One oft wonders if this Cañon were the real ‘city of gold,’ for the discovery and possession of which more than one continent wasted its blood and treasure.  It would take no great stretch of the imagination to fancy that the glittering and sparkling mica-bearing formations responding to the sun’s rays were houses built of gold.  The tradition of this city was not a dream.  Some one had observed something.  For want of better description the vision was called a ‘city of gold.’  Was this the end of the rainbow with is proverbial ‘pot of gold’?” (entire note)]

1954 2.20248 Just Between You and Me [column]. Desert Magazine, 17(9)(September):42. [Includes note on drought-induced low flows curtailing river trips. Notes, "The only chartered expedition to go through Grand Canyon was one piloted by Georgia White and her husband, 'Whitey.' They took three rubber life rafts with 10 passengers from Lee's Ferry to Boulder City in 21 days—making portages where there was not enough water to take loaded boats through the rocks exposed in the rapids." Also notes the potential for crop losses in Imperial Valley and lower Colorado River region were averted due to water storage in Lake Mead.] [Georgie White.]

1955 2.20260 Cattle ranch among the palms. (Map by Norton Allen.) Desert Magazine, 18(2)(February):9-11. [Cañon Palomar, Baja California, southwest of Laguna Salada.]

1956 2.20413 Just Between You and Me [column]. Desert Magazine, 19(7)(July):42. [Regarding the pending flooding of Glen Canyon. The writer encourages desert travelers to take the opportunity to visit the area, noting in addition to boatman guides from Hite on
the Colorado River and Mexican Hat on the San Juan River, "my old friend Art Green of Cliff Dwellers’ Lodge charters up-river excursions from Lees Ferry."]

1959 2.20707 Just Between You and Me [column]. Desert Magazine, 22(10)(October):42. [Includes comment that he is against Otis “Dock” Marston’s disuse of “River Rat” in favor of “Canyoneer”. He refers to Marston as “Doc” Marston.] [See also comments by Mary Beckwith (Item no. 2.20709) and Otis Marston (Item no. 2.20710) in 22(12)(December):28-29, and by Martin Vanderveen in 23(2)(February 1960):4-5 (Item no. 2.20725):]

1960 2.20739 Just Between You and Me [column]. Desert Magazine, 23(11)(November):38. [Includes remark pertaining to relocating the United Nations. He proposes locating it "on an isolated bluff on the North Rim of Grand Canyon", where delegates "would eat together in a big mess hall and sleep in bunkhouses with big picture windows"].

James’s companion fell into a delirium on arriving at the canyon, upon which James, "knowing that I had one of the very finest of the older weaves of Navaho blankets under my saddle, I rode a breakneck speed down the trail to the river, there held the four corners of my blanket, and filled it with water, and thus provided, hurried back to my suffering companion. With the water thus conveyed, I was able to save his life and we reached our camp in safety.”]

1848 2.19001 Steam-navigation to China. Addressed to the Hon. T. Butler King. *Southern Literary Messenger* (Richmond, Virginia), 14(4)(April):246-254. [Regarding a geographically confined "circle route" of transportation between Memphis, Tennessee, and Monterey, California. See p. 253: "... geodetically, practically and commercially it may be better to improve the navigation of the Rio Grande so as to ascend it by steam boats some 4 or 500 miles to the Paso del Norte or even further up, then cross over the Sierra to the head waters of the Gila, thence down that shallow stream with locks and dams to its junction with the Colorado—and thence to San Diego and the ocean. But seeing that practically with us it is not so easy to make navigable those rivers in the west which are not so, I do not expect ever to see this route successfully pursued or even seriously advocated." (entire note)] [Also see, parenthetically, remarks on Maury’s proposals by B. B. M., “Stars and Steamers”, *Southern Literary Messenger*, 14(6)(June):344-349, which are not directly pertinent to this bibliography.]

[See p. 26: "What confluence has most unsuccessful attempts? 36°N 112°W, Arizona, USA has 7 unsuccessful attempts due to its location in the Grand Canyon. This point is tempting for many visitors, who then fail 200m from the goal at almost vertical Coconino Sandstone." S.”, depicting a narrow roadway in a not particularly deep dry passage. The legend continues in contrived and mingled (mangled) fashion: “—Unapproached in magnificence are the cañons of Colorado, which for more than a thousand miles of length rise not less than from a thousand feet to twelve hundred feet in perpendicular cliffs; and the Grand Cañon, for more than two hundred miles, has no rocks less than four thousand feet high. At the junction of the Grand and Green rivers there is produced a flood believed to be equal in volume to Niagara. Meeting in a narrow gorge, more than two thousand feet deep, at the place where the cañons of Colorado begin, its waters dash on to the First Cataract, a descent made with a velocity truly awful, the rush checked here and there by rocks, thus forming whirlpools. Where the walls of the chasm approach more nearly, the haste of the flood is augmented to a speed calculated at a mile in eighty seconds. Williams Cañon combines the beautiful with the sublime.”]

1914 2.21612 Riding the fierce red flood of the Colorado. The first modern canoe to undertake the navigation of the Colorado was similar to the 16-foot Peterborough of this tale, for whose occupants the river-wise citizens of Needles predicted everything from wet feet to an untimely entrance within the Golden Gate. 'Better write what letters you want to send home,' suggested a grizzled mulewhacker, who claimed to know the river from its head spring to the Gulf of California. 'Leave 'em with the storekeeper, an' he'll hunch 'em along if we don't hear nothin' from you in a month or so.'” *Outdoor World and Recreation*, new series, 50(3)(March):142-145. [Canoe trip, Needles to Yuma.] [Includes also the notable statement, "Boats have passed through the Grand Cañon of the Colorado, but the trip will never achieve popularity with summer tourists." Its appellation is derived from the colour of its water, which is to be ascribed to the rains falling upon a soil of red clay. Its course, which is generally from N. E. to S. E. or W., may be estimated at 600 miles, and it is capable of a navigation to a considerable extent. The river Gille [Gila] flows into it, between which and the Colorado, previous to their junction, the country is described to be an upland desert; afterwards, and on the opposite side, it is considerably cultivated and fertile.” (entire item)] [Encyclopaedia Metropolitana.]

2013 2.19329 (eds.) A look back. For a place that’s evolved over millions of years, it’s probably an overstatement to refer to a collection of photos as “historic.” However, in terms of the Grand Canyon as a national park, these old black-and-whites offer an interesting glimpse of the good old days. *Arizona Highways*, 89(11)(November):cover, 1, 16-33. Donnelley, 351 pp. [First half of volume pertains to the Rocky Mountain region and westward to California via Utah and Nevada; focus on Colorado and the Denver & Rio Grande Railroad and the Denver & Rio Grande Western Railway. The volumes does not note the Grand Canyon of Arizona except through a few illustrations and spurious remarks. See p. 53, illustration, “Grand Cañon of the Colorado” by Thomas Moran, but which does not portray the Grand Canyon. See p.
54: "Grand Canon of the Colorado. From the bridge across Green River the traveler, can, [sic] if the day is clar, catch a glimpse of the rugged walls of the Grand Cañon of the Colorado, scarcely fifty miles to the southward." [sic, entire note]. See p. 68, illustration, "Grand Cañon, From To-Ro-Wasp" [sic]. See pp. 116-117, "Canon of the Grand River. A Marvelous Gorge. One of the World’s Wonders.” with illustration (p. 116) "Exploring the Walls”. See p. 122, illustration, "Marble Cañon”. See "Complete Index to Stations on the Southern Pacific Railroad”, which crosses the Colorado River at Yuma, pp. 254-259, although the text does not elaborate on the southern route. Also note, p. 52, "The Colorado Desert”, which pertains to "a stretch of about two hundred and fifty miles beyond Fruitvale”, not to the Colorado Desert of the lower Colorado River. These illustrations, and others interspersed, are taken from John Wesley Powell’s 1875 monograph, although they mostly have nothing to do with the subject matter of this volume.]

Grand Canyon and lower Colorado River articles and reports in *The New York Times* from 1851

*The New York Times* has long been widely available on microfilm, and now in digital format. The first issue of what originally was named *New-York Daily Times* appeared September 18, 1851 (changed to *The New York Times* in 1857). Its comprehensive and authoritative editorial view of national affairs, as well as its traditionally well-respected writing, makes it a useful resource on national perspectives of events and issues in the Southwest. The longevity of this newspaper also allows it to serve the Grand Canyon-Colorado River bibliography back to the time of the first expeditions through what would be Arizona, by Lorenzo Sitgreaves (1851), and on the Colorado by Joseph C. Ives (1857-1858) and John Wesley Powell (1869).
Items with by-lines have writers’ names in **bold** within the citation.

Items lacking page number were read from online displays, which often omit pagination. For later years, pagination (when supplied) refers to the New York Edition of the newspaper.

MEDIA FOR VISION-IMPAIRED USERS

Works or references produced especially for vision-impaired people

This section includes tactile, visual, and audio products prepared for individuals with functional handicaps that make viewing difficult or impossible. A few citations are print items that relate to products or services for the vision-impaired.

Many citations are from the Library of Congress Information System. Dates given may be either for the recording production date or for the printed volume; given as cited.

(Analog format abbreviations: “rpm” = revolutions per minute; “ips” = inches per second.)

For additional comments in the Introductory Notes click here.

See PART 9. TRAVEL for guides pertaining to travel with physical impairments.

See PART 14. HUMAN AFFAIRS for items that relate to reports of programs and similar issues with persons having physical, hearing or educational impairments.

See PART 27. AUDIO WORKS for conventional mass-market audio recordings.

Non-fiction and fiction for or by young and adolescent people that includes the Grand Canyon or the lower Colorado River

This part includes all those works traditionally referred to as "juvenile"; it includes works that also are appropriate for "young adult" audiences, including so-called graphic novels (or comic books). Both non-fiction and fiction are grouped together in order to provide complete, contiguous coverage in this special literary genre. If the context of the title does not clearly indicate whether the item is fiction or non-fiction, a notation is appended to denote the fictional works. Also included here are works created by young and adolescent authors.

See PART 7. FICTION for adult-audience graphic novels.

See PART 26. AUDIO-VISUAL WORKS for "juvenile"-category films.

This part lists only works of fiction, including folklore. However, special-interest subjects that can be considered by many to be works of fiction—such as those relating to UFOs and Creationist topics—are considered to belong either to “General” subjects or to the specific subject to which it purports to belong (e.g., Geology).

See Part 2, General for works that are critical commentary or analyses of fictional works.
See Part 6, Youth for “juvenile” or young-reader fiction.

Vernon, John
1992  7.108  Exhuming a dirty joke.  New York Times [newspaper], (July 12).  [An essay relating to the author's novel taking place in 19th century America, Peter Doyle (New York: Random House, 1991), the seminal idea for which was the factual relic that is the purported penis of Napoleon Bonaparte.  Vernon writes, "The item was last seen in my novel floating down the Colorado River toward (what else?) the Grand Canyon." However, the novel does not cite there these geographic names.  Here we have an instance of an author elaborating later on implied expressions of a work of fiction. TRAVEL AND TRAIL GUIDES

Informational guides to routing, attractions and accommodations of hiking, camping, and land-, water-, and air-travel in the Grand Canyon region and the vicinity of the lower Colorado River (excluding Colorado River guides and geological field guides)

This part includes only those publications that provide route-finding information, seasonal or other data on accommodations, and time-limited information such as fees; specifically for hiking, camping, auto, air or river travel, lodging, restaurants, commercial recreational and educational opportunities, and scenic attractions. Resources include those for equestrian and other stock use, pet-related travel, and similar activities. Some travel advisories are also included here.

See PART 2, GENERAL PUBLICATIONS for essays on travel, hiking, and river-running, and essay-type guides that largely omit information on locations, fees, hours of operation, and other such time-limited or guidance information.

See PART 10, COLORADO RIVER GUIDES for travel guides to the Colorado River.

See PART 23, GEOLOGICAL FIELD GUIDES for specialized geological guides to the Grand Canyon and Colorado River.

The distance from San Bernardino to Prescott by either of these routes is about 400 miles. On the road via Ehrenberg is a semi-weekly line of stages. The fare from San Bernardino to Prescott is $75, currency. Immigrants desiring to go to the southern part of the Territory can take the road from San Diego, via Yuma, to Tucson, on which there is a tri-weekly line of stages. The fare to Tucson is $90; the distance about 450 miles. ¶The Colorado Steam Navigation Company run a line of steamers from San Francisco to the mouth of the Colorado River, a steamer leaving San Francisco every twenty days. River-steamers run up the river to Yuma, Ehrenberg, Mohave, and Hardyville. Fare from San Francisco to Yuma: Cabin, $40; steerage, $25. Most of the freight comes this way. ¶Freight by wagons form Los Angeles to Prescott, via Ehrenberg or via Hardyville, is 12 cents per pound; the same from San Diego to Tucson, via Yuma."

Grand Canyon Stage Line

no date 9.153 Grand Canyon Stage Line; the Ash Fork route, open all the year round. The Grand Canyon of the Colorado River in Arizona. How to reach the most scenic views[,] the exquisite waterfalls, etc. of Cataract Canyon[,] the Yavapai villages[,] cliff dwellings, etc. Ash Fork, Arizona: Grand Canyon Stage Line, 24 pp. [including covers]. [Sometimes cited as by William Wallace Bass, proprietor of the stage line, and who no doubt did produce this; but bibliographically, his name does not appear as author. On p. 9, the name of the stage company appears as “Grand Canyon Stage Company”. Printed by The Hicks-Judd Co., San Francisco. Regarding the date of publication: On the back cover is an advertisement for books, photographs, and lantern slides of the Grand Canyon, available from W. W. Bass, Ash Fork, or from Grand Canyon Photo Co., Pasadena, California; there is also notice of G[eorge]. Wharton James’ The Grand Canyon of the Colorado River, said there to be “now in the press” and which was published in 1900. The Special Collections and Archives (SCA), Cline Library, Northern Arizona University, Flagstaff, hold the original of a photo of a Havasupai mother with child next to a wickiup (photo 91.15.18), which is another view of the one published in the Grand Canyon Stage Line booklet (p. 16); the date for it is given by SCA as 1899. Thus, the date of this booklet is most likely latter 1899 or early 1900. —Spamer] [cited=GCNHA Monograph 8: page 1–Special Section 1–6]

LOWER COLORADO RIVER REGION
SPECIAL INTEREST SUBJECTS
See the frontispiece map that delineates the region defined herein as "Lower Colorado River"

*Lower Colorado River Special Interest Subjects* ❖ *Part 11* (Lower Colorado River—Natural History, Environment and Special Issues) and *Part 12* (Lower Colorado River—Water Management) are purposely separated from the Grand Canyon focus of this bibliography to facilitate a more sensible breakdown for those users who may be interested specifically in *either* the Grand Canyon area or the lower Colorado River.

**Part 11.** As indicated in the title for Part 11, this part embraces mostly scientifically-oriented material. This consolidation thus means that, for example, geology, biology, and even ethnology items will be in the same part. It may seem more prudent to have separated out these disparate themes into separate subsections similar to the breakdown for *The Grand Canon* at large. However, I considered that approach to be counterproductive; otherwise there might have been a dozen short subsections that would seem to inflate the breadth of this bibliography, with unnecessary overlaps by placing some citations in more than one subsection. (For similar reasons, in the 1990 edition and its 1993 supplement I had incorporated “special sections” within some of the parts of the bibliography. This soon became inconvenient, the original objective being only to keep the number of loose-leaf separator tabs to a minimum.) It seems that readers interested solely on issues in the lower Colorado River may find a contiguous listing more advantageous, although this broad presumption is bound not to hold true for everyone. Still, a line must be drawn, and I have opted for the consolidated approach to the lower Colorado River. I have separated out into its own part only the water-management issues, which thematically makes sense.

As a matter of subjective decision, I have not included probably thousands of citations that would pertain exclusively to agricultural studies in the lower Colorado River region. These would best be the subject of a separate, specialized bibliography, which of course must be constructed from the start. Occasional agricultural items will be found in this bibliography, though. These are included for more specific focuses; for example, aspects of irrigation or taxonomic, ecological, or historical references.

Likewise arbitrarily added to Part 11 are specialized reports and articles that pertain to the U.S. Army Yuma Proving Ground and the U.S. Marine Corps Air Station Yuma.
PART 12. Water—its abundance (or lack thereof) and its quality and uses—will be the crucial concern of the world’s people in the 21st century. In the American Southwest concerns will become as dire as any known in the civilized world, just as humanly devastating as the shortages in small villages of other continents but with greater geographical and economic muddling from arbitrarily higher levels of “civilization” involved. References in Part 12 of the bibliography will give some case examples of how we in the American Southwest got to that point imbalanced between climate, technology, and legislation—and our perspectives, however limited right now, on what to do.

The water-management citations in Part 12 of the bibliography, restricted to the lower Colorado River corridor and its artificial extensions such as through canalization and powerline construction, must by default embrace partly the Grand Canyon. This is mostly due to the proposed construction of dams in the Grand Canyon, which ideas began with power-production facilities proposed for the Colorado at Diamond Creek in the closing years of the 1800s and in the heart of the canyon at the mouth of Bright Angel Creek in the early 1900s. Similar proposals continued for the entire Southwest through the dam-survey period of the 1920s mostly, during which Hoover Dam was built in the 1930s, and which came famously to a head politically and civilly in the 1960s–1970s with proposals to build two power dams that would have bracketed Grand Canyon National Park (then geographically smaller). Since the Grand Canyon dams never were constructed, a conundrum presented itself in THE GRAND CANYON as to where to cite water-management citations that pertained to proposed facilities that were still inside the Marble–Grand Canyon section of the Colorado River. Since these structures, though never completed, were a part of more ambitious plans covering the Southwest, I deemed it more sensible to include these citations in the water-management part of the bibliography for the lower Colorado River.

Regarding the water-management facilities of the lower Colorado River—principally Hoover Dam–Lake Mead, Davis Dam–Lake Mohave, Parker Dam–Lake Havasu, Imperial and Laguna Dams–Lake Martinez—most citations in THE GRAND CANYON pertain to the dams and their appurtenant works as well as to administrative aspects of the lakes impounded by them. In the case of Hoover Dam and Lake Mead, a substantial number of citations relate to them; fewer for dams and lakes farther downstream. Appurtenant works include, for example, power-production facilities and specialized construction facilities during the building phases. Bridges in particular may seem to be indirectly related to the operations and oversight of the dams and lakes, but they, too, are here considered appurtenant works because, such as in the case of the Mike O’Callaghan–Pat Tillman Memorial Bridge on the Hoover Dam
Bypass, completed in 2010, they were constructed to accommodate security and public safety at, and of, the primary facilities.

Aqueducts and irrigation canalworks in the lower Colorado River region are also covered in this part of the bibliography. But no special attempt has been made to provide comprehensive coverage because this material of course carries farther and extralimitally to the lower Colorado River region, and where in those destinations there are sure to be a separate bibliography’s worth of published material. ✤ ✤ ✤
LOWER COLORADO RIVER REGION

NATURAL HISTORY, ENVIRONMENT AND SPECIAL ISSUES

Natural history, environment, and certain special issues about the lower Colorado River corridor and adjacent lands below Grand Canyon, including selected items relating to Native Americans — from Lake Mead, Arizona–Nevada, and through the Arizona–Nevada–California corridor to the Colorado River delta in Baja California–Sonora, Mexico

[See the frontispiece map that delineates the region labelled here as “Lower Colorado River”]

This part includes only those references about all disciplines of natural history (geological and biological) and environment, topically restricted to the region along the lower Colorado River corridor, from Lake Mead to the delta. It includes geological field guides and geologic maps for this region, and hydrologic investigations of the river-proper as limited to this reach, including studies that include the part of Lake Mead that has inundated the lower Grand Canyon. Studies pertaining to the Gulf of California that embrace in some measure the Colorado River delta region are cited here. Selected archaeoelogical and ethnological investigations of the river corridor are also in this part. Natural-history and environmental studies related to the Salton Sea area are in this part. Water-quality and health issues relating to the waters of the lower Colorado River, below Grand Canyon, are also included. Administrative reports and study for areas in this geographic region are in this part. Some specialized reports that pertain to activities in the U.S. Army Yuma Proving Ground and U.S. Marine Corps Air Station Yuma are also found in this part. Most references specifically related to agriculture are excluded from this bibliography due to the far-reaching and specialized nature of such material,
which place it in the realm of agriculture methods in general; only those that pertain specifically to the lower Colorado River and its irrigation projects are included.

See the Appendix to Part 11 for separate graphical indices to the quadrangle systems of topographic maps in the lower Colorado River region used by the U.S. Geological Survey and the (México) Instituto Nacional de Estadística y Geografía and likewise for geological maps of the Servicio Geológico Mexicano.

[Letter in response to news item in May issue (see Item no. 11.5820 [Anonymous, 1954]) regarding the catch of a bony tail minnow in the Colorado River below the Blythe Weir. The author reports having caught and eaten these fish when a child in Needles, California, around 1910. He also notes, "It was about this same time that I remember the last of the paddlewheelers on the river. The old smelter was then in operation and run by a man named Godshall." He also notes that "We used to watch it [the river] in terror at it undercut its banks and swallowed house after house in swollen fury."

1883 11.5184 Yellow fever in Mexico. *In*: News Items [section]. *The Medical News* (Philadelphia), 43(18)(November 3):501. "[Yellow fever] has spread with rapidity northward [in Mexico], dealing death to the indians. there is constant travel and traffic from these oints to the frontier of Arizona and Upper California by land, and steamship navigation on the Gulf of California to the Colorado River (which empties its waters into the Gulf of California), thence to Fort Yuma on the Gila River, carries the disease northward. Some cases of fever of an unknown type (?) have already been reported in Arizona as having occurred among some travellers from the affected districts further south." Also, "It is north and west that the disease is travelling, and there is danger of its creeping into Arizona and Upper California, where the great system of railways which here begin to network the country may carry it into the east like a prairie fire." Quoted from a report by "Acting Assistant Surgeon Main" to Surgeon-General Hamilton, dated October 16, 1883.
