Each citation in the bibliography has a unique, but arbitrary, serial number referred to herein as an **ITEM NUMBER**—in the example above the number is **2.2088**. It is composed of the number of the part of the bibliography in which it is cited (Part “2.” in the example), suffixed with a unique number within that part (“2088” in the example). These are explained more fully in the Introduction.

An ITEM NUMBER is assigned when a citation is added to the bibliography, or when a citation is transferred from one part to another, thus the numbers do not follow in order within the alphabetical order of the bibliography’s citations. They are not reused if a citation is removed from a part, either by deletion or transfer to another part (and there renumbered). ITEM NUMBERS did not appear in the 1981 and 1990/1993 print editions of the bibliography.

Many citations throughout the bibliography have appended to them **CROSS-LISTINGS** to previous editions of this bibliography and to selected standard bibliographical references. Also cross-listed are citations for **REVIEWS AND NOTICES** of the works cited. These notes are indented and prefixed by the equivalence symbol (≡) so as to readily distinguish them from the citations themselves. For users who view this bibliography in its original PDF format, the bibliographical cross-listings are in **dark orange** and the reviews cross-listings are in **dark blue** (see example above); the colors are only for visual convenience.

The cross-listing conventions are explained more fully in the Introduction.
