MARGINALIA RELATING TO THE GRAND CANYON OR LOWER COLORADO RIVER REGION

Items not about the Grand Canyon or Colorado River *per se* but having a venue in the Grand Canyon or related area in the vicinity, items unrelated to but utilizing the Grand Canyon in non-metaphorical senses such as topics used with direct application to the Grand Canyon without occurring there; and occasional items similarly relating to the lower Colorado River region

PART 32. MARGINALIA RELATING TO THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

OVERVIEW. This part contains citations which are themselves not about the Grand Canyon but refer to the Grand Canyon as a venue—for example, meetings and conferences about subjects other than the Canyon held at Grand Canyon. Similarly there are marginal references to nearby Grand Canyon locales, which are embraced within this bibliography, and significant commemorative uses of the Grand Canyon name. While these citations do not specifically contain information about the Canyon, they are peripherally a part of the history, awareness and responsiveness to the Canyon, emphasizing its cultural reach globally and in human attentions. Similarly, a few items relating to the lower Colorado River are noted here. Occasional items may relate directly to the history of these regions; while not specifically mentioning them, the publication may be used in support of historical studies.

RELATED MATERIAL

As a world wonder, the nominal attribute, “Grand Canyon”, has been copied and rephrased for hundreds of other locales the world over, and on other celestial bodies. In some fashion, formally, or far more often informally, these places are called “The Grand Canyon”, the “Grand Canyon of” a certain place, and variously as “another” Grand Canyon of one sort or another. The name has also been incorporated into analogies, metaphors, and various neological constructs. For a comprehensive gathering, see Volume 3 of THE GRAND CANON, *Grand Canyon, Colossal Mirror : the Term “Grand Canyon” as Used in Geographical Nomenclature, Analogy, Metaphor, and Neology : with an Appendix on Colorado River Nomenclature.*

Hibernia Fire Engine Company, No. 1

- 1859 32.126 *The Hibernia Fire Engine Company, No. 1. Have caused this volume to be issued in remembrance of their visit to the cities of New York, Boston, Brooklyn, Charlestown and Newark, in November, 1858, and to commemorate the honors and hospitalities extended to them by the public authorities, firemen and citizens of those places, and by their brother firemen, on their return to the City of Philadelphia, to each and all of whom it is dedicated as a memorial of gratitude*. Philadelphia: Printed by J. B. Chandler, 108 [109] pp. [This was a commemorative volume published after the Hibernia Fire Engine Co. took its new "first class steam fire engine," built by Reaney, Neafie and Co. of Philadelphia, on a tour of cities in the northeastern U.S. See p. [109], an advertising page for Reaney, Neafie and Co., which includes a lithograph depicting their facilities as viewed from the Delaware River. This is of significance in this bibliography as the only known illustration of this firm, where in 1857 the steamboat *Explorer* was built for the U.S. Army, which Lt. Joseph C. Ives commanded on the exploration of the lower Colorado River in late 1857 and early 1858; the same expedition on which the land excursion in 1858 was the first to reach the Grand Canyon with a scientific and illustrators' contingent.]

- 1933 32.127 *The pilgrim's regress : an allegorical apology for Christianity, reason and romanticism.* London: J. M. Dent and Sons, 255 pp. [1st ed. This title in numerous reprintings to date under other imprints and in translations.] [See "Book Five; The Grand Canyon", "Book Six; Northward Along the Canyon", "Book Seven; Southward Along the Canyon", "Book Nine; Across the Canyon".] [The Grand Canyon is the allegorical representation of *Peccatum Adae*, or the Sin of Adam (see at the end of "Mother Kirk's Story", chapter II of Book Five).] [NOTE: *The Pilgrim's Regress* is widely recognized as Lewis's first religious book and first work of fiction, which of course was formulated after the classic 1678 Christian allegory by John Bunyan, *The Pilgrim's Progress* [full citation for first ed.: John Bunyan, *The pilgrim's progress from this world, to that which is to come: Delivered under the similitude of a dream wherein is discovered, the manner of his setting out, his dangerous journey; and safe arrival at the desired country.* London: Printed for Nath. Ponder at the Peacock in the Poultry near Cornhil, 1678]. Given the allegorical nature of Lewis's *The pilgrim's regress*, and likewise "The Grand Canyon" in it, since the *real* Grand Canyon is not even a fictional participant it seems pointless for this bibliography to wade into the reservoir of editions, printings, and translations, save to mention that Lewis provided additional details in its 2nd and 3rd editions. Literary scholars and students have closely followed the tales and printings alike of both titles. Refer also to the note with the Wade annotated edition (Lewis, 2014, ITEM NO. 32.128).]

Lewis's (1933, ITEM NO. 32.127) original endpapers map does not show it as prominently, nor is it labeled thereon. Lewis's original map is also figured on p. 218 of this Wade edition.]

Although no evidence has yet been located of a label by this name from this time, it is so included here for the record. The listings (p. 313) represent the notice, "Messrs. [References includes numerous citations to Grand Canyon-Colorado River literature, including a personal communication with D[avid] Wegner, but there is no mention of the canyon or river in any context in the article, which is about queues, delays, and loss of customers in the Australian Tax Office. But see also "Comment" by Michael W. Trosset, pp. 23-24, which has passing reference to his participation on an 18-day raft trip through Grand Canyon while a "statistical consultant to a U.S. Bureau of Reclamation study of the effect of fluctuating flows from Glen Canyon Dam on riparian bird nesting" as an example of the reason for "statisticians to become aggressively involved in their consultations" in the acquisition of raw data. The citations noted above may pertain to Trosset's comments, but neither does he provide specific, pertinent notes calling on these citations.]
