched.
displayed in the publications (for example, full names would substitute for published nicknames). Examples of standardization will be found in the Library of Congress’s “Authorities” files. Sometimes, an author’s given names are spelled with initials, other times spelled out. I have tried at least to standardize those kinds of variations under fully spelled headings; exceptions may be found with some authors who consistently publish their names only with initials and by which they are also known (for example, P. T. Reilly, whom few would know as Plez Talmadge Reilly). Occasionally, one will notice that an author’s full name is spelled out (usually three names). This is done, of course, when they publish their name as such, but it also appears in a list of productions when the author was encountered for the first time through their academic thesis or dissertation. Then, as they continue to publish and their works are extracted for this bibliography, the completely spelled name is retained as the header even when the author may never have used it in later publications. In THE GRAND CANON overall, I have conscientiously considered that it is the document that arbitrates the citation, less so a derived system of styles; because what I record here is the work of individuals, agencies and institutions as they were presented.

9. There must be hundreds—more likely thousands—of articles and books wholly and partly about the Grand Canyon and lower Colorado River region that have been written in languages other than English. Hundreds of non-English citations do appear in THE GRAND CANON. Intuitively and logically there must be myriad more that have escaped all manner of public indexing, web-posting, and serendipitous discoveries by me and contributors. Finding foreign-language articles in serials and journals, particularly those products that are elusive in libraries far from the regions in which they were produced and which are written in non-Latin alphabetic schemes, will be challenging work. Those that appear in THE GRAND CANON must be considered a sample only.

10. Newspaper accounts would balloon the number of citations in THE GRAND CANON to extraordinary levels. And one would have to select the newspapers to cover, in as much as there are thousands published nationwide (and elsewhere) that could contribute useful records of published items, and by numerous more authors than those cited herein. Aside from the records in The New York Times and in the earlier editions of the Deseret News, virtually no newspaper citations appear in THE GRAND CANON. Including newspapers would be, while worthwhile, a Herculean task. Considering the scarcity of copies of most titles (paper, filmed, or digitized), the utility

---

52 There are printed catalogues, too, but the Authorities specifically may be viewed online at http://authorities.loc.gov.
of such a compendium would be realized only through the making available of copies of the articles themselves.

11. Manuscript and archival holdings are unique resources. However, because they exist mostly as single copies in one location (copies of these materials may also exist as a matter of user-copy production policies or microfilming), they are not as conveniently available as are published materials that can be obtained in a number of places or through inter-library loan services. A separate guide to these resources would be a boon to researchers.

12. The bibliography has to be extended to the upper Colorado River basin if there is ever to be a proper bibliography of the Colorado River-proper or the Colorado–Green River basin. Even if such a bibliography is restricted to the human history of the rivers-proper, there is need for such a compendium of literature.

continued ▶
13. This bibliography can further serve as the source material for works that contain early illustrations of the Grand Canyon and Colorado River. A comparative compendium of illustrations redrawn from earlier ones has yet to be produced. This illustration (left) was imaginatively embellished from one of F. W. von Egloffstein’s own problematical scenes from the 1858 Ives expedition (inset below); this one with the river and boater added as well. Note also the even more greatly exaggerated incision of tributary canyons, and, in both, Egloffstein’s improbable spire rising taller than the adjacent plateau.

**1873 “Canons of the Colorado River.”**

By the time this rendition had been made, the first of John Wesley Powell’s exploits on the Colorado River, in 1869, was well known. Thus it was reasonable, if not just for the purposes of staffage, to place a boat on this canyon river—with some additionally uninformed artistic license in the boater’s reflection on limpid water.

**1861 “Big Cañon.”**

The imaginative view actually depicts a side canyon of the Grand Canyon, probably Cataract Canyon.
THE HISTORY of the American Southwest is rich, exhaustively studied, rife with political contention and cultural ambivalence, and far more involved than can be summarized here. Native Americans had as well lived in and journeyed through the Southwest for uncounted centuries before the first European forays into this part of North America in the late 1530s. But it is the publishing tradition of Europe that begins documenting the corroborative, citable, and obtainable literature that records activities and observations carried out in this region; and so this is our bibliographical starting point.

Thus far the earliest published item cited in THE GRAND CANON is from 1542: the second edition of a geographical work by Sebastian Münster, in which appeared a map depicting the geographical understanding of the western coast of North America. It was authoritative for its time—and notably devoid of what today we would call California, and absent as well the Gulf of California and its Colorado River estuary. Then why even cite it here? Just three years earlier the first European contact was made with the Colorado River, and it was two years since the Grand Canyon was visited. The map is contemporary with those events, yet as part of a new edition of Münster’s work it demonstrates the slowness of communication in that day, both pragmatic and intentional. In 1542 there was perhaps time enough after the encounters with the Colorado River and Grand Canyon when something could have been published, even if only from hearsay; of course, if the author thought it worthwhile as well. But there is nothing known today from that earliest post-encounter period. Following on this, however, in 1548 there are two publications that finally acknowledge the Colorado River

---

53 Item no. 25.307 (Münster).
region based on the Spanish explorations; one is dated (yet another edition of Ptolemy’s *Geography*, for 1548), the second is attributed to that year (a map also by Münster).\footnote{Item nos. 25.80 (Ptolemy) (see also Note 63), 25.247 (Münster).}

First-person reports about the Colorado River and the Grand Canyon originate in events of 1539 and 1540, respectively. The seminal event was with Francisco de Ulloa (died 1540), the navigator who in 1539 with ships of the fleet of Hernán Cortés (1485–1547) reached the mouth of the Colorado River at the head of the Gulf of California. His report appeared publicly two decades later in Venice, in 1556, translated into Italian in Volume 3 of Giavanni Battista Ramusio’s *Della Navigationi et Viaggi*.\footnote{Item no. 2.6438.} Its first English translation was published by Richard Hakluyt in 1600.\footnote{Item no. 2.3117.}

Europeans’ arrival at the Grand Canyon came a year after the Colorado River was encountered, but by land. During 1539–1542 an incursionary army led by Francisco Vázquez de Coronado (1510–1554) infiltrated the American Indian lands on the northern frontier of New Spain in what today is Arizona and New Mexico, venturing even into the vastness of the Great Plains. As is well recorded historically, they had set out from today’s Mexico to rifle Cíbola of its riches, which as the Spanish learned soon enough was only the stuff of misinformation about the Indian pueblos. In 1540, an expeditionary party under Pedro de Tovar traveled from the main army westward to the Hopi mesas in today’s Arizona. There they learned about a large river even farther to the west. This was of interest to them as a means to connect with the Gulf of California; the original plans of the expedition included resupply of the armed force by ship on the lower Colorado River, although that never happened. Tovar reported this news and another party, about thirteen men under García López de Cárdenas, was dispatched to investigate. According to an account drawn up decades later, they journeyed twenty days from the Hopi mesas, their Hopi guides leading them to the rim of the Grand Canyon at a point described cursorily as a place where the Colorado River was visible and where low pines grew. This area is believed by many historians to have been at the eastern end of the canyon at or near the area now called Desert View. Others consider it may have been farther west, given the supposed length of the journey and other evidence. This would have been closer to where in the early 20th century William Wallace Bass conducted tourists into the canyon on his mining trails near the Grand Scenic Divide.\footnote{See items by Ray Kenny in Part 16 of this bibliography.} The Spanish party was likely led along Native Americans’ long-established routes through this area. Grossly underestimating distances in the canyon, Capt. Pablo de Melgosa, Juan Galeros, and a third man whose name was not remembered by the chronicler futilely tried to descend to the river. They did not make it
very far and swore that rocks down there were taller than the Tower of Seville, a landmark familiar to them back home that stood next to the city’s cathedral. Without further record of the canyon, at least so far that is known to us today, the party returned to the main force in today’s New Mexico.

Not until 1563 probably was an account written down about the events of 1539–1542. It appeared in the manuscript titled, “Relación de la Jornada de Cíbola”, by Pedro de Castañeda de Nagera. However, the manuscript that survives today is only a copy of the original, made in Seville in 1596; the original is missing. In turn the Relación did not appear in print for nearly three centuries after the events it records, in 1838, when Henri Ternaux-Compans translated it into French. An English translation did not appear until three and a half centuries after the events, when in 1896 George Parker Winship published the Relación for the first time in both Spanish and English, based on that 1596 copy. As one might expect, memory, cultural conventions, translators’ liberties, and modern re-readings all produce somewhat different perspectives.

After the Cárdenas party left the Grand Canyon no European is known to have gone there for more than two centuries. In 1776 the Franciscan friar Francisco Tomás Garcés (1738-1781) journeyed from the lower Colorado River region to the lands of the Hualapai and Havasupai people; he, fortunately, wrote his own record, though it, too, took a long time to see publication.

The earliest publication date cited in THE GRAND CANON for material that reliably depicts the region of interest to this bibliography is an 1548 Italian edition of Ptolemy’s Geography. As historians have noticed, this is the first such geography to include

---

58 The tower, La Giralda, still stands as part of the cathedral of Seville, Spain. Originally commissioned in 1184 as a mosque, it was completed in 1198. In Castañeda’s day the tower was some three and a half centuries old but still lacked the upper portion of the present structure. A modest belfry was installed after its original ornamental top was felled in an earthquake in 1356. The present belfry, as well as the upper tower and the statue, “Faith”, were emplaced in 1558, eighteen years after Coronado’s men attempted to reach the bottom of the Grand Canyon. The present structure is 93 meters (305 feet) tall.

59 The 1596 manuscript transcription of a lost ca. 1563 original is in the Obadiah Rich Collection of the New York Public Library.

60 Item no. 2.2132, a 19th-century edited translation by Elliott Coues.

61 Item no. 25.80. The Geography, or Geographia, of Ptolemy is the geographical work, ca. 150 C.E., by Kláudios Ptolemaïos Κλαύδιος Πτολεμαῖος of the 2nd century. It survives from manuscript copies dating to at least the 10th century and was a focus of scholarly Renaissance Europe, when the author was known in Latin translation as Claudius Ptolemaeus. The Byzantine monk Maximus Planudes was the first, after 1295, to create maps based on a copy of Ptolemy’s re-rewritten text. For a well-annotated bibliography of the early editions of Ptolemy’s Geography, see the compilation by [Wilberforce Eames], A List of Editions of Ptolemy’s Geography, 1475–1730 (New York, no imprint, 1886, 45 pp.). Only 50 copies of Eames’ work were printed (but today readable in digital
results obtained during the Spanish expeditions of less than a decade earlier. The early maps, already noted, are interesting in that they depict generally perceived navigational trends and landfalls as they were communicated at the time when longitude was poorly determined and when the Spanish were just beginning their exploits of conquest in what today is the southwestern United States and northwestern Mexico, only some of which information was communicated in timely fashion due to political distrust and the general flow of information in those days.

Perhaps the first document relating to the region considered in this bibliography contains the instructions from Viceroy Antonio de Mendoza to Hernando Alarcón, regarding the support of Coronado’s *entrada* into the northern reaches of New Spain. This document, dated May 31, 1541, was not, however, available in print for centuries, thus it cannot be scored here as “the earliest” publication. A particularly reliable translation and transcription of it was published by Richard and Shirley Cushing Flint in 2005.  

A map of the Gulf of California was drawn in 1541 by Domingo del Castillo, a pilot in the second expedition that sailed to the mouth of the Colorado River in 1540. According to “The Kohl Collection of Maps Relating to America in the Harvard University Library” (as published by Justin Winsor, 1886, who indicated the map was one of California), it was found among papers of the descendants of Cortés. Copied and engraved in 1769, it was published in 1770 by Francisco Antonio Lorenzana in *Historia de Nueva-España*. Castillo’s is the earliest authentic delineation of the Gulf of California and the Colorado River delta region (although it insists on depicting what may be the Gila River as a remarkable extension of the sea that would wrap around the north of Mexico). There are earlier 16th-century maps of the Pacific coast of North America, of course, but none even fully resolve the gulf.
A few users of *THE GRAND CANON* may point to Chinese accounts that putatively record even earlier visits to the Southwest and the Grand Canyon, reached from the West in the 15th century,⁶⁸ but such interpretive claims have not held up to historical corroboration by scholars of either the American Southwest or the Orient. In any case, the material on which such claims are based are manuscript materials, which would not appear in this bibliography anyway (except for piecemeal references to them in later books, which are cited).

The 16th-century dates noted herein are known with certainty; they establish the beginning of a published history, based on known documents, with which historians and aficionados of the Grand Canyon and the Colorado River are familiar. Might earlier published works yet be found, or more works from the 1540s at least? Perhaps; one may never know what may lay hidden or unrecognized even in the most well-known of collections, or in collections as yet unrecognized by historians and bibliographers.

As for the 1542 date for the earliest-known published item that pertains to the region embraced by this bibliography during the period after the European encounters with the Colorado River and Grand Canyon, the answer is a bit more certain: probably nothing earlier will be found. This assumption is made on the basis that printed materials from this time are relatively few, and well documented. Then there is the matter of information from the 1539–1540 explorations, which was not communicated to those who could have included it in their soon-to-be-published works. The 1542 map fails to depict detail in our region of interest; it is cited herein as an example of the state of understanding of the day, contemporaneous with the earliest explorations in New Spain. Not until 1548 does the information conveyed from these explorations finally appear in print (albeit only in map form). While the timeframe 1542–1547 is ample enough, too, for something to have been published, the very fact that nothing is known today reasonably supports the idea that there may be nothing more to be found in the pre-1548 period. Still, we may hope for serendipity to knock.

---

⁶⁸ See for example items by Jack Anderson, John Fryer, Hendon Mason Harris, Alexander M’Allan, Henriette Mertz, and Charles Hippolyte Paravey, all cited in Part 2 of the bibliography.
**Pseudonyms and Psychonyms**

Names Changed by Marriage, Divorce or Legal Decree

---

**Pseudonyms and Psychonyms**

The following authors appear in *THE GRAND CANON* under pseudonymous names and psychonyms (pseudonyms with insider connotations). In the bibliography, citations of published works are listed by the names under which they were published, usually followed by actual name in square brackets. Separate notes for this table appear at the end of the table.

1This is the origin of the other variants of the "C.V." psychonymous, whimsical uses originated by Quartaroli; it derives from a former, now synonymized, scientific name of the Grand Canyon rattlesnake, Crotalus viridis abyssus. Some other uses likewise derive from the scientific names of animals and plants or are contrived based on Quartaroli’s original usage, for example, F. Splendens, after the plant Fouquieria splendens, or ocotillo.

2Pseudonym used in an anonymously produced, pirated version of The Personal Narrative of James O. Pattie, of Kentucky (see Pattie, 1831 ff, in Part 2 of the bibliography).

3As with the "C. V. Abyssus" psychonym, with which this one appeared, it derives from the scientific name of an animal well known at Grand Canyon; in this case the raven, Corvus corax. “Early” is a nick-name for Earle Spamer, originated unwittingly by a worker at Glen Canyon Environmental Studies during the 1990s and which was adopted and perpetuated by Quartaroli.

4"Phoenix" is a pseudonym frequently met in literature. Although the authors, "Phoenix", cited in this bibliography are undetermined identities, there also is the more well-known “John Phoenix” who was Lt. George H. Derby. (He is cited in this bibliography under this pseudonym, but actually is more widely cited herein as Derby, for his naval survey work on the lower Colorado River.) Derby was also a humorist who wrote under the additional names, John P. Squibob and Professor John Phoenixiana, among others. See the biography in Item no. 2.10162 (G. R. Stewart) herein.

5A purposeful misspelling, to repeat an actual misspelling that appeared on the ID token on an award cup.

6A common form of anonymity.
Names changed by marriage, divorce or legal decree

The people listed here are those individuals who are cited in *The Grand Canon* only by both names. Marriage names may also represent hyphenated compound names using both birth and marriage names; for each such case these are as used by the woman in her publications. Cases where a marriage name precedes a birth name indicate divorces after which the woman reverted to her birth name. The time frame used is that of the publications.

</table>
This list itemizes more than 7,200 titles of periodicals and serial publications cited in THE GRAND CANON. That a title appears in the list does not imply that the entire series has been examined; in fact, this is rarely the case. Almost all titles are added opportunistically; many serial titles in this bibliography are limited to single or a few citations. Some principal serials that relate almost exclusively to the Grand Canyon and the Colorado River have, however, been canvassed in their entirety; for example (but not limited to), Boatman’s Quarterly Review, Colorado Plateau Advocate, The Confluence, Grand Canyon Footprints, Grand Canyon Nature Notes, O’Pioneer/The Ol’ Pioneer, Plateau, and The Waiting List. Titles that have been retrieved only from sources posted to the web are represented, of course, only by those issues that have been so digitized and posted (for example, the Santa Fe Railway’s employees’ journal, Santa Fe Magazine).

Titles are listed in the format used by this bibliography. Non-Latin character serials are listed in transliteration. For those that are a house organ that incorporates the name of the institution, organization, or agency, the name of the originating entity usually appears first, followed by the series name, much in the way the titles will be found in most library catalogues. For example:

Proceedings of the Academy of Natural Sciences of Philadelphia

is listed as

Academy of Natural Sciences of Philadelphia, Proceedings

The list that follows is strictly in alphabetical order, with the exception that leading definite articles are not alphabetized — “The” and foreign language equivalents (of those that are noted in this bibliography) “Das”, “De”, “Den”, “Der”, “Det”, “Die”, “El”, “Il”, “L’”, “La”, “Le”, “Les”. The definite article is retained in many citations, and
likewise in the list that follows, but the reader will note that some citations for the same serial titles may omit the definite article. This only reflects former citation styles used in this bibliography during the past forty years, which omitted leading definite articles; for example, The American Bottler may be cited in the bibliography just as American Bottler. For pragmatic reasons only, the bibliography has not been wholly canvassed for missing leading definite articles in full serial titles, which has no effect on the identification of serials anyway.

For titles that change over time, citations in THE GRAND CANON reflect the titles at their times of publication. Differences in spelling or variant uses of hyphens also reflect contemporary uses of a serial’s name, as cited. The master list that follows will note those differences. Capitalization of words in serial titles is done according to English or American styles as proper names, not usually in the styles of the original languages, which sometimes employ lowercase initials for some words even in titles.

Explanatory information, when deemed necessary for clarity, or as a means to further identify the creator of a more obscure title or the place of publication of a little-known serial, is given in (colored parenthetical italics), although pragmatically such information is not uniformly applied because this procedure was adopted years after this bibliography was begun, thus fixing everything is a retrospective task unto itself. Nevertheless, I have attempted to affix places of publication for as many titles as possible, omitting the note when it is clear from the title where it was published or when there were multiple places of publication.

Some serial titles may be identical to those published by other entities. In as many cases as possible, the appropriate publisher or place of publication is indicated; for those that are not so distinguished, I had not captured that information at the time that the citation was gathered (more often this was during earlier years of the bibliography project). The list that follows is as authoritative as I have been able to assemble it thus far. Not all publisher or place of publication attributes may appear with the citation, but this master list will occasionally provide that information if it was known to me.

Diacritical marks and ligatures are retained as in the originals. In some cases, serials employing characters from non-Roman alphabets will retain those characters, in phonetic alphabetical order in the list below, with transliteration.
PERIODICALS AND SERIALS CITED

Numerals in the left column are counters only; they continually change as new titles are added to this list and so relate only to the present edition of THE GRAND CANON.

See introductory comments, above, for a brief explanation of citation styles. For a fuller explanation, see herein the section on Citation Format and Content.

Periodicals and Serials pass through name changes either through organizational changes or the whims of editors and committees. A few periodicals cited in THE GRAND CANON have gone through some name and frequency changes, or they have interjected “special issues” in their series, which have posed some problems in tracing the bibliographical lineages of these serials. These problematical titles are itemized here. The selection is, however, restricted to series that are significant to the subjects of this bibliography.

Other periodicals, not listed here, have gone through name changes as a normal process of business, without a change in volume numbering; for example: National Geographic Magazine becoming National Geographic; National Parks and Conservation Magazine becoming National Parks; and Field Notes (National Audubon Society) becoming American Birds.

For a listing of more than 7,200 periodical and serial titles that appear in THE GRAND CANON refer to the list of Periodicals and Serials Cited.
Salton Sea Update

Unnumbered

Frequency: irregular

Responsibility varies:

- The Resources Agency; California Department of Water Resources; California Department of Fish and Game
- U.S. Army Corps of Engineers; California Natural Resources Agency; California Department of Fish and Wildlife

Sequence

- August 2005
- January 2006
- May 2006
- September 2010
- April 2011
- March 2013
**The Confluence**

1(1)–7(2) [retroactively Nos. 1–21] [7(2) misnumbered as 7(3)], Nos. 22–28

*Frequency*: irregular

Beginning with no. 22, series continues only with whole numbers; nos. 1–21 are retroactively noted here. See inside front cover of no. 22 (February 2001) for issue/numbering summary and correction.

### Sequence

| [20] | 7(1) Spring 2000 |
| [21] | 7(3) Fall 2000; misnumbered, should be 7(2) Summer 2000, printed late |
  (22) February 2001 |
  (23) June 2001 |
  (24) October/November 2001 |
  (25) February 2002 |
  (26) December 2002 |
  (27) December 2003 |
  (28) Winter 2006 [distributed late 2005]

**Ceased(?)**

[No issues published 2007–2014. A "last" issue was pending in 2010; not issued.]
Colorado River Delta Research Coordination Network / Delta del Río Colorado Red Coordinadora de Investigaciones

Newsletter / Gaceta Informativa

Nos. 1–6

Frequency: irregular

Sequence

(1) February 2008
(2) May 2008
(3) July 2008
(4) September 2008
(5) December 2008
(6) April 2009

Distributed online only(?)

**Grand Canyon Backpackers and Hikers Association**

**Grand Canyon Footprints**

[Nos.] 1–7, No. 8–[current]

*Frequency: semiannually, irregular*?

**Sequence**

Enumeration in [Nos.] 1–7 is reversed from convention in first seven issues, viz, “Issue 1, Volume 1” was followed by “Issue 1, Volume 2”, etc. In this bibliography conventional usage is implemented, as shown in the sequence below.

1(1) Fall 2000 [distributed January 2001]
1(2) Spring 2001
1(3) Fall 2001
1(4) Spring 2002
1(5) Fall 2002
1(6) Spring 2003
1(7) Fall 2003

Volume enumeration ceases. Beginning with Issue 8 (January/February 2004) enumeration is only by whole number.

(8) (January/February 2004) . . .

Ceased

[NOTES: Summer 2011 issue is misnumbered as v. 18, no. 2, which should be v. 17, no. 2. The error was not later noted, and the Fall 2011 issue continued the enumeration with v. 18, no. 3. Accordingly, v. 17 has only one number, and v. 18 begins with no. 2. Fall 2014 issue is misnumbered as v. 21, no. 3, which should be v. 21, no. 4.]

▼
Grand Canyon Natural History Association
organizational name change in 1996 to Grand Canyon Association

These serials follow in chronological order

Plateau
[first series]: Museum of Northern Arizona

1(1)–65(3)
1939–1994
Frequency: monthly(?)
Format and frequency change with vol. 49, no. 1 (Summer 1976).
Frequency: quarterly and/or semiannually

Cañon Journal

1(1)–2(2) [four numbers only]
Spring 1995–Fall/Winter 1996
Frequency: semiannually

Plateau Journal

[1(1)]–8(1) [Vol. 1, no. 1 and Vol. 3, no. 2 not numbered]
Summer 1997–Spring/Summer 2004
Frequency: semiannually

Plateau
[second series]: Grand Canyon Natural History Association/Museum of Northern Arizona

1(1)–2(1)
Fall/Winter 2004–Spring/Summer 2005
Frequency: semiannually
[Vol. 1, no. 1 (2004), includes a brief background statement (p. [4]) of the publishing history of Plateau, Cañon Journal, and Plateau Journal, and includes a notice about the name changes on the inside front cover of the Fall/Winter 2004 issue, but the second series of the title Plateau is not otherwise stated]

Sojourns

1(1)–[current]
Winter/Spring 2006–[current]
Frequency: semiannually and annually [irregular]
[NOTE: Issue numbering within volumes includes no. 1 even when there is no no. 2 for the volume]
Grand Canyon Nature Notes
[Grand Canyon Natural History Association]

1(1)–9(12)
1926–1935

Frequency: monthly
Ceased

HIATUS

Nature Notes
[National Park Service, Grand Canyon National Park]

10(1)–[current]
Fall 1994–[current]

Frequency: quarterly, 10(1)–14(4) [vol. 10, nos. 1, 2 only]; semiannually, 15(1)–[current]

Although Nature Notes is intimated by volume numbering to continue Grand Canyon Nature Notes, take notice of the difference in both the title and imprint. The “continuation” of this serial as Nature Notes is produced by the National Park Service at Grand Canyon National Park, although it does receive support from the Grand Canyon Association.

The original series was published partly under the auspices of the National Park Service, when the Grand Canyon Natural History Association was partly supported by the work of NPS employees. Today, cooperating associations in the parks are not-for-profit organizations that independently assist the educational and interpretive missions of the parks they serve; NPS employees do not participate in the administration or routine functions of the cooperating associations. However, the cooperating associations as entities may contribute support to the non-administrative operations of the national park.
Organizational name change in 2002 to **Grand Canyon Historical Society**

**Newsletter**

**Rimmin’**

1(1)–7( )
March 1985–1992

*Frequency: [?]*

**G.C.P.S. Newsletter**

1(1)–1(3)
May 1990–November 1990

*Frequency: quarterly*

**Grand Canyon Pioneers Society Newsletter**

2(1)–5(6)
March 1991–June 1994

This title split into a continuation of the newsletter as *The Bulletin* (beginning with vol. 1, no. 1) and the periodical *O’ Pioneer* (continuing the enumeration of Grand Canyon Pioneers Society Newsletter)

**The Bulletin**

[1(1)]–[current] [Vol. 1, no. 1 not numbered]
July 1997–[current]

*Frequency: monthly, irregular*

**Periodical**

Titles continue the enumeration of the **Grand Canyon Pioneers Society Newsletter**

**O’ Pioneer**

5(7)–7(3)
July 1994–March 1996

*Frequency: monthly*
The Ol' Pioneer

7(4)–[current]
April 1996–[current]

Frequency: monthly; quarterly beginning with 8(7) Summer 1997 when additional news was published in The Bulletin; also irregular (3–4 issues/year)

---
GREAT AS IS THE FAME OF THE GRAND CAÑON OF THE COLORADO, THE HALF REMAINS TO BE TOLD.*

* Clarence E. Dutton
One of the pitfalls of a four-decade, single-author project — despite of the number of dedicated and reliable people who have faithfully contributed to it — is that vigilant readers are bound to notice that one or another pertinent work has been overlooked. There is a good reason for omissions: I do not know about them. The reader thus has the advantage. Please send citations and corrections to: GrandCanyonBiblio@earthlink.net

With thanks,

Earle Spamer

<table>
<thead>
<tr>
<th>#</th>
<th>General, Historical, Biographical, and Popular Publications</th>
</tr>
</thead>
<tbody>
<tr>
<td>2</td>
<td><strong>General and popular works, including history, regional geography, non-fictional literature, and biographical material, relating to the Grand Canyon or the lower Colorado River corridor between Glen Canyon Dam, Arizona, and the Colorado River delta in Mexico.</strong></td>
</tr>
</tbody>
</table>

This section includes all literature that broadly addresses the Grand Canyon-lower Colorado River region as well as literature specifically focused on this region or a part of it. It includes material written for a popular audience as well as scholarly publications that deal at least in part with the Grand Canyon or the lower Colorado River. General environmental publications, as opposed to those that are more technical or administrative in nature, are included in this part of the bibliography. Material that may otherwise be arbitrarily classified as “Miscellaneous” (not pertinent in other parts of the bibliography) is also in this part. Travel literature that is more travelogue in presentation is included in this part, but travel publications that are incremental guides to attractions and informational guides to accommodations and services will be found in PART 9. **Travel Guides.**

</table>

*The New York Times* has been widely available on microfilm, and now in digital format. The first issue of what originally was named *New-York Daily Times* appeared September 18, 1851 (changed to *The New York Times* in 1857). Its comprehensive and authoritative editorial view of national affairs, as well as its traditionally well-respected writing, makes it a useful resource on national perspectives of events and issues in the Southwest. The longevity of this newspaper also allows it to serve the Grand Canyon-Colorado River bibliography back to the time of the first expeditions through what would be Arizona, by Lorenzo Sitgreaves (1851), and on the Colorado by Joseph C. Ives (1857-1858) and John Wesley Powell (1869).
<table>

## Lower Colorado River Region Special Interest Subjects

See the frontispiece map that delineates the region labeled here as “Lower Colorado River”

<table>
<thead>
<tr>
<th>Lower Colorado River Region—Natural History, Environment and Special Issues</th>
<th>Natural history, environment, and certain special issues specifically about the lower Colorado River corridor below Grand Canyon, including selected items relating to Native Americans — Lake Mead, Arizona–Nevada, to the Colorado River delta in Mexico</th>
</tr>
</thead>
</table>

This part includes only those references about all disciplines of natural history (geological and biological) and environment, topically restricted to the region along the lower Colorado River corridor, from Lake Mead to the delta. It includes geological field guides and geologic maps for this region, and hydrologic investigations of the river-proper as limited to this reach, including studies that include the part of Lake Mead that has inundated the lower Grand Canyon. Studies pertaining to the Gulf of California that embrace in some measure the Colorado River delta region are cited here. Selected archaeological and ethnological investigations of the river corridor are also in this part. Natural-history and environmental studies related to the Salton Sea area are in this part. Water-quality and health issues relating to the waters of the lower Colorado River, below Grand Canyon, are also included. Administrative reports and study for areas in this geographic region are in this part. Some specialized reports that pertain to activities in the U.S. Army Yuma Proving Ground and U.S. Marine Corps Air Station Yuma are also found in this part. Most references specifically related to agriculture are excluded from this bibliography due to the far-reaching and specialized nature of such material, which place it in the realm of agriculture methods in general; only those that pertain specifically to the lower Colorado River and its irrigation projects are included.
Lower Colorado River Region—Engineering Projects, Water Supply and Management, Litigation and Related Issues

Engineering projects, water management and irrigation issues, and related topics in the Colorado River corridor below Grand Canyon — from Lake Mead, Arizona–Nevada, through the Arizona–Nevada–California corridor to the Colorado River delta in Baja California–Sonora, Mexico — and proposed and existing engineering projects in the Grand Canyon; including appurtenant structures at specific sites

This part includes all references that deal with the dams and their appurtenant structures, and water-control procedures and facilities in the lower Colorado River, from Lake Mead to the delta. Material not pertaining to water-management issue per se but directly related to the management of structures, or the investigation of cultural resources pertaining to those structures, are also included. Further included are engineering items restricted to the lower Colorado River, such as bridging. Legal issues of Colorado River water, such as interstate concerns and international treaties, are included in this part. Some legal issues relating to the Law of the River and similar administrative considerations are also included. Here also may be found documents related to irrigation, flood-control measures, and human-controlled water supply in the lower Colorado River; among them are project-specific documents and articles about the accidental Colorado River breakout and the inundation of the Salton sink during the first decade of the 20th century. Further included in this part are items relating to administrative attention to water supply in the lower Colorado River, water apportionment to political entities in the Southwest, and constructions relating to the execution of water control and distribution. General commentaries on water management in the region are also included. Selected items pertaining to the construction of Glen Canyon Dam may also be found in this part.

As a means to accommodate the literature on proposed dams and diversion structures in Grand Canyon and Marble Canyon, but which were never constructed, documents relating to them are included in this part, as also being in the Lower Basin of the Colorado River.

Certain selected items that relate to the area, conditions and operation of Glen Canyon Dam will be found in appropriate other categories, depending upon whether the subject is related to, for example, administration, physical ecology, biological ecology, geology, or general interest.
# Human Affairs in the Grand Canyon Region

<p>| 13 | <strong>Administration</strong> | Administrative and related subjects pertaining to Grand Canyon National Park and adjacent Federal lands (including Grand Canyon–Parashant National Monument, Vermilion Cliffs National Monument, and that part of Glen Canyon National Recreation Area between Glen Canyon Dam and Lees Ferry, Arizona), the Colorado River in these areas (including Lake Mead National Recreation Area), and specific documents relating to adjacent Native American, state, and private lands. Also included here are selected items of legal affairs and position statements by individuals and organizations that pertain to administrative affairs and concerns of government-held lands and facilities. This part also contains selected administrative items that relate to Lake Mead National Recreation Area, Nevada–Arizona, other lower Colorado River federal lands and federal- or state-controlled operations, and, more broadly, to issues pertaining to the State of Arizona and the United States of America; with occasional items of pertinence to the States of California, Nevada and Utah as they relate to the region covered here. | This part comprises items broadly relating to the administration of the Grand Canyon National Park, other regional federal lands and facilities, and earlier administratively sectioned lands. It lists more than documents pertaining to bureaucratic procedures and regulations. Included here are references that pertain to land- and water-use practices affecting the politically defined unit; management documents derived from environmental studies on public lands, or official commentary on studies and policies; public comments on, and responses to, proposed and implemented studies and management decisions; and general articles and published opinions that relate to legislative issues affecting the protection, operation, and public use of the lands of the political unit. Also included are some items that pertain to cession of sovereign territories and boundary issues that historically pertain to the Grand Canyon-lower Colorado River region. Selected items pertaining to the administration of Glen Canyon Dam, and position statements by individuals or organizations, as inferentially affecting the region downstream from it, also are included here. |</p>

</thead>
<tbody>
<tr>
<td></td>
<td>Studies of organismal biology, biological ecology, and modeling and research applications relating to biological communities in the Grand Canyon ecoregion, including the Colorado River corridor through the Grand Canyon; and general items relating to organismal resources in the region</td>
</tr>
</tbody>
</table>

This part includes ecological studies that are not organismically specific, and environmental studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region, including studies of climatological influences on water supply. Added to this part are publications that discuss climatological and environmental issues for the entire Colorado River basin and the greater Southwest in general, insofar as they include the Grand Canyon region. Multidisciplinary studies of environmental concerns and human impacts together in the Colorado River corridor are included in this part, as are also general articles that pertain to environmental issues in the Grand Canyon region, and multidisciplinary items pertaining to controlled flood flows from Glen Canyon Dam and anthropogenically induced flooding in the lower Colorado River basin.

This part includes documents on biological censuses and the biology and ecology of animal, plant, and protist organisms as occurring in the Grand Canyon region. This part also includes biological reports and studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region. Also included here are general articles about organismal-related information, resources and activities; for example, fishing, hunting, and conservation.

<thead>
<tr>
<th>20</th>
<th>“Glen Canyon Environmental Studies” Program</th>
</tr>
</thead>
<tbody>
<tr>
<td></td>
<td>Glen Canyon Environmental Studies program technical reports and related documents produced under the monitoring and research programs of the Glen Canyon Dam Environmental Impact Statement as mandated by Congress</td>
</tr>
<tr>
<td></td>
<td>[This section is no longer updated, the GCES program having ended.]</td>
</tr>
</tbody>
</table>

The Glen Canyon Environmental Studies (GCES) were created to perform as an interagency body under the direction of the U.S. Department of the Interior, Bureau of Reclamation. It responded to a Congressional mandate to develop an Environmental Impact Statement on the effects of hydropower production at Glen Canyon Dam on the Colorado River and its riparian community downstream through lower Glen Canyon and the Grand Canyon. The EIS also examined the potential impacts of management decisions on social and economic issues. The GCES went through two phases, and the EIS was completed in 1995.

The GCES was such an important part of the scientific and cultural study of the Grand Canyon, specifically in the previously little-studied Colorado River corridor, that the products of these studies are a bibliography in their own right. Many of the documents are interdisciplinary, thus also a justification for listing them separately, rather than in several places throughout this bibliography. Historians of science will also notice in this list that some of the subjects were reported in other scientific publications. A few of the reports were also released in their entirety as U.S. Geological Survey Open-File Reports or publications of the National Academy Press; these are itemized here. Most of the reports listed here, and voluminous supporting data, are archived at the Grand Canyon Monitoring and Research Center, Flagstaff, Arizona. Complete information for this list is still being compiled.

Enumerated entries following the sequence for this bibliography do not necessarily pertain to individual reports; some refer to study groups, various reports of which are archived.
<p>| 21 | <strong>Geology and Paleontology</strong> | Geology and paleontology of the Grand Canyon region, including extralimital studies of the continuity of Grand Canyon strata, regional structure and tectonics, regional groundwater hydrology, and the geological evolution of the Colorado River. This part includes works about the geology and paleontology of the Grand Canyon (including hydrogeology of tributaries to the Colorado River, but excluding the hydrogeologic regime of the Colorado River), studies of Grand Canyon rock units and their stratigraphic continuity beyond the canyon-proper, studies of the structure and tectonics of southwestern North America where embracing the Grand Canyon region, investigations of the evolution of the Grand Canyon and the Colorado River (including studies extralimital to the scope this bibliography), modern groundwater studies of the region, and general reports on topographic and geologic mapping in the region. Some works relating to physical geography are also included here, as are also items that relate to the Grand Canyon (or Grand Canyon-like) computerized terrain models. |
| 22 | <strong>Hydrogeology of the Colorado River</strong> | Hydrogeology of the Colorado River and some tributary surface waters in the Grand Canyon — including hydraulic investigations of the river, sedimentary studies in the river corridor, surface-water resources of the Colorado River mainstem below Glen Canyon Dam. This part encompasses all physical studies of the water flow (hydrology) of the Colorado River, applied research on its carried and bottom sediment, and the effects of the river’s fluctuating flow on the distribution of sediment on the banks of the river. Includes hydrogeological investigations in Glen Canyon National Recreation Area below Glen Canyon Dam. |</p>

<th><strong>Geological Field Guides</strong> *</th>
<th>Geological field guides and road logs for the Grand Canyon and vicinity, and for the Colorado River corridor between Glen Canyon Dam, Arizona, and Mexico</th>
<th>This part includes all publications that are intended to serve as geological field guides to routes and specific localities in the Grand Canyon and vicinity. Included among them are all geological guides to the Colorado River through the Grand Canyon.</th>
</tr>
</thead>
</table>
| 23| **Geologic Maps** *          | Separately published geologic, geodetic, and special topographic maps of the Grand Canyon region, and summary studies relating to geologic mapping | This list includes only separately published maps, and atlas sheets. For a more comprehensive index to all published geologic maps, to 1992, that includes those that were published as figures within publications, see in:  

* The distinction between “geological” and “geologic” depends upon whether the science of geology is the subject (geological) or whether the data of geology (geologic) is the subject; similarly for other adjectives of this kind.
### Graphic–Audio–Digital Media

| 25 | **General Maps** | Separately published general and specialized maps, charts, and atlas sheets that include the Grand Canyon or the lower Colorado River region — excluding geologic and special topographic maps |
| 26 | **Audio-Visual Works** | Audio-visual works — photographic sets (including slides and overhead transparencies), film strips, motion pictures (silent and sound), videotapes, and compact disks (CDs, DVDs, etc.) relating to the Grand Canyon or the lower Colorado River region |

There are hundreds more maps that surely could be listed here, but only those which have come to my attention are included. The catalogues of map dealers include many maps that cover the Southwest; unfortunately, their citations are incomplete and often the illustrations are too small to read pertinent author and publisher data from the map.

Also see entries listed in *Official map publications; a historical sketch, and a bibliographical handbook of current maps and mapping services in the United States, Canada, Latin America, France, Great Britain, Germany, and certain other countries*, by Walter Thiele, under the direction of A. F. Kuhlman (American Library Association, Chicago, 1938, 356 pp.); and *Vegetation maps of North America*, compiled by A. W. Küchler and Jack McCormick (International Bibliography of Vegetation Maps, A. W. Küchler, ed., Volume 1, Anton W. Van Bekhoven, Naarden, 453 pp.).

Audio-visual works — photographic sets (including slides and overhead transparencies), film strips, motion pictures (silent and sound), videotapes, and compact disks (CDs, DVDs, etc.) relating to the Grand Canyon or the lower Colorado River region — includes items for younger audiences. Silent films are included in this part. Resources available only online are not included.

For certain tape speeds, ips = inches per second. Names of producing agencies are used for the indexed field. Playing times are given in minutes:seconds.
| 27 | Audio Works and Musical Scores | Audio works (reading and musical) — audio tapes, analog recordings, and audio-only digital disks (CDs, DVDs, etc.)—relating to the Grand Canyon or the lower Colorado River region, and orchestral and other musical scores

This part lists audio recordings (reading and musical) and printed musical scores. Resources available only online are not included. Also included here are pertinent annotated guides to available audio recordings.

“Record” is an analog sound recording, or “phonodisc”; 78 rpm (revolutions per minute) format is on 10-inch plastic disks, 45 rpm format is on 7-inch plastic disks, and 33_ rpm format is on 12-inch plastic disks. For tape speeds, ips = inches per second. Except for certain items especially identified to the artist or to the composer of musical works, names of producing agencies are used in the author field. Playing times are given in minutes:seconds. |

| 28 | Miscellaneous Imagery | Miscellaneous art works and photographs that are not accompanied by textual material, appearing by themselves with or without legend

This section includes only single, extraneous items; for example, a reproduction of a single painting, or folios containing prints only, without accompanying text other than the legend. Photographs within articles or books that are credited to specific people or sources are not listed separately in this bibliography. |

| 29 | Computer and Interactive Media | Computer media and selected digital interactive media for personal devices, which include the Grand Canyon or the lower Colorado River region

This section includes items that were released only in a computer-readable format, or in both hardcopy format accompanied by computer-readable versions or additional data in computerized format. Also included are announcements and similar items regarding media that are designed for digital personal-pad products such as iPhone, iPad, iPod Touch, or Android [some products in use as of 2014]. Further included here are articles that may explain how certain computerized media were created. Web-based media are excluded from this bibliography due to the likelihood of individual products being inaccessible in the future. Personal (hand-held) media such as Kindle editions of books are likewise excluded because of their narrowly restrictive limitations to proprietary products and inconsistent data on provenance and availability. |
## Other Guides

<tbody>
<tr>
<td></td>
<td>Brief guide to newspaper titles of the Grand Canyon and lower Colorado River regions</td>
</tr>
<tr>
<td></td>
<td>In the bibliography viewed online, these citations are viewed in a text file; they are not part of the searchable component of the bibliography. Strings are searchable in the present document, as viewed in a word processor. [The online text file has not been updated since 2000.]</td>
</tr>
<tr>
<td></td>
<td>Newspapers are a valuable resource to the historian. Long-running papers of any town or city are important historical documents, but researchers who bask in the thrill of finding the obscure and unusual anecdote, small-town and out-of-print newspapers are a mine of information.</td>
</tr>
<tr>
<td></td>
<td>This list of newspapers does not imply that it is exhaustive, nor is there any guarantee that all of them have had coverage of events or people of the immediate Grand Canyon or lower Colorado River regions. But within these regions it is likely that newspapers published there have had a higher frequency of Canyon- and River-related items than the newspapers of more distant places. This list provides a sampling of newspapers of northern Arizona, southern Nevada, and southern Utah. A special supplement to the Arizona list includes newspapers of that intersection of the far Southwest, Yuma.</td>
</tr>
</tbody>
</table>
### Marginalia

| 32 | Items not about the Grand Canyon *per se* but having a Grand Canyon venue, items unrelated to but utilizing the Grand Canyon in non-metaphorical senses, or items otherwise used with direct application to the Grand Canyon without occurring there |

This part contains citations which are themselves not about the Grand Canyon but refer to the Grand Canyon as a venue—for example, meetings and conferences about subjects other than the Canyon held at Grand Canyon—or as a projected destination, without certainty that the parties involved do actually reach the Grand Canyon. While these citations do not specifically contain information about the Canyon, that they took place there, or intended to take place there, makes them peripherally a part of the history of the Canyon. Also included here are some similarly marginal references to nearby Grand Canyon locales, which are embraced within this bibliography.

---

Regarding Parts 33 and 34, which are no long a part of *The Grand Canon* compilation, see separate comments in the “Coverage and Format” section of the introductory notes.
THE BIBLIOGRAPHY
BIBLIOGRAPHIES, INDICES AND RELATED WORKS

Bibliographies, indices and related works that include the Grand Canyon or the lower Colorado River region

Every bibliography and reference list has its good and bad points; each is designed to serve a different purpose and audience. The citations given here are those which relate directly to the Grand Canyon and lower Colorado River, or which include sufficient references on the region to make them a valuable supplementary or alternate contemporary resource to THE GRAND CANON. Other bibliographies also extend their coverage beyond the limits of THE GRAND CANON.

Bibliography of the Grand Canyon

and the Lower Colorado River

From 1540

Supplement 1

Compiled by
Earle E. Spamer

with
Daniel F. Cassidy and John Irwin

Published by
Grand Canyon Natural History Association
Monograph B - Supplement 1 - 1992 [1993]
One of five 5¼-inch diskettes containing the 2nd edition in ASCII digital format. (A sixth diskette contains the Supplement, 1993.)

One of six microfiche cards containing the 2nd edition and Supplement.
Fully Collated Pagination Sequence and Tab Placements for
*Bibliography of the Grand Canyon and the Lower Colorado River*
(Grand Canyon Natural History Association Monograph 8, 1990)
Second Edition
and
*Supplement 1* (1993)

Loose-leaf format in binder with tabs. Pagination sequence below reflects fully collated binder.

**Bold red print indicates components and pagination of 1990 edition.**

Blue print indicates interleaved pages of *Supplement 1, 1992 [1993]*

[Only one supplement was published. The bibliography was superseded by the Internet Edition online.]

### TAB 1 Popular Works

- **[1-1] to 1-2**  
  [Title-sheet and illustration]

- **1-3 to 1-52**  
  Part 1. Popular Works About the Grand Canyon and the Lower Colorado River. Including Accounts of the Early Spanish Expeditions. With Special Sections on Guides to Hiking, Camping, and Road Travel, and Colorado River Guides  
  Introduction by Richard Quartaroli, pp. 1-3 to 1-5

- **1-53 to 1-79**  

#### 1–Special Section 1–1 to 1–Special Section 1–3
- **Special Section 1. Guides to Hiking, Camping, and Road Travel in the Grand Canyon Region**

#### 1–Special Section 1–5 to 1–Special Section 1–8
- **Part 1. Special Section 1. Guides to Hiking, Camping, and Road and Air Travel in the Grand Canyon Region**

#### 1–Special Section 2–1 to 1–Special Section 2–3
- **Part 1. Special Section 2. Guides to the Colorado River. Supplement 1**

### TAB 2 Lower Colorado River

- **[1-1] to 1-2**  
  [Title-sheet and illustration]

- **2-3 to 2-23**  
  Part 2. Geography, Geology, Hydrology, and Engineering Projects of the Lower Colorado River: Lake Mead to the Colorado River Delta. With a special section on Geologic Field Guides  
  Introduction by Earle Spamer [unsigned], pp. 2-3 to 2-4

- **2-25 to 2-28**  
  Part 2. Geography, Geology, Hydrology, and Engineering Projects of the Lower Colorado River: Lake Mead to the Colorado River Delta. Supplement 1

- **2–Special Section–1**  
  Special Section. Geologic Field Guides

### TAB 3 Geology

- **[3-1] to 3-2**  
  [Title-sheet and illustration]

- **3-3 to 3-97**  
  Introduction by Earle E. Spamer, pp. 3-3 to 3-11

- **3-99 to 3-117**  

- **3–Special Section 1–1 to 3–Special Section 1–4**  
  Special Section 1. Geologic Field Guides to the Grand Canyon and the Colorado River

- **3–Special Section 1–5**  
  Part 3. Special Section 1. Geologic Field Guides to the Grand Canyon and the Colorado River

- **3–Special Section 2–1 to 3–Special Section 2–5**  
  Special Section 2. Geologic Maps

- **3–Special Section 2–7 to 3–Special Section 2–8**  
  Part 3. Special Section 2. Geologic Maps. Supplement 1

Years: [ ] to [ ]  \( ^1 \)
No Date  \( ^2 \)
Unknown

Author's Name

Key words: [ ]  \( ^4 \)

Subject: [ ] All Subjects

Citation Number

View: [ ] Results Per Page

Search

\( ^1 \) Searches include the start and end year. To search for citations from the
date 1990 only, enter '1990' to '1990'. Check 'No Date' or 'Unknown' for
 citations which have no stated date or for which date information is
 absent. To search only 'No Date' or 'Unknown' citations, check the
appropriate boxes and leave the 'from' year blank.

\( ^2 \) Keyword searches may use all lower-case letters. But the use of capital
letters will search only for those capital letters. Words entered as a phrase
will be searched as a phrase. Do not use quotation marks (unless the item
being searched for also contains quotation marks). To find entries
containing discreetly different words, use 'and', 'or', and 'not' between
the words. If you cannot type in discreetly marks like "" or ", use
wildcards. For examples of search click here.

(image captured in August 2011; basic layout unchanged since 2000, but information on
keyword searches emended at later times)
The following table of contents for the Internet Edition of the bibliography was copied from the web page online in 2011. It is largely unchanged from its first presentation in January 2000 and was arranged by a former website provider for Grand Canyon Association.

Compare this presentation to that for THE GRAND CANON (see contents) to ascertain further changes that have been made to part titles and descriptions; but most notably, the removal of Parts 33 and 34, about which:

**Part 33—“Other” Grand Canyons** is no longer updated and is not included in THE GRAND CANON. That part, which tracked uses of “Grand Canyon” in other geographical locales, was removed as a matter of pragmatic bibliography, not truly pertaining to the Grand Canyon except through nomenclature and comparison, analogy, and metaphor. These separately lists are now appended to THE GRAND CANON as literary compilations but otherwise they stand independently of the overall bibliography.

**Part 34—Miscellaneous Manuscripts** was removed from this version of the bibliography in November 2003; it was also removed from the Internet Edition online. Originally, I had believed it was prudent to include manuscript materials that were cited by other sources, in order to include those records in the bibliography. However, this is not the purpose of the bibliography; tracking manuscript and other primary source materials is an entirely separate project, one for someone else to pursue.
TABLE OF CONTENTS

To search the full bibliography, go to the search screen. The links below will allow you to search individual portions of the bibliography.

BIBLIOGRAPHIES AND INDICES

1. BIBLIOGRAPHIES
Bibliographies and indices that include the Grand Canyon or the lower Colorado River region

Every bibliography and reference list has its good and bad points; each is designed to serve a different purpose and audience. The citations given here are those which relate directly to the Grand Canyon and lower Colorado River, or which include sufficient references on the region to make them a valuable supplementary or alternate contemporary resource to the present bibliography. Other bibliographies also extend their coverage beyond the limits of the present bibliography.

GENERAL AND SPECIAL INTEREST SUBJECTS

2. GENERAL
General, historical, and "popular" works, including regional geography, non-fictional literature, and biographical material relating to the Grand Canyon or the lower Colorado River corridor between Glen Canyon Dam, Arizona, and the Colorado River delta in Mexico

This part includes all literature that broadly addresses the Grand Canyon-lower Colorado River region as well as specifically focused literature. It includes material written for a popular audience as well as scholarly publications that deal at least in part with the Grand Canyon or the lower Colorado River. Material that may otherwise be classified as "Miscellaneous" is also in this part of the bibliography. Travel literature that is more travelogue in presentation is included in this part, but travel publications that are incremental guides to attractions and informational guides to accommodations and services will be found in 9. Travel.

3. NEW YORK TIMES
Grand Canyon articles and reports in The New York Times from 1857

*The New York Times* is widely available on microfilm. Its comprehensive and authoritative editorial view of national affairs, as well as its traditionally well-respected reporting, make it a useful resource on national perspectives of events and issues in the Southwest. The longevity of this newspaper also allows it to serve as a Grand Canyon-
Colorado River bibliography back to the time of the first expeditions to the canyon by Joseph C. Ives (1857-1858) and John Wesley Powell (1869).

For book reviews, see 30. Reviews.

4. MEMORIALS
Biographical memorials, necrologies, and obituary notices that refer to people of the Grand Canyon and lower Colorado River

To browse the memorials by name of the decedent instead of the author, see the separate file, Memorials (By Name of Decedent) [NOTE: This is a text file, not updated since January 2000.]

This part lists only obituary notices and commemorative or retrospective memorials. Such sketches are cited here only if the citationist refers to the Grand Canyon or the Colorado River. A few pertinent miscellaneous biographical sketches of persons prominent in the history of the area are also included. Traditional biographies as books and articles are listed in 2. General. The name of the decedent is added to the end of the citation, with his or her dates where known.

5. VISION-IMPAIRED
Works produced especially for vision-impaired people

This part includes items specifically prepared for the visually impaired. These citations are from the Library of Congress Information System; some publications are available only to those meeting holding-agency eligibility criteria. Dates given are for the printed volume from which the special product was prepared, unless listed otherwise.

See 27. Audio Only for conventional audio recordings.

6. YOUTH
Non-fiction and fiction for younger audiences that includes the Grand Canyon or the lower Colorado River

This part includes all those works traditionally referred to as "juvenile"; it includes works that also can be categorized as appropriate for the "young adult". Both non-fiction and fiction are grouped together in order to provide complete, contiguous coverage in this special literary genre. If the context of the title does not clearly indicate whether the item is fiction or non-fiction, a notation is appended to explain it.

7. FICTION
Fiction for adult audiences that includes the Grand Canyon or the lower Colorado River

This part lists only works of fiction, including folklore. However, special-interest subjects that can be considered by many to be works of fiction—such as those relating to UFOs and Creationist topics—are considered to belong either to "general" subjects or to the specific subject to which it purports to belong (e.g. Geology).

See 6. Youth for "juvenile" and "young adult" fiction.

8. VERSE
Poetry and verse about the Grand Canyon or the lower Colorado River

Publications that are both prose and verse are listed here as well as in Part 2. General.
9. TRAVEL
Informational guides to attractions and accommodations of hiking, camping, and land-, water-, and air-travel in the Grand Canyon region and the vicinity of the lower Colorado River (excluding Colorado River guides)

This part includes only those publications that provide route-finding information, seasonal data on accommodations, and time-limited information such as fees—specifically for lodging, restaurants, commercial recreational and educational opportunities, and scenic attractions.

See 2. General for essay-type guides that largely omit information on locations, fees, hours of operation, and other such time-limited information.

See 10. Colorado River Guides for travel guides to the Colorado River.

10. COLORADO RIVER GUIDES
Informational guides to travel on the Colorado River between Glen Canyon Dam, Arizona, and Mexico (excluding geological guides)

This part includes "strip maps" and other such specific guides for travelers.

LOWER COLORADO RIVER CORRIDOR SPECIAL INTEREST SUBJECTS

11. LOWER COLORADO—NATURAL HISTORY
Natural history and geography specifically about the lower Colorado River corridor below Grand Canyon — Lake Mead, Arizona–Nevada, to the Colorado River delta in Mexico

This part includes only those natural history and geography references that are restricted to the lower Colorado River corridor from Lake Mead to the delta. It includes hydrologic investigations of the river itself, as limited to this reach, including studies of that part of Lake Mead which has inundated the lower Grand Canyon. This part also lists natural history studies related to the Salton Sea.

See 2. General for general and historical works pertaining to the lower Colorado River.
See 21. Geology for surface-water supply documents pertaining to the Colorado River basin.

12. LOWER COLORADO—PROJECTS
Engineering projects and water management issues in the Colorado River corridor below Grand Canyon — Lake Mead, Arizona–Nevada, to the Colorado River delta in Mexico — and proposed projects in the Grand Canyon

This part includes all references that deal with the dams and support facilities in the lower Colorado River, from Hoover Dam to the delta. Also included are documents related to irrigation and flood-control measures in the lower Colorado River; among them are project-specific documents and articles about the Colorado River breakout and the inundation of the Salton sink. As a means to accommodate the literature on proposed dams and diversion structures inside the Grand Canyon, documents relating to them are included in this part.
GRAND CANYON REGION HUMAN AFFAIRS SUBJECTS

13. ADMINISTRATION
Administration of Grand Canyon National Park and adjacent federal lands (including that part of Glen Canyon National Recreation Area between Glen Canyon Dam and Lees Ferry, Arizona)

This part comprises items broadly relating to the administration of the national park and earlier administratively sectioned lands. But it lists more than documents pertaining to bureaucratic procedures and regulations. Also included here are references that pertain to land use practices affecting the politically defined unit; some items relating to historic structures; management documents derived from environmental studies on public lands; public comments on, and responses to, proposed and implemented studies and management decisions; and general articles and published opinions that relate to legislative issues affecting the protection, operation, and public use of the lands of the political unit.

For less similarly related items, see also:
14. Human Affairs for sociological, recreational, and economic analyses of visitation profiles, visitor experiences, and social concerns of authorized concessions in the national park, and for similar analyses of the impact of legislatively mandated operational changes to the economic and power supply mandates of Glen Canyon Dam
15. Health and Safety for issues relating to human health and safety, including those that discuss and contribute to administrative decisions on management issues
18. Environment—Physical Ecology for ecological studies that discuss and contribute to administrative decisions on management issues
19. Environment—Biological for ecological studies relating to management of living organisms
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
21. Geology for physical and geological studies of environment that discuss or contribute to administrative decisions on management issues

14. HUMAN AFFAIRS
Sociological, recreational, educational, and economic issues, commentaries, and analyses relating to the Grand Canyon region

This part lists analytical studies and reports that relate to socio-economic concerns, including visitor appreciation and social "quality of wilderness" studies, and items pertaining to teaching and instruction about the Grand Canyon and Colorado River.

For related items, see also:
13. Administration for public-lands overview and management decision documents that relate to recreation and aesthetics
18. Environment—Physical Ecology for quantitative studies of environmental quality
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

15. HEALTH AND SAFETY
Issues relating to human health and safety in the Grand Canyon or on the Colorado River through Grand Canyon

This part lists items relating to human health and safety in the national park and immediate vicinity. It also includes documents on accident investigations.
For related items, see also:

3. New York Times for pertinent accounts published in New York Times (e.g., aircraft accidents)
13. Administration for aspects of safety issues that have resulted in discussion or management decisions relating to federally administrated areas
17. Native Americans for material relating to Native American tribes and their relationship with the Grand Canyon after European contact
18. Environment—Physical Ecology for aspects of environmental monitoring of the physical environment
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

16. ARCHAEOLOGY
Archaeological history and research in the Grand Canyon region, including historical archaeology of nineteenth- and twentieth-century activities

This part includes items that relate to archaeological surveys of cultural artifacts and physical remains, from early human inhabitation of the Grand Canyon region to the remnants of recent historical (nineteenth- and twentieth-century) activities.

Also see 20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents

17. NATIVE AMERICANS
Native Americans of the Grand Canyon and issues relating to Native American activities in the canyon and in the national park

This part includes all documents that pertain to the Havasupai, who live within the physiographic Grand Canyon. Other Native American tribes are included in this part only with respect to their activities in the Grand Canyon, or with respect to their traditional or claimed heritage of the Grand Canyon.

See also:

2. General for publications of broader interest that relate at least in part to Native Americans and the Grand Canyon, including general travel items
16. Archaeology for publications relating to Native Americans prior to European contact, or to archaeological documentation of Native American heritage claims to the Grand Canyon
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
26. Audio-Visual for films and videos that relate at least in part to Native Americans and the Grand Canyon

GRAND CANYON REGION SCIENTIFIC SUBJECTS

18. ENVIRONMENT—PHYSICAL ECOLOGY
Physical, chemical, biophysical, and biochemical aspects of land, water, and atmospheric ecology, and historical aspects of environmental research, relating to the Grand Canyon region and the Colorado River corridor through the Grand Canyon

This part includes studies of biological ecology that are not organismically specific, and environmental studies that have been part of scientific investigations conducted for the purpose of management of public lands in the Grand
Canyon region. This part also includes general articles that pertain to environmental issues in the Grand Canyon region.

For items pertaining to natural history in the lower Colorado River corridor, below Lake Mead, see 11. Lower Colorado River—Natural History and 12. Lower Colorado River—Projects.

For related items, see also:

13. Administration for items on policy input, management documents drafted as the result of environmental studies, and public comments on these documents
14. Human Affairs for economic and sociological impacts of dam operations and river flows
15. Health and Safety for human health issues of environment in Grand Canyon and on the Colorado River
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
21. Geology for physical and geological environmental impacts
22. Hydrogeology for environmental impacts to the hydrogeological regime of the Colorado River

19. ENVIRONMENT—BIOLOGY
Organismal biology and biological investigations in the Grand Canyon region and the Colorado River corridor through the Grand Canyon

This part includes documents on biological censuses and the biology of animal, plant, and protist organisms as occurring in the Grand Canyon region. This part also includes biological reports and studies that have been part of scientific investigations conducted for the purpose of environmental management of public lands in the Grand Canyon region.

For items pertaining to natural history in the lower Colorado River corridor below Lake Mead, see:

11. Lower Colorado River—Natural History
12. Lower Colorado River—Projects

For related items, see also:

13. Administration for items on policy input and management documents drafted as the result of environmental studies and public comments on these documents
14. Human Affairs for economic and sociological impacts of dam operations and river flows
15. Health and Safety for human health issues of environment in Grand Canyon and on the Colorado River
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
21. Geology for physical and geological environmental impacts
22. Hydrogeology for environmental impacts to the hydrogeological regime of the Colorado River

20. GCES

Glen Canyon Environmental Studies technical reports and related documents produced under the monitoring and research programs of the Glen Canyon Dam Environmental Impact Statement as mandated by Congress
(compiled by Richard D. Quartaroli)

Browse file only. Due to the unconventional format of these informational citations, they are not part of the searchable database. [NOTE: This is a text file, not updated since January 2000. The citations, however, have since been modified and included in the online database.]
The Glen Canyon Environmental Studies (GCES) were created to perform as an interagency body under the direction of the U.S. Department of the Interior, Bureau of Reclamation. This was in response to a congressional mandate to develop an Environmental Impact Statement on the effects of hydropower production at Glen Canyon Dam on the Colorado River and on the river’s riparian community downstream through lower Glen Canyon and the Grand Canyon. The EIS also examined the potential impacts of management decisions on social and economic issues. The GCES went through two phases, and the EIS was completed in 1995. Also see **13. Administration** for various management issues and decisions related to the GCES.

The GCES was such an important part of the scientific and cultural study of the Grand Canyon, specifically in the previously little-studied Colorado River corridor, that the products of these studies are a bibliography in their own right. Many of the documents are interdisciplinary, thus also a justification for listing them separately, rather than in several places throughout this bibliography. Historians of science will also notice in this list that some of the subjects were reported in other scientific publications. A few of the reports were also released in their entirety as U.S. Geological Survey Open-File Reports or publications of the National Academy Press; these are itemized here. Most of the reports listed here, and voluminous supporting data, are archived at the Grand Canyon Monitoring and Research Center, Flagstaff, Arizona. Complete information for this list is still being compiled.

Enumerated entries following the sequence for this bibliography do not necessarily pertain to individual reports; some refer to study groups, various reports of which are archived.

### 21. GEOLOGY

**Physical and historical geology of the Grand Canyon region (including groundwater hydrogeology but excluding hydrogeology of the Colorado River and other surface waters)**

This part includes works about the geology and paleontology of the Grand Canyon (excluding the hydrogeologic regime of the Colorado River), stratigraphic studies of Grand Canyon's rock units beyond the canyon proper, studies of the structure and tectonics of southwestern North America where embracing the Grand Canyon region, historical investigations of the Cenozoic evolution of the Grand Canyon and the lower Colorado River, and modern groundwater studies of the region.

Also see:

- **11. Lower Colorado—Natural History** for geological works about the lower Colorado River region, Lake Mead, Arizona-Nevada, to the Colorado River delta in Mexico
- **20. GCES** for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
- **22. Hydrogeology** for materials relating to the hydrogeologic regime of the Colorado River through the Grand Canyon
- **29. Computer Media** for specialized products released for use in this environment

### 22. HYDROGEOLOGY

**Hydrogeology of the Colorado River and tributary surface waters in the Grand Canyon — including hydraulic investigations of the river, sedimentary studies in the river corridor, surface-water resources, and hydrogeological investigations relating to proposed engineering projects in the river corridor between Glen Canyon Dam and Lake Mead**

This part encompasses all physical studies of the water flow (hydrology) of the Colorado River, applied research on its carried sediment, and the effects of the river's flow on the distribution of sediment on the banks of the river.
Also see:

13. Administration for items on policy input and management documents drafted as the result of environmental studies of the Colorado River
18. Environment—Physical Ecology for items relating to physical ecology as affected by the Colorado River through the Grand Canyon
19. Environment—Biology for items relating to biological ecology as affected by the Colorado River through the Grand Canyon
20. GCES for a consolidated listing of Glen Canyon Environmental Studies technical reports and related documents
21. Geology for items relating to groundwater hydrology and climatic studies with hydrological applications

23. GEOLOGICAL GUIDES
Geological field guides and road logs for the Grand Canyon and vicinity, and the Colorado River corridor between Glen Canyon Dam, Arizona, and Mexico

This part includes all publications that are intended to serve as geological field guides to routes and specific localities in the Grand Canyon and vicinity. Included among them are all geological guides to the Colorado River through the Grand Canyon.

See 10. Colorado River Guides for base maps and general guides to the Colorado River.

24. GEOLOGIC MAPS
Separately published geologic and special topographic maps of the Grand Canyon region

This list includes only separately published maps, and atlas sheets. For a more comprehensive index to all published geologic maps to 1992 that includes those that were published as figures within publications, see in:

IMAGE AND AUDIO

25. GENERAL MAPS
Separately published maps, charts, and atlas sheets that include the Grand Canyon or the lower Colorado River region (excluding geologic and special topographic maps)

There are hundreds of maps that could be listed here, but only those which have come to my attention are included. The catalogues of map dealers include many maps that cover the Southwest; unfortunately, their citations are incomplete and often the illustrations are too small to read pertinent author and publisher data from the map.

Also see entries listed in Official map publications; a historical sketch, and a bibliographical handbook of current maps and mapping services in the United States, Canada, Latin America, France, Great Britain, Germany, and certain other countries, by Walter Thiele, under the direction of A. F. Kuhlman (American Library Association, Chicago, 1938, 356 pp.); and Vegetation maps of North America, compiled by A. W. Küchler and Jack McCormick
(International Bibliography of Vegetation Maps, A. W. Küchler, ed., Volume 1, Anton W. Van Bekhoven, Naarden, 453 pp.).

For Colorado River guides (strip maps), see 10. Colorado River Guides.

26. AUDIO-VISUAL
Audio-visual works — photographic sets, motion pictures, videotapes, and compact disks (CDs) relating to the Grand Canyon or the lower Colorado River

For certain tape speeds, ips = inches per second. Names of producing agencies are used for the indexed field. Playing times are given in minutes:seconds.

See also 5. Vision-Impaired for recordings produced specifically for the visually impaired.
See also 29. Computer Media for products designed for use on computers.

27. AUDIO ONLY
Audio works — audio tapes, analog recordings, and audio-only compact disks (CDs) relating to the Grand Canyon or the lower Colorado River, and orchestral and other musical scores

"Record" is an analog sound recording, or "phonodisc"; 78 rpm (revolutions per minute) format is on 10-inch plastic disks, 45 rpm format is on 7-inch plastic disks, and 33 1/3 rpm format is on 12-inch plastic disks. For tape speeds, ips = inches per second. Except for certain items especially identified to the artist or to the composer of musical works, names of producing agencies are used in the author field. Playing times are given in minutes:seconds.

See also 5. Vision-Impaired for recordings produced specifically for the visually impaired.
See also 27. Audio-Visual for audio-visual materials incorporating Grofé's "Grand Canyon Suite" in its entirety or in selected excerpts.
See also 29. Computer Media for products designed for use on computers.

28. MISCELLANEOUS IMAGERY
Miscellaneous artworks and photographs that are not illustrative material in works of general, historical, literary, or biographical interest, but appear by themselves with or without legend

This part includes only single, extraneous items; for example, a reproduction of a single painting, or folios containing prints only, without accompanying text other than the legend.

See 2. General for more complete and critical material on art and photography of the Grand Canyon-Colorado River region.

29. COMPUTER MEDIA
Computer media that include the Grand Canyon or the lower Colorado River

This part includes items that were released only in a computer-readable format, or in both hardcopy format accompanied by computer-readable versions or additional data in computerized format.

OTHER GUIDES

30. REVIEWS
Critical and brief reviews of books, articles, films, and products about the Grand Canyon or lower Colorado River

To browse the reviews by the title of the work being reviewed instead of the review's author, see the separate file, Reviews (By Title). [NOTE: This is a text file, not updated since January 2000.]

This part includes critical reviews at length in scholarly publications, as well as favorable promotional reviews in general-interest publications. Product reviews include software.

31. NEWSPAPER GUIDE
Brief guide to newspaper titles of the Grand Canyon region (and a supplemental list for Yuma, Arizona)

Browse file only. Due to the unconventional format of these informational citations, they are not part of the searchable database.

Newspapers are a valuable resource to the historian. Long-running papers of any town or city are important historical documents, but researchers who bask in the thrill of finding the obscure and unusual anecdote, small-town and out-of-print newspapers are a mine of information.

This list of newspapers is not exhaustive, nor is there any guarantee that all of them have had coverage of events or people of the immediate Grand Canyon or lower Colorado River regions. But within these regions it is likely that newspapers published there have had a higher frequency of canyon- and river-related items than the newspapers of more distant places. This list provides a sampling of newspapers of northern Arizona, southern Nevada, and southern Utah. A special supplement to the Arizona list includes newspapers of that crossroads of the far Southwest, Yuma.

32. MARGINALIA
Items not about the Grand Canyon but having a Grand Canyon venue or otherwise borrowing the name "Grand Canyon"

This part contains citations which are themselves not about the Grand Canyon but refer to the Grand Canyon as a venue; for example, meetings and conferences about subjects other than the canyon held at Grand Canyon. While they do not specifically contain information about the canyon, that they took place there makes them peripherally a part of the history of the canyon.

See 33. "Other" Grand Canyons for items relating to other geographical features that use the appellation "Grand Canyon". 
33. "OTHER" GRAND CANYONS

Works that refer to other geographic features of the world and elsewhere that use the appellation "Grand Canyon" or make comparisons to the Grand Canyon, and works in which there are metaphorical references to the Grand Canyon

This part lists citations that pertain to other geographic features that include "Grand Canyon" as part of their names; for example, "Grand Canyon of the Yellowstone" or "The Little Grand Canyon". This part also contains: citations of articles that in some way compare the magnitude of other geographic features—on Earth and elsewhere—with the Grand Canyon; cite the Grand Canyon as the superlative chasm of the world; as well as more abstract comparisons, such as "the equatorial Grand Canyon", a concept of global economics. Exception is made here to this bibliography's exclusion of newspaper items; and further, to document the appearance of such items, this part includes such ephemera as advertising flyers, postcards, and some items that we have seen on the Internet, with the realization that the last category is especially ephemeral. For the Internet citations, the date is given for when seen by the compiler. Annotations provide quotations or the context in which the reference to the Grand Canyon appears. This documents all such references and comparisons to the Grand Canyon as have come to the attention of the compiler and contributors. For a published listing, now incomplete, of other known geographic features named "Grand Canyon" and "Colorado River", refer to the article by Corax and Abyssus (1996). The Geographic Names Information System managed by the U.S. Geological Survey is also a useful Internet resource at http://www-nmd.usgs.gov/www/gnis/index.html. The Defense Mapping Agency provides a similar resource for geographic names outside of the United States at http://164.214.2.53/gns/html/index.html.

34. MISCELLANEOUS MANUSCRIPTS

Manuscript materials originally cited in the bibliography or intended for inclusion in the Internet edition; subsequently removed but retained in this part for archival purposes

[Earlier editions of this bibliography included some manuscript resources that should not have been cited. It is beyond the purview of this bibliography to list manuscripts and unique copies of reports. When such were originally added, it was believed that they were of sufficiently unique or special interest to warrant listing them; usually, a notation was appended to indicate the reference from which the citation was obtained; this was intended to be a means by which interested readers could refer back to the original citation to establish the context of the citation. These manuscript materials have been deleted from the formal parts of the bibliography, but they are retained in this part so as not to lose useful (even if not comprehensive) information that had been in previous editions. Citations which lack a cross-reference to Monograph 8 are items that were compiled for inclusion in the present edition. In one instance, a copy of an unpublished report appeared in a bookseller's annotated catalogue. For each citation, the part of this Internet edition of the bibliography for which it had been intended is indicated.

End of Appendices to Part 1 of Bibliography
GENERAL AND SPECIAL-INTEREST SUBJECTS
General and popular works, including history, regional geography, non-fictional literature, and biographical material, relating to the Grand Canyon or the lower Colorado River corridor between Glen Canyon Dam, Arizona, and the Colorado River delta in Mexico.

This section includes all literature that broadly addresses the Grand Canyon-lower Colorado River region as well as literature specifically focused on this region or a part of it. It includes material written for a popular audience as well as scholarly publications that deal at least in part with the Grand Canyon or the lower Colorado River. General environmental publications, as opposed to those that are more technical or administrative in nature, are included in this part of the bibliography. Material that may otherwise be arbitrarily classified as “Miscellaneous” (not pertinent in other parts of the bibliography) is also in this part.

See also Part 3, New York Times for pertinent articles relating to the Grand Canyon and lower Colorado River during 1851 to present.

See also Part 4, Memorials for memorials and announcements regarding deceased individuals.

Travel literature that is more travelogue in presentation is included in this part, but travel publications that are incremental guides to attractions and informational guides to accommodations and services will be found in Part 9, Travel Guides.

For additional comments in the Introductory Notes click here.
Anonymous

Scenic views; Yuma Arizona; a true pictorial story of the American Egypt. Yuma, Arizona: [no imprint], [63] pp. GUIDON 676

Hoover (Boulder) Dam and the Lake Mead Recreational Area. Boulder City, Nevada: [no imprint?], 28 pp. FQ7:Misc.20

Historical Boulder City cookbook (Cliff Segerbloom, illustrator). [Boulder City, Nevada: Boulder City Museum and Historical Association], 160 pp.

The spectacular Grand Canyon; 200 miles long, 13 miles wide and about 1 mile deep. With as many moods and colors as there are days in the year. [Valle, Arizona?]: Farley’s and The Petrified Log, [4] pp. (Printed by Mohave County Miner.)

Man in the Grand Canyon. Grand Canyon Natural History Association, pamphlet. [cited=GCNHA Monograph 2: page 100] [cited=GCNHA Monograph 8: page 7-7]

Shrine of the Ages Chapel. Grand Canyon, Arizona. [No imprint], 6 pp., wraps. [Solicitation for construction funds.]

Location of the Overland Mail. From the Missouri Republican, June 26, 1857. [No imprint], 9 pp. [Includes lower Colorado River region.]

1542 • The Grand Canon • 2014

no date 2.21512  A drift for life. [London and Brighton]: Society for Promoting Christian Knowledge, 15 pp. (Penny Series of Popular Tales.) [1890.] [James White affair; Colorado River and Grand Canyon.]

no date 2.7562  The Royal Collection of foreign and colonial views. Photographic reproductions of the most interesting scenes in British colonies and dependencies and all countries comprising the English-speaking world. Birmingham, England: C. Combridge, 96 pp. [Ca. 1900?]

no date 2.14786  Triennial record of the Class of 1902; Sheffield Scientific School, Yale University. New York: Lindon Bates, Jr., for The Class, 256 pp. [See p. 177, “Wilhelmous Myderse Stillman”, with brief remarks on the “Salton See” and Colorado River.] [1906.] [Salton Sea.]

no date 2.7872  Boxing. Call of the Canyon (Civilian Conservation Corps Company 819, Camp NP-2A, Grand Canyon National Park), no. [1], p. [6]. [Ca. 1933-1934.]

no date 2.7873  Educational program. Call of the Canyon (Civilian Conservation Corps Company 819, Camp NP-2A, Grand Canyon National Park), no. [1], p. [7]. [Ca. 1933-1934.]

no date 2.8  The Grand Canyon visitors' almanac; being a compilation of precise and accurate information relating to the discovery, the geology, the human and natural history of this queenly wonder. Together with expositions regarding many related marvels; as well as notes on the weather, and favorite cures and remedies of the Indians. [No imprint.] Printed for the Valley National Bank, Grand Canyon, Arizona, 32 pp. [Cover subtitle: A compendium of new, useful, and entertaining matter concerning nature’s crowning splendor. Back cover indicates, "Souvenir of the Grand Canyon office of the largest bank in the Rocky Mountain states.” Date between 1942 and early 1960s.] FQ24/2:907

no date 2.11  High spots of Arizona, the Grand Canyon State. Phoenix: [no imprint]. [Ca. 1950s-1960s?] FQ9:15 FQ21:322

no date 2.11314 Clean, green Boulder City, Nevada; the finest in outdoor recreation, climate, scenery, and year round living. Less than five miles from Lake Mead. [No imprint], [large gatefold brochure]. [1970.]

no date 2.18607 The Virgin River communities area plan; Littlefield, Scenic, Beaver Dam, Arvada, Desert Springs. [No imprint], 91 pp. ("Adopted May 4, 1998 by the Mohave County Board of Supervisors").

no date 2.11312 Grand Canyon. English version. [No imprint], 32 pp. (Distributed by Smith-Southwestern, Inc., Mesa, Arizona.) [2007 or earlier.]
Join us at the Bright Angel History Room. [Grand Canyon, Arizona]: Xanterra South Rim, L.L.C., 4 pp. [Large brochure style. 2007 or earlier.]

Road trip; Chapter 1. Undo Magazine, (7):12-15. [Southwestern U.S. Includes Grand Canyon and Route 66 through Oatman, Arizona.] [In Thai; English title, thus.] [Ca. 2013.]

Road trip; Chapter 2. Undo Magazine, (8):14-17. [Southwestern U.S. Includes Hoover Dam.] [In Thai; English title, thus.] [Ca. 2013.] [NOTE: The final installment of this series, "Road Trip: Epilogue", (9):12-15, does not pertain to the scope of this bibliography.]

Hoover Dam; Word Searches of America, Ltd. Staten Island, New York: Word Searches of America, Ltd., 25 pp. [Game booklet.]

Apostolicos afanes de la Compañía de Jesus, escritos por un Padre de la Misma Sagrada Religion de su Provincia de Mexico. Barcelona: Pablo Nadal, 452 [461] pp. [Includes lower Colorado River region.]

1776 2.19114 The history of New-Mexico, including California. The North British Intelligencer: or, Constitutional Miscellany (Edinburgh), 3(12)(December 18):357-360. [See in particular p. 358: “The sea between [California and Mexico] is called the Gulph or Lake of California, or the Vermillion [sic], Purple, or Red Sea.”; and p. 360: “There are two considerable rivers in California, viz. Rio Colorado, and Rio du Carmel . . . .” (entire notes)]

1778 2.17196 Spanish dominions in North America [first part]. The Lady’s Magazine (London), (February):97-100. [See “New Mexico, Including California.”, pp. 97-99.]

1790 2.17183 A collection of voyages around the world. Performed by royal authority. Containing a complete historical account of Captain Cook’s first, second, third and last voyages, undertaken for making new discoveries, &c. . . . Vol. V. London: for A. Millar, W. Law, and R. Cater, pp. 1547-1939. [This title with variants and other years and imprints.] [See pp. 1663-1664, note of Gulf of California, including notice in passing of “Rio Collorado” [sic].]

1792 2.19187 Encyclopædia Britannica; or, a dictionary of arts, sciences, and miscellaneous literature; constructed on a plan, by which the different sciences and arts and digested into the form of distinct treatises or systems, comprehending the history, theory, and practice of each, according to the lastest discoveries and improvements; and full explanations given of the various detached parts of knowledge, whether relating to natural and artificial objects, or to matters ecclesiastical, civil, military, commercial, &c. Including elucidations of the most important topics relative to religion, morals, manners, and the oeconomy of life: together with a description of all the countries, cities, principal mountains, seas, rivers, &c. throughout the world; a general history, ancient and modern, of the different empires, kingdoms, and states; and an account of the lives of the most eminent persons in every nation, from the earliest ages down to the present times. Vol. XI. Edinburgh: printed for A. Bell and C. MacFarquhar, 814 pp., Plates 292-310. “See at the conclusion of “Mexico”: “New-Mexico”, pp. 685-686. See p. 683: “New-Mexico . . . is bounded on the north by high mountains, beyond which is a country altogether unknown . . . and on the west by the gulf of California, and the Rio Colorado; . . . but the twentieth part of the country within these limits is neither cultivated or inhabited either by Spaniards or Indians.”]

1802 2.18603 Relacion del viage hecho por las goletas Sutil y Mexicana en el año de 1792 para reconocer el Estrecho de Fuca, expediciones ex. Madrid: En la Imprenta Real, cxxviii, 185 pp. [See pp. xxviii-xxix, lxx-lxxi, lxxxvii-lxxxviii.]

1809 2.17509 Beyträge zur Hydrographie von Süd America. Monatliche Correspondenz zur Beförderung der Erd- und Himmels-Kunde (Gotha), 20(August):91-122. [Colorado River [of Mexico] noted in passing, pp. 92-93.]

Barcelona: José Torner, 1,013 pp. [See "Ignacio", p. 712, and "Jumas", p. 998. "Ignacio (S.), isla de Méjico en el fondo del golfo de California, enfrente de la embocadura del río Colorado, su estension es de 9 leg. y la anchura de 3 3/4." "Jumas, Indios de Méjico, que habitán entre el Gila y el Colorado, hàcia la estremidad sept. del golfo de California." (entire notes)]

1831 2.19188 Nuovo dizionario geografico universale; statistico, storico, commerciale . . . . Tomo IV. Parte I. [Nagasaki-Palmas.] Venezia: Giuseppe Antonelli, 644 pp. ("Opera originale Italiana di una societa di dotti"). [See "Norte (rio del) o rio Bravo del Norte", pp. 258-259; specifically, p. 259, "Il rio del Norte bagna dei paesi che in generale non sono convertiti in colonia; ma, allora quando la popol[azione]. si porterà verso le sue rive, potrà acquistare un grande interesse, se lo si perviene a congiungere, mediante un canale, al rio Colorado, tributario del Grande-Oceano, la cui sorgente non è dalla sua lontana che una ventina di leghe." (entire note)]

1835 2.17736 Die Ströme der Erde. Nordamerika. Das Ausland, 8(158)(June 7):629-630. [Colorado River, see p. 629. [Part of a serialized article.]

1837 2.18302 Pêche des perles sur la côte de la Californie. *La France Maritime*, 3:231-232. [Includes geographical notes pertaining to Hardy’s explorations in the Gulf of California.]

1842 2.11635 Chanion of the Colorado. *Western Literary Messenger*, (July 20). [Also reprinted in Ferris (1940).]

1842 2.19053 *System of universal geography, founded on the works of Malte-Brun and Balbi; embracing a historical sketch of the progress of geographical discovery, the principles of mathematical and physical geography, and a complete description, from the most recent sources, of the political and social condition of all the countries in the world; with numerous statistical tables, and an alphabetical index of 12,000 names.* Edinburgh: Adam and Charles Black; and London: Longman, Brown, Green, and Longmans, 1,063 pp. [Under “Rivers of North America” see p. 881: “The Rio Colorado falls into the northern extremity of the Gulf of California, after a course of 640 miles; but its sources have not been explored. The depth at its mouth is not more than six feet, and the breadth scarcely exceeds 200 yards. Sixty miles from the sea it is joined by the Rio Gila, which rises from the Sierra Mongollon, in the Rocky Mountains, about 34° 20′ N. lat. The country through which these rivers flow is a sandy desert, destitute of good water, and subject to excessive heat.” (entire note)]

1843 2.19065 The North-West boundary question. *Dublin University Magazine*, 21(March):377-394, map. [See map, which displays U.S. boundaries in the West as then held. Colorado River, pp. 377, 379, in passing.]

1844 2.15 Ancient ruins. *Times and Seasons*, 5(January 1):390-391. [From the Texas Telegraph, October 11, 1843; with introductory paragraph by editor. Lower Colorado River region; not the Colorado River of Texas.] GOODMAN 77

1845 2.17374 [Note of manuscript map by Albert Gallatin sent to Geographical Society at Paris.] *In: Biblioteca Italiana* [section]. *Reale Istituto Lombardo di Scienze, Lettere ed Arte, Giornale, e Biblioteca Italiana* (Milano), 10(30):393-394. [“Il signor Alberto Gallatin . . . ha mandato alla Società geografica di Parigi una carta manoscritta di quelle regioni fra il Missuri e l’Oceano pacifico . . . . La parte più interessante delle medesime è la dimostrazione dell’immenso spazio che occupa il deserto di sabbia fra il Rio Colorado e la catena marittima dei monti della California, l’unico del suo genere in quel vastissimo continente. Tutto quello ch’è a borea fra il Rio Colorado e la California, era infino ad ora terra incognita. Il confine settentrionale del deserto è presso a poco sotto il latitudinario quarantesimo primo. Cuopre otto gradi di longitudine, ma solamente sotto quello di 32° 30′, da dove si prolunga per circa cento miglia più verso mezzodi al di qua e di là del golfo di California.”]

1853 2.15455 *Sailing directions for the west coast of North America. Embracing the coasts of Central America, California, Oregon, Fuca Strait, Puget Sound, Vancouver Island, and the islands and rocks off the coasts of Central America and California. With an appendix, containing various remarks on the winds, tides, currents, &c. Carefully compiled from the most recent surveys made by order of the British, United States, Spanish, and French governments.* London: James Imray, 232 pp. [See "Rio Colorado", pp. 72-73.]

1854 2.15476 *Coleccion de tratados con las naciones estranjeras, leyes, decretos y ordenes que forman el derecho internacional Mexicano.* Mexico: J. M. Lara, 542 [544] pp. (Edicion del Semanario Judicial.) [See "115.—Tratado de paz, amistat y limites entre la República mexicana y los Estados-Unidos del Norte. (May 30 de 1848.)", pp. 394-415.]

1854 2.15477 *Legislacion mejicana, ó sea coleccion completa de las leyes, decretos y circulares que se han expedido desde la consumacion de la independencia. Tomo que comprende de Junio a Diciembre de 1854.* Méjico: Juan R. Navarro, 400, xiv pp. [See "Tratado de la Mesilla", pp. 117-132.]

1855 2.18444 Curious blunders. *In*: The Library [section]. *The Home Circle* (Nashville, Tennessee), 1(February):95. [Includes: "America was first presented as a great peninsula of Asia, mixed up and joined with Japan, China, &c. Maps were shown in which China is in the closest neighborhood to Mexico, on which the Great Rio Colorado of California has its source in Siberia, and where the Tartars and their horses and camels are presented about the Rocky Mountains." Credited to *Portland Transcript*.]

1856 2.15379 *Documentos para la historia de México.* México: Vicente García Torres. [Multiple series and volumes, 1856-1857.]

1856 2.19145 Neu-Mexiko. *In*: Ergänzungs- Conversationslexikon. *Elfter Band; oder: Neue Folge vieter Band.* Leipzig and Meißen: Ergänzungsblätter-Verlag, pp. 5-16. (Ergänzungs-
Conversationslexikon der neuesten Zeit auf das Jahr 1855/56, Fr. Steger, ed.)

[Colorado River, passim.]

1857 2.17186 Men of the time. Biographical sketches of eminent living characters . . . . .

1857 2.15395 [Notice of Ives expedition.] In: Monthly Record of Current Events [section]. Harper's New Monthly Magazine, 15(89)(October):688. [*An expedition to explore the Rio Colorado has just been dispatched, under command of Lieutenant Ives. The country traversed by this river is reported to possess great agricultural and mineral wealth." (entire note)*]

1859 2.19061 [Notice of Lt. J. C. Ives' preliminary report on the Colorado River expedition.] In: Miscellaneous Intelligence [section]. *American Journal of Science and Arts*, Series 2, 27(80)(March):304. [Notice of a separate from A. A. Humphreys' annual report: "Lieut. J. C. Ives: Colorado Exploring Expedition, Preliminary Report to Captain A. A. Humphreys, Topograph. Engineers. 12 pp. 8vo." (entire note) Regarding the full publication from which it is printed, see Item no. 2.3582 (J. C. Ives).]

1859 2.16296 [Note.] In: Monthly Record of Current Events [section]. *Hutchings' California Magazine*, 3(10)(April):479. ["The steamer 'Uncle Sam' returned to San Francisco, from her trip to the mouth of the Colorado with U. S. troops, animals and stores, on the 17th ult." (entire item)]

1859 2.19062 Capt. Humphreys's report on the progress of U.S. explorations and surveys [abstract]. In: Geographical Notices [section]. *American Journal of Science and Arts*, Series 2, 27(81)(May):381. [Includes: "The field work of the exploration of the Rio Colorado of the West has been completed, and the report and maps are now in preparation. The river as ascended by steamboat to a point nearly 500 miles from its mouth (lat. 36° 06′), beyond which it was impracticable to proceed in boats. The ascent occupied about 70 days, but is said to be practicable in ten or twenty days by steamboats of suitable construction and two feet draft. The head of navigation is 220 miles from the first Mormon settlement in the Great Lake Basin [sic], and 500 from the Great Salt Lake." (entire note)] [Refers to: Humphreys, A. A., Report on explorations and surveys. U.S. 35th Congress, 2nd Session, Senate Executive Document 1, Serial 975, pp. 608-619 (1858).]

1859 2.14834 The far West. From the Colorado River to Utah. *The Friend* (Philadelphia), 32(45)("Seventh-day, Seventh month 16, 1859" [Saturday, July 16]):357. [Written in the first person but without by-line, "For 'The Friend.'" Seems to be an excerpt from Joseph C. Ives' (1858) report on the exploration of the Colorado River.]

1859 2.16696 Balduin Möllhausen's Reise vom Mississippi nach der Südsee. Ergänzungs-Conversationslexikon (Leipzig und Meißen), 14 (new series, 7):450-460. (Ergänzungs-Conversationslexikon der neuesten Zeit auf das Jahr 1858/59.)

1862 2.3589 Colorado River of the West. *American Journal of Science and Arts*, Series 2, 33:387-403. [Abridged from Ives (1861) and Newberry (1861), both chapters in Ives (1861) overall volume.] [cited="GCNHA Monograph 2: page 14"]

1862 2.13722 Colorado River of the West. *The Friend* (Philadelphia), 35(41)(Seventh-day, Sixth month 14 [Saturday, June 14]):326-327; (42)(Seventh-day, Sixth month 21 [Saturday, June 21]):330-331; (43)(Seventh-day, Sixth month 28 [Saturday, June 28]):339-340. ("From "Silliman's Journal" [American Journal of Science and Arts].) [Abridged from Ives (1861) and Newberry (1861).]

1863 2.17774 Californie. In: Dezobry, Ch., and Bachelet, Th., *Dictionnaire générale de biographie et d'histoire, de mythologie, de géographie ancienne et moderne; comparée, des antiquités et des institutions grecques, romaines, françaises et étrangères . . . . Première partie*. Paris: (Éditions Dezobry) F1 Tandou et C°, 3rd revised ed., p. 428. [Many items in this volume are credited to contributors; this one is not.]

1867 2.13418 Navigation of the Colorado. *The Friend* (Philadelphia), 40(40)("Seventh-Day, Sixth Month 1" [Saturday, June 1]):316. [From *Scientific American*.]

1868 2.19587 [Note of the article by A. Hyatt in *American Naturalist*.] In: Notes [section]. *The Nation*, 7(168)(September 17):229. [Refers to Item no. 2.3565: "A made-up paper, by A. Hyatt, on the Chasms of the Colorado, is also readable, and is illustrated by plates." (entire note)]

1868 2.14754 [Record of meeting of February 17, 1868.] *Academy of Science of St. Louis, Transactions*, 2:584. ["Dr. Engelmann read a paper, communicated from Arizona, by Dr. C. D. Parry, being 'An Account of the Passage through the Great Cañon of the Colorado River, by Mr. James White, with Geological Remarks," which was referred to the Committee on Publication." (entire item)]

1869 2.14351 Voyage through the Grand Canon of Colorado [sic]. In: Reviews [section]. *American Naturalist*, 2(12)(February):655-656. [James White affair; an abstract of the item by C. C. Parry (1868) (see Item no. 2.5001).]

1869 2.13241 Completion of the Pacific Railway. *The Latter-day Saints’ Millennial Star* (Liverpool), 31(May 29):358-359. [From *Liverpool Mercury*, in turn apparently from the *New York Tribune*. Passing reference in an imaginary context to train service to "Big Canyon of the Colorada" [sic], which passage seems to have come from Albert D. Richardson’s *Beyond the Mississippi* (1869, p. 611) (see Item no. 2.13242).]

1869 2.28 Powell’s Erforschung des Green River. *Globus*, 16(5)(September):79.

1869 2.14798 [Plans for Callville ferry and lower Colorado River region explorations.] In: *Utah News* [section]. *The Latter-day Saints’ Millennial Star* (Liverpool), 31(September 4):584. [From the *Deseret News*. “A number of White Piners had organized an expedition, to start from Treasure City, and pass Pahranagat Lake and the Muddy settlements to Callville, establish a ferry there, then run down the river 35 miles to El Dorado cañon, and establish a town, whence explorations might radiate in the adjoining country.” (entire item)]

1869 2.16240 Carvalho’s painting of the Grand Canyon of the Colorado River. *Scientific American*, new series, 21(12)(September 18):180-181. [S. N. Carvalho painting of Grand Canyon exhibited at his studio in New York; from sketches taken “on the spot [at the head of Diamond Creek] and while attached to the Fremont expedition as photographic artist.” The painting is briefly described.]

1869 2.14433 [John Wesley Powell.] *The Cultivator and Country Gentleman*, 34(September 30):262. [“Col. [sic] Powell, the Colorado explorer, has returned from a journey through the entire Grand Canon, from Green River to the point where the Colorado debouches into the open plain in Arizona. The country is barren beyond description, unsusceptible of cultivation even by irrigation, and no discoveries of precious metals were made.” (entire note)]
Regarding the Colorado River of western North America: “Un autre Colorado arrose les déserts de la Californie et se jette dans la mer Vermeille.” (entire note)

1872 2.16145 [Letter.] *Brotherhood of Locomotive Engineers’ Monthly Journal*, 6(7)(July):300-302. [Signer’s name seemingly left out when printed; letter signed, “D. Troop. 5th Cavalry.” Letter written in the first person from Camp Bowie, Arizona, May 1, 1872; includes references to Yuma and lower Colorado River.]

1873 2.16961 [Note.] In: Geographical Notes [section]. American Educational Monthly, 10(June):265. ["Lieut. Wheeler has ascertained that a railroad can cross the Colorado River near the foot of the Grand Cañon in Arizona." (entire item)]

1873 2.16125 The Arizona military telegraph line. The Telegrapher, 9(369)(August 9):195. [Notes a reconnaissance planned for the line between Maricopa Wells and Yuma.] [As part of a series of notices in this serial, see also under "Clix" (pseudonym).]

1873 2.16126 The Arizona telegraph. The Telegrapher, 9(372)(August 30):215. [From the San Diego Union. Notes in part, "The wire for the San Diego and Yuma section will arrive at this port per steamer Mohongo on Saturday next, and the poles in a few days later, when the work of construction is expected to commence immediately."]

1874 2.16373 Pioche to San Juan. Deseret News, (February 25):14 [issue pagination]. (From Pioche Record.) [Includes mileages for segments between St. George to Mancot, via Lees Ferry. Written in the first person but here unsigned.]

1874 2.16377 Arizona. Its mineral, agricultural, grazing and other resources; with unvarnished facts concerning its climate, geography, general healthfulness, inducements to emigrants, &c., &c. Deseret News, (May 13):14 [issue pagination]. (From Arizona Miner, April 17.)

1874 2.16378 Mineral resources of Arizona. Deseret News, (May 13):14 [issue pagination]. (From Chicago Inter-Ocean; with addendum from Arizona Miner.) [Principally about other subjects.]

1875 2.16786 Glories of southern Utah. The Aldine, 8(1)(January):34-35. [Illustrations by Thomas Moran. Text notes Grand Canyon, in passing.]

1875 2.19491 The Muddy. In: Utah News [section]. Latter-day Saints' Millennial Star (Liverpool), 37(8)(February 23):127. [Credited to Deseret News. A report from a gentleman . . . who left St. Thomas, on the Muddy [River], a little over a week ago.
he says that the once lively ‘Mormon’ settlement, has now a peculiarly desolate appearance . . . .”

1875 2.16380 A long mule ride back. Deseret News, (March 10):2 [issue pagination]. [George Harris of Locke, New York, has ridden a mule from Pueblo, Colorado, to Mexico, to the lower Colorado River, San Diego, and back to the Colorado and north to Salt Lake City. Item signed, "Ex."]

1875 2.16381 The Utah Southern. Deseret News, (December 29):7 [issue pagination]. (From Los Angeles Express.) [Proposed connection of Utah Southern Railroad to the Los Angeles and Independence Railway via Calville.]

1876 2.13504 [Critique of Lord Dunraven’s The Great Divide: Travels in the upper Yellowstone in the summer of 1874 (Chatto and Windus, London, 1876).] In: Current Literature and Current Criticism [section]. New Quarterly Magazine (London), 6:234-235. [Includes comparison to William Bell’s New Tracks in North America (but not by title), with notice of "the Great Cañon of the Colorado".]

1877 2.14586 E. Hoezel’s Typical Landscapes. *From: Educational Publications* [section], *Object Teaching* [subsection]. *In: Kraus-Boeltel, Maria, and Kraus, John, The kindergarten guide. An illustrated hand-book, designed for the self-instruction of kindergartners, mothers, and nurses. First volume: The gifts.* New York: E. Steiger and Co., and London: A. N. Myers and Co., [last advertising page]. [NOTE: Hoezel’s landscapes are frequently advertised in the late 19th century; the “typical landscapes” set includes a view of the Grand Canyon. This advertisement illustrates the view (most advertisements omit views), but an original Hoezel view has otherwise not been seen by the compiler.]

1877 2.21735 Rilievi geografici agli Stati Uniti. *In: Notizie Geografiche* [section]. *Società Geografica Italiana, Bollettino*, 14(Series 2, 2):183-184. [Includes references to geographical explorations in the Colorado Desert region and to the Powell survey.]

1878 2.16330 Explorations and surveys. *Scientific American*, new series, 39(2)(July 13):24. ["Major Powell’s surveys during the coming summer will be more exclusively confined to the limits of Northern Arizona and Southern Utah. The new region lies mostly south of the Grand Cañon of the Colorado river and includes the plateau country on which are situated the famous Moqui towns." (entire note)]

1878 2.19120 List of the more important explorations and expeditions, the collections of which have constituted the principal sources of supply to the National Museum, with indication of the department of the government under which prosecuted. *From: Appendix to the report of the Secretary. In: Annual report of the Board of Regents of the Smithsonian Institution, showing the operations, expenditures, and condition of the institution for the year 1877*. Washington, D.C.: U.S. Government Printing Office, pp. 105-117.

1880 2.49 The railroad bridge at Yuma. Mining and Scientific Press, 40(May 1):273. Goodman 1095

1880 2.16385 Arizona wonders. Exploring some of the deepest canyons in the world. Deseret News, (July 28):13 [issue pagination]. [Havasu Canyon; "Beckman and Young prospecting expedition"; Grand Canyon promising tourist attraction.]

1881 2.16017 American Science Association. Scientific American, (September 3):152. [Includes brief synopsis of an address August 17 by Clarence E. Dutton on "The Colorado Cañon" at the 13th annual meeting of the American Association for the Advancement of Science, Cincinnati, Ohio.]

1881 2.17125 Atlantic and Pacific. In: American Railroads [section]. The Railway News and Joint Stock Journal (London), 36(November 5):614. ["The directors have changed the route of their line from a point in Northern Arizona, abandoning the needless route over the Colorado River, and diverging and running north, by way of Callville, into Southern Nevada, there forming a junction with the Utah Southern of Jay Gould." (entire item)]

1881 2.19010 [Callville-to-Yuma railroad.] In: General News of the Week [section]. The Educational Weekly (Chicago), 11(223)(December 8):203. ["A company has been incorporated,
with a capital of $20,000,000, to construct a railroad between Calville, Nev., and Yuma, with extensions to Port Isabel and Liberland, on the Gulf of California. The track will penetrate a line of mining districts on the eastern bank of the Colorado river.” (entire item)]

1881 2.52 From San Francisco to Tombstone. Cities and towns along the way—Yuma, silver district, volcanoes, petrified forests, etc. etc. *Mining and Scientific Press*, 43(December 17):394.

1881 2.50 Tombstone District. The mines and prospects. *Mining and Scientific Press*, 42:404. [Includes note of travel on lower Colorado River.]

1881 2.14487 [Lecture by Clarence E. Dutton, “The Scenery of the Grand Canon District.”] In: 193d Meeting. February 5th 1881. *Philosophical Society of Washington, Bulletin*, 4:120. [Notice only. "The communication was reserved by the author." [i.e. not published in the Bulletin]. "Remarks upon this communication were made by Mr. J. W. Powell . . . ." (entire note)]

1881 2.17212 *History of Amador County, California, with illustrations and biographical sketches of its prominent men and pioneers*. Oakland, California: Thompson and West, 344 pp. [See Chapter 1, pp. 11-12, including note of lower Colorado River; and Chapter 2, "Big Canon of the Colorado", pp. 12-17.]

1881 2.19032 *The history of Jackson County, Missouri, containing a history of the county, its cities, towns, etc., biographical sketches of its citizens, Jackson County in the late war, general and local statistics, portraits of early settlers and prominent men, history of Missouri, map of Jackson County, miscellaneous matters, etc., etc. Kansas City, Missouri: Union Historical Company, Birdsall, Williams and Co., 1,006 pp. [See pp. 449-459, quoted "Memorial. To the Senate and House of Representatives of the United States, in Congress Assembled", regarding a railway to the Pacific Ocean. See p. 65: "Lying West of Kansas, is the large extent of country drained by the Grand and Green Rivers, affluents of the Rio Colorado of the West, extending north and south 300 miles, by 270 east and west, sufficient for State as large as New York, of a climate and soil well adapted to the wants of civilization. The country lies between the Rocky Mountains and the Wahsatch Range, and has, in the opinion of even government explorers, uninterrupted navigation to the Gulf of California." (entire note)] [Credited to "Col. [R. T.] Van Horn" on p. 449.] [See Item no. 2.19033 (Anonymous, 1966) for an indexed facsimile reprinting of this volume.]

1882 2.21763 Nueva isla de guano. In: Miscelánea [section]. Sociedad Geográfica de Madrid, Boletín, 12(4)(April):360. [Gulf of California. Also notes construction of railroad from Fort Yuma to Port Isabel.]

1883 2.19525 March 14, 1883.—Forty-sixth Corporate Meeting. In: Proceedings of the Club [section]. Appalachia, 3(2)(April):197-198. [See p. 197, report of the Corresponding Secretary, including, "Thirty-five numbers of exchanges had been received during the month, from eleven of the corresponding societies, besides a copy of an elegant monograph from the U. S. Geological Survey, 'The Tertiary History of the Grand Cañon District, with an Atlas,' by Captain C. E. Dutton. (See p. 159.)" (which refers in this bibliography to Item no. 30.933 [R., J. (1883)].]

1883 2.21701 [Note.] In: Railroad Notes [section]. The Railway Times and Joint-Stock Chronicle (London), 46(22)(June 2):566. ["The Southern Pacific has completed its branch from Mohave, Cal., to the Colorado river on the Arizona border, a distance of 252 miles, and in a few days the Atlantic and Pacific will meet it there from the east." (entire note)]

1883 2.19060 The new Rocky Mountain line. Engineering and Mining Journal, 36(1)(July 7):1-2. [Denver & Rio Grande Railroad. See p. 2: "The valley of the Green River at this point is a cheerless sage-brush desert, as it is farther north. To be sure, this uninviting stream, a couple of hundred miles farther south, having united with the Grand, and formed the Rio Colorado, does indeed, by dint of burrowing deeper and deeper into the sunless chasms, become at last sublime. But here it gives no hint of its future somber glory." (entire note)] [Item signed only as "."]

1883 2.21702 [Note.] In: Railroad Notes [section]. The Railway Times and Joint-Stock Chronicle (London), 46(28)(July 14):709. ["The track of the Atlantic and Pacific Railroad has been completed to the Colorado river, 571 miles from Albuquerque. The bridge is nearly finished." (entire note)]

1883 2.21703 [Note.] In: Railroad Notes [section]. The Railway Times and Joint-Stock Chronicle (London), 46(31)(August 4):782. ["Track on the Atlantic and Pacific Railroad is now finished to a connection with the Southern Pacific of California, completing another great through line to the Pacific, which will be opened as soon as the bridge across the Colorado river is finished. This will be in a few weeks." (entire note)]

1883 2.13841 Views of the South-West. In: Pictures Received [section]. Photographic Times and American Photographer, 13(November)(155)(new series, no. 35):622. [Notes, ". . . a fine assortment of general views was made, including a number in the region of the
Grand Canon of the Colorado about the mouth of Diamond Creek . . . .” Southwestern party under botanist H. H. Rusby, under the auspices of the Smithsonian Institution.]

1883 2.22127 Atlantic and Pacific. The Railway Times and Joint-Stock Chronicle (London), 46(45)(November 10):1102. ["The Atlantic and Pacific Railroad (western division) was opened on October 21st for passenger business between Albuquerque, N.M., and the Needles on the Colorado river, forming in connection with the Atchison, Topeka and Santa Fé and Southern Pacific roads what is termed the 'All the Year' route across the continent.” Brief article.]

1883 2.14144 Chicago's first half century. The city as it was fifty years ago, and as it is to-day. 1833. 1883. Chicago: The Inter-Ocean Publishing Co., 198+ pp. [Wrapper title: 1833. Chicago's first half century. 1883.] [See "Atlantic and Pacific Railroad. All-the-Year-Around Route to California.”, p. 70.]

1884 2.12990 ["Professor Davidson" visits Grand Canyon.] English Mechanic and World of Science (London), 40 (September 5) (1105):13. ["The Grand Canyon of the Colorado, 160 miles east of Needles, on the Atlantic and Pacific Railroad, was recently visited by Professor Davidson, who says he "saw vertical walls 2,700ft. high, and 6,200ft. above sea level, where the Colorado river was 190ft. deep, and cannot imagine anything grander than the effect of sunset shining on these walls only ten degrees from vertical, composed of different coloured rocks, red sandstones, and the black overhanging rocks. The temperature was 136 degrees Fahr.” (entire item)]

1884 2.14410 [Whispering gallery.] Parry's Literary Journal, 1(11)(August):331. ["The greatest 'whispering gallery' in the world is that of the Grand Canyon, Colorado River.” In context, refers apparently to canyons of lower Colorado River.]

1884 2.18865 Grand Canon of the Colorado. Scientific American, new series, 51(9)(August 30):130. ["At the last meeting of the Academy of Sciences, San Francisco, Prof. Davidson spoke of his recent visit to the Grand Canon of the Colorado at a point 160 miles east of the Needles, on the Atlantic and Pacific Railroad, which required only 21½ hours' time, and an expense of $10 for horses and guide and 75 cents a meal. He saw vertical walls, 2,700 feet high, 6,200 feet above sea level, where the Colorado River was 190 feet deep, and cannot imagine anything grander than the effect of sunset shining on these walls, only 10° from vertical, composed of different colored rocks, red sandstone, and the black overhanging rocks. The temperature was 136° Fahrenheit.” (entire item) (Compare Item no. 2.12990 [Anonymous, 1884].)]
1884 2.12992 A natural whispering gallery. Phrenological Journal, 79(6)(December)(552):358. ["The greatest 'whispering gallery' in the world is that of the Grand Canyon, Colorado River." In context, refers apparently to canyons of lower Colorado River.]

1884 2.18133 Whispering gallery. In: Curious Matters [section]. Ballou's Monthly Magazine, 60:392. ["The Grand Canon of the Colorado is considered the greatest whispering gallery in the world." In context, refers to canyons of lower Colorado River.]

1885 2.17712 [Response to F. M. Davis.] In: Answers to Correspondents [section]. The Museum (Philadelphia), 1(2)(June):32. ["So far as we know, Maj. J. W. Powell, now Director of the U. S. Bureau of Ethnology, was the first and only explorer to pass through the grand cañon of the Colorado, a description of which was published in one of his reports. Later, in 1875, a branch of Hayden's Survey explored a portion of the great cañon of the Rio San Juan, to within about 25 miles of its junction with the former." (entire item)]

1885 2.19433 "United States Geographical and Geological Survey of the Rocky Mountain Region. Contributions to North American Ethnology. Vol. 5." The Bookseller (London), (335)(October 8):981. [Includes note: "The series of Government publications now issuing from the Department of the Interior of the United States promises to form a most valuable and instructive national monument. The volumes already published show that no pains or expense have been spared in their preparation, as may be seen in the really magnificent work of Captain Dutton on the 'Tertiary History of the Grand Canon District' with its fine collection of plates of that region."]

1887 2.18388 Boston Society of Natural History. *In: Proceedings of Scientific Societies [section]. American Naturalist, 21(3)(March):305. [*"March 2.—Mr. C. D. Walcott described a trip to the Grand Cañon of Colorado [sic] (illustrated by the stereopticon) . . . ." (entire note)]*

[Stanton railroad survey.] Engineering News and American Railway Journal, 23(Feburary 8):133.

[Stanton railroad survey.] Engineering News and American Railway Journal, 23(March 15):249. [“The latest advices from the Cañon are that Chief Engineer Stanton and his party of railroad surveyors reached the mouth of Diamond Creek, on the Arizona line, on March 1. The trip through the Grand Cañon of the Colorado had been one of much danger and excitement, but had been, so far, successful in every way. A sort stretch only of comparatively open river remains to be covered before the party emerges.” (entire item)]

[Stanton railroad survey.] Engineering News and American Railway Journal, 23(March 22):276. [Includes quotation from a letter received from Robert B. Stanton dated March 8 at Peach Springs, Arizona.]

[Stanton railroad survey.] Engineering News and American Railway Journal, 23(March 29):300. [Includes quotation from an item in the Denver Republican that was received from Robert B. Stanton.]

[Stanton railroad survey.] In: Miscellaneous [section]. Engineering (London), 49(April 4):424. ["The adventurous survey for a railroad down the Grand Cañon of Colorado [sic], which has been in progress for some time, is now completed, so far as the preliminary work is concerned, and from the information thus gained it seems that there will be little difficulty in running a line through this awful gorge, as there is a natural bench from 20 ft. to 150 ft. above high water mark. Indeed it is stated that the line will not require one-half the heavy work that has been necessary in constructing lines amongst the mountains of Colorado.” (entire item)]

[Stanton railroad survey.] In: General Mining News [section]. Engineering and Mining Journal, 49(14)(April 5):390. [Refers to the railroad as the "Dover, Colorado Cañon & Pacific Railway."]

Chief Engineer Robert B. Stanton, who is making the survey of the Grand Canyon of the Colorado River, pronounces the route practicable for a railroad, as the grades can be overcome and the curvatures will be slight, through a distance of 900 miles. The scenery surpasses anything elsewhere fond in America.

Colonel Stanton says the outlet of the road will be San Diego, the Colorado being left at Yuma. A branch will also be built down to the gulf and both places be made ports of entry. He thinks there will be a grand rush of travel to this country when the road is completed.

A survey has been made for a railway through the Great Cañon of the Colorado River, and is reported as showing the scheme to be practicable, but what a railway is wanted there for is by no means clear, unless it be for a ‘scenic route.’ There is little that need be carried into, or out of the cañon, and as to the country around, there is nothing there to carry, or likely to be that warrants railway connection.

[Notes railway lines proposed by Mexican Land and Colonization Company (p. 738), one from San Quintin to the Colorado River, “with a branch in the direction of the Fuerte Yuma [sic], and from the same point on the Colorado to a “connection at Magdalena with the Sonora railway by Altar, and with a branch to Port Isabel, if the principal line shall not pass that way.”]

[Meeting of November 13, 1890. “. . . Mr. Robert B. Stanton, Chief Engineer of the Denver, Colorado Canon & Pacific Railroad, gave an illustrated lecture on the feasibility of constructing a railroad through the canons of the Colorado river. A very large audience was in attendance.” (entire item)]
The Grand Cañon of the Colorado. By Prof. R. W. Raymond, Ph.D. *New York Academy of Sciences, Transactions*, 9:128. ["The lecture was illustrated by projections of original photographs. At the conclusion of the lecture, a vote of thanks was unanimously given to Prof. Raymond for his interesting discourse." (entire note)]

*Americanized encyclopædia Britannica; revised and amended. Vol. X.—Tri-Zym.* Chicago: Belford-Clarke Co., pp. 5919-6902. [See "United States of America" (pp. 5987-6088[b], specifically p. 6045, noting the Grand Canyon region; and see p. 6746, "Powell, John Wesley".]

Denver Society of Civil Engineers. *The Railroad and Engineering Journal*, 65(4)(April):189. [Includes list of "papers read so far this season", including "February 24, The Cañions of the Colorado, by W. H. Graves." (entire note)]

*In*: Personals [section]. *The Railroad and Engineering Journal*, 65(6)(June):283. ["Samuel M. Rowe has resigned his position as Chief Engineer of the Atlantic & Pacific, and is now engaged in building a narrow-gauge line running from Coolidge, N. M., southward. Mr. Rowe has been on the Atlantic & Pacific for some time, and had charge of the construction of the cantilever bridge over the Colorado at Red Rock." (entire item)]

Der V. International geologische Congress. *In*: Eingesendete Mittheilungen [section]. *Österreichischen Touristen-Club, Section für Naturkunde, Mittheilungen* (Wien), 3(8)(August):64. [Grand Canyon, *in passing*.]
1891 2.22186  [Lecture.] *In: De Rebus [section]. The Oberlin Review, 19(12)(December 8):168. [*Mr. Russell, '94, gave the geology class a very interesting paper on the 'Grand Canon of the Colorado,' last Friday. Mr. Russell was thoroughly familiar with his subject and drew a vivid picture for his audience.” (entire item)]

1891 2.65  In Marble Canyon….Down the Colorado River. *Current Literature, 6:604 [reprinted from the *Denver Republican*]. [Ellipsis is part of title.] [cited=GCNHA Monograph 2: page 14] [cited=GCNHA Monograph 8: page 1-7] GOODMAN 928

1891 2.67  [Brief note on "A lecture on A Visit to the Grand Cañon of the Colorado, Arizona", given by Charles D. Walcott at March 9, 1891, meeting of the Academy.] *Rochester Academy of Science, Proceedings, 1:153. [No summary of content of lecture other than "Illustrated by charts, models and lantern slides."] GOODMAN 927

1891 2.21444  Vereinigte Staaten. *In: Verzeichniss der Bibliothek-Eingänge 1890 [section]. Geographischen Gesellschaft von Bern, Jahresbericht, 10:154. [Notes: “Atlas to accompany the tertiary history of the grand Cannon district Dusson. [sic]” (entire note)]

1892 2.12922  Arizona railroad item. *The Deseret Weekly (Salt Lake City), 44(14)(March 26):452-453. [“... grading was begun a few days ago on the Flagstaff and Grand Canyon railroad, at Cliff Spur, fourteen miles northeast of Flagstaff.”; with an excerpt from the *Democrat* (Flagstaff).]

1892 2.14420  The titan of chasms. A mile deep, 13 miles wide, 217 miles long, and painted like a flower. *The First Maine Bugle (First Maine Cavalry Association, Rockland Maine), "Campaign II. Call 9."* 2(9)(July):103. [In appearance a news note but this is an unsigned promotional item for a free book from the Atlantic & Pacific Railroad.]

Cañon,’ written by Professor C. H. Tyler Townsend of New Mexico, was read by Mr. Charles H. Ames. This interesting paper, with its vivid description of the descent into the cañon, was finely illustrated with maps and charts belonging to the Massachusetts Institute of Technology. (See p. 48.)” (entire note) The cross-reference pertains to the paper by Townsend, “A wagon-trip to the Grand Cañon of the Colorado River”, pp. 48-63 (see Item no. 2.6370).]

1893 2.18142 The Italy of America. Chambers’s Journal of Popular Literature, Science, and Art, Series 5, 10(June 3):351-352. [Quoting Warner on the Grand Canyon, p. 352: “The mountain scenery of Southern California is even more wonderful than its floral wealth. It includes the Yosemite Dome and Waterfalls, and the Grand Cañon of the Colorado.”]

1893 2.16408 A rescue on the Colorado. Deseret News, (July 8):14 [issue pagination]. [A partial synopsis of Robert Brewster Stanon’s article in The Cosmopolitan, “Engineering with a Camera in the Canyons of the Colorado” (see Item no. 2.5953), regarding the injury and rescue of Franklin A. Nims; with quotation favorable to Mormons.]

1893 2.19384 Hebrew names in aboriginal American tongues. Frank Leslie’s Popular Monthly, 36(2)(August):251. [Includes: “The old name of the Colorado was Yuma; the tribes upon the borders of the river were called Yumas, because they were found on the Yuma River; and ‘Fort Yuma’ takes its title from the tribal appellation.” (entire note)]

1893 2.16242 [Trolley boats.] In: Miscellaneous Notes [section]. Electrical World, 22(6)(August 5):108. [“San Bernardino, Cal.—It has been proposed to utilize the water power of the Grand Canyon of the Colorado River to propel steamers by a trolley system 500 miles long, and for irrigating purposes.” (entire item)]

1893 2.16050 [Trolley boats.] Western Electrician (Chicago), 13(7)(August 12):77. [“A party of eastern capitalists, said to have some connection with the Santa Fe railroad system, is visiting the Grand Canyon of the Colorado river for the purpose of investigating the feasibility of laying an electric cable 500 miles in length along the river, with which to drive small boats through the Black canyon and other scenic points. The power is to be generated by water wheels driven by the current of the river, or the water will be diverted into canals and dropped into the river again. A copper wire cable will be suspended over the center of the river, which is for the most part about 300 feet in width and electric power will be conveyed to small boats similar to the manner of running electric railways.” (entire item; capitalizations thus]

1893 2.15983 Trolley boats. The Electrician (London), 31(August 18)(796):411. [“A party of capitalists, says Electricity of Chicago, said to have some connection with the Santa Fé Railroad system, has been visiting the Grand Canyon of the Colorado River for the purpose of investigating the feasibility of laying an electric cable 500 miles in length along the river with which to drive small boats up through the Black Canyon and other scenic points, where the cliffs, over a mile in height, overhang the stream. Power is to be generated by water-wheels driven by the current of the river itself, or, wherever feasible, the water will be diverted into canals. A copper wire cable will be suspended over the centre of the river, which is, for the most part, about 300ft. in width, and electric power will be conveyed to small steamers as in the case of electric railways.” (entire item)]

1893 2.16967 [Electric launches on the Colorado River.] In: Work World Notes [section]. Work (London), 6(233)(September 2):103. ["Electric launches, as hitherto constructed, have mostly carried their motive power on board; but it is now proposed to run a fleet in waters of the Colorado Grand Cañon [sic] which are to be supplied with current from overhead wiring." (entire item)]

1893 2.13317 [Abstract of a presentation by Prof. Dr. [Hermann] Credner at the January 16 meeting, "Über seine Reise über das Colorado-Plateau und die SanFrancisco-Mountains zum Grand Cañon"]] In: Vereinssitzungen des Jahres 1892 [section]. Vereins für Erdkunde zu Leipzig, Mitteilungen, 1892:xii-xv. [Also see p. [v].]

1893 2.13117 Relación de los objetos, fotografías y obras remitidas por el Sr. W. J. Hoffman. M. D. In: Adquisiciones de la Academia durante el segundo semestre del año 1892. Real Academia de la Historia, Boletín (Madrid), 22:71-95. [See pp. 74, 76.]

1893 2.18991 Among the Pimas; or The mission to the Pima and Maricopa Indians. Albany, New York: printed for The Ladies’ Union Mission School Association, 136 pp. [See in Chapter 2, “Mrs. Cook’s Missionary Life” (Mrs. Charles H. Cook); lower Colorado River region, pp. 35-39.]

1894 2.20005 The progress of western America. Irrigation Age, 6(3)(March):89-. [See "New Railroad Building", p. 93, which includes the San Diego & Phoenix Railroad; and "San Diego and Phoenix", p. 94.]

1894 2.14812 Announcement.—American Medical Association convention to be held at San Francisco, beginning June 5, 1894. In: Railroad News [section]. Medical Review (St. Louis), 29(18)(May 5):363-364. [Includes notice of free publications, including one
on Grand Canyon. Probably an advertisement in part for the Santa Fe Railway; item is repeated in same section, (19)(May 12):385-386), (20)(May 19):407-408.]

1894 2.18979 Major Powell retires. [and] His work in the Far West. *In: The Progress of Western America* [section]. *Irrigation Age*, 6(6)(June):232. [See also illustration of Powell, p. 227.]

1894 2.18980 Major Powell and his work; a friend describes his service to western America. *Irrigation Age*, 6(6)(June):235-237.

1894 2.14355 *The national cyclopædia of American biography; being the history of the United States as illustrated in the lives of the founders, builders, and defenders of the Republic, and of the men and women who are doing the work and moulding the thought of the present time. Volume V.* New York: James T. White and Co., 537 pp. [See "Sutro, Mrs. Theodore", pp. 461-462; New York social circle. "Mrs. Sutro happens to be one of the few American women who have traveled extensively in their own country; in one of her recent trips with her husband she penetrated to the Grand Cañon of the Colorado, that stupendous scenic wonder of the United States, which, up to 1893, but few ladies had visited." (entire pertinent note)]

1894 2.17292 [Note on lecture and remarks.] *From: Geological Section * * * March 20, 1894. In: Reports of Meetings [section]. *Birmingham Natural History and Philosophical Society, Journal* (Birmingham, England), 1[1894-1895]:16. ["Mr. W. P. Marshall read a paper on 'The Grand Cañon of the Colorado River, Arizona.' The paper was illustrated by diagrams, maps, and water colour drawings. Mr. Councillor Wallis gave a description of his visit to the Cañon, with a detailed account of Hance's Trail. Dr. Lapworth suggested the probable cause of the formation of the Cañon. A cordial vote of thanks was given to Mr. Marshall for is paper." (entire note)]

1894 2.21549 *Sixth report of the Secretary of the Class of 1872 of Harvard College. 1885-1894. Printed for the use of the class.* Boston: Wright and Potter Printing Co., 64 pp. [See p. 31, Edward Baldwin Russell: "In [a second western trip] he was so impressed with the natural beauties of Arizona and New Mexico that he wrote some letters to the Transcript (Boston), descriptive of the Grand Cañon of the Colorado, the Petrified forest, Acoma, etc., which were published in the spring of 1893." (entire note)]

1895 2.18144 [J. A. Mellon.] In: Western News Items [section]. Deseret News, (January 12):127. [Briefly abstracted item following on the article in January 5 issue, "Wyoming to Yuma by Boat" (see Item no. 2.16411 [Anonymous, 1895]).]

1895 2.14441 [Marcus E. Jones.] In: De Alumnis [section]. The Unit (Iowa College), 10(4)(February 23):39. ["A letter from Marcus E. Jones [class of 1875] informs us that he will be in Washington until May and that his book on the botany of the Grand Canyon district will be out soon thereafter." (entire note) NOTE: No monograph on the subject by the author is identified.]

1895 2.14991 Re-arranging the West. The Deseret Weekly, 50(16)(April 6):505-506. ("Written for this Paper"). [Proposition for the re-arrangement of state lines. Proposed boundaries separating Utah, New Mexico, Arizona, and "south California" follows the Colorado River.]

1895 2.16412 New railway scheme. Deseret News, (May 4):5. [Proposed New York-based venture "for building an enormous reservoir and canal in Arizona, and extending a railroad there"—Salt River reservoir and irrigation canals east of Colorado River; extention of Arizona Central railroad northward to Salt Lake City and southward to Nogales.]

1895 2.13253 Utah news. (Summarized from Territorial papers.) The Latter-day Saints' Millennial Star (Liverpool), 57(32)(August 8):510-512. [See p. 511, item relating to "Officials of the University of Utah" under President Talmage studying geology of the Grand Canyon region, then underway.]

1895 2.15426 Linde Association. Sketch of the organization of the Linde Association of Stationary Engineers—its aim and purpose—biographical sketches of its officers. Ice and Refrigeration, 9(4)(October):238-240. [See regarding Otto Luhr, p. 239: "Then he joined a party of bridge builders going west, and assisted in the erection of the bridge across the Canyon Diablo, in Arizona, on the A. & P. road [Atlantic & Pacific Railroad], 355 feet above the bottom of the canyon. He was one of two men only who did the riveting at the highest and most dangerous points about the bridge. After this he assisted in erected another bridge across the Grand canyon of the Colorado." (entire note; with portrait)]

1895 2.12522 A description of the work of the Manchester Art Museum, Ancoats Hall, Great Ancoats Street. Summary and index. Manchester, England: H. Rawson and Co., 58 [60] pp. [See pp. 21-22; notice of "large oleographs of places which show clearly the results of the action of great forces of nature (Geographische Characterbilder), published by Hoelzel of Vienna", which includes one of Grand Canyon (not illustrated here, but see item no. 2.14586 [Anonymous, 1877]).]

1896 2.13475 [Voice heard at great distance.] *Today* (London), 12(August 29)(147):119. [“In the great Canyon of the Colorado a man’s voice was plainly heard at the end of the Canyon, eighteen miles distant.” (entire note)]

1896 2.85 Translations of the Relacion de Suceso. Account of what Happened on the Journey which Francisco Vazques made to Discover Cibola. In: Winship, George P., The Coronado expedition, 1540-1542. *U.S. Bureau of Ethnology, 14th Annual Report, Part 1*, pp. 572-579. [This text gives the account of the non-native discovery of the Grand Canyon by Cardeñas. Winship’s footnote, p. 572, states: “The Spanish text of this document is printed in Buckingham Smith’s Florida, p. 147, from a copy made by Muñoz, and also in Pacheco y Cardenas, Documentos de Indias, vol. xiv, p. 318, from a copy found in the Archives of the Indies at Seville. **No date is given in the document, but there can be no doubt that it refers to Coronado’s expedition. In the heading to the document in the Pacheco y Cardenas Coleccion, the date is given as 1531, and it is placed under that year in the chronologic index of the Coleccion. This translation...has already been printed in American History Leaflet, No. 13.”] [cited=GCNHA Monograph 2: page 14] [cited=GCNHA Monograph 8: page 1-7]

description of the Grand Canon of the Colorado River.” (entire note relating to Grand Canyon)]

1897 2.14988 Mutual Improvement Conference. In: Our Girls [section]. Young Woman’s Journal (Salt Lake City), 8(10)(July):468-483. [See quotation of Nephi L. Morris, pp. 481-482; specifically, p. 482, anecdote of silencing effect of Grand Canyon on even “boisterous or mocking men”.]

[Power production and trolley investigations at Grand Canyon.] *In: Personal section.* *Age of Steel,* 89(16)(April 20):25. ["A dispatch from Phoenix says that a party of hydraulic engineers has just completed a trip to the Grand Canyon of the Colorado River, and reports that it will be possible to install a power plant in one of several places on the lower end of the canyon capable of supplying a greater horse power than is now being utilized at Niagara. It is said that a company of Eastern capitalists proposes to install large plants as soon as government arrangements are perfected. Electric trolley line observation cars along the rim of the canyon for fifteen miles are also contemplated. It is rumored that Lombard, Goode & Co., of New York, are also interested." (entire item)]

Next year's outing. *Sierra Club Bulletin,* 3(4)(June):[ii]-[iii]. [Excursion to Grand Canyon.]
Fryer’s article (see Item no. 2.17396). See p. 887, “Un prete divinizzato, vissuto su una piccola isola presso il fiume Colorado, si chiama Quatu Sacca . . . .” (entire note)

1901 2.16427 Mining notes [and other news]. *Deseret News*, (December 13):6 [issue pagination]. [The Yuma Sun “reports the arrival . . . of several carloads of railroad iron for the Picacho & Colorado River road”, to be delivered thence by boat.]

1901 2.13329 [Automobile trip planned to Grand Canyon.] *In*: Minor Mention [section]. *The Horseless Age*, 8(39)(December 25):846. [*Oliver Lippincott has perfected arrangements for a trip from Los Angeles to the Grand Canyon of the Colorado by automobile.” (entire note)*]

1901 2.19129 Department of Archaeology. *In*: Work of the Departments. *Brooklyn Institute of Arts and Sciences, Year Book 13* (for 1900-1901), pp. 148-. [See p. 149, notice of a course of lectures by "Mr. G. Wharton James, of Pasadena, Cal., on 'The Colorado River.' This course was given in conjunction with the Department of Geography . . . .”]

1902 2.14517 To build steam trucks. *The Horseless Age*, 9(1)(January 1):28. [*Three 'Toledo' steam wagonettes are reported about to be purchased to run between Flagstaff and Grand Canon, Ariz., a distance of 72 miles, if Oliver Lippincott's trial run proves successful.” (entire note)*]
1902 2.13844 [Note from G. H. Matthes.] In: News From the Classes [section]. The Technology Review (Massachusetts Institute of Technology), 4(1)(January):392-393. ["G. H. Matthes [Class of 1895] writes that his brother, F. E. Matthes, was recently selected commence a topographic map of the Grand Cañon of the Colorado River in Arizona. He left for the cañon March 17, and is now (April 27) making good progress. His work covers the Grand Cañon forest Reserve, which comprises the most beautiful section of the Grand Cañon." (entire note) Regarding François E. Matthes.]

1902 2.15286 Automobile endurance test. Electrical World and Engineer, 39(3)(January 18):140. [Oliver Lippincott demonstration tour with Toledo steam vehicle planned by automobile department of American Bicycle Co., including "making a circuit of the Grand Canyon of the Colorado" (entire note of pertinence).]

1902 2.16675 Touring in the Rocky Mountains in a Toledo. Automobile Topics Illustrated, 3(15)(January 25):553-554. [See p. 553: "Arrangements have been made with Mr. Oliver Lippincott, of Los Angeles, Cal., to make a tour which will embrace a complete circuit of the Grand Canyon of the Colorado . . . ." (entire note)]

1902 2.19131 Mexico and California. Forty-five days’ tour via Pennsylvania Railroad. Friends’ Intelligencer (Philadelphia), 59(4)("First Month 25, 1902" [January 25]):64. [Promotion. Includes note, "... the Grand Canon of Arizona, one of the great wonders of the country."]

1902 2.15282 A complete exhibition. The Automobile Review, 6(2)(February):37. [International Motor Car Co. “The Toledo department will exhibit its standard Model A Toledo carriage, such as is now making the trip through the Grand Canyon and the Yosemite Valley." (entire note of pertinence)]

1902 2.16674 [Note.] Automobile Topics Illustrated, 3(17)(February 8):644. ["Oliver Lippincott of Los Angeles, Cal., recently ascended Knob Hill, between Flagstaff, Ariz., and the Grand Canyon in his automobile, a Toledo, through six inches of snow. It was necessary to overcome a 16 per cent. grade, and the test, which was made before representatives of the New Automobile Transportation Company, was a severe one. By May 1st the company intends to have fifteen passenger automobiles in operation in [sic] the Grand Canyon." (entire item)]

1902 2.18915 [Note reporting the death of George Wharton James by bite of rattlesnake.] In: Notes on Authors [section]. The Publishers’ Weekly, 61(7)(February 15):518. [False report; he did not die of the bite.] [Notes briefly, "Mr. James has written several books on the Grand Cañon of Arizona . . . ."]

1902 2.15287 Flagstaff, Ariz. In: The Automobile [section]. Electrical World and Engineer, 39(9)(March 1):419. ["Mr. Oliver Lippincott, the Los Angeles artist, in his automobile ‘Toledo’ has climbed Knob Hill, a 16 per cent grade, in six inches of snow, in a test
before a committee of the new automobile company between Flagstaff and Grand Canyon. The demonstration is considered one of the most successful and difficult ever given in this country.” (entire note)

1902 2.15261 [Address on Grand Canyon.] In: The Faculties [section]. University of Chicago, University Record, 6(March)(48):357. [“Dean Salisbury addressed the Geographic Society of Chicago on ‘The Grand Canyon of the Colorado,’ January 21.” (entire note)]

1902 2.22189 A stiff climb. The Automobile Review, 6(3)(March):64. [“Oliver Lippincott, the Los Angeles artist, in his automobile ‘Toldedo,’ climbed ‘Knob Hill,’ a 16 per cent grade, in six inches of snow, in a test before a committee of the new automobile company, between Flagstaff, Ariz., and the Grand Canyon. The demonstration is considered one of the most successful and difficult yet accomplished. the new company expects to have fifteen passenger automobiles running by May 1.” (entire item)]

1902 2.18916 Rattlesnake kills an author. The Publishers’ Circular (London), 76(March 15):311. [Note reporting the death of George Wharton James, credited to “New York Publishers’ Weekly” (see Item no. 2.18915 [Anonymous, 1902]). False report; he did not die of the snake bite.] [Notes briefly, “Mr. James has written several books on the Grand Cañon of Arizona. . . .”]

1902 2.16962 Millville Friends’ School. Friends’ Intelligencer (Philadelphia), 59(14)(“Fourth Month 5” [April 5]):219. [“Professor P. P. Phillips, of the University of Pennsylvania, gave a very entertaining and instructive lecture at Millville, Pa., on the evening of the 29th instant, in the interest of the Friends’ school. His lecture was presented in the form of a journey through the lands of the Cliff-Dwellers and the Pueblo Indians, the picturesque regions of the Grand Canon of the Colorado and Scenic Divide. His recital of experiences in the various places created added interest in the views presented.” (entire item)] [Grand Scenic Divide, Grand Canyon.]

1902 2.19166 [George Wharton James’ false death notice.] In: Literary and Art Notes [section]. The Standard (Chicago), 49(33)(April 19):991 (also concurrently paginated for the issue, 15). [“George Wharton James, the author and scientist, is one of those individuals who has had the opportunity of reading of his own death in the newspapers. Mr. James, according to one account, was fatally bitten in a desperate battle with a gigantic rattlesnake in a curiosity shop in Phoenix, Ariz., Feb. 11. As the author of ‘In and Around the Grand Canon’ is to lecture in Boston at an early date the report of his demise is premature, to say the least.” (entire note) (For examples of the false notices, see Items 2.18915, 2.18916.)]

1902 2.18935 Geology in summer. The Independent (New York), 54(July 17):1735-1737. [Editorial. See p. 1737: “[The author’s] Time fails to tell how the tourist may investigate fossil shells, bones, footmarks, minerals, beds of coal, geysers, may try
mountain climbing or, best of all, visit the Grand Cañon of the Colorado.” (entire note)

1902 2.14139 [Comment.] *Mahin’s Magazine* (Chicago), 1(6)(September):14. “[A lady who recently visited the Grand Cañon of the Colorado River remarked that it was surprising that some enterprising bill poster had not placed announcements upon the cliffs.”]

1902 2.16137 N. W. D. A. at Monterey. *Paint, Oil and Drug Review* (Chicago), 34(16)(October 15):18. [National Wholesale Druggists’ Association convention. "One day [enroute] was spent in the Grand Canon of Arizona, the sight of which was new to many of the 95 members of the party." (entire note)]

1902 2.14234 [Power plant proposed for Bright Angel Creek.] *In: Electric Light and Power* [section]. *Electrical World and Engineer*, 40(18)(November 1):726. "Flagstaff, Ariz.—The Grand Cañon Electric Power Company proposes to build a new power plant on Right Angle Creek [sic], a branch of the Colorado River. Surveys for the work are now under way. Mr. Julius Aubineau is president of the company and Mr. D. Babbitt secretary and treasurer.” (entire note)

1902 2.14689 [Notice of November issue of *Century Illustrated Magazine*.] *In: Notes* [section]. *The Nation*, 75(November 6)(1949):362-363. [Includes notice of article on Grand Canyon by John Muir. Also notes illustrations of the Southwest by Maxfield Parrish (one of which is an illustration of Grand Canyon although it is not noticed specifically).]

1902 2.15616 [Grand Canyon Electric Power Company.] *In: Pacific Coast News* [section]. *Electrical Review*, 41(19)(November 8):650. [Corporation organized by A. Barmann, Julius Aubineau and David Babbitt “for the purpose of utilizing the fall of the water of Bright Angel Creek” for power delivery to Flagstaff, Arizona.]

1902 2.17761 [Lecture notice.] *Brooklyn Institute of Arts and Sciences, Year Book*, 14(for 1901-1902):125. "[Dec. 12 [1901].—Lecture by Mr. Henry G. Peabody, of Boston, on ‘Arizona and the Grand Cañon of the Colorado,’ illustrated by colored lantern photographs taken by the lecturer.” (entire note)]

Biographical record of Salt Lake City and vicinity; containing biographies of well known citizens of the past and present. Chicago: National Historical Record Co., 654 [658] pp. [See: Angus Munn Cannon, pp. 170-174: "In 1864 he had accompanied Anson Call to establish what was later known as Calville, on the Colorado river, twenty-five miles west of the mouth of the Virgin river. This is the highest point on the Colorado river which a steamboat has attained to. The boat came with a load of freight. During the summer our subject was attacked with typhoid fever and was the only one out of the four cases who recovered." (p. 172, entire note); Henry Harker (pp. 337-338): "[In 1873] He was the first to cross Lees Ferry over the Colorado river. That summer the ferry went down on account of the high water, and Mr. Harker with a cargo of thirty-six wagons was left on the other side of the river and had to ferry across its banks, having to take the wagons apart, which he successfully accomplished and landed his cargo on the opposite side." (p. 338, entire note); Aroet Lucius Hale (pp. 466-467): "He helped organize and colonize the mission at Los Vegas [sic], on the Colorado river, and also spent two years on the Muddy river in this work." (p. 466, entire note)]

Power in the Grand Canyon. Journal of Electricity, Power and Gas, 13(1)(January):104-105. [General article on Grand Canyon, with passing reference to the power of moving water but no references to power production.]

[Passenger rates on Grand Canyon rim stage rides.] In: News and Notes [section]. The Railway Age, 35(1)(January 2):34. ["Passenger rates seem to be fixed by the pound or the inch upon the Grand View stage line in Arizona, for we read in the Santa Fe's volume on the Grand Canyon, 'The rate for round trip, Bright Angel to Grand View, is $2.50 to $5 each person, according to size of party.' A slim, light 'party,' weighing not over 100 pounds and occupying less than 15 inches horizontal space, would therefore probably be able to secure a seat for $2.50; while a 300-pound 'party,' requiring double seating space, would justly be charged $5. The reasonableness of this basis of rate making as applied to stage accommodations is too evident to need argument." Suggests the same application to railway rates.]

[El Tovar hotel.] In: News and Notes [section]. The Railway Age, 35(5)(January 30):162. ["Bids are about to be asked by the Atchison Topeka & Santa Fe for the erection of a new tourist hotel on the brink of the Grand Canyon of the Colorado in Arizona. It will cost not less than $175,000 and will be built about 400 feet from the canyon brink at the head of Bright Angel's trail [sic]. Work will begin on the new hotel as early this spring as possible, and it will in all probability be completed by December 3, 1903. R. B. Burns, chief engineer of the Santa Fe Coast Lines at Los Angeles will be in charge." (entire item)]

Unique advertising. Deseret News, (February 20):2 [issue pagination]. ["The Atchison, Topeka & Santa Fe is out with a decidedly unique advertisement in the shape of a handsome lithographed panoramic view of the Grand Canyon of Arizona. If the printed instructions on the back are followed and the picture placed on a table with its back to the light a very pretty and gorgeous sunset effect is the result. The 'News' acknowledges the receipt of one of these works of art through the courtesy of General Agent C. F. Warren." (entire item)]

Publisher's announcement of publication of "The Girl Rough Riders" by Prentiss Ingraham. Publisher's Weekly, 63(1)(March 7):686.

1903 2.16426 To open land to settlement. *Deseret News*, (March 15):5 [issue pagination]. [About one million acres of federal lands opened to settlement in California along the lower Colorado River between Needles and Mojave. Southern Pacific Railroad holds selection privilege.]

1903 2.14239 [Rough Riders to meet Theodore Roosevelt at Grand Canyon.] *Fur Trade Review* (New York), 30(9)(April 1):216. ["Fifty Rough Riders, of Bisbee and Southern Arizona, finding that President Roosevelt will confine his itinerary to the northern part of the Territory, have arranged an excursion to Grand Cañon, where they will greet their former leader. Desiring to give the President some appropriate token of their esteem, they have secured a large black bear, captured in Sonora, and will present it to him when they meet him at the cañon." (entire item)]

1903 2.19150 [Forthcoming meeting of the American Ornithologists’ Union in San Francisco.] *In*: Items [section]. *The Auk*, 20(2)(April):245-246. [Regarding the train trip from Chicago, "The feature of the trip will be the stop at the Grand Cañon of the Colorado in northern Arizona, where time will be given for a descent into the most sublime and wonderful chasm known in the whole world." (entire note)]

1903 2.19229 [Hotel.] *In*: Equipment and Supplies [section]. *The Railway Age*, 35(16)(April 17):751. ["The Atchison Topeka & Santa Fe is to build a hotel at the head of the Grand View trail [sic], Grand Canyon of Arizona, this year." (entire item)]

1903 2.14926 Mr. Roosevelt's tour. In: Survey of the World. *The Independent*, 55(May 14)(2841):1114. [Theodore Roosevelt. "In Arizona he saw the Grand Cañon, and in a brief address urged the people to refrain from marring the noble view by erected a hotel or a building of any kind within the scope of it." (entire note)]

1903 2.15783 President passes through Flagstaff. On his way to the Grand Canyon Wednesday morning—Early watchers disappointed. Flagstaff's patriotic people follow him in goodly number. To do honor to the nation’s chief executive—President presents diplomas to Flagstaff High School graduates—The citizens of Flagstaff present beautiful and costly Navajo blanket. *Coconino Sun* (Flagstaff) [weekly newspaper], 20(19)(May 9):1-2.

1903 2.19230 [El Tovar hotel.] In: Equipment and Supplies [section]. *The Railway Age*, 35(23)(June 5):976. [“Plans have been approved for the new hotel to be built by the Atchison Topeka & Santa Fe at Grand Canyon, Ariz., and ground is being broken. While the work will be pushed as rapidly as possible, owing to the difficulty in getting material, it is not expectd that the hotel will be ready for occupancy until the summer season of 1904.” (entire item)]

1903 2.19231 [El Tovar hotel.] In: News and Notes [section]. *The Railway Age*, 35(24)(June 12):997. [New hotel under construction by the Santa Fe Railway at Grand Canyon, probably to be called “Bright Angel Tavern”.]

1903 2.16432 Land thrown open to settlement. *Deseret News*, (June 16):5 [issue pagination]. [Lower Colorado River, California, between Needles and Mojave.]

1903 2.18418 Master plumbers in California. *The Plumbers Trade Journal and Steam and Hot Water Fitters’ Review*, (July 1):14, 16, 18. [Photographic review of trips to and from the San Francisco convention via different routes. The running text refers to some of the photographs, but the photos are not necessarily on the same page, nor otherwise identified as the ones mentioned in the text. See “A Party of Chicagoans at the Grand Canon, Arizona’’ (mounted trip in the canyon) and “In the Grand Canon, Arizona’’ (party seated on the rim), p. 14; refer to text, p. 16. Also note the brief mention of “The train had just anchored outside of Yuma, Ari.” [sic] (p. 16), which possibly refers to the photo of the “New York and Brooklyn delegation” on the same page, “Making Fun for a Party of Delegates on The Way to California [sic], taken in front of the “Sol Pace Saloon”.]

1903 2.14776 Aërial photography. *The Photo-Miniature*, 5(July)(52):145-173, illustrations. [See p. 147, Grand Canyon, in passing, with regard to photography from great heights as applied also to “any natural eminence.”] [Aerial photography.]

1903 2.16004 [Electrical power for Grandview Mine.] In: Electric Light and Power [section]. *Electrical World and Engineer*, 42(5)(August 1):204. [“Grand View, Ariz.—The Grand Canyon Company of this place has had estimates made on the cost of a power plant that may be established at Mooney Falls, on Cataract Creek, about forty miles from the mine. The establishment of an electrical generating plant for that place for the
purpose of affording power for the operation of the mine here is contemplated.”

Barck, describing Grand Canyon’s “first deliberate crossing” by “Mr. James” [presumably George Wharton James] and Barck, Bass Camp to Point Sublime.]

1903 2.21598 Grand Canyon of the Colorado River, in Arizona. *American Bee Journal*, 43(53)(December 31):cover. [Photo only, but which refers, “See page 612”, which is the anonymous account of the visit by convention delegates to Grand Canyon in the September 24, 1903, issue (see Item no. 2.21372 [Anonymous, 1903]). Regarding the photo, see also remarks by E. E. Hasty in the February 18, 1904, issue (see Item no. 2.21597).]

1904 2.14101 Nu Chapter. *In: Personal and Alumni Notes [section]. The Frater (Psi Omega Fraternity)*, 3(2)(January):106-107. [F. C. Friesell trip through Arizona, including plan for float trip on [lower] Colorado River and visit to Grand Canyon, “which the Editor’s brother has explored and traversed by boat.” Managing Editor of The Frater is H. E. Friesell. Although it is not clear in context as to whether the “Editor’s brother” refers to F. C. Friesell in the third person, or to a third brother, it refers to Frederick Charles Friesell, as confirmed in a subsequent report, (3)(March):161 (see Item no. 2.16335 [Anonymous, 1904]).]

1904 2.20065 San Diego, Cal. *In: Church Notes [section]. Lutheran Observer* (Lancaster and Philadelphia), 72(4)(January 22):16 [also paginated concurrently for volume, 112]. [“Rev. H. J. Weaver gave his stereopticon lecture on the Grand Canyon of the Colorado, illustrated by 75 colored views of the highest order of artistic merit. the lecture was pronounced superior to the views.” (entire item)]

1904 2.16436 Gold and Indians lost. *Deseret News*, (January 28):7 [issue pagination]. [“A special to the Express, from Beals, Cal., says: Six Indians and about $1,200 in gold were lost by the upsetting of a boat on the Colorado river, near the Indian reservation a few days ago. James Cundiff and Frederick Longmeyer, prospectors, witnessed the accident and managed to save one of the occupants of the boat.” (entire item)]

1904 2.14829 The Spectator. *Outlook*, 76(7)(February 13):399-400. [Column by “Spectator”. See p. 399, item mentioning travelers’ expectations of places, noting, “he expects what he finds”; with an example: “Even the Grand Cañon of the Colorado came to be a convenient receptacle for rubbish to the Chinese cook employed in the hotel upon its brink, and the Spectator has seen him slide potato-parings into that stupendous chasm without visible emotion.” (entire note)]

1904 2.18431 Social events. *The Miami Student* (Miami University, Miami, Ohio), 23(8)(May):263-264. [See p. 263: “Mr. Henry Peabody, of Boston, Mass., gave an illustrated lecture before the students of Western College, Friday evening, April fifteenth, using for his theme, ‘In the Footsteps of Cortez.’ Mr. Peabody is a man of wide experience and an able lecturer. By request on Saturday evening he gave a second illustrated lecture entitled ‘Arizona and the Grand Canon.’ Both lectures were well chosen and the beautiful pictures were interesting to the audience.” (entire note)]

1904 2.20064 The General Conference. *Northwestern Christian Advocate* (Chicago), 52(19)(May 11):3-4. [See p. 3: At the opening exercises “it was then found that less than two-thirds [a quorum] of the delegates were present. About three hundred were delayed by an accident to a freight-train on the Santa Fe road, between the main road and the Grand canyon. A large number of trains were at the canyon and were shut in by the accident for from twenty-four to forty hours. The accident was of such a character that it was necessary to rebuild a part of the track.” (entire note)]

1904 2.15088 The Santa Fe. *The Railroad Telegrapher*, 21(5)(May):603-604, (6)(June):747-749. [News and information includes lengthy, disparaging comments relating to the more than 3000 Methodists enroute to General Conference in Los Angeles, first stranded for more than a day on the Grand Canyon line due to overexerted engines and failure of the road bed, and the overcrowding of facilities at Grand Canyon.]

1904 2.17875 The Ivory City. *Millinery Trade Review*, 29(6)(June):87-90. [Louisiana Purchase Exposition, St. Louis. See pp. 89-90: “The Department of Commerce . . . has also a panoramic view of the Yosemite Valley and the Grand Canyon of Arizona. The pictures are so constructed as to represent the colors of the hills, mountains, valleys, trees, shrubbery and water. The visitor looks through a window into a box that depicts the topography of the country exactly. It’s a pretty picture and worth lingering over.” (entire note)]

1904 2.19308 [El Tovar Hotel.] In: Frigiferous Particulars [section]. *Ice and Refrigeration*, 27(1)(July 1):29. "The Bright Angel Tavern, which is being constructed by the Santa Fe Railroad Co. at Los Angeles, Cal. [sic], is to be completed some time next fall. The house will cost, it is stated, about $150,000, and will have a full modern equipment."

1904 2.14922 [Anecdote.] In: Along the Horizon [section]. *The Advance* (Chicago), 43(July 21)(2019):67. "An English visitor says that in the Grand Canyon we have national glories without a parallel. This English visitor is without a parallel." (entire item)]

1904 2.16437 A big saloon robbery. *Deseret News*, (August 17):7 [issue pagination]. [Cubbage's saloon, Needles, California. "It is believed the robbers escaped down the Colorado river in a boat."]

1904 2.21264 [Note regarding El Tovar.] *Domestic Engineering*, 29(7)(November 12):46. ["Eugene Murray, of Albuquerque, N. M., is superintending the plumbing work being done by the Whitney Co. at the new railroad hotel at the Grand Canyon of Arizona." (entire item)]

1904 2.19570 Le VIIIe Congrès international de Géographie. In: Généralités [section]. *Annales de Géographie* (Paris), 13(72)(November 15):467-468. [Includes concluding note (p. 468): "Enfin, après la clôture des séances, une grande excursion a promené plus de 70 congressistes jusqu'à Mexico en passant par les cañons du Colorado et en revenant par le Texas, sous la conduite de M' W. M. Davis, assisté par M' R. T. Hill. Sur la proposition de MM* Hill et Davis, une pétition a été adressée aux pouvoirs publics pour élever, au Grand Cañon du Colorado, un monument à J. W. Powell." [footnote here, reading as follows:] "D'après les renseignements communiqués par M' Emm. de Martonne, qui participa au Congrès ainsi qu'aux excursions et nous donnera prochainement un article sur les observations recueillies au cours de son voyage en Amérique." For the article by Martonne (1905), see Item no. 2.19569.]

1904 2.14925 The Brigham lecture. *The Miami Student* (Miami University, Miami, Ohio), 24(3)(December):94. [Review of lecture by Nat M. Brigham on "Grand Canyon of the
Colorado". Also notes forthcoming lectures in Cincinnati and at the White House in Washington, D.C., “at the special invitation of President Roosevelt, his old classmate [at Harvard University], to lecture before a select company.”

1904 2.15341 California fragments. *Lutheran Observer*, 72(49)(December 2):17 [also paginated 1553]. [Includes note: "Pastor Oehler, of the German church, Sacramento, recently delivered his two new lectures, 'The wonders of the Grand Cañon' and 'The Rhine and its Beautiful Lengends,' [sic] to large audiences in the Congregational church of that city. The daily papers spoke in terms of the highest praise of the lectures, both of which are the result of Rev. Oehler’s own investigations and labors, even to the making and coloring of the slides." (entire note of pertinence)]

1905 2.16057 Academy session. *In: Transactions for December, 1904. Southern California Academy of Sciences, Bulletin*, 4(1)(January):2. ["The Secretary, Mr. B. R. Baumgardt, delivered a lecture on 'The Grand Canon of the Colorado,' illustrated by the lantern, with slides from photographs taken largely by himself and Mrs. Baumgardt, and colored by the latter." Followed by a one-paragraph synopsis signed, "Editor" (name not indicated in issue).]

Bernardino, also down the west side of the Colorado river to the Santa Fe bridge, and thence to Parker. Another line will extend from Ibex, a station on the Santa Fe, to Searchlight, nev., and still another will reach from Barstow to Johannesburg and Kramer. Other lines under contemplation will take in all the towns along the Salt lake as far as Las Vegas, from which place a wire will be built to Bullfrog and thence to Tenopah.” (entire item)

1905 2.12988 Telephone over the great Mojave desert. Telphony, 10(2)(August):120.

1905 2.20009 Twentieth Annual Convention of the National Editorial Association. [Part] V. The Louisiana Planter and Sugar Manufacturer (New Orleans), 35(6)(August 5):90. [Series pertains to the meeting in Guthrie, Oklahoma, and the post-meeting excursion to the West Coast. Series begun in 35(2)(July 8). In this part a paragraph is devoted to notes pertaining to crossing the Colorado River at Yuma and the Salton Sea. Part IV, (5)(July 29):72, concludes parenthetically with a remark in El Paso, Texas: “[We] were soon back in our Pullmans again, knowing that during the night we should skirt along southern New Mexico and by Saturday morning, June 17, be fairly launched on the arid plains [sic] of Arizona, that strange land of constant sunshine, of petrified forests, of Gila monsters, of sand storms and of heat, heat, hot and insufferable, of which more anon.”]

1905 2.16440 To span Grand Canyon. Talk of an aerial tramway over the world’s greatest gorge. Deseret News, (August 8):5 [issue pagination]. [Tram from bottom of Bright Angel Trail to North Rim.]

1905 2.16441 A game preserve in Grand Canyon. Proposition to establish one on its rim now under official consideration. Roosevelt has been invited. Expects to take a lion hunting trip on it that will entire eclipse Colorado exploits. Utah man gives particulars. President Woolley came to Salt Lake today to order material for aerial tramway. Deseret News, (August 14):1-2 [issue pagination].

1905 2.16443 To the Grand Canyon. Senator Smoot and party will leave on Friday to explore it. Deseret News, (September 12):1 [issue pagination]. [Reed Smoot.]

1905 2.16444 Off tomorrow. Congressman Howell comes down to join Grand Canyon expedition. Deseret News, (September 14):2. [Congressman Joseph Howell (Republican).]
1905 2.16048 San Pedro Los Angeles & Salt Lake. *Railway Age*, 40(11)(September 15):335. ["Surveys have been made for a branch from Las Vegas, Nev., to the Grand Canyon of the Colorado River, 26 miles, and it is stated that the work of construction will begin at once.” (entire item)]

1905 2.14476 The Grand Cañon air line. In: *With the Procession* [section]. *Everybody’s Magazine*, 13(4)(October):564-565. [Grand Cañon Transportation Co., of Utah, newly incorporated; "to stretch a wire cable across the Grand Cañon, anchor it on the opposite side of the gorge, and run a car back and forth, eight thousand feet in the air.” (p. 564)]

1905 2.17722 [Grand Canyon Railway.] In: *Editorial Notes* [section]. *The Railroad Telegrapher*, 22(10)(October):1310. ["E. P. Ripley, President of the Santa Fe and also of the Grand Canyon Railway, a part of the Santa Fe, has issued a notice that ‘Owing to the character of this line, particularly as to its grades, and with regard to the fact, that it is solely dependent upon its passenger business, it has been decided that hereafter no free transportation will be issued over the line, except to employes when traveling on business of the company.’ This applies to the Grand Canyon Railway, and the notice further announces that half-fare tickets will be sold employes. It is apparent ‘they need the money.’” (entire item)]

1905 2.19441 [Note color illustrations of Grand Canyon.] In: *Leading Articles in the Reviews* [section]. *Review of Reviews*, 32(October):395. ["The feature of *McClure’s Magazine* for September is the set of gorgeous colour prints, finer than any I ever remember to have seen, of the Grand Cañon, Colorado River, in Arizona. they are really wonderful specimens of colour-printing.” (entire item) Pertains to the article by William Allen White (1905) (see Item no. 2.6891).]

1905 2.18102 [Swami Abhedananda tour of North America.] In: *Vedanta in America* [section]. *Vedanta Monthly Bulletin* (Vedanta Society, New York), 1(8)(November):125-126. [Notes, p. 125, "With the President of the Society, Prof. Parker of Columbia University, he climbed some of the high peaks of the Canadian Rockies, spent a few days at the Portland Fair, skirted the coast of the Northern Pacific and rode through the Grand Cañon of Arizona.” (entire note)]
Cage for passengers. *Railroad Men* (New York), 19(2)(November):74. ["A local machinery firm has turned out a 1,000-pound iron cage to be used in swinging passengers and horses across the river of the Grand Canon of the Colorado, near where the Santa Fé has built its fine hotel. The capacity is ten persons, or one horse.—*Salt Lake City Desert* [sic] News." (entire item) Rust cable near the foot of Bright Angel Trail.]

[William Allen White.] *In: Books and Articles* [section]. *University of Kansas, Graduate Magazine*, 4(3)(December):114. ["For * McClure's Magazine he wrote a description of the Grand Canon of the Colorado. The article was illustrated by page plates in color." (entire note of pertinence)]

Conférences sur les États-Unis. *In: Informations* [section]. *Le Globe* (Société de Géographie de Genève), 44:158-159. [Announcement of lecture series by Arthur de Claparède under the society's patronage for the benefit of the blind, including "Le grand cañon du Colorado, the greatest thing in the world (Territoire d'Arizona)."]

Negatives wanted. *In: Notes and Comment* [section]. *The Photo-Miniature*, 7(76)(January):186-187. [Bausch and Lomb Optical Co. "will pay $3 each for negatives made with any of their Anastigmat lenses . . . . * * * The views may be . . . of well-known objects in nature, as the Grand Cañon of Arizona, Yosemite
Valley,—anything that is renowned in history, poem or story." Includes conditions and specifications.]

1906 2.19159 Cage for passengers. *In: Railway News [section]. The Railway Signal* (London), 26(1)(January):9. ["A local machinery firm has turned out a 1,000-pound iron cage to be used in swinging passengers and horses across the river of the Grand Canon of the Colorado, near where the Santa Fé has built a fine hotel. The capacity is ten persons, or one horse.—Salt Lake City Desert [sic] News." (entire item) Rust cable near the foot of Bright Angel Trail.]

1906 2.22073 The New England Sanitarium. *In: Medical Missionary [section]. Atlantic Union Gleaner* (Seventh-day Adventists, Atlantic Union Conference, South Lancaster, Massachusetts), 5(1)(January):8. [Includes notice of stereopticon lecture by George Wharton James, given at the sanitarium December 16 (1905) "on the Grand Canon of Colorado" [sic]. Also, parlor talks were given by him on other subjects.]

1906 2.16502 Energy from Colorado River. *In: Told After Dinner [section]. The Search-Light*, 27 (new series, 3)(10)(March 10):160. ["The energy of the Colorado River is to be transmitted to Los Angeles, according to plans now being matured by local and Philadelphia capitalists. First, the power is to be distributed among the mining camps on the Nevada and Arizona border, and ultimately it will be transmitted to Los Angeles City. It is claimed that between the Grand Cañon of the Colorado and the Black Cañon it is possible to take advantage of certain sites and develop 500,000 horsepower." (entire item)]

1906 2.16452 Grand Canyon branch. R. C. Kerens confirms story that Clark will build one. *Deseret News*, (March 14):2 [issue pagination]. [Plans for rail line from Moapa along Moapa River [Muddy River] to "Grand Canyon" and tourist development there to compete with the Santa Fe; also a crossing of the Virgin River at Rioville and continuing to Chloride to connect with the Arizona & Utah rail line. (See also Item no. 11.2628 (Anonymous, 1906).)]

1906 2.16453 From the Salton Sea. *Deseret News*, (March 15):1 [issue pagination]. ["Calexico, Cal., March 13—Wharton James and Louis Francis Brown have reached here with three boats and Indian guides en route from Yuma to the Salton sea, by way of the Colorado river and overflow through the wilderness. ¶They are the first white men to make the trip." (entire item) (George Wharton James.])

1906 2.21551 The Grand Canon. *School Music Monthly*, 7(29)(March/April):3. ["This great natural wonder is in a class by itself. No other sight on this continent gives such an impression of sublimity. When planning for your trip to California, arrange to go by the Santa Fe railroad and take this side trip to the Grand Canon. A fine hotel there and a comfortable train running up from the main line." (entire item)] [NOTE: Cover gives date as March/April; masthead gives date as March. The serial at this time is in fact a bimonthly (despite its title); the following issue is for May/June.]

1906 2.14079 Aus wissenschaftlichen Gesellschaften. *Export (Centralvereins für Handelsgeographie und Förderung Deutscher Interessen im Auslande)* (Berlin), 28(16)(April 19):294-295. [Summaries of items in *Gesellschaft für Erdkunde* (Berlin), March 6, 1906, including notice of Grand Canyon (p. 295). Author or source given as "G. St."
1906 2.17000 Goes on expedition. *The Tech* (Boston) [Massachusetts Institute of Technology], 25(84)(May 14):1, 5. [Geology Department professor D. W. Johnson expedition to Rocky Mountain region, including Grand Canyon; with H. W. Shimer and C. H. Decker. Various misstatements and typographical errors. Expedition leaving Prescott for San Francisco Peaks and “Grand Canon of Colorado,” then go south to the Utah line, cross the Colorado River, turn west and south over the Kaibab Plateau, reaching the Grand Canon a second time at Point Sublime. From there the expedition will go to southern Utah . . . after which it will investigate the ancient volcanoes and lava cataracts of the Ninkaret Mountains, reaching the Grand Canon a third time at the mouth of the Toroweap valley”, then “northward along the great Hurricane fault to Toquerville in southwestern Utah . . . .”]

1906 2.19732 The Santa Fe trail. *In: Summer Tours* [section]. *Good Housekeeping*, 13(6)(June):655. [The Santa Fe Railway skirts “the Grand Canon and making this wonder of the world one of its own attractions.” Also, “The rush for the Grand Canon of the Colorado and for California, to say nothing of Colorado, will find this Santa Fe trail stretching away southwestward with all the enticements imaginable.” (entire notes)]

1907 2.22178 [Lamar Brothers, Needles, Arizona, to run motor launch to Parker bridge site.] *The Motor Boat* (New York), 4(4)(February 25):60. [“Needles, Ariz.—*Water Pearl*, a new gasoline [sic] motorboat, recently launched by Lamar Brothers, is 33 feet long with a beam of 5½ feet and draws about 14 inches. The power is furnished by a 25-h. Brennan motor. As soon as work is commenced on the big bridge to be built across the Colorado River, a few miles above Parker, on the Arizona side by the Arizona and California Railroad, it will be placed on schedule time to connect with the Santa Fé at Topock and run to the new bridge.” (entire item)]

1907 2.22028 San Francisco earthquake and Alaska. *In: Miscellaneous Intelligence* [section]. *Periodical Accounts Relating to the Foreign Missions of the Church of the Brethren (“Moravians”)* (Brethren’s Society for the Furtherance of the Gospel Among the Heathen, London), Second Century, 6(66)(June):420. [Includes: “Nothing further is said about Dr. Romig and his family, nor about the Salton Sea. God grant that this may mean that the lives of the Romigs have been spared, and that nothing serious has occurred at or near Martinez, which, as our readers will remember, is one of the stations in our Californian Indian Mission.”]

1906 2.16454 Kanab [news]. Roadway to Grand Canyon. Now under construction. *Deseret News*, (June 30):13 [issue pagination]. [“President E. D. Woolley left Kanab last night with a gang of laborers to make a trail into the Grand canyon. Work on the trail and the tramway across the canyon will now be pushed to completion. It is expected the game preserve created by Congress on the Buckskin mountain will attract swarms of tourists.” (entire note)]

Kanab [news]. Grand Canyon visitors. Deseret News, (July 23):3 [issue pagination]. [*A party of young people left here to visit the Grand Canyon this afternoon. Parley Day of Fillmore, John Christensen of American fork and B. Y. Woolley, of Kanab made up the party. This is the second of the parties to visit the canyon on this side this summer. There are four or five more parties planned here to visit the canyon in the near future.*] (entire note)

The recent work of Albert L. Groll. Brush and Pencil, 18(2)(August):frontispiece, 43-51, 53-54. [See frontispiece, "Arizona", and p. 43: *"It is only a stretch of desert and sky and low-lying hills, but it glows like a gem with the indescribable, never-to-be-forgotten color of the Colorado Desert."* (entire note)]

[Buffalo Jones and Grand Canyon.] The Philistine (The Roycrofters, East Aurora, New York), 23(5)(October):140-146.

Cheap summer rates to California. American Poultry Journal, 37:688. [Santa Fe Railway.]

[Inter-California railroad.] In: Railroad Construction [section]. Railroad Gazette, 42(2)(January 11):62. [*"Inter-California, projected from Calexico, Cal. near international boundary, southeast through Mexico, thence northeast crossing the international boundary line near Colorado river to a connection with the Southern Pacific line near Yuma, Ariz., a total of 54 miles. About four miles in California completed last year."*] (entire item)]

La lluvia y la forma de la tierra. Cómo nacen las colinas—Cañones y ventisqueros—El agua ingeniero, minero y arquitecto. Alrededor del Mundo (Madrid), (January 16):43.
[Notes Grand Canyon of the Colorado River and its dimensions, but an illustration, "Una vista del gran cañón del Colorado", is indistinguishable and may not depict the Grand Canyon of Arizona.]

1907 2.16461 What St. George is, has and wants. T. P. Cottam, representative from the south, discusses these subjects. Awaits railroad advent. Has copper, silver, fine farms and sunshine—Needs good roads, bridges and Arizona Strip. Deseret News, (February 8):10 [issue pagination].

1907 2.19284 New reading rooms and club houses on the Santa Fe. Railroad Gazette, 42(17)(April 26):590. [Includes notice of new Recreation Hall at Needles, California (also illustrated).]

1907 2.13772 [Voice heard at great distance.] From: "From Punch" [subsection]. In: Highways and Byways [section]. The Chautauquan, 46(3)(May):270. ["Eighteen miles is the longest distance at which a man's voice has been heard. This occurred at the Grand Cañon of the Colorado, where a man shouting 'Bob' at one end was plainly heard at the other, eighteen miles away.' —Cassell's Saturday Journal. This works out at a mile and a half for a penny, so it isn't so wonderful after all." (entire note) presumably referring to British postal rates.]

1907 2.19285 [New bridge over Colorado River.] In: Railroad Structures [section]. Railroad Gazette, 42(19)(May 10):662. ["Needles, Cal.—The Atchison, Topeka & Santa Fe, it is said, will build a new bridge over the Colorado river at this place." (entire item)]

1907 2.12965 Two women in the desert. Good Housekeeping, 44(6)(June)(344):673-675. ["Two of our Good Housekeeping women ventured through the Painted Desert, a summer or two ago, to the Grand Canyon of the Colorado without male escort." One woman is identified as "Mrs Carlson" of Connecticut.]

1907 2.21522 The only thing to do. Saturday Evening Post, 179(52)(June 29):19. ["Jim Hance" anecdote about wife falling into Grand Canyon. John Hance.]

1907 2.16463 Kanab [news]. Deseret News, (July 4):7 [issue pagination]. ["A very interesting conference of the Relief societies of this stake has just closed. Mesdames Dusenberry and King were in attendance. Today they are starting to the Grand canyon,
accompanied by President E. D. Woolley and others, who go to complete the tramway across the Colorado river.” (entire note)]

1907 2.14862 From the Utah Fraternity. Denver Medical Times, 27(2)(August):58. [Camping parties in association with first summer meeting of the third Councilor District Medical Society of Utah, including one to Grand Canyon, “across the Buckskin mountains in pioneer style . . . for 25 days.”]

1907 2.16464 A novel railroad. One from brink to bottom of Grand Canyon of Colorado to be built. Deseret News, (August 8):1 [issue pagination]. [“Santa Fe [Railway] officials have arranged with Ohio people to build a novel railroad from the brink to the bottom of the Grand canyon of the Colorado river. The grade will be so steep it almost can be called[,] it is said, a perpendicular railroad. It is to be about three miles long and will cost fully $100,000 a mile. It will be a cog railroad, with a rack rail, which will form a continuous double ladder, into which the toothed wheels of the locomotive will work.” (entire item)] [Cog railway.]

1907 2.16995 The locomotives of the Atchison, Topeka and Santa Fe Railway. The Engineer (Chicago), (September 13):253-256. [See pp. 253-254, notes on the Arizona division from Seligman, Arizona, to Bakenfield [sic Bakersfield], California.]

1907 2.14696 Developing opportunities in the South and Southwest. In: Wilderness to Wealth [section]. Opportunities of To-day, 3(6)(October):15. [Notes briefly Santa Fe Railway development and promotion at Grand Canyon.] [Opportunities of Today.]

1907 2.16275 Railroad into canyon. Popular Mechanics, 9(10)(October):1102. [“The Grand canyon [sic] of the Colorado is a mile deep, and down its wall-like side a rock railway will be built. It will probably be the steepest railroad in the world and will save passengers an all-day and dangerous trip on horseback. Its construction will be along lines of other rock roads already in operation.” (entire item)] [Cog railway?]

1907 2.19198 Line for Grand Canyon of Colorado [sic]. Electric Traction Weekly, 3(44)(October 31):1111. [“Report comes from the Southwest that an electric line is to invade the Grand Canyon of the Colorado. It is proposed to construct it over the Bright Angel trail as far down as the Indian Gardens, about half way, and then along that plateau to the Grand View trail. A representative of the General Electric Company, it is reported, was recently over the ground looking over the project. The power is to be furnished from Babbitt’s location some miles above.” (entire item)] [Apparently a power supply for the Grandview Mine.]

1907 2.14279 [Anecdote about "Jim Hance"]. *Shields’ Magazine*, 5(6)(December):403. [John Hance; tourist wings story. Item credited to *Saturday Evening Post*.]

1907 2.18208 The meetings of the American Civic Association. *Newport, Rhode Island, Civic League Bulletin*, 2(5)(December):5-8. [Meetings held in Providence, Rhode Island. See p. 7: "One of the interesting features of the session was the dispatch of a telegram to President Roosevelt urging him to invoke federal aid in preserving the Grand Canyon of the Colorado free from desecration . . . ." (entire note)]

1907 2.18436 The fly in the picture. *In*: Stories Just a Few [section]. *The Lyceumite and Talent* (Chicago), (The Lyceumite, 6(2))(Talent, 18(6))(December):42. [Summary of presentation by Martin Tew on "Wonders of the West", when "a fly, seemingly as big as a mastodon, walked into the picture, took a position on the heights of Vishnu temple and looked down into the canyon.”]

1907 2.13805 [Lecture.] *In*: Geographical Record [section]. *American Geographical Society, Bulletin*, 39(1):42. ["... the speaker of the evening, Mr. Howard W. Du Bois, who addressed the Society on the Grand Cañon of the Colorado. Stereopticon views were shown." (entire note)]

1907 2.13469 *Record of the Class of 1892; Secretary’s report no. IV. For the fifteenth anniversary.* Cambridge, Massachusetts: The University Press, *for the use of the class*, 282 pp. [See p. 131, Nathaniel Saltonstall Howe Sanders; and p. 213, Charles Gershom Van Brunt.]

1907 2.18020 Third Summer Meeting; Wareham and Lytchett Heath. *In*: The Proceedings of the Dorset Natural History and Antiquarian Field Club During the Season 1906-1907 [section]. *Dorset Natural History and Antiquarian Field Club, Proceedings*, 28:lxvii-lxxviii. [See p. lxxiv: On viewing Mariposa lilies during a field trip, "their guide told them that when she was with her husband in the Grand Canon they rode through them as one would ride through fields of buttercups." (entire note)]

1908 2.16466 To harness the Colorado. *Deseret News*, (January 9):3 [issue pagination]. [Power-production dam at Lees Ferry proposed. Includes note, "It is the reported intention of the eastern syndicate of capitalists to build an electric railroad from Bright Angel trail to either the Clark road at Lund or the D. & R. G. at Marysvale."; i.e., Old Bright Angel Trail, North Rim.]

1908 2.18968 Resources of Lower California. *Asociación Financiera Internacional, Boletín* (México), 3(7)(February):29. [Includes notes on lower Colorado River region.]

1908 2.16467 New road taps rich territory. Extension of Clark road now planned as formerly announced. Engineers receive orders. As soon as weather permits surveyors will take the field to run preliminary lines. *Deseret News*, (April 15):5 [issue pagination]. [Extension of Salt Lake Route into northwestern Arizona.]

1908 2.16769 [Note.] *In: Where the Artists are Summering* [section]. *American Art News*, 7(31)(June 13):. [“Thomas Moran is painting at the Grand Canon, Arizona.” (entire item)]

1908 2.21705 [William Phipps Blake conferred LL.D. by University of Arizona.] *In:* Scientific Notes and News [section]. *Science*, new series, 27(June 19):965. [“Professor Blake began his work in the southwest as a member of the Williamson expedition which traversed southern California and the Colorado desert in 1852, discovering the San Gorgonio Pass and making clear the nature of the Salton Basin.”]

1908 2.14707 At the El Tovar. *Santa Fe Employes’ Magazine*, 2(9)(August):714-715. [Hotel’s physical plant and fire department, including two Kolb Bros. photos.]

1908 2.16468 Discovery of deepest canyon in the world. Yentna Gorge found by Dr. F. A. Cook in American Alaska, is one thousand feet deeper than famous Grand Canyon and much more impressive. *Deseret News*, (August 8):23 [issue pagination]. [Also includes note: “Until six years ago, the tourist could gain the rim of the Grand canyon of the Colorado only by taking a 90-mile stage ride through the San Francisco mountains and the Painted desert. Now the railroad runs to the canyon, there are several hotels on the south rim, and the tourist looks into the red depths of the Colorado with all the comfort and luxury of seeing the desert from a Pullman.” Additional notes on Grand Canyon in places.]

1908 2.13391 Officers’ paper. The province of the home in child culture. *In:* Officers’ Department [section]. *The Children’s Friend*, 7(9)(September):361-363. [Begins with a parable of “an old man who was a luminous character” who was “[l]iving on the brink of the Grand Canyon of Arizona.”]

Two attractive pictures. Harry Shipler’s panorama and his Grand Canyon scene admired. *Deseret News*, (October 9):1 [issue pagination]. [A “... bromide enlargement of a splendid view of the Grand canyon. This picture is an immense affair and one becomes almost hypnotized by looking at it for several minutes. The mile-deep canyon with the turbulent stream winding at the bottom seems to be real, the onlooker easily imagines himself looking over its edge. The thing is wonderfully realistic.” (entire note) The other view is a panorama of Salt Lake City.]

The Open Road; Afoot with The Fra [section]. *The Fra* (The Roycrofters, East Aurora, New York), 2(2)(November):17-18. [Regarding conservation of resources; see p. 18: “The wood is gone, but rock is plentiful. The rocks of the Grand Canon could rebuild the cities of the world, and the quarry would not be really opened.” (entire note)] [Also reprinted in 1915 (see Item no. 2.19348.).]

Added to “America.” *In: The Center Table* [section]. *The Standard* (Chicago), 56(23)(February 6):686 [issue pagination, 14]. Henry Van Dyke additional stanzas to S. F. Smith’s hymn, “America”, the original having been written “before people know about the Grand Canon, and when ‘The West’ was at Buffalo.” Stanza includes line, “Thy canyons wild and deep . . . .”]

[Note.] *In: Indiana* [section]. *The Apothecary* (Boston), 21(3) [new series, 6(3)] (March):44. [“President J. K. Lilly, of Eli Lilly & Company, spent the latter part of February visiting the Grand Canon of the Colorado and southern California. He is accompanied by Mrs. Lilly and will remain several weeks on the Pacific Coast for rest and recreation. He is now at the Hotel Coronado, Coronado Beach, Cal.” (entire note)]

in this country and abroad, will be glad to learn that congress appropriated $5,000 for the erection of a memorial to him, on the brink of the Grand Canyon of the Colorado which he explored.” (entire item)]

1909 2.16470 Explorations in Grand Canyon. Mysteries of immense rich cavern being brought to light. Jordan is enthused. Remarkable finds indicate ancient people migrated for Orient. Arizona Gazette (Phoenix newspaper), (April 5):1, 7. [Regarding supposed Egyptian artifacts found in a Grand Canyon cave by G. E. Kinkaid. Although general newspaper items are not cited in this bibliography, this article is cited because it has a long citational following in numerous venues, usually without citation other than Arizona Gazette for 1909. “Jordan” is alleged to be Prof. S. A. Jordan of the Smithsonian Institution, who was conducting further explorations.]

1909 2.14942 A monument to John W. Powell. Mines and Minerals, 29(11)(June):520. [Congressional appropriation of $5,000 for a memorial to John Wesley Powell at Grand Canyon. Also see differently worded item in the July issue (Item no. 2.14943).]

1909 2.14943 Memorial to Major J. W. Powell. Mines and Minerals, 29(12)(July):550. [A different text than the item in the June issue (see Item no. 2.14942).]

1909 2.16472 Daring auto trip to Grand Canyon. Deseret News, (June 19):2 [issue pagination]. [Edwin G. Woolley, Mrs. Woolley, and Miss Arbelia Burt begin automobile trip to Grand Canyon’s North Rim. A second automobile will be driven by “Chauffeur Dunlop” with David Affleck and four children.]

1909 2.14094 [Photo of mounted group at Grand Canyon, including “Colonel’ J. H. Beal.”] Bulletin of Pharmacy (Detroit), 23(10)(October):405. [Supplements the article by Harry B. Mason in the September issue (Item no. 2.14094). The group is in the village setting.]
1909 2.16474 Taft gazes into the Grand Canyon. Arose early that he might see the color effects of sunrise over the great abyss. Arizona is enthusiastic. President favors statehood but warned territory against such a constitution as Oklahoma’s. *Deseret News*, (October 14):7 [issue pagination]. [William Howard Taft.]

1909 2.18435 Echoes of Taft Day. *The Native American* (Phoenix), 10(34)(October 16):339. ["Mr. Taylor went to Grand Canyon as one of the special guard for the President." (entire note) Regarding visit of William Howard Taft.]

1909 2.19667 [President Taft.] In: Events of the Week [section]. *The Rural New Yorker*, 68(October 30):951. ["The fourth annual dairy show was opened October 14 in Milwaukee. President Taft, from the Grand Canyon of Arizona, pressed the button which started the machinery." (entire note) William Howard Taft.]

1909 2.18168 Fest-Bummler snapshots. *The American Bottler* (New York), 29(11)(November 15):43-44. [Regarding Fest-Bummler Band, a mostly women’s band, which accompanied the transcontinental tour of the American Bottlers’ Protective Association of the United States. Appendix to article, "The Bottlers’ Transcontinental Tour" (see Item no. 2.18167 [Mrs. H. M. Worth et al., 1909]).] [See p. 43, note about "Mrs. J." who was "Smiling all the way down the 'Bright Angel Trail' when big men were saying their prayers.""]; and p. 44, "Welbrock’s ambition will eventually secure him a job as a guide on the 'Bright Angel Train' [sic] for he certainly made that mule 'grunt' some." (entire note)]

1909 2.13018 [North Rim rail connection.] In: Along the Trail [section]. *Santa Fe Employees’ Magazine* (Railway Exchange, Chicago), 4(1)(December):90. ["Preliminary surveys are being made for a railway to connect the Grand Canyon of Arizona with the Salt Lake Route, which claims that the view is finer from its side of the canyon. This claim, however, will be taken with a grain of salt by those who have seen the canyon from the Williams' side." (entire note) NOTE: Santa Fe Railway had a vested interest in South Rim operations.]

1909 2.16049 [Plan to photograph Grand Canyon from kites.] In: Geographical Journal [section], Various [subsection]. *American Geographical Society, Bulletin*, 41(10):628. ["Late in July [Frederick Monsen] expected to visit Arizona for study among the Hopi and Navajo Indians, and after three months in their homes he planned to go to the Grand Canyon and try to photograph it by means of kites flying about 6,000 feet above the surface of the river." (entire note)]

1912 2.15851 Many in Studebaker sociability run; half-hundred cars start from Phoenix, Ariz., for Grand Canyon—Owners will spend several days on road and will be entertained in many of the towns. *Motor Age,* 21(23)(June 6):23.

1912 2.14739 Severe sociability run; of twenty-two competing cars in Arizona run but seven reached Prescott by midnight; only three of eleven entrants for Studebaker cup reached night stop on time. *The Automobile,* 26(24)(June 13):1313. [Phoenix-to-Grand Canyon automobile tour.]

1912 2.16254 Road that was built for a tour; public-spirited residents of northern Arizona create a "short-cut"—70 miles over desert country. *Motor World,* 31(12)(June 13):54. [Ash Fork to Grand Canyon. Studebaker sociability run.]

1912 2.13013 Ford conquers Grand Canyon; perilous trip by Californian from canyon brink to the very edge of the Colorado River. *The Automobile,* 26(25)(June 20):1398. [B. L. Graves drive from Peach Springs to Diamond Creek.]

1912 2.19261 Grand Canyon Studebaker run. *Automobile Topics*, 26(6)(June 22):349. ["More than 100 owners of E-M-F ’30’ and Flanders ’20’ cars, recently completed a run of over 600 miles on a tour from Phoenix, Ariz., to Grand Canyon. The tour was open to Studebaker cars only, and had a Governor’s Cup as the trophy." (entire item)]

1912 2.12937 Arizona run picturesque; tourists glide and bump over all sorts of roads through fertile and sterile country; verdant valleys in strong contrast with barren lava beds. *The Automobile*, 26(26)(June 27):1438-1439. [Studebaker tour, Phoenix to Grand Canyon.]

1912 2.14738 Prescott motorists have tour. *In: News of the Week Condensed [section]*. *The Automobile*, 26(26)(June 27):1448. ["Encouraged by the success of the Studebaker sociability run from Phoenix to the Grand Canyon and return, the automobilists of Prescott, Ariz., organized and carried out a similar affair. Fifteen machines of various makes took part and the trip was made in 4 days." (entire item)]

1912 2.18930 Practical transcontinental itineraries. Suggestions for a motoring trip from New York City to San Francisco, Los Angeles and return, with Pacific Coast routes connecting with Seattle. *The Automobile Journal*, 33(11)(July 10):35-48. [See p. 37: "... the Grand Canyon of the Colorado is now quite as easy of access to the motorist as Niagara Falls. An excellent automobile road runs to the most interesting portion of the splendid gorge from Phoenix, Ariz., and it may be added that the government as aided materially in bringing this about, with its macadam way to the Roosevelt dam, so-called, and through the famous Superstition mountains." (entire note) However, the illustration on the same page, "Some of the Picture Rocks in the Grand Canyon of the Colorado, Now Within Easy Reach by Automobile." depicts a far lesser canyon elsewhere, along a roadway lined with telephone poles following a river.]

1912 2.18089 Many long-distance tourists. *The Horseless Age*, 30(3)(July 17):84. [Includes brief notice of "the big Studebaker tour from Phoenix to Grand Canyon, in which more than 100 owners and their friends took part, without an accident befalling them." ]

1912 2.17248 Kingman, Ariz. *In: Editorial Correspondence [section]*. *Engineering and Mining Journal*, 94(4)(July 27):179-180. [See p. 180, "It is understood that E. F. Thompson has interviewed Washington authorities in regard to diverting a portion of the surplus funds of the Indian School at Truxton, to building a branch road into Diamond Cañon on the Colorado River and that there is a reasonable assurance of its being carried out." (entire note) Diamond Creek Road.]

1912 2.21575 San Diego. The place of opportunity. First Pacific U.S. port north of Panama invites the world to her *Panama California Exposition* 1915—entire year—1915. *Out West*, 4(2)(August):137-143. [See p. 142: "... [San Diego] is enlarging her railway facilities so that within a comparatively short time the marvelously rich and fertile Imperial and other Colorado River Valleys will have an immediate ocean outlet through her harbor ... ." (entire note)]

1912 2.18214  Items of interest. *Our Work* (Bulfinch Place Church, Boston), 8(9)(October):4. ["The Autumn Lecture Course will open on Wednesday Nov. 6. While the program is not complete, it is possible to announce two lectures by Mr. Nat. M. Brigham, on the 'Grand Canyon of Arizona' and 'Our National Parks.' Mr. Brigham, though new to us, is a well-known lecturer, especially in the West." (entire note)]

1912 2.19291  Cantaloupe train breaks the record. *Railroad Men*, 26(1)(October):24-25. ["The sight of this great train of 131 uniform style freight cars belonging to the Pacific Fruit Express Company was one well calculated to make a lasting impression on every observer.” Train leaving Brawley, California [eastward]; “the entire tonnage was the result of one day’s picking”; approximately 2,061,500 pounds.]

1912 2.19220  University calendar. *Yale Alumni Weekly* (Yale University, New Haven, Connecticut), 22(5)(October 18):109. ["Wednesday, October 23—New Haven Educational Extension lecture. Nat M. Brigham. Lecture and a series of motion pictures on the Grand Canon of Arizona and California. College Stret Hall, 8:00 P. M." (entire note)]

1912 2.18215  Stereopticon lectures. *Our Work* (Bulfinch Place Church, Boston), 9(1)(November):4. ["Nov. 13. The Grand Canyon of Arizona, by Mr. Nat M. Brigham.” and "Nov. 27. Our National Park[s], by Mr. Nat M. Brigham.”]

1913 2.20008  Rich Palomas tract is purchased by capitalists of San Diego. *National Land and Irrigation Journal*, 7(1)(January):11. [Credited to *Arizona Gazette*.] ["Arizona and Imperial county need a seaport and San Diego needs the great agricultural and mining sections of Arizona and Imperial county. think of one great farm from Phoenix straight through to San Diego.”]

1913 2.18210  Seeing the natural wonders of America. *Judge* (New York), 64(January 4):. [Cartoon drawings, including one view of Grand Canyon at El Tovar Hotel.] [Artist undetermined; item seen in an imperfect copy.]

1913 2.17802  Panama-Pacific Exposition notes. *Municipal Record* (San Francisco), 6(2)(January 9):22. [Includes description of the projected “reproduction of the Grand Canyon of
Arizona and the Pueblo Indian village" by the Santa Fe Railway; includes a few
details.]

1913 2.15239 To make an exhibit of unequalled magnificence; Santa Fe to have a replica of the
Grand Canyon at the Panama-Pacific Exposition. *Santa Fe Magazine*,
7(3)(February):54-55.

1913 2.15384 The Lyceum’s influence. *Santa Fe Magazine*, 7(3)(February):82. [Regarding
compliments to Santa Fe Railway in Dwight L. Elemendorf’s lecture on Grand Canyon.]

1913 2.17371 Noting progress of the world’s fair. *Pacific Service Magazine* (Pacific Gas and Electric
Notes briefly the “concessions already granted”, which include “Grand Canon of
Arizona”, an investment of $250,000. No further information of pertinence.]

1913 2.17760 To reproduce Grand Canyon at world’s fair. *The Architect and Engineer of California,

[See p. 357, brief description of proposed reproduction of the “Grand Canon of
Arizona and the Pueblo Indian village” by the Santa Fe Railway.]

Abyss,’ a Grand Canyon subject, which holds the place of honor, is beautiful in color
and is a well proportioned and interesting composition.” (entire note) Folsom
Galleries, New York.]

15):10. [“Elliott Daingerfield recently sold to Moulton & Ricketts from his studio, what
he calls, and with reason, ‘His masterpiece,’ a large picture, entitled, ‘The Genius of
the Canyon,’ now on exhibition . . . in the New York galleries of the firm . . . .” A nude
study, “evolved in the artist’s mind from memories of his recent visits to and study of,
the grand canon of the Colorado in Arizona. Thomas Moran, and even Marcus
Simons, combined, could not have produced a more gorgeous color scheme or
fantastic ‘vision.’ The color is marvelously clear and rich and the work, despite its not
easily understandable title, is the strongest the painter has yet produced.”]

1913 2.12844 Preparations for the Panama-Pacific Exposition are far advanced. *American Sugar
Industry*, 15(3)(March):65. [“Among the concessions will be a reproduction of the
Grand Canyon by the Santa Fe Railway . . . .” (entire item)]

1913 2.17659 The Panama-Pacific Exposition. In: The Vehicle Dealer [section]. *The Carriage
Monthly*, 48(12)(March):71. [“Among the concessions will be a reproduction of the
Grand Canyon by the Santa Fe Railway . . . .” (entire note)]

[Includes two paragraphs on “a brief New York showing” of the Kolb Brothers’
Colorado River film.]

1913 2.19444 Construction notes. *Santa Fe Magazine*, 7(5)(April):87. [“Grand Cañon Railway;
Grand Cañon—Erecting a curio building, $4,767.” (entire note)] [Probably Lookout
Studio.]

1913 2.17663 Panama-Pacific exposition. *Western Engineering*, 2(5)(May):419. "[The Santa Fé Railroad Co., which was granted a concession to reproduce the Grand Canyon of Arizona, has commenced construction work. The total amount to the expended for the purpose is $250,000." (entire note)]

1913 2.21609 From desert to gardens; rapidly growing cities and prosperous towns. *The West Coast* (Los Angeles), 13(5)(May):49-50. [Includes Imperial Valley.]

1913 2.18206 Meeting of International Association of Ticket Agents. *In: Organization [section]. Railway World*, 57(6)(June):522. [Meeting of Executive Committee of the association, in St. Louis. "The principal business transacted was the selection for the annual convention, which we decided to be held at Grand Canyon, Ariz., the Santa Fe having offered a special train from Chicago, it being the intention to leave Chicago on March 18, 1914, going direct to Grand Canyon for a three days' session . . . ."]

1913 2.21715 The Editor's Table [section]. *American Magazine* (New York), 75(8)(June):6. [Includes paragraph and photo as promotion for article by the Kolb Brothers beginning in the July issue (refer to Item nos. 2.3926, 2.3927).]

1913 2.13008 Ideal trip through Arizona. *In: The Week in the Industry [section]. The Automobile*, 28(24)(June 12):1230. ["The Franklin Automobile Co., Syracuse, N. Y., has recently issued a twenty-page booklet on a wonderful trip made by one of its cars through the Grand Canyon of Arizona." (entire item)]

1913 2.18209 Describes a Grand Canyon trip. *Automobile Topics*, 30(5)(June 14):368. ["The Franklin Automobile Co., of Syracuse, N. Y., has issued a neat booklet entitled 'A Strenuous Trip Into the Grand Canyon of Arizona.' It covers a trip taken by O. K. Parker, chief engineer of the Automobile Club of Southern California, into the Grand Canyon, with a Franklin. There are many illustrations showing the machine in all sorts of rocky situations, on and off roads—mostly off." (entire item) See Item no. 2.4995 (O. K. Parker, no date).]

1913 2.12914 Hudson first car to climb Bright Angel Trail. *The Hudson Triangle* (Hudson Motor Car Co., Detroit), 3(3)(July 19):[4]. [Hudson Six 54 driven from Williams, Arizona, to Grand Canyon at head of Bright Angel Trail. Promotional.]

1913 2.15236 Arizona’s world wonder. *Santa Fe Magazine*, 7(8)(July):64. [From Leslie’s.]

1913 2.18135 Dry humor. *In: Sense and Nonsense* [section]. *Saturday Evening Post*, 186(4)(July 26):38. ["The chief forest ranger of the big government reserve along the Grand Cañon, in Arizona” returns from Kansas City with an Irishman. Anecdote itself does not refer to Grand Canyon but to aridness of the West.]

1913 2.15235 Annual convention of the Train Dispatchers’ Association of America. *Santa Fe Magazine*, 7(9)(August):43-45. [See p. 43, “A side trip to the Grand Cañon was arranged and the entire party availed themselves of the opportunity to view the Wonder of the World.” (entire note)]

1913 2.15617 [Cataract Canyon Power Company.] *In: Texas* [section]. *The Iron Age*, 92(September 25):698. ["A syndicate of men from Bangor, Me., represented by J. Barton Nealy, has secured an option on the holdings of the Cataract Canyon Power Company, of Prescott, Ariz., and if the project is consummated a large hydroelectric plant will be constructed in Cataract Canyon, which, next to the Grand Canyon, is the greatest gorge in Arizona. The proposed plant will have a capacity of about 12,000 hp.” (entire item)]

1913 2.14832 Concrete in the grazing country; in the grazing country of the Southwest concrete troughs conserve the water supply, and make possible grazing over territory which, without such water supply, would be of no value. *Concrete-Cement Age*, 3(4)(October):167-168. [Article begins with notice of drought exhausting “the ‘wet weather water-holes’ in northern Arizona, on the watershed of the Grand Canyon of the Colorado”, [which] threatens the extinction of immense herds of cattle and horses and flocks of sheep”; with photograph. No further mention of Grand Canyon region specifically.]

1913 2.16024 Salt Lake and Utah. *The Timberman* (Portland, Oregon), 14(12)(October):96C. [Interest in having “the Kaibab forest, in the extreme Southern part of the state, set apart as a national park”.

1913 2.18429 Dry humor. *The Bessmer Monthly* (Grove City, Pennsylvania), 95(February):4. [From the *Saturday Evening Post* (see Item no. 2.18135 [Anonymous, 1913]). “The chief forest ranger, of the big government reserve along the Grand Canon, in Arizona”
returns from Kansas City with an Irishman. Anecdote itself does not refer to Grand Canyon but to aridity of the West.]

1913 2.16116 Locomobile wins desert road race; averages 29.94 m. p. h. from Los Angeles to Phoenix. *Motor Age*, 24(19)(November 6):10. [Colorado River crossing at Yuma.]

1913 2.21452 [Notice of James White affair.] In: Some Publications [section]. *Iowa Journal of History and Politics*, 11(2):282. [“In the *Rocky Mountain Herald*, published at Denver, Colorado, on January 11th there is an interesting article on *The Grand Cañon of the Colorado*, by Will C. Ferril, in which is told the story of the adventures of James White while exploring the cañon in 1867.” (entire item)]

1914 2.14245 [Critique of “The pamphlet of Alexander McAllan, ‘America’s Place in Mythology and Ancient Chinese Account of the Grand Canyon’”.] In: Editorials. *American Antiquarian*, 36(1)(January):44-46. [Also see comments in this bibliography under McAllan, Alexander (no date) [1913], Item no. 2.4287. Also see book review in same issue, pp. 48-49 (Item no. 30.670).]

1914 2.19680 [Electric railway proposed for Parker, Arizona.] In: Current Electrical News [section]. *Electrical Review and Western Electrician*, 64(1)(January 3):51. [“Articles of
incorporation are being prepared for the Parker & Colorado River Railway Company, a new subsidiary corporation of the Parker Improvement Company, the purpose of which will be to operate an electric railway in this city and vicinity. Application for a franchise has been made to the Board of Supervisors.” (entire item)]

1914 2.21341 [Hearst purchases Grand View Hotel.] In: Residences [section]. Southwest Contractor and Manufacturer (Los Angeles), 12(15)(February 14):23. ["Phoenix, Ariz.—William Randolph Hearst, now of New York, purchased the Grand View hotel and Berry homestead on the rim of the Grand Canyon, 14 miles east of El Tovar, where he contemplates constructing a residence, it is reported.” (entire item)]

1914 2.17811 Electrically operated air brake. In: Recently Patented Inventions [section]. Scientific American, 110(8)(February 21):166. ["H. L. Tooker, Grand Canyon, Ariz. This invention provides an electrical control, analogous to the triple valve commonly used for handling the pneumatic elements of the brake mechanism. The enginemen by manipulating a hand lever, can operated the electro-pneumatic control independently of the usual air-controlled mechanism.” (entire item) This item refers to Patent No. 1,084,506, “Electrically-Operated Air-Brake”; see U.S. Patent Office, Official Gazette, 196(2)(January 13, 1914):440. Patent to Harry L. Tooker, Winslow, Arizona (who thus apparently was a worker with the Santa Fe Railway). The fact that the Scientific American note referred to Grand Canyon may indicate that Tooker was associated (at that time?) with the Grand Canyon Railway. Patent filed June 29, 1911, Serial No. 635,937.]

1914 2.22144 [Masons degrees conferred in Grand Canyon.] Masonic Voice-Review (Chicago), new series, 16(3)(March):81. ["Recently the degrees were given by a lodge in Arizona, in the grand canyon of the Colorado. The first was conferred in the bottom of the canyon, the second on a ledge mid-way, and the third on a flat rock on the top edge of the immense chasm. These unique ceremonies were witnessed by a large number of brethren.” (entire item)]

1914 2.17810 [Filler.] Scientific American, 110(11)(March 14):230. ["The Kaibab and the Coconino National Forests adjoin each other. Yet it takes from two to three days to go form one to the other across the Grand Canyon of the Colorado.” (entire item)]

1914 2.21342 [Hearst to construct electric railway to Grand Canyon.] In: Railroads [section]. Southwest Contractor and Manufacturer (Los Angeles), 12(20)(March 21):29. ["Flagstaff, Ariz.—William Randolph Hearst will construct an electric railway from the city to Grand View Point on the Grand Canyon a distance of 67 miles, it is reported.” (entire item)]

1914 2.21600 International Gas Congress. The Gas Age (New York), 33(7)(April 1):308-309. [Regarding congress in conjunction with the Panama-Pacific International Exposition. Notes (p. 309) among the amusements, “A grand canon of Arizona is a small scale reproduction . . . .” (entire note)]

West Jersey & Seashore Division. *In: Pennsylvania lines east of Pittsburgh & Erie, Div. No. 17 [section]. The Railroad Telegrapher*, 31(5)(May):853. [Item signed, "Div. Cor." "Bro. M. J. Fitzgerald, Westville [New Jersey], who attended the ticket agents’ convention at Grand Canyon, Colo. [sic], sent several postals to the boys from Juarez, Mex. Probably gone down there to help Villa." (entire note)]

Paxton’s fine genre. *American Art News*, 12(31)(May 9):2. ["The Grand Canon, as interpreted by De Witt Parshall, and well interpreted, holds the visitor with its sense of depth and space and fine color and air.” At the Pennsylvania Academy of Fine Arts.] [DeWitt Parshall.]

To San Francisco. The International Council of Nurses’ train. *British Journal of Nursing*, (May 9):410-412. [Itinerary includes one-day stop at Grand Canyon, p. 410.]

[Electric railway and utilities proposed for Parker, Arizona.] *In: Current Electrical News [section]. Electrical Review and Western Electrician*, 64(19)(May 9):951. ["Articles of incorporation have been filed for the Colorado River Electric Railway Company, with a capital stock of $250,000, by Thomas Taylor, David Connor, J. E. Beck, W. H. Thorpe, I. W. Wallace and William Drury. The company proposes to construct electric railroads, and to maintain telephone and telegraph business in and around Parker and through the Colorado River Indian reservation.” (entire item)]

Southwestern United States. *Western Christian Advocate* (Cincinnati, Ohio), 80(25)(June 24):790 (also concurrently paginated for issue, 22). [Includes note of Salton Sea and Imperial Valley.]

[Anecdote.] *The Medical Council* (Philadelphia), 19(7)(July):269. ["If the earth excavated from the Panama Canal were dumped into the Grand Canyon of Arizona it would only make a little blot on the scenery. Man should remember this when he feels like talking big.” (entire note)]

Westward, ho! *The American Pomologist, Bulletin* (8)(July):56-57. [Regarding the American Pomological Society’s proposed "Pomological or Fruit Growers’ special" over multiple railways to a convention in Los Angeles. Includes note, in passing, of “The Grand Canyon (of the Colorado in Arizona)" as an “available” place en route.] [See also item by T. L. Lipsett, pp. 64-66 (Item no. 2.18433).]

The art of relaxation. *From: Rest Prescriptions [as a part of] Outlines [subsection], In: Sermonic Literature [section]. The Homiletic Review*, 68(1)(July):77. [Regarding Ezekiel 1:24: “Meant getting into an atmosphere of greater ideas: This is why Grand Cañon and the Alps are sought by the wealthy. But all classes may enjoy the depths and heights of divine thought in regular Sabbath worship. The Japanese have a rest-room where they place a single beautiful vase or picture for observation.” (entire note)]

1914 2.15244 The Panama Pacific International Exposition. In: *Facts Gleaned From Everywhere* [section]. *The Woman’s Magazine*, 30(2)(August):6. ["One of those [concessions] already granted is to be operated by one of the big railway companies, and will show all the scenic beauties of the Grand Cañon of Arizona as viewed from an observation-car. This concessin will cost three hundred and fifty thousand dollars and some of the most noted scenic painters in the United States are engaged upon the canvases.” (entire note of pertinence)]

1914 2.22066 At the Exposition. *The Retail Grocers Advocate* (San Francisco), 19(33)(August 14):25. [Includes: "Eight beautiful standard gauge observation cars, specially constructed for the 'Grand Canyon of Arizona' at the Panama-Pacific International Exposition, have arrived on the Exposition grounds. 'The Grand Canyon of Arizona' is the $350,000 concession of the Santa Fe Railway, and in making the trip through it, visitors will be passengers on the big observation cars for half an hour." (entire note)]

1914 2.16259 Americans will tour at home in 1915. *The American Chauffeur*, 2(9)(September):249. [Notes in passing that motorists will be "able to reach the Grand Canyon over the road only after a struggle".]

1914 2.16727 [Delivery of observation cars to Panama-Pacific International Exposition.] In: *Travel Topics* [section]. *New York Topics and International Courier*, (September 12):8. ["Eight beautiful standard gauge observation cars, specially constructed for the 'Grand Canyon of Arizona' at the Panama-Pacific International Exposition, have arrived on the Exposition grounds. 'The Grand Canyon of Arizona' is the $350,000 concession of the Santa Fe Railway, and in making the trip through it visitors will be passengers on the big observation cars for half an hour." (entire item)]

1914 2.12892 B. of C. to take thrilling trip through Grand Canyon. *The Detroiter* (Detroit Board of Commerce), 6(2)(October 12):3. [Kolb Brothers film presentation scheduled for November 7.]

1914 2.15618 B. of C. to give lecture course of six numbers; entertainment announces star program; only 1200 can purchase tickets. *The Detroiter* (Detroit Board of Commerce), 6(3)(October 19):1-2. [See p. 1: "Nov. 7—'Shooting the Rapids of the Grand Canyon of Arizona.' KOLB BROTHERS. Lecture by EMERY C. KOLB.”; and synopsis, p. 2.]

1914 2.15620 B. of C. lecture course tickets selling rapidly; season books in demand; 1200 limit make early reservations necessary. *The Detroiter* (Detroit Board of Commerce), 6(4)(October 26):3. [Includes notices of Kolb lecture.]

1914 2.15621 Kolb Brothers’ [sic] to arrive at B. of C. on Saturday. *The Detroiter* (Detroit Board of Commerce), 6(5)(November 2):1, 7. [Lecture notice.]

1914 2.15622 Champ Clark is next on B. of C. lecture course. *The Detroiter* (Detroit Board of Commerce), 6(7)(November 16):2. [Item includes note, “One number of the Board of Commerce lecture course has come and gone and it was a pronounced success, over one thousand, members of the board and their families, being on hand to hear Emery Kolb tell of his wonderful trip through the Grand Canyon.” (entire note of pertinence; punctuation thus)]

1914 2.14771 An Indian artist. *Santa Fe Magazine*, 9(1)(December):32. [Lone Wolf, a Blackfeet Grand Canyon painter.]

1914 2.14775 Foraging their way. *Santa Fe Magazine*, 9(1)(December):40. [Miss Margaret Geist of Germany, and burro, “Jerry”, registered at El Tovar during their cross-country trip, New York to San Francisco, a stunt (with conditions) promoted by a syndicate of German newspapers.]

1914 2.16712 Rising-sun medicine. *Medical Council* (Philadelphia), 19(12)(December):472-474. [See p. 473: “Combating [Easterns’ contracted views of landscape size] is as hard as trying to get a New Jersey man to believe the Grand Cañon of Arizona is as big as it actually is. Show it to him, and he still won’t believe you.” (entire note)]

1914 2.17496 Road signs to mark way to Pacific fairs. *Popular Mechanics Magazine*, (December):886. [Routes to expositions in San Diego and San Francisco. “The trail will lead through the Grand Cañon [sic], desert and mountainous country, Indian settlements, and other interesting and picturesque places.”]

1914 2.19437 Indian life to be shown at exposition. *The California Outlook*, 17(26)(December 26):22. [Santa Fe Railway “Painted Desert” exhibition at the San Diego Exposition. Includes: “What promises to be a fit match to the Santa Fe exhibit at San Diego, is the ‘Grand Canyon of Arizona’ concession of the same road at the Panama-Pacific Exposition in San Francisco.” (entire note)]

1914 2.107 Tries to “wheel” across Grand Canyon. *The Arrowhead* (Magazine of Western Travel and Development) (San Pedro, Los Angeles & Salt Lake Railroad, Industrial Department, Los Angeles), __________. [Probably by Supervisor Pelton of Kaibab]

1915 2.16231 Last call for the N. R. M. D. A. convention. *American Stone Trade*, 15(1)(August 1):10-12. [National Retail Monument Dealers’ Association.] [See p. 11: ”Every delegate who goes to Denver should arrange to continue his trip and visit the two great fairs by going to California and taking in the great world wonders in between Denver and the Pacific coast, such as the Grand Canyon of the Colorado river in Arizona, which is really greater than any of the sights that can be seen at either of the fairs.” (entire note)]

1915 2.16206 Rounding out the plans for the 1915 convention; the San Francisco meeting to be the most noteworthy in the history of the industry; complete itineraries—cost of the tours—a series of conventions. *Aera* (American Electric Railway Association), 4(1)(August):28-34. [Note in itineraries, stops at Grand Canyon, pp. 31, 33.]

1915 2.18422 Are you going to miss the California fairs? In: The Retailer's Reading Room [section]. The St. Louis Lumberman, 56(4)(August 15):48-49. [See p. 49, section, "See Panama and the Grand Canyon", regarding exhibition at the San Francisco fair. "If you go and have not been to Panama or the Grand Canyon, don't miss these, for they are the most instructive on the amusement way." (entire note) Item signed, "The Lumber Doctor."]

1915 2.17676 The N. E. C. A. fifteenth annual convention. National Electrical Contractor, 14(10)(August):38-40. [See p. 38: "The trip across New Mexico and Arizona was enjoyed, and Wednesday morning early the train reached the Grand Canyon. Most of the passengers arose at four o'clock to see the sun rise on the canyon. They were well repaid for their efforts, and here one of the most wonderful sights was witnessed. Wednesday was spent at the canyon, some of the party going down the trail on mules and others taking the rim drive around the canyon." (entire note)] [National Electrical Contractors' Association of the United States.]

1915 2.17677 Some bright lights as we saw them. National Electrical Contractor, 14(10)(August):46-47. [Includes note, and caricature cartoon, pertaining to visit to Grand Canyon en route to convention of National Electrical Contractors' Association of the United States.]

1915 2.17679 Mule to climb ladders? In: Sparks from the N.E.C.A. Convention [section]. National Electrical Contractor, 14(10)(August):138. [Anecdote regarding L. H. Woods during visit to Grand Canyon by National Electrical Contractors' Association of the United States: "L. H. Woods of New York City, President of the New York State Association of Electrical Contractors, made the trip down the Bright Angel Trail at Grand Canyon on a mule. He was so well pleased with the success of the mule climbing the 'Devil's Corkscrew' he remarked, 'That mule can climb anything. I'm going to buy him to carry me up twenty-story ladders on new buildings in New York City.' You New Yorkers watch out for the new form of elevator." (entire item)]

1915 2.17682 Director from Ohio wired El Tovar Hotel. National Electrical Contractor, 14(10)(August):150. [National Electrical Contractors' Association National Director M. G. Buchan of Cleveland, Ohio, supervised electrical work at El Tovar in 1904, installing "engines, generators, switchboard wiring and fixtures". Notes that "fixtures were made out of logs cut from the forest immediately surrounding the hotel"];]
1915 2.17683 Exchange photo department. *National Electrical Contractor*, 14(10)(August):152. [Includes note: "The camera men took photographs of the Grand Canyon in every conceivable way, and, in fact, all along the road the click of the camera was heard constantly." (entire note) Also refer to Item 2.17677.]

1915 2.21338 California is calling. *Geyer’s Stationer* (New York), 59(1500)(August 5):10. ("From Standard for July.") [Notes exhibits at the San Francisco world exhibition, in part as promotional for the convention of the National Association of Stationers and Manufacturers. The exhibit noted is the Santa Fe Railway’s (not credited by name) exhibition. "In a Pueblo Indian village covering five acres of ground one may see Navajo hogs, Hopi kivas—blanket weavers, silversmiths and basket makers at work. The Grand Canyon itself has been brought to this marvelous exhibition of wonders. The steep, winding trails, the clouds and the magnificent effects of color and distance are presented with startling realism." (entire note)]

1915 2.17646 The Santa Fe Railroad. *School Music* (Keokuk, Iowa), 16(76)(September):31. [Santa Fe Railway appreciation piece, with promotional passage about Grand Canyon: "In particular on the Santa Fe line is the greatest single view in the Universe. No one has ever adequately [sic] pictured the Grand Canyon of the Colorado. No pen picture can possibly be drawn that will lead the imagination to conceive such an exhibition of immensity. It cannot be compared with other sights as there is no other place like it in all the world." (entire note)]

1915 2.17661 The railways and the California expositions; first of two articles on the preparations made by the roads, attendance, passengers carried and exhibits. *Railway Age Gazette*, 59(11)(September 10):461-464. [See p. 463: "The Grand Canyon on this line [Santa Fe] was also an added attraction, and during July and August three trains a week were run directly to the Canyon in each direction. On some days as many as 1,500 people visited the Canyon, the average for July being 575 a day, requiring the installation of temporary facilities, such as tents and parking cars." (entire note directly mentioning Grand Canyon)]

1915 2.17164 On the Pacific Coast Special. *In*: News of the Engineering World [section]. *Engineering News*, 74(13)(September 23):621-622. [Train excursion to San Francisco. See p. 621: "The train arrived early Tuesday morning at the Grand Cañon of the Colorado River, and the visitors had the entire day to view this indescribable wonder." (entire note)]

1915 2.18203 West’s scenic splendors enliven trip to International Congress. *In*: News of the Week [section]. *Engineering Record*, 72(13)(September 25):398. [The "Engineers’ Special", New York to San Francisco, for the International Engineering Congress. "At the Grand Canyon more than one-third of the party, including some ladies, showed their mettle by taking the trip down the Bright Angel trail, a very fatiguing descent of a mile to the river." (entire note)]

muleback or horseback down the Bright Angel trail, while others took the Hermit Run [sic] drive and the auto ride to Grand View." (entire note)]

It’s a Hudson that inspires “Smatter Pop”. The Hudson Triangle (Hudson Motor Car Co., Detroit), 8(2)(July 15):[4]. [Regarding C. M. Payne, the creator of the “Smatter, Pop?” comic strip, a Hudson Super-Six owner. Principally about the family’s return from Oraibi to Flagstaff and crossing the flowing Little Colorado River. Also notes his plan to drive a new Hudson speedster “from southern Nevada into Utah, down into Arizona, and east on the north side of the Grand Canyon . . . .” See also Item no. 2.19107 (Anonymous, 1918).]

Grand Canyon to remain open. In: General News Section. Railway Review, 63(12)(September 21):447. [The Atchison Topeka & Santa Fe announces that El Tovar Hotel and the Bright Angel Camp annex will remain open for the fall and winter season as heretofore. Transportation facilities on the trails and along the rim will also continue. This hotel is practically the only point at the canyon accessible to tourists.” (entire item)]

To study our national parks. Motor Travel, 10(5)(October):30. [National Parks Educational Committee. Includes note of Congressional proposal to create Grand Canyon National Park, in passing.]

When your lives depend on it—use a Hudson. The Hudson Triangle (Hudson Motor Car Co., Detroit), 8(7)(November 18):[4]. [Regarding C. M. Payne’s tour in Arizona, as reported in the Los Angeles Examiner. “Next year we are planning on a trip along the north rim of the Grand Canyon, crossing the Colorado at Lee’s Ferry . . . .” (entire note) See also Item no. 2.19106 (Anonymous, 1918).]

Report of trans-continental map-making tour. Aerial Age Weekly, 8(15)(December 23):756. [U.S. Army, Division of Military Aeronautics. Five-plane squadron under Maj. Albert D. Smith, departed San Diego; one plane damaged at “Ellentro” [El Centro, California], the remaining plans flying over Colorado Desert and followed Southern Pacific Railroad to Yuma and into Arizona.]

1919 2.22036 Grand Canyon highways; construction of roads through Arizona’s great park seems assured [sic]. Western Highways Builder (Los Angeles), 1(2)(February 15):15.

1919 2.19591 Leave for Grand Canon. El Palacio (Santa Fe, New Mexico), 6(8)(March 29):125. ["Hudson Bridge, a young St. Louis artist, and his mother, Mrs. Hudson Bridge, who came to Santa Fe several days ago because O. E. Berninghaus of the Taos Society of Artists, urged them not to miss this city, left last evening for the Grand Canon." (entire item)]

1919 2.14415 [Lt. Chase V. Rugh flight.] *In: Along the Trail* [section]. *Santa Fe Magazine*, 13(5)(April):78. ["Lieut. Chase V. Rugh of the gulf-to-the-Pacific aero squadron on February 25 performed the hazardous feat of flying inside the walls of the Grand Cañon of Arizona. The day was calm and no dangerous air currents were encountered. He did not observe any emergency landing places in the cañon, he reported." (entire item)]

1919 2.22039 Arizona’s action brings Canada and Mexico lines closer together. *Western Highways Builder* (Los Angeles), 1(5)(April 12):3. [State legislature votes for, and governor approves, funding to build "a bridge over the Colorado River and a road through the 4000 square miles in its trans-canyon county of Mohave".] [Grand Wash.]

1919 2.22041 Salt Lake-to-Phoenix in two days may not be far off. *Western Highways Builder* (Los Angeles), 1(6)(April 26):8-9. [Regarding a link between the Arizona section of the Arrowhead Trail in Mohave County with the proposed highway from Salt Lake City to St. George, Utah, via a bridge over the Colorado River at Grand Wash.]

1919 2.18396 [Frank R. Speck.] *In: In College Halls* [section]. *The Ohio Teacher*, 39(10)(May):394. ["Mr. Frank R. Speck, secretary of the Y. M. C. A. at Ohio University, and formerly supervisor of music in the New Philadelphia schools, has accepted a postion as Lookout in the Grand Canyon in Arizona, in the U. S. Forestry Service. He left about May 1." (entire note)]

1919 2.22043 Yuma apprently certain to be on Borderland Route to coast. *Western Highways Builder* (Los Angeles), 1(7)(May 10):12.

1919 2.22047 Four trunk roads to be built in northern part of Baja California. *Western Highways Builder* (Los Angeles), 1(8)(May 24):20.

1919 2.21892 Aviation. *In: General News Department*. *Railway Age*, 66(22)(May 30):1336. [Includes note: "On May 27, four airplanes of the War Department completed a cross country flight of 3,300 miles from Texas to the Pacific Coast and return. These fliers, for considerable distances, made speeds of 140 miles an hour and higher. Two of the airplanes flew over the Grand Canyon. One of these flew at an altitude of 13,000 ft., while the other flew down into the Canyon, about 600 ft. below the edge." (entire note)]

1919 2.13641 End 3,300-mile flight from Texas to Pacific. *In: The News of the Week* [section]. *Aerial Age Weekly*, 9(13)(June 9):627-628. [Includes notes of Lts. R. O. Searle and E. D. Jones flight over Grand Canyon at Diamond Creek; and Lt. Charles Rugh and Mr. Louis Lewyn, motion picture photographer, flight into canyon.]

1919 2.21508 An echo of the Greeters’ excursion. *The Hotel Monthly*, 27(August):74-75. [American Greeters organization. “It was a pretty hot ride thru Needles, but more comfortable as the high plateau of Grand Canyon was reached. The party spent a day at El Tovar. Some took the Bright Angel trail to the river; others made excursions on the rim. Manager Chas. A. Brandt of El Tovar, whose religion is the canyon, explained the wonders of this very wonderful place.” (p. 74) See also p. 75, menu, “Typical American plan dinner $1.50 at El Tovar, Grand Canyon, Ariz.”]

1919 2.19592 [Gift acknowledgment.] *In: Acknowledgments* [section]. *El Palacio* (Santa Fe, New Mexico), 7(3)(August 15):53. [“By Albert L. Groll. Three color drawings of Laguna and Grand Cañon.” (entire note)]

1919 2.22049 Gov. Campbell gets a good feed at Williams, but Williams gets his ear. *Western Highways Builder* (Los Angeles), 1(19)(November 8):23. [“On his return, with other state officials, form hobnobbing with King Albert of Belgium at Grand Canyon, Governor Campbell got a good feed here, but in return, Williams got the governor’s
ear. Possible routes to Grand Canyon National Park, and the Williams-Clarkdale road, were discussed.” (entire item)]

1919 2.18219 Orders first native son Goodyears. *Motor West*, 32(3)(November 15):2. [Douglas Fairbanks orders "the first set of Goodyear cord tires to come out of the new California plant of the Goodyear Tire & Rubber Co. He might mount them while doing a handstand or a few 75-miles-an-hour thrillers on the rim of the Grand Canyon.” (entire note)]

1919 2.12843 [Death of C. H. Hitchcock.] *The Friend* (Honolulu), 88(12)(December):271. ["After reaching the age of seventy he climbed the Bright Angel Trail, 6000 feet up, at the Grand Canyon in Arizona.” (entire item)]

1919 2.14945 King Albert's special. *Santa Fe Magazine*, 14(1)(December):55-56. [Special train conducted the king and queen of Belgium on cross-country tour. Grand Canyon noted in illustration, p. 55, and comment, p. 56. Comment includes note of presentation of medal to injured brakeman, L. H. Cochran, at Grand Canyon.]

1919 2.22050 Grand Canyon highway through Kanab forest in Utah has federal approval. *Western Highways Builder* (Los Angeles), 1(21)(December 6):22.

1919 2.22052 Forest projects approved. *Western Highways Builder* (Los Angeles), 1(22)(December 20):20. [Includes: "Grand Canyon highway, from a point south of Kanab, Utah, to Bright Angel Point on the edge of the gorge, 52 miles, at a maximum cost of $50,000, provided cooperation of Arizona is secured. Portions of the route are already built, and when completed an excellent automobile highway will be available.” (entire note)]

of the Apache tribes, the Hualpi and Yava-Supi Indians whose homes were near the Grand Canyon . . . .” (entire note)]

1920 2.21360 [New year’s message from the advertising department.] The Gas Record (Chicago), 17(1)(January 14):36. [Includes comment acknowledging receipt from “Bill Hutchinson for a Sprague Meter calendar showing the Grand Canyon in full bloom”. (entire note)]

1920 2.18205 Arizona, Salt River project. In: Current Comments [section]. Reclamation Record, 11(4)(April):156. [Members of Cleveland Chamber of Commerce visit to Chandler, Arizona. “One of the Buckey folks, holding aloft a fat sandwich in one hand a big slice of pie in another, remarked: ‘We came from the Grand Canyon, and left there with the opinion that we had witnessed the most wonderful sight of our trip. We have just left the Roosevelt Dam and must say that we are compelled to change our minds, as the big reservoir is the most wonderful thing we have seen.’”]

1920 2.19147 The newest national park; the Grand Canyon. Outing, 76(1)(April):38. [Written in the first person but not signed.] cited=GCNHA Monograph 2: page 100
[cited=GCNHA Monograph 8: page 7-7]

1920 2.14947 Grand Canyon dedicated. Santa Fe Magazine, 14(6)(May):48. [Dedication “will take place on April 30.”]

1920 2.15371 The unsightly billboards. The Pottery, Glass and Brass Salesman (New York), 21(17)(May 27):20-21. [See p. 21: “The billboard men would outrage the Palisades, the Niagara Gorge and the Grand Canyon if they had the chance.” (entire note)]

1920 2.19511 Automobilist displays scenic record of trip. Illustrated World, 33(4)(June):627-628. [Unidentified automobilist traveled from Los Angeles to Albuquerque and return. “On the surface of the car a map was made of the routes, and pictures in color were painted to depict various spots of historic or scenic interest along the route.” Notes Grand Canyon, in passing. One side of automobile is illustrated in article.]

1920 2.14946 Grand Cañon formally dedicated as a national park. Santa Fe Magazine, 14(7)(June):35-38. [Ceremonies at Grand Canyon.]

1920 2.21768 A great railroad and a wonder valley; Imperial’s inception and development linked with the Southern Pacific in dramatic fashion. Southern Pacific Bulletin (Southern
The key view of the Grand Canyon. *The Nation’s Parks* (National Parks Association), no. 1 (Summer):12. [Navajo Point, or Desert View.]

[Note of Grand Canyon-flight crew members.] In: *Kelly Field Notes* [section]. *U.S. Air Service*, 3(6)(July):30. ["Sgt. 1. Cl. Albert T. Vierra has been ordered to Mitchel Field, Long Island, N. Y., for duty in connection with the Seattle-Alaska Flight. Lieut. Eric Nelson, who has already reported there for duty with this flight, and Sergeant Vierra were members of the flight which flew from Ellington Field last year en route to the Pacific coast, through the Grand Canyon and returning two months later." (entire item)]

Money appropriated for roads in Arizona. *National Sand and Gravel Bulletin* (National Association of Sand and Gravel Producers, Indianapolis, Indiana), 1(9)(July):17. ["Nearly $11,000 has been appropriated by Mojave County, Arizona, for constructing a road through Short Creek Canyon which will greatly improve roads from St. George and Zion National Park to the Grand Canyon, said C. H. Bigelow [sic, Bigelow], Secretary of the Arrowhead Trail Association, who is stopping in Salt Lake. An appropriation of $11,000 has also been made for the improvement of the road from Littlefields [sic] to Mesquite, on the Arrowhead trail to be spent on a distance of about eight miles." (entire item)]

[Editorial note introducing "His Wonders to Perform" by Lewis R. Freeman.] *Everybody’s Magazine*, 43(3)(September):60. [Editor notes: "Mr. Freeman is planning soon, by way of a little home diversion, to do the Grand Cañon in a row-boat, and a few other things like that; so for the sake of your future entertainment we’re going to keep an eye on him." Editor’s name not indicated in this volume.]

By-products of the trip; contributions of a fellow traveler. *The Mentor*, 8(16)(October):32-33. [See in section, "What Is There To See?" (p. 33); anecdote of Grand Canyon.]

The great basin of the Colorado. *Journal of Electricity*, 45(8)(October 15):[352] [frontispiece for number]. [Oblique-view map of Colorado River basin with its own panel legend, "The Airplane A Necessary Tool in the Future Development of the West", and with text and insets that are mostly illegible at this scale. Map copyright and credit is illegible.] [This number includes several articles pertaining to aircraft use in the West, but none are specifically pertinent to the coverage of this bibliography.]

National Park dedication viewed in motion pictures and lantern slides at a presentation in the auditorium of the Eagle Building.

1922 2.14863 Water colors and the Brooklyn Museum. In: Notes [section]. American Magazine of Art, 13(2)(February):63-64. [Exhibition includes "Morning, Grand Canyon" by Herbert B. Tschudy (p. 64.).]

1922 2.16225 [Note.] In: In the Lifetime of K. U. Folks [section]. University of Kansas, Graduate Magazine, 20(5)(February):25. ["The Chicago Daily Tribune, for January 26, has a picture of James Albion Stolbert, ’11, making a leap across the chasm at 'Bright Angel Point' at the Grand Canyon of Arizona. Beneath is the brief story: 'HE CALLS THIS FUN! James Albion Stolbert, 117 Broadway, Wilmette, Ill., made this wild leap from Bright Angel Point at the Grand Canyon to amuse a few friends. If he had missed—". We dare say, if he had, the 'few friends' would not have been so highly amused.” (entire item)]

1922 2.21398 North Rim and the Kaibab; Emerson Hough sees the wonderland described in The Hotel Monthly two years ago. The Hotel Monthly, 30(February):24. [Notices a two-part article by Hough (1922) in Saturday Evening Post (see Item no. 2.3508.).]

1922  2.21399  A Harvey-Brant monument suggestion. *The Hotel Monthly*, 30(March):27. [Proposal for monuments to be placed on the rim of Grand Canyon, commemorating Charles A. Brant, former manager of El Tovar, and Fred Harvey.]

1922  2.16159  Fishing à la Grand Cañon. *In: Sense and Nonsense [section]. Saturday Evening Post, 194(41)(April 8):48. [Tale told by a "professional romancer" who is "[t]he newcomer" hired by the Santa Fe Railway, not identified nor with mention by name of John Hance. Tale pertains to Colorado River fish that swim backwards to keep the mud out of their eyes.]

1922  2.133  The Salt Lake City meeting. *Scientific Monthly, 14(6):587-588. [American Association for the Advancement of Science, annual meeting, announcement; including outline for "a symposium on `The Problems of the Colorado River.'"]

1922  2.13150  Takes railroad passengers to scenic points. *In: News of the Road [section]. Bus Transportation, 1(6)(June):356. [C. G. Parry will extend service from Lund to Marysville, Utah, to convey Denver and Rio Grande Western Railroad passengers from there to Grand Canyon [North Rim].]

1922  2.19798  Knabe with the Ampico scores with Dream Pictures. San Francisco delighted with showing of Branson De Cou’s remarkable pictures accompanied by the Ampico—Conn radio concert a great success—Morley Somers passes away. *Music Trade Review, 74(22)(June 3):24b. [Run of programs at the California Theater, displaying slide photos accompanied by pieces for "musical visualization". "Slides of 'The Grand Canyon of Arizona' are used to portray the magnificence of Rachmaninoff's 'Prelude in C Sharp Minor,' recorded by the composer." (entire note)]

1922 2.21370 The rubber urge. *Motor Truck* (Pawtucket, Rhode Island), 13(7)(July):378, 390-392. [See p. 390: “Wheter we went west along the well known routes of travel or toured as we did, into the very interior of Utah, in one case going to the north Rim [sic] of the Grand Canyon, 202 miles by highway away from [the] railroad, there was always motorized traffic passing in both directions, citizens in passenger cars, motor trucks, and motor busses.” (No other note of Grand Canyon.)]

1922 2.19057 [“Sunkist Trail” highway.] *Steam Shovel and Dredge*, 33(2)(August):109. [“The ‘Sunkist Trail’ is seemingly a fitting name for a proposed highway to connect Los Angeles, Cal., with El Pso, Tex., by the shortest practicable route. The project will embrace much new construction and will necessitate the building of an interstate bridge across the Colorado river at Blythe, Colo. [sic] many associations and business organizations have indorsed the new proposition and its completion seems assured.” (entire item)]

1922 2.14679 [George R. Beach hunting trip to Grand Canyon.] *In: Alumni Notes* [section]. *Columbia Alumni News* (Columbia University), 13(July)(33):516. [George R. Beach, ’95, departure for six-week hunting trip in “the Buckskin Mountains, on the north rim of the Grand Canyon, Arizona”, with guide Ambrose Means of Williams, Arizona, and “special permission to hunt and camp through the Grand Canyon Reservation.”]

1922 2.19350 A visitor from Cuba. *Office Applicances* (Chicago), 36(1)(July):43. [Notice of office visit by Pompilio Montero, traveling with the Rotarians. Travel in U.S. and Canada will include a stop at Grand Canyon (noted in passing).]

1922 2.19153 [David R. Lyon trip.] *In: Salt Lake City* [section]. *The American Printer*, 75(2)(July 20):64. [“David R. Lyon, manager of the Magazine Printing Company and secretary of the Franklin Club of Salt Lake City, spent ten days recently in Zion and Grand Canyon, southern Utah [sic], last month. The trip was made by auto and Mr. Lyon was accompanied by two of his sons.” (entire item)]

1922 2.17096 Side lights of the California meeting of the National Dental Association. *In: Orthodontic News and Notes* [section]. *International Journal of Orthodontia, Oral Surgery and Radiography*, 8(8)(August):534-. [See p. 535: “To the tired orthodontist who has made the long jaunt to California in search of both youth and knowledge there are only two things which remain a mystery in his mind. First those little animals, which they tell you about which make their residence in the bottom of the Grand Canyon and when you are bitten by them will not release their hold until it thunders . . . .” (entire note) [NOTE: Traditional folklore from numerous places suggest that certain animals will not release a bite-hold until it thunders (and/or other external influences); included among them are various lizards including the Gila monster.]

1922 2.21451 "Marooned". In: Correspondence [section]. *Locomotive Engineers Journal*, 56(10)(October):763. [Writer, signed "A Member.", forwards a letter from "a very prominent attorney in Topeka, Kansas", regarding a sensationalized picture published in the media of 94-year-old Melissa Wooden, in an "invalid chair", supposedly marooned in Seligman, Arizona, along the Santa Fe Railway due to an "unauthorized strike". The writer considers it a fine place to be stranded, with travelers fed free at the Fred Harvey eating house at this Santa Fe division point. Grand Canyon noted *in passing*.)

1922 2.17131 Engineers explore Colorado River canyons; expedition makes trips in small boats from above Utah-Arizona line to Needles. *Engineering News-Record*, 89(18)(November 2):762. [Birdseye expedition.]

1922 2.16781 Chicago. *American Art News*, 21(8)(December 2):9. ["The South Shore Country Club has added 'The Storm Spirit' a recent picture of the Grand Canon to is permanent collection." (entire note; artist not indicated)]

1922 2.17099 [Notes.] In: Personal—Highly Personal [section]. *Hettinger's Dental News* (Kansas City, Missouri), 5(9)(September):30, 36. ["Coming back from the National meeting, a number of the men took advantage of the opportunity to visit the Grand Canyon. Dr. E. B. Owen of St. Louis was debating the advisability of making the trip to the bottom, when he ran into Dr. C. O. Simpson, also of St. Louis who had just finished making the trip and who discouraged the contemplated trip and advised the cost was very exorbitant, namely—$166.00. The distance appeared to be but a stone's throw, in spite of the advice of the guides that the bottom was several miles below. Dr. Simpson explained that while he was required to put but $6.00 in circulation he had to put 160 in perspiration. We understand Dr. Owen 'saw the raise.'" (p. 30) "The meeting and experiences of Drs. Simpson and Owen at the Grand Canyon has been told elsewhere in these columns." (p. 36)]

1922 2.14868 Washington office. *Reclamation Record*, 13(10)(October):265. ["Director Davis was in the field the entire month. He reported a successful termination of his trip with others down the stretch of the Colorado River, during which the Grand Canyon was visited. From Flagstaff he returned to the river at points lower down, including Boulder Canyon . . . ." (entire note)] [Arthur P. Davis.]

1922 2.16210 Tremendous scenes in Fairbanks movie; so big they appalled director, who had to work up to them gradually. *Utah Payroll Builder*, 10(2)(February):22. [Regarding Douglas Fairbanks film on Robin Hood, but with the following quotation of director Allen Dwan, "... we felt much as we did when we went to the Grand Canyon several years ago to make scenes for 'The Modern Musketeer.' We didn't undertake to
photograph the canyon at once—its magnitude appalled us. It was so vast, so big. so we played around the corrals for the first few days, photographing scenes featuring the horses and mules. Finally we got up courage enough to take a crack at the canyon.” (entire note)]

1923 2.13738 Just like a man. Santa Fe Magazine, 17(5)(April):46. [Cartoon. Artist’s name illegible; copyright 1922 International Feature Service, Inc.]

1923 2.135 Grand and Marble canyons to be surveyed by engineers. Engineering News-Record, 90(April 19):725.

1923 2.17098 The National Old Trails Road, St. Louis to Los Angeles. Concrete Highway Magazine, 7(7)(July):165-167. [See p. 167, Grand Canyon; and lower Colorado River, in passing.]

1923 2.13732 Constance Talmadge’s latest comedy produced on the Santa Fe; interesting incidents attended the filming of “Dulcy,” soon to be released by producer Schenck. Santa Fe Magazine, 17(9)(August):30-32. [See p. 32, Talmadge’s comments on the Grand Canyon.]

1923 2.18721 Uncle Sam to tap bowels of earth; surveyors to test radio in canyon mile deep; party of ten geologists begins long journey from Arizona only with receiver. Radio Digest Illustrated, 6(7)(August 25):6. [Birdseye expedition. Not illustrated.]

1923 2.16209 [Note.] In: Alumni Notes [section]. Yale Forest School News, 11(4)(October):76. [*Ex-‘13. Bill Mace reports that the National Park Service has built a bridge across the Grand Canyon at the foot of Bright Angel Trail and he is going to arrange a reunion with Tom Reid some day at Phantom Camp at the bottom of the canyon.” (entire note)]

1923 2.18873 [Note.] Scenario Bulletin Digest (Universal Scenario Corporation, Hollywood, California), 9(8)(October):18. [Actresses “Pola Negri and Kathryn Williams vacationed at the Grand Canyon and elsewhere in a seeing-America-first tour.” (entire item; used as page filler)]
In Grand Canyon. *Radio Age*, 2(9)(October):4. [Birdseye Expedition. “The geological survey party carrying a radio set on a trip through the Grand Canyon of the Colorado, has arrived at Bright Angel trail. Notwithstanding the predictions of experts that it would be impossible to receive radio messages while in the bottom of Grand Canyon, Colonel Birdseye reports that he is in daily receipt of messages broadcasted from Los Angeles, Salt Lake and Chicago. He received the news of President Harding’s death within forty-five minutes after it occurred. Reports of his progress will be sent out for broadcasting when he reaches Diamond Creek, October 15.” (entire item)]

Picks up broadcasts deep in Grand Canyon; prediction of experts prove to be incorrect. *Radio Digest Illustrated*, 6(13)(October 6):3. [Birdseye Expedition.] [“Denver, Col.—The Geological Survey party carrying a Radio set on a trip through the Grand Canyon of the Colorado, has arrived safety at Bright Angel trail. Notwithstanding the predictions of the experts that it would be impossible to receive Radio messages while in the bottom of Grand Canyon, Colonel Birdseye reports that he is in daily receipt of messages broadcast from Los Angeles, Salt lake, and Chicago. He received the news of President Harding’s death within forty-five minutes after it occurred. Reports of his progress will be sent out for broadcasting when he reached Basstrail [sic], about September 10, Supai Creek, September 20, and Diamond Creek, October 15.” (entire item)]

News of Harding’s demise heard at bottom of canyon. *Radio Digest Illustrated*, 6(13)(October 6):7. [“Salt Lake City, Utah.—The wonders of Radio were never better illustrated than in a letter just received from tourists at the Utah State Capitol. The party, according to the writer, was camped on the Lower Grand Canyon of the Colorado where they set up their receiving set during President Harding’s illness, and were advised the same night of the death long before newspapers penetrated to their camp. They learned of the President’s death, in fact, forty-five minutes after it occurred. When the funeral cortege left San Francisco, they were also advised by Radio.” (entire item)] [Actually apparently a garbled reference to the Birdseye expedition; see Item no. 2.20613 (Anonymous, 1923).]

Five national monuments; this year’s new group includes Hovenweep and the wonderful spectacle at Bryce Canyon. *National Parks Association, Bulletin*, (35)(October 9):[6]. [Includes Pipe Spring, Arizona.]

Stands sea level test. In: From Our Chicago Headquarters [section]. *Music Trade Review*, 77(20)(November 17):38-39. [“An unusual testimonial to the desirability of the Gulbransen registering piano is seen in the group of photographs reproduced herewith. The Gulbransen here depicted has stood for four years 227 feet below sea level. ¶The instrument was purchased by Captain Davis, of Mullet Island, in the famous Salton Sea, California, form the Imperial Valley Hardware Co., Brawley, Cal., Gulbransen dealer, who sold it four years ago. Since that time it has been in constant use, played every day in the year on a dance floor. It is still in perfect condition, and has had no other shelter than the box in which it was shipped.” (entire item) Legend with grouped photos: “Capt. Davis and his Gulbransen 227 feet below Sea Level.”]

1938 2.19888 Boulder City, Nevada. *In: Here and There on the Desert. Desert Magazine*, 1(3)(January):22. ["Construction of a series of horseback trails in two of the highest peaks on the Nevada side of Boulder dam is to be started at once, according to the announcement of Guy Edwards, superintendent of the Lake Mead recreational area. Four new rangers and three naturalists are being added to the park service forces in this area. A coast-guard cutter is to be shipped from Honolulu and launched on the lake." (entire item)]

1938 2.19889 Phoenix, Arizona. *In: Here and There on the Desert [section]. Desert Magazine*, 1(3)(January):23. ["Discussing the recent scientific trip to the Shiva temple in Grand Canyon, M. R. Tillotson, superintendent of the national park there stated recently that there are a number of other ‘sky islands’ along the Colorado river which have not been scientifically explored. He mentioned the ‘Fish Tail’ plateau which is about 25 miles downstream from Shiva as one of these." (entire note)]

1938 2.16814 Department of Technical Training. *In: American Geographical Society [section]. Geographical Review*, 28(2)(April):318-319. [See p. 319: "In connection with the Grand Canyon expedition of the American Museum of Natural History the department was consulted to determine from the examination of aerial photographs the feasibility of climbing Shiva Temple and Wotan’s Throne, and a member of the staff was lent to the Museum to organize and take charge of the climbing work." (entire note)]

1938 2.19894 Boulder City. *In: Here and There on the Desert [section]. Desert Magazine*, 1(8)(June):31. ["St. Thomas, historic old Mormon settlement in the Moapa valley, will be submerged by the rising waters of Lake Mead early this summer, according to the estimate of government officials. The 11 inhabitants of the town already have left, and material worth salvaging is being removed from the old buildings." (entire item)]

1938 2.16222 America; millions of people set out to see their country. *Life*, 4(26)(June 27):24-32.

1938 2.19895 St. Thomas. *In: Here and There on the Desert [section]. Desert Magazine*, 1(10)(August):25. ["On June 11 Postmaster Rox Whitmore rose early and worked late, cancelling more than 4,000 letters from philatelists all over the United States, thus given them a St. Thomas postmark on the final day of the life of a postoffice in a ‘buried city.’ Then Whitmore moved out, the postoffice building was torn down by workmen who waded in the rising waters of Boulder lake. Hugh Lord, garageman, was last of the community’s residents to quit the historic Mormon settlement. he had planned to spend Saturday night there. But the water rose too fast, lapping around his bed. Lord set fire to his dwelling, climbed into a rowboat and departed. Now the town is completely submerged." (entire item)]

1938 2.19900 Seeks permit to operate boats on lower Colorado. *Desert Magazine*, 1(12)(October):17. [Charles Sturges of Yuma plans to run regular boat trips on the Colorado River between Imperial and Parker Dams.]
1938 2.19903 Buzz Holmstrom starts second trip down river. *Desert Magazine*, 1(12)(October):25. ["Buzz Holmstrom is at it again. This young Oregon filling station operator, only man to make a boat trip alone down the Colorado to Boulder dam, is on the river now with one companion, Amos Berg, their destination the Gulf of California, 1200 long, hard miles from their starting point on the headwaters of the Green river in the Wind mountains 150 miles north of the town of Green River." (entire item)]

1938 2.20628 Boulder Dam fete. *Broadcasting and Broadcast Advertising*, 15(9)(November 1):67. [Half-hour Columbia Broadcasting System live radio program, "Boulder Dam—Two Years Old—Speaks", broadcast transcontinentally from Boulder Dam via the high-tension powerlines to Los Angeles. Included sounds of spills (penstocks?) and men at work. "Announcers Cliff Howell, Frank Graham, Maury Webster and Don Forbes were stationed at strategic points along route of power transmission . . . ."]

1938 2.19904 Peach Springs. *In: Here and There on the Desert [section]. Desert Magazine*, 2(1)(November):38. ["Sparkling crystals cover the walls of Coconino caverns which are to be opened to the public as a scenic attraction early next summer. The caverns are located 14 miles east of Peach Springs near Highway 66. Under an agreement recently announced, the three owners have deeded the cave to Coconino county, but have retained for themselves a lease under which they will erect a lodge and cabin accommodations for visitors. The three men are Walter Y. Peck, Stanley Wakefield and Edmund R. Cosgrove." (entire item)] [Grand Canyon Caverns.]

1939 2.19907 Las Vegas. *In: Here and There on the Desert [section]. Desert Magazine*, 2(4)(February):35. ["Establishment of a boat factory in Las Vegas has been promised by O. C. Hull, president of the Hull-Kaymo Boat company. This will be the first industrial development in southern nevada resulting from formation of Mead lake [sic] behind Boulder dam." (entire item)]

1939 2.17688 Heirs to two Scandinavian thrones make their first visit to the U.S. Life, 6(19)(May 8):20. [In part reports the visit of Crown Prince Frederik and Crown Princess Ingrid of Denmark, who had during a western tour visited "Boulder Dam ('incredible')". (entire note)]

1939 2.183 Grand Canyon. In: Here and There on the Desert [section]. Desert Magazine, 2(8)(June):38. ["Congress has decided and President Roosevelt has agreed that Pima, an Arizona mule, is worth $125. The nation's chief executive signed a bill passed by the House and Senate, to pay to Fred Harvey Transportation company this amount for Pima, a jughead killed while packing supplies to a CCC camp in Grand Canyon. The FHT company had leased Pima to the national park service." (entire item)]

1939 2.19911 Grand Canyon. In: Here and There on the Desert [section]. Desert Magazine, 2(9)(July):35. ["Additions to hotels and new camp cabins at Grand Canyon will be built this summer. Enlargement of Bright Angel Lodge dining room and of the dining room at El Tovar hotel; construction of nine 4-room cabins in the camp grounds; new quarters for Indians at Desert View, and walks and paths around Bright Angel Lodge are planned." (entire item)]

1939 2.19912 Boulder City. In: Here and There on the Desert [section]. Desert Magazine, 2(9)(July):35. ["Score one for Hoover dam with amp publishers. Rand, McNally’s new map says: HOOVER DAM (BOULDER DAM). Since 1933 the company has used Boulder as the name of the project. Under either name, the dam is earning $300,000 monthly for Uncle Sam. Since 1936 $5,000,000 has been paid to the government for power." (entire item)]

1939 2.19913 Aged boatman makes run through canyon. In: Here and There on the Desert [section]. Desert Magazine, 2(11)(September):29. ["Seventy-four year old Bert Loper of Salt Lake City heaved a sigh of satisfaction when he moored his rowboat at the landing on Lake Mead behind Boulder dam last week in July. Loper had run the Colorado from Lee’s Ferry in 10 days, second section of a voyage started on the headwaters of the river. Spunky boatman thus realized his dream of 40 years.” (entire item)]

1939 2.16068 Boulder City. In: Here and there on the Desert [section]. Desert Magazine, 3(2)(December):43. ["Largest craft yet launched on Lake Mead has been added to the fleet there. After a journey from the California coast the 47-foot cabin cruiser owned by R. T. Schroeder of Beverly Hills now floats on the reservoir above Boulder dam [sic]. Schroeder said: ‘I was tired of cruising in heavy seas and rough water. So I decided to bring the cruiser here and enjoy the wonderful climate.’ Six boats were launched in the lake in one week.” (entire item)]

1939 2.19804 Music dealers who are doing things; the firm that makes Arizona musical. Presto Music Times (Chicago), (2291)(December):8-9. [Gene Redewill of Redewill’s, Phoenix. See p. 8, regarding his interest in flying: "But my present flying is low. This is on account of the results of an accident I had at the time of the dedication of Boulder Dam, by President Roosevelt. My plane burned and I got out of the ship a second or so too late.” See p. 9, list of compositions by Redewill; under "Orchestra" is listed “Grand Canyon of Arizona Concert Waltzes”, and, "Novelette: 'Grand Canyon of Arizona Waltzes'”.] [Also see Item no. 27.119 (E. R. Redewill).]

1940 2.19918 Yuma. *In: Here and There on the Desert [section]. Desert Magazine*, 3(9)(July):36. ["This is Hell,’ Lynn Jude, 49, prospector, scrawled these three words in the desert sand before he died of hunger and thirst in the barren Gila mountains 16 miles southeast of Yuma. A searching party in May found Jude’s body, nearby an empty canteen, and the message. The prospector’s automobile, tires flat, stood a short distance away.” (entire item)]

1940 2.19919 Grand Canyon. In: Here and There on the Desert [section]. *Desert Magazine*, 3(9)(July):36. ["From a light canvas boat Barry Goldwater of Phoenix in May gave a realistic broadcast by shortwave radio as his frail craft shot through seven and eight-foot waves of the Colorado river near Phantom ranch at the bottom of Arizona’s Grand Canyon. His broadcast was interrupted by circumstances beyond his control when he was forced to quit talking and bail for his life. It was a Ripley program. Robert L. [Ripley] described the gorge as capable of swallowing 100 Yosemites, a dozen Niagaras and the entire range of Swiss Alps, with room remaining to toss in all the armies of the world with their full equipment. Governor Jones went on the air to say the canyon is ‘greatest believe-it-or-not wonder of all time.’” (entire item)]

1940 2.8974 ". . . Dawson, Trip 2. 9,000 feet over Grand Canyon ..." From: Transportation—Journey by Plane [subseries]. *In: Visualized Curriculum Series*. Mankato, Minnesota: Creative Education Society, no. 82, 2 pp. [Ellipses are part of title.]

1941 2.19924 Yuma. In: Here and There on the Desert [section]. Desert Magazine, 4(5)(March):38. [Lone elderly woman who had lived for a quarter century along the Colorado River north of Yuma brought to this place where "she saw a paved highway for the first time in her life."]

1941 2.19926 Grand Canyon. In: Here and There on the Desert [section]. Desert Magazine, 4(6)(April):37. ["This story comes from the national park service: A Tennessee visitor to Grand Canyon found and gave to park officials a gold ring bearing the initials 'H. B. H.', a coat of arms and the inscription, '15 years of honorable service.' A park official on a trip to Seattle, Washington, showed the ring to jewelers, who identified it as the product of a New England firm, whose records showed it had been made for the head of a Philadelphia business. Pursuing this lead, park officials found the ring's owner was dead, but had a son living. To this son the ring was restored. It had been lost when the son fed a lump of sugar to one of the mules on which tourists ride down the long trail from top to bottom of the canyon. The mule snatched the ring from its feeder's finger." (entire item)]

[Written in the first person. See p. 4, observation from a visit to the Hoover Dam powerhouse.]

1942 2.194 Canyon train stopped. *In: Here and There on the Desert* [section]. *Desert Magazine*, 6(1)(November):37. [*Grand Canyon—Passenger train service over a branch Santa Fe railroad line from Williams to the north rim [sic] has ceased for the duration. The Arizona corporation commission recently granted the railroad's request to discontinue service when the company asserted that they needed equipment and train crews in main-line service and that travel to the canyon had dropped 77 per cent. Rail traffic to Grand Canyon last August was 1833, compared to 10,839 in August, 1941.}
Likewise automobile traffic was less than half as heavy as last June. Bus service will be continued by Santa Fe Trailways. (entire item) [cited=GCNHA Monograph 8: page 1-53]

River gives up body. In: Here and There on the Desert [section]. Desert Magazine, 6(3)(January):29. ["Kingman—The body of William Foster, drowned with an unidentified companion October 28 when a boat overturned in the Colorado river near here, was found about November 15 near Parker. The remains of Foster’s companion had been recovered several days earlier. Foster was an employee of the Forrester Milling and Mining company, now working the Ray Thompson property near Kingman."

Boat use limited. In: Here and There on the Desert [section]. Desert Magazine, 6(6)(April):29. ["Yuma—Civilian boats or surface craft will not be permitted to pass under Colorado river bridges during daylight hours without being carefully inspected for explosives or other demolition equipment, according to regulations announced by Brig. Gen. Thoburn K. Brown of the western defense command. Boats will not be permitted to stop under bridges and one will be permitted to pass during night hours."

Easter services to be broadcast. In: Here and There on the Desert [section]. Desert Magazine, 6(7)(May):29. ["Grand Canyon—At the Shrine of the Ages, overlooking the Grand Canyon, Easter Sunrise services were scheduled to be broadcast to the nation April 25, with Right Reverend E. L. Parsons, former Bishop of the Episcopal Church of California, delivering the sermon and the A Capella choir of Arizona State Teachers’ college of Flagstaff furnishing the music. J. Howard Pyle is to give a new and different picture of the Canyon from the floor of Havasupai canyon, by the only telephone line out of the Canyon’s depths."

North Rim accommodations. In: Here and There on the Desert [section]. Desert Magazine, 6(9)(July):30. ["Grand Canyon—Limited accommodations and meal services became available for visitors at the North rim June 1, according to H. C. Bryant, superintendent of Grand Canyon national park. Utah Parks company will provide cabins, meals and supplies to campers. Company buses will not be operated this year, but roads are in good condition."

New Colorado River record. In: Here and There on the Desert [section]. Desert Magazine, 7(3)(January):33. ["Boulder City—Harry Aleson, who has conducted many Colorado river boat expeditions, set a new record for upstream travel in November, when his party of three reached mile 218, between Diamond creek and Parashont wash. His companions were Ward Vickers and R. Moore, of Long Beach and the naval training unit at California Institute of Technology. Aleson, who hopes to go all the way..."
Suggests Yuma as seaport. *In: Here and There on the Desert* [section]. *Desert Magazine*, 7(4)(February):31. ["Phoenix—Dredging the lower Colorado river to create a seaport at Yuma was among economic developments of Arizona urged by Frank Pool, pioneer businessman, at Hiram Club in December. He pointed out that the Gadsden purchase by which Arizona acquired the area south of Gila river reserved to the state the use of the lower Colorado for navigation." (entire item)]

Head successor at Poston. *In: Here and There on the Desert* [section]. *Desert Magazine*, 7(5)(March):27. [Duncan Mills succeeds W. Wade Head as director of Japanese-American internment camp at Poston, Arizona.]

Travel over dam increases. *In: Here and There on the Desert* [section]. *Desert Magazine*, 7(5)(March):29. ["Boulder City—Travelers crossing Boulder Dam in December, 1943, exceeded by 2635 those who crossed in December 1942. Total for last December was 8883. Total for entire Boulder dam recreational area, which includes Boulder beach, Las Vegas beach, Pierce Ferry area, Eldorado canyon, Willow beach, Temple Bar and Overton district, was 10,247." (entire item)]

Family marooned on desert island. *In: Here and There on the Desert* [section]. *Desert Magazine*, 7(9)(July):30. ["Mr. and Mrs. Earl Evans and two tiny children" stranded by storm for two nights on Black Island, Lake Mead.]

1948 2.20327 New village for the Mohave. In: Here and There on the Desert [section]. Desert Magazine, 11(8)(June):32-33. [Lumber from barracks at Poston, Arizona, used for Mohave tribe construction west of Needles, California, following inundation of homes after the construction of Parker Dam.]

1948 2.20071 Up the Colorado. In: Here and There on the Desert [section]. Desert Magazine, 11(10)(August):36-37. ["Boulder City—Four men—a Mr. Hudson and his son Edward of Paso Robles and otis Marston and Willie Taylor of Berkeley—were to attempt to run the Colorado river from Lake Mead upstream to Lee’s Ferry in June in a 19-foot cruiser, Esmeralda II, powered with a 75 h.p. marine engine. In 1944 Hudson attempted the voyage, but low water blocked the effort. This June a stage of 70,000 to 80,000 second-feet, higher than when any previous boat trip has been made on the river, is expected. Twenty days were allotted for the 345 mile trip and gasoline was cached by pack train and Indian packers at the head of Lake Mead, Diamond creek, Havasu creek and Grand Canyon.” (entire item)]

1948 2.20074 Flood in Bright Angel. In: Here and There on the Desert [section]. Desert Magazine, 11(12)(October):27, 29. ["Bright Angel Lodge—The North Rim of the Grand Canyon was without electric power, water and sewage after a violent storm on August 6 sent water cascading down Bright Angel canyon. The flood washed out 240 feet of the penstock of the Utah Parks company hydroelectric plant. The lodge and cafeteria were closed to the public until repairs could be made on the plant. Kaibab trail from the North Rim and Bright Angel trail from the South Rim were washed out.—Gallup Independent.” (entire item)]

1956  2.20637  Stations get quick details on Grand Canyon disaster.  *Broadcasting, Telecasting*, (July 9):68.  [Air crash.]

1956  2.20415  To acquire customs house.  *In: Here and There on the Desert* [section].  *Desert Magazine*, 19(8)(August):28.  [City of Yuma to take over old U.S. Customs House. Item credited to *Yuma Sun.*]

1956  2.20416  Base name changes.  *In: Here and There on the Desert* [section].  *Desert Magazine*, 19(8)(August):28.  [Yuma Air Base will be renamed Vincent Air Force Base. Item credited to *Yuma Sun.*]

1956  2.20417  Air tragedy memorial.  *In: Here and There on the Desert* [section].  *Desert Magazine*, 19(9)(September):28.  ["A drive is underway in Coconino County, spearheaded by Flagstaff’s radio station KCLS, to erect a large copper table memorial to the 128 persons who lost their lives in the air tragedy over the Colorado in late June. Plans call for the tablet to be inscribed with a brief account of the tragedy and the names of the victims.—*Northern Yavapai Record.*" (entire item) *Grand Canyon air crash.*]

1956  2.20418  Test tower constructed.  *In: Here and There on the Desert* [section].  *Desert Magazine*, 19(9)(September):28.  [Site location team from the National Science
Foundation at Fries Peak, Hualapai Mountains, to erect a test tower for the possible location for the world's largest solar observatory. Item credited to Mohave Miner.

1956 2.20419 Colorado River lands restored to public entry. Desert Magazine, 19(10)(October):32. [230,000 acres on west side of Colorado River, reserved for possible use in reclamation projects, restored to the public domain. Item credited to Indio Date Palm.]

1956 2.242 Peterson and Masland on the lecture program. Frontiers (Academy of Natural Sciences of Philadelphia), 21(2)(December):60. [Frank E. Masland, Jr.]

1957 2.20626 SDX selects eight for radio-TV awards. Broadcasting, Telescasting, (April 22):44. [Sigma Delta Chi awards include one to Edward (Johnny) Green of KPHO Phoenix for
his coverage of the June 30, 1956, airliners crash in Grand Canyon. Photo of Green included.]

1957 2.20577 Plans new canyon trail. *In: Here and There on the Desert* [section]. *Desert Magazine*, 20(6)(June):29. ["Grand Canyon—D. F. Hamblin of Kanab, Utah, operator of a guide service and lodge on the north rim of the Grand Canyon, reported that he is planning to make a new trail to the bottom of the canyon. The proposed trail would take off from the South Saddle Mountain.—*Southern Utah News*". (entire item)]

1957 2.8635 They go to work in a bucket. *Arizona Days and Ways* (Arizona Republic), (June 9):6-11.

1957 2.20579 Gulf seaport talk hit. *In: Here and There on the Desert* [section]. *Desert Magazine*, 20(8)(August):31. ["Washington, D. C.—Periodic careless talk about a possible U. S. port on the Gulf of California hurts U. S.-Mexican relations, James Minotto of Phoenix and former mutual security administrator in Portugal, told a senate foreign relations panel. He said the Mexican people regard such talk as we would the Mexican government's asking for the purchase of a port like San Diego. In 1955 Arizona created a committee to study the establishment of a seaport in the vicinity of Yuma.—*Phoenix Gazette*" (entire item)]

1957 2.20580 Glen Canyon city planned. *In: Here and There on the Desert* [section]. *Desert Magazine*, 20(8)(August):33. [Rincon Builders and Developers, of Tucson, plans to build town for 10,000 persons in Utah 13 miles northwest of the Glen Canyon damsite, to be known as "Glen Canyon".]

1957 2.20581 Visitor center dedicated. *In: Here and There on the Desert* [section]. *Desert Magazine*, 20(9)(September):30. ["Grand Canyon—Formal ceremonies marked the opening of the Grand Canyon National Park's Visitor Center located just east of Grand Canyon village. The building will serve as an information center and will contain exhibits of the area's Indian neighbors, history, wildlife, plant life and geology. The center will also house the Park's scientific collections and a library pertaining to the area.—*Northern Yavapai Record*" (entire item)]

1957 2.20588 Cibola bridge span removed. In: Here and There on the Desert [section]. Desert Magazine, 20(12)(December):29. [Blythe—Cibola Ferry, Inc., builders of a 400-foot bridge across the Colorado River without permission of federal authorities, have removed a section of the bridge in order to allow boats enough clearance to pass. The bridge builders plan to make the span removable and are seeking approval of the U.S. Army Engineers to turn the removable section into a drawbridge.—Yuma Sun” (entire item)]

1958 2.255 Glen Canyon . . . from the moving highway of the Colorado. *Sunset*, (March):26, 29, 31-32. [Ellipsis is part of title.]

1958 2.20683 Cibola bridge change denied. *In: Here and There on the Desert [section]. Desert Magazine*, 21(4)(April):29. [U.S. Army does not allow owners of illegally built bridge at Cibola to modify the structure. Item credited to *Yuma Sun*.]

1958 2.20688 Cibola bridge modified. *In: Here and There on the Desert [section]. Desert Magazine*, 21(6)(June):33. [Illegally built bridge over Colorado River south of Blythe has been modified. Item credited to *Palo Verde Valley Times*.]

1958 2.20690 Mead most popular park. *In: Here and There on the Desert [section]. Desert Magazine*, 21(7)(July):33. [“Lake Mead—The Lake Mead National Recreation Area—with its feature attraction of Hoover Dam—is the most visited park area in the nation. During the record year of 1957, a total of 2,955,257 tourists visited the dam and lake.—*Pioche Record*”. (entire item)]

1958 2.260 [Note on length of exposed color film possibly encircling Earth ten times.] *Arizona Highways*, 34(12)(December):[22].

1959 2.20702 Old bridge sold. In: Southwest News Briefs [section]. *Desert Magazine*, 22(3)(March):30. [Little Colorado River bridge at Cameron will be used to support the Four Corners Pipe Line.]

1959 2.20337 Frogmen ride Colorado River. In: Today’s Navy [section]. *All Hands* (U.S. Navy, Bureau of Naval Personnel), (512)(September):35. ["A fleet of seven IBS's (Inflatable Boats, Small"), manned by 35 Navy frogmen, has completed a 250-mile trip down the Colorado River." Members of Pacific Fleet Amphibious Force’s Underwater Demolition Team Twelve paddled in five days from Needles, California, to Yuma, Arizona, "as a survival problem." Five portages at dams. Dates not indicated, but "Temperatures above 100 degrees" indicated.]

1959 2.262 Wild fight with a river. Life, 47(14)(October 5):61, 63-64, 66, 68. FQ22:430I

1959 2.19768 The quest for the lost ship. In: Weight, Harold O., Lost ship of the desert; a legend of the Southwest. Twentynine Palms, California: Calico Press. [Items from the San Bernardino Guardian, September 10, 1870, December 31, 1870, January 14, 1871.] [Relates to the legendary Spanish-era pearl ship said to have been stranded in the Salton Sea.]

1959 2.19772 The desert ship. In: Weight, Harold O., Lost ship of the desert; a legend of the Southwest. Twentynine Palms, California: Calico Press. (From the San Bernardino Guardian, October 15, 1870, December 3, 1870.) [Relates to the legendary Spanish-era pearl ship said to have been stranded in the Salton Sea.]

1960 2.264 They said it couldn’t be done. Arizona Engineer and Scientist, 3(January):8-9. [Power line to Indian Gardens.] cited>GCNHA Monograph 8: page 1-53

1981 2.16285 The opening ceremony almost didn’t happen. In: McVeigh, Kerry, Highway builders; in 1931, Brice Covington headed up the crew that built the first road to the Hoover Dam site [feature]. Mohave (Supplement to Kingman Daily Miner and Mohave Valley News), 10(2)(June/July):8.  

1981 2.16286 The highway was called a "dream come true". In: McVeigh, Kerry, Highway builders; in 1931, Brice Covington headed up the crew that built the first road to the Hoover Dam site [feature]. Mohave (Supplement to Kingman Daily Miner and Mohave Valley News), 10(2)(June/July):9.  

1981 2.16287 The public was warned of the Prohibition law. In: McVeigh, Kerry, Highway builders; in 1931, Brice Covington headed up the crew that built the first road to the Hoover Dam site [feature]. Mohave (Supplement to Kingman Daily Miner and Mohave Valley News), 10(2)(June/July):10.  

1981 2.16288 The Miner praised Brice Covington’s work. In: McVeigh, Kerry, Highway builders; in 1931, Brice Covington headed up the crew that built the first road to the Hoover Dam site [feature]. Mohave (Supplement to Kingman Daily Miner and Mohave Valley News), 10(2)(June/July):11.  

1982 2.324 McKee honored. Geo News (Cornell University, Department of Geological Sciences), (Spring):. [Geologist Edwin D. McKee.] [cited=GCNHA Monograph 8: page 12-8]

1982 2.20892 Did you know? The Webb Spinner (Del E. Webb Corporation, Phoenix), 36(3rd Quarter):12. [Random facts pertaining to Grand Canyon and Colorado River, with a focus on river-running, and a slant to the Webb Corporation river trips.]

1983 2.20894 Webb groups react fast to high waters. The Webb Spinner (Del E. Webb Corporation, Phoenix), 37(3rd Quarter):9. [Del E. Webb Recreational Properties and Del E. Webb Hotels respond to rising water levels at The Nevada Club, to counter publicity that facilities were underwater due to lower Colorado River flooding.]

1983 2.17106 An insider’s guide to Arizona’s hot spots; erotic echoes from the Grand Canyon State. Cheri, (September):. [NOTE: Serial contains material for mature audiences (nudity).]

1983 2.20895 New railroad development. The Webb Spinner (Del E. Webb Corporation, Phoenix), 37(4th Quarter):5. [Del E. Webb Recreational Properties in agreement with Railroad Resources, Inc., “to develop and manage a proposed resort and scenic-railroad project from Williams, Ariz., along the Sant Fe’s old Grand Canyon line.” Resort proposed for Apex, near Grand Canyon Airport.]

1984 2.21865 October 27, 1983; On Safari Around 706 with Henry Moore #954; the program, Astrovision. Adventurers’ Club News (Adventurers’ Club, Los Angeles), 27(2)(February):6. [Report of program presentation about John Carroll, inventor of ”Astrovision” airborne filming. Notes, “A converted B-25 was used to take those phenomenal pictures [sic] of the Grand Canyon that were shown on the Todd wide screen and got such fantastic acceptance.” “706” refers to the Adventurers’ street address, 706 West Pico Blvd.; the number 954 refers to Moore’s membership number.]

1984 2.19655 Lake Mead employees received unit award. Courier (U.S. National Park Service), 29(8)(August):16-17. [Lake Mead National Recreation Area receives National Park Service Unit Award for Excellence in Service, for “protecting park facilities during the summer of 1983 when lake levels reached the highest point on record.”]
1984 2.332 Southwest news. *Hibernacle News*, 1984:[5]. [Item signed "Jane".]

1985 2.343 Sun, fun and games; a vast variety of sites beckons from coast to coast and beyond. *Ebony*, 40(7)(May):150, 152, 154. [Hoover Dam and Lake Mead, p. 152.]

1985 2.20558 Sho-Me shows 'em; Carl Regier and his 30 foot Malestrom cat show the largest fleet in the history of offshore racing the way around Lake Mead. *Powerboat*, (November/December):18-23.

1985 2.338 Southwest news. *Hibernacle News*, 1985:[7]. [Item signed "Jane".]

1986 2.346 Editor’s notebook; about a woman of the river. Wildwater, 7(2)(April/May):5. [About Georgie White.] cited=GCNHA Monograph 8: page 1-54

1987 2.19662 Sowing wild oats. In: E&AA Member Notes [section]. Courier (U.S. National Park Service), 32(8)(August):45-46. [“Children are children, even if they are the son and daughter of Horace and Grace Albright. E&AA learned of a time when Marian Albright Schenck and her brother, Bob, both very young, visited Grand Canyon with their parents. While in Verkamp’s Independent Store, the two children started turning the postcard stand faster and faster, until the cards flew off and literally covered the store. Our source did not go further!” (entire item)] NPS Employees and Alumni Association.

1987 2.19663 Grab-bag trivia. Courier, 32(8)(August):38 [questions], 47 [answers]. [Includes: Q: “What Grand Canyon animal ate the President’s salad in a Washington, DC, hotel and then died shortly thereafter? A: “A pet deer from North Rim, brought to Washington by Eivind Scoyen at Stephen Mather’s request (it didn’t die from the salad).” (entire note)]

Baird, Brian

2008 2.14895 Statement of the Hon. Brian Baird, a Representative in Congress from the State of Washington. *In*: *H.R. 3094, National Park Centennial Fund Act; and H.R. 2959, National Park Centennial Challenge Fund Act; Legislative hearing before the Subcommittee on National Parks, Forests and Public Lands of the Committee on Natural Resources, U.S. House of Representatives, One Hundred Tenth Congress, First session, Thursday, August 2, 2007; Serial No. 110-39*. Washington, D.C.: U.S. Government Printing Office, pp. 8-21. [See p. 19: "I do not know that we have mentioned the international appeal of our National Parks. If you go to almost any U.S. National Park, you will see people who have traveled the world to get here. I had the privilege of kayaking the Grand Canyon about 15 years ago. ¶There was a couple from East Germany, actually, who had a picture of the Grand Canyon above their breakfast table and had looked at it every single day for 35 years and had set money
aside. It was their dream to visit the Grand Canyon: 35 years, from a country pretty far away from us, to come visit a U.S. National Park, and that is the treasure. We have this opportunity.” (entire note)]

Baird, George D.

1906 2.16134 Picturesque New Zealand. *Western Field, 8*(April):167-177. [See p. 167: “But if your dreams give you no peace until you see the very earth open and display the grandeur of its appalling depths, then stand on the rim of the Grand Cañon of Arizona and tremble as the solid earth yawns beneath you.” (entire note)]

Baird, Spencer F.

1859 2.1247 Appendix to the Report of the Secretary. *Smithsonian Institution, Annual Report for 1858*, pp. 44-62. (U.S. 35th Congress, 2nd Session, Senate Miscellaneous Document 49.) [See in "Explorations Under the War Department": "2. Exploration of the Colorado river of California, under Lieutenant J. C. Ives, U. S. A.—Dr. J. S. Newberry, geologist and botanist, Mr. B. Mollhausen, artist and zoologist. Large collections were made in all departments on the Colorado and across to Albuquerque” (p. 50). (entire note)]

Baird, William Raimond

1914 2.14419 *Betas of achievement; being brief biographical records of members of the Beta Theta Pi who have achieved distinction in various fields of endeavor*. New York: Beta Publishing Co., 372 pp. [See John Willcock Noble, p. 236, Secretary of the Interior, 1889-1893, during which forest reservation policies were originated. Criticism "did not deter him from stretching his authority a trifle in order to preserve the banks of that greatest of our scenic wonders, the Arizona Grand Canon of the Colorado.” (entire note in this context)]

Baisley, Carrie

Baird, George D.

1906 2.16134 Picturesque New Zealand. *Western Field, 8*(April):167-177. [See p. 167: “But if your dreams give you no peace until you see the very earth open and display the grandeur of its appalling depths, then stand on the rim of the Grand Cañon of Arizona and tremble as the solid earth yawns beneath you.” (entire note)]

Beal, Richard S., Jr.

Beale, Charles E., and Gately, M. R.

Beale, Edward F.

no date 2.18191  *Wagon road——Fort Smith to Colorado River; letter of the Secretary of War transmitting the report of Mr. Beale relating to the construction of a wagon road from Fort Smith to the Colorado River*. [Ann Arbor, Michigan]: MLibrary, [Facsimile reprinting of University of Michigan Library’s holding of 1860 House of Representatives Executive Document 42. An on-demand publication. Copy received in 2013 included a multitude of blank leaves, enlargening the volume by fully two-thirds.]

1858 2.1370  *Wagon road from Fort Defiance to the Colorado River. Letter from the Secretary of War, transmitting the report of the superintendent of the wagon road from Fort Defiance to the Colorado River*.  *U.S. 35th Congress, 1st Session, House of Representatives Executive Document 124, Serial 959, 87 pp., map*. [Wagner and Camp (1982, p. 555) also cite, “Beale's five-page preliminary report, without the map, is included in the 35th Congress, 1st Session, Senate Document 43, Serial 922”; this is cited with Storm 215 with the inclusion, Senate Executive Document 43. Storm (1968, p. 35) also cites 35th Congress, 1st Session, House Executive Document 124, Serial 959. Storm 215 indicates, "The first title is the preliminary report of the reconnaissance and the second title is the final report, but the latter lacks the map. See Number 216 for a copy with map."]  FARQUHAR 20a HOWES B271 STORM 215, 216 WAGNER-CAMP 297

1858 2.1371  [Variant] *Wagon road from Fort Defiance to the Colorado River. Letter from the Secretary of War, transmitting the report of the superintendent of the wagon road*
from Fort Defiance to the Colorado River. *U.S. 35th Congress, 1st Session, House of Representatives Executive Document 124, Serial 959*, 87 pp., map. [Regarding this, Wagner and Camp (1982, p. 555) cite, "Beale's five-page preliminary report, without the map, is included in the 35th Congress, 1st Session, Senate Document 43, Serial 922"; this is cited with Storm 215 with the inclusion, Senate Executive Document 43. Storm (1968, p. 35) also cites 35th Congress, 1st Session, House Executive Document 124, Serial 959. Storm indicates, "The first title is the preliminary report of the reconnaissance and the second title is the final report, but the latter lacks the map. See Number 216 for a copy with map."] [cited=GCNHA Monograph 2: page 28 [under U.S. Department of the Interior]]

1860 2.1372 Wagon road—Fort Smith to Colorado River; letter of the Secretary of War, transmitting the report of Mr. Beale relating to the construction of a wagon road from Fort Smith to the Colorado River; March 9, 1860. *U.S. 36th Congress, House Document 42, Serial 1048*, 91 pp., map. [Note that Pestana (1972, p. 21; see Bibliographies) cites the authors as Beale and F. E. Engle; Wagner-Camp lists just as Beale.] [cited=GCNHA Monograph 2: page 28 [under U.S. Department of the Interior]]  FQ2:219  FQ3:250  WAGNER-CAMP 350

1929 2.18336 The report of Edward Fitzgerald Beale to the Secretary of War concerning the wagon road from Fort Defiance to the Colorado River; April 26, 1858; 35th Congress, 1st Session, House of Representatives, Ex. Doc., No. 124. *In*: Lesley, Lewis Burt (ed.), *Uncle Sam's camels; the journal of May Humphreys Stacey, supplemented by the report of Edward Fitzgerald Beale (1857-1858)*. Cabot, Ella Lyman

Cabrera, Paul Felix
1822 2.19143 Description of the ruins of an ancient city, discovered near Palenque, in the kingdom of Guatemala, in Spanish America: translated from the original manuscript report of Captain Don Antonio del Rio: followed by Teatro Critico Americano; or, a critical investigation and research into the history of the Americans, by Doctor Paul Felix Cabrera, of the city of New Guatemala. London: Henry Berthoud, 128 pp., plates. [See p. 81: "The bird, noticed in the Itinerary of Gemelli, shews that the cost which the Hivites took in their route to these islands; but, the arm of the sea observed by Torquemada in all the paintings of the same document, is not, and indeed cannot be, the Rio Colorada [sic] (red river) as Claviger and other authors have imagined, whose waters fall into the bay of California, which is the most considerable of all those northward of Mexico from whence it is pretended those nations came who first peopled the continent . . . ." 1921  2.17877  How Doheny got there; an intimate study of one of the most brilliant figures in the American oil industry.  The Magazine of Wall Street, 29(1)(November 12):40-42.  [Edward Laurence Doheny.  See p. 40: “One [little diversion] occurred in 1875, when Doheny was 19 years old.  He had joined a party of prospectors on a trip to the Grand Canyon.  This was seven years after Major Powell had made his historic trip down the Colorado River.  One day while a member of the party was being lowered over a cliff to look for indications of mineral the rope broke and the man fell to his death.  There was no way to recover the body because all the ropes in the party had been combined to make up the one that broke.  So the survivors [sic] went their several ways and
forgot the tragedy; that is, all but Doheny. He could do nothing at the time; but he
could, and did, return a year later with a companion, and had himself lowered over
the cliff and gave the skeleton a decent burial.” (entire note) NOTE: The man killed
was James Mooney, for whom Mooney Falls on Havasu Creek take their name.]

Notes, in passing, "John Van Dyke’s *The Desert, The Opal Sea, The Mountains*, and *The Grand Cañon of the Colorado*. Poetic in their conception, full of a sense of the presence of God although they make little mention of God, they arouse a feeling and reverence for and kinship with nature whose value to the story-teller cannot be estimated, for above all others the story-teller needs to have reverence and a feeling of kinship with nature and nature’s God." 1893  2.19527  Arizona.  In: Letters [section].  The Church At Home and Abroad (General Assembly of the Presbyterian Church in the United States of America, Philadelphia), 13(78)(June):457.  [Church minister from Flagstaff reports (mixing information): “This [Winslow] will be an important town in the near future.  A railroad is to be built from there to newly discovered coal fields, from which the railroad will get their supply of coal.  This road will be continued on to the Grand Canon of the Colorado, which is now attracting so many tourists.” (entire note)]

Colton, David D.

1876  2.16292  Statement of David D. Colton.  In: Hubbard, Gardiner G. (Chairman), Letter from the Chairman of the Special Commission on Railway Mail-Transportation, communicating, in obedience to law, the first part of the evidence taken.  U.S. 44th Congress, 2nd Session, Senate Miscellaneous Document 20, p. 75.  [“To great extent the steamers have carried the mail heretofore.  We expect to have our railroad [Southern Pacific Railroad] completed by the early part of 1877 to the Colorado River, in the vicinity of Fort Yuma, and that will undoubtedly give much better facilities for Arizona and all that section of the country than the conveyances can under the present arrangement.” (entire note)]

Condon, J. G.

1922 2.19223 Eastern railroad finds something to advertise; Baltimore & Ohio Railroad exhibits the refreshing aggressiveness of western roads of pre-war days. Printers' Ink, 118(12)(March 23):49-50, 52. [Article begins, "The Grand Canyon has been thoroughly sold to the people of the United States. It is something the Western tourist must see, and so large and important has that "must" become that other lines without a little old Grand Canyon nesting near their right-of-way have been hard put to find something just as good for the purchaser of Pacific Coast transportation. True, many of them have developed excellent attractions of their own, notably national parks of one sort and another, but no railroad traffic official will deny that one of the hardest things he has to buck in persuading a prospective passenger away from the Santa Fé and on to his own road is the popularity of the Canyon."
