PREFACE

THE CITATIONS LISTED HERE have been extracted from Volume 1 of *THE GRAND CANON*, a far more expansive bibliography of the Grand Canyon and lower Colorado River regions of southwestern North America. (*THE GRAND CANON* is a series of publications accessible online at <https://ravensperch.org>.) This bibliography complements other biologically focused bibliographies that have been prepared for the these regions (also accessible on the Raven's Perch Media website).

For citations that relate to biological, ecological and environmental matters of broader geographical focus, and of the lower Colorado River region in general, consult the much more comprehensive listings in Part 11/Section 1 of *THE GRAND CANON*, Volume 1).

Environmental issues include atmospheric and concerns of human health.

Agricultural topics principally on the Imperial Valley and Mexicali Valley are included in this bibliography. The Yuma Valley region is not included.

As a matter of geographical-ecological necessity, citations pertaining to locales that are near to the Salton Sea and Imperial Valley are also included in this bibliography; specifically, the southern Coachella Valley, the Algodones Dunes, and peripheral ecological reserves (for example, Dos Palmas).

Items that pertain to the anthropogenic breakout of the Colorado during 1905-1907 are listed with water-management publications in Part 12/Section 1 of *THE GRAND CANON* Volume 1. Geological studies are not included, for which refer to Part 11/Section 2 of *THE GRAND CANON* Volume 1. Items pertaining to archaeology and Indigenous occupations in the Salton Sink will be found in Part 11/Section 3 of *THE GRAND CANON* Volume 1.

Each citation here includes an Item number (for example, 11.7517; the prefix "11." indicates that it is from Part 11 of the much larger bibliography, *THE GRAND CANON*, Volume 1). They serve as serial numbers only, which uniquely identify citations throughout *THE GRAND CANON*. Numbers are assigned as citations are acquired for the bibliography, thus they do not follow in order in the bibliography. Several pertinent citations from other parts of *THE GRAND CANON* also appear in this special bibliography; they are identified by prefixes other than "11."

Item numbers in *colored italics* indicate publications that pertain only to Mexico. Item numbers that are underscored indicate publications that focus on agriculture, horticulture, aquaculture, apiculture, and animal husbandry.

See <https://ravensperch.org> for everything pertaining to the complete Grand Canyon-Lower Colorado River bibliography.

- 2018 11.17930 [Photo.] In november 2017, the Sierra Club Desert Committee held its fall meeting on the shore of the Salton Sea. In recent years the lessening of water input has caused the lake level to fall, making the exposed lakebed a source of toxic dust. An increase in water salinity will soon kill off the fish life turning the lake into a dead sea. here Imperial Irrigation District officials explain their mitigation plans for the region. *The Survivor* (Desert Survivors, Oakland, California), 37(1) (Spring): 3.

³ The citations for the Department of Agriculture's "Plant Inventory Books" relates to what is now the U.S. National Plant Germplasm System, information about which is a part of the Germplasm Resources Information Network (GRIN). For access to the inventory books go to <https://www.ars.usda.gov/northeast-area/beltsville-md-barc/beltsville-agricultural-research-center/national-germplasm-resources-laboratory/docs/plant-inventory-books/> (last accessed 9 January 2022). Each plant inventory book properly may be credited to different compilers; however, a bibliographical decision is made here to group all of the citations from the inventory books under the governmental source. They are listed in this bibliography under (chronologically ordered), "U.S. Department of Agriculture, Bureau of Plant Industry" and "U.S. Bureau of Agriculture, Agricultural Research Service". Although there are some significant hiatuses in the time of publication for inventory lists covering earlier years, the apparent significant hiatuses expressed by the citations here are due to the lack of seeds or plants credited to sources that lie within the geographical bounds of this bibliography. Plant Inventory Books 1-217 (1898-2008) have been examined.
