PARTS 11 & 12 : SEPARATE-COVERAGE GROUP : SPECIALIZED MATERIAL FOR LOWER COLORADO RIVER REGION (BELOW GRAND CANYON)

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Caldwell, James H., AND Anthony, Liz

- 2016 11.12077 *The value of Salton Sea geothermal development in California's carbon constrained future.* Sacramento, California: Center for Energy Efficiency and Renewable Technologies, 21 pp.

California. Imperial County.

- 2007 11.6057 *Imperial County Flood Management Plan.* [No place]: Imperial County, 92 pp.

California Council on Science and Technology

- 2023 11.19226 *Lithium extraction from geothermal brine : technology and impacts.* [Sacramento, California]: California Council on Science and Technology, 2 pp. [Fact sheet.]

California Department of Water Resources

- 1970 11.15807 Geothermal wastes and the water resources of the Salton Sea area. *California Department of Water Resources, Bulletin 143-7*, 123 pp.
- 1974 11.15808 Water and power from geothermal resources in California. *California Department of Water Resources, Bulletin 190*, 52 pp.
- 1975 11.10050 California's ground water. *California Department of Water Resources, Bulletin 118*, 135 pp. [See "Ground Water Basins—Colorado Desert Hydrologic Study Area", pp. 84-93.]
- 1980 11.10051 Ground water basins in California : a report to the Legislature in response to Water Code Section 12924. *California Department of Water Resources, Bulletin 118-80*, 73 pp. [See "Ground Water Basins—Colorado Desert Hydrologic Study Area", pp. 56-58.]
- 1980 11.10052 California's groundwater. *California Department of Water Resources, Bulletin 118, Update 2003*, 246 pp. [See "Colorado River Hydrologic Region", pp. 201-208.] [Also see consolidated information pertaining to variants of *Bulletin 118* on website <http://www.water.ca.gov/groundwater/bulletin118/coloradoriver.cfm> (accessed 11 May 2016), which also includes access to *ITEM NOS.* 11.10049–11.10052.]

California Division of Mines and Geology

- 1979 11.8833 *Preliminary data: Partial film records and file data : Imperial Valley earthquake of 15 October 1979.* [No place]: Division of Mines and Geology, Office of Strong Motion Studies, [14] pp.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

California Division of Water Resources

- 1952 11.10049 Ground water basins in California. *California Division of Water Resources, Water Quality Investigations Report 3*, 44 pp., plates. [See "Colorado River Basin Region No. 7", p. 19.]

California Energy Commission

- 2003 11.3529 *Salton Sea Geothermal Unit #6 power project : Application For Certification (02-AFC-2), Imperial County. Commission Decision.* [Sacramento, California]: California Energy Commission, 246 pp. (P800-03-021.) [Project name later changed to Black Rock 1, 2, and 3 Geothermal Power Project.]
- 2003 11.3530 *Salton Sea Geothermal Unit #6 power project : Application for Certification (02-AFC-2), Imperial County. Final Staff Assessment—Part 1.* [Sacramento, California]: California Energy Commission, SEPARATELY PAGINATED SECTIONS [567 pp. total]. [Project name later changed to Black Rock 1, 2, and 3 Geothermal Power Project.]
- 2003 11.3531 *Salton Sea Geothermal Unit #6 power project : Application for Certification (02-AFC-2), Imperial County. Final Staff Assessment—Part 2.* [Sacramento, California]: California Energy Commission, SEPARATELY PAGINATED SECTIONS [141 pp. total]. [Project name later changed to Black Rock 1, 2, and 3 Geothermal Power Project.]

California Geological Survey, AND California State Parks

- 2015 11.16797 Geological gems of California State Parks. *California Geological Survey, Special Report 230*, [249] pp. [Unpaginated, but separately authored four-page chapters are enumerated as "GeoGem Note [number]"; presumably the chapters are distributed as separate fact sheets, too.]

California Institute of Technology; Columbia University, Lamont-Doherty Geological Observatory; AND U.S. National Oceanic and Atmospheric Administration, Seismological Field Survey

- 1972 11.10667 (CONTRIBUTORS) The Borrego Mountain earthquake of April 9, 1968. *U.S. Geological Survey, Professional Paper 787*, 207 pp., 5 plates.

Callaghan, Eugene

- 1939 11.5378 Geology of the Searchlight district, Clark County, Nevada. *U.S. Geological Survey, Bulletin 906-D*, pp. 153-188.
- 1989 11.12312 Geology of the Searchlight district, Clark County, Nevada. *In*: Vanderberg, William O., *Mines of Clark County*. Las Vegas: Nevada Publications. [Facsimile reproduction of Callaghan (1939, *ITEM NO.* 11.5378), appended to Vanderberg (*ITEM NO.* 11.762).]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Calvin, Wendy M., AND Pace, Elizabeth L.

- 2016 11.10398 Utilizing HypsIRI prototype data for geological exploration applications: A southern California case study. *Geosciences* (MDPI: Multidisciplinary Digital Publishing Institute, Basel, Switzerland), 6(11), 14 pp. [Salton Sea region.] [Hyperspectral Infrared Imager.]

Calvin, Wendy M.; Davies, Gwendolyn E.; Pace, Elizabeth L.; AND Pearson, Neil

- 2015 11.9237 HypsIRI preparatory data for energy and mineral resources [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 47(7): 74. [Includes Salton Sea region.] [Hyperspectral Infrared Imager.]

Calzia, James P., AND Morton, J. L.

- 1980 11.174 Compilation of isotopic ages within the Needles 1° × 2° quadrangle, California and Arizona. *U.S. Geological Survey, Open-File Report 80-1303*, 1 sheet, scale 1:250,000.
 ≡ [CROSS-LISTINGS](#) [[CITED](#)» [GCNHA Monograph 8: page 2-8](#)]

Calzia, James P., AND Sims, J. D.

- 1979 11.11142 Deformational structures in Pliocene Bouse Formation near Vidal, southeastern California [ABSTRACT]. *American Association of Petroleum Geologists, Bulletin*, 63(3) (March): 427-428.

Calzia, James P.; Ludington, Steve; Miller, C. F.; AND Rämö, O. T.

- 2008 11.1265 Miocene magmatism and coeval crustal extension in the Colorado River and Death Valley extensional terrains (IGCP-510). *In*: Reynolds, Robert G. (ed.), *Roaming the Rocky Mountains and environs: Geological field trips. Geological Society America, Field Guide 10*, pp. 111-138.

Calzia, James P.; Madden-McGuire, D. J.; Oliver, H. W.; AND Schreiner, R. A.

- 1988 11.12638 Mineral resources of the Santa Rosa Mountains Wilderness Area, Riverside County, California. *In*: Mineral resources of Wilderness Study Areas: South-Central California Desert Conservation Area, California. *U.S. Geological Survey, Bulletin 1710-D*, pp. D1-D14, 1 plate.

Camacho Hernández, Juan Manuel

- 2009 *11.7014* Zonas de alteración hidrotermal y condiciones actuales del yacimiento: un enfoque para determinar zonas productoras al oriente del campo geotérmico de Cerro Prieto, BC. *Geotermia* (Revista Mexicana de Geoenergía) (Comisión Federal de Electricidad), 22(2) (July/December): 35-44. [[In Spanish.](#)]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Camacho Ibarra, Victor F.; Aveytua Alcazar, Leslie; AND Carriquiry, Jose D.

- 2003 *11.1059* Fatty acid reactivities in sediment cores from the northern Gulf of California. *Organic Geochemistry*, 34(3): 425-439.

Camacho Ibarra, Edgar, AND Espinosa Cardeña, Juan Manuel

- 2006 *11.3635* Deformación cosísmica en la región epicentral del sismo Victoria de 1981 (M=6.1), Mexicali, Baja California [ABSTRACT]. *Geos* (Unión Geofísica Mexicana), 26(1) (October): 150. [In Spanish.]

Camacho Ibarra, Edgar; Espinosa Cardeña, Juan Manuel; AND Valles Pérez, Héctor Daniel

- 2006 *11.3631* Obtención del modelo de geoide para la región geotérmica de Cerro Prieto, Baja California, México [ABSTRACT]. *Geos* (Unión Geofísica Mexicana), 26(1) (October): 21-22. [In Spanish.]

Camacho Rodríguez, Patricia

- 1997 *11.5942* *Digitalización e interpretación morfológica de la plataforma y talud continental de Sinaloa y Nayarit*. Vicentina: Universidad Autónoma Metropolitana, División de Ciencias Biológicas y de la Salud, [unpaginated]. [In Spanish.]

Cameron, Winifred Sawtell

- 1964 11.6322 An interpretation of Schröter's Valley and other lunar sinuous rills. *Journal of Geophysical Research*, 69(12) (June 15): 2423-2430. [See p. 2426, reference to Lake Mead turbidity currents.]

Camfield, P. Adrian

- 1966 11.1700 *Thermomagnetic properties of red sediments*. Master's thesis, Massachusetts Institute of Technology, 87 pp.

Campagna, David John

- 1990 11.10623 *The Lake Mead fault system and the Las Vegas Valley shear zone: Strike-slip faulting and associated deformation in the Basin and Range, southeastern Nevada*. Doctoral dissertation, Purdue University, 80 pp.

Campagna, David J., AND Aydin, Atilla

- 1994 11.10625 Basin genesis associated with strike-slip faulting in the Basin and Range, southeastern Nevada. *Tectonics*, 13(2) (April): 327-341.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Campagna, David J., AND Levandowski, Donald W.

- 1991 11.12568 The recognition of strike-slip fault systems using imagery, gravity, and topographic data sets. *Photogrammetric Engineering and Remote Sensing*, 57(9) (September): 1195-1201. [Lake Mead fault system and Las Vegas Valley shear zone.]

Campbell, Erin A. *see also* Campbell-Stone, Erin A.

Campbell, Erin A., AND John, Barbara E.

- 1996 11.176 Constraints on extension-related plutonism from modeling of the Colorado River gravity high. *Geological Society of America, Bulletin*, 108(10): 1242-1255.
- 1996 11.177 Magmatic vs. amagmatic accommodation of Miocene extension in the southernmost Sacramento Mountains, southern Basin and Range [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 28(7): A-450.

Campbell, H. E., AND Montero, G.

- 1988 *11.8947* Silica in Cerro Prieto geothermal field. *In: Proceedings, 10th New Zealand Geothermal Workshop, 1988*, pp. 373-.

Campbell, Ian, AND Schenk, Edward T.

- 1939 11.178 Unusual porphyritic dike near Boulder Dam, Arizona [ABSTRACT]. *Geological Society of America, Bulletin*, 50: 1948-1949.
 ≡ *CROSS-LISTINGS* [CITED» GCNHA Monograph 2: page 33] [CITED» GCNHA Monograph 8: page 2-8]
- 1950 11.179 Camptonite dikes near Boulder Dam, Arizona. *In: Studies in petrology and mineralogy dedicated to Esper S. Larsen, Jr. American Mineralogist*, 35(9/10): 671-692.

Campbell, J. L.

- 1912 11.180 Alluvial soils of the Colorado and the Mississippi deltas. *Engineering News*, 67(1) (January 4): 32. [Letter.]

Campbell, Kenneth W., AND Hampson, David M.

- 1989 11.8519 Processed digital recordings for selected aftershocks of the October 15, 1979 Imperial Valley, California, earthquake. *U.S. Geological Survey, Open-File Report 89-437*, 45, 285 pp.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Campbell, P. A., AND Anderson, Thomas H.

- 2003 11.2243 Structure and kinematics along a segment of the Mojave-Sonora megashear: A strike-slip fault that truncates the Jurassic continental magmatic arc of southwestern North America. *Tectonics*, 22(6): 16-1-16-21.

Campbell R., Héctor E. [Campbell Ramírez, Héctor Enrique, AND Elders, Wilfred A.

- 1995 *11.16242* Estudios sobre usos directos de la energía geotérmica en el Valle de Mexicali [ABSTRACT]. *In*: Resúmenes y Programa de la Reunión Anual. *Geos (Unión Geofísica Mexicana)*, 15(2) (November): 91-92. [In Spanish.]

Campbell Ramírez, Héctor Enrique; Montero Alpirez, Gisela; Samaniego Ramos, Margarita Gil; AND Valdez Salas, Benjamin

- 2011 *11.8053* Thermodynamics applied to geothermal power plants: Case study—Unit 5, Cerro Prieto, Baja California, Mexico. *In*: American Society of Mechanical Engineers, *ASME 2011 International Mechanical Engineering Congress and Exposition. Volume 4: Energy systems analysis, thermodynamics and sustainability : combustion science and engineering : nanoengineering for energy, Parts A and B : Denver, Colorado, USA, November 11-17, 2011*, pp. 187-196.

Campbell-Stone, Erin A. *see also* Campbell, Erin A.

Campbell-Stone, Erin A., AND John, Barbara E.

- 2002 11.1037 Temporal changes in deformation mode: From failure to flow in the Colorado River Extensional Corridor. *International Geology Review*, 44(6): 512-527.

Campillo, Michel; Mao, Shujuan; Modret, Aurelien; Fang, Hongjian; AND Hilst, Robert D. van der

- 2019 11.17339 On the measurement of seismic travel-time changes in the time-frequency domain with wavelet cross-spectral analysis [ABSTRACT]. *American Geophysical Union, 2019 Fall Meeting, San Francisco, CA, 9-13 December 2019*, Abstract S11C-0344. [Includes "an application on ambient noise cross-correlations at Salton Sea Geothermal Field".] [For a published paper see Mao *et al.* (2020, *ITEM NO.* 11.18026).]

Campos Enriquez, J. O.; Hernández Quintero, E.; AND Lozada Zumaeta, M.

- 2005 *11.2239* The crust at northwestern Mexico interpreted from Magsat anomalies: Implications for existence of the Mojave-Sonora megashear. *In*: Anderson, Thomas H., Nourse, Jonathan A., McKee, James W., and Steiner, Maureen B. (eds.), *The Mojave-Sonora megashear hypothesis: Development, assessment, and alternatives. Geological Society of America, Special Paper 393*, pp. 199-208.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Camus, Maguelone

- 2010 *11.12952* *Géomorphologie et géochronologie en luminescence optique de dépôts marins et volcaniques : contribution à la géodynamique Quaternaire du Sonora, Mexique.* Master's thesis, Université du Québec à Montréal, 245 pp. [In French.]

Canchola Félix, Ismael

- 2005 *11.8908* Rehabilitation and modernization project for Unit 5 of Cerro Prieto power plant. *In: Proceedings, World Geothermal Congress 2005, Antalya, Turkey, 24-29 April 2005*, paper 1318.

Canchola Félix, Ismael, AND Hernández Soria, Sergio Salvador

- 2003 *11.9020* Rehabilitation and modernization project for the Unit 5 of CFE's Cerro Prieto geothermoelectric power plant. *In: International Collaboration for Geothermal Energy in the Americas; Geothermal Resources Council 2003 Annual Meeting, October 12-15, 2003, Morelia, Mexico. Geothermal Resources Council, Transactions, 27: 523-525.* [México, Comisión Federal de Electricidad.]

Canchola Félix, Ismael; Mora Pérez, Othón; AND Sánchez Velasco, Raúl Alberto

- 2009 *11.8894* Inhibición de incrustación en intercambiadores de calor en el campo geotérmico de Cerro Prieto, BC. *In: Asociación Geotérmica Mexicana, Memorias del XVII Congreso I, Morelia, Mich., 13 de noviembre de 2009*, 9 pp. [In Spanish.]

Canik, Baki; Çelik, Mehmet; AND Arigün, Zafer

- 2000 11.17161 Jeotermal enerji. *Ankara Üniversitesi Fen Fakültesi Döner Sermaye, İşletmesi Yayınları*, (59), 60 pp. [Salton Sea and Cerro Prieto geothermal fields noted, pp. 40, 41.] [In Turkish.]

Cao, A.; Levander, A.; Miller, M. S.; AND Niu, F.

- 2008 11.7344 High resolution transition zone structures beneath western USA [ABSTRACT]. *Eos* (American Geophysical Union, Transactions), 89(53, Fall Meeting Supplement), Abstract S31D-06.

Capps, Richard Crissman

- 1996 11.181 *Geologic setting of Miocene volcanogenic gold mineralization near the western margin of the Colorado River extensional corridor—eastern Mojave Desert, California and Nevada.* Doctoral dissertation, University of Georgia, 391 pp.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Capuano, R. M.; Adams, M. C.; AND Wright, P. M.

- 1983 11.9201 Tracer recovery and mixing from two geothermal injection-backflow studies. *In*: Ramey, Henry J., Jr., Kruger, Paul, Miller, Frank G., Horne, Roland N., Brigham, William E., and Gudmundsson, Jon S., Proceedings; Ninth Workshop, Geothermal Reservoir Engineering, December 13-15, 1983. *Stanford Geothermal Program Workshop Report SGP-TR-74*, pp. 299-304. [Includes East Mesa (Imperial Valley).]

Carbajal, Noel

- 1999 *11.1100* Bancos de arena en el delta del Rio Colorado. *Ciencias Marinas* (Universidad Autónoma de Baja California, Instituto de Investigaciones Oceanológicas), 25(4):. [In Spanish.]
- 2001 *11.1143* El delta del Río Colorado. *TIP. Revista Especializada en Ciencias Químico-Biológicas* (Universidade Nacional Autónoma de México), 4(2): 72-76. [In Spanish.]

Carbajal, Noel, AND Backhaus, Jan O.

- 1998 *11.183* Simulation of tides, residual flow and energy budget in the Gulf of California. *Oceanologica Acta*, 21(3): 429-446. [Includes Colorado River delta area.]

Carbajal, Noel, AND Montaña, Yovani [Montaña Ley, Yovani]

- 1999 *11.1144* Tasas de crecimiento y escalas de bancos de arena en el Delta del Río Colorado. Growth rates and scales of sand banks in the Colorado River Delta. *Ciencias Marinas* (Universidad Autónoma de Baja California, Instituto de Investigaciones Oceanológicas), 25(4): 525-540. [In parallel Spanish and English texts.]
- 2000 *11.3602* ¿Es la hidrodinamica en el delta del Rio Colorado y de la formacion de las Islas Montague y Gore? [ABSTRACT]. *In*: 2ª Reunión Nacional de Ciencias de la Tierra, Resúmenes y Programa. *Geos* (Unión Geofísica Mexicana, Boletín Informativo), Época 2, 20(3) (October): 278. [In Spanish.]
- 2011 *11.3459* Transport of sediments in water bodies of the Gulf of California. *In*: Manning, Andrew (ed.), *Sediment transport in aquatic environments*. Rijeka, Croatia: InTech, pp. 147-162. [“A free online edition of this book is available at www.intechopen.com Additional hard copies can be obtained from orders@intechopen.com.”.]

Carbajal, Noel; Gaviño Rodríguez, Juan Heberto; AND Alonso, Pablo

- 2014 *11.12212* Modelación numérica del transporte de sedimentos en el delta del Río Colorado en un ciclo de marea muerta marea viva [ABSTRACT]. *In*: Reunión I, Unión Geofísica Mexicana, 2 al 7 noviembre 2014. Sesión especial. Reconectando el Río Colorado con el Golfo de California: una iniciativa binacional. *Geos* (Unión Geofísica Mexicana), 34(1) (November): 212. [In Spanish.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Carbajal, Noel; Montañó Ley, Yovani; Páez Osuna, Federico; Soto Jiménez, Martín; AND Tuxpan, José

- 2020 *11.18389* Numerical investigation of sea-bottom morphological changes by the interaction of tidal flow and idealized coastal geometries. *Journal of Coastal Research*, 36(5) (September): 981-991.

Carbajal, Noel; Souza, A.; AND Durazo, R.

- 1995 *11.1073* A numerical study of the ex-ROFI of the Colorado River. *Journal of Marine Systems*, 12(1/4) (August): 17-33. [Region of freshwater influence.]

Carbonell C., Manuel, AND Bustillo Sáñez, Gonzalo

- NO DATE *11.5845* Salinas de Bahía de Adair, Municipio de Puerto Peñasco, Sonora. *Geomimet* (Asociación de Ingenieros de Minas, Metalurgistas y Geólogos de México), (94):. [1963?] [10 pp.; seen as an offprint together with Bustillo-Sáñez and Gómez-Gutiérrez (no date, *ITEM NO.* 11.5846).] [In Spanish.]

Cárdenas Vargas, José

- 1992 *11.5847* (COORDINATOR; Francisco Cenejas Cruz, Salvador Ramos Cruz, Guillermo E. Terán Martínez, and Roberto Macedo Palencia, COMPILERS) *Monografía geológico-minera del estado de Sonora*. Pachuca, Hidalgo, México: México, Secretaría de Energía, Minas e Industria Paraestatal, Subsecretaría de Minas e Industria Basica, Consejo de Recursos Minerales, 220 pp., map. (Monografías Geológico Mineras.) (Publicación M-8e.) [In Spanish.]
- 1992 *11.5848* (COORDINATOR; Francisco Cenejas Cruz, Salvador Ramos Cruz, Guillermo E. Terán Martínez, and Roberto Macedo Palencia, COMPILERS) *Geological-mining monograph of the state of Sonora*. Pachuca, Hidalgo, México: México, Secretaría de Energía, Minas e Industria Paraestatal, Subsecretaría de Minas e Industria Basica, Consejo de Recursos Minerales, 220 pp., map. (Monografías Geológico Mineras.) (Publication M-8e.) [English translation of *ITEM NO.* 11.5847.]

Carder, Dean S.

- 1945 11.184 Influence of reservoir-loading on local earthquake-activity [ABSTRACT]. *American Geophysical Union, Transactions*, 26(2) (October): 203.

≡ REVIEWS AND NOTICES Lacy, 2016, ITEM NO. 30.1162

Charré Meza, Adolfo S.; Pérez Flores, Marco A.; AND Gómex Travino, Enrique

- 2000 *11.8912* 2-D inversion of DC resistivity data from the Cerro Prieto Geothermal Area, Mexico. *In: Proceedings, World Geothermal Congress 2000, Kyushu-Tohoku, Japan, May 28-June 10, 2000*, paper R0598, pp. 1037-1041.

Chase, D. S.; Clover, R. C.; Grannell, R. B.; Leggewie, R. M.; Eppink, J.; Tarman, D. W.; AND Goldstein, N. E.

- 1978 *11.3108* Precision gravity studies at Cerro Prieto. Estudios de gravimetría de precisión en Cerro Prieto. *In: Proceedings/Actas : First Symposium on the Cerro Prieto geothermal field, Baja California, Mexico, September 20-22, 1978, San Diego, California. Sponsored by United States Department of Energy, Division of Geothermal Energy, in cooperation with Comisión Federal de Electricidad de México.* Berkeley, California: Earth Sciences Division, Lawrence Berkeley Laboratory, University of California; and Mexicali, Baja California, México: Coordinadora Ejecutiva de Cerro Prieto, pp. 249-264. *[In English and Spanish.]*

Chavez, Dave; Gonzales, Javier; Reyes, Alfonso; Medina, Mauru; Duarte, Carlos; Brune, James N.; Vernon, Frank L., III; Simons, Richard; Hutton, L. K.; German, Peter T.; AND Johnson, Carl E.

- 1982 11.3192 Main-shock location and magnitude determination using combined U.S. and Mexican data. *In: The Imperial Valley, California, earthquake of October 15, 1979. U.S. Geological Survey, Professional Paper 1254*, pp. 51-54.

Chávez, R. E.

- 1990 *11.11274* Gravity interpretation of the Laguna Salada Basin, Baja California, México. *Geofísica Internacional*, 29(3) :129-135.

Chávez, R. E.; Lazaro Mancilla, O.; Campos Enríquez, J. O.; AND Flores Márquez, E. L.

- 1999 *11.11107* Basement topography of the Mexicali Valley from spectral and ideal body analysis of gravity data. *Journal of South American Earth Sciences*, 12(6) (November): 579-587.

Chen, A. T. F., AND Bennett, M. J.

- 1982 11.8490 Site characterization for Stations 6 and 7, El Centro strong motion array, Imperial Valley, California. *U.S. Geological Survey, Open-File Report 82-1040*, 57 pp.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Chen, Chih-Ying

- 2005 11.2978 *Liquid-gas relative permeabilities in fractures: Effects of flow structures, phase transformation and surface roughness.* Stanford, California: Stanford Geothermal Program, Stanford University, 201 pp. (SGP-TR-177.) [Includes Salton Sea geothermal field.]

Chen, Deji; Wang, Yongxi; AND Zeng, Xinping

- 2008 11.1497 A study of reservoir-induced earthquake of Three Gorges project. *Chinese Journal of Rock Mechanics and Engineering*, 27(8) (August): 1513-1524. [Lake Mead and Hoover Dam, p. 1514.] [In Chinese; title from English-language abstract.]

Chen, Dong

- 2011 11.11524 *Hydrodynamic and water quality modeling of Lake Mead under changing water levels.* Las Vegas: Desert Research Institute, Department of Hydrologic Sciences, for Nevada Water Resources Research Institute, 43, [34] pp.

Chen, Dong; Acharya, Kumud; Stone, Mark; AND Duan, J. G.

- 2007 11.11522 *Suspended sediment transport study in the Las Vegas Wash.* Las Vegas: Desert Research Institute, Technical Report.

Chen, Dong; Stone, Mark; AND Li, Yiping

- 2009 11.11525 *Hydrodynamic modeling of Lake Mead under changing water levels.* Las Vegas: Desert Research Institute, Technical Report.

Chen, Dong; Sun, HongGuang; AND Zhang, Yong

- 2013 11.11521 Fractional dispersion equation for sediment suspension. *Journal of Hydrology*, 491: 13-22. [See "The Las Vegas Wash", pp. 17-18, and discussions in text thereafter.]

Chen, Ling-kun; Jiang, Li-zhong; Guo, Wei; Liu, Wen-shuo; Zeng, Zhi-ping; AND Chen, Ge-wei

- 2014 11.8570 The seismic response of high-speed railway bridges subjected to near-fault forward directivity ground motions using a vehicle-track-bridge element. *Shock and Vibration*, 2014: article ID 985602, doi:10.1155/2014/985602, 17 pp. [Data include Imperial Valley.]

Chen, Lu, AND Singh, Vijay P.

- 2017 11.12340 Generalized beta distribution of the second kind for flood frequency analysis. *Entropy* (MDPI: Multidisciplinary Digital Publishing Institute, Basel, Switzerland), 19(254), 17 pp. [Colorado River basin. Data from Upper Basin gauge stations and Hoover Dam but omits Lees Ferry.]

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Chen, Mingjie; Tompson, Andrew F. B.; Mellors, Robert J.; AND Abdalla, Osman

- 2015 11.16479 An efficient optimization of well placement and control for a geothermal prospect under geological uncertainty. *Applied Energy*, 137 (January): 352-363. [Near Superstition Mountain, California; Salton Sea region.]

Chen, Xiaowei, AND Cheng, Yi-Fang

- 2015 11.15560 Multi-scale comparison of source parameter estimation using empirical Greens function approach [ABSTRACT]. *American Geophysical Union, 2015 Fall Meeting, San Francisco, California, 14-18 December*, Abstract S43E-02. [Includes Salton Sea geothermal field.]

Chen, Xiaowei, AND Shearer, Peter M.

- 2009 11.7327 Analysis of earthquake source spectra in Salton Trough [ABSTRACT]. *Eos (American Geophysical Union, Transactions)*, 90(52, Fall Meeting Supplement), Abstract T31A-1787.
- 2010 11.7302 Earthquake source parameters and swarm migration behavior in the Salton Trough [ABSTRACT]. *American Geophysical Union, 2010 Fall Meeting, San Francisco, California, 13-17 December*, Abstract S33B-2101.
- 2011 11.6896 Comprehensive analysis of earthquake source spectra and swarms in the Salton Trough, California. *Journal of Geophysical Research*, 116, B09309, doi:10.1029/2011JB009263, 17 pp.

Chenevoy, Maurice, AND Piboule, Michel

- 2007 11.13367 *Hydrothermalisme : spéciation métallique hydrique et systèmes hydrothermaux*. Les Ulis: EDP Sciences, 619 pp. (Grenoble Sciences.) [Salton Sea hydrothermal system, see p. 480.] [In French.]

Cheng, Yifang, AND Chen, Xiaowei

- 2015 11.11739 Effect of geothermal operations on seismic characteristics in the Salton Sea Geothermal Field. *In*: Schneider, Robert Vincent (ed.), *Society of Exploration Geophysicists : expanded abstracts : 2015 technical program*. [No place]: Society of Exploration Geophysicists, pp. 5063-5068. [Society of Exploration Geophysicists International Exposition and 85th Annual Meeting, New Orleans, Louisiana, USA, 18-23 October 2015.]
- 2015 11.15514 Analysis of earthquake clustering and source spectra in the Salton Sea Geothermal Field [ABSTRACT]. *American Geophysical Union, 2015 Fall Meeting, San Francisco, California, 14-18 December*, Abstract T43D-3043.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

2016 11.15543 Seismicity and source spectra analysis in Salton Sea Geothermal Field [ABSTRACT]. *American Geophysical Union, 2016 Fall Meeting, San Francisco, California, 12-16 December*, Abstract S31B-2740.

2018 11.15686 Characteristics of seismicity inside and outside of the Salton Sea Geothermal Field. *Seismological Society of America, Bulletin*, 108(4): 1877-1888.

Cheng, Yifang; Ben-Zion, Yehuda; AND Zaliapin, Ilya V.

2018 11.15945 Informative space-time-magnitude-mechanism features of earthquakes in southern California [ABSTRACT]. *American Geophysical Union, 2018 Fall Meeting, Washington, D.C., 10-14 December 2018*, Abstract S41C-0534. [Includes Salton Sea and Imperial Valley areas.]

Cheung, K.; Hilley, G. E.; Moon, S.; Saltzman, J.; AND Sanquini, A.

2011 11.7271 Imaging the San Andreas fault between Parkfield and the Salton Sea using wavelet analysis of airborne laser swath mapping data [ABSTRACT]. *American Geophysical Union, 2011 Fall Meeting, San Francisco, California, 5-9 December*, Abstract ED41A-0491.

Chew, Randall T., AND Antrim, Donald R.

1982 11.3843 *National Uranium Resource Evaluation : data release on the Salton Sea quadrangle, California and Arizona*. U.S. Department of Energy, Grand Junction Area Office, GJBX 190-82, 6 pp. (Prepared for U.S. Department of Energy, Assistant Secretary for Nuclear energy, Grand Junction Area Office.)

Chicago Record

1897 11.9984 *Klondike : the Chicago Record's book for gold seekers*. [No imprint] (Copyright 1897 Chicago Record), 555 [560] pp. [Produced without imprint so that other suppliers may stamp their own names on title-page.] [See Chapter 33, "Gold in American Deserts", pp. 469-485, which includes the lower Colorado River region.]

Chickering, J. J.

1891 11.2231 The new lake in the Colorado Desert. *The Christian Union* (New York), 44(4) (July 25): 176. [Salton Sea.]

Chikita, Kazuhisa

1980 11.11947 Sedimentation by turbidity currents. *Hokkaido University, Faculty of Science, Journal, Series 7* (Geophysics), 6(2): 255-300. [Lake Mead noted, p. 256.]

Chrupalo, Travis Roman

- 2014 11.8848 *Finite element analysis of the Meloland Road overpass and alternate model configurations.* Master's thesis, University of California at San Diego, 86 pp.

Chu, R., AND Helmberger, D. V.

- 2013 11.15097 Source parameters of the shallow 2012 Brawley earthquake, Imperial Valley. *Seismological Society of America, Bulletin*, 103(2A): 1141-1147.

Cintra Buenrostro, Carlos Edgar

- 2006 *11.13032* *Bivalve mollusk paleoecology: Trophic and environmental reconstruction from stable isotopes, sclerochronology and shell damage.* Doctoral dissertation, University of Arizona, 231 pp. [Colorado River delta region.]
- 2006 *11.14866* Growth rate comparison between Gulf of California Pleistocene and modern *Chione* spp. (Mollusca: Bivalvia) inhabiting rhodolith beds. *2nd International Rhodolith Meeting, La Paz, B.C.S., México.*
- 2012 *11.13033* Would predatory drillhole frequency on *Chione* spp. increase under the suggested climate change scenario? Comparing Pleistocene and modern rhodolith beds. *International Journal of Modern Botany*, 2(4): 103-107. [*Mulinia coloradoensis*, upper Gulf of California, see p. 105.]

Cintra Buenrostro, Carlos E., AND Flessa, Karl W.

- 2002 *11.13034* Ecological role of *Mulinia coloradoensis* in the pre-dam ecosystem of the Colorado River delta, Gulf of California, México [ABSTRACT]. *International meeting on Geology of the Baja California Peninsula, La Paz, Baja California Sur, Mexico, April 4-6, 2002.*
- 2002 *11.13035* A hearty meal in the Holocene: Trophic consequences of environmental change on the Colorado River delta, México [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 34(6): 542.
- 2003 *11.13036* Trophic consequences of reduced flow to the Colorado River estuary: Evidence from predatory damage in subfossil shells [ABSTRACT]. *Joint Estuarine and Coast Science Association-Estuarine Research Federation Symposium, San Carlos, Sonora, Mexico.*
- 2004 *11.13037* Cavidades, mordiscos y peladas: herramientas para determinar la importancia trófica de una especie en desvanecimiento dentro del delta del Río Colorado, México. *Ciencia y Mar* (Universidad del Mar, Oaxaca, México), 8(24): 3-19. [In Spanish, with abstracts also in English and French.]
- 2004 *11.13038* A thirsty clam on a salty delta: Determining the amount of freshwater needed by *Mulinia coloradoensis* in the Colorado River delta and estuary [ABSTRACT]. *Gulf of California Conference, Proceedings, Tucson, Arizona, June 13-16, 2004.*

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Cintra Buenrostro, Carlos E.; Rowell, Kirsten; Téllez Duarte, Miguel; Flessa, Karl W.; AND Dettman, David

- 2006 *11.14867* Growth rate comparison between Gulf of California Pleistocene and modern *Chione* spp. (Mollusca: Bivalvia) inhabiting rhodolith beds. *2nd International Rhodolith Meeting, La Paz, B.C.S., México.*

Claiborne, Lily L.; Lang, Nicholas P.; Miller, Calvin F.; AND Heerboth, Melissa

- 2016 11.10780 Best practices in integrated field and lab-based Research Experiences for Undergraduates: Lessons from a 3 year REU program in the southern Black Mountain volcanic center, AZ [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 48(7): Paper 68-25, doi:10.1130/abs/2016AM-287856. [Black Mountains.]

Claiborne, Lily L.; Miller, Calvin F.; Lang, Nick P.; Cribb, J. Warner; McDowell, Susanne M.; AND Foley, Michelle L.

- 2016 11.10770 Before and after a supervolcano: REU investigations of the evolution of magmatism in the southern Black Mountains volcanic center, AZ, surrounding the Peach Spring Tuff supereruption [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 48(7): Paper 47-10, doi:10.1130/abs/2016AM-286532. [Research Experiences for Undergraduates program.] [Peach Springs Tuff.]

Claiborne, Lily L.; Miller, Calvin F.; Lang, Nick P.; Ferguson, Charles A.; Varga, Robert J.; McDowell, Susanne M.; Cribb, J. Warner; AND Covey, Aaron K.

- 2015 11.9243 An ignimbrite sandwich: Understanding the evolution of the Peach Spring Tuff supereruption system through petrologic examinations of preceding and postdating explosive eruptions—an NSF-REU study [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 47(7): 280. [National Science Foundation, Research Experiences for Undergraduates program.] [Peach Springs Tuff.]

Clapp, W. B., AND Hoyt, J. C.

- 1906 11.2444 Report of progress of stream measurements for the calendar year 1905. Part XIII.—Great Basin and Pacific Ocean drainages in California, and Colorado River drainage below Gila River. *U.S. Geological Survey, Water-Supply and Irrigation Paper 177 (Series P, Hydrographic Progress Reports, 53)*, 273 pp. (*U.S. 59th Congress, 1st Session, House of Representatives Document 761.*)

Clark, C. E.; Harto, C. B.; Schroeder, J. N.; Martino, L. E.; AND Horner, R. M.

- 2013 11.7834 *Life cycle water consumption and water resource assessment for utility-scale geothermal systems: An in-depth analysis of historical and forthcoming EGS projects.* Argonne, Illinois: Argonne National Laboratory, Environmental Science Division, SEPARATELY PAGINATED SECTIONS [148 pp. total]. (ANL/EVS/R-12/8.) [Enhanced Geothermal System.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

González Escobar, Mario; Gallardo Mata, Clemente G.; Martín, Arturo [Martín Barajas, Arturo]; **Munguia, Luis; AND Suárez Vidal, Francisco**

- 2016 *11.11276* Subsurface constraints of an active detachment fault in Laguna Salada Basin, Baja California, México, from interpretation of seismic-reflection profiles. *Geosphere*, 12(4) (August): 1283-1299.

González Escobar, Mario; Martín Barajas, Arturo; AND Mares Miguel, Ángel

- 2018 *11.17035* Estructura de un segmento de la zona de falla Cerro Prieto al sureste de la Sierra Cucapah, Baja California, a partir de sísmica de reflexión [ABSTRACT]. *Geos* (Unión Geofísica Mexicana), 38(1) (November): 67. [In Spanish.]

González Escobar, Mario; Mendoza Borunda, Ramón; Suárez Vidal, Francisco; Arregui Ojeda, Sergio Manuel

- 2013 *11.7133* Estructura y tectónica en la región del delta del Río Colorado (Valle de Mexicali), Baja California, México, evidencias a partir de sísmica de reflexión [ABSTRACT]. *In*: 2013 Reunión I, Unión Geofísica Mexicana, A.C. *Geos* (Unión Geofísica Mexicana), 33(1) (October): 301. [In Spanish.]

González Escobar, Mario; Reyes Martínez, C. Simon; Montalvo Arrieta, Juan Carlos; Aladro Chio, Young Ho; Gallegos Catillo, Cristian A.; Mastache Román, Edgar A.; AND Arregui Ojeda, Sergio

- 2021 *11.18671* Evidencias geofísicas de estructuras en un sector del Valle de Mexicali, Baja California, México [ABSTRACT]. *In*: González Ortega, Javier Alejandro, Vidal Villegas, José Antonio, Núñez Leal, María Alejandra, and Ramírez Ramos, Erik Esteban (organizadores), Sesión especial; A 10 Años del Sismo El Mayor-Cucapah (MW 7.2). *Geos* (Unión Geofísica Mexicana), 40(1) (February): 134. [In Spanish.]

González Escobar, Mario; Suarez Vidal, Francisco; Mendoza Borunda, Ramón; Martin Barajas, Arturo; Pacheco, M. R.; Arregui Estrada, S.; Gallardo Mata, C.; Sanchez Garcia, C.; AND Chanes Martinez, J.

- 2012 *11.7257* Structural and tectonic map along the Pacific-North America plate boundary in northern Gulf of California, Sonora Desert and Valle de Mexicali, Mexico, from seismic reflection evidence [ABSTRACT]. *American Geophysical Union, 2012 Fall Meeting, San Francisco, California, 3-7 December*, Abstract T43F-2756.

González Fernández, Antonio; Lázaro Mancilla, Octavio; Contreras Corvera, Alma Angelina; Stock, Joann Miriam; Ramírez Hernández, Jorge; Reyes López, Jaime Alonso; Carreón Diazconti, Concepción; AND López, Dina L.

- 2014 *11.12232* Búsqueda de fallas utilizando sísmica, georadar y radón en el tecnológico de Mexicali, B.C. [ABSTRACT]. *In*: Reunión I, Unión Geofísica Mexicana, 2 al 7 noviembre 2014. *Geos* (Unión Geofísica Mexicana), 34(1) (November): 29. [In Spanish.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

González Fernández, Antonio; Lázaro Mancilla, Octavio; Hole, John A.; Stock, Joann Miriam; Fuis, Gary S.; AND Rymer, Michael J.

- 2014 *11.12220* Sísmica de gran ángulo en el noreste del valle de Mexicali, Baja California [ABSTRACT]. *In: Reunión I, Unión Geofísica Mexicana*, 2 al 7 noviembre 2014. *Geos (Unión Geofísica Mexicana)*, 34(1) (November): 33. [In Spanish.]

González Fernández, Antonio; Neumann, Florian; Negrete Aranda, Raquel; Contreras, Juan; Batista Cruz, Ramón Y.; Kretschmar, Thomas; Avilés Esquivel, Thalía A.; Reyes Ortega, Valeria; Flores Luna, Carlos F.; Gomez Trevino, Enrique; Martin, Arturo; AND Constable, Steven

- 2017 *11.15519* Conceptual model for the geothermal system of the Wagner Basin, Gulf of California [ABSTRACT]. *American Geophysical Union, 2017 Fall Meeting, New Orleans, Louisiana, 11-15 December*, Abstract T23B-0614.

González García, J. Javier

- 1990 *11.16244* La Falla Imperial en el Valle de Mexicali. *Revista de Ingeniería Sísmica*, (40) (December): 35-46. [In Spanish.]

González García, José Javier, AND González Ortega, J. Alejandro

- 2000 11.3597 Salton Sink (Cuenca Saltón), hundiéndose aún? Observaciones de nivelación de primer orden, GPS y más [ABSTRACT]. *Geos (Unión Geofísica Mexicana)*, 20(3) (October): 168. [Global Positioning System.] [In Spanish.]
- 2013 *11.7123* Mexicali: ¿Cuántas fallas más? [ABSTRACT]. *In: 2013 Reunión I, Unión Geofísica Mexicana, A.C. Geos (Unión Geofísica Mexicana)*, 33(1) (October): 280. [In Spanish.]

González García, J. Javier; González Ortega, J. Alejandro; Robles Avalos, Juan Carlos; AND Martinez Barcena, Hebert

- 2019 11.17344 GeodVel; it's the better geodetic Plate Tectonic model at the border between NorthAmerica and Pacific? [*sic*] [ABSTRACT]. *American Geophysical Union, 2019 Fall Meeting, San Francisco, CA, 9-13 December 2019*, Abstract G41B-0717. [Includes Salton Buttes.]

Gonzalez, J. Javier [González García, J. Javier]; McClusky, Simon; King, Robert; Reilinger, Robert; AND Bennett, Richard

- 1997 *11.7462* Present-day tectonic deformation from GPS in northern Baja California, Mexico [ABSTRACT]. *American Geophysical Union, 1997 Fall Meeting*, Abstract G41B-04. [Global Positioning System.]

Gonzalez, J. Javier [González García, J. Javier]; Nava, F. Alejandro; AND Reyes, C. Alfonso

- 1984 *11.8083* Foreshock and aftershock activity of the 1976 Mesa de Andrade, Mexico, earthquake. *Seismological Society of America, Bulletin*, 74(1) (February): 223-233.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

González Huizar, Héctor; Velasco, Aaron A.; AND Castro Escamill, Raúl Ramón

- 2021 *11.18665* The 2010 El Mayor-Cucapah (MW 7.2) earthquake and its conversation with other earthquakes [ABSTRACT]. *In*: González Ortega, Javier Alejandro, Vidal Villegas, José Antonio, Núñez Leal, María Alejandra, and Ramírez Ramos, Erik Esteban (organizadores), Sesión especial; A 10 Años del Sismo El Mayor-Cucapah (MW 7.2). *Geos* (Unión Geofísica Mexicana), 40(1) (February): 133.

González León, Carlos M.

- 2010 *11.7625* Evolución geológica y disposición del paisaje actual. *In*: Molina-Freaner, Francisco E., and Van Devender, Thomas R. (eds.), *Diversidad biológica de Sonora*. México: Universidad Nacional Autónoma de México, and Comisión Nacional para el Conocimiento y Uso de la Biodiversidad (CONABIO), pp. 19-49. [In Spanish.]

González López, Marcario

- 1999 *11.18593* Actualización del modelo del basamento en el campo geotérmico de Cerro Prieto, B.C., México. Update of the basement model of the Cerro Prieto, B.C., geothermal field, Mexico. *Geotermia* (Revista Mexicana de Geoenergía) (Comisión Federal de Electricidad), 15(1) (January/April): 19-23. [In Spanish, with bilingual title and abstract.]

González Ortega, Alejandro; Fialko, Yuri A.; Sandwell, David; Nava Pichardo, F. Alejandro [Nava Pichardo, Fidencio Alejandro]; **Fletcher, John M.; González García, Javier** [González García, José Javier]; **Lipovsky, Brad; Floyd, Michael; AND Funning, Gareth**

- 2014 *11.15256* El Mayor-Cucapah (M_W 7.2) earthquake: Early near-field postseismic deformation from InSAR and GPS observations. *Journal of Geophysical Research: Solid Earth*, 119: 1482-1497 + Supplementary Information online (Figures S1, S2, 5 pp.), doi:10.2002/2013JB010193. [Interferometric Synthetic Aperture Radar; Global Positioning System.]

González Ortega, J. Alejandro; González García, José Javier; AND Sandwell, David T.

- 2010 *11.17493* Interseismic velocity field and seismic moment release in northern Baja California, Mexico. *Seismological Research Letters*, 89(2A) (March/April): 526-533.

González Ortega, Alejandro; Gonzalez, Javier [González García, José Javier]; **Sandwell, David T.; Fialko, Yuri A.; Agnew, D. C.; Lipovsky, Brad; Fletcher, John M.; AND Nava, Fidencio**

- 2010 *11.7426* GPS coseismic and postseismic surface displacements of the El Mayor-Cucapah earthquake [ABSTRACT]. *American Geophysical Union, 2010 Fall Meeting, San Francisco, California, 13-17 December*, Abstract T53B-2124. [Global Positioning System.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

González Ortega, Alejandro; Sandwell, David T.; Fialko, Yuri A.; Nava, Fidencio; Fletcher, John M.; Floyd, Michael A.; AND Lipovsky, Brad

- 2011 *11.7418* El Mayor Cucapah earthquake: Postseismic deformation from InSAR and GPS observations [ABSTRACT]. *American Geophysical Union, 2011 Fall Meeting, San Francisco, California, 5-9 December*, Abstract G23A-0845. [Interferometric Synthetic Aperture Radar; Global Positioning System.]

González Ortega, Alejandro; Sandwell, David T.; Fialko, Yuri A.; Nava Pichardo, Fidencio Alejandro; Fletcher, John M.; González García, José Javier; Lipovsky, Brad; Floyd, Michael A.; AND Funning, Gareth

- 2013 *11.7105* El Mayor-Cucapah (Mw 7.2) earthquake: Early postseismic deformation from InSAR and GPS observations [ABSTRACT]. *In: 2013 Reunión I, Unión Geofísica Mexicana, A.C. Geos (Unión Geofísica Mexicana)*, 33(1) (October): 50. [Interferometric Synthetic Aperture Radar; Global Positioning System.]

González Ortega, Alejandro; Velázquez Zaguilán, Arisai; González García, J. Javier; AND Sandwell, David T.

- 2019 *11.17346* Strain accumulation in the southernmost section of the San Andres [*sic*] fault system in northern Baja California, Mexico [ABSTRACT]. *American Geophysical Union, 2019 Fall Meeting, San Francisco, CA, 9-13 December 2019*, Abstract G41B-0714. [San Andreas fault.]

González Partida, Eduardo

- 2014 *11.12222* La energía geotérmica en México: Algunos aspectos geológicos y de interacción agua/roca de los principales campos productores de energía [ABSTRACT]. *In: Reunión I, Unión Geofísica Mexicana*, 2 al 7 noviembre 2014. *Geos (Unión Geofísica Mexicana)*, 34(1) (November): 70. [Includes Cerro Prieto geothermal field.] [In Spanish.]

González Partida, Eduardo; Pérez Zárate, D.; Santoyo Gutiérrez, E.; González Ruiz, L. E.; Díaz Carreño, E.; Romero Roja, M. C.; Romero Rojas, W.; Gutiérrez Armendáriz, E.; AND Vázquez Ramírez, J.

- 2014 *11.12845* La energía geotérmica en México: algunos aspectos geológicos de los principales campos productores de energía. *In: Flores Castro, K., and Delgadillo Escobar, A. A. (eds.), programa y resúmenes del XXIV Congreso Nacional de Geoquímica. Actas INAGEQ (Instituto Nacional de Geoquímica) (México)*, 20(1) (October): 52-59. [In Spanish.]

González Rubio, J. L., AND Illescas, F.

- 1981 *11.9110* Test of a total flow helical rotor screw expander at Cerro Prieto, Mexico. *In: Geothermal Energy: The International Success Story; Geothermal Resources Council*

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

1981 Annual Meeting, October 25-29, 1981, Houston, Texas. *Geothermal Resources Council, Transactions*, 5: 425-427.

Gonzalez, J., AND González Ortega, J. A.

2000 11.7406 Is Salton Sink still sinking? First order leveling, GPS, and other observations [ABSTRACT]. *Eos* (American Geophysical Union, Transactions), 81(48, Fall Meeting Supplement), Abstract G12A-08. [Global Positioning System.]

Gonzalez, J.; González Ortega, J. A.; Bock, Y.; Fialko, Y. A.; Fielding, E. J.; Fletcher, J. M.; Galetzka, J.; Hudnut, K. W.; Munguia, L.; Nelson, S. M.; Rockwell, T. K.; Sandwell, D. T.; AND Stock, J. M.

2010 11.7313 Seismotectonics of the 2010 El Mayor Cucapah-Indiviso earthquake and its relation to seismic hazard in southern California [ABSTRACT]. *American Geophysical Union, 2010 Fall Meeting, San Francisco, California, 13-17 December*, Abstract T53B-2117.

Goodfriend, Glenn A.

1994 *11.9774* Mixed-age mollusk assemblages in Holocene marine deposits: Analysis by amino acid racemization [ABSTRACT]. *In*: Abstracts of the Eighth International Conference on Geochronology, Cosmochronology and Isotope Geology : ICOG8 by the Golden Gate : Berkeley, California, USA, June 5-11, 1994. *U.S. Geological Survey, Circular 1107*, p. 113. [Includes Colorado River discharges recorded in late Holocene cheniers on the coast of Baja California.]

Goodfriend, Glenn A., AND Flessa, Karl W.

1997 *11.1249* Radiocarbon reservoir ages in the Gulf of California: Roles of upwelling and flow from the Colorado River. *Radiocarbon*, 39: 139-148.

Goodman, Malcolm A.

1981 11.8583 Temperature histories in geothermal wells: Survey of rock thermomechanical properties and drilling, production, and injection case studies. *Sandia National Laboratories, Contractor Report SAND81-7 128*, 88 pp. (Contract No. 13-8769.) (Prepared by Sandia National Laboratories, Albuquerque, New Mexico, and Livermore, California, for U.S. Department of Energy; Contract No. DE-AC-4-76DP00789.) [Includes Imperial Valley.]

1981 11.8584 Lost circulation in geothermal wells: Survey and evaluatin of industry experience. *Sandia National Laboratories, Contractor Report SAND81-7 129*, 46 pp. (Prepared by Sandia National Laboratories, Albuquerque, New Mexico, and Livermore, California, for U.S. Department of Energy; Contract No. DE-AC-4-76DP00789.) [Includes Imperial Valley.]

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Goodwin, David H.

- 1998 *11.3481* Hot times in the Pleistocene: Estimates of winter and summer temperatures during the last interglacial [ABSTRACT]. *27th Annual GeoDaze Geoscience Symposium, Tucson, AZ.*

Goodwin, David H.; Flessa, Karl W.; AND Dettman, David L.

- 1999 *11.3698* Detecting the limits of stratigraphic resolution: Assessing spatial and temporal mixing using annual isotopic profiles [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 31(____): A438. [Geological Society of America, Annual Meeting.]

Goodwin, David H.; Flessa, Karl W.; Schöne, Bernd R.; AND Dettman, David L.

- 2001 *11.3687* Sclerochronologically-calibrated oxygen isotope profiles detect time-averaging in bivalve mollusk assemblages [ABSTRACT]. *In: NAPC 2001 : North American Paleontological Convention, Berkeley, CA, June 2001.*
- 2001 *11.11620* Cross-calibration of daily growth increments, stable isotope variation, and temperature in the Gulf of California bivalve mollusk *Chione cortezi*: Implications for paleoenvironmental analysis. *Palaios*, 16: 387-398. [Study site at Estero Chayo, Isla Montague, Colorado River delta.]

Goodwin, David H.; Flessa, Karl W.; Tellez Duarte, Miguel A.; Dettman, David L.; Schoene, Bernd R.; AND Ávila Serrano, Guillermo E.

- 2004 *11.1166* Detecting time-averaging and spatial mixing using oxygen isotope variation; a case study. *Paleogeography, Palaeoclimatology, Palaeoecology*, 205(1/2): 1-21.

Goodwin, David H.; Paul, Prabasaj; AND Wissink, Christine L.

- 2009 *11.1815* MoGroFunGen; a numeral model for reconstructing intra-annual growth rates of bivalve mollusks. *Paleogeography, Palaeoclimatology, Palaeoecology*, 276(1/4): 47-55.

Gootee, Brian F.

- 2013 11.6045 Geologic evaluation of Yuma Basin for carbon dioxide sequestration potential. *Arizona Geological Survey, Open-File Report 13-04*, 17 pp. + appendices [45 pp. total], 3 plates.

Gootee, Brian F.; House, P. Kyle; Pearthree, Philip A.; Crow, Ryan S.; AND Bright, Jordon

- 2019 11.17128 The Trigo sediments—an early Pliocene offlap-sequence recording the demise of paleolake Blythe, Lower Colorado River corridor, Southwest USA [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 51(5): Paper No. 134-12 (<https://gsa.confex.com/gsa/2019AM/meetingapp.cgi/Paper/338339>).

Gootee, Brian F.; Pearthree, Philip A.; House, P. Kyle; Crow, Ryan; AND Bright, Jordon

- 2022 11.19043 Lacustrine off-lap sequence in Bouse Paleolake Blythe: A proxy for upstream LOCO basins and other similar closed-to-open basin transitions [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 54(5): abstract 253-3, <https://doi.org/10.1130/abs/2022AM-381664>. [Lower Colorado River Corridor.]

Gootee, Brian F.; Pearthree, Philip A.; House, P. Kyle; O'Connell, Brennan E.; AND Bright, Jordon

- 2016 11.10766 A sequence-stratigraphic interpretation of the upper bioclastic unit capping the Bouse Formation in the Cibola area, Arizona and California [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 48(7): Paper 301-3, doi:10.1130/abs/2016AM-285308.

Gootee, Brian F.; Pearthree, Philip A.; House, P. Kyle; Youberg, Ann; O'Connell, Brennan E.; AND Bright, Jordon

- 2016 11.11093 A sequence-stratigraphic interpretation of the upper bioclastic unit capping the Bouse formation in the Cibola area, Arizona and California. *In*: Reynolds, Robert E. (ed.), *Going LOCO : investigations along the lower Colorado River : 2016 Desert Symposium field guide and proceedings*. [No place]: California State University, Desert Studies Center, pp. 154-159.

Gootee, Brian F.; Pearthree, Philip A.; Spencer, Jon; House, P. Kyle; AND Youberg, Ann M.

- 2018 11.14801 Geologic mapping of Colorado River deposits in in [*sic*] the southern Blythe basin, between Ehrenberg and Cibola, Arizona and parts of California [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 50(5): Final Paper 64-6, doi:10.1130/abs/2018RM-313891.

Gordon, James H.

- 1924 11.298 Problems of the lower Colorado River. *Monthly Weather Review*, 52(4) (February): 95-98, plate facing p. 96.
 ≡ CROSS-LISTINGS |CITED» GCNHA Monograph 2: page 35| |CITED» GCNHA Monograph 8: page 2-11|
- 1924 *11.299* Tidal bore at mouth of Colorado River, December 8 to 10, 1923. *Monthly Weather Review*, 52(4) (February): 98-99.
 ≡ CROSS-LISTINGS |CITED» GCNHA Monograph 2: page 35| |CITED» GCNHA Monograph 8: page 2-11|

Gortsema, Gary C.

- 1993 11.12752 Selected data on water quantity and quality at four sites on streams draining public lands, Colorado River basin, southeastern Nevada, October 1988-September 1991. *U.S. Geological Survey, Open-File Report 93-439*, 31 pp.

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

McLaurin, John D.

- 1975 11.12152 (PRINCIPAL INVESTIGATOR) *Cartographic evaluation of Skylab S-192 scanner images : quarterly progress report*. Reston, Virginia: U.S. Geological Survey, for U.S. National Aeronautics and Space Administration, Lyndon B. Johnson Space Center, Principal Investigations Management Office, [7] pp. (Period November 1, 1974-January 31, 1975.) [Includes Imperial Valley, California.]

McLin, Kristie S.; Kovac, K. M.; Moore, J. N.; Kaspereit, D.; Berard, B.; Xu, T.; McLin, R. H.; AND Hulen, J. B.

- 2006 11.9004 Modeling the geochemical effects of injection at Salton Sea geothermal field, California: Comparison with field observations. *In: Geothermal Resources—Securing Our Energy Future; Geothermal Resources Council 2006 Annual Meeting, September 10-13, 2006, San Diego, California. Geothermal Resources Council, Transactions, 30: 507-512.*

McLin, Kristie S.; Moore, Joseph N.; Hulen, Jeffrey; Bowman, John R.; AND Berard, Brian

- 2005 11.10866 The geochemical effects of injection into geothermal reservoirs [ABSTRACT]. *Geological Society of America, Abstracts with Programs, 37(7): 228.*
- 2006 11.2520 Mineral characterization of scale deposits in injection wells; Coso and Salton Sea geothermal fields, CA. *In: Proceedings, 31st Workshop on Geothermal Reservoir Engineering, Stanford University, Stanford, California, January 30-February 1, 2006, 8 pp.*

McManus, J.

- 1985 11.16220 Physical processes of reservoir sedimentation. *In: Bruk, Stevan (rapporteur), Methods of computing sedimentation in lakes and reservoirs : a contribution to the International Hydrological Programme, IHP-II Project, A.2.6.1 Panel.* Paris: UNESCO (printed by the Printing Department of the Jaroslav Černi Institute for the Development of Water Resources, Belgrade, Yugoslavia), pp. 11-39. [See section 2.3.2, "Degradation Below the Reservoir" (p. 19), which notes the Hoover, Parker, and Imperial Dams.] [Author credit is given in the Foreword [unpaginated] for the volume.]
- 1986 11.18957 Les mécanismes physiques de la sédimentation dans une retenue. *In: Bruk, Stevan (rapporteur), Méthodes de calcul de la sédimentation dans les lacs et les réservoirs : contribution au Programme Hydrologique Internationale, PHI-II Project, A.2.6.1 Panel.* Paris: UNESCO (imprimé par l'Institut des Eaux Jaroslav Černi, Belgrade), pp. 14-44. [See section 2-3-2, "Erosion à l'aval de la retenue", which notes the Hoover, Parker and Imperial Dams (p. 22).] [Author credit is given in the *Avant-Propos* [unpaginated] for the volume.] [In French.]

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

McMenamin, Mark A. S.

- 1998 11.1692 *The Garden of Ediacara : discovering the first complex life.* New York: Columbia University Press, 295 pp. [Includes Salton Sea and lower Colorado River.]

McQuarrie, Nadine, AND Oskin, Michael E.

- 2009 11.1628 What induces the collapse of orogens? Is South America next? *Geological Society of America, Abstracts with Programs*, 41(7): 516.

McQuarrie, Nadine, AND Wernicke, Brian P.

- 2010 11.1648 An animated tectonic reconstruction of southwestern North America since 36 Ma. *Geosphere*, 1(3): 147-172 (and an online animation viewable through geosphere.gsapubs.org).

McShan, Maggie, AND More, Corinne

- 1965 11.5402 *Ten rock trips near Needles, California.* Needles, California: Needles Desert Star, 30 pp.
- 1971 11.5403 *Ten rock trips near Needles, California.* Needles, California: [no imprint], 2nd ed., 30 pp.

McStroul, G., AND Simila, G.

- 2009 11.15146 Analysis of the microseismicity of the Salton Buttes region [ABSTRACT]. *In: New Insights in Historic Areas, Ventura, 2009 : another great meeting on the Pacific coast : Pacific Sections AAPG-SEPM-SEG Convention, May 2-6, 2009—Ventura, California*, p. 53. [American Association of Petroleum Geologists; Society of Economic Petrologists and Mineralogists; Society of Economic Geologists.]

McVey, Hal

- 1990 11.12712 (CONVENOR) The variety, uses, and demand for industrial-mineral resources in California. *In: Tooker, Edwin W., and Beeby, David J. (compiler-eds.), Industrial minerals in California: Economic importance, present availability, and future development. U.S. Geological Survey, Bulletin 1958*, pp. 7-28.

Mead, Elwood

- 1935 11.8352 Silt in Boulder Dam. *Reclamation Era*, 25(9) (September): 176. [Text of a reply to a letter received from John A. Street of Los Angeles, regarding the problems of silting behind Hoover Dam. With editor's unsigned introduction.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Mead, Elwood, AND Westergaard, H. M.

- 1931 11.12301 Ample security for Hoover Dam. *Civil Engineering*, 1 (August): 1001-1004. [Geological siting.]

Mead, J., AND Báez, A.

- 2003 11.6646 Crocodilian remains from the late Pleistocene of northeastern Sonora. *Crocodile Specialist Group Newsletter* (International Union for Conservation of Nature, Species Survival Commission), 22(1): 19-21. [Includes note of possible former occurrence in Colorado River delta area.]

Mead, Tom C. [Mead, Thomas C.]

- 1940 11.9643 Technical investigations at Boulder Dam. *Reclamation Era*, 30(6) (June): 162-165. [Issues relating to seismicity, silting, hydrology, drainage, and vibration studies.]
- 1949 11.8407 Earthquake at Hoover Dam. *Reclamation Era*, 35(2) (February): 31-32.

Mead, Tom C., AND Carder, D. S.

- 1941 11.525 Seismic investigations in the Boulder Dam area in 1940. *Seismological Society of America, Bulletin*, 31: 321-324.

Miller, Keith Ray

- 1980 11.8746 *Petrology, hydrothermal mineralogy, stable isotope geochemistry and fluid inclusion geothermometry of borehole Mesa 31-1, East Mesa Geothermal Field, Imperial Valley, California.* Master's thesis, University of California at Riverside, 113 pp.

Miller, Keith R., AND Elders, W. A.

- 1980 11.3175 Geology, hydrothermal petrology, stable isotope geochemistry, and fluid inclusion geothermometry of LASL geothermal test well C/T-1 (Mesa 31-1), East Mesa, Imperial Valley, California, USA. *Los Alamos Scientific Laboratory, Report LA-8515-MS*, 61 pp.

Miller, R. E.

- 1977 11.15422 A Galerkin, finite-element analysis of steady-state flow and heat transport in the shallow hydrothermal system in the East Mesa area, Imperial Valley, California. *JU.S. Geological Survey, Journal of Research*, 5(4) (July/August): 497-508.

Miller, Richard H., AND Dockum, Mark S.

- 1983 11.2467 Ordovician conodonts from metamorphosed carbonates of the Salton Trough, California. *Geology*, 11(7) (July): 410-412.

Miller, Robert Rush

- 1948 11.16465 The cyprinodont fishes of the Death Valley system of eastern California and southwestern Nevada. *University of Michigan, Museum of Zoology, Miscellaneous Publications*, (68), 155 pp., 15 plates, 2 maps. [Includes paleontology.]

Miller, Robert W.

- 1970 11.8552 Crustal movement investigations; triangulation. Part I. Imperial Valley, vicinity of El Centro. Part II. Anza-Borrego Desert area, California. *U.S. Coast and Geodetic Survey, Operational Data Report 10*, 117 pp.

Mills, James Gordon, Jr.

- 1985 11.1478 *The geology and geochemistry of volcanic and plutonic rocks in the Hoover Dam 7 1/2 minute quadrangle, Clark County, Nevada, and Mohave County, Arizona.* Master's thesis, University of Nevada at Las Vegas, 119 pp.
- 1993 11.546 The production of intermediate magmas through magma mixing and commingling: evidence from the Hoover Dam Volcanics, Mohave County, Arizona and Clark County, Nevada [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 25(5): 123.

Murphy, Janice M.; Goldman, Mark R.; Fuis, Gary S.; Rymer, Michael J.; Sickler, Robert R.; Miller, Summer A.; Butcher, Lesley; Ricketts, Jason W.; Criley, Coyn J.; Stock, Joann M.; Hole, John A.; AND Chavez, Greg

2010 11.3177 Seismic calibration shots conducted in 2009 in the Imperial Valley, southern California, for the Salton Seismic Imaging Project (SSIP). *U.S. Geological Survey, Open-File Report 2010-1295*, 17 pp.

Murphy, Janice M.; Rymer, Michael J.; Fuis, Gary S.; Stock, Joann M.; Goldman, Mark R.; Sickler, Robert R.; Miller, Summer A.; Criley, Coyn J.; Ricketts, Jason W.; AND Hole, John A.

2009 11.7331 Calibration shots recorded for the Salton Seismic Imaging Project, Salton Trough, California [ABSTRACT]. *Eos* (American Geophysical Union, Transactions), 90(52, Fall Meeting Supplement), Abstract T31A-1791.

Murphy, Ryan T., AND Faulds, James E.

2003 11.1169 Interactions between Tertiary magmatism and extension in the Colorado River extensional corridor, Union Pass area, northwestern Arizona [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 35(6): 348.

Murphy, Ryan T.; Faulds, James E.; AND Hillemeier, Frank L.

2004 11.1196 Evolution of Miocene extensional fault and fold systems and influence of magmatism in the northern Colorado River extensional corridor, Union Pass area, northwest Arizona [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 36(4): 21.

Murray, Bryan P.

2024 11.19486 Tales from the rift: Oligo-Miocene transtensional basin development and magmatism in the Soledad Rojo basin (Lower Colorado River Corridor) during early Pacific-North American plate interactions [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 56(5), abstract 73-10 (<https://doi.org/10.1130/abs/2024AM-404406>).

Murray, Bryan P., AND Al-kaabi, Abdulla

2018 11.14799 Preliminary stratigraphic interpretations of the Soledad Rojo formation in the Lower Colorado River Extensional Corridor, western Palo Verde Mountains, southeastern California [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 50(5): Final Paper 63-9, doi:10.1130/abs/2018RM-314270.

Murray, Bryan P.; House, Brianna J.; Al-kaabi, Abdulla; AND Hames, Willis E.

2019 11.16502 New geochronology and stratigraphic interpretations of the mid-Tertiary Soledad Rojo Formation in the lower Colorado River extensional corridor, western Palo Verde Mountains, SE California [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 51(4): doi:10.1130/abs/2019CD-329212.

Nicholson, Craig; Hauksson, Egill; AND Plesch, Andreas

- 2010 11.10885 Revised 3D fault models for the southern San Andreas fault system extending from San Gorgonio Pass to the Salton Sea [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 42(4): 69.

Nicholson, Uisdean; Carter, Andy [Carter, Andrew]; Akaa, Orji; AND Macdonald, David I. M.

- 2010 11.19499 Rapid diversification of zircon grains in the palaeo-Colorado River: re-establishing a "late-incision" model for the Grand Canyon [ABSTRACT]. *In: Schwarz, Ernesto, Georgieff, Sergio M., Piovano, Eduardo, and Ariztegui, Daniel (eds.), 18th International Sedimentological Congress, Mendoza, Argentina—26th September/1st October : abstracts volume : Sedimentology at the Foot of the Andes*. La Plata: International Association of Sedimentologists, Argentinean National Correspondant, p. 645.

Nicholson, Uisdean; Carter, Andrew; Robinson, Paula; AND Macdonald, David I. M.

- 2019 11.16147 Eocene-Recent drainage evolution of the Colorado River and its precursor: an integrated provenance perspective from SW California. *In: Corbett, P. W. M., Owen, A., Hartley, A. J., Pla-Pueyo, S., Barfeto, D., Hackney, C., and Kape, S. J. (eds.), River to reservoir: Geoscience to engineering*. *Geological Society (London), Special Publication 488*, doi:10.1144/SP488-2019-272.

Nicholson, Uisdean A. M.; Macdonald, David; AND Clift, Peter

- 2007 11.10873 Distinguishing sediment sources at strike-slip plate boundaries: Case studies from Sakhalin and California [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 39(6): 308. [Includes deltaic sediments from the Colorado River in the area west of the Salton Sea.]

Nickell, F. A.

- 1939 11.8392 Engineering geology of dams. *Reclamation Era*, 29(8) (August): 197-200. [Includes Hoover Dam.]

Nickles, J. M.

- 1910 11.18609 Mendenhall, W. C.—, "Ground waters of the Indio region, California, with a sketch of the Colorado Desert." U. S. Geol. Survey, Water-Supply Paper no. 225, 56 pp., 12 pls., 1909. *Geologisches Zentralblatt (Leipzig)*, 14(3) (April 1): 140-141. [Summary of Mendenhall (1909, *ITEM NO.* 11.529); in English.]
-

Nielson, Jane E. *see also* Nielson-Pike, Jane E.

- 1987 11.573 Evolution of the lower lithosphere near the California-Arizona crustal transect; evidence from xenoliths [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 19(7): 789.
 ≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 2-17|
- 1993 11.5232 Stratigraphic and structural correlation of Tertiary strata of the Mohave Mountains and Aubrey Hills, Ariz. *In*: Sherrod, David R., and Nielson, Jane E. (eds.), Tertiary stratigraphy of highly extended terranes, California, Arizona, and Nevada. *U.S. Geological Survey, Bulletin 2053*, pp. 133-138.
- 1995 11.16364 Evidence for post-Miocene uplift of the Castle Mountains and Piute Range, Mojave National Preserve, California [ABSTRACT]. *In*: Reynolds, Jennifer (compiler), Abstracts from proceedings; the 1995 Desert Research Symposium; combining the 9th Annual Mojave Desert Quaternary Research Symposium and the Desert Studies Consortium Symposium, San Bernardino County Museum, Redlands, California, May 19-22, 1995 [SECTION]. *San Bernardino County Museum Association Quarterly*, 42(2) (Spring): 39-40.

Nielson, Jane E., AND Beratan, K. K.

- 1990 11.574 Tertiary basin development and tectonic implications, Whipple detachment system, Colorado River extensional corridor, California and Arizona. *In*: Special section on California-Arizona Crustal Transect; Part 1. *Journal of Geophysical Research, B, Solid Earth and Planets*, 95(1): 599-614.
 ≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 2-27|

Nielson, Jane E., AND Nakata, John K.

- 1993 11.575 Flow origin of matrix structural zones and size-sorting of inclusions in dikes, Black Canyon, Arizona [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 24(7): A41.
- 1994 11.8009 Mantle origin and flow sorting of magacryst-xenolith inclusions in mafic dikes of Black Canyon, Arizona. *U.S. Geological Survey, Professional Paper 1541*, 41 pp.

Nielson, Jane E., AND Reynolds, Robert E.

- 1996 11.17728 The geology of southeastern California, viewed with detachment. *In*: Reynolds, Robert E., and Reynolds Jennifer (eds.), Punctuated chaos in the northeastern Mojave Desert. *San Bernardino County Museum Association Quarterly*, 43(1/2) (Winter/Spring): 23-28.

Nielson, Jane E.; Glazner, Allen F.; AND Lux, Daniel R.

- 1988 11.9178 Problems of dating the Peach Springs Tuff [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 20(3): 218.
 ≡ CROSS-LISTINGS |CITED» GCNHA Monograph 8: page 3-70|

- 1902 11.9757 *The waters above the firmament : or, The earth's annular system : the Mosaic record scientifically explained.* Philadelphia: Ferris and Leach, 2nd ed., revised and enlarged, 406 [407] pp. [The subtitle refers to the author's hypothesis of the earth having once had Saturn-like rings, which influenced the geological development of the earth; with concomitant Biblical interpretations. Regarding oil reserves, includes the remarks (p. 404): "The ocean that received the oil carbons from the north world must have been almost a boundless one. The same ocean rolled its carbon-laden waters around the San Jacinto Mountains, over the Salton basin and great Colorado Valley, and must have deposited a great fund of petroleum there. The same ocean and same current swept over the plains of Western and Southern Arizona, and must have planted some of it there."]

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Welhan, J. A.; Poreda, R.; Lupton, J. E.; AND Craig, H.

- 1978 *11.3092* Gas chemistry and helium isotopes at Cerro Prieto. Química de gases e isótopos del helio en Cerro Prieto. *In: Proceedings/Actas : First Symposium on the Cerro Prieto geothermal field, Baja California, Mexico, September 20-22, 1978, San Diego, California. Sponsored by United States Department of Energy, Division of Geothermal Energy, in cooperation with Comisión Federal de Electricidad de México.* Berkeley, California: Earth Sciences Division, Lawrence Berkeley Laboratory, University of California; and Mexicali, Baja California, México: Coordinadora Ejecutiva de Cerro Prieto, pp. 113-118. [In English and Spanish.]

Wellman, Edward Clifton

- 1997 11.783 *Fracture, faulting, and gouge development in tuff: A case study at Hoover Dam, Clark County, Nevada and Mojave [sic] County, Arizona.* Master's thesis, University of Nevada, Reno, 36 pp.

Wells, Ray E., AND Hillhouse, John W.

- 1989 11.9181 Paleomagnetism and tectonic rotation of the lower Miocene Peach Springs Tuff: Colorado Plateau, Arizona, to Barstow, California. *Geological Society of America, Bulletin*, 101: 846-863.
 ≡ CROSS-LISTINGS [CITED» GCNHA Monograph 8: page 3-93]

Wells, Stephen G.; Connell, Sean; AND Martin, Jay J.

- 1993 11.16349 Rise and fall of the desert pupfish, *Cyprinodon macularius*, at the Salton Sea. *In: Reynolds, Robert E., and Reynolds, Jennifer (eds.), Ashes, faults and basins: the 1993 Mojave Desert Quaternary Research Center Field Trip. San Bernardino County Museum Association, Special Publication 93-1*, pp. 39-49.

Welten, K. C.; Nishiizumi, K.; Caffee, M. W.; Masarik, J.; AND Wieler, R.

- 2001 11.7032 A complex exposure history of the Gold Basin L4-chondrite shower from cosmogenic radionuclides and noble gases. *32nd Lunar and Planetary Conference, Houston, TX, March 12-16, 2001*, [2] pp. [Also released as U.S. Department of Energy, Lawrence Livermore National Laboratory, Preprint UCRL-JC-145406.]

Wendt, D. S.; Neupane, G.; Davidson, C. L.; Zheng, R.; AND Bearden, M. A.

- 2018 11.15301 *GeoVision analysis: Geothermal Hybrid Systems Task Force report.* Idaho Falls, Idaho: Idaho National Laboratory, for U.S. Department of Energy, Geothermal Technologies Office under DOE Idaho Operations Office, 153 pp. (Contract No. DE-AC07-05ID14517.) (INL/EXT-17-42891. PNNL-27386.) [Includes Salton Sea geothermal field.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Wennerström, Andreas

- 2014 11.11500 October 14: Hoover damm-Las Vegas. *In*: Andersson, Emil, Ackervall, Eric, Enegren, Per, Karlsson, Christian, Lagenbach, Andreas, Larsson, Sofia, Medan, Vladimir, Partalo, Dario, Disa Rikardsdottir, Stål, Tobias, Thorsson, Sebastian, Wennerström, Andreas, and Öhrling, Christian, *US-Cordillera Excursion 2013*. (Per Enegren and Andreas Wennerström, eds.) Gothenberg, Sweden: University of Gothenberg, Department of Earth Sciences, pp. 21-22. (University of Gothenberg, Department of Earth Sciences, Report, 2014 C106.) (Göteborgs Universitet. Naturvetenskapliga fakulteten.) [In Swedish.]

Wenrich, Karen J.; Chenoweth, William L.; Finch, Warren I.; AND Scarborough, Robert B.

- 1989 11.786 Uranium in Arizona. *In*: Jenney, J. P., and Reynolds, S. J. (eds.), *Geologic evolution of Arizona. Arizona Geological Society, Digest 17*, pp. 759-794.
 ≡ CROSS-LISTINGS [CITED» GCNHA Monograph 8: page 2-28]

Weres, Oleh; Tsao, Leon; AND Iglesias, Eduardo

- 1981 *11.4033* Chemistry of silica in Cerro Prieto brines. *In*: México, Comisión Federal de Electricidad, and U.S. Department of Energy, Division of Geothermal Energy, *Actas : Segundo simposio sobre el campo geotermico de Cerro Prieto, Baja California, Mexico. Proceedings : Second Symposium on the Cerro Prieto Geothermal Field, Baja California, Mexico, October 17/19 [1979], Mexicali, Baja California, Mexico*. México: Talleres de Lito Ediciones Olimpia, [and?] [Berkeley, California]: [University of California at Berkeley, Lawrence Berkeley Laboratory, Earth Sciences Division].

Werner, H. H.

- 1970 11.3143 Contribution to the mineral extraction from supersaturated brines, Salton Sea area, California. *Geothermics*, 2(2): 1651-1655.

Werner, Stuart D., AND Agbadian, M. S.

- 1984 11.16918 Soil/structure interaction effects at El Centro, California[,] terminal substation building. *In*: International Association for Earthquake Engineering, *Proceedings of the Eighth World Conference on Earthquake Engineering, July 21-28, 1984, San Francisco, California, U.S.A. Volume 3. Soil stability, soil structure interaction and foundations*. Englewood Cliffs, New Jersey: Prentice-Hall, pp. 1073-1080.

Werner, Stuart D.; Beck, James L.; Katafygiotis, Lambros; AND Nisar, Ahmed

- 1993 11.8850 Seismic analysis of Meloland Road overcrossing using calibrated structural and foundation models. *In*: Ang, Alfredo Hua-Sing, and Villaverde, R. (eds.), *Structural Engineering in Natural Hazards Mitigation : papers presented at the Structures*

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Congress '93, April 19-21, 1993, Irvine, California, United States. New York: American Society of Civil Engineers, pp. 367-372.

Werner, Stuart D.; Beck, James L.; AND Levine, M. B.

- 1987 11.8844 Seismic response evaluation of Meloland Road overpass using 1979 Imperial Valley earthquake records. *Earthquake Engineering and Structural Dynamics*, 15(2) (February): 248-274.

Werner, Stuart D.; Crouse, C. B.; Katafygiotis, Lambros; AND Beck, James L.

- 1993 11.8843 *Model identification and seismic analysis of Meloland Road overcrossing : technical report.* Oakland, California, and Seattle, Washington: Dames and Moore, for California Department of Transportation, Division of Structures, Sacramento, SEPARATELY PAGINATED SECTIONS.

Werner, Stuart D.; Levine, M. B.; AND Beck, James L.

- 1985 11.8845 *Seismic response characteristics of Meloland Road overpass during 1979 Imperial Valley earthquake.* El Segundo, California: Agbabian Associates, SEPARATELY PAGINATED SECTIONS [265 pp. total]. (R-8222-5603.)

Wernicke, Brian P.

- 1990 11.4979 (ED.) Basin and Range extensional tectonics near the latitude of Las Vegas, Nevada. *Geological Society of America, Memoir 176*, 500 pp.

Wernicke, Brian P., AND Axen, Gary J.

- 1988 11.10038 On the role of isostasy in the evolution of normal fault systems. *Geology*, 16(9) (September): 848-851. [Includes Virgin Mountains and Beaver Dam Mountains.]

Wernicke, Brian P.; Raub, Timothy D.; Lander, E. Bruce; AND Grover, Jeffrey A.

- 2012 11.10120 Testing the Arizona River hypothesis: Detrital zircon spectra from orthoquartzite clasts in the mid-Tertiary Sespe Formation of coastal southern California [ABSTRACT]. *Geological Society of America, Abstracts with Programs*, 44(6): 80.

Wernicke, Brian P.; Snow, J. Kent; Axen, Gary J.; Burchfiel, B. Clark; Hodges, Kip V.; Walker, J. Douglas; AND Guth, Peter L.

- 1989 11.11773 (LEADERS) Extensional tectonics in the Basin and Range Province between the southern Sierra Nevada and the Colorado Plateau : The Basin and Range Province of Southern Nevada and Southeastern California, June 30-July 7, 1989 : Field Trip Guidebook T138. *28th International Geological Congress, Field Trip Guidebook T138.* Washington, D.C.: American Geophysical Union, 80 pp. [Within the areas embraced by this bibliography includes field trip stops in the Mormon Mountains, Virgin River Gorge, and Muddy Mountains.]

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2: GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

IN PART 11/SECTION 2 ITEM NUMBERS IN *ITALICS* ARE LIMITED TO MEXICO

Wernicke, Brian P.; Spencer, Jon E.; Burchfiel, B. Clark; AND Guth, Peter L.

- 1982 11.9999 Magnitude of crustal extension in the southern Great Basin. *Geology*, 10(10) (October): 499-502. [See also Comment by Frank Royse, 11(8) (August 1983): 495-496 ([ITEM NO. 11.10000](#)), and Reply by Wernicke, Spencer, and Guth, 496-497 ([ITEM NO. 11.10001](#)).]

Wernicke, Brian P.; Spencer, Jon E.; AND Guth, Peter L.

- 1983 11.10001 Reply [to Comment by Frank Royse]. *Geology*, 11(8) (August): 496-497. [Comment by Royse ([ITEM NO. 11.10000](#)) and Reply, pertaining to Wernicke *et al.* (1982, [ITEM NO. 11.9999](#)) on "Magnitude of crustal extension in the southern Great Basin".]

Wershow, H. N., AND Reinen, L. A.

- 2008 11.7338 Transpression-induced structural deformation in the southern Mecca Hills, California [ABSTRACT]. *Eos* (American Geophysical Union, Transactions), 89(53, Fall Meeting Supplement), Abstract G21A-0659.

Wessel, Kaitlin Nicole

- 2016 11.10636 *500 year rupture history of the Imperial fault at the international border through analysis of faulted Lake Cahuilla sediments, carbon-14 data, and climate data.* Master's thesis, San Diego State University, 61 pp.

Westenburg, Craig L.

- 1995 11.15665 Dissolved-solids contribution to the Colorado River from public lands in southeastern Nevada, through September 1993. *U.S. Geological Survey, Water-Resources Investigations Report 94-4210*, 25 pp.

Westergaard, H. M., AND Adkins, A. W.

- 1934 11.787 Deformation of the earth's surface due to weight of Boulder Reservoir. *U.S. Bureau of Reclamation, Technical Memorandum 422*, 34 pp.

- 2018 11.16584 The Neotoma Paleoecology Database, a multiproxy, international, community-curated data resource. *Quaternary Research*, 89: 156-177. [This is an introduction to the Neotoma Paleoecology Database (<https://www.neotomadb.org>), named for the woodrats or packrats of the genus *Neotoma* and not restricted to that taxon. The database "is a community-curated data resource that supports interdisciplinary global change research by enabling broad-scale studies of taxon and community diversity, distributions, and dynamics during the large environmental changes of the past." On this site, at www.neotomadb.org/explorer, users may use metadata- or map-based query screens to search for specific information.]

PARTS 11 & 12 : SEPARATE-COVERAGE GROUP

SPECIALIZED MATERIAL ABOUT THE LOWER COLORADO RIVER REGION (BELOW GRAND CANYON)

PART 11

ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL,
OR CULTURAL ISSUES OF THE LOWER COLORADO RIVER REGION

SECTION 2:

GEOLOGY, PALEONTOLOGY, HYDROLOGY, AND RELATED DISCIPLINES

SECTION 2A

SEPARATELY PUBLISHED GEOLOGIC AND SPECIAL MAPS

[A [map](#) at the beginning of the Lower Colorado River separate-coverage unit of the bibliography delineates the area covered.]

Refer now to THE GRAND CANON Volume 2, CARTOBIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS, for guides to topographical quadrangles for the lower Colorado River region used by the U.S. Geological Survey and by Mexico's Instituto Nacional de Estadística y Geografía and likewise for geological maps of the Servicio Geológico Mexicano. See the [Appendix to Section 2A](#) in the present volume for an outline.

See [PART 24](#) for *separately published geologic maps* in the *greater Grand Canyon region*. Users who wish to examine all geological maps in context with all cartographical publications on the Grand Canyon–Lower Colorado River region should consult the *Cartobibliography* (refer to [Part 25](#) in the present volume for more information).

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2A: SEPARATELY PUBLISHED GEOLOGIC AND SPECIAL MAPS

NOTES FOR PART 11, SECTION 2A

SECTION 2A is a contiguous listing of *separately published* geologic and special maps for the lower Colorado River region.

Maps that are published as separate sheets within a monographic publication—for example, maps folded into pockets in those volumes, laid in loose, or included in separate volumes or boxes—are not generally cited separately in this bibliography but are considered part of the publications in which they appear, for which see in [Part 11, Section 2](#).

Maps listed in Section 2A are also cited in Volume 2, *Cartobibliography of the Grand Canyon and Lower Colorado River Regions* (in Volume 1 refer to notes in [Part 25](#)). Users who wish to examine these geological maps in context with all cartographical publications on the Grand Canyon–Lower Colorado River region, or in chronological order, should consult the *Cartobibliography*.

Fuis, Gary S., AND Blair, J. Luke

2022 11.18985 Preliminary geologic map of Early Miocene felsic eruptive centers in the Aquarius Mountains, west-central Arizona. *U.S. Geological Survey, Open-File Report 2022-1016*, 1 sheet, scale 1:15,000. [“The first author, Gary S. Fuis, conducted this mapping in the summer of 1967 in partial fulfillment of the entry requirements into the Ph.D. program of the Division of Geological and Planetary Sciences of the California Institute of Technology, Pasadena, Calif. The area mapped lies wholly within the Fort Rock Ranch, a private ranch spanning ~50 square miles in Mohave and Yavapai Counties, Arizona. Access to the ranch is limited, and it is uncertain whether a detailed geologic map of the Aquarius Mountains can be recreated today. Therefore, we are making this map available to the public in this Open-File Report.”]

- 1978 11.6212 Preliminary map; geothermal energy resources of Arizona. *Arizona Bureau of Geology and Mineral Technology, Geothermal Map 1*, 1 sheet, scale 1:1,000,000.

Hall, James

- 1857 11.17670 (ASSISTED BY J. P. Lesley) *Map illustrating the general geological features of the country West of the Mississippi River. Compiled from the surveys of W. H. Emory and from the Pacific Railroad Surveys and other sources.* *In*: Emory, William H., Report on the United States and Mexican boundary survey, made under the direction of the Secretary of the Interior. *U.S. 34th Congress, 1st Session, House Executive Document 135 AND Senate Executive Document 108*. ("Drawn by Th^o Jekyll." "Lith. of Sarony. Major & Knapp 449 Broadway New York".) [See the full citations for Emory (1857) as [ITEM NOS. 2.2542](#) and [2.18594](#).] [Hand-colored map. Not a separately published map as such, but cited here for its portrayal of the Grand Canyon region prior to even the first geological exploration in 1858. The base map depicts "Rio Colorado" from the head of "Gulf of California" northward approximately to the confluence of the Virgin River (not labeled), at which point the line depicting the river becomes dashed, as also is the lower reach of the Virgin. In the Grand Canyon region (largely blank), the Colorado is depicted on a generalized east-west course, connecting directly to, and only to, "Colorado Chiquito", with but two tributaries from the south (both unlabeled), the easterly one of which is Cataract Creek. Geologically, only rocks of igneous centers are depicted in the region, although some generalized, broadly applied shading appears in the area to designate "Devonian" rocks. On the western side of the Colorado River, between "F^t Yuma" and the head of the gulf, are depicted "Desert Quaternary" deposits.]

Miller, Fred K.

1970 11.6857 Geologic map of the Quartzsite quadrangle, Yuma County, Arizona. *U.S. Geological Survey, Geologic Quadrangle Map GQ-841*, 1 sheet, text 3 pp.

Mills, James Gordon, Jr.

1994 11.898 Geologic map of the Hoover Dam quadrangle, Arizona and Nevada. *Nevada Bureau of Mines and Geology, Map 102*, 1 sheet; text, 4 pp.

Morton, Paul K.

1966 11.19280 Geologic map of Imperial County, California, showing mines and mineral deposits. *State of California, The Resources Agency, Department of Conservation, Division of Mines and Geology, Imperial County Report 7*, Plate 1, scale 1:125,000. (Printed by Williams and Heintz Map Corporation, Washington, D.C.)

Muntean, Thomas W.

2013 11.6244 Preliminary geologic map of the Valley of Fire East quadrangle, Clark County, Nevada. *Nevada Bureau of Mines and Geology, Open-File Report 13-6*, 1 sheet, scale 1:24,000, text 7 pp.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 2A: SEPARATELY PUBLISHED GEOLOGIC AND SPECIAL MAPS

Murphy, Ryan T., AND Faulds, James E.

- 2013 11.15403 Preliminary geologic map of the north half of the Union Pass quadrangle, Mohave County, Arizona. *Arizona Geological Survey, Contributed Map 13-A*, 1 sheet, scale 1:24,000, text 8 pp.

N

Neumann, Terry R., AND Leszykowski, Andrew M.

- 1993 11.5404 Identified mineral resources of the Needles 1° × 2° map quadrangle, California. *U.S. Bureau of Mines, Mineral Land Assessment Open-File Report 93-14*, SEPARATELY PAGINATED SECTIONS, 2 sheets.

Nevada Bureau of Mines and Geology

- 1976 11.14978 Rockhound's map of Nevada. *Nevada Bureau of Mines and Geology, Special Publication 1*, 1 sheet, scale 1:1,000,000. [Superseded by *Special Publication 29* (Castor and LaPointe, 2001, [ITEM NO. 11.14979](#)).]
- 1976 11.19102 Satellite photomap of Nevada. *Nevada Bureau of Mines and Geology, Map 51*, 1 sheet, scale 1:1,000,000. ("Mosaic prepared by Soil Conservation Service, U. S. Dept. of Agriculture for national Aeronautics and Space Administration, from Earth Resources Technology Satellite-1 (ERTS-1) imagery, Band 5, July 23-Oct. 31, 1972.") [A second printing, 1981, 3000 copies printed by Williams and Heintz Map Corporation, Washington, D.C.]

Newberry, J. S. [Newberry, John Strong]

- 1861 11.9465 *Geological Map No. 1 : prepared by J. S. Newberry M.D. geologist of the expedition. Accompanying:* Newberry, John S., Part III; geological report [Newberry, 1861, [ITEM NO. 21.2455](#)]. *In:* Ives, Joseph C., *Report upon the Colorado River of the West, explored in 1857 and 1858 by Lieutenant Joseph C. Ives, Corps of Topographical Engineers, under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Captain Topographical Engineers, in charge. By order of the Secretary of War.* Washington, D.C.: U.S. Government Printing Office, 1 sheet, scale 1:380,160. [Part III is separately paginated in the volume.] (Volume: *U.S. 36th Congress, 1st Session, Senate Executive Document [no number], Serial 1058*.) [NOTE: The geologic map portrays geology by Newberry, overprinted in color on shaded-relief map by F. W. von Egloffstein, *Map No. 1, Rio Colorado of the West, Explored by 1st. Lieut. Joseph C. Ives, Top^l. Eng^{rs}. under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Capt. Top^l. Eng^{rs}. in charge, by order of Hon. John B. Floyd, Secretary of War. 1858.* (Egloffstein, 1861, [CARTOBIBLIOGRAPHY ITEM NO. 25.493](#);

ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL,
OR CULTURAL ISSUES OF THE LOWER COLORADO RIVER REGION

SECTION 3

ARCHAEOLOGY, INDIGENOUS CULTURES AND ISSUES, AND CONTEMPORARY CULTURAL RESOURCES AND PRESERVATION

[A [map](#) at the beginning of the Lower Colorado River separate-coverage unit of the bibliography delineates the area covered.]

See [Section 3A](#) for a "General Guide to Documentation for Places in the Lower Colorado River Region Listed in or Nominated to the NATIONAL REGISTER OF HISTORIC PLACES and the NATIONAL HISTORIC LANDMARK SYSTEM Administered by the U.S. National Park Service"

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3: ARCHAEOLOGY, INDIGENOUS CULTURES AND ISSUES, AND
CONTEMPORARY CULTURAL RESOURCES AND PRESERVATION

NOTES FOR PART 11, SECTION 3

SECTION 3 embraces Indigenous peoples of the lower Colorado River region (as detailed by the geographical bounds of this bibliography) as well as contemporary historical resources of the 19th and 20th centuries.

Within the lower Colorado River region there are Indigenous peoples who have traditional and legislatively administered lands in the U.S. and Mexico. Their geographical dispersal in areas of the greater Southwest is integral to their histories and unique cultural identities. These groups and their reserved lands are:

Moapa River Indian Tribe, Moapa River Indian Reservation (Nevada)

Fort Mojave Indian Tribe, Fort Mojave Indian Indian Reservation (Arizona, California & Nevada)

Colorado River Indian Tribes (Chemehuevi, Hopi, Mohave, and Navajo), Colorado River Indian Reservation (Arizona & California)

Chemehuevi Indian Tribe of the Chemehuevi Reservation (California)

Quechan Indian Tribe, Fort Yuma Indian Reservation (Arizona & California)

Cocopah Indian Tribe, Cocopah Indian Reservation (Arizona)

Cabazon Band of Mission Indians, Cabazon Reservation (California)

Torres Martinez Desert Cahuilla Indians, Torres Martinez Reservation (California)

Cucapá (or Cocopa, *Xawill kwnchawaay*) (Baja California, México; traditional lands in the Río Colorado delta)

In addition, bands of the Southern Paiute people have traditional-use ranges within the northern part of the lower Colorado River region

This section includes items that pertain to health concerns among lower Colorado River tribes.

For publications relating to Native Americans in the Grand Canyon region, see [Part 17](#).

Some items dated during and after the later-20th century may be available to the public only in redacted versions, wherein culturally sensitive or specific geographical data are removed or [REDACTED] obliterated. Unredacted versions will be in files accessible to qualified researchers and administrators. If no note regarding redacted parts appears with the document, or if there is no such note with its citation here, it does not necessarily mean that the document as seen or as available does not have data redacted. One may assume that

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3: ARCHAEOLOGY, INDIGENOUS CULTURES AND ISSUES, AND
CONTEMPORARY CULTURAL RESOURCES AND PRESERVATION

modern publications in scholarly serials already have been written in such a fashion that sensitive or restricted geographical or cultural information is left out. Pagination for some such reports as listed herein may omit additional pages or sections that did not appear in the redacted version that was cited for the bibliography.

Documents or citations that may have been seen by the compilers that pertain to wholly restricted documents, not available publicly, are not cited in this bibliography. While thus not properly compiling the body of work of individuals, organizations or agencies within the scope of this bibliography, the general unavailability of a document awards no merit for inclusion within a work such as this one, which identifies publicly available materials. (As with documents that had been denoted as “classified”, “restricted” or “secret” for purposes of national security, but which later are reclassified for public release, only then are these and comparably secured documents included in this bibliography.)

The words “archaeology” and “archeology” are spelled as used in document titles.

Included in Section 3 are items that relate to Colorado River water rights of the lower Colorado River Native American groups, although most of these also appear in [Part 12, Section 1](#) of this bibliography.

Also included in Section 3 are pertinent U.S. National Park Service summary records for historic sites, which include the Historic American Buildings Survey (HABS), Historic American Engineering Record (HAER), and Historic American Landscapes Survey (HALS) series. Most of these are accessible online through the Library of Congress website; and there, many of them are supplemented by large numbers of photographs and other graphical material.

For a bibliography pertaining to the Baja California peninsula as a whole, refer to the periodically updated document online, “Bibliography: Baja California: Prehistory, Early History, and Ethnography”, posted by the San Diego Archaeological Center, <https://sandiegoarchaeology.org/Laylander/Baja/bibliography1.pdf>.

111-113. (Volume: Smithsonian Institution, Publication 2407.) [Regarding the field work of John P. Harrington among the Chumashan and Yuman Indians of California and Arizona.]

1920	11.9319	The identification of fibers. [Figures 36-40.] <i>Textiles</i> (Boston), 17(2) (August): 16. [Part of a series of photomicrographical views of plant fibers. See "Fig. 38. Black poplar (<i>Populus nigra</i>) . . . The cottonwood of the United States (<i>Populus deltoides</i>) yields an abundance of long, soft, fibrous bark, used by the Indians for ropes, twines, sandals, mats, etc. 'Whoever has seen the petticoats made of the inner bark of the cottonwood (<i>P. fremonti</i>), worn by the squaws along the Colorado River, must have realized the possibility of utilizing the same material as well as that of the allied species.' (Dr. V. Havard.)" And see "Fig. 39. Willow wool (<i>Salix pentandra</i>) [. . .] The willow trees along the Colorado River, Arizona, yield [an] abundance of long, soft bast, from which the Indians make ropes and twine for domestic purposes, as well as sandals and mats. The females generally dress scantily, only that part of the body from the waist to the knees is hidden from view. This custom is observed by most of the Indian females living along the Colorado River. They strip off the bark from these trees and bury it in blue mud for a few days, after which it is taken out, washed clean, and dried. It is now soft, pliable, and easily handled. Being cut into requisite lengths, they are fastened very thickly to a belt of the wearer. ([Charles Richards] Dodge.)" (ENTIRE NOTES)]

- 1994 11.17559 Estrella dawn: The origin of the Maricopa. *Journal of the Southwest*, 36(1) (Spring): 54-75. [By-line reads: "Leroy Cameron via Ralph Cameron via Nick Sunn via Ike Gates via Dog's Hand, with notes by Donald Bahr".] [Relates to two Native American bands once known as Maricopas, but oral records include lower Colorado River and Havasupai of Havasu Canyon. Preamble to "The Text" (p. 60): "This story, as also told by Nick Sunn of the Maricopa Colony, is a transcription of a tape by his uncle (mother's brother) Ike Gates. Ike received the story from his uncle, Dog's Hand (*Huut He Shaal*), who was born at Maricopa Wells, Arizona. Ike's uncle's father, an eyewitness to all the following events, walked from the Parker Valley area. As nearly as we can tell, from the ages of the various narrators in the chain, this walk or migration would have occurred around the 1820s."]

HOOVER DAM, NEVADA–ARIZONA

CALIFORNIA–ARIZONA

ADDENDUM: Ancillary list of contractual historical-structures and cultural landscape reports unrelated to National Register nominations

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

All information in this Section, including illustrations, is derived from the original Nomination documents. Selected text is reproduced from the summary or the statement of significance portions of the nomination.

THIS SECTION identifies the documents that were used to nominate specific places of historical or cultural interest for inclusion in the National Register of Historic Places. Some places were also nominated to be listed as National Historic Landmarks. The U.S. National Park Service oversees both lists. Briefly, **“The National Register of Historic Places is the official list of the Nation’s historic places worthy of preservation. Authorized by the National Historic Preservation Act of 1966, the National Park Service’s National Register of Historic Places is part of a national program to coordinate and support public and private efforts to identify, evaluate, and protect America’s historic and archeological resources.”** National Historic Landmarks **“are nationally significant historic places designated by the Secretary of the Interior because they possess exceptional value or quality in illustrating or interpreting the heritage of the United States.”** Places are often listed on the National Register before being nominated for National Historic Landmark Status. (Information from respective NPS websites, <https://npgallery.nps.gov/NRHP/About/> and <https://www.nps.gov/nhl/>. Most places listed in this appendix have nomination documents that may be located through the search page at <https://npgallery.nps.gov/NRHP>.) (Links valid as of March 3, 2022.)

Some places are included within separately nominated “Historic Districts” that embrace many associated places of common historical significance. Other places rely on data from State-based preservational organizations.

While these documents are not “published” *per se*, and thus do not have a convenient citation style, they are a matter of public record, and multiple copies may be available in collections across the country. They often contain detailed historical information and supporting documentation that may not be accessible elsewhere.

For continuity with the remainder of this bibliography and in order to identify unique documents, each is assigned an **ITEM NO.** within Part 11.

In addition, interested users may wish to refer to entries listed in Part 11, Section 3 under:
[U.S. National Park Service, Historic American Buildings Survey \(HABS\)](#)
[U.S. National Park Service, Historic American Engineering Record \(HAER\)](#)
[U.S. National Park Service, Historic American Landscapes Survey \(HALS\)](#)

For National Register and National Landmark documents in the *greater Grand Canyon region*, see the [Appendix to Part 16](#).

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

BULLHEAD CITY, ARIZONA

11.15262

Hardyville Cemetery (listed August 30, 2001; 15 pp. plus photos)

(Hardyville Pioneer Cemetery)

1776 Highway 95, Bullhead City, Arizona; 2.5 acres. 1866-1897.

Nomination prepared May 2000, Elmona (Mona) Dahlstrom, Bullhead City, Arizona.

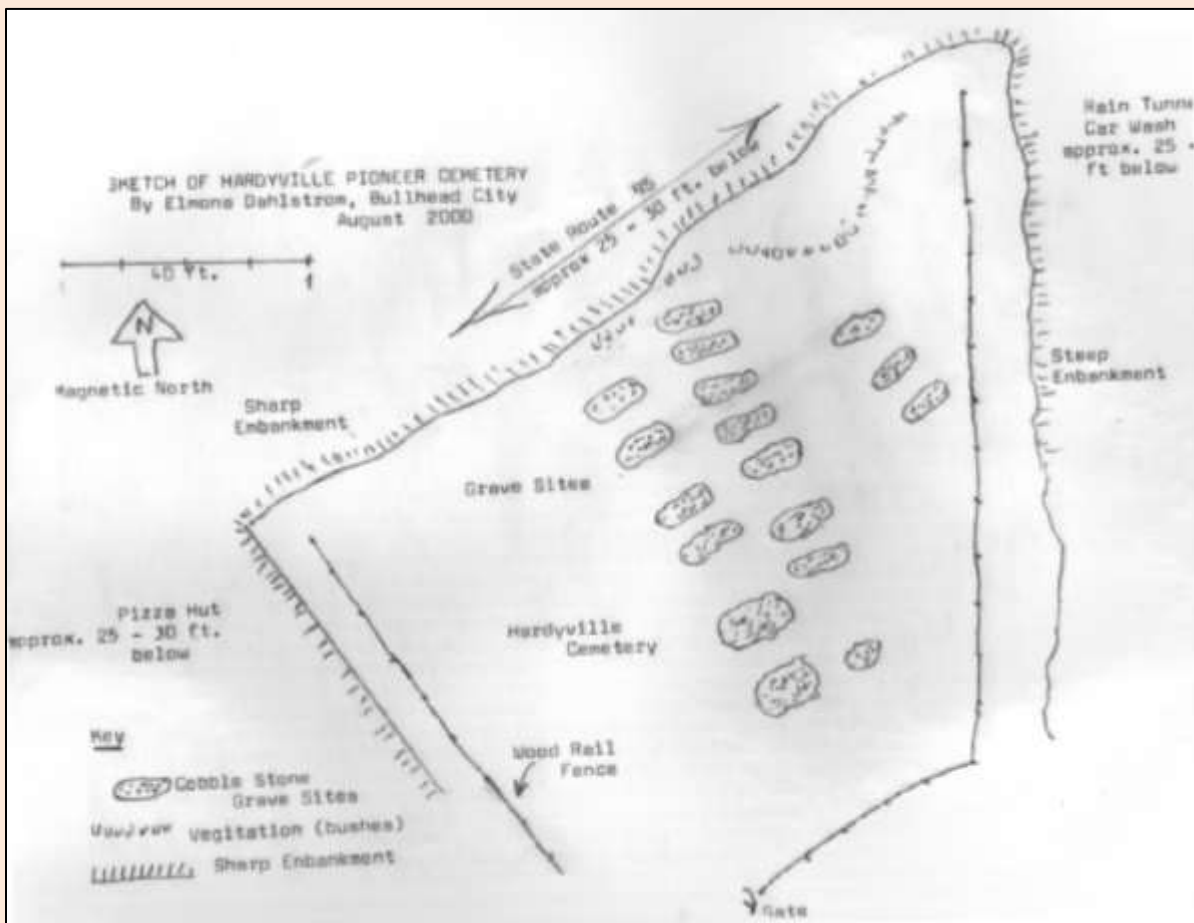

Summary: "The Hardyville Cemetery is a unique piece of history. It is the only remaining historic landmark dating back to Hardyville—a once thriving river community nestled on the banks of the Colorado River. Known as a shipping hub, Hardyville was the county seat from April 1867 to April 1873 and was home to the first U.S. Post Office in Mohave County. It was a thriving shipping port for steamboats, which carried both passengers and freight up and down the Colorado River. The cemetery is located in Bullhead City, Arizona, on a cliff overlooking the river in a part of the community with a mix of residential and commercial development. The cemetery, well hidden within a residential neighborhood, is just a few feet away from such commercial businesses as Pizza Hut, Benny's and Safeway. It rests atop the bluff overlooking Bullhead City's main roadway through the community, Highway 95, which is used by more than 20,000 cars daily. The Arizona Department of Transportation maintains Highway 95 and a large retaining wall that supports the west side of the cemetery as it rests upon the bluff. The cemetery itself sits on a small level mesa and was originally fenced with native poles made from small trees. The plot is between 60 to 220 ft long (eastwest) by 90 ft wide (north-south), and contains 17 graves sites, each of which is marked by an elongated pile of granite cobble stones, as it was in the 1800s. The cobble sites vary in height from 12 to 18 inches and are an average 3 ft wide by 8 ft long. The graves are approximately six feet apart in two separate rows. There is very little vegetation in the cemetery as is typical in the desert terrain in Bullhead City. It has remained in its natural state with no additional planting. The fence deteriorated over the years and was replaced between 1975-1980 by the local Kiwanis club and the developer of the Holiday Shores development. There are no grave markers in the cemetery. Over the years, weathering, natural deterioration and vandals caused all but two of them

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

to disappear. Those two were turned into the Kingman, Arizona, Chamber of Commerce by Vern Peterson, who had owned the surrounding property. The Chamber of Commerce then gave the markers to the Mohave Museum of History and Arts—Kingman.

“Since 1982, the cemetery has been maintained by a Bullhead City Boy Scout Troop (Troop 82), under the supervision of the Kiwanis of the Colorado River Club. They have rehabilitated the fence around the property, maintained the granite cobbles and cleaned around each grave site. The City of Bullhead City also provides help and supports the cemetery through its Public Works Department.”

KINGMAN, ARIZONA

11.15263

Historic Resources of Kingman, Arizona (listed May 14, 1986; 72 pp. plus photos)

Kingman, Arizona. 1882-1939.

Nomination prepared March 20, 1986, Cindy L. Myers and James W. Garrison, Phoenix, Arizona.

Summary: "The Kingman Multiple Resource Area includes the original townsite and the immediate surrounding area, as defined by the 1979 and 1984 Historic Property Surveys Within this area are buildings, structures, objects, and sites which represent the history of Kingman and exemplify the development of the community from its inception as a railroad town in 1882 through the end of the historic period in 1939. The MRA contains individual properties which illustrate the social, cultural, commercial, and architectural forces at work in the growth of the town during this 57-year period. Included are two archaeological sites which have the potential to yield information about these themes. The MRA encompasses a historic district consisting of the original business center of the town. The remainder of the properties are scattered throughout the MRA. These surrounding residential areas, while well-developed and completely infilled today, illustrate the dispersed pattern of development common in Kingman's historic period. The MRA contains 63 properties (53 individual and 10 within one historic district) which include a total of 82 contributing elements. These elements are counted as follows: 60 buildings, 16 structures, 4 objects, and 2 sites."

The National Register nomination cites the properties listed below, arranged by Inventory Number, which depend upon Arizona State Historic Property Inventory forms, which also are available online with the National Register nominations. Properties withdrawn from the nomination are not listed here (see the complete nomination form for details).

Individual Properties

0-1	Archaeological Site	Blocks B, C, D, E, 25, 26, Kingman Townsite	1880s-1940
1-1	George R. Kayser House	604 E. Oak	Ca. 1911
1-2	Raymond H. Carr House	620 E. Oak	1916

LITTLEFIELD, ARIZONA

11.15264

Sand Hollow Wash Bridge (listed September 30, 1988) [supplementary data to National Register information seen in the form of HABS/HAER Inventory record card].

Old U.S. Highway 91, 7.1 miles Northeast of Littlefield, Arizona. 1929-1930.

At time of nomination, owner of property was listed as “Mohave County”.

Summary: “In 1929, the Arizona Highway Department undertook the construction of the Nevada-Utah Highway, a 30-mile road which cut across the extreme northwest corner of the state. The project (FAR 92-A) was divided into three sections, or schedules, Schedules 1 and 3 involved grading and surfacing; Schedule 2 entailed the construction of several bridges. Largest of these was the crossing over Sand Hollow Wash, a wide ravine. For this, AMD designed a steel trestle comprised of riveted deck trusses supported by steel piers. In February 1929, AHO contracted with Salt Lake City bridge builder James J. Burke for the bridges for \$43,965. Burke’s crew began construction of the concrete abutments on March 31. Though scheduled for completion in September, problems delayed the work, and Burke had completed less than 25 percent at the deadline. In February 1930, he completed the bridge. The highway functioned until. It was superseded in 1962 by Interstate 15. It has been reduced to a county road, carrying local traffic near Littlefield. The roadway is today in deteriorated condition, but the Sand Hollow Wash Bridge remains intact. Although its impact on Arizona settlement was minimal, the Nevada-Utah Highway (U.S. Highway 91) was a major thoroughfare in the Southwest, connecting Las Vegas withine east. The Sand Hollow Wash Bridge is historically important as the major feature on that route in Arizona. It is technologically significant as one of four multi-span deck-trussed trestles identified in the inventory”

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

OATMAN, ARIZONA

11.15265

Durlin Hotel (listed August 25, 1983; 7 pp. plus photos)

(Oatman Hotel)

Main Street, Oatman, Arizona; less than 1 acre. 1924.

Nomination prepared May 1983, Bill Perreault and Roger Brevoort, Phoenix, Arizona (with information provided by Roman Malach, Kingman, Arizona).

At time of nomination, owner of property was listed as "Billie Jo Trammell, Oatman, Arizona".

Summary: "The Durlin/Oatman Hotel, constructed in 1924, is significant for its architectural qualities as the only two story, adobe building in Mohave County, Arizona. The building also possesses historical significance as a vestige of Oatman's early twentieth century prominence as a gold mining center.

"The Durlin/Oatman Hotel is historically significant as an intact vestige of Oatman's growth and development as the gold mining center of northern Arizona. Furthermore, the construction of the hotel in 1924 attests to the renewed economic vitality of Oatman following the fire which ravaged the boomtown in 1921."

11.15266

Oatman Drug Company Building (listed April 6, 2006; 16 pp. including photos)

1 Main Street, Oatman, Arizona; less than 1 acre. 1915-1953.

Nomination prepared August 8, 2003, Fred R. Eck, Bullhead City, Arizona (Carly Taravella, ed.).

At time of nomination, owner of property was listed as "Willa Noble Lucas, Oatman, Arizona".

Summary: "The Oatman Drug Company Building is a 120'X30' two-story wood and tin building which fronts onto Main Street in downtown Oatman. The building sits at the eastern edge of town near a large outcropping of quartz in the Black Mountains known locally as the Elephant's Tooth. The building is Western vernacular in style with a 'western boomtown' false front and board and batten/clapboard exterior. It has a front-gabled roof of corrugated tin, a second story balcony, and a porch which spans the second story of the building. The property's present condition is fair and it has not been greatly altered since its construction. The Oatman Drug Company currently houses a popular antiques and curio shop, and is celebrated locally as one of the few remaining buildings dating to the establishment of the mining town of Oatman, Arizona."

PARKER, ARIZONA

11.15267

Old Presbyterian Church (listed June 3, 1971); 7 pp. plus photos.

(Mojave Indian Presbyterian Mission Church)

Second Avenue, vicinity of Parker, Arizona; 10 acres. 1917.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

Nomination prepared October 9, 1970, Robert Fink, Phoenix, Arizona (from form prepared by D. H. Hall, August 28, 1970).

At time of nomination, owner of property was listed as "Colorado River Indian Tribes".

Summary: "Originally, the Mission occupied a site of ten acres which had been set aside in the records of the Bureau of Indian Affairs as 'Church Reserve' status. The ten acres has been returned to the Colorado River Indian Tribes. The actual historical site occupies approximately two and one-half acres of the original reserve. The structure is constructed of timbers and plastered adobe brick. The timbers were from an earlier building which stood on the reservation, a school. The timbers had been carried up the Colorado Aliver by steamer prior to 1877. The building itself is extremely simple and unpretentious. It has a length and width of 43 feet and 24 feet, respectively. Five windows on each side of the church are double hung types with sills and trim af wood. A louvered opening at the rear (west) end of the church serves as a ventilating device The roof structure is a simple saddle type with a belfry of wood located at the east (front) end. A brick chimney rises above the roof to the south of the belfry. In plan, the Church is a rectangle without wings. The interior is basically one room. At one time, there existed in the rear of the Church a residence for the Indian minister, but this has been removed. The building is structurally sound. However, vandals have broken out the glass in the windows and marred the exterior with paint."

POSTON (PARKER), ARIZONA

NATIONAL HISTORIC LANDMARK NOMINATION

11.15268

Poston Elementary School, Unit 1, Colorado River Relocation Center (listed 2014; 122 pp. including photos)

Poston Road, 0.4 mile west of Mohave Road, Parker, Arizona; contributing resources, 10 buildings, 6 structures; non-contributing resources, 6 buildings, 9 structures; 22 acres. 1942-1945.

Nomination prepared September 2011, R. Laurie Simmons and Thomas H. Simmons, Denver, Colorado.

At time of nomination, owner of property was listed as "Colorado River Indian Tribes".

Summary: "After President Franklin D. Roosevelt signed Executive Order 9066 on 19 February 1942, more than 120,000 Japanese Americans were removed from their homes and detained in a system of government assembly and relocation centers. The Colorado River Relocation Center (Poston) in Arizona became the second of ten relocation facilities to open, was one of the longest operated, and served as the largest of the centers until November 1943. Uniquely, Poston was the only facility that housed evacuees in three separate camps (Poston I, II, and III), and it contained the largest number of residents who arrived directly from their homes. Located on the Colorado River Indian Reservation, the center also held a unique position within the relocation system due to its administration by the Office of Indian Affairs (OIA) during 1942 and 1943. That agency's plans for improvement and management of the site reflected philosophies and policies developed through its traditional work with Native Americans. It envisioned employing Japanese American labor in the completion of a long-promised irrigation system that would turn the valley into a productive agricultural area and in the construction of permanent buildings that would benefit the reservation's inhabitants long after the relocation center closed. The lives of Japanese Americans at the center and the impact of OIA plans on the people and the site are represented by the remaining historic resources. Within the nominated area is the only standing elementary school complex within a former relocation center, as well as portions of two irrigation ditches. A Japanese American architect, Yoshisaku Hirose, designed the school buildings; evacuees drafted the plans and manufactured the adobe blocks used in their construction, and residents of the center erected the buildings. Japanese American laborers participated in

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

construction of the irrigation system that provided water for landscaping of living areas, established agricultural programs, and created recreational facilities. The property is significant under National Historic Landmark Criterion 1 for its association with nationally significant events identified with and representative of broad patterns in American history during World War II and from which an understanding and appreciation of those patterns may be gained. The property is significant in the areas of politics and government (The Relocation Decision), ethnic heritage (Japanese American History), and social history (History of Minorities in the U.S.). The Japanese Americans in World War II Theme Study recommended the Poston elementary school area for further study as a potential National Historic Landmark, "assuming its ability to testify to its national significance survives." The nominated portion of the Colorado River Relocation Center encompasses a site within the evacuee living area known as Poston I, occupied by Japanese Americans during 1942-1945. The nominated area consists of twentytwo acres of land in extreme western Arizona on the reservation of the Colorado River Indian Tribes (CRIT). The remote locale is 169 miles south of Las Vegas, 131 miles west of Phoenix, and 229 miles east of Los Angeles. The site is in La Paz County, southwest of the town of Parker, and lies about 3.5 miles east of the Colorado River, which forms the state's border with California

"The boundary was drawn to focus on the Poston I Elementary School complex and include contiguous extant resources associated with the Colorado River Relocation Center (Poston) that retain historic significance and integrity."

11.16377

Poston Relocation Center

(Colorado River War Relocation Center, Poston)

Parker, Arizona; contributing resources, 19 buildings, 7 sites, 27 structures; non-contributing resources, 217 buildings, 23 structures, 4 objects; 3,593 acres. 1942-1964.

Nomination prepared July 28, 2006, Jeff Burton and Mary Farrell, Western Archeological and Conservation Center, Tucson, Arizona.

At time of nomination, owner of property was listed as "Colorado River Indian Tribes".

Summary: "Poston is a visible reminder of the Japanese American Relocation, in which over 110,000 people, most of whom were citizens, were uprooted from their homes on the west coast and confined in ten relocation centers across the country during World War II. With more than 17,000 Japanese Americans, Poston was the largest relocation center. It still retains substantial integrity, including the largest number of internee-built structures remaining at any of the ten relocation centers. Some of these structures represent standard military plans; others represent a merging of Japanese architectural details and southwestern materials and techniques. Although touted as a "military necessity" at the time, the U.S. government itself later admitted the relocation was based on racial prejudice, wartime hysteria, and failed leadership.

"Poston, with much of the original relocation center still used for agriculture, retains integrity of setting, location, feeling, association, materials, and workmanship. Its potential for archaeological deposits indicates it could also provide information important in reconstructing details of internment life, including the ways in which the internees coped with confinement and maintained their ethnic identity in the face of extreme prejudice."

Complete document, with photos and maps

Burton, Jeffery F., AND Farrell, Mary M.

2006 11.16376 *Poston Relocation Center : National Register of Historic Places nomination.* Tucson: U.S. National Park Service, Western Archeological and Conservation Center, 159 pp.

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

TOPOCK, ARIZONA

11.15269

Old Trails Bridge (listed September 30, 1988) [supplementary data to National Register information seen in the form of HABS/HAER Inventory record card].

(Topock Bridge; Needles Bridge)

Abandoned U.S. Route 66 bridge across Colorado River; currently a pipeline bridge; 22 acres. 1942-1945.

Nomination prepared September 2011, R. Laurie Simmons and Thomas H. Simmons, Denver, Colorado.

At time of nomination, owner of property was listed as "El Paso Natural Gas Company".

Summary: "As the Ocean-to-Ocean Bridge (8533) was under construction in 1914, the states of Arizona and California and the U.S. Bureau of Indian Affairs sought to erect another substantial span over the Colorado River to serve the Old Trails Highway further north. Topock, Arizona—halfway between Yuma and the Utah Border—was chosen as the crossing site. Each entity contributed \$25,000, and San Bernadino [*sic*] County agreed to design the bridge and pay for any cost overruns. County surveyor S.A. Sourwine engineered this long-span steel arch. On June 30, 1915, the contract for fabrication and erection was let to the Kansas City Structural Steel Company. Under the direction of company construction superintendent Thomas McCurnin and county construction engineer J.P. Kimmerer, kansas City poured the footings and erected the arch using a unique cantilever technique in 1915. The bridge was completed on February 20, 1916. The Topock Bridge carried interstate traffic for U.S. 66 until 1947, when traffic was transferred to the nearby Red Rock Bridge. In 1948, its deck was removed to I [*sic*] a natural gas pipeline, which it still carries.

"The topock Bridge is historically significant in the Southwest as a pivotal crossing on the transcontinental Old Trails Highway. Technologically, the structure is nationally significant as an outstanding example of steel arch construction, called by the Engineering Record, 'exceptionally daring and successful for work of such magnitude.' Taking a cue from the difficulties experienced at Yuma, engineers for Kansas City Steel erected this bridge using a novel cantilever system, in which the bridge halves were assembled on their sides on the ground and hoisted into place using a unique ball-and-socket center hinge. At its completion the longest arch bridge in America, the 360-ton Topock Bridge was also distinguished as the lightest and longest three-hinged arch. The removal of the deck has done little to compromise the brige, and it remains a landmark in American civil engineering."

VALENTINE, ARIZONA

11.15270

Schoolhouse at Truxton Canon Training School (listed November 21, 2003); 18 pp. plus photos.

(Truxton Canyon Indian School; Valentine Indian School)

[Former] U.S. Route 66, Valentine, Arizona; less than 1 acre. 1903-1937.

Nomination prepared January 1999 (revised August 2003), Pat Haigh Stein, Flagstaff, Arizona.

At time of nomination, owner of property was listed as "Hualapai Indian Nation, Peach Springs, Arizona".

Summary: "The nominated property is the schoolhouse at the former Truxton Canyon Training School, a reservation boarding school that instructed mainly Hualapai Indians. The training school opened in 1901; however,

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

the schoolhouse was not built until 1903. The building originally was of 1 1/2 stories with a rear auditorium. In 1924, the front portion received a second story. In 1927-1928, the old auditorium was converted to a classroom and a new auditorium was built to the rear of it. Two small washrooms were installed in 1929. These modifications were compatible with the Colonial Revival design of the original structure. Since closing in 1937 the schoolhouse has been used only occasionally for community gatherings and storage purposes. Its setting has changed because of the demolition of related buildings, but the schoolhouse still retains strong integrity of location, design, workmanship, materials, association, and feeling. The owner, the Hualapai Indian Nation, is currently seeking funds to rehabilitate and reuse the edifice.”

WILLOW BEACH (COLORADO RIVER), ARIZONA
(Lake Mead National Recreation Area)

11.15271

Willow Beach Gauging Station (listed March 21, 1986), 5 pp., 5 photos.

117.08 acres.

Nomination prepared by F. Ross Holland, Jr.; revised form by Gordon Chappell, March 14, 1983.

Summary: “The Willow Beach Gauging Station, its cable tramway, »and its catwalk and trail approach, are located in the steep-walled Black Canyon of the Colorado River downstream from Boulder Dam, whose operation it served by measuring the flow of the Colorado River in the canyon below the dam. Originally the gauging station consisted of two gauging stations, both on the Nevada (west) side of the Colorado River, connected by bucket tramway cars hanging from cables across the river, which met on the Arizona side a combination of trail, catwalk hung from the wall of the canyon, and a third cable tramway across a side canyon, which extended southward along the Arizona side of the river to a residence and garage for the resident engineers. The residence and garage have been demolished, leaving only the terraced hillside with stone retaining walls on which they once stood. The lower gauging station and downstream tramway across the Colorado River also are gone. The remaining structures which are deemed to possess integrity, include the upstream gauging station, the cable tramway across the river from the gauging station to the trail, the trail along the Arizona side, the deteriorated but intact catwalk along the cliff, the trail south of the catwalk, the cable tramway across the side canyon on the Arizona side, the trail south of the catwalk to the residence site, and the stone retaining walls which mark the site of the residence and garage, which were approximately one and two thirds miles, as a crow flies, upstream from Willow Beach.

“The gauging station itself consists of a small, square, shed-roofed metal room.hung on a vertical cliff about forty to fifty feet above the surface of the river, whose level varies according to volume of flow. Beneath it, a corrugated pipe about four feet in diameter extends vertically from its floor into the water. The lower two thirds of the pipe above the water, and presumably all below, is connected not only to the cliff by metal supports, but shielded by solid concrete which prevents the water from passing between the pipe and the cliff and tearing it out. Above this concrete diverter, the gauging station is held to the cliff only by metal supports. The metal gauging room has three small four-lite windows* one next to the cliff on its north side, one on the north or upstream edge of the side which faces across the river, and one on the canyon wall or western edge of the side which faces downstream. On the outer edge of the south wall is a doorway, and along the entire south side of the gauging room is a porch. From that porch, a metal ladder leads upstairs to a flat platform with railing, mounted several feet above the shed roof of the gauging room. Near the canyon wall, another platform is mounted 1 story below the gauging room porch, which allows transfer from a ladder which leads down from that porch to the main ladder which is mounted near the corrugated pipe, and leads down to near the surface of the water. The gauging station may be approached either by boat and ladder from below, or by cable tramway to the platform above. The tramway consists of a flat,

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

shallow rectangular bucket hung by steel supports at each of its four corners from a pair of pulleys, one at each end, suspended from a single cable suspended across the river. From the east (Arizona) terminus of the cable tramway, a combination of trail along the edge of the cliff, a catwalk of wooden planks laid on steel supports driven into the cliff, with a railing of metal supports and metal cable along its outer edge, more trail, another cable tramway across a side canyon similar to the one described, and more trail, leads southward a distance slightly more than a mile to the site of the residence and garage, marked today only by concrete foundations and rubble retaining walls. The cable of a second tramway across the river to the second gauging facility (now gone), is still in place.”

YUMA, ARIZONA

11.15272

Blaisdell Slow Sand Filter Washing Machine (listed January 25, 1979; 11 pp. plus photos)

Yuma Water Treatment Plant, North Jones St. Yuma, Arizona

Nomination prepared June 25, 1978, T. Lindsay Baker, Lubbock, Texas.

Summary: “The Blaisdell Slow Sand Filter Washing Machine, invented by Hiram W. Blaisdell at the Yuma, Arizona, Waterworks circa 1902, constituted an early breakthrough in the development of machinery for the cleaning of sand filters used in the purification of drinking water. The machine in Yuma is the original prototype for Blaisdell’s invention upon which he received seven patents and which was used in numerous locations in the United States in subsequent years.

“Although the Blaisdell Slow Sand Filter Washing Machine at the Yuma Waterworks has not been used since 1954, it remains intact and in near operating condition at the present time. The aridity of the region, combined with minimal care from the employees of the Yuma Water Division, have served to preserve the machine in this high state. Even the oil can, grease bucket, and spare parts remain where they were left when the machine ceased normal operation two and a half decades ago. Although plans are under way for the construction of a new water treatment facility for the City of Yuma, officials in the Water Division plan to preserve the old Blaisdell Filter Washing Machine at the new plant.”

11.15273

Brinley Avenue Historic District (Yuma Multiple Resource Area, Partial Listing) (nomination received December 18, 1980; 9 pp. plus photos)

29-96 West Second Street / 198-200 South Main / 201 South First Avenue / 102-298 Madison Avenue, Yuma, Arizona; 25 contributing buildings, 12 non-contributing buildings; ca. 8.4 acres. 1916-1943.

Nomination prepared October 1979, Billy G. Garrett, Tempe, Arizona.

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

Summary: “The Brinley Avenue Historic District is of primary value as a physical manifestation of Yuma’s growth pattern—first as a small settlement oriented toward the Colorado River crossing and second as the business/social center of an extensive agricultural region. This expression is derived both from the position of the district on the western edge of the 19th century town, and from the position of the district between the 20th century commercial center and its governmental counterpart. Although these functions were essentially transitional the district was nonetheless a prestigious one associated with important people and institutions in the city’s history. A part of this attraction was due to the situation of the district on the eastern slope of the Yuma Mesa. This gave properties in the district some protection from the intermittent flooding which plagued the rest of the settlement. As a consequence of these natural and historic influences the historic district contains a good sample of Yuma building types—including the largest single concentration of 19th century adobe structures to be found in the community.”

The National Register nomination cites the properties with reference to appended Arizona State Historic Property Inventory forms, which also are available online with the National Register nominations.

Following is an excerpt from the National Register nomination, properties in which are keyed to the map (also reproduced below):

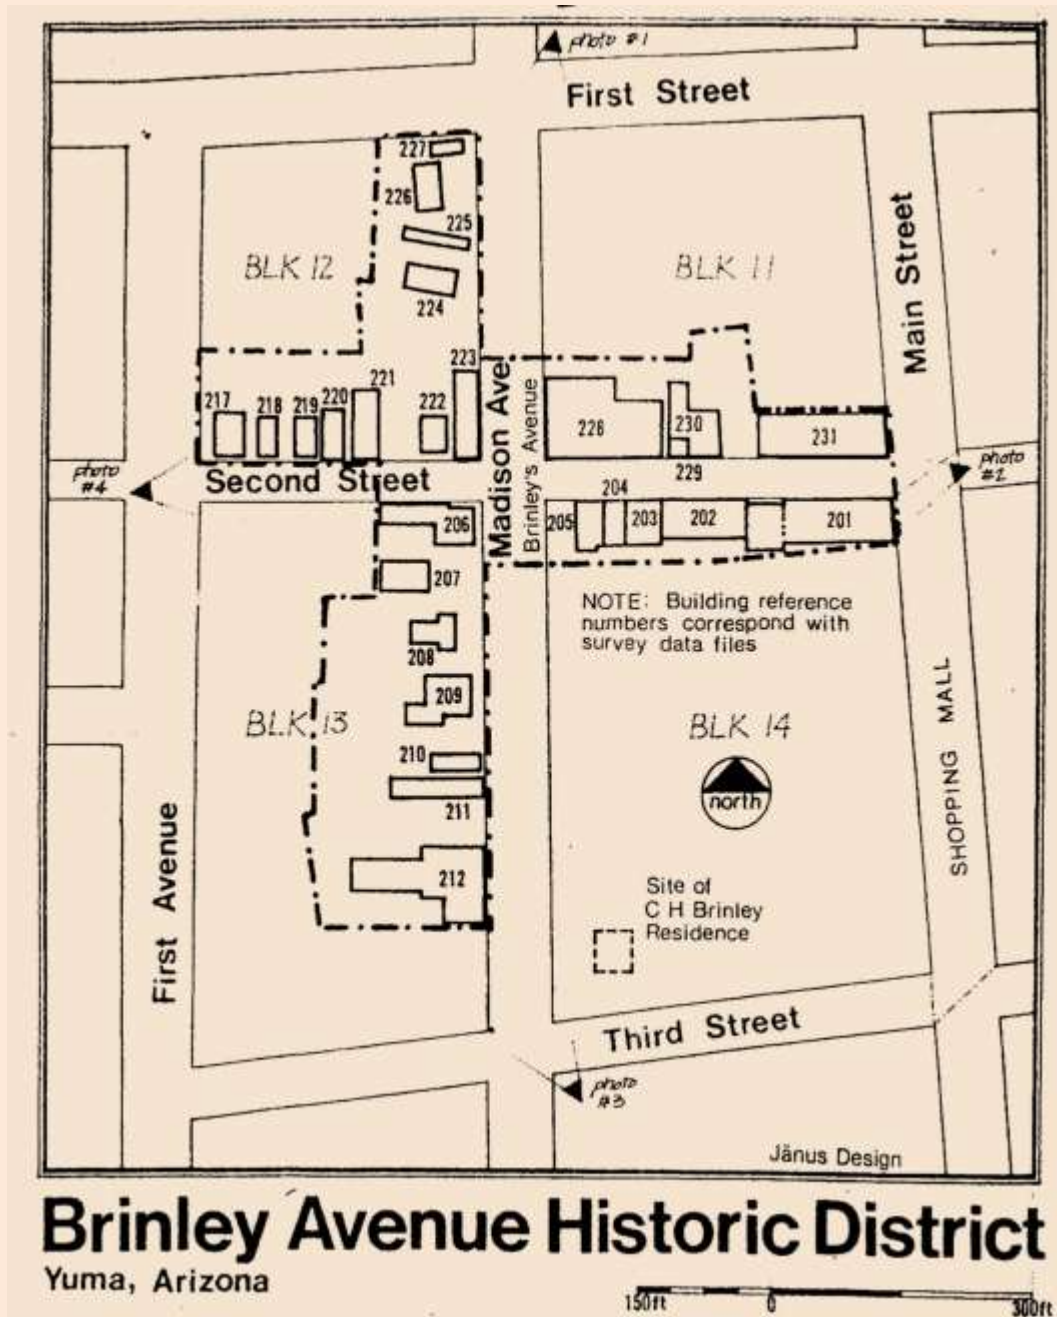

“Yuma’s citizenry. Included in this group were Isaac Polhamis (Yu207), David Neahr (Yu226) and E. F. Sanguinetti (Yu209). The homes of these pioneers were all situated on the west side of the street. Other properties, also situated on the west side of the street, included the first Yuma County Courthouse which is no longer extant, the Molina Block (Yu212) and the Popular Drug Store (Yu227). On the opposite side of the street, across the railroad tracks, there were a number of other significant properties, most of which were demolished by 1930. The most important of these properties were the residences of Abraham Frank, John Gandolfo and C. H. Brinley. With these few exceptions development on Madison (Brinley) Avenue has always been concentrated on the west side of the street. The single most important change in the district took place when 2nd Street developed as a route up to the mesa top. During the 19th century 2nd Street had been little more than a minor access street on the south side of the downtown area. By 1917 2nd Street had become the most important commercial cross street in Yuma. This new function stemmed from a shift in the local economy toward agricultural development west and south of the original settlement. Increased agricultural production stimulated business activity which, in turn, expanded the commercial district down Main Street to 3rd Street and underpinned construction of new governmental and educational facilities up on the mesa. Because it bisected the commercial strip on Main Street and ran directly into the middle of the new governmental center on 2nd Avenue, 2nd Street became the scene of active development during the first quarter of the 10th century. Noteworthy buildings erected on 2nd Street included the Sanguinetti General Mercantile (Yu201), the Gandolfo Annex (Yu228) and the Dorrington Block (Yu203). These large commercial structures were located between Main Street and Madison (Brinley) Avenue. To the west of Madison (Brinley) Avenue the buildings on 2nd Street tended to be smaller and mixed both commercial and residential types. Yet even in this section of the street there were visually prominent buildings erected. The Trautman Building (Yu223), Venegas Store (Yu220) and Napoleon House (Yu217) were all substantial projects.”

(see map on next page)

11.15274

“Ocean to Ocean” Highway Bridge (listed September 11, 1979; 23 pp. plus photos)

(Old Colorado River Highway Bridge)

Penitentiary Avenue (old U.S. Route Business 80), Yuma, Arizona; . 1914-1915.

Nomination prepared May 28, 1978, L. Lindsay Baker, Lubbock, Texas.

At time of nomination ownership described as “portion within City of Yuma, owned by City of Yuma; portion outside City of Yuma, owned by County of Yuma”.

Summary: “Constructed by the U.S. Office of Indian Affairs, with the assistance of funds provided by the State of Arizona and by Imperial County, California, the 1915 ‘Ocean to Ocean’ Highway Bridge upon its completion constituted the only highway bridge crossing the Colorado River for a distance of 1,200 miles. With only minimal alterations in the years since its erection, the bridge remains in service today carrying vehicular traffic across the river between the Fort Yuma Indian Reservation and the City of Yuma. The ‘Ocean to Ocean’ Highway Bridge consists of one large modified Pennsylvania pin-connected steel truss span and one smaller deck truss approach span. The two spans are supported on reinforced concrete abutments at each end of the bridge and one 60-foot reinforced concrete pier. The main span of the structure is 336 feet long and consists of fourteen 24-foot panels. The approach span at the south end of the bridge is 105 feet long and consists of six panels, each 17 feet 6 inches long. The total length of the structure is 444 feet 4 inches, including the abutments and roadway on the pier. The roadway is 21 feet 4 inches wide and a walkway is provided on either side of the structure. The minimum overhead clearance on the bridge originally was 15 feet, but roadway renovation in 1943 provided a greater minimum clearance of 16 feet 6 inches.”

11.15275

Southern Pacific Railroad Depot (listed June 22, 1976; 5 pp. plus photos)

Gila Avenue, Yuma, Arizona; 25 contributing buildings, 12 non-contributing buildings; less than 1 acre. 1926.

Nomination prepared December 29, 1975, Marjorie Wilson, Phoenix, Arizona.

Summary: “The Depot is a one-story building 166 x 50 feet in size. It is symmetrical with a central main section 66 x 50 feet and 25 feet in height and two wings, one to the north, and one to the south, each 50 x 50 feet square. At the time of construction the style was classified as Mediterranean with Spanish Influence. It is more properly a reflection of ‘Spanish Colonial Revival’ architecture popular after the Panama-California Exposition in San Diego (1915) until the middle 1940s. It is characterized by its low pitched red tile roof, flat/plain stuccoed surfaces and arched openings with detailed ornamentation. The west includes five central arches on spindled columns and two bay windows topped by ornamented attic vents. The east is similar to the west except for a long porch 15 x 65 feet, supported by columns. Behind the building, to the east, are the railroad tracks on top of a raised levee which was reached either by a flight of stairs or a ramp. When constructed, the central section of the building served as the passenger waiting room and also housed the ticket and telegraph offices, restrooms and lavatories. The south wing housed the trainmen’s quarters, and the north wing served as baggage and express office. The depot has been adapted to serve the community of Yuma as an Art Gallery/Museum. The waiting area and north wing serve as gallery space and a work room. The south wing is used for office space, special exhibits, restrooms and storage. External alterations during the renovation consist of the filling in of some 22 windows and doors, detail surrounding these openings was left and the main central portion of the building is intact, complete with the original doors and ceramic tile detailing.”

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

In addition is listed in Yuma the "Southern Pacific Railroad Passenger Coach Car; designated S.P. X7 in circa. 1875; S.P. 84 in 1886; S.P. 1643 in 1891; and S.P.M.W. in 1913", located at Yuma Crossing State Historic Park / Yuma Crossing National Historic Landmark (listed March 2, 2000). 11.15296

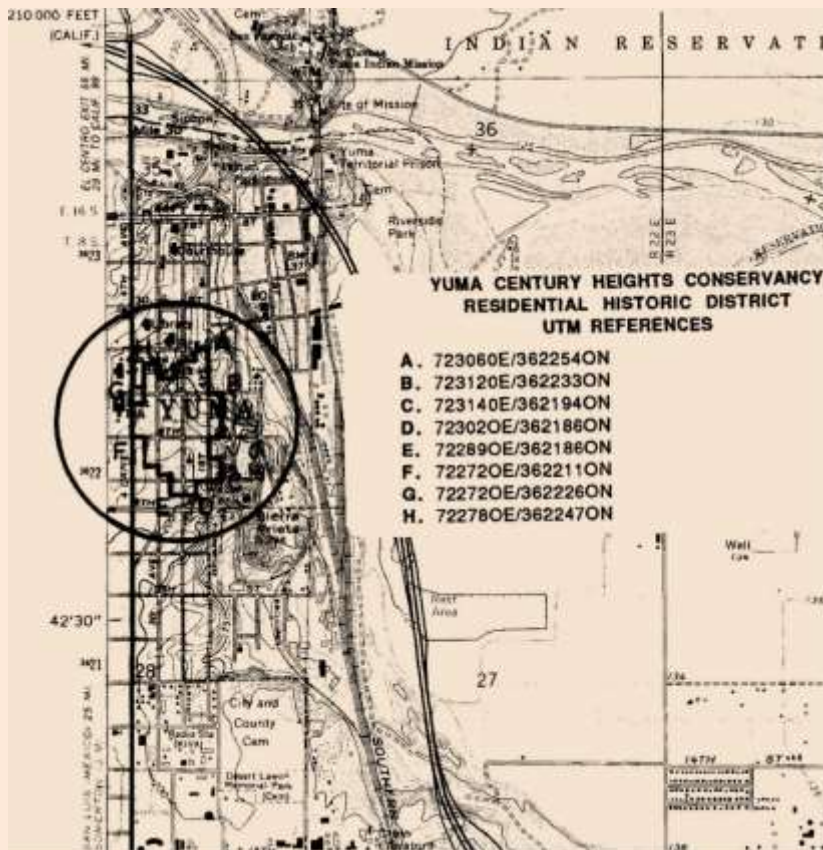

11.15276

Yuma Century Heights Conservancy Residential Historic District (listed October 11, 1988; 42 pp. plus photos)

Approximate boundaries 4th Avenue / 8th Street / 1st Avenue / Orange Avenue, Yuma, Arizona; 112 contributing buildings, 58 non-contributing buildings; 46 acres. 1892-1936.

Summary: "The Century Heights Conservancy Residential Historic District is nominated to the National Register of Historic Places under criteria 'a' and 'c' at the local level of significance for its contribution to our understanding of the settlement, early development, and architectural heritage of the City of Yuma. The period of significance (1892 to 1936) covers the span of time between the first development that occurred in the district up to the beginning of

rapid development prior to WWII. It reflects a historic development of the majority of the buildings within the district's boundaries and is important to the development of the City of Yuma. The area contains one of the largest, intact groupings of early residential architecture remaining in Yuma. The Century Heights Conservancy Residential Historic District in Yuma, Arizona includes 170 buildings which represent a concentration of distinct early Yuma residential building forms in a range of styles including Queen Anne, Territorial, Bungalow, and several Period Revival styles. The buildings in the district retain a moderate to high degree of integrity, are associated with pioneer families who settled early Yuma, and significantly represent working class and middle class residential development. Seventeen residences within the district's boundaries are currently listed on the National Register of Historic Places (1982) as individual contributors to the Yuma Multiple Resource Area nomination."

11.15277

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

Yuma Crossing (13 pp. plus photos)

Banks of the Colorado River, Yuma, Arizona; ca. 149 acres. 1852, 1866, 1874.

Nomination prepared March 15, 1993, Patricia Heintzelman, Landmark Review Project (original form prepared by Robert Utle, 1959; Charles Snell, 1963, William Brown, 1966).

At time of nomination, owner of property described as "Quechan Tribal Council, Yuma, Arizona".

Summary: "This complex of sites is located on the Arizona and California shores of the Colorado River at Yuma, Arizona. The prime significance of the Yuma Crossing lies in its role as a transportation and communication gateway, significant both as a crossing point between New Spain and Alta California during the Spanish colonial period and between the American Southwest and California during the period of the American westward movement. Physically and historically associated with the Yuma Crossing are three groups of historic structures. On the California shore stand the surviving buildings of Fort Yuma, U.S. Army post that guarded the Crossing from 1850 to 1885, which now house the Yuma Indian Agency. Opposite the fort, in Arizona, are the buildings of the Yuma Quartermaster Depot, from which the frontier forts of Arizona were supplied from 1864 until the 1880s. Just east of the Depot are stone cell blocks and guard towers of the Arizona Territorial prison. None of these sites is regarded individually as nationally significant and all have suffered various but not disqualifying impairment of integrity. Collectively the complex of sites possesses high historical significance: A. The River Crossing; B. Fort Yuma: Commanding Officer's Quarters, Company Quarters, Storehouse, Officers' Quarters, Officers' Kitchen, Sutler's Store; C. Quartermaster Depot: Officer's Quarters, Officers' Kitchen, Office, Reservoir, Storehouse, Granary D. Yuma Territorial Prison: Guard tower, Sally port, Museum 4, East cell block."

"The boundary for the Yuma Crossing and related sites has been drawn to include Fort Yuma, the U.S. Army Depot, and the Arizona Territorial Prison into a unified district. Any incidental features not associated directly with the crossing itself or the three groupings of buildings do not disrupt the integrity of the district but do not contribute to the national significance of the landmark, although some may be of state and local significance like the Yuma Siphon. Beginning at the border line of Imperial and Yuma Counties at UTM 11.723480.3624200 the boundary continues south along the lower ridge line continuing across the Colorado River following the lower ridge line below the prison to UTM 11.723820.3623210 then proceeding due west to Penitentiary Avenue, then north along the east edge of Penitentiary Avenue to Jones Street, then west along the south edge of Jones Street to a point where Jones Street deadends; then continuing in a straight line west below the south edge of the Siphon to an intersection with Route 80 (Fourth Avenue in Arizona); then north along the east edge of Route 80 to a point on the lower ridge line of the north bank of the Colorado River; then east along this line, curving north to join Route 10 (a continuation of Penitentiary Avenue), then northwest along Route 10 to a point in line with the Imperial County-Yuma County line, then east to the said county line, continuing east along said line to the point of beginning. Only the following sites and buildings contribute to the significance of the landmark. All others do not."

11.15278

Yuma Main Post Office (listed December 3, 1985; 11 pp. plus photos)

(Yuma Downtown Postal Annex)

370 West Third Street, Yuma, Arizona; 0.47 acre. 1933.

Nomination prepared August 1984, Paul R. Secord, Pasadena, California; and August 1985, H. Jim Kolva, Spokane, Washington.

Summary: "The Yuma Postal Annex is finely executed in design and well-Grafted in the use of native Arizona stone. Although constructed in the Depression Era, the building design is characteristic of the Beaux-Arts tradition that dominated federal design philosophy prior to 1930. The use of design style represents the final stage of the Beaux-Arts before the transition to the Starved Classicism. The building is imposing yet visually pleasing and is the best

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

example of its design style in the city. Finally, it is the city’s first federally constructed post office and its construction was a significant local event.”

11.15279

Yuma Main Street Historic District (listed March 10, 1994; 25 pp. plus photos)

170-387 South Main Street / 10-29 West Third Street, Yuma, Arizona; 25 contributing buildings, 12 non-contributing buildings; 12 acres. 1916-1943.

Nomination prepared March 15, 1993, Robert G. Graham, Phoenix, Arizona.

Summary: “The Yuma Main Street Historic District includes portions of three contiguous blocks of Yuma’s original central business district. The district was once the focal point for commercial activity in Yuma. Its commercial success related to the nearby ferry crossing at the north end of Main Street on the Colorado River. Although many of the buildings within the district have undergone several transformations since they were constructed, the district still conveys its appearance from the 1920s and 1930s. This was a time in Yuma when Spanish Colonial Revival architecture predominated, both in new buildings and remodelled facades of older buildings; this style therefore predominates on Main Street.”

Contributing properties are listed below by Inventory No., with properties previously listed on the national Register appended.

Hoover Dam, Nevada–Arizona

11.15281

Hoover Dam (listed April 8, 1981; [updated version] 12 pp. plus photos)

(Boulder Dam)

Black Canyon of the Colorado River, Nevada-Arizona; vicinity of Boulder City, Nevada; 220 acres. June 1933-September 1935.

Nomination prepared September 7, 1979, Joan Middleton, Boulder City, Nevada (revised May 31, 1985 by Laura Feller, National Park Service).

Property owned by U.S. Bureau of Reclamation.

Summary: "Hoover Dam is a concrete arch-gravity storage dam. The water load in this type of dam is carried both by gravity action and by horizontal action. The dam is in the Black Canyon on the Colorado River. The west wall of this canyon is in Clark County, Nevada, and the east wall is in Mohave County, Arizona. The dam is about 28 miles southeast of Las Vegas, Nevada, and approximately 7 miles east of Boulder City, Nevada. The drainage area above Hoover Dam comprises 167,800 square miles including parts of the states of Wyoming, Utah, Colorado, Nevada, Arizona, and New Mexico. The Colorado River above Hoover Dam rises in the Rocky Mountains of Wyoming and Colorado and flows southwestward to Lake Mead for a distance of about 900 miles. Along this stretch of the river, principal tributaries are the Green, Yampa, White, Uinta, Duchesne, Price, San Rafael, Muddy, Fremont, Escalante, Gunnison, Dolores, San Juan, Little Colorado, and Virgin Rivers. The first concrete in Hoover Dam was placed on June 6, 1933, and the last on May 29, 1935. The dam was dedicated September 30, 1935, and was completed two years ahead of schedule."

"Hoover Dam is among the largest and earliest of the Bureau of Reclamation's massive multiple-purpose dams. By providing electric power, flood control, and irrigation waters, the dam made increased levels of population and agricultural production in large areas of the Southwest feasible, affecting not only lands near the river, but also urban centers such as Los Angeles. Hoover Dam was not the first major arch-gravity dam to be constructed. The Cheesman Dam in Denver, for example, predates it. Nor is the dam the first of the Bureau of Reclamation's multi-purpose dams in the United States; that distinction belongs to the Theodore Roosevelt Dam, already a National Historic Landmark. Hoover Dam is, however, distinguished by its size, the size of its hydroelectric plant, and the far-reaching consequences of its construction in the agricultural, industrial, and urban development of the Southwestern United States. In the field of hydraulic engineering, the dam is an accomplishment comparable to the Panama Canal. Hoover Dam was the highest dam in the world — 726.4 feet from bedrock to the crest — when it was constructed. Today it is still the western hemisphere's highest concrete dam. Because of this height, it created a reservoir that could store the normal flow of the river, including all average floods, for 2' years. When filled to the maximum, it will impound more than 31 million acre-feet of water. The dam is also large enough to trap and hold the millions of tons of sediment carried by the river every year, without seriously impairing its efficiency as a reservoir or interfering with the generation of electrical power."

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

Nevada

BOULDER CITY, NEVADA

11.15282

Boulder City Historic District (listed March 10, 1994; 354 pp. plus photos)

Bounded roughly on the north by the Government Center and Watertank Hill; the Railroad spur and Date Street on the west; New Mexico and Fifth streets on the south; and Avenues B, F, and L on the east, Boulder City, Nevada; ca. 182 acres. 1931-1945.

Nomination prepared April 1983, James Woodward, Cindy Myers, and Tere Sitter, Phoenix, Arizona.

Summary: "The Boulder City Historic District is significant for its historic associations with the Boulder Canyon Project, the nation's first large-scale, multi-purpose reclamation effort and the turning point for a new era in the history of Federal reclamation programs and policies. As the town created to house over four thousand construction workers in the harsh Nevada desert, Boulder City was a significant integral part of the successful completion of Hoover Dam and the Boulder Canyon Project. Constructed at the outset of the Great Depression, Boulder City was conceived by the Federal government as an ideal town, a model city, to which the American people could look for hope of a better future, and subsequently became the first federal effort to construct New Towns in American history. The Boulder City Historic District holds national significance for its place in the history of American City Planning as the first fully-developed experiment in new town planning as promoted by the Community Planning Movement, a movement which is recognized as the force which most influenced contemporary community planning practices. The Boulder City Historic District is significant as well for its architectural integrity and ability to convey associations with the events and people that made direct contributions, to the creation of the city plan, its construction and development, and its continued role as a permanent city and successful new town."

Given that Boulder City was originally constructed specifically for the Boulder Canyon Project (Boulder Dam/Hoover Dam), it stands to reason that the nomination includes numerous contributing and non-contributing buildings and structures, each described separately. The nomination also includes several detailed maps.

In addition, interested users may wish to refer to entries listed in Part 11, Section 3 under:

11.15283

Boulder Dam Hotel (listed July 13, 1982; 5 pp. plus photos)

(Boulder City Inn)

1305 Arizona Street, Boulder City, Nevada; ¼ acre. 1933-1941.

Nomination prepared June 17, 1980, Ana Beth Koval and Charles D. Zeier, Carson City, Nevada.

At time of nomination owner listed as Clifford E. McCorckle, Reno, Nevada.

Summary: "The Boulder Dam Hotel filled an important function during the construction of Hoover (Boulder) Dam. The Colonial-Revival hostelry was constructed in three stages beginning in 1932. Originally U-shaped, the structure became H-shaped by 1935. It has been in continuous use as a hotel since its construction, and retains a high degree of integrity. Oriented to the north, it is located on Arizona Street, close to the historic business district. It is in close proximity to all of the Reclamation-era governmental structures that stepped down from the promontory which overlooks the town. As the original plantings have matured, the hotel is situated close to areas of lush vegetation and trees. The two-story structure sits on a foundation of reinforced cast-in-place concrete. The exterior walls are constructed of small-scaled concrete block. All windows are multi-paned sliding sash. The front (north) elevation is dominated by the two-story porch with square paneled columns. The main entry is topped by a pediment and is flanked by pilasters and quoins. All other elevations have a similar formal disposition of windows. The original building was three bays wide and occupies the western-most portion of the structure. In 1934, the dining room and additional hotel rooms were added to the northeast corner. The entrance was moved one bay to the east and the porch was extended east as well. In 1935, another addition of the same size was built on the south-west corner, resulting in the H-shaped configuration. The current owner rehabilitated the lobby, dining areas and some suites after purchasing the hotel in 1980. The rest of the rooms are basically unaltered, featuring, among other things, the original tiled bathrooms."

11.15284

Old Boulder City Hospital (listed April 1, 1982; 7 pp. plus photos)

(Wellsprings-Retreat House & Conference Center of the Anglican (Episcopal) Sisters of Charity)

701 Park Place, Boulder City, Nevada; 10 acres. 1931/1933/1938/1943/1976.

Nomination prepared June 12, 1980, J. Charles Smith, Incline Village, Nevada; and James Hamrick, State Historical Preservation Office.

At time of nomination owner listed as Anglican Sisters of Charity, Boulder City, Nevada.

Summary: "The Boulder City Hospital was built in 1931 to serve the needs of the Six Companies, Inc. employees who were constructing Boulder Dam. It was built as an austere, functional structure, designed to compliment the stuccoedj arcuated public and commercial buildings that comprised the city's master plan. It was actively used as a medical facility for the major part of forty years and currently serves as a retreat for the Episcopal Sisters of Charity. It is in good condition and retains a high degree of integrity in its unaltered context."

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

BUNKERVILLE, NEVADA

11.15285

Parley Hunt House (listed November 14, 1991; 19 pp. plus photos)

(Neville Residence)

Canal Street near Virgin Street, Bunkerville, Nevada; 1 contributing building, 3 non-contributing buildings; 0.824 acre. *Ca.* 1907.

Nomination prepared June 19, 1991, Nancy Goldenberg, San Francisco, California.

Summary: "The Parley Hunt House, built 1907, is a one-story stone dwelling built by Hunt for himself and his mother, Susan Naney Hunt. The building sits on a .824 acre site surrounded on three sides by a chain link fence. There are three non-contributing structures on the site. The residence is in good condition, but, because of extensive remodeling, retains only a moderate degree of integrity."

"The Parley Hunt House is significant under Criteria A and C. Under Criteria A, the house is important as it relates to the settlement and development of Bunkerville, which began as a Utopian Mormon colony in 1877. Bunkerville is the only one of several Mormon settlement attempts in Nevada to survive to the present day. The structure is also significant as an example of a regional vernacular house type. This house type relates to similar structures in other Mormon settlements, such as St. George, Utah, and to other surviving early structures in Bunkerville. The Parley Hunt House remains a dwelling, is in good condition, but has been extensively altered. The period of significance is c. 1907, when the house was built."

11.15286

Thomas Leavitt House (listed November 14, 1991; 22 pp. plus photos)

(Jacobson Residence)

160 South First West Street, Bunkerville, Nevada; 2 contributing buildings, 3 non-contributing buildings; 0.63 acre. *Ca.* 1896.

Nomination prepared June 19, 1991, Nancy Goldenberg, San Francisco, California.

Summary: "The Thomas D. Leavitt House, built c. 1896, is a two-story brick dwelling built by Leavitt for his first wife, Luella. The building sits on a .63 acre site enclosed by a wooden picket fence. There is one contributing ancillary structure on the site, a stone granary building now used for storage. The primary structure remains a residence, is in good condition, and retains a fairly high degree of integrity."

"This building is significant under Criteria A, B, and C. Under Criteria A, it is significant as it relates to the settlement and development of Bunkerville, which began as a Utopian Mormon colony in 1877. Bunkerville is the only one of several Mormon settlement attempts in Nevada to survive to the present day. Under Criteria B, the building is significant because of its association with Thomas Dudley Leavitt, one of Bunkerville's original 23 settlers. The structure is also significant under Criteria C as an example of a regional vernacular house type. This house type relates to similar structures in other Mormon settlements, such as St. George, Utah, and to other surviving early structures in Bunkerville. The period of significance is c. 1896, when the house was built."

GRAPEVINE CANYON, CLARK COUNTY, NEVADA

11.19125

Grapevine Canyon Petroglyphs (listed December 18, 1984; 8 pp. [with redactions in public copy])

"CRNV-05-2502 (BLM), 26CK12 and 26CK57 (UNLV), AZ:F:14:98 (ASM), Steward (227)", with the UNLV numbers annotated by hand, "Nevada site# superceded" (*sic*). 12 acres.

Nomination prepared September 1982, Deni Seymour and Kay Simpson, temporary archaeologists, NPS Western Archeological and Conservation Center, Tucson; edited December 1983, Roger E. Kelly, NPS Regional Archaeologist, San Francisco.

Summary: "Grapevine Cayon, the location of over 700 examples of rockart and 3 rock-shelters, drains part of the east slope of the newberry Mountains, Clark County, Nevada.

"Over 700 rock carving decorate the dike of fine-grained granite porphyry at the mouth of Grapevine Canyon. These petroglyphs extend over 100 meters up the canyon and are seen on both sides of the canyon walls. Design elements can be seen all the way up the rocky cliffs and are known to extend below the present ground surface. Petroglyphs have been pecked through the patina of hydrous iron and manganese oxides. Some elements have been retouched; others are superimposed over previously existing designs.

"A variety of geometric and naturalistic designs occur on the horizontal and vertical faces of these large granite boulders. Design elements include rectangular gridirons, meanders, mazes, diamonds, sun disks, Great Basin curvilinears and rectilinears, spoked wheels, concentric circles, and mountain sheep."

MESQUITE, NEVADA

11.15287

Mesquite High School Gymnasium (listed March 10, 1992; 12 pp. plus photos)

144 East North 1st Street, Nevada; less than 1 acre. 1939-1942.

Nomination prepared June 1991, Patricia Osmon, Tempe, Arizona.

Summary: "The Mesquite High School Gymnasium was built in 1939 and represents the Italian Renaissance Revival style. The gymnasium was designed by Salt Lake City architect Miles M. Miller, and its construction was funded through the federal PWA program. Except for the infilled windows at the north I, the integrity of the building remains high, especially in design, materials, and workmanship. Its integrity of location and setting also remains intact, although the historic school house associated with the gymnasium is no longer standing. Currently the building houses several small agencies including the Virgin Valley Medical Clinic, the Mesquite Justice Court, and the Mesquite Senior Center."

"The Mesquite High School Gymnasium is significant under Criteria C in the area of significance of Architecture. Built in the Italian Renaissance Revival Style, it is representative of the historic context 'Schoolhouse Architecture in Southern Nevada's Fifth Supervision District, 1870 to 1942.' It is significant as an example of its style as well as its rare use of terra cotta and tinted concrete brick. The Mesquite Gymnasium is illustrative of the School Support Building property type, and possesses the characteristics of that type in terms of its historic use, which reflected the expanding educational curriculums of the 1930s, and its functional design, which incorporated a central

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

gymnasium with classrooms on the perimeter. The building is representative of the Custom Architecturally Designed Schoolhouse property type as well. It embodies the characteristics of that type in terms of the formality of its style, and the special attention paid to the spatial organization of the building's uses."

OVERTON, NEVADA

11.15288

Boulder Dam Park Museum (listed February 22, 1999; 16 pp. plus photos)

(Lost City Museum)

Nevada Route 169, Overton, Nevada; 3 buildings; ca. 3.5 acres. 1934-1935.

Nomination prepared July 1994/December 1995, Julie Nicoletta, Carson City, Nevada.

At time of nomination owner listed as Nevada State Museum, Carson City, Nevada.

Summary: "The Boulder Dam Park Museum, now known as the Lost City Museum, is an adobe brick building, constructed by the Civilian Conservation Corps (CCC) in 1934-35. It sits on a hilltop 1/4-mile south of the town of Overton, Nevada. The CCC erected the building, originally known as the Boulder Dam Park Museum, as part of the effort to recover and store artifacts excavated from Pueblo Grande de Nevada, also known as the Lost City, an Anasazi settlement. This site was discovered in 1924. Excavations continued into the 1930s to document and save as much as possible from the ancient city, most of which was eventually flooded by Lake Mead, created by the construction of Hoover (Boulder) Dam. A chain-link fence completely encloses the museum grounds. Surrounding desert vegetation includes creosote bush, bursage, Joshua trees, mesquite, palo verde, yucca, century plant, and a variety of cacti. Introduced flora include Italian cypress, Washingtonian palm, date palm, Russian olive, and pomegranate trees. Bermuda grass covers the grounds to the north, northwest, and south of the museum building. In addition to the museum itself, the site encompasses a six-room ruin, now enclosed in the 1981 addition to the museum, a seven-room Puebloan dwelling, and a Basketmaker pit house, all reconstructed by the CCC in 1935. The CCC built the museum of handmade, sundried adobe brick (11"x7"x4") in the Pueblo Revival style. The building is a rare example of this style in Nevada."

11.15289

LDS Moapa Stake Office Building (listed July 25, 2002; 16 pp. plus photos)

(Virmoa Maternity Hospital)

161 West Virginia Street, Overton, Nevada; 3 buildings; 1/3 acre. 1917-1952.

Nomination prepared April 15, 2002, Bernadette Francke and Mella Rothwell Harmon, Carson City, Nevada.

At time of nomination owner listed as Daughters of the Utah Pioneers, Overton, Nevada.

Summary: "The LDS Moapa Stake Office Building/Virmoa Maternity Hospital sits on a 1/3-acre parcel in Overton, Nevada. The building faces north onto West Virginia Street. Behind the structure is the Bishop's Storehouse, a genealogy center. The office building was constructed between 1917-1919 as an administrative center for the Moapa Stake of the Church of the Latter-day Saints (LDS). In 1941, it began use as the Virmoa Maternity Hospital."

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

"The LDS Moapa Stake Office Building/Virmoa Hospital is eligible for the National Register of Historic Places as representative of population growth in the Moapa Valley based on a flourishing agricultural community, and of the continuous influence of the LDS Church in southern Nevada and the western Great Basin. The Church of Jesus Christ of Latter-day Saints (LDS or Mormons) built the LDS Moapa Stake Office Building to serve as an administrative center for church leaders. The term "stake" refers to a stake in the tent of Zion, a biblical connotation of the promised land. As an administrative unit, a stake oversees several wards or geographical groupings of church members with their own meeting centers. From 1919 until 1939, the LDS Moapa Stake Office Building served as a meeting place for church officials, a place to organize welfare work within the community, and for genealogy classes. In 1941, the building was converted into the Virmoa Maternity Hospital to serve the residents of Overton, Logandale, Moapa, and smaller outlying communities."

11.15290

Overton Gymnasium (listed March 10, 1992; 11 pp. plus photos)

North West Thomas Avenue, off South Anderson Street, Overton, Nevada; less than 1 acre. 1938.

Nomination prepared June 1991, Patricia Osmon and James Woodward, Tempe, Arizona.

Summary: The Overton Gymnasium was built in 1938 and represents the Italian Renaissance Revival architectural style. Designed by Salt Lake City architect Miles M. Miller, the gymnasium was funded by the federal PWA program. The building retains a high degree of the important aspects of its integrity, especially in design, materials, and workmanship. The historic school associated with the Overton Gymnasium is no longer standing, and the non-historic Moapa Valley High School complex is located adjacent to the gym. The building is currently utilized as a component of the school."

"The Overton Gymnasium is significant under Criteria C in the area of significance of Architecture. Built with Italian Renaissance Revival Style influences in a minimalist design format, it is representative of the historic context 'Schoolhouse Architecture in Southern Nevada's Fifth Supervision District, 1870 to 1942.' It is significant as well for its rare use of terra cotta and tinted concrete brick. The Overton Gymnasium is illustrative of the School Support Building property type, and possesses the characteristics of that type in terms of its specialized use, which reflected the expanding educational curriculums of the 1930s, and its functional design, which necessitated a large physical structure with a large interior volume. The building is representative of the Custom Architecturally Designed Schoolhouse property type as well. It embodies the characteristics of that type in terms of the formality of its style, and the special attention paid to the spatial organization of the building's use."

11.15291

Pueblo Grande de Nevada (listed July 25, 2002; 8 pp. plus photos)

("Lost City")

Lake Mead National Recreation Area, N1/2 SE1/4, Section 3, T. 17 S., R. 68 E., NW1/4 NW1/4, Section 2, T. 17 S., R. 68 E., S1/2 SE1/4, Section 34 T. 16 S. 9 R. 68 E., vicinity of Overton, Nevada; 93.5 acres. Surveys, 1929, 1941.

Nomination prepared May 14, 1982, James C. Maxon, Boulder City, Nevada; and Lysenda Kirkberg, Las Vegas, Nevada.

Summary: "The site (26CK2148) is a small part of a five mile long dense Pueblo/Basketmaker complex known as Pueblo Grande de Nevada or 'Lost City' which is situated along the lower end of the Muddy River. This particular

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

section has been designated the 'Main Ridge Locality' by Lyneis (1980) and consists of 46 small multiroomed masonry pueblos which she considers to have been the remains of a single community occupied concurrently. Pueblo Grande was discovered by John and Fay Perkins of Overton, Nevada in 1924 who brought it to the attention of Governor James Scrugham. The Governor contacted Mark R. Harrington, who was working in Northern Nevada, to investigate the ruins. The Perkins led Harrington to the, Main Ridge locality and it was here that the first excavations from 1924-1926 were carried out. The area saw no further work for 55 years until Dr. Margaret Lyneis conducted a surface collection and mapped the existing structures in January, 1980."

"The site's significance lies in the area of prehistoric archeology. This particular section Pueblo Grande de Nevada may represent a late-Pueblo II Virgin Branch Anasazi occupation of the Muddy River Valley (Lyneis 1980). This valley represents a true frontier situation in that it is the westernmost extension of the Anasazi culture, the only such Pueblo community in the State of Nevada. Pueblo Grande has great potential for adding data concerning this frontier setting and its intra and extraregional relationships, subsistence, house construction, settlement pattern, and a culture's response to change environmental and social. It also has potential for providing information on ecologic adaptations of an agriculturally based culture in a unique riparian setting. This information has inherent value for community planning and understanding the process of change in today's society. The site can yield data concerning the chronological question of southern Nevada, and its position in the Virgin Branch sequence which may refine the sequence itself. One important area of significance lies in the interpretive value of Pueblo Grande. Because the site is in the Lake Mead National Recreation Area and does receive frequent visitation, Lyneis (1980) suggests that the 4 site be utilized for public education by placing unobtrusive informational signs explaining the nature of the site with warnings on collection and disturbance to house walls."

11.15292

St. Thomas Memorial Cemetery (listed January 20, 2005; 16 pp. plus photos)

(St. Thomas Cemetery)

Magnasite Road off of Moapa Valley Boulevard, Overton, Nevada; 5.06 acres. 1935-1954.

Nomination prepared March 10, 2004, Mella Rothwell Harmon, Carson City, Nevada.

At time of nomination property owner indicated as St. Thomas Memorial Cemetery Board, Overton, Nevada.

Summary: "The St. Thomas Memorial Cemetery was moved to its present location during February and March 1935, when the federal government undertook the relocation of the entire community of St. Thomas in preparation for the scheduled inundation of the area. The place was flooded by Lake Mead, as a result of the nearing completion of Boulder Dam (later renamed Hoover Dam). The 48 St. Thomas interments, and one from Kaolin, were reburied at a site in Overton set aside for that purpose. The St. Thomas Memorial Cemetery consists of a 5.06-acre parcel of land in a natural desert setting. A dirt road leads to the site, which is enclosed by a perimeter chain link fence. The grave markers are mostly low profile. A flag pole, the wooden sign, and a few scrubby trees are the tallest objects present, and there are no buildings. By design and through dedication, the cemetery honors the pioneers of St. Thomas."

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

LAKE MEAD NATIONAL RECREATION AREA, OVERTON ARM

11.18550

B-29 Serial No. 45-21847 (Heavy Bomber) (listed April 20, 2011; 183 pp. including photos)

(26CK7829)

Lake Mead National Recreation Area, Overton Arm, Nevada; 1 structure [submerged]; 1945, 1948. UTM reference: 11S 733233 m E; 4009193 m N (NAD 83).

Nomination prepared September 8, 2010, by Sami Seeb, Archeologist, National Park Service Submerged Resources Center, Lakewood, Colorado.

Summary: "Boeing built B-29 s/n 45-21847 at the plant in Wichita, Kansas under the last production order issued by the United States Army to build B-29s. B-29 s/n 45-21847 transferred between Army Air fields several times in its early career before undergoing modifications in 1947 from a weapon of war to a flying laboratory for the Upper Atmosphere Research Project (Chenoweth 2005: 14). On 21 July, 1948, the plane was conducting research with an instrument called a 'Sun Tracker,' which was used to monitor the intensity of the sun at varying altitudes when it crashed into Lake Mead (United States Air Force Accident Report 48-C-7-21-2, #00877587, aircraft crash report, 1948, Microfilm reel 46660, Air Force Historical Research Agency, Maxwell Air Force Base, Montgomery, AL). It currently sits submerged on the silt bottom of the lake, still largely intact after the crash.

"B-29 s/n 45-21847 is historically important due to its association with a pivotal era in America's military history as well as a period of remarkable scientific developments occurring in the United States. The structure is sufficiently intact to retain the unique features of design that made the type of aircraft famous in World War II and also retains the modifications for use as a Cold War research laboratory, including a top secret instrument called the Sun Tracker that was being tested at the time of the crash.

"The property retains sufficient integrity to convey its historic character. Despite the crash and submersion in Lake Mead for over 60 years, the plane remains relatively intact and retains that condition today (Figure 3). The most important aspects of integrity that apply to the property are its location, design, materials, workmanship, feeling, and association."

NOTE: The nomination includes significant remarks on, and "before" and "after" photos of, invasion of the site by quagga mussels (*Dreissena rostriformis bugensis*).

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

CALIFORNIA

CALEXICO, CALIFORNIA

11.15293

Calexico Carnegie Library (listed September 28, 2005; 11 pp. plus photos)

(Calexico Public Library)

420 Heber Avenue, Calexico, California; less than 1 acre. 1918-1955.

Nomination prepared October 2004, David B. Ouzan, Calexico, California.

Summary: "The Calexico Carnegie Library exemplifies community libraries of the later period of the Carnegie program. Calexico itself was settled in the early 1900s and developed rapidly as a trading center after the arrival of irrigation canals and the Southern Pacific Railroad to the Imperial Valley. It was incorporated in 1908. In the early years the older town of Imperial provided a branch library. Like women's groups in many communities before them, the newly formed Women's Improvement Club determined to seek Carnegie funding, enlisting the help of the Farmers and Merchants Club. By the time of the city's application in 1915, program procedures had become somewhat formalized. Emphasis had shifted to small towns and branch libraries, in accordance with Andrew Carnegie's philosophy of bringing the library to the people. Funding was dependent on cities assuming certain responsibilities and was granted based on population. The result was significantly smaller grants in the later years of the program which in fact stopped accepting applications in 1917. The Calexico Carnegie Library also exemplifies the diversity of design in Carnegie Libraries. The period of Carnegie philanthropy followed soon after the Chicago Columbian Exposition of 1893 and the City Beautiful movement. The new "free" library provided communities the opportunity to demonstrate civic pride with the elegance of Classical Revival. This was true in California elsewhere, but in California the Spanish and Mission styles, encouraged by Lurnmis and Polk, were also frequently used. In young Calexico, notable Los Angeles architects Allison and Allison found an entrepreneurial community with empty city land; the City Beautiful took the form of an "Intellectual Park". In this most southerly town in California, they proposed a building in the Spanish Colonial Revival style."

11.15294

U.S. Inspection Station (listed February 14, 1992; 18 pp. plus photos)

(U.S. Border Station; Old Customs Building)

12 Heffernan Avenue, Calexico, California; 2 buildings; 0.57 acre. 1932-1941.

Nomination prepared January 10, 1991 (revised March 20, 1991), Leonard M. Kliwinski and James C. Wilson, Newport Beach, California.

Summary: "The U.S. Inspection Station complex at Calexico, California is a customs and immigration station on the U.S.-Mexico border. The complex is located on the corner of First Street and Heffernan Avenue in downtown Calexico. It is surrounded by commercial development on the north and west and a small park on the east. To the south is the Republic of Mexico and the commercial area of Mexicali, Baja California. The complex, constructed in 1933, consists of a main Customs building; an adjacent attached Public Health Annex; and a separate independent structure designated as the Garage and Inspection shed. The buildings are examples of the Spanish Colonial Revival style, and possess many of the typical characteristics of the style (according to Whiffen, American

PART 11. ENVIRONMENT, NATURAL HISTORY, AND SPECIAL SCIENTIFIC, TECHNICAL, OR CULTURAL ISSUES

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

Architecture Since 1780): red-tiled roofs, wrought iron balconies, arched openings and exterior walls finished in stucco. The buildings are an exceptional example of the use of regional styles and materials in the federal buildings of the 1930s. In this context it is similar to the Spanish Colonial Revival style border station at Tecate, California (1933) and the Pueblo Revival border station at Naco, Arizona (1936). The Calexico border station, even with alterations, retains a high degree of its original integrity of design.”

EL CENTRO, CALIFORNIA

11.15295

U.S. Post Office (listed January 11, 1985; 6 pp. plus photos)

(El Centro Main Post Office)

230 South 5th Street, California; less than 1 acre. 1931-1932.

Nomination prepared April 27, 1984, Doug Robertson, Pasadena, California.

Summary: “The building is constructed of reinforced concrete, and rests on spread concrete footing; The front elevation is marked by a seven-bay arcade, supported on thinly proportioned Ionic columns. The flat roof is surrounded by a red-tiled pitched roof at the sides of the building, giving the appearance of a pitched roof without the expense. Wrought iron, terracottam and cast stone (a type of high-quality concrete) are used extensively on the exterior to enrich the building’s visual appearance.”

“The El Centro Post Office is primarily significant on the local level, as one of the most monumental and sophisticated structures in town. On the state level, the structure has secondary significance as an example of a heavily ornamented small post office. In both cases, the building is an aesthetically successful piece of architecture. The El Centro Main Office is anomalous, both in terms of its size, its style, and in the use of expensive materials. Stylistically, the El Centro Post Office is essentially Beaux-Arts Classicism, though by 1932, this style was at least 15 years out of date. It is unique among 1930s post offices for its unusual style alone; the other Beaux-Arts buildings from the early thirties ialso housed federal courts or other federal agencies, and were designed by private architects. By 1932, the Office of the Supervising Architiect was developing the Starved Classical style, and the most common style used for small post offices in California was some form of Mediterranean Revival. In any event, the post office is the most sophisticated Beaux-Arts building in town, and acts as a major urban design focus for the town’s archiecture and public spaces: On the state level, the building is important as a stylistically anachronistic example of the small post office building type.”

SECTION 3A: GENERAL GUIDE TO DOCUMENTATION FOR PLACES IN THE LOWER COLORADO RIVER REGION LISTED IN OR NOMINATED TO THE NATIONAL REGISTER OF HISTORIC PLACES AND THE NATIONAL HISTORIC LANDMARK SYSTEM ADMINISTERED BY THE U.S. NATIONAL PARK SERVICE

CALIFORNIA—ARIZONA

11.17997

Earth Figures of California-Arizona Colorado River Basin (listed 1985; 18 pp.)

[Colorado River intaglios, geoglyphs.]

Nomination prepared December 31, 1982, Dorothy Gray and Hartley Gurney, with Jay von Werlhof, Harry Casey, and Boma Johnson, Sacramento California.*

107 sites listed (locales redacted). "Sites overlook Colorado River and flood plain (present and former), from Fort Mojave on north and north and about 160 miles south along River, then east and west about 100 miles along flood plain and drainage area". San Bernardino, Riverside, and Imperial Counties, California; Yuma County, Arizona.

Summary: "The elements in this thematic group consist of large figures on the ground surface, usually on mesa tops, bordering the Colorado River and the area it has historically flooded. The figures are in darkened areas of "desert pavement". This desert pavement is a surface condition created by the formation of "desert varnish", a darkening of surface rocks by complex solar-mineral-biological interaction now being studied by scientists. The process of formation is very slow and may take thousands of years to darken rock in a given area. (Many of the current studies of desert varnish are discussed in Johnson and Solari.) The figures were created in almost all instances by removal of the surface layer of darkened rock to expose a lighter subsurface of earth material. The contrast between the lighter, exposed area and the darker, surrounding desert pavement creates the image. In most instances the figures are very shallow, i.e., a few inches, but can be over a foot deep at center. Because of their great size or faintness, the figures in many instances are best seen from the air."

*Specific dates of registration to the *National Register* have been noticed for some of the regional geoglyph sites, in various sources: Blythe Intaglios, 22 August 1975; Riply Geoglyph Site, 20 November 1975; Spoke Wheel Rock Alignment, 25 September 2003; Stone-Ringed Anthropomorphic Figure, 1 May 1987; Topock Maze, 5 October 1978; Winterhaven Trail Guardian, 1 May, 1987.
