PREFACE

THE CITATIONS LISTED HERE have been extracted from the 4th edition (2022) and 5th edition (*in preparation*) of Volume 1 of *THE GRAND CANON*, a far more expansive bibliography of the Grand Canyon and lower Colorado River regions of southwestern North America. (*THE GRAND CANON* is a series of publications accessible online at <https://ravensperch.org>.)

Administrative perspectives include policy decisions and issues of infrastructure and personnel. Public input and discussion, by individuals, organizations, and other groups, is here considered a part of management processes. Included among these public perspectives is a partial record of the breadth of consideration and opinion that is outside of the more usual avenues of formal public responses that are made directly to governmental agencies. Note that these citations omit most local-level administrative and management issues in the immediate Grand Canyon area (for example, city, county, and state planning documents). See Part 13 of *THE GRAND CANON*, which also includes Lower Colorado River regional materials.

Material pertaining to Grand Canyon National Park includes early administratively protected areas of the Grand Canyon (Grand Canyon Game Preserve, Grand Canyon Forest Reserve, Grand Canyon National Monument), regardless of the federal agency under which the unit was placed. Issues pertaining to the Colorado River in Grand Canyon National Park are in the separate "Colorado River" section. For material pertaining to the proposals to build dams in the Colorado River in Marble and Grand Canyons, see Part 12/Section 1 of *THE GRAND CANON*.

The Williams Ranger District of the Kaibab National Forest is not a part of the coverage of *THE GRAND CANON*, thus it also does not appear in this special bibliography.

Issues pertaining to *biologically focused* research and management in all of the units covered in this bibliography will be found within specific organismally restricted bibliographies available on the Raven's Perch website (see webpage <https://ravensperch.org/special-biological-bibliographies/>).

The bibliography for Lake Mead National Recreation Area is complemented by a *Hoover Dam Bibliography*, which is available on the Raven's Perch Media website (see webpage <https://ravensperch.org/other-special-bibliographies/>).

Administrative issues that pertain to Native American tribes of the region are included in the complementary *Bibliography of Native Americans Traditionally Associated with the Grand Canyon* (see webpage <https://ravensperch.org/other-special-bibliographies/>), which lists items separately by tribe.

BIBLIOGRAPHY OF ADMINISTRATIVE AND MANAGEMENT ISSUES

Each citation herein includes an Item number (for example, 13.2941; the prefix "13." indicates that it is item no. 2941 from Part 13 of the much larger bibliography, *THE GRAND CANON*, Volume 1). They serve as serial numbers only, which uniquely identify citations throughout *THE GRAND CANON*. Numbers are assigned as citations are acquired for each part of the bibliography, thus they do not follow in order in the alphabetically arranged lists.

See <https://ravensperch.org> for everything pertaining to the complete Grand Canyon-Lower Colorado River bibliography.

"Environment America", centered in Denver, Colorado, is not generally indicated in these serials. The state issues cited here are all of those that were found for this bibliography; state advocate groups for states not cited here were not located. A couple of state advocate-group issues for Fall 2016 were located, but they did not include the Grand Canyon action alert, except for a short notice in a box on p. 1 of the issue, identical (except for host state name) to the boxed notice that appears in the issues cited here; nor were previous or subsequent issues pertinent. See also the note appended to [ITEM NO. 13.4653](#), the *Environment Arizona* issue.

confined to issues at Grand Canyon National Park, specifically the aircraft overflight issue. The commenter suggested that NPS require backcountry permits be issued to individuals who participate in private scenic air tours over park lands. These excursions are short-term (1 hour or less) flights that originate outside the park. Although the flights often take place over park lands, the NPS does not have authority over airspace, which is under the authority of the Federal Aviation Administration. We did not make any changes to our information collection requirements." (ENTIRE NOTE)]

U.S. DEPARTMENT OF AGRICULTURE—FOREST SERVICE

KAIBAB NATIONAL FOREST (North Kaibab and Tusayan Ranger Districts)

References to early administratively protected areas of the Grand Canyon (Grand Canyon Game Preserve, Grand Canyon Forest Reserve) are listed in the "Grand Canyon National Park" list herein, in as much as these are in part predecessor units of the park.

The Williams Ranger District is not a part of the coverage of *THE GRAND CANYON*, thus it also does not appear in this special bibliography.

Issues pertaining to *biologically focused* research and management in all of the units covered in this bibliography will be found within specific organismally restricted bibliographies available on the Raven's Perch website (see webpage <https://ravensperch.org/special-biological-bibliographies/>).

"Grand Canyon—Kaibab National Forest officials were worried over increasing numbers of people who staked out mining claims along the entrance highway to Grand Canyon National Park. They couldn't prevent such filing of claims, although the 'mineral' was often only building stone or volcanic cinder and the real goal a service station or hot-dog stand. But now a new law, introduced in Congress by Congressman Patton [<i>sic</i> , Harold A. Patten] of Arizona, assures that only legitimate claims based on real mineral showings can be filed, thus protecting the highway from undesirable developments. The law, although recognizing proper actual mineral deposits, restricts development to mining operations and vests control of the surface developments in the Secretaries of Agriculture and Interior.— <i>Sierra Club Bulletin</i> ."
