Volume 1, Part A Introduction, Statistics, Surveys and Commentaries [*Fifth Edition*]

Volume 1, Part B Bibliography [*Fifth Edition*]

Volume 2 Cartobibliography [*Third Edition*]

Volume 3 Grand Canyon, Colossal Mirror [*Second Edition*]

COVER ILLUSTRATION: Detail from **A Map of the Internal Provinces of New Spain. The Outlines are from the Sketches of but corrected and improved by Captain Zebulon M. Pike, who was conducted through that Country, in the Year 1807, by Order of the Commandant General of those Provinces.** In Z. M. Pike, *An account of expeditions to the sources of the Mississippi, and through the western parts of Louisiana, to the sources of the Arkansaw, Kans, La Platte, and Pierre Jaun, rivers : performed by order of the government of the United States during the years 1805, 1806, and 1807. And a tour through the interior parts of New Spain, when conducted through these provinces, by order of the Captain-General, in the year 1807* (C. and A. Conrad, and Co., Philadelphia, Pennsylvania; Somervell and Conrad, Petersburg, New York; Bonsal, Conrad, and Co, Norfolk, Virginia; and Fielding Lucas, Jr., Baltimore, Maryland, 1810). [ITEM NO. 25.560 herein.]

CARTOBIBLIOGRAPHY *of the* GRAND CANYON *and* LOWER COLORADO RIVER REGIONS

THIS IS A HYBRID DIGITAL DOCUMENT IN BOOK LAYOUT

DIGITAL USERS: The entire text of this PDF document is searchable; use your program's "FIND" command. Hyperlinks also appear throughout. To view it in book format with opposing pages, use the appropriate viewing mode with the cover page separate so that odd-numbered text pages appear on the right. A wide screen is essential for convenient two-page viewing. An opposing-page display is, however, not mandatory for the use of this volume.

NON-INTERACTIVE USERS: The CONTENTS pages (pp. v-vii) list the physical page numbers for the entire volume.

SOME MAPS FROM THE 16TH TO 19TH CENTURIES IN PARTICULAR ALSO NECESSARILY EMBRACE REGIONS BEYOND THE BOUNDARIES DELINEATED HERE

— Approximate geographical area covered in **THE GRAND CANON**, embracing the Grand Canyon and lower Colorado River regions. It follows the river corridor from Glen Canyon Dam to the river's delta and the Gulf of California. The boundary in the gulf encompasses Mexico's Reserva de la Biosfera Alto Golfo de California y Delta del Río Colorado, and in Sonora embraces part of Reserva de la Biosfera del Pinacate y Gran Desierto. **THE GRAND CANON** defines "Lower Colorado River" as that region below Grand Canyon, which differs from the hydrological Lower Colorado River Basin that begins below the confluence of the Paria River at Lees Ferry and incorporates the sub-basins of all tributary streams, including the Little Colorado and Gila Rivers.

- - - - - Approximate division between "Grand Canyon" and "Lower Colorado River" thematic regions of **THE GRAND CANON**.

Base map of Colorado River drainage basin modified from U.S. Bureau of Reclamation, Glen Canyon Dam Adaptive Management Group. The Upper and Lower Colorado River Basins delineate the apportionment of the waters of the Colorado River basin by the Colorado River Compact of 1922; divided just downstream from the confluence of the Paria River near Lees Ferry. Dams and impoundments are indicated on the map. Lighter-gray areas, not labeled, are American Indian reservations. Basin boundary is not depicted in Mexico.

INTRODUCTION

(The Introduction is separately paginated)

Figures A–H illustrate map details that depict the placement of Puerto de Bucareli and variant names

| | | |
|----------|---|------|
| Figure A | Manuscript, likely the work of Bernardo de Miera y Pacheco, “ <i>Derrotero hecho por Antonio Veléz y Escalante, Misionero para mejor conocimiento de las Misiones, pueblos de Indios y Presidios que se hallan en el Camino de Monterrey a Santa Fé de Nuevo Mexico. Laus deo Anno Domini 1777.</i> ” | (20) |
| Figure B | Alexander von Humboldt’s 1811 map (which reproduces the one originally published in 1808). | (21) |

- Figure C Juan Segura’s manuscript copy of Humboldt’s original manuscript retains the placement of *Puerto de Bucareli* straddling the Colorado River between the Little Colorado and *Nabajoa* (San Juan) Rivers. (21)
- Figure D Zebulon Pike’s 1810 plagiarism of Humboldt, taken from a manuscript copy of Humboldt’s own 1804 manuscript while the explorer–geographer was in Washington, D.C., sensibly shows *Puerto del Bacorelli* along the Colorado River, through today’s Marble Canyon reach. (22)
- Figure E The commercially produced 1823 map by H. S. Tanner, *A Map of North America* (“Southwest” sheet) displays *Puerto Bucarelli* straddling the Little Colorado River confluence. (22)
- Figure F J. Dower’s *Mexico and Guatemala* atlas sheet, [1834], squeezes *Puerto Bucarelli* into a space downstream from the Little Colorado confluence, but note also that a dot is placed there, supposing that the *puerto* is a spot-point as also are other places seen in this detail. (23)
- Figure G James Wyld, in this post-John Wesley Powell map from *ca.* 1880, which plots Lee’s Ferry and the route of the Atlantic & Pacific Railroad, repositions *Puerto de Bucarelli* to cover the entire region southwest of the Little Colorado River and east of Cataract Creek. (23)
- Figure H The 1884 *Sohr-Berghaus Hand-Atlas* (published in Glogow, then a part of the German Empire) managed to completely obfuscate the spelling and position of the *puerto*, labeling it simply as a point-name, “*Buaretty*,” at the confluence of the unlabeled Cataract Creek. (24)
- Figure I *Detail from* John G. Parke, “Map of the Territory of New Mexico compiled by Bvt. 2nd. Lt. Jno. G. Parke, U.S.T.E. assisted by Mr. Richard H. Kern. by order of Bvt. Col. Jno. Munroe. U.S.A. comdg. 9th. Mil. Dept, drawn by R. H. Kern. Santa Fé, N.M. 1851. Constructed under general orders from Col. J. J. Abert, Chief of Topog^l. Eng^{rs}. ” [U.S. Army, Topographical Engineers], New York: J. and D. Major (1851). This seems to be the first appearance of the name “Sierra de la Lanterna”. (25)
- Figures 8–10b: Examples of discordant geographies on atlas maps printed in the same publication* (35)
- Figure 8 Comparative maps from: James Playfair, 1814, *A new general atlas, ancient and modern; accurately constructed, by Principal Playfair, St. Andrews, and elegantly engraved by the most eminent artists in London.* London: Printed for the author; and sold by T. Underwood, Fleet Street, London; and P. Hill, Edinburgh. (36)
- Figure 9 Comparative maps from: H. S. Tanner, H. S., 1826, *A new college atlas, consisting of general maps of the various grand divisions of the known world. Adapted to the course of geographical instruction usually pursued in the*

- colleges and high schools of the United States.* Philadelphia: Published by the Author. (37)
- Figure 10a Comparative maps from: O. W. Gray, 1873, *Gray's atlas of the United States, with general maps of the world. Accompanied by descriptions geographical, historical, scientific, and statistical.* Philadelphia: Stedman, Brown and Lyon. (38)
- Figure 10b Comparative maps from: Letts, Son and Co. Limited, 1883, *Letts's popular atlas, being a series of maps delineating the whole surface of the globe, with many special and original features; and a copious index of 23,000 names. Complete Edition.* London: Letts, Son and Co. Limited. (39)
- Figures 11-18: Several unique or scarce maps of early historical importance to the Colorado River and Grand Canyon* (41)
- Figure 11 Vélez y Escalante, 1777 (manuscript), "Derrotero hecho por Antonio Veléz y Escalante, Misionero para mejor conocimiento de las Misiones, pueblos de Indios y Presidios que se hallan en el Camino de Mon-terrey a Santa Fé de Nuevo Mexico. Laus deo Anno Domini 1777." (43)
- Figure 12 [Gulf of California] Cortés and Lorenzana, 1770 (*after* Castillo 1541 manuscript) (45)
- Figure 13 Cabot (1544) "Mappemonde de Sébastien Cabot, pilot-major de Charles-Quint, de la première moitié de XVI^e. siècle, (I^{re}. partie)" (47)
- Figure 14 [Map of New Spain] Manuscript copy by Juan Segura (*after* Humboldt manuscript, 1804) [Carta geográfica general del reino de Nueva España] (49)
- Figure 15 [Map of New Spain] Manuscript copy (19th century) (*after* Humboldt manuscript copy, 1804) "*General Chart of the Kingdom of New Spain Betⁿ parallels of 16 & 38° N. From materials in Mexico at commencement of year 1804. by Humboldt [rubric]*" (51)
- Figure 16 *A Map of New Spain* (London edition), 1810 (*after* Humboldt 1808) (53)
- Figure 17 *A Map of the Internal Provinces of New Spain* (Pike, 1810, *after* copy of Humboldt manuscript, 1804) (55)
- Figure 18 *Carte Générale du Royaume de la Nouvelle Espagne* (Humboldt, 1811) (57)
- Figure 19 Edwin E. Howell's scarce, commercially produced geological relief map of the Grand Canyon region (no date). U.S. Geological Survey, 3-dimensional map, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles. (61)

► **Figure 3.** Space view of the Colorado River, AT RIGHT SIDE OF PHOTO, coming into the Colorado River delta and Salton Sea regions from the north; as seen in Moderate Resolution Imaging Spectroradiometer (MODIS) image, 2 October 2003. (The fine lines delineate the U.S.–Mexico boundary.) The light green areas in the Salton Sea are algal blooms or sediment plumes. The Imperial Valley of California, noticeable for its irrigated lands, extends from the SOUTHERN SIDE OF SALTON SEA to the U.S.–Mexico boundary, continuing to the south as the Mexicali Valley in Baja California, Mexico. Yuma, Arizona, is to the east at CENTER FAR RIGHT, where the northern U.S.-Mexico boundary touches the Colorado River. The irrigated Coachella Valley is to the NORTHWEST OF SALTON SEA. The irrigated Palo Verde and Cibola Valleys are along the Colorado River at the UPPER RIGHT of image. The Algodones Dunes are seen as the linear, plain tan area between the Imperial Valley and the Colorado River, JUST TO THE RIGHT OF CENTER. The Gran Desierto de Altar in Sonora, Mexico, is the large, plain tan area in the LOWER RIGHT part of the image. The irregular, white Laguna Salada of Baja California lies to the west (LEFT) of the irrigated Valle de Mexicali. The Ciénega de Santa Clara wetland of Sonora (see also image below) is the linear dark-green area at LOWER RIGHT. The dry mouth of the Colorado River, with its noticeable Isla Montague dividing it in the Gulf of California, is at FAR LOWER RIGHT.

(U.S. National Aeronautics and Space Administration, Visible Earth catalog. Image SaltonSea.A2003275.2100.250m.jpg (cropped here). Image created by Jacques Descloitres, MODIS Land Rapid Response Team, NASA/GSFC.)

<https://visibleearth.nas.gov/view.php?id=69269>

◄ **Figure 4.** Space view of the lowermost region of the delta of the Río Colorado in Sonora (RIGHT SIDE) and Baja California (LEFT SIDE), Mexico; seen in false-color Advanced Spaceborne Thermal Emission and Reflection Radiometer (ASTER) imagery from the Terra satellite, 8 September 2000. North is to the top. A confusion of arcuate scars of former Colorado River channels are seen on either side of the river as it approaches its final channel to the sea. The Ciénega de Santa Clara wetland, artificially created by agricultural waste water flow from the U.S.'s Wellton-Mohawk project, is the noticeable dark green area to the east of the river up against the expanse of the Gran Desierto de Altar. At the mouth of the river, at the head of the Golfo de California, the river's flow (were it to regularly reach the sea) is divided by Isla Montague, itself a sedimentary remnant of past great flows from the Colorado River basin.

(U.S. National Aeronautics and Space Administration, Visible Earth catalog. Image aster_colorado_delta_lrg.jpg. Image created by NASA/GSFC/MITI/ERSDAC/JAROS, and U.S./Japan ASTER Science Team.)

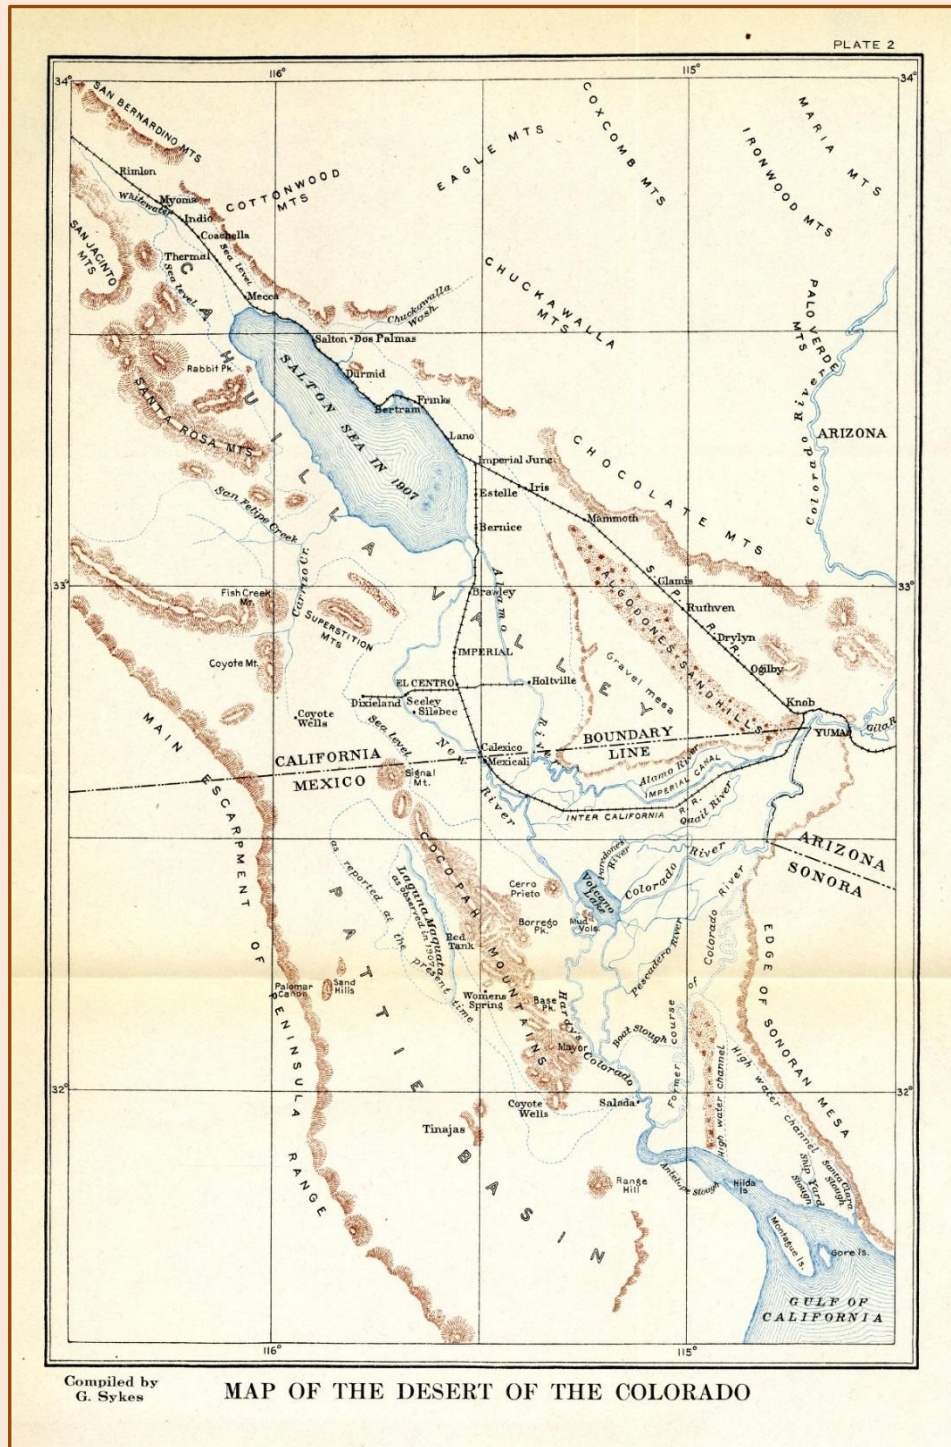

Figure 5. Map of the Salton Sea–Colorado Desert region in contemporary perspective with events of the early 20th century.

Godfrey Sykes, Plate 2
 in D. T. MacDougal *et al.*, *The Salton Sea: A study of the geography, the geology, the floristics, and the ecology of a desert basin*
 Carnegie Institution of Washington, Publication 193, 1914

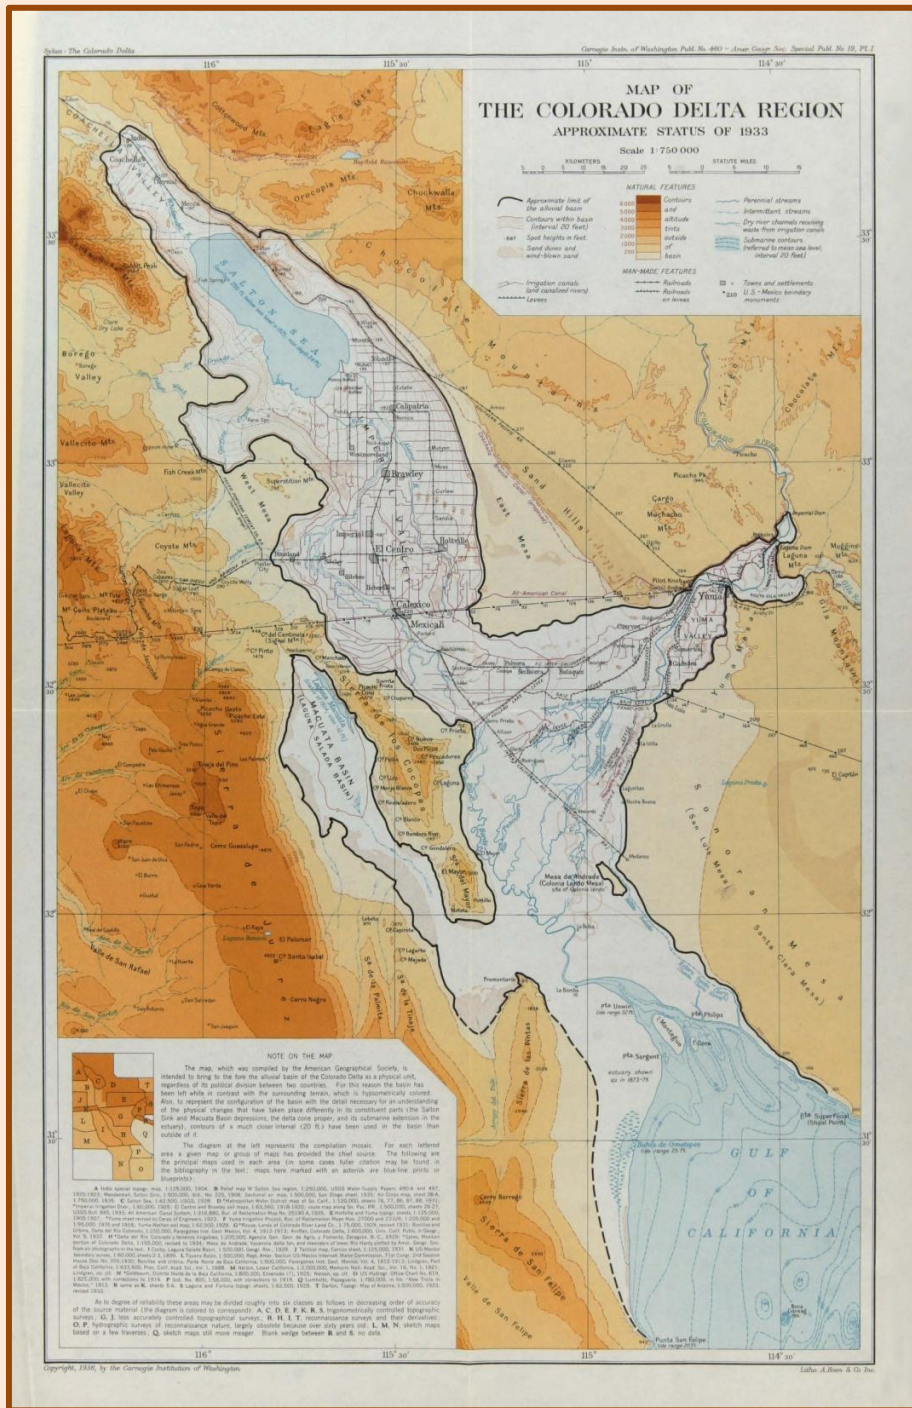

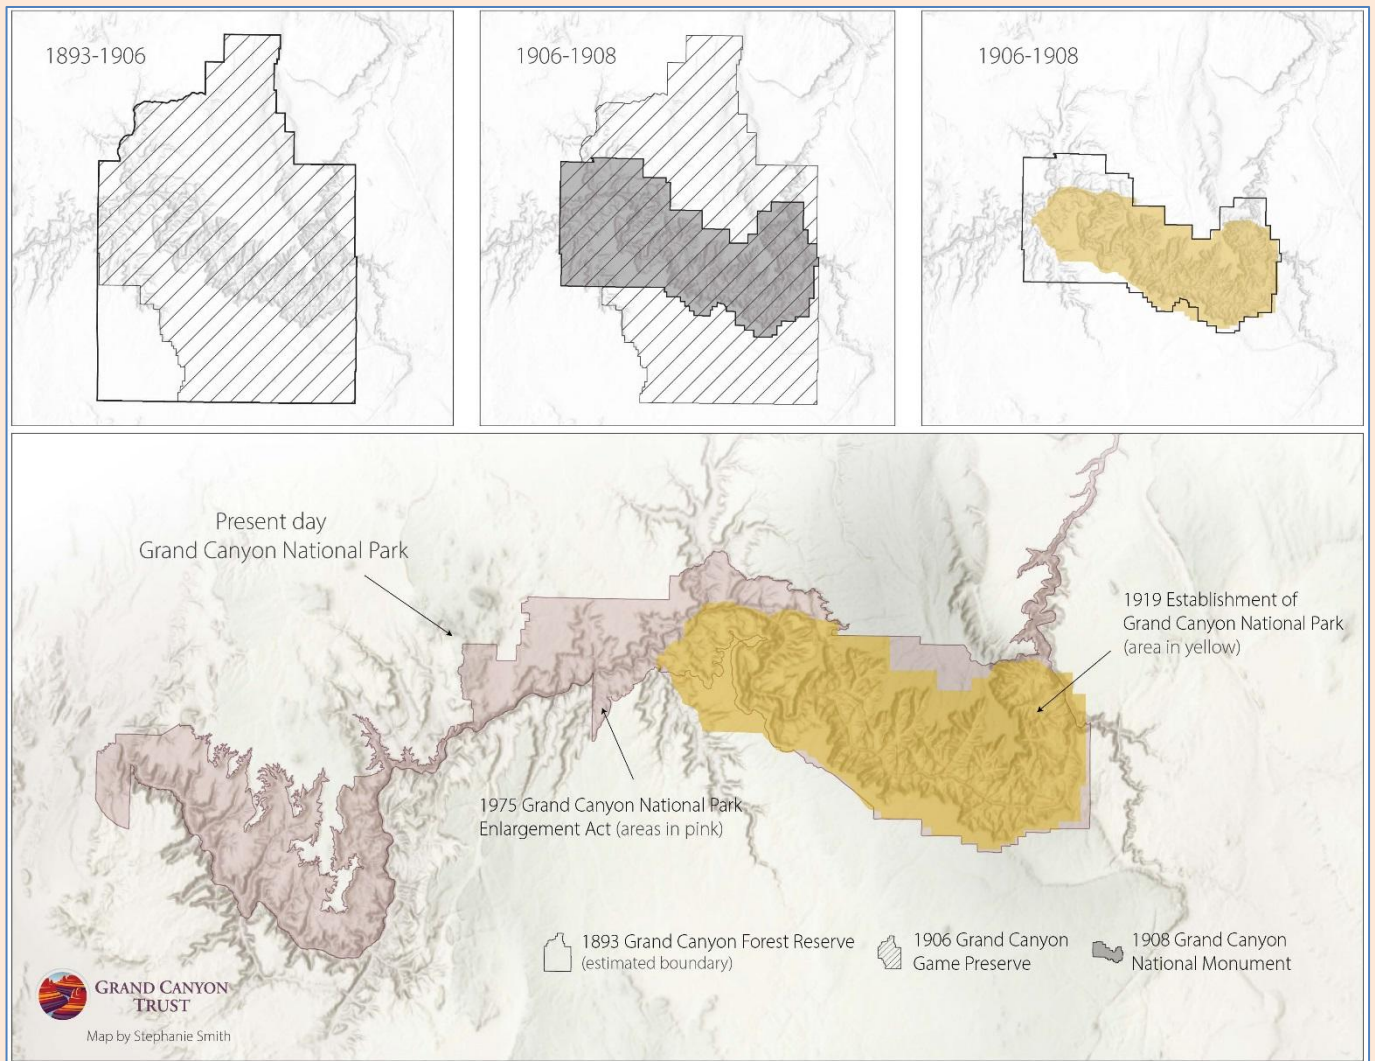

Figure 6. The Colorado River delta region in this 1933 map forms a T-shaped area as shown in this map. Historically, occasional Colorado River overflows descended to the northwest rather than to the south and the Gulf of California. During recent times the river has flowed twice into the Salton Sink, below sea level—once in the 1890s when it overflowed naturally to reform the Salton Sea, and again in the early 1900s when an accidental breach of canalworks let it flow catastrophically unchecked for nearly two years to fill the present Salton Sea. For more than a century irrigation in the Imperial and Mexicali Valleys has provided rich farmland in the desert (note the latticework of canals and irrigation drains depicted on the map).

Plate I from Godfrey Sykes, *The Colorado Delta*, Carnegie Institution of Washington Publication 460 / American Geographical Society of New York Publication 19, 1937

REGARDING TRANSFERS FROM THE GRAND CANON, VOLUME 1

The Cartobibliography is Volume 2 of [THE GRAND CANON : *A Worldwide Bibliography of the Grand Canyon and Lower Colorado River Regions in the United States and Mexico*](#). It greatly expands upon what was Part 25 in the 1st–3rd Editions of [THE GRAND CANON](#) (2012, 2015, 2019).

Given the special nature of maps, atlases, and similar productions, and considering the great size of the Cartobibliography alone, it was deemed more serviceable to segregate these citations from the main bibliography, to create a new, comprehensive compendium that serves a specialized audience. So Part 25, which was restricted to “general” maps, was detached and reformatted. Into it also were merged all the other, usually specialized, maps that are cited in other parts and sections of the bibliography (for example, geological maps). Citations copied from parts of the bibliography other than Part 25 are still present in their original places because they topically complement the content of those units.

The Cartobibliography maintains the general format followed in [THE GRAND CANON](#) Volume 1/Part B (Bibliography), about which see extended explanations in Volume 1/Part A (Introduction). It also keeps in place each citation’s unique Item Number (or registration number) and special bibliographical cross-listings. Accordingly, the Item Numbers displayed in the Cartobibliography also divulge their original topical placements in Volume 1.

Citations that were *transferred* from the original Part 25 of [THE GRAND CANON](#) (“general” maps) can be identified by the Item Number prefix “**25.**”

Other prefixes (*copied* from [THE GRAND CANON](#) Volume 1) are:

9. *copied* from Part 9 (travel and trail guides)
10. *copied* from Part 10 (Colorado River guides)
11. *copied* from Part 11/Section 2A (separately published geologic maps in the Lower Colorado River region, which complement the geology citations pertaining to the Lower Colorado River region separate-coverage group of the bibliography), with a guide to topographic map quadrangles *transferred* from the Appendix to Part 11
18. *copied* from Part 18 (physical environment of the Grand Canyon region and Southwest)
19. *copied* from Part 19 (biology and ecology of the Grand Canyon region)
24. *copied* from Part 24 (separately published geologic maps and special topographic maps in the Grand Canyon region, which complement the geology citations for the Grand Canyon region), with a guide to topographic map quadrangles *transferred* from the Appendix to Part 24

FOR A STATISTICAL SUMMARY OF THESE TRANSFERS AND COPIES, SEE [TABLE ON CARTOBIBLIOGRAPHY PAGE 4](#)

EXPLANATION OF THE ITEM NUMBERS AND CROSS-LISTINGS

EXAMPLE

Fer, N. de [Fer, Nicolas de]

1713

25.1283

Carte de la Mer du Sud, et des costes d’Amerique et d’Asie situées sur cette mer. Carte de la Mer du Nord, et des costes d’Amerique, d’Europe, et d’Afrique, situées sur cette mer. Par N. de Fer Geographe de sa Majesté Catolique avec Privilege du Roy 1713. (“A Paris Chez J. F. Benard Gendre du S^r de Fer sur le quay de l’Orloge a la Sphere Royale.”.) (“a Paris chez Benard dans l’Isle du Palais sur le quay de l’Orloge a la Sphere Royale avec P. du Roy. 1713.”) (“A Paris Chez I. F. Benard gendre du S^r de Fer sur le quay de l’Orloge à la Sphere Royale.”.) (“P. Starck-man Sculpsit.”.) **[In French.]**

Printed on 10 sheets. Harvard University Library copy seen; cataloged as “1 map on 10 sheets : hand col., col. ill.; sheets 61 x 50 cm., or smaller + 1 folder (5 folded sheets)”.

► The top-center sheet displays North and Central America. “Les Californies ou Carolines” is shown as an island, separated from “Nouvelle Grenade ou Nouveau Mexique” by “Mer Californie ou Mer Vermeille”. Midway on the mainland coast are three rivers from the northeast and east: (north to south) “R. d’Anguchi”, “R. del Tison”, and “R. Grande del Coral”; the latter two rivers converge at the gulf.

NOTE: Wheat’s (1957) citation of “Fer 1713” (**WHEAT I:94**) is actually to the reproduction of Fer’s map as it appears in Châtelain’s 1719 *Atlas Historique*.

McLAUGHLIN 186

Each citation in THE GRAND CANON has a unique, but arbitrary, serial number referred to herein as an **ITEM NUMBER**—in the example above the number is **25.1283**. It is composed of the number of the part of THE GRAND CANON in which it had been cited (Part “25.” in the example), suffixed with a unique number within that part (“1283” in the example). This example was selected because it includes many of the possible forms of cross-listings, which are most utilitarian in THE GRAND CANON at large.

An ITEM NUMBER is assigned when a citation is added to the bibliography, or when a citation is transferred from one part to another (this does not pertain to the citations copied to this Cartobibliography from Parts 9, 10, 11, or 24 of THE GRAND CANON; see *Notice on the previous page*). ITEM NUMBERS did not appear in the 1981 and 1990/1993 print editions of the bibliography.

Symbol ► with text in dark blue indicates a chorographical analysis provided for some maps.

Selected reference lists are also indicated by **CROSS-LISTINGS**. (See more about this in the section herein on [cross-listings](#) [INTRODUCTION p. 70].) For users who view this Cartobibliography in its original PDF format, the bibliographical cross-listings are in dark orange.

Non-English languages are noted usually at the end of a citation, in red print for noticeability.

(Colors used herein are for visual convenience only and are not meant to be further informative. Monochrome reproductions of this document will still convey all pertinent information.)

NOTE ABOUT URL HYPERLINKS

Throughout this PDF (Portable Document Format) volume, occasional URL (Uniform Resource Locator) hyperlinks direct users to various websites and webpages hosted throughout the internet. In the bibliography they most often link to “supplemental” or “supporting” materials for a publication that were posted to publishers’ websites. Similarly, various citations will refer to publications by their “doi:” (Digital Object Identifier) number.

All links and identifiers were current at the time of citation but are not updated; the doi’s are created to be persistent, but URLs are ephemeral. If a user finds a cited hyperlink that is no longer current, it nevertheless preserves historical and bibliographical perspective. It is not feasible for the compiler to routinely locate updated links because it is not known whether the original URL (or even its domain) has changed, or whether the document has been removed from the host website. Broken links also serve as object lessons of their uselessness to future researchers, although in some cases an archived copy—though one not necessarily perfect—may be accessible elsewhere (for example, through the Internet Archive Wayback Machine, <https://archive.org/web/>). Individuals may also have digitally saved or printed out some of these materials, which then may be preserved in their collected papers or other collections. In the future such kinds of “light gray literature” might be rediscovered in unexpected places and which feasibly could be the only surviving record of that material.*

* Earle E. Spamer, “What a woven web: archives, websites, and the coming legacy of ‘light gray literature.’” *Provenance*, Vol. 20 (2004 [for 2002]), pp. 59-71 (<https://digitalcommons.kennesaw.edu/provenance/vol20/iss1/8/>; last accessed 21 December 2024).

REGARDING THE CATALOGERS' NOTE

I am astonished to have felt the need to add a Catalogers' Note—unheard of, I think—to the publisher's (or copyright) page ([see it here](#)). It points out that the word “canon”, which is conveniently the same in both English and Spanish, can mean a standard, or authoritative, list. The word is neither “cañón” nor “canyon”.¹ Since the first distribution of *THE GRAND CANON* the series title has been made into *The Grand Canyon* in several libraries' catalogs; I do not know whether by inattention, unfamiliarity with the word “canon” by individual catalogers, or by procedurally romanizing a “foreign” word (which it is not, nor is it pronounced like “canyon”). The bibliography has also been cited by authors who have introduced “Canyon” for Canon. Among librarians and researchers, at least, it should not happen. I hope it is not an expression of careless or oblivious neoacademics. Perhaps now literarily defiant, I stand by this precise title, one purposely whimsical. As I note in the Preamble in Volume 1/Part A:

“Bibliography” is, honestly, an awful word. If one is directed to a bibliography but is not otherwise an enthusiast of, or at least appreciates, them, a common response is impatience, if not evasion. Even the suffix “-ography” is a turn-off to some people. If only there were another term, one less dull, one that promises interesting engagement. Some bibliographies are minor contrivances; others are monumentally important within their scope. Some are spectacularly unimaginative presentations that promise tedium or quick disinterest; others are beauties of layout, typography and binding that lure in their users. Yet they all use the same term. If one bibliography were to stand out for its purposes, if it promises to be tremendously comprehensive, it might as well be called a canon. Thus, the name for *THE GRAND CANON* follows on this theme—and it plays on the mostly nineteenth century, Spanish-influenced typography that spelled the world's Grand Canyon as “Grand Canon”. (In non-Spanish language publications, it appeared widely with or without the *virgulilla*, virtually never with the o's acute accent at least when used with the word “Grand”.) Despite some earlier attempts to avoid it, I concede to having to use the word “bibliography”, at least in the subtitle, so that users and librarians will recognize it as such; and hopefully they will see the canon in it. *THE GRAND CANON*, with its dreaded “B” word, may as well aspire to some whimsy.

¹ In older Spanish, “canon” had been spelled “cánon”, though the diacritical mark has fallen into disuse. See, for example (bilingual title, publisher's information, and definition as published) Thomas (Tomas) Connelly (compiler), *A New Dictionary of the Spanish and English Languages, Part the First, Volume I / Diccionario Nuevo de las Dos Lenguas Española é Inglesa, Parte Primera, Tomo I* (Madrid: Pedro Julian Pereyra / Madrid en la Imprenta Real, Pedro Julian Pereyra, 1798), p. 399, one of several definitions: “cánon. Catálogo ó lista. A catalogue, list, or roll.”

The value of maps depends . . . wholly upon the accuracy, extent, and sufficiency of their details, which cannot be left to the imagination without entirely misleading the reader

— Edward Griffin Beckwith

Report of Explorations for a Route for the Pacific Railroad, by Capt. J. W. Gunnison,
Topographical Engineers, near the 38th and 39th Parallels of North Latitude,
from the Mouth of the Kansas River, Mo., to the Sevier Lake, in the Great Basin.
Report by Lieut. E. G. Beckwith, Third Artillery.

U.S. War Department, Washington, 1854.
(U.S. 33rd Congress, 2nd Session, House Executive Document 91, Part 2, Appendix B)

INTRODUCTION

MAPS! What a glorious enterprise! They capture places as they were, or imagined. They steal from us hours of study, and hours more of idle infatuation. They teach. They mesmerize. And they hide away and have to be sought out. Compared to book sellers, there are few map sellers. This was as true centuries ago as it is today, even though a map is more likely to turn a head than will a book.

Since [THE GRAND CANON](#) series comprises a bibliography that focuses on everything published about a defined geographical space, there is every reason to expect the same “everything” among the maps. In this Cartobibliography, which is Volume 2 of the series, that expectation fails. At the outset we compete with the state and commercial suspicions of the earliest periods, when information for maps comprised the secrets of monarchs, mariners and merchants—that much is well understood. In older times, printing blocks and plates were shared, inherited, and otherwise reused in various fashions, often copied, sometimes plagiarized; many with modifications, substantiated and baseless alike. In more recent times, in the 19th century notably, we feel the angst of ateliers who, to make a living, frequently turned out new maps—and maps that posed as new, often barely revised if just to change the date. Sometimes (confusingly for us now) there were multiple editions during a year that may or may not have meant to keep up with rapidly revised political boundaries and civil concerns. Physical geography often fell to the wayside, with some maps using outdated bases on which the new boundaries were printed. As I explain, many of the reissues are not kept up with in this Cartobibliography because the changes do not pertain to physical geography. Just as frequently, I surely have missed numerous maps that I otherwise *would* have captured.

But, a lot of maps are hard to examine. First, one has to find them, then often work with unwieldy rolls or immense flat sheets—they are notoriously difficult to organize and store, too. Once, in order to examine maps one had to travel to far-flung places that held copies that were of interest, or by requesting a repository to photograph the map (usually only in black-and-white and perhaps not of the best resolution). Now, there are so many important maps that can be viewed online that it seems that most everything must be there. (Of course not.) We are beneficiaries of institutions and governments that have digitized maps and make them available online. Some commercial dealers and auction houses maintain online libraries of past offerings. Even so, not nearly everything is online and sometimes miscataloging or misinformation leads us astray; not all of the digitized maps are in adequate resolutions, either, for very detailed study. Though the modern digital environment has made map

inspection incredibly more easy, we nonetheless are, pointedly, at the mercy of those who choose which maps to digitize, and to the creators of websites.

But about the days of personal inspections, consider the position and predicament of Adolf Erik Nordenskiöld in 1889:

... even printed maps of this period [15th–16th centuries] have become very rare, and extensive collections of them are only to be found in a few libraries. Many of the most important of these documents are therefore not easily accessible to students—a difficulty the unfavorable influence of which may be traced even in elaborate geographical treatises of the most distinguished authors.²

Concluding, he hoped that his work would “promote new discoveries in the recesses of libraries and map-collections.” (What, then, he would have thought of the world wide web!)

Citation Styles and Dates. This Cartobibliography does not strictly follow formal cataloging rules because it is meant to show precise, sometimes peculiar, data without adapting to some issues of conformity. The precise transcription of names and titles in particular, which may include faithful reproduction of some typographical elements and errors, is done so that those users who may not be able to see an original product can profit from the exact textual appearance and context.

The primary purpose of this Cartobibliography is to record cartographical data that relate to the Grand Canyon and lower Colorado River regions—a so-called chorographical analysis. It is not meant to be fully a cartobibliography that preserves the overall context of the map, nor does it record nuances that are a part of more proper historiographical cartobibliographies. Dates generally reflect the dates of publication, more so than dates that may appear on a map. In many cases, dates are adopted from those that are recorded or interpreted by cartobibliographers and cartographical librarians in their catalogs.

It might be awkward to read the names of some of the early map producers, for whom customarily their names are standardized; for example (as published, with standardized names in **bold** type):

² A. E. Nordenskiöld, *Facsimile-atlas of the early history of cartography with reproductions of the most important maps printed in the XV and XVI centuries. Translated from the Swedish original by Johan Adolf Eklöf, Roy. Swed. Navy and Clements R. Markham, C.B., F.R.S.* (Printed by P. A. Norstedt & Söner, Stockholm, 1889), 141 pp., 51 plates. [coverage to 1550, actually]. Also a facsimile reprint (Kraus Reprint Corp., New York, 1961, 1970). Also a facsimile reprint, with new introduction by J. B. Post (Dover Publications, Inc., New York, 1973). Original Swedish edition: *Facsimile-Atlas till kartografiens äldsta historia innehållande afbildningar af de riktigaste kartor tryckta före år 1600* (Printed by P. A. Norstedt & Söner, Stockholm, 1889).

I purposely retain the spellings as published, to protect the contemporary presentation of these maps; again, for those users who may not be able to examine the originals. (Map titles are similarly shown as published, employing all typographical elements. See also the separate note on [Typography of Author Names and Map Titles](#), INTRODUCTION *p.* 76.) It is not my intention to render a standardized authority list nor a formulaic homogeneity of titles. The original context of these maps, as presented in their items, is preserved for historical and cartobibliographical precision, as a means to place as much of a map in front of the user in the absence of an accompanying illustration.

Overall, the style of citation herein regrettably varies, a reflection of changes in how this Cartobibliography was compiled during more than 50 years in the Grand Canyon–Lower Colorado River Bibliography project. Despite having re-edited a fair number of citations on the run, I apologize for not having had the time to devote to a wholesale re-citing of the items now in this more elaborate Cartobibliography. (Five decades of accumulation is a long time for one person, and finding again many of these items would be a prodigious task, even with so many things now online!) On the whole, most of the older forms of citation have been emended.

The typographical format of citations in this Cartobibliography differ from the rest of THE GRAND CANON. Usually, titles in this work are in *italics*, while all else is in conventional Roman type. However, it seemed to me that the map citations, particularly those of the earlier (pre-20th century) maps, necessarily focus on a map title that may appear within a larger work. Further, the chorographical analysis of many of these maps, although separated within [square brackets], merged rather confusingly with the balance of a sometimes lengthy citation. In order to make this Cartobibliography more convenient to read, particularly for those who are scanning for information, the titles of maps, specifically, are rendered in **Arial type**. In this fashion the map titles will stand out from the *italicized titles* of products in which they may appear. My chorographical analysis, if any, appears in **dark blue Verdana** font, preceded by a pointer (►) so as to clearly distinguish these texts if they should appear in a monochrome copy. The principal purpose is to easily segregate cartobibliographical information from my chorographical remarks (more than 3,000 such notes appear herein). The

use of color is not particularly important; only that users who engage the original format of this Cartobibliography may isolate those passages more easily. Further, the use of a pale cream page color is purposely used to reduce eye strain, and thus the dark blue color unobtrusively contrasts with it while attracting the reader's attention; especially useful in citations full of information.

With the focus solely on the Colorado River and its landscapes, this compendium may ignore important interpretive data on the maps—data that are not necessary for the objectives of *THE GRAND CANON*. The Cartobibliography's purpose is to also capture the variant spellings of the rivers of interest and adjacent place names when such are given; not always an objective of cartobibliographers. More to the point, this work zooms in to detail the river courses in the region of interest. Maps of larger areas are understood to embrace this region; no special remarks are made unless required. Many maps are overlooked here because they display no rivers, or at least none that can be attributed to the Colorado River in its various early geographical forms and names. Should someone, someday, wish to finely compare the nuances of the delineation of the Colorado River and others nearby—knowing full well that such depictions even into the 19th century are mnemonic at best—this Cartobibliography can be a source book for many, if not most, of the maps that may need to be examined. In some cases, ornamental maps on the title-pages or as frontispieces to old volumes show the region of interest here at such tiny scales that they are not appropriate to analyze for this Cartobibliography, as they were diagrammatic rather than informational.

The scholarly studies of—and critical arguments about—the usefulness and impact of the kinds of cartographical projections used over time are worthwhile readings, even among their bewildering hundreds. But this Cartobibliography—and this bibliographer—having only the chorographical focus, does not address these aspects, the same as it does not address the historiographical position a map may hold among scholars. Such a pedestrian focus on the Colorado River, however it may be shown on these maps, is the direct outgrowth of this Cartobibliography as Volume 2 of *THE GRAND CANON*; and as such it completely ignores many fascinating, often remarkable, elements of these maps.

On early maps in particular, the methods of projection are also not of concern here because of the chorographical focus on what is usually a relatively small part of the whole map. The scales of the maps cited herein range from world maps at one end (with their tiny areas of interest to this Cartobibliography) to large-scale maps at the other end, which focus on the mouth of the Colorado River (perhaps best exemplified by Padre Kino's 1701 demonstration that California is *not* an island, first published in 1705, despite the fact that many cartographers for years afterward chose to ignore the evidence he had seen for himself). Thus, in the citations herein many maps will include my own chorographical analysis of the area of interest here in order to distinguish how our region of interest was portrayed. Even so, for the most part the area we know as the lower Colorado River region

was rarely one of cartographic negotiation, but rather its depiction was seemingly an autonomous reflex—an acceptance of the status quo when it was easier to re-use engraved plates or to simply copy from others, right or wrong, for an area of the world of relatively little interest. Sometimes this was in the extreme, such as when a plate was exactly reused, or with a minor emendation to title or imprint, even decades after its creation, without regard to geographical corrections made by other cartographers during that time.

These chorographical points are less of a concern once we engage publications that are specifically about the Grand Canyon–Colorado River regions, such as with the 20th- and 21st-century larger-scale maps and Colorado River guides. The citations of these follow more conventional bibliographical form, comparable to those in Volume 1/Part B of *THE GRAND CANON*, although for consistency the bold-type title forms are used throughout the Cartobibliography.

As elsewhere in *THE GRAND CANON*, the arrangement of citations is by the author or creator of the work, with items for the same author listed then in chronological order by year. Some citations in the Cartobibliography may be seen to adhere to the citation style used during the earlier decades of this bibliography—title, followed by place of publication and publisher. More recently added citations follow more traditional cartobibliographical styles that replicate all information displayed in a map’s title panel or cartouche, even publisher’s information, and precisely cite capitalizations and most typographical elements. Information that is not part of the title block or caption, such as discrete border notes that credit the engraver or delineator, are quoted (“separately within parentheses”). The disparities of older and newer citation styles should not be too distracting since many citations were reformatted during the process of editing more recent editions *THE GRAND CANON*. Hybrid forms of citations might be noticed by observant readers. Still, the data are there.

As with bibliographies in general, cartobibliographies use many different styles of citation; they may differ even by which names are the primary reference. (One may see this for themselves when comparing this Cartobibliography to others.) Some lists adhere more closely to the engravers of early maps rather than to the responsible delineators; others to publishers. It is, however, not always clear as to whom to give bibliographical credit, especially during the long time when map plates were borrowed, or reused by subsequent generations of a family of cartographers, or copied outright for reuse (sometimes, pirated). Here I have followed, as closely as possible, the method of citing original creators as cited from data on the maps themselves, and the actual dates of publication even though a date on a map may be earlier than its publication date. For example, a map may be included in a later-published atlas, or historians of cartography and printing may have determined alternate dates from those presumed, or have corrected outright errors.

Some cartobibliographies focus on the historiography of maps, as represented at the times they were delineated. The purpose of this Cartobibliography is to follow dates of

publication, hence public availability. Sometimes I have had to rely on the interpretations made by library catalogers. I only ask the user's forbearance in light of the fact that specific information is not always to be had or is open to subjective interpretation given the passage of time. In any case, as much information as possible is given here in order to identify the works and with which they can be found, should they be needed for more in-depth study or have to be re-cited; and of course many citations add descriptive notes that pertain to the physical geography of the Colorado River region.

Unlike more rigorously compiled and annotated cartobibliographies, a citation herein is not meant to describe the whole map in detail; after all, it focuses really on the region embraced by [THE GRAND CANON](#). One will notice that sizes of maps are omitted, as are scales except for those maps on which scales are printed, nor are line breaks in titles and texts denoted. In the titles of maps, I have resorted to citing those printed in all-capital letters by instead using initial capitals in principal words. While it might have been preferable to cite all-capitalized titles precisely, the typographical discordance with citations brought forward from earlier editions of this Cartobibliography would be stark. So I have conceded to the form of initial capitals, a format that is anyway easier to read than all capitals, particularly in the bold type format employed for map titles (but not volume titles) as used in the citations herein. Though some legacy citations from the earliest editions may follow the format of all lower-case title citation, there are no longer many of these to be distracting, and they have not been updated because the maps have not been reexamined.

The use of the terms "caption" and "legend" are used precisely; they discern placement on a map. A "caption" is type along the top of the map; "legend" is a notation beneath or beside an element of the map. Titles are cited by their prominence, if more than one appears on a map; for example, when a cartouche and a caption or legend are both present. Occasionally, a map will have more than one title, perhaps in different languages. These are cited equally, but separately.

Translating and Transliterating. I had considered including approximate, if not precise, **TRANSLATIONS** in *all* of the non-English citations in this Cartobibliography, to assist users who do not know these languages. However, I do not provide universal translations for the reason that many of them would not be at all satisfactory, peculiar if not erroneous, due to linguistic nuances and contextual variances that might not be recognized except by readers fluent in those languages, particularly with older dialects and spellings of centuries past. I could have included translations for some, and not others, but in the end I feel that such an arbitrary selection would detract from the overall dependability meant to be conveyed by [THE GRAND CANON](#). Nonetheless, in a bibliography that is principally in English, information that is presented in a non-Roman orthography is decidedly "foreign" to users who are not familiar with those orthographies, and further, that transliterations alone are not likely to be as helpful as they seem to be. So, *for citations in non-Roman orthographies I do usually*

provide both a transliteration and a translation in English. This is, of course, to facilitate reading by users who could not otherwise even mouth the words, but with the original orthography in hand it will help if one digitally copies to use in searches, or presents the information to someone who can help find the item.

Because I do not read the non-Roman orthographies, and inasmuch as they are effectively unintelligible to users like me who are familiar only with Roman orthography, I provide non-Roman titles and other information in the original orthographies usually accompanied by both a transliteration and a translation in English. The non-Roman information has been extracted digitally from web sources, particularly WorldCat and specific library catalogs that have recorded information in non-Roman orthographies. Occasionally I have had to resort to printing from a digitized copy of the map, then using optical-character recognition (OCR) to render the texts in digital format that could be copied into the bibliography. For details, this often depended upon a satisfactory digital resolution (with thanks to those who made the online originals available at good resolutions).

Most transliterations and translations herein have been obtained through the use of Google Translate online. Admittedly, Google Translate is imperfect, insofar that it is a so-called “neural machine translation service” that translates a sentence at a time, which over time has “learned” to construct better and more grammatically correct sentence structure and word selections. In some cases, I have taken texts and reconstructed some sentences, phrases or words (sometimes back and forth between English and the non-English language as checks) to provide more sensible information, then tested the reformatted translation again as a whole. I have not often been disappointed in the result, though in a few instances I discarded a translation that was obviously awry in favor of one that is simply adequate.

I make this note here so that users of this Cartobibliography can take into consideration any perceived negative aspects, beyond those currently recognized, of Google’s programming interface during the timeframe when the interpretations were made, during the late 2010s and after. Still, the translations obtained for this Cartobibliography are reasonably good, if not accurate, often because many items are technical in nature and not subject to more erudite or “literary” nuances. And of course, the use of the original non-Roman orthographies do make the cited items accessible to those who can read them, or who seek the help of librarians and others who can read them.

This note also applies to the corresponding **TRANSLITERATIONS** that appear in this Cartobibliography. In many bibliographies, titles and other information in non-Roman characters are usually cited in transliteration only, often because the non-Roman character set is not available to the printer (or to the author of the bibliography). While transliteration is somewhat helpful, in that the information can be “sounded out”, variant transliteration schemes for some languages render the citation less precise, less intelligible, to users who follow other schemes. For the non-Roman orthographies, I have had to rely on Google Translate’s trans-

literations exactly. Again, note of this is given in the event of future recognition of issues with Google Translate’s methodologies in the late 2010s and later, the period during which I have used it. Particular schemes of transliteration are not indicated in this Cartobibliography because the sources referred to rarely provide such information, even when I have obtained the information from a library’s catalog.

In this Cartobibliography, as well as in THE GRAND CANON overall, citations that have long, compacted passages of non-Roman orthography, transliteration, and English translation are difficult to visually tease apart. I have devised a method of colorizing some of this information to make specific portions stand out more clearly. The original title, being the key bibliographical component, is printed in black as usual; it may be followed by a transliteration [in gray font between brackets], then an English translation [in light red font between brackets].³ (An example is shown below.) In any case, I believe that if a person cannot read a foreign language—and does not have the opportunity to obtain a translation—further access to that item may be moot if, in the case of maps, specific interest goes beyond just the graphical presentations.

Hirose, Hakaki [広瀬はかき]

- 1862 25.1404 図 新路航海環 [read right to left] [Kankai kōro shinzu] [New map of sea routes]. [In Japanese.]
 World map. Title displayed as printed on map; Library of Congress provides “other title”, 環海航路新圖, which, besides reading left to right, differs somewhat in orthography.
 Library of Congress gives publication data (with ellipsis and square brackets thus): “Kyōto : Katsumura Jiemon ... [and 2 others]; Edo : Suharaya Mohē ; Bunkyū 2 [1862]”, with note, “Kotenseki sōgō mokuroku, 2013-09-11 (環海航路新図 (かんかいこうろしんず), 地図 1 枚; 著者: 広瀬包章; 出版事項: 須原屋茂兵衛 <江> 他 3, 文久 2).” (this is illustrated at <https://www.loc.gov/item/2013588000/>).
 ▶ On the map, “カリホルニア” [California] (similar to the modern orthography, カリフォルニア) is separated from the mainland by “東紅海” [East Red Sea] [i.e., Gulf of California]. Rivers on the continents are not labeled, but the Colorado River is shown reaching the head of the gulf, with a wildly imaginative drainage basin reaching far into the continent. In addition, the map seems to portray the routes of railroads in the United States, including in the Southwest the (proposed) 32nd parallel route.

Traditional and simplified character forms of Chinese both appear through THE GRAND CANON, depending upon whether the original publication or a library catalog record was followed. For transliterations, the pinyin system of romanization is usually followed for Chinese text, again based on the sources. These will be recognized by the inclusion of diacritical marks in the pinyin texts. However, some older citations may be represented in other

³ The gray and light red fonts are used for the visual convenience of those working with the original digital version of this bibliography, so that the transliteration and the translation in English are more noticeable amidst the original data and notational texts. Text in supplemental colors may yet be distinguishable even when a black-and-white printout from this bibliography is referred to. Colors have no special significance to the data presented in this bibliography.

transliteration systems as used by the sources seen. Further, some Chinese monosyllabic and multisyllabic transliterations are as taken from online catalogues or from automated translations, without regard to linguistic precision in the language itself. These may be displayed either as a “solid” or compound transliteration, which forms a series of long, single “words”, or sometimes appear as a string of single-syllable sounds; again, as used by the sources consulted. Similarly, Japanese mono- and multisyllabic transliterations appear in various forms herein. These are only guides, and no attempt has been made at standardization.

Cartobibliographical Details. Historical geography—indeed, the analysis of maps at minimum—is a vast academic study and avocational pursuit, even one of simple pleasurable indulgence. This Cartobibliography gathers those maps that in some fashion display the lower Colorado River–Grand Canyon region. Maps that omit the rivers of this region are usually overlooked here. For the most part, only published maps are listed, although a small number of manuscript maps are included. Manuscripts are restricted to those that are of primary importance to the historical geography of this part of the Southwest, sometimes as the immediate if not sole source for maps published later, or that document important “firsts”; their citations include pertinent notes. Still, one has only to see the cartobibliographies or catalogs of major map repositories to recognize the tremendous number of 16th century and later manuscript maps that are pertinent to the region covered here, which of course should be consulted in the pursuit of historiographical studies.

This Cartobibliography is a documentary effort, describing how the Grand Canyon–lower Colorado River region of North America was portrayed on published maps, correctly or incorrectly. This is far less so a contribution to cartobibliography in its strictest sense, although in a few instances it corrects or amplifies the work of earlier bibliographers. Yet neither is the Cartobibliography meant to be a “collector’s guide” since it is beyond the scope of this Cartobibliography to document, in any detail, states and variants of maps (although in a few cases such distinctions are noted, particularly for items whose states seem to not have been recognized before).

There are hundreds more general maps that surely could be listed in this Cartobibliography; most additions have been opportunistic. In every case, these maps are cited for the geographic information they illustrate regarding the lands that fall within the geographic boundaries defined by [THE GRAND CANON](#), even when the *subject* of the map may be extralimital. Annotations indicate details of interest within the scope of the bibliography. Whether or not one of the principally extralimital maps freely borrowed a base map from a pre-existing map, as was often the case, or created a new, even if whimsical, interpretation, is not a central concern here; only that the map portrays in some measure the Colorado River region and may be examined for that information.

Some users may notice that various reprinted and plagiarized editions of maps are not cited; specifically, those of the early cartographical publishers who produced numerous vari-

ants and editions. Bear in mind as well that it was not unusual for plates by one cartographer to be reused by another; others simply copied them, with variations. It has not been practical to follow through on some of these replicated editions, but one should also specifically keep in mind the compound of editions based on inherited plates and the individually creative work of the genealogical and cartographical business lineage of Gerard Mercator, Rumold Mercator, Jodocus Hondius, Hendrik Hondius, and Jan Jansson, superseded in force by the family of Joan, Cornelius, and Willem Blaeu. Another family group among cartographers cited herein are the Sansons—Nicolas Sanson d’Abbeville and his grandson, Pierre Moullart-Sanson, who was the uncle of Gilles Robert de Vaugondy, also cited. Users will find some of these family works cited herein, but the listings even for the region of interest are not comprehensive. Similarly, since maps were copied, updated, and reprinted, one may also note that some maps of a particular cartographer may be published posthumously, or credited to them for decades afterward (even in revision). The sudden cessation of the use of some plates does not necessarily reflect a geographically pertinent decision not to reuse them. Rather, for example, references to the destruction of Joan Blaeu’s plates in a fire during 1672 reveal a reason for the end to such reuse. Mishap, and disposal or metal recycling following a publisher’s death, also are likely reasons.

The kinds of maps cited here vary. Many are standalone productions, while others are maps that accompany reports of explorations; some of them as large fold-outs, others as loose maps accompanying those reports. A significant number of atlas plates are also cited here, which sometimes note different production dates compared to the dates of the publications in which they appeared. (In large measure, it is the publication date—the date of public availability—that determines the date cited in *this Cartobibliography*. Thus the user may see a date that differs from one that appears in other cartobibliographies that focus on dates of supposed original creation.) Again, this Cartobibliography, and [THE GRAND CANON](#) overall, usually uses dates of publication for its citations. Sometimes it is difficult to distinguish by these bibliographical citations standalone maps from those that were published as part of more widely embracing documents, often because they are now seen separately for sale or have been received by repositories as separates.

It is difficult to stringently keep to maps that were made specifically as separate publications, to isolate them from maps that were included in reports and atlases. Such a separation was the intent of the Grand Canyon–Lower Colorado River Bibliography project at its beginning (in the 1970s). For the reasons mentioned here, as well as for informational interest, the focus was broadened. It is reasonable to cite some of the included maps due to their significance to studies of the regions they embrace; many of these have likewise been cited in other cartobibliographies, notably those by Wheat that are cross-referenced here. They are also cited because they may be available separately from dealers who had either acquired the maps individually or who had broken them from the volumes in which they appeared; thus, without information on provenance, they can be mistaken for separate publications. Even in

other cartobibliographies the distinction is not always made clear. Further, maps prepared by one cartographer as a separate production may be included in a volume compiled by another cartographer or author. Still, they are discrete maps.

So it is justifiable for a broadly focused work such this one to cite maps that appear within larger works, such as major reports and atlases. The relationship of individual maps from broken volumes is not always represented in the library catalogs or the sales offerings of map dealers, and even during my own research such information may have eluded me. While libraries may catalog these maps as separate items, they may or may not have accompanying notes that identify the original source; it may have not been known to them. Some libraries may also separately catalogue included maps as a matter of analytic cataloging, which is not necessarily obvious to general users. While informed scholars and sellers may understand such original relationships, the information does not always reach the more “common” level of the catalog record by which many users come to know of these items. In this Cartobibliography, frankly, it is less important to work out these omissions since it is the identifiable map itself—and the pertinent information conveyed by it—that is cited and described.

Many maps are now cited herein that are within less obvious publications, like instructional texts or even Bibles; they are cited usually for some unusual perspective, but their numbers are not great since the prime focus of this Cartobibliography is mostly on those separately published maps and atlas sheets just mentioned. When maps are known (to me or my sources) as being a part of a larger work, they are so indicated; otherwise, the maps are cited on their own merits, and future bibliographers may make emendations as needed. At least, the maps are cited. Any blurriness of context is not intended but may be the result of incomplete information either from a source or from the interpretation of the map itself. With respect to the geographical information conveyed about the Colorado River region, these issues are less important because, as noted, this Cartobibliography has a predominantly chorographical perspective; that is, the focus is finer than the map as a whole, such as on rivers.

Some maps, particularly those of the first two-thirds of the 19th century, may be recognized as noteworthy for the display of frequently changed political boundaries; so one may wonder why note is not made of these herein. This Cartobibliography focuses on the physical geography of the Colorado River country; the political boundaries displayed on these maps are not usually important in this context. In fact, the same base map might have been used by a publisher in order to issue a map on which only the political boundaries were revised (not the physical geography). This was only a matter of convenience for the cartographer or the atelier. New discoveries about physical geography, which might have called for a more wholesale revision of a map, either were not known to the map makers and sellers or were ignored for the sake of expedient sales. The reuse of severely outdated base

maps simply to present redrawn political geographies, or those that were used indiscriminately for convenience—despite a publisher’s trumpeting “the most recent authorities” and so forth—needlessly unleashed floods of misrepresented geographies that carried forward past their primes. In some cases, a single atlas may include maps that overlap geographically but which display obviously different information (see examples in the separate section herein, [“Examples Of Discordant Geographies on Atlas Maps Printed in the Same Publication”](#) [INTRODUCTION p. 35]). The commercial map publishers should have known better, though in some cases even the government cartographers are caught in the act.

With many of the 16th to 19th century maps cited here, in reading the descriptions of the parts of maps that are pertinent to the region covered herein, it might seem—to use an “analog” analogy—as if one were listening to a “scratched record” when the maps seem to repetitively relay the same description of the parts described here. The repetition is unavoidable because this Cartobibliography is not a prolonged analytical text but a bibliography; that is, each citation stands alone. I wholly ignore the fundamental errors of some maps, particularly among the earliest ones—the imagined coastlines, mythical straits, invented seas and lakes, and improbable rivers—except when it was pertinent to note it. These are more the attention of cartographical and historical scholars, while this Cartobibliography looks only to the physical geographies of southwestern North America through which flows the Colorado River. Besides, amidst the drone of repetitive notes in these citations there are occasional variations—sometimes little surprises. Were I to record just the surprises it would violate the directing purpose this work to cite the whole of everything found, for the benefit of users who will have greatly varying needs and expectations.

It is, further, not always sufficient to say that one or another map is “representative” of “many such” maps of a particular time, and to ignore the others. In seeking some measure of comprehensiveness, as here in this Cartobibliography, all of them should be cited with as much information as possible in order to compare content and presentation. How often has a reader been disappointed, even with a richly illustrated book, when many maps are mentioned on the fly, without any further note? With the citations here one may be assured of a good starting point to find as many as are of interest to the region on which [THE GRAND CANON](#) focuses.

If one pays close attention, one will see the onward representation of the same, often inaccurate, geographical elements or the arrival of new elements (inaccurate and truthful alike). Of course, most representations of the courses of rivers on these older maps are diagrammatic, not the results of careful surveys (which was rarely the case). Many maps anyway had been prepared to display political boundaries and spheres of influence, more so than physical geography. Some depictions of river courses are honestly conjectural, perhaps delineated with dashed lines; many, though, are simply contrived. People generally understood that these areas were effectively—if not utterly—unknown to Western eyes and

minds. What were drawn onto maps were simply indications that a river was known—or said—to be present there, somewhere. And so a line was drawn, its twists and turns we today are too eager to view superciliously, which were really for interpretive effect, that “here a river flows”, although sometimes the display was ingeniously atrocious. But, for an off-corner of the world such as the southwestern part of North America, copying and plagiarizing geographic information, especially in earlier times, was not only convenient, but expedient and largely unremarked.

There are many well-known cartographic fantasies that appear in these maps. To gain a fine sense of this, one has only to read Chapter 8 of Wheat’s (1957) Volume I, on the “Products of the Commercial Ateliers, 1750-1800”. (See farther below regarding Wheat’s cartobibliographies.) The notes that accompany a citation here are mostly restricted to a general description of how the Colorado River, its tributaries, and the landscape along its course are portrayed. The citations are not so much geographical as they are chorographical. Although such focus can draw attention away from the map’s *intended* function, in the context of THE GRAND CANON these chorographically focused points are of greater importance.

Part 2 (General Publications) in THE GRAND CANON Volume 1/Part B includes numerous volumes in which specific maps are noted as pertaining to the regions covered by this Cartobibliography, usually relating to the Colorado River. In previous editions of the bibliography these publications of cartographic interest remained segregated from Part 25 (the former “general maps” section) because the listings in Part 2 often embrace significantly more textual information that is pertinent to the overall coverage presented by THE GRAND CANON. However, the Cartobibliography presents selected ones among these more general citations, so as to be more convenient to those who are searching for pertinent, even important, cartographic materials for the region embraced here. Most data in the citation are brought forward into the Cartobibliography.

The availability of digitally scanned maps online is useful for examining maps and atlas sheets from numerous sources, including those in the Library of Congress and various regional and institutional collections as well as ephemeral listings by dealers (see “[Online Map Resources](#)” [p. *xcix*]). As these sources continually emend their online holdings, the user will be more at an advantage by conducting new searches at any time.

The Cartobibliography does not include probably thousands of “casual” maps such as those that appear on the pages of serial articles or interspersed in the texts of books (there are a few important exceptions). It also does not contain citations for publications “about” the science or art of cartography, about historical aspects of mapping, or the historiographical aspects of a particular map. Its purpose is not to describe the cited maps from the viewpoints of human history and the development of cartography, but to place the portrayal of physical features of the Colorado River basin in temporal perspective.

The overall objective in compiling this Cartobibliography is to provide an idea of what is available—knowing well that there is far more that is not documented here. Ideally, an illustrated cartobibliography would be very useful (and enjoyable), but given the need to wrest the academic, legal, and fiduciary means to bring such a work into being, it will have to be up to another person or party and in another venue. This, at least, is a framework erected for the use of those interested in the changing geographical aspects of the Grand Canyon–lower Colorado River region. The descriptions of those parts of the maps that are pertinent to this Cartobibliography are provided for their interest, considering that it is not usually practical to compare all of these maps in person, at one time.

Although a bibliographical list of maps provides a useful service, Carl I. Wheat clearly explained (specifically for his monumental work on the Transmississippi West of North America) that it is impossible, at least for one person, to pursue a perfect record of comprehensive listings.

Books about maps, ... or indices, or bibliocartographies, or catalogues, or even the most learned discourses on the maps of related areas cannot be accepted or used as substitutes for personal examination of the maps themselves [...] To those familiar with the history of this vast western area, it will be obvious that no investigator could in his lifetime hope to see and list all the maps that in some fashion bear upon its complex story. ⁴

Nonetheless, I hope that these citations, confined as they are geographically, temporally, and chorographically, also inspire some users to embark on reading journeys (made ever more possible by the numbers of maps accessible online) into the realms of always-evolving studies of cartography. The old never is old when its materials are looked at with refreshed vision.

Nomenclature for *Río Colorado* and Colorado River. Historical, bibliographical, and cartographical research in the region covered by this Cartobibliography can be confusing given the number of names by which the Colorado River has been known since the first European report in 1539. “Colorado River” appears elsewhere, too: in Texas (United States) and as “Río Colorado” or “Rio Colorado” in various places in the Spanish- and Portuguese-

⁴ Carl I. Wheat, *Mapping the Transmississippi West, 1540-1861. Volume One. The Spanish entrada to the Louisiana Purchase, 1540-1804*. San Francisco: Institute of Historical Cartography (1957), pp. 7, 9-10. [Two illustrative cases in point are the profusion of atlases produced by Gerard Mercator and Ioudocus Hondius, 1585-1637, and by Johannes Janssonius, 1638-1681, which mostly have not been attempted to list herein. See for a complete analysis of these works, including lists of the new maps that appear in each of numerous editions, two papers by Johannes Keuning: “The History of an Atlas. Mercator–Hondius”, *Imago Mundi*, Volume 4 (1947), pp. 37-62, and “The Novus Atlas of Johannes Janssonius”, *Imago Mundi*, Volume 8 (1951), pp. 71-98. For a third illustrative case, see in Section 1 the remarks under [Ptolemy](#), regarding the profusion of editions, originally from Ptolemy’s historic work of the Second Century, *Geography*.]

speaking world (a name that, incidentally, also is used for the Colorado in Mexico and which also was used in non-Spanish publications and maps, especially in the 19th century).

For the benefit of newcomers to the study of this region, and as a refresher for those who are more familiar with the region, a summary of names is below. The names pertain to the originally named stretch of the river—from the confluence of the Grand and Green Rivers in present-day Utah to the sea. (The name “Colorado” was legislatively applied to the Grand River by the U.S. Board on Geographic Names in 1921, to allow the Colorado River to locate its headwaters in the state of Colorado, although geomorphological purists continue to recognize the Green River as the headwater main stream of this river basin.) Names in this list include those from manuscript and published materials, cartographical and textual, and misspellings. Some, particularly those from the 19th or 20th centuries, are mixtures of Spanish and other languages. Some names are misapplied from, or confused with, other rivers as a matter of presumption.

Big Colorado River

“big stony river (the Colorado of the West)” [in a work of fiction; presumably taking the name from the Stony Mountains (Rocky Mountains)]

Boñagua R[ivière] [*in French*]

Caramara flu[uius] [*in Latin*] [see Rio Coromara]

Collorado river [*sic*]

Collorado Fl[usse]. [*in German*]

Colorado de los Martyres

Colorado de l’Ouest

Colorado del Oeste

Colorado (des Westens) [*in German*]

Colorado Grande

Colorado-Ouest [*in French*]

Colorado River

Colorado River of California

Colorado River of Mexico

Colorado River of Sonora

Colorado River of the Gulf of California

Colorado River of the West

Coloratus fl[uvius]. seu Nord-Strom [*sic; in mixed Latin and German*]

Coloredo River

Cotorado R[ivière]. [*sic; in French*]

Firebrand River [*in translation of the original Spanish, Río del Tízón; see below*]

F[iume]. Colorato [*sic; in Italian*]

Fl[usse] Colora de los Martyres [*sic; in mixed German and Spanish*]

Fl[uvius]. boni praesidii [*in Latin*]

f[luuius]. Colerado [*sic; in Latin*] [seen also corrected as f. Colorado]

Gran Rio Colorado [*and as Gran Río Colorado*]

Grand Colorado [*applied to the Grand River*]

le grand fleuve Colorado ou du Nord [*in French*]

le grand rio Colorado [*in French; and as le grand rio Colorado de Californie*]
 Great Colorado
 Great Colorado of the Pacific
 Great Colorado River [*and as Great Colorado*]
 Great Rio Colorado of California
 Great River of the Apostles [*a conflation of the Gila and lowermost Colorado Rivers as one stream*]
 Green River or Colorado of the Gulf of California [*sic*]
 Good Hope River [*in English; as a tributary to Tison R.*]
 Martyrs River [*and as Martyr's River*]
 Muddy River [*a literary liberty*]
 Nord-Strom [*North River in German; see Coloratus*]
 North River [*not the Rio Grande*]
 Ouiquintas F[iume]. [*in Italian*]
 Red River [*also applied to the Little Colorado River, and at least once in error to the San Juan River*]
 Red River of California
 Red River of the West
 Río Buena Esperanza
 Rio Colerado [*sic*]
 Rio Colorabro [*sic*]
 Rio Colorada [*sic*]
 Río Colorado
 Rio Colorado II [*presumably to distinguish it from the Rio Colorado of Texas*]
 Rio Colorado (West)
 Rio Colorado de California
 Rio Colorado de la California
 Rio Colorado de las Balzas
 Rio Colorado de los Estados Unidos por el Norte [*sic*]
 Río Colorado de los Martyres
 Río Colorado de México
 Río Colorado del Norte [*and as Rio Colorado del Norte*]
 Río Colorado del Occidente [*and as Rio Colorado d'Occidente*]
 Río Colorado del Oeste
 Rio Colorado del Sur
 Río Colorado Grande [*and as Rio Colorado Grande*]
 Río Colorado Grande de la California
 Río Colorado Grande de los Martyres
 Rio Colorado of California
 Rio Colorado of the Gulf of California
 Rio Colorado of the North
 Rio Colorado or Grand River [*sic*]
 Rio Colorado or North River [*also in translations*]
 Rio Colorado or of the North [*sic*]
 Rio Colorado ot Totontoac [*sic*]
 Rio Colorado ou R[ivière]. Verde [*sic, in French; labeled for the reach between the Bear River (Utah) and Little Colorado River (Arizona)*]

R[io] Coralado [*although the name seems to conflate Rio Colorado and Rio Coral (Gila River), the river's poor portrayal nonetheless is distinct from the similarly poorly portrayed Gila River drainage*]

Rio Coromara [*assumed by contemporary geographers to be that of Marco Polo's river in China; also seen as "R. de Coramara" and as "Caramara flu."*]

Rio de Aguchi, ò de Bona Guia [*in Italian*]

Río de Alarcon

Río de América Septentrionale

Rio de Anguchi [*in Latin source*]

Río de Buena Guía [*and as Rio de Bona Guia*]

Rio de Colorado [*and as Rio-de-Colorado*]

Rio de Colorado of California [*sic*]

El río de las Balsas [*also applied to a South American stream and to several locales in Mexico*]

Río de los Martires [*and as Río de los Martyres*]

Río de los Tiburones [*sic; in fiction*]

Río del Norte [*not Rio Grande del Norte, which is the Rio Grande of the Gulf of Mexico*]

Río del Tízón [*and variant contemporary spellings; e.g., "Taon", "Teco", "Tecon", "Teçon", "Thicon", "Ticon", "Tiguex", "Tisan", "Tison", "Tocon", "Toucan"*]

Rio Gran de Colorado [*may only be due to awkward map lettering of Rio Grande Colorado*]

Río Grande [*not Rio Grande del Norte, which is one name for the Rio Grande of the Gulf of Mexico*]

Río Grande Colorado

Río Grande Colorado de los Martyres [*in 1710 manuscript, as "Rº Gº Colorado de los Martyres"*]

Río Grande de Buena Esperanza

Río Grande de Colorado

Río Grande de los Cosninos

Rio Green [*in Russian, "Рио Грин" (meaning "Green River", correctly applied to the Green River and misapplied to part of the Colorado River)*]

Río Mysterioso

Río Totontec [*also as Rio Totontec and Rio Tontontec; see also under "T"*]⁵

River Colorado

Riv[ier]. Colorado of Del Norte [*in Dutch*]

R[ivière]. Colorado ou des Martirs [*in French*]

Rivier de Colarado [*sic; in Dutch*]

rivière de Calorado [*sic; in French*]

Rivière de Coral [*in French, the Colorado mislabeled; should have been labeled on Gila River*]

Roode Rivier Colorado [*sic; in Dutch*]

Tigna fiume [*in Italian, "Ringworm River"*]

totonan[-illegible] F[luvius] [*sic, in Latin*] [*see also Río Totontec*]

Tontonteach f[iume]. [*in Italian*] [*see also Río Totontec*]

Totontec fluvius [*in Latin*] [*see also Río Totontec*]

Western Colorado

⁵ Obscure; the name *Totontec* usually pertains to a presumed Indigenous "kingdom". Regarding *Totontec* see for example, William K. Hartmann, *Searching for golden empires : epic cultural collisions in sixteenth-century America* (University of Arizona Press, Tucson, 2014), p. 271 ff; and Helda B. Barracco, *Os "dourados" de Parima : um problema de anticomunicação* (EBRAESP Editorial, São Paulo, 1978, p. 149; in Portuguese, which is an ebook only and thus is not otherwise cited in [THE GRAND CANON](#)).

The Colorado had also been referred to as the “Seedskeeter”, “Seedskadee”, and variant spellings, which are corruptions of an Indigenous American pronunciation actually for the Green River (in the upper basin area). The Little Colorado River has been given comparably overlapping names, including a redundant “Río Colorado”.

Puerto de Bucareli. Noticeable on many maps particularly from the 19th century is a name usually placed at the confluence of the Colorado and Little Colorado Rivers. It originates with padre Francisco Tomás Garcés soon after he had visited the Havasupai on Cataract Creek in 1776. Viewing the expanse of the canyon carved in the plateau, he bestowed on it the name *Puerto de Bucareli*, honoring then-Viceroy of New Spain, Antonio María de Bucareli y Ursúa. It was a “pass” for the Colorado River’s journey to the sea.

When Alexander von Humboldt worked on his geographical researches in New Spain in 1803, he examined various maps of the territory and took up the name that had first been set down in 1777 by Bernardo de Miera y Pacheco, who had adopted Garcés’s honorific. Although in the Geographical Introduction to his *Political Essay* on New Spain⁶ Humboldt devotes several pages of discussion to the astronomic location of the confluence of the Colorado and Gila Rivers, and mentions source information for specific locales in what today are northern Sonora and southern Arizona, he did not mention anything about places farther to the north, leaving such information solely to his map. He provided a lengthy annotated list of the maps that he had consulted, principally manuscripts, to create his entire map of New Spain.⁷ When he passed through Washington, D.C., on his way home to Europe in 1804, Humboldt’s map was copied with his permission, which in turn was plagiarized with introduced errors for inclusion in Zebulon Pike’s 1810 publication on his western explorations.

Humboldt’s map of New Spain was first published in 1808 (twice pirated in London in 1810, only once offering a credit to Humboldt) before Humboldt’s better-known reprint edition of 1811. He was the first to alter the Bucareli honorific, as “Puerto de Bucarelli”. Later copyists continued to offer up even more variant spellings (listed below). From Humboldt’s map of New Spain, the name was simply repeated based on the fundamental authority of Humboldt without knowledge of the intent of Miera’s label, Garcés’s physiographical neologism. Even Humboldt had had no understanding of its special context. Some labels that

⁶ Alexander von Humboldt, *Essai politique sur le royaume de la Nouvelle Espagne : ouvrae qui présente des recherches sur la géographie du Mexique . . .* (Chez F. Schoell, Paris, 1808). (Numerous reprintings and translations.)

⁷ The maps included: “*Mapa de la California, carte manuscrite des pères Francisco Garcés et Pedro Font, 1777.* Elle a aussi été gravée à Mexico, mais avec une erreur de trois minutes en moins pour toutes les latitudes. Elle est intéressante pour la Pimeria alta et pour le Rio Colorado.” (p. 104 in the 1811 ed.). (Transl.: ‘*Mapa de la California, manuscript map by Fathers Francisco Garcés and Pedro Font, 1777.* It was . . . engraved in Mexico City, but with a diminution error of three minutes for all latitudes. It is interesting for the Pimeria alta and for the Rio Colorado.’)

appeared on subsequently copied maps were rearranged or misleadingly accompanied by point place-name symbols. The result of the latter was to group the name among Miera's cartographical plotting of many ecclesiastically named campsites of the Domínguez–Escalante expedition of 1776, with Miera accompanying them, that circumambulated a good portion of the Colorado Plateau.

All variants of *Puerto de Bucareli* that have been found on maps (manuscript and published alike), and occasionally in other matter, are listed here for historical completeness (as compiled by Spamer):

| | |
|---|----------------------|
| Bucarelli | P. Bucaretti |
| Bucaretti | Puerto Bucarelli |
| Bucaretty | Puerto Bucarello |
| Bucuretti | Puerto de Bucareli |
| de Bucareli | Puerto de Bucarelli |
| P. Bacarelli | Puerto del Bacorelli |
| P. Bucarette | Puerto del Bacorilli |
| S. Bacarelli [perhaps thought to have been a mission, but this and other place names were actually the Domínguez–Escalante campsites shown on Miera's maps] | |

The cartographical depictions of the *puerto*, however, have varied, usually plotted without an understanding of Garcés's original intent. **The following illustrations** show principal variations of the label's placement. See also the [separate section](#) (INTRODUCTION *p.* 41) that displays some important manuscript and printed maps, with fuller citations and credits.⁸ Spellings of *Puerto de Bucareli* are those as which appear on the maps.

⁸ See also the separate publication, Earle E. Spamer, *Mapping Grand Canyon: A Chronological Cartobibliography* (Raven's Perch Media, 2nd ed., 2024, <https://ravensperch.org>). It includes a section devoted to cartographical products that record *Puerto de Bucareli*, 1877-1884.

Figure A. Manuscript (detail), likely the work of Bernardo de Miera y Pacheco, “*Derrotero hecho por Antonio Veléz y Escalante, Misionero para mejor conocimiento de las Misiones, pueblos de Indios y Presidios que se hallan en el Camino de Monterrey a Santa Fé de Nuevo Mexico. Laus deo Anno Domini 1777.*” The placement of the label **Puerto de Bucareli** is at the confluence of the *Rio Colorado* and *Rio Jaquesita* (Little Colorado River), amidst rocky symbols that signify encanyoned reaches of these rivers. (Contrast Figure C.) (Library of Congress)

“*Puerto de Bucareli*” seems to label a gap in the encanyoned reach of the Colorado River (see just to the left of the word “*Puerto*”), an observation apparently not specifically noticed before. However, it does not convey Garcés’s nomenclatural application of the *puerto* to the chasm as a whole, as a pass for the river through the plateau. Instead, it shows a discrete gap, such as would be familiar in mountains; here it is an interruption in canyon walls. Given that Miera was personally aware of some of the Colorado River’s canyons from his travels with the Domínguez–Escalante expedition of 1776, it seems odd that he would have made such an interpretation—unless through a misunderstanding he thought that Garcés had identified a place similar to what became known as *El Vado de los Padres* (The Crossing of the Fathers) where the Domínguez–Escalante party had found a place to cross the encanyoned Colorado in today’s southern Utah, an experience that would have been fresh in Miera’s memory. Note also that the positioning of the *puerto* is about where today’s Lee’s Ferry is located, at the break between Glen and Marble Canyons, a locale visited by the expedition although they could not cross the river there. Miera also marked *El Vado de los Padres* as a gap, though without a label (see **INSET** above with pictorial symbols for campsites to either side of the river; the obvious vertical stripe is a crease in the map). [Examine map at Library of Congress, call number G4300 1777.V4, pen-and-ink and watercolor; digitized online at <https://www.loc.gov/item/96686648/>.]

Figure B. Alexander von Humboldt's 1811 map (which reproduces the one originally published in 1808). The *puerto* is neatly inscribed at the confluence of the Colorado and Little Colorado Rivers. Without indications of canyon topography, it already has lost its topographical interpretation as a “pass” and in fact seems to imply that it relates to the Little Colorado River. However, Figure C (*below*) may show that Humboldt's original manuscript had a more sensible placement. (American Philosophical Society)

Figure C. Juan Segura's 1804 manuscript copy of Humboldt's original manuscript retains the placement of *Puerto de Bucarelli* [*sic*] **straddling the Colorado River** between the Little Colorado and *Nabajoa* (San Juan) Rivers. Accordingly, it is not clear whether the engravers of Humboldt's map of 1808/1811 had any influence upon the position of the *puerto* label at the Little Colorado confluence. [The adjacent word “*incierta*” continues the legend of the text above it.]

(Biblioteca Digital Real Academia de la Historia, Madrid. Creative Commons Public Domain Mark 1.0)

Figure D. Zebulon Pike’s 1810 plagiarism of Humboldt, taken from a manuscript copy of Humboldt’s own 1804 manuscript while the explorer–geographer was in Washington, D.C., sensibly shows *Puerto del Bacorelli* [sic] along the Colorado River, through today’s Marble Canyon reach. (The rubber stamp, seen as a bleed-through in reverse, is on the back side of this printed copy of Pike’s map in the *Library of Congress*, indicating that it was transferred to the U.S. War Department Chief Engineer’s Office.)

Figure E. The commercially produced 1823 map by H. S. Tanner, *A Map of North America* (“Southwest” sheet) displays *Puerto Bucarelli* straddling the Little Colorado River confluence.

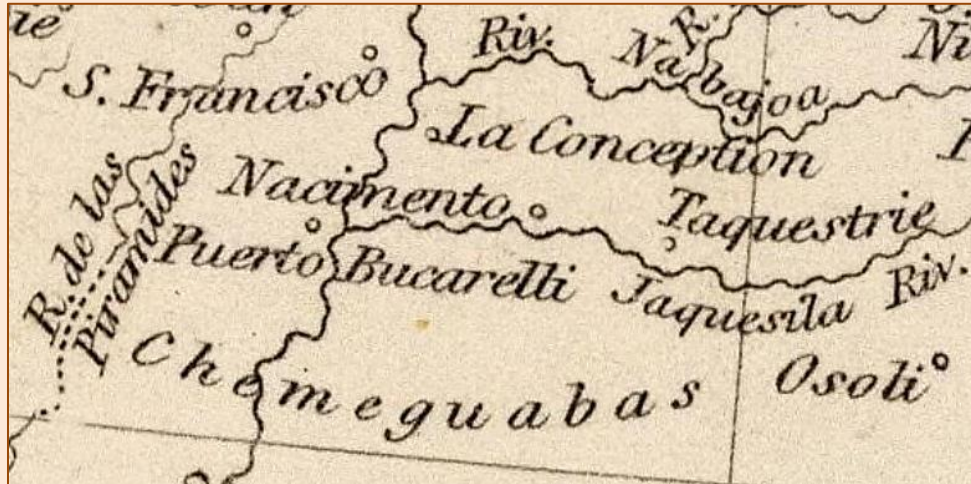

Figure F. J. Dower's *Mexico and Guatemala* atlas sheet, [1834], squeezes *Puerto Bucarelli* into a space **downstream from the Little Colorado confluence**, but note also that a dot is placed **there**, supposing that the *puerto* is a spot-point as also are other places seen in this detail.

Figure G. James Wyld, in this post-John Wesley Powell map from *ca.* 1880, which plots Lee's Ferry and the route of the Atlantic & Pacific Railroad, **repositions *Puerto de Bucarelli* to cover the entire region southwest of the Little Colorado River and east of Cataract Creek** (not labeled here but shown with its supposed upstream tributaries "Parke Cr." and "Cedar Cr."). Note as well that the Little Colorado is labeled differently on two branches: "R. Jaguesila" and "R. de Lino" (label partly seen here), the latter actually being the main course of the river and on which this map labels the course farther upstream as "Colorado Chiquito." These names, in variant spellings, have historically been applied to the Little Colorado.

Figure H. The 1884 *Sohr-Berghaus Hand-Atlas* (published in Glogow, then a part of the German Empire) managed to complete obfuscate the spelling and position of the *puerto*, labeling it simply as a **point-name, “Bucarety,” at the confluence of the unlabeled Cataract Creek with the Colorado River.** Ironically, although the *puerto* was not intended to be a point-place, the presentation here is closer geographically to Garcés’s original observations while he was leaving the Cataract Creek area en route to the Hopi mesas. “*S. Bartolome*,” at the Little Colorado confluence where the *puerto* is often displayed, seems to be retained from maps that recorded the campsites of the Domínguez–Escalante expedition as plotted originally by Miera—although here it is misplaced as well. Note that the Colorado is displayed with encanyoning hachures to the west of “Bucarety”, while northeast of there the hachures seem to display a tableland on the northern side of the river. Also note that Kendrick Peak of the San Francisco Peaks has somehow been misconstrued as a separate mountain range, *Kendricks Burge*, of which the single *San Francisco Burg* is a part.

Sierra de la Lanterna. Several maps in this Cartobibliography label a mountainous area as “*Sierra de la Lanterna*” (Figure I), a forgotten name for the Kaibab Plateau, though probably misplaced. It is perhaps a misspelling of the Spanish *linterna* (lantern), but the origin or significance of this geographical name has not been identified. In one gazetteer from 1854 it was noticed with geographical coordinates that verify its placement where exists the Kaibab

Plateau: “Sierra de la Lanterna, a mountain range in the N. part of the Territory of New Mexico, lat. about 36° 20’ N., long. 112° 15’ W.”⁹

See the following Cartobibliography items that note this geographical feature, with a relatively short-lived use of less than two decades (listed chronologically): Parke [1851, [ITEM NO. 25.160](#)], Disturnell [1853, [ITEM NO. 25.688](#)]; Monk [1854, [ITEM NO. 25.1269](#)]; J. H. Colton and Co. [1854, [ITEM NO. 25.1267](#); 1855, [ITEM NO. 25.646](#); 1855, [ITEM NO. 25.737](#)]; Anonymous [1855, [ITEM NO. 25.965](#)]; Bartholomew [1856, [ITEM NO. 25.1106](#)]; Desilver [1856, [ITEM NO. 25.1240](#)]; Mitchell [1856, [ITEM NO. 25.972](#)]; Colton [1857, [ITEM NO. 25.646](#)]; Rogers and Johnston [1857, [ITEM NO. 25.728](#)]; Mitchell [1860, [ITEM NO. 25.973](#)]; and Andriveau-Goujon [1862, [ITEM NO. 25.1005](#); 1867, [ITEM NO. 25.725](#)].

Figure I. Detail from “Map of the Territory of New Mexico compiled by Bvt. 2nd Lt. Jno. G. Parke, U.S.T.E. assisted by M^r. Richard H. Kern. by order of Bvt. Col. Jno. Munroe. U.S.A. comdg. 9th Mil. Dept, drawn by R. H. Kern. Santa Fé, N.M. 1851. Constructed under general orders from Col. J. J. Abert, Chief of Topog^l Eng^s.” [U.S. Army, Topographical Engineers], New York: J. and D. Major (1851). This seems to be the first appearance of the name “Sierra de la Lanterna”. (Spamer 25.160, Wheat III:730)

The parallel Green and Grand Rivers are delineated in a fashion that was frequently grossly misinterpreted on maps of this period. The geographic placement of the confluence is downstream from the confluence of the San Juan River (which is seen entering from the right of this view); the Little Colorado River (out of view to the south in this detail) flowed westwardly to a Colorado confluence that would be nearly in today’s southern Nevada. [For more on the variant delineations of the Colorado River, see Earle E. Spamer, *The Colorado River of the West: Cartographic Styles of the 15th to 19th Centuries* (Raven’s Perch Media, 2023, PDF 194 pp., 25 MB), <https://ravensperch.org/wp-content/uploads/2023/05/CRWest.pdf>.]

⁹ Baldwin, Thomas, and J. Thomas, *A new and complete gazetteer of the United States; giving a full and comprehensive review of the present condition, industry, and resources of the American confederacy: embracing, also, important topographical, statistical, and historical information, from recent and original sources; together with the results of the census of 1850, and population and statistics in many cases to 1853* (Philadelphia: Lippincott, Grambo and Co.), p. 262. (Note that this is the old New Mexico Territory, from which a part of it Arizona Territory was created.) A pronouncing gazetteer from 1859 picked up on this name, too (probably from Baldwin and Thomas), identifying it as “*m* New Mex.” (a mountain in New Mexico [Territory]), but without further pinpointing its location (Elias Longley, *Pronouncing vocabulary of geographical and personal names* [Longley Brothers, Publishers, Cincinnati, 1859], p. 105.) The name “Sierra de Lanterna” [*sic*] does appear once in the novel, *Overland*, by J. W. de Forest (Sheldon and Co., New York, 1871, p. 136), which was placed above the confluence of the Green and Grand Rivers (much like as displayed in Figure I). The same geographical placement is noticed as “Sierra Lanterna” [*sic*] on p. 177 in Virginia Sánchez, “Survival of Captivity: Hybrid identities, gender, and culture in territorial Colorado,” in *Nación Genízara: Ethnogenesis, place, and identity in New Mexico* (Moises Gonzalez and Enrique R. Lamadrid, eds.) (University of New Mexico Press, Albuquerque, 2019).

Cross-listings to Wheat. Throughout this Cartobibliography, informational cross-listings are made to the five-volume cartobibliographical compendium of Transmississippi West maps by Carl I. Wheat (1954–1963, and reprintings), a definitive study and checklist on the subject. Sometimes it may be awkward to use, given that Wheat’s sequential enumeration of maps in his cartobibliographies do not follow in order within his greatly informative narrative text, but the separate, chronologically ordered “Bibliocartography” (as he called it) in each volume is invaluable. Each volume also contains numerical indices. (For a combined index to all volumes, see Seavey, Charles A. *Mapping the Transmississippi West, 1540-1861: an index to the cartobibliography*. Winnetka, Illinois: Speculum Orbis Press, for Map and Geography Round Table, American Library Association, Map and Geography Round Table, Occasional Paper no. 3, 1992.)

For the most part, only those maps that were printed (that is, not manuscripts) are cross-listed to Wheat herein (though for the purposes of his magisterial work he includes a large number of manuscript maps). Necessarily, only the maps that clearly pertain at least in part to the region covered by this Cartobibliography, with informative labels or the delineation of rivers, are cross-listed to Wheat. Many of Wheat’s citations are extralimital to this Cartobibliography, and many more that could be listed here are omitted usually because they repeat numerous previous editions of a map. Note as well that some pertinent maps listed by Wheat are not included here because I have not seen them, in any form. Conversely, some maps, though Wheat mentions other editions of them, are listed herein from editions seen by me but not by Wheat, so of course they have no cross-listing to Wheat. Take note, too, as Wheat (1963, Volume V, p. xii) has informed, that “. . . our interest centered upon pioneering rather than commercial maps . . .”, thus another reason for maps cited here that may not have appeared in Wheat’s compendium. And further, Wheat rarely cites maps published in the texts of serial publications, but where he has, and the maps are pertinent to the present cartobibliography, his citations are cross-listed here. In any case, the most pertinent maps are cross-listed.

The Wheat cross-listings were added for the first time to this Cartobibliography; they were not present in the principal bibliography of [THE GRAND CANON](#). The format used herein lists items by volume number, then, following convention, the map number as listed in Wheat’s “Bibliocartography”. If a map is illustrated, a separate notation is appended to the cross-listing, which indicates its page placement in the volume. For example, [WHEAT I:70 \[with illustration facing p.48\]](#) would usually be cited as “Wheat 70”, but I add the volume number (“I” in this example) as a matter of convenience for users who may not be familiar with the cut-off points of enumeration through Wheat’s five volumes in six books, and the illustration, some pages away, is cited as a more complete bibliographical assist. Wheat’s numbers are consecutive, 1–1302, though with an omission or two and a few expansions by the use of suffixed letters.) The separate volumes and their cross-listing identifiers, are as follows:

Wheat, Carl Irving. 1954–1963. *Mapping the Transmississippi West, 1540–1861 . . .*. San Francisco: The Institute of Historical Cartography, 5 volumes in 6 (1957-1963). (Vol. 1 printed by the Grabhorn Press, Vols. 2-4 by Taylor and Taylor, and Vol. 5 by the James Printing Co.)

- WHEAT I:** ___ 1957. *Mapping the Transmississippi West, 1540-1861. Volume One. The Spanish entrada to the Louisiana Purchase, 1540-1804*. San Francisco: Institute of Historical Cartography, xiv, 264 pp.
- WHEAT II:** ___ 1958. *Mapping the Transmississippi West, 1540-1861. Volume Two. From Lewis and Clark to Fremont, 1804-1845*. San Francisco: Institute of Historical Cartography, xiii, 281 pp.
- WHEAT III:** ___ 1959. *Mapping the Transmississippi West, 1540-1861. Volume Three. From the Mexican War to the boundary surveys, 1846-1854*. San Francisco: Institute of Historical Cartography, xiii, 349 pp.
- WHEAT IV:** ___ 1960. *Mapping the Transmississippi West, 1540-1861. Volume Four. From the Pacific railroad surveys to the onset of the Civil War, 1855-1860*. San Francisco: Institute of Historical Cartography, xiii, 260 pp.
- WHEAT V:** ___ 1963. *Mapping the Transmississippi West, 1540-1861. Volume Five. From the Civil War to the Geological Survey. Part One [and] Part Two*. San Francisco: Institute of Historical Cartography, *Part One*, pp. i-xviii, 1-222; *Part Two*, pp. 223-487. [The “bibliocartography” for both parts appears in Part Two.] [“Although the limiting dates for the whole work are 1540-1861, as set forth on the title page, I have found it desirable . . . to consider a number of maps published after the stated dates. In fact, this volume contains a rather extended discussion of significant maps published all through the 1860’s, and a final chapter touches upon various notable maps of the 1870’s—and even a few of still later date, down to 1884—which one way or another round out the work.” (Volume V, Part One, p. xi)]

Given that Wheat’s volumes are relatively difficult to access outside of specialized libraries, and that they command steep prices in the bookseller’s market, they have also been reprinted in facsimile, in reduced size and without benefit of the few fold-out plates. (Incidentally, none of the fold-out plates are pertinent to the present Cartobibliography.) As a matter of convenience, I list these special and on-demand reprints here:

- NO DATE [1995?]. Storrs-Mansfield, Connecticut: Maurizio Martino, and Parsippany, New Jersey: About Books, 5 volumes in 6. [“This reprint is strictly limited to 350 copies” (title-page verso).]
2004. Mansfield Centre, Connecticut: Martino Publishing; two states: 6 volumes in 3, and 6 volumes in 2. [Omits fold-outs.]

When referring to the cross-listings to Wheat, bear in mind that he has arranged items chronologically according to the dates they were created, not necessarily the dates of publication (publication dates are usually referred to in the present cartobibliography). Sometimes, several (even many) years can separate the dates. Herein, a modified style of citation may record differently from Wheat, particularly in the attribution of creator. The differences are imposed by Wheat, who relied (as a cartobibliographer) on the aspects of origin and historical order rather than to the aspects of publication. Further, this cartobibliography cites information as it appears in the publication, whereas some cartobibliog-

raphers, like Wheat, may cite interpreted information. Often, particularly with early maps, information is ambiguous and a bibliographer must in the end defer to interpretation. (Recall, too, that Wheat includes manuscript materials in his cartobibliography. Only a few significant manuscripts are cited in the present cartobibliography; these are specially flagged in their appropriate places, by year of creation.)

Notes About the Earliest Works (mid-16th Century).¹⁰ The history of the American Southwest is rich, exhaustively studied, rife with political and economic contention and cultural ambivalence. That history necessarily embraces the publication records of European and, later, American institutions and writers. Native Americans had as well lived in and journeyed through the Southwest for uncounted centuries before the first European forays into this part of North America in the sixteenth century. But, it is the publishing tradition of Europe that begins documenting the corroborative, citable, and obtainable records of reportable activities and observations carried out in this region at specific times; and so this is our bibliographical starting point.

Thus far the earliest item cited in *THE GRAND CANON* is a cartographical product from *circa* 1535. Of course, this predates the earliest European records of contact with the region of interest here—1539 for the Colorado River, and 1540 for the Grand Canyon. My selection of two pre-dating items closest to 1539, from *circa* 1535 and from 1536, is purposeful; both are map products. Since maps (including gores for globes) were the first printed materials to convey information about the region, for comparison I have cited maps that were recently available at the close of the 1530s, in order to provide a graphic idea of the European understanding of this part of the world on the verge of the new geographical reports just noted. And it followed Hernán Cortés’s 1535 arrival at the tip of Baja California that serves as an ideological launch point for a conscious recognition of a gulf/strait off the west coast of New Spain, as opposed to open ocean to the Orient.¹¹

The set of gores for a lost globe, printed without attribution perhaps in Nuremberg *circa* 1535, imaginatively present the west coast of America running westward north of the equator, merging directly with “India” without an intervening ocean.¹² Similarly, gores by Caspar Vopell, printed in Cologne in 1536, depict the same arrangement, with “Hispania Nova” immediately south of and on the same land mass as “Asia Orientalis”.¹³ This gives

¹⁰ Repeated from the Introduction to *THE GRAND CANON* (Volume 1/Part A) so as to retain this information now within Volume 2 (the Cartobibliography). The majority of the “earliest works” cited in *THE GRAND CANON* are cartographical productions.

¹¹ See more fully the [Notes for Section 1](#) herein.

¹² Anonymous. [Set of printed gores for a lost globe.] Nuremberg[?] [ca. 1535], 12 gores. ([ITEM NO. 25.373](#)).

¹³ Caspar Vopell, *Nova & Integra Universi Orbis. Descriptio*. (Cologne, 1536). [Three sections only of gores for a globe.] ([ITEM NO. 25.374](#)).

some perspective of the knowledge of southwestern North America in the 1530s. To offer citations in this bibliography for printed maps earlier than those just mentioned would be superfluous.¹⁴

The first of the world maps by Sebastian Münster, “Typus Orbis Universalis” (Basle, 1540) portrays “Terra florida” at longitude 260° (contemporary Spanish reckoning) on the western edge of the map; on the eastern edge it continues as “Temistitan”, the west coast of which is simply crenulated north–south along the 250° meridian. Correctly it is ignorant of the explorations then underway in the regions of New Spain. At least the American and Asian continents are separated in the northern latitudes by “Oceanvs Orientalis”.¹⁵

The second edition (1542) of Sebastian Münster’s geographical work¹⁶, in which appears a map that depicts the western coast of North America, demonstrates the practical and intentional slowness of communication in that day. The map is still devoid of anything that we would recognize as having come from the Spanish expeditions. In 1542 there was perhaps time enough after the encounters with the Colorado River and Grand Canyon when something could have been published, even if only from leaked information or hearsay; but cartography in that day was embedded in and embodied the political secrecy of nations and not readily shared, and just as likely the goings-on at the far end of a remote arm of the sea may not have inspired inquiry. So there is nothing known today from that earliest part of the incursionary period.

¹⁴ As a matter of historical interest, the great map by Martin Waldseemüller, *Universalis Cosmographia Secundum Ptholomaei Traditionem et Americi Vespucii Aliorūque Lustrationes* (Strassburg, 1507) — on which “America” appears for the first time — presumptuously depicts a mountainous land beyond the eastern edge of North America, labeled, “Terra Vlteri⁹ Incognita” (A Further Unknown). On this map these imagined mountains line the entire west coast of North America. The portrayal is, in fact, more than which was usually shown by mapmakers of the day; the expanses beyond the eastern coast often were conveniently replaced by ornamentation or simply passed off the map sheet altogether. (I am tempted to include this 1507 work in this bibliography since it does figuratively, even if imaginatively, portray the region beyond its horizon that includes the area covered by this bibliography. However, I would also have to include regionally uninformative and superfluous publications between 1507 and 1535, which is not useful.) [See also the [Notes for Section 1](#) herein.] [Also take note that the Waldseemüller map was copied to create gores for a globe, by Johann Schöner (1517), which are illustrated online by the Library of Congress at <https://www.loc.gov/item/2016586441/>. Although these gores are fragments, America is distinctly shown among them, wherein the North American continent is like that of Waldseemüller’s portrayal, including the modified notation, “Vltorius incognita terra”, but which omits the mountainous ornamentation abutting Waldseemüller’s map edge and substitutes an actual, though imaginative, western coastline on the Pacific.]

¹⁵ Sebastian Münster, *Geographia universalis vetus et nova . . . Claudii Ptolemaei Alexandrini . . .* Basiliae: Apud Henricum Petrum (1540). (ITEM NO. 25.375.)

¹⁶ Münster, *Novae insvlae, XVII nova tabvla*. In: Münster, *Geographia universalis, vetus et nova complectens Claudii Ptolemaei Alexandrini enarrationis libros VIII*. Basileae: apud Henricum Petrum, [2nd ed.] (1542). (ITEM NO. 25.307.)

The “Ulpus Globe” [WHEAT I:4], made in 1542 by Euphrosynus Ulpus probably in Rome, is effectively a manuscript, being unique. The 15½-inch globe, mounted on a wooden stand, is fashioned in copper with mostly Latin inscriptions, including “REGIONES ORBIS TERRAR QVAE AVT AVETERIBTRADITAE, AVT NOSTRA PATPVQ MEMORIA COMPERTÆ SINT EVPHROSYNVS VLPIVS DESCRIBE BAT ANNO SALVTIS M.D. XLII” (Regions of the terrestrial globe handed down by ancients, or discovered in our memory or that of our fathers delineated by Euphrosynus Ulpus 1542), with the dedication, “MARCELLO CERVINO S.R.E. PRESBITERO CARDINALI D.D. ROME” (Marcello Cervino, Cardinal Presbyter, Sancta Romana Ecclesia, Doctor Divinitatis, Rome). It is most well known for its inclusion of the east American explorations that included what today is New York harbor, in 1524, by Giovanni de Verrazano, whose 1529 map was likely used for this globe. As for the southwestern portion of North America, it features today’s Mexico as “Nova Hispania” and “Nova Galetia”, with no figure of the Gulf of California. Northwest of that region there is undefined openness—plain copper—that likely represents the supposed great western sea, which on this globe is intimated to occupy virtually the whole of the center of North America; its northern boundary is lightly implied but there is no southern boundary. The region would have been effectively unknown to Verrazano, of course, but neither did Ulpus have the information that had recently been acquired by the more recent Spanish explorations.¹⁷

It was, then, Sebastian Cabot who is supposed to be the first to produce a map depicting something in the region around the head of the Gulf of California, in 1544. It included information gleaned from the expeditions of Ulloa in 1539 and Coronado in 1540–1542 and thus is the earliest published map known to portray any detail in the region of interest to this Cartobibliography.¹⁸ Following on this, in 1548 there are two publications that further acknowledge the Colorado River region based on the Spanish explorations; one is dated (yet another edition of Ptolemy’s *Geography*), the second is attributed to that year (a map also by Münster).¹⁹

First-person reports about the Colorado River and the Grand Canyon originate in events of 1539 and 1540, respectively. The seminal event was with Francisco de Ulloa (died 1540), the navigator who in 1539 with ships of the fleet of Hernán Cortés (1485–1547) reached the mouth of the Colorado River at the head of the Gulf of California. His report appeared publicly two decades later in Venice, in 1556, there translated into Italian in Volume 3 of Giavanni

¹⁷ The Ulpus Globe is today in the New-York Historical Society (<https://emuseum.nyhistory.org/objects/6206/>). See also <http://myoldmaps.com/renaissance-maps-1490-1800/367-the-ulpius-globe/367-ulpiusglobe.pdf> (URLs last accessed 9 December 2024).

Battista Ramusio's *Della Navigazioni et Viaggi*.²⁰ Its first English translation was published by Richard Hakluyt in 1600.²¹ There is, further, a subjective indication that news of the existence of the Colorado River may have been known as early as 1526, when Hernando Cortes wrote to Charles V that while exploring the western coast of California he dispatched a captain whose explorations “penetrat[ed] one hundred and thirty leagues inland”, who “described a very large river, which the natives told him was ten days’ march from its source, and about which, and the people inhabiting its banks, they told me many strange things.”²²

Europeans’ arrival at the Grand Canyon came a year after the Colorado River was encountered, but by land. During 1539–1542 an incursionary army led by Francisco Vázquez de Coronado (1510–1554) infiltrated the American Indian lands on the northern frontier of New Spain in what today is Arizona and New Mexico, venturing even onto the vast Great Plains farther east. As is well recorded historically, they had set out from today’s Mexico to rifle Cíbola of its riches, which as the Spanish learned soon enough was only the stuff of mis- and disinformation about the Indian pueblos.

In 1540, an expeditionary party under Pedro de Tovar traveled from the main army westward to the Hopi mesas in today’s Arizona. There they learned about a large river even farther to the west. This was of interest to them as a means to connect with the Gulf of California; the original plans of the expedition included resupply of the armed force by ship on the lower Colorado River, although that never happened. Tovar reported this news, and another party, about thirteen men under García López de Cárdenas, was dispatched to investigate. According to an account drawn up decades later, they journeyed twenty days,²³

For an earlier edited printing in Spanish see Enrique de Vedia, *Biblioteca de autores españoles [Volume 22]. Historiadores primitivos de Indias. Tomo primero*. M. Rivadeneyra (Madrid, 1858), p. 152 (ITEM NO. 2.6582): “. . . trajo me dió noticia de un muy gran rio, que los naturales le dijeron que habia diez jornadas de done él llegó, del cual y de los pobladores dél le dijeron muchas cosas extrañas.”

²³ Flint and Flint have suggested that 20 days was written in error for 20 leagues. (Richard Flint and Shirley Cushing Flint, eds., translators, annotators, *Documents of the Coronado expedition, 1539-1542 : “they were not familiar with His Majesty, nor did they wish to be his subjects”*. Southern Methodist University Press (Dallas, Texas, 2005, ITEM NO. 2.21426 in Volume 1/Part B of THE GRAND CANON).)

their Hopi guides leading them to the rim of the Grand Canyon at a point described cursorily as a place where the Colorado River was visible and where low pines grew. This area is believed by many historians to have been at the eastern end of the canyon at or near the area now called Desert View. Others consider it may have been farther west, given the reported length of the journey and other evidence. This would have been closer to where in the early 20th century William Wallace Bass conducted tourists into the canyon on his mining trails near the Grand Scenic Divide.²⁴ The Spanish party was likely led along Native Americans' long-established routes through this area; and apparently the guides purposely veered away from culturally significant areas such as the route that led to salt deposits near the confluence of the Little Colorado River. Grossly underestimating distances in the canyon, Capt. Pablo de Melgosa, Juan Galeros, and a third man whose name was not remembered by the chronicler, tried to descend to the river. They did not make it very far and swore that rock features down there were taller than the Tower of Seville, a landmark familiar to them back home that stood next to the city's cathedral.²⁵ Without further record of the canyon, at least so far that is known to us today, the party returned to the main force in today's New Mexico.

Not until the 1560s was an account written down about the events of 1539–1542. It appeared in the manuscript “Relación de la Jornada de Cíbola” by Pedro de Castañeda de Nagera, who drafted it while in Culiacán, New Spain. However, the original manuscript is missing; the manuscript that survives today is a copy of it, made in Seville in 1596.²⁶ In turn the *Relación* did not appear in print for nearly three centuries after the events it records,

²⁴ See items by Ray Kenny in Part 16 of [THE GRAND CANON](#) Volume 1. See also Earle Spamer, “‘...bigger than the great tower of Seville’: Sizing up the 1540 encounter in Grand Canyon”, *The Ol’ Pioneer* (Journal of the Grand Canyon Historical Society), Vol. 30, no. 3 (Summer 2019), pp. 11-12 ([ITEM NO. 2.28399](#) in Volume 1).

²⁵ The tower, *La Giralda*, still stands as part of the cathedral of Seville, Spain. Originally commissioned in 1184 as a mosque, it was completed in 1198. In Castañeda’s day the tower was some three and a half centuries old but still lacked the upper portion of the present structure. A modest belfry was installed after its original ornamental top was felled in an earthquake in 1356. The present belfry, as well as the upper tower and the statue, “Faith”, were emplaced in 1558, eighteen years after Coronado’s men attempted to reach the bottom of the Grand Canyon. In 1540 the tower was about 300 feet tall. [See also Earle Spamer, “‘. . . bigger than the great tower of Seville’: Sizing up the 1540 encounter in Grand Canyon”, *The Ol’ Pioneer* (Grand Canyon Historical Society), Vol. 30, no. 3 (Summer 2019), pp. 11-12 ([ITEM NO. 2.28399](#) in Volume 1/Part B of [THE GRAND CANON](#)).]

²⁶ Pedro de Castañeda, *Relación de la Jornada de Cíbola* (manuscript). This 1596 manuscript transcription of a lost original written in the 1560s is in the Obadiah Rich Collection of the New York Public Library. Sample pages of it have been published in facsimile during the 20th century. (See Castañeda, 1596, [ITEM NO. 2.1909](#) in Volume 1/Part B of [THE GRAND CANON](#).) There is also another, brief account referred to as the *Relación del Suceso*, from another person who had accompanied the Coronado *entrada* in 1540; it, too, is known only from a 16th century copy (see the transcription and translation in Flint and Flint [Anonymous, 2005, [ITEM NO. 2.21428](#) in Volume 1/Part B of [THE GRAND CANON](#)]).

when in 1838 Henri Ternaux-Compans published a translation in French.²⁷ An English translation did not appear until three and a half centuries after the events, when in 1896 George Parker Winship published the *Relación* for the first time in both Spanish and English, based of course on the 1596 copy.²⁸ As one might expect, memory, cultural conventions, translators' liberties, and modern re-readings produce somewhat different perspectives.

After the Cárdenas party left the Grand Canyon no European is known to have gone there for more than two centuries. In 1776 the Franciscan friar Francisco Tomás Garcés (1738-1781) journeyed from the lower Colorado River region to the lands of the Hualapai, Havasupai and Hopi people. He, fortunately for us, wrote his own record, though it, too, took a long time to see publication, in 1900.²⁹

After all this, there are no surviving maps, save one in manuscript, that document the first European forays into the lower Colorado River and Grand Canyon regions—and that map only figures the Gulf of California, hence also the mouth of the Colorado. Perhaps the first document relating to the region considered within the larger purview of [THE GRAND CANON](#) contains the instructions from Viceroy Antonio de Mendoza to Hernando Alarcón, regarding logistical support for Coronado's *entrada* into the northern reaches of New Spain. This document, dated May 31, 1541, was not, however, available in print for centuries, thus it cannot be scored as an early "publication". (A particularly reliable transcription and translation of these instructions was published by Richard and Shirley Cushing Flint in 2005.³⁰)

A map of the Gulf of California was drawn in 1541 by Domingo del Castillo, a pilot in the second expedition that sailed to the Colorado River delta, in 1540. It was found among papers of the descendants of Cortés. Copied and engraved in 1769, it was published in 1770

by Francisco Antonio Lorenzana in *Historia de Nueva-España*.³¹ Castillo's is the earliest authentic delineation of the Gulf of California and the delta region, even though it depicts what may be the Gila River as a remarkable extension of the sea that would wrap around the north of Mexico. There are earlier 16th-century maps of the Pacific coast of North America, of course, but none even fully resolve the gulf, let alone the delta.³²

The 16th-century dates noted herein are known with certainty; they establish the beginning of a published history, based on known documents, with which historians and aficionados of the Grand Canyon and the Colorado River are familiar. Might earlier published works yet be found, or more works from the 1540s at least? Perhaps; one may never know what may lay hidden or unrecognized even in the most well-known of collections, or in materials as yet unrecognized by historians and bibliographers.

³¹ Hernán Cortés and Francisco Antonio Lorenzana, *Historia de Nueva-España, escrita por su esclarecido conquistador Hernan Cortes, aumentada con otros documentos, y notas, por el ilustrissimo Señor Don Francisco Antonio Lorenzana, Arzobispo de Mexico*. Imprenta del Superior Gobierno, del Br. D. Joseph Antonio de Hogal (México, 1770) (ITEM NO. 2.14602 in Volume 1/Part B of THE GRAND CANON.) See also the Cortés–Lorenzana map reproduced in as [Figure 12](#) (INTRODUCTION p. 45) in the front matter herein; cited as ITEM NO. [25.505](#).

³² A richly illustrated historical discussion of early portrayals of the region of interest here is Dora Beale Polk's *The Island of California: A history of the myth*, University of Nebraska Press (Lincoln, 1991, ITEM NO. 2.5096), although the citations for the numerous manuscript and published maps are imperfect (they are not listed in Polk's bibliography nor identified in detail in the text). The early cartography of the west coast of North America is also very well reviewed and amply (though selectively) illustrated by Justin Winsor, "Discoveries on the Pacific coast of North America", in Justin Winsor (ed.), *Narrative and critical history of America. Volume II. Spanish explorations and settlements in America from the fifteenth to the seventeenth century*. Houghton, Mifflin and Co. (Boston, 1886 [ITEM NO. 2.6991 in Volume 1/Part B of THE GRAND CANON]). As Winsor astutely opined, such maps represent "shadowy and unstable surmise long continued" (p. 431).

FIGURES 8–10b

**EXAMPLES OF DISCORDANT GEOGRAPHIES ON
ATLAS MAPS PRINTED IN THE SAME PUBLICATION**

In atlases it is often customary to present maps that overlap geographically at different scales; for example, the world, North America, and the United States. In some early atlases particularly, it was usual to reuse or borrow plates that differed in how geographies were represented. This section offers a few illustrative examples, of which a more detailed study embracing numerous more examples would be informative. On each set of these illustrations take note how the course of the Colorado River and tributaries are variously delineated (or are absent).

Chorographical notes and full citations for the examples below can be located quickly in the chronological listing (Part 3) of this Cartobibliography.

Playfair (Principal) [Playfair, James]

1814 *A new general atlas, ancient and modern; accurately constructed, by Principal Playfair, St. Andrews, and elegantly engraved by the most eminent artists in London.* London: Printed for the author; and sold by T. Underwood, Fleet Street, London; and P. Hill, Edinburgh.

SEVERAL UNIQUE OR SCARCE MAPS OF EARLY HISTORICAL IMPORTANCE
TO THE COLORADO RIVER AND GRAND CANYON ARE REPRODUCED ON THE
FOLLOWING SETS OF FACING PAGES

DERROTTERO hecho por Antonio de Escalante. Kiamari: para mejor conocimiento de las Naciones, pueblos de Indios y Presidios que se hallan en el camino de Monserrey a Santa Fe de Nuevo Mexico. Luis de Anza Com. a 1777

Figure 11

Vélez y Escalante, 1777 (manuscript)

“Derrotero hecho por Antonio Veléz y Escalante, Misionero para mejor conocimiento de las Misiones, pueblos de Indios y Presidios que se hallan en el Camino de Mon-terrey a Santa Fé de Nuebo Mexico. Laus deo Anno Domini 1777.”

◀This manuscript map (likely the work of Bernardo de Miera y Pacheco) was produced following the Domínguez–Escalante expedition of 1776, which from Santa Fé circled the Colorado Plateau. It is the first map to include a name for what became known as the Grand Canyon, employing the honorific “Puerto de Bucareli” that was given by Padre Francisco Garcés after he visited the Havasupai in 1776 and who included a map in correspondence with others in Santa Fé and elsewhere. His information, as well as that gathered by Padre Pedro Font, was immediately included in this map of Indian tribes of part of the Southwest. This map was printed for the first time as a woodcut by Manuel Villavicencio (1781, [ITEM NO. 25.510](#)). The manuscript versions were redrawn by various people and also included in later publications, perhaps most notably that of Alexander von Humboldt, who copied this map while he was in Mexico during 1804, which in turn was copied and reproduced in print ([see farther below](#)). [See also information with the citation for Vélez y Escalante (1777, [ITEM NO. 25.602](#)). Refer also to the citations for the manuscript maps of Garcés (1777, [ITEM NO. 25.1045](#)), Font (1777, [ITEM NO. 25.1046](#); 1778, [ITEM NO. 25.1047](#)), and Miera y Pacheco (1777, [ITEM NO. 25.1115](#); 1778, [ITEM NO. 25.1048](#)).]

▼The name, “Puerto de Bucareli”, appears at the confluence of the Colorado and Little Colorado Rivers. The markings alongside the streams delineate canyons.

(American Philosophical Society)

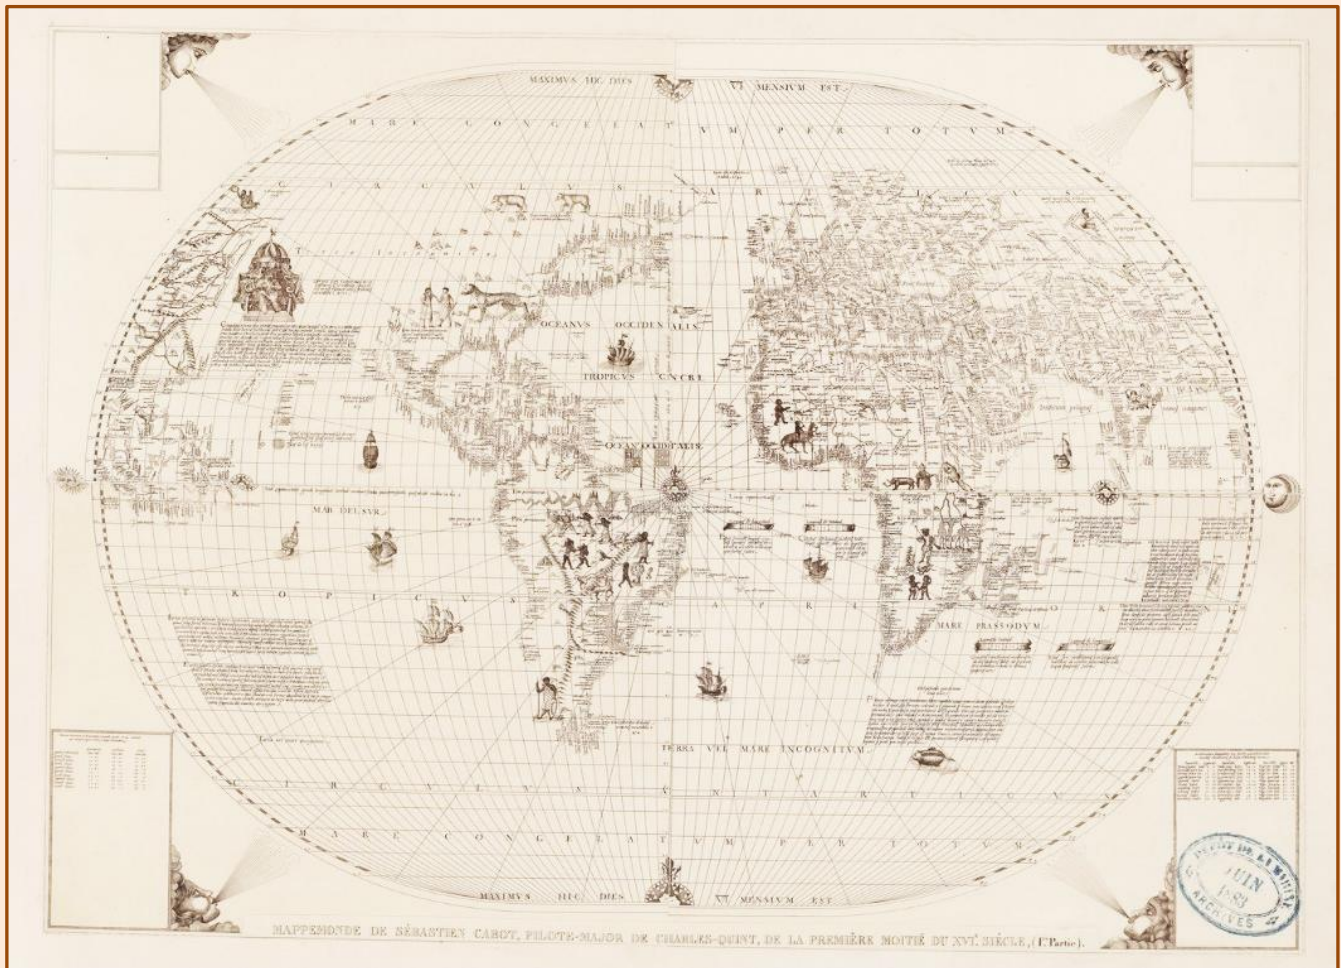

Figure 12

Cortés and Lorenzana, 1770 (after Castillo 1541 manuscript)

◀ The earliest known drawing of the Gulf of California to include the Colorado River delta region was made by Domingo del Castillo, the pilot of the expedition under Francisco de Ulloa that reached the upper gulf in 1539. The manuscript map was made in 1541, which was recovered two centuries later in the Hernán Cortés family papers, redrawn in 1769 and published in Cortés and Lorenzana (1770) (see full information with [ITEM NO. 25.2149](#)).

▼ Detail of the delta region, with the Colorado labeled as “Rio de buena Guia”, its earliest non-Indigenous name.

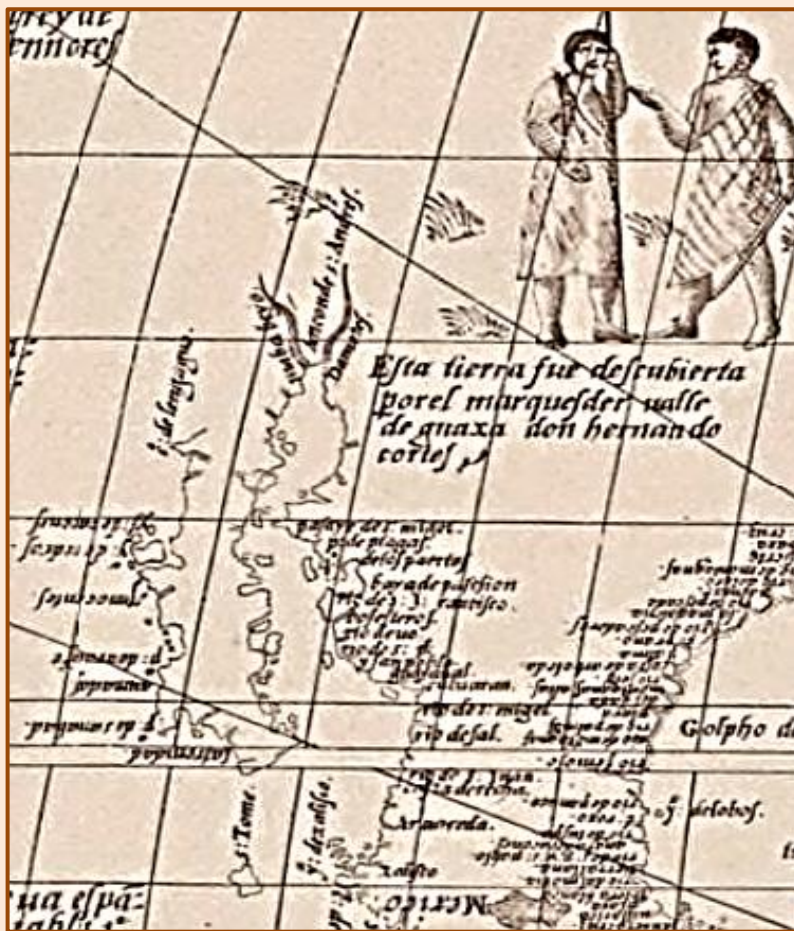

(Bibliothèque nacional de France, <https://gallica.bnf.fr/ark:/12148/btv1b53148963q/f1.item.r>, domaine public)

Figure 13

Cabot (1544)**“Mappemonde de Sébastien Cabot, pilot-major de Charles-Quint, de la première moitié de XVI^e siècle, (I^{re} partie)”**

◀ Sebastian Cabot’s map of 1544 was the earliest to definitively portray the region at the head of the Gulf of California, displaying the recent reports by Spanish explorers (see [ITEM NO. 25.377](#)). This illustration shows a contemporary reproduction with a title in French (as noted above) but incomplete text boxes.

▼ Southwestern North America, showing the Gulf of California with two tributaries at its head, labeled (in Spanish and likely confused), “mar ba beyo” [*mar bermejo?*] and “Damales” [*de males?*], with the land between labeled “Ancon de s:Andres” [*Ancón de San Andrés*]. Note also the adjacent legend (in Spanish) that indicates that this land had been discovered by Hernándo Cortés.

(c) Real Academia de la Historia

Figure 14

Manuscript copy by Juan Segura (after Humboldt manuscript, 1804)**[Carta geográfica general del reino de Nueva España]**

◀ When Alexander von Humboldt worked on his monumental map of New Spain while in Mexico, Juan Segura of Guanajuato made at least one copy of Humboldt's map. The map shown here is a copy, though one not signed, which is held in the Real Academia de la Historia, Madrid. Compare this map against the second-generation manuscript copy made in Washington, D.C., which appears on the following pages. Another copy, in the University of Texas at Arlington, is titled "Carta Geografica Gral del Reyno N.E. Sacada de la Orignal hecha en 1803 por el Sor. Baron de Humboldt. Y Dedicada al Sor. Conde de la Valenciana", which "is possibly the earliest surviving version of Alexander von Humboldt's personal manuscript map of New Spain".*

*Paula Rebert, "A Map Meeting at the University of Texas at Arlington, October 2008", *Investigaciones Geográficas* (Instituto de Geografía, México), no. 68 (2009), pp. 149-152.

▼ In addition to portraying much of the Colorado River basin, including the mouth of the river in the Gulf of California, Humboldt's map reproduced Francisco Garcés's 1776 name for the Grand Canyon, "Puerto de Bucareli", labeled at the confluence of unlabeled rivers, but obviously the Colorado and Little Colorado Rivers. (The Colorado is not labeled anywhere on the map; upstream from the *puerto* is the confluence of "Rio Saguananas" and "Rio de los Animas", as shown here.) Note as well that it prominently displays "R^o de las Piramides Sulfurcas", about which see herein the [note](#) (Cartobibliography p. 235) on the so-called "River of the Sulfurous Pyramids".

(Library of Congress)

Figure 15

**Manuscript copy (19th century)
(after Humboldt manuscript copy, 1804)**

**“General Chart of the Kingdom of New Spain Betⁿ parallels of 16 & 38° N.
From materials in Mexico at commencement of year 1804. by Humboldt [rubric]”**

[See also [endnote](#) for Figures 15–18]

◀ When Alexander von Humboldt visited the United States in 1804, during his return to Europe from Central America, he temporarily left maps and notes of his studies of New Spain with Secretary of the Treasury Albert Gallatin in Washington, D.C., who copied them (or had ordered copies of them be made). The copy in the Library of Congress (Geography and Map Division, call no. G4410 1804.H8), illustrated here, has also been indicated to be a later tracing of the copy. Humboldt first published his map in 1808, though more acclaimed in his 1811 publication; and two redrawn versions were published in 1810, one by a London publisher and the other in the U.S. by Zebulon Pike (*see on following pages*). Note that this is seemingly a rougher copy than that made by Segura in Mexico (*see above*).

▼ In addition to portraying much of the Colorado River basin, including the mouth of the river in the Gulf of California, Humboldt’s map reproduced Francisco Garcés’s 1776 name for the Grand Canyon, seen here as “Puerto de Bucarelli” (*sic*, Puerto de Bucareli), labeled at the confluence of the “Rio Colorado” and “R. Jaquesila” (*i.e.*, Little Colorado River).

(Library of Congress)

Figure 16

A Map of New Spain (London edition), 1810 (after Humboldt 1808)

[See also [endnote](#) for Figures 15–18]

◀ A Map of New Spain, from 16°. to 38°. North Latitude reduced from the Large Map drawn from astronomical observations at Mexico in the Year 1804, by Alexandre de Humboldt . . . (Longman, Hurst, Rees, Orme and Brown, London, 1810). This is a redrawing of Humboldt's 1808.

▼ Humboldt's labeling includes Francisco Garcés's Puerto de Bucareli (as "Puerto de Bucarelli") at the confluence of the Colorado and Little Colorado Rivers. The redrawn map of 1810 mislabels Humboldt's "R. Jaquesila" (i.e. Little Colorado River) as "R. Nabajoa", erroneously repeating "Rio Nabajoa" that labels the next river northward that is today's San Juan River.

(American Philosophical Society)

Figure 17

***A Map of the Internal Provinces of New Spain
(Pike, 1810, after copy of Humboldt manuscript, 1804)***

[See also [endnote](#) for Figures 15–18]

◀ Northwestern quadrant of Zebulon Pike’s map of New Spain. Part of the map was copied without credit from the American copy of Humboldt’s 1804 manuscript map, which had been made when Humboldt temporarily left his materials during his visit to President Thomas Jefferson in Washington, D.C. in June 1804. Secretary of the Treasury Albert Gallatin was entrusted by Humboldt to make the copies. [This view is also used on the cover of the present volume.]

▼ Humboldt’s labeling shows Francisco Garcés’s Puerto de Bucareli (as “Puerto del Bacorelli”) as the river reach approaching the “Rio Jasquevilla”. Pike’s redrawn map of 1810 mislabels Humboldt’s “R. Jaquesila” (Little Colorado River) as “Rio Jasquevilla” and (see *larger section at left*) fails to label the Rio Nabajoa (San Juan River). Further, Pike’s map mislabels Humboldt’s enigmatic “Rio de las Piramides sulfureas” as “Rio de los Panami des surfurcas”.

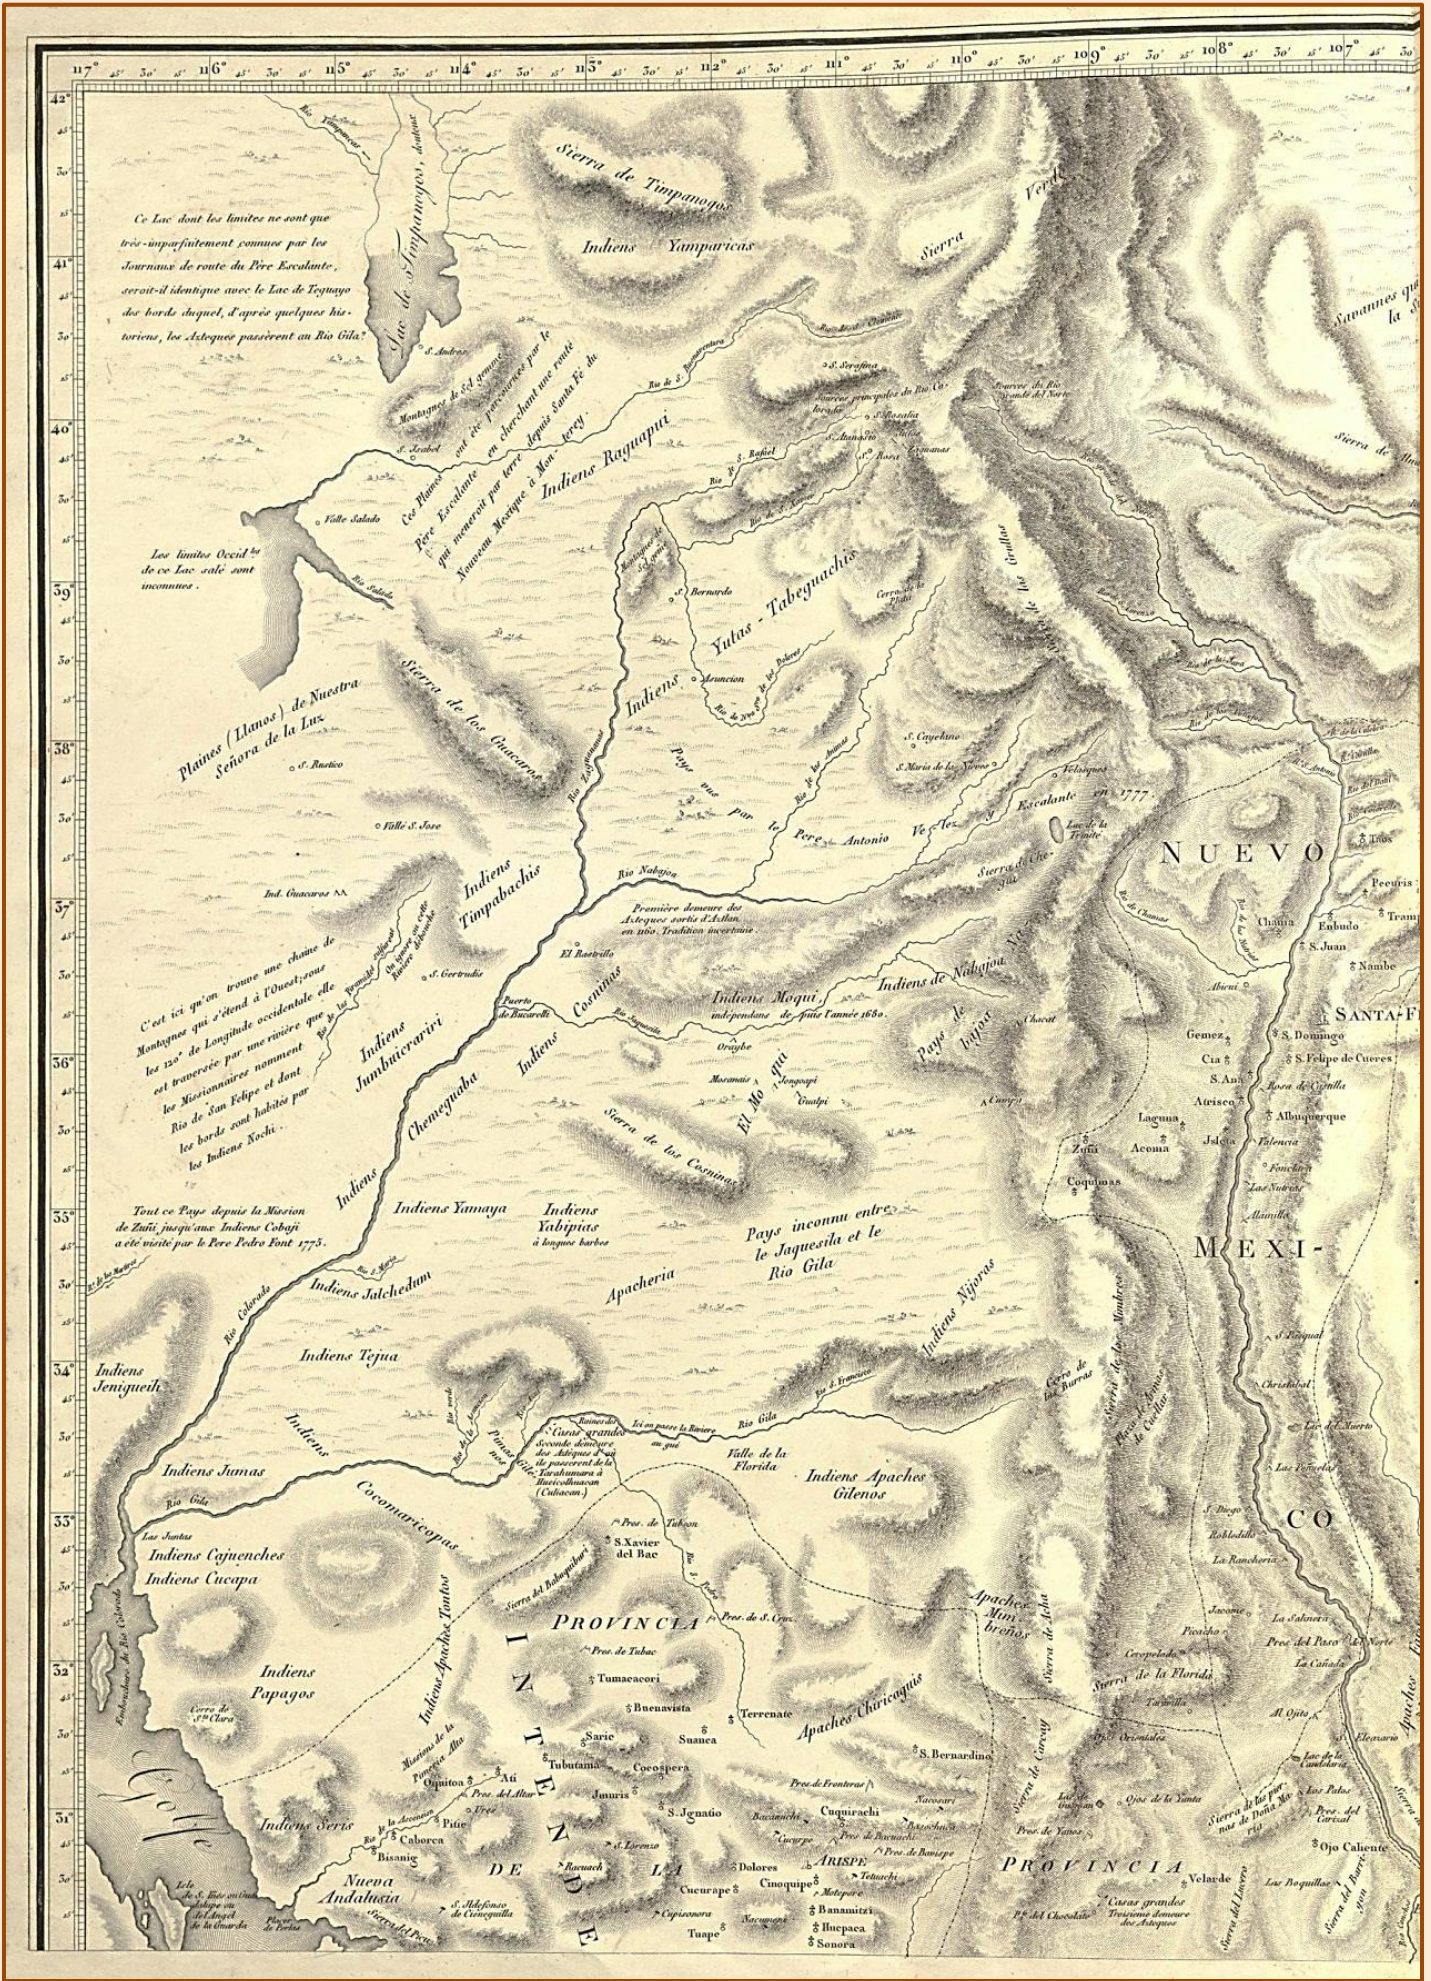

Figure 18

Carte Générale du Royaume de la Nouvelle Espagne (Humboldt, 1811)

◀ Alexander von Humboldt published what was for years the definitive atlas of New Spain (1808, 1811; [ITEM NOS. 25.2104](#), [25.547](#)) see remarks in [endnote](#) for Figures 15–18); the first editions are in French because he had settled in Paris upon returning from America. The map is based on a manuscript map he had prepared in 1804 (see farther above). The published map is on two double-folio sheets separating northern and southern halves of the region. The northwestern quadrant is reproduced here. The region shown is the present-day Four Corners region of Arizona, New Mexico, Colorado, and Utah, and the upper Gulf of California principally in Sonora. (The “Rio Colorado” is at left; the “Rio grande del Norte” at right is the Rio Grande.) This map is especially significant as including the Grand Canyon by name, although the canyon itself is not otherwise specially defined on the map. Humboldt mislabeled “Puerto de Bucarelli”, the name originally given by padre Francisco Garcés in 1776 as “Puerto de Bucareli” when he saw the Grand Canyon during his missionary visit to the Havasupai and Hopi people (see Garcés’s diary in Elliott Coues, *On the trail of a Spanish pioneer* [Francis P. Harper, New York, 1900]). With that name Garcés had honored his patron, Antonio María Bucareli y Ursúa, then the viceroy of New Spain.

▼ This portion of the northwestern quadrant clearly shows the label at the center, “Puerto de Bucarelli”, positioned at the confluence of the Rio Colorado (a name that appears farther to the south on the map; see the complete quarter at left) and Rio Jaquesila (which is the Little Colorado River). (“Rio Nabajoa” is the San Juan River. “Rio de las Piramides sulfureas” is the Virgin River, here shown of uncertain course.)

ENDNOTE FOR FIGURES 15–18

Regarding Humboldt’s “Carte Générale du Royaume de la Nouvelle Espagne,” Stony Brook University (State University of New York) Map Librarian (emeritus) David Y. Allen (2014, p. 78, *note* 1) ascertains that

“The earliest printed edition of this map appeared in 1808, and was published as two sheets of his *Atlas géographique et physique du royaume de la Nouvelle-Espagne, fondé sur des observations astronomiques, des mesures trigonométriques et des nivellemens barométriques* (Paris: F. Schoell and Tübingen: J.G. Cotta). The 1808 edition is available online from the University Complutense (Madrid) at http://dioscorides.ucm.es/proyecto_digitalizacion/index.php?doc=b23177585&y=2010&p=1. An 1811 printing of the atlas by Schoell, which is sometimes cited as the first edition of this work, is available in its entirety from the David Rumsey Collection.”

(The link there given is not valid; the volume has been relocated at <https://patrimoniodigital.ucm.es/s/patrimonio/item/83651>; accessed 19 March 2024, last accessed 24 December 2024.)³³

Regarding the 1804 manuscript map of Humboldt, copied in Washington, D.C., Hébert and Mullan (1999, no. 540) noted, “We believe that this map was traced in ca. 1846 by J. G. Bruff from an 1804 original by Alexander von Humboldt.” However, there is no further documentary remark and they do not comment on the disposition of the original copy. The Library of Congress’s catalog record for the map is not annotated to this effect. There also are no pertinent records in LOC online under Joseph Goldsborough Bruff. Allen (2014, p. 81, *note* 6), however, is more clear: “In 1804 Humboldt presented a copy of his map to Thomas Jefferson, but that manuscript appears to be lost. The Library of Congress has a copy of Humboldt’s map dated 1804 on its Web site . . . , but this appears to be a manuscript copy of the printed 1811 version of Humboldt’s map made during the Mexican-American war by American military cartographer Joseph Goldsborough Bruff.” Wheat (1959, Volume III, p. 97) notes that “maps Bruff drew languished unused in government archives” Bruff had gone West in 1849 to the gold fields, where he kept diaries and made maps, so his interest and involvement in this region is documented (see Wheat, pp. 97-102). Perhaps he also recopied the 1804 Washington, D.C., copy of Humboldt (a postulation *added here*; that is, if Hébert and Mullan’s supposition is correct). Harvey

³³ I referred to the 1811 edition in the American Philosophical Society, Philadelphia, where I was Reference Archivist. While after discovering the link in Allen’s paper was outdated, the 1808 digitized edition in Madrid was located again online early in 2024 at another link—one which in turn is also not now valid—but it was not in a resolution satisfactory for very detailed examinations. *The newest link to the 1808 edition provided in the text above does now provide higher-resolution for closer examination* (advance to image 8 [of 23]; loading is slow and very fine details remain blurred). (Allen also refers to the David Rumsey Map Collection, <https://www.davidrumsey.com>, which is in the Stanford University Library.)

(2020, pp. 69, 81 *note* 122) observes, “There appear to have been two copies of the map, one commissioned by [Albert] Gallatin from Mr. Kraft [*sic*, identified only as a Washington, D.C., cartographer; likely F. C. de Krafft of the District of Columbia Surveyor’s Office; this would be the 1804 copy of Humboldt’s original] the other made surreptitiously by General James Wilkinson for use by Zebulon Pike.”

Humboldt was aware of the unsanctioned 1810 copies of his “great map of New Spain” (Humboldt, 1808). He criticized Arrowsmith’s 1810 production (Humboldt, 1811, 1812; see also Allen, 2016, 2017), where he appended remarks on the Pike copy. In 1814, specifically noting his manuscript map, he commented on the pirated editions by Arrowsmith and Pike, wherein he specially noted Pike’s map, “Les cartes du Mexique qui se trouvent annexées à la relation de son voyage, sont des *réductions* de ma grande carte de la Nouvelle-Espagne, dont une copie étoit restée en 1804 à la Secrétairerie d’État de Washington.” The comment was also noted in English translation (1814, p. xxx [second series]; 1815, p. xxi *note*): “The maps of Mexico, which are annexed to the narrative of his journey, are reduced from my great map of new Spain, of which I left a copy, in 1804, at the secretary of state’s office at Washington.” Humboldt did not remark on the 1810 map produced by the London firm of Longman, Hurst, Rees, Oreme and Brown, which although it, too, includes errors, does credit Humboldt.

Figure 19. Edwin E. Howell's scarce, commercially produced geological relief map of the Grand Canyon region (no date, ITEM NO. 24.309; 1931, ITEM NO. 24.783) [no place]: U.S. Geological Survey, 3-dimensional map, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles (1:126,720). Originally produced in 1875, with different states at later dates. The two small insets at *lower right* depict in relief, to the same scale, "Yosemite Valley" (*left*) and "Niagara Falls and Cañon" (*right*) (see ◀ *preceding page* for detail view). The Library of Congress image is apparently a black-and-white photograph of the actual map, which measures 6 feet, 6 inches by 6 feet 7 inches.

This copy (as illustrated above) in the Library of Congress is shown online as a photograph with the notational date of January 22, 1916. (Geography and Map Division, call no. "G4332.G7 191-.G4 TIL".) Downloadable digital views accessible at <http://hdl.loc.gov/loc.gmd/g4332g.np000097> (last accessed January 13, 2022).

LIST OF CARTOBIBLIOGRAPHICAL WORKS
 SELECTED FROM PART 1 OF
 THE GRAND CANON VOLUME 1/PART B (BIBLIOGRAPHY)

This bibliographical section is prepared for this Cartobibliography. Citations have been selected from Part 1 of Volume 1/Part B of THE GRAND CANON (which is devoted to all bibliographies and comparable works that relate to the Grand Canyon and lower Colorado River regions). The list here specifically selects those works that are cartobibliographical in content. Only those works that were prepared wholly as guides to collections of maps and charts, or which contain significant portions devoted to them, are listed here. Each citation retains its ITEM NO. from Part 1.

1958 1.394 (COMPILER) *A list of geographical atlases in the Library of Congress. Volume 5. Titles 5235-7623. With bibliographical notes (a continuation of four volumes by Philip Lee Phillips)*. Washington, D.C.: U.S. Library of Congress, xlvii, 666 pp. [NOTE: Continues the series of Phillips (1909-1920).]

1963 1.395 (COMPILER) *A list of geographical atlases in the Library of Congress. Volume 6. Titles 7624-10254. With bibliographical notes (a continuation of four volumes by Philip Lee Phillips)*. Washington, D.C.: U.S. Library of Congress, lxxii, 681 pp.

1973 1.396 (COMPILER) *A list of geographical atlases in the Library of Congress. Volume 7. Titles 10255-18435. With bibliographical notes (a continuation of four volumes by Philip Lee Phillips)*. Washington, D.C.: U.S. Library of Congress, cxxx, 708 pp.

1974 1.397 (COMPILER) *A list of geographical atlases in the Library of Congress. Volume 8. Index to Volume 7 (titles 10255-18435)*. (A continuation of four volumes by Philip Lee Phillips). Washington, D.C.: U.S. Library of Congress, v, 190 pp.

1992 1.398 (COMPILER) *A list of geographical atlases in the Library of Congress. Volume 9. Comprehensive author list*. Washington, D.C.: U.S. Library of Congress, xvi, 290 pp.

Lowery, Woodbury

- 1912 1.375 *The Lowery Collection : a descriptive list of maps of the Spanish possessions within the present limits of the United States, 1502-1820.* (Ed., notes by Philip Lee Phillips.) Washington, D.C.: U.S. Government Printing Office, 567 pp. [Holdings of U.S. Library of Congress.]

McLaughlin, Glen

- 1995 1.425 (WITH Nancy H. Mayo) *The mapping of California as an island : an illustrated checklist.* *California Map Society, Occasional Paper 5*, 134 [143] pp.

Modelski, Andrew M.

- 1975 1.374 (COMPILER) *Railroad maps of the United States : a selective annotated bibliography of original 19th-century maps in the Geography and Map Division of the Library of Congress.* Washington, D.C.: Library of Congress, 112 pp.

North, Diane M. T.

- 1988 1.323 *The maps, plans and sketches of Herman Ehrenberg : a carto-bibliography.* *California Map Society, Occasional Paper 1*, 16 pp.

Orozco y Berra, Manuel

- 1871 1.406 *Materiales para una cartografía Mexicana, por el ingeniero. Edición de la Sociedad de Geografía y Estadística.* México: Imprenta del Gobierno, 337 [340] pp. [In Spanish.]

Phillips, Philip Lee

- 1901 1.376 *A list of maps of America in the Library of Congress : preceded by a list of works relating to cartography.* Washington, D.C.: U.S. Government Printing Office, 1137 pp. [Title-page caption: "Library of Congress Division of Maps and Cahrts".] ["A Bibliography of Cartography", pp. 5-90; "Maps of America in the Library of Congress", pp. 91-1137.]
- 1909 1.390 (COMPILED UNDER THE DIRECTION OF) *A list of geographical atlases in the Library of Congress with bibliographical notes. Volume I. Atlases.* Washington, D.C.: U.S. Government Printing Office, pp. i-xiii, 1-1208.
- 1909 1.391 (COMPILED UNDER THE DIRECTION OF) *A list of geographical atlases in the Library of Congress with bibliographical notes. Volume II. Author list, index.* Washington, D.C.: U.S. Government Printing Office, pp. 1209-1659.
- 1914 1.392 (COMPILED UNDER THE DIRECTION OF) *A list of geographical atlases in the Library of Congress with bibliographical notes. Volume III. Titles 3266-4087.* Washington, D.C.: U.S. Government Printing Office, cxxxvii, 1030 pp.
- 1920 1.393 (COMPILED UNDER THE DIRECTION OF) *A list of geographical atlases in the Library of Congress with bibliographical notes. Volume IV. Titles 4088-5234.* Washington, D.C.: U.S. Government Printing Office, clxiii, 639 pp. [NOTE: Series continues with LeGear (1958-1992).]

Rowell, J. C. [Rowell, Joseph Cummings]

- 1887 1.407 List of printed maps of California. (Supplement to the Report of the Secretary of the Board of Regents.) *University of California, Library Bulletin 9*, 33 pp.
- 1992 1.408 List of printed maps of California. (Supplement to the Report of the Secretary of the Board of Regents.) *In*: A facsimile reprint of the first cartobibliography of the printed maps of California, being: University of California Library Bulletin No. 9; List of Printed Maps of California; Berkeley, 1887; with an explanatory foreword by Alfred W. Newman. *California Map Society, Occasional Paper 3*, [2], 33 pp.

Spamer, Earle E.

- 2021 1.428 *Cartobibliography of the Grand Canyon and lower Colorado River regions in the United States and Mexico, 1535–2021 : an accompaniment to THE GRAND CANON, a worldwide bibliography of the Grand Canyon and lower Colorado River regions.* Philadelphia: Raven’s Perch Media, 1st ed. March 2021, lxxiii, 1098 pp., distributed digitally principally by online download; electronic resource PDF format accessible at <https://ravensperch.org>. [NOTE: The volume as sent to the U.S. Copyright Office on March 2, 2021, contained an erroneous credit for the cover illustration, indicating Humboldt (1811). Shortly later, a revised copy replaced it on the Raven’s Perch website and elsewhere, which may be identified by the correct legend, crediting Z. M. Pike (1810), and including at lower-right of inside front cover, adjacent to this credit, “Rev. 3/31”.]
- 2023 1.453 *The Colorado River of the West: Cartographic styles of the 16th to 19th centuries.* Philadelphia: Raven’s Perch Media, 194 pp. [PDF, <https://ravensperch.org>.] [Illustrated, cartobibliographical presentation.]

Stark, Peter L.

- 1989 1.149 A cartobibliography of separately published U.S. Geological Survey special maps and river surveys. *Western Association of Map Libraries, Occasional Paper 12*, 336 pp.
- 2020 1.420 *Names, boundaries, and maps: A resource for the historical geography of the National Forest System of the United States : the Southwestern Region (Region Three).* [No imprint], 272 pp. [U.S. Forest Service.]

Torres Lanzas, Pedro

- 1900 1.389 *Reclación descriptiva de los mapas, planos, & [sic] de México y flordas existentes en el Archivo General de Indias.* Sevilla: El Mercantil, 2 volumes, 223, 201 pp. [In Spanish.]

U.S. National Archives and Records Service

- 1952 1.253 *Geographical exploration and topographical mapping by the United States government, 1777-1952 : catalog.* Washington, D.C.: U.S. National Archives and Records Service, 52 pp.

Uricoechea, E. [Uricoechea, Ezequiel]

- 1860 1.364 *Mapoteca Colombiana. Coleccion de los títulos de todos los mapas, planos, vistas etc. relativos á la América Española, Brasil é islas adyacentes. Arreglada cronologicamente i precedida de una introduccion sobre la historia cartográfica de América.* Lóndres: Trübner y C^{ía}, 215 pp. [In Spanish.]
- 2002 1.365 *Mapoteca Colombiana. Coleccion de los títulos de todos los mapas, planos, vistas etc. relativos á la América Española, Brasil é islas adyacentes. Arreglada cronologicamente i precedida de una introduccion sobre la historia cartográfica de América.* Mansfield Centre, Connecticut: Martino Publishing, 215 pp. [Facsimile reprinting of Uricoechea (1860, ITEM NO. 1.364 in Volume 1/Part B of THE GRAND CANON).] [In Spanish.]

Wheat, Carl Irving³⁴

- 1957 1.377 *Mapping the Transmississippi West, 1540-1861. Volume One. The Spanish entrada to the Louisiana Purchase, 1540-1804.* San Francisco: Institute of Historical Cartography, xiv, 264 pp. (Printed by Grabhorn Press, San Francisco.) [Bibliocartography, pp. 187-254.]
- 1958 1.378 *Mapping the Transmississippi West, 1540-1861. Volume Two. From Lewis and Clark to Fremont, 1804-1845.* San Francisco: Institute of Historical Cartography, xiii, 281 pp. (Printed by Taylor and Taylor, San Francisco.) [Bibliocartography, pp. 203-271.]
- 1959 1.379 *Mapping the Transmississippi West, 1540-1861. Volume Three. From the Mexican War to the boundary surveys, 1846-1854.* San Francisco: Institute of Historical Cartography, xii, 349 pp. (Printed by Taylor and Taylor, San Francisco.) [Bibliocartography, pp. 249-338.]
- 1960 1.380 *Mapping the Transmississippi West, 1540-1861. Volume Four. From the Pacific railroad surveys to the onset of the Civil War, 1855-1860.* San Francisco: Institute of Historical Cartography, xiii, 260 pp. (Printed by Taylor and Taylor, San Francisco.) [Bibliocartography, pp. 197-251.]
- 1963 1.381 *Mapping the Transmississippi West, 1540-1861. Volume Five. From the Civil War to the Geological Survey. Part One.* San Francisco: Institute of Historical Cartography, pp. i-xviii, 1-222. (Printed by Taylor and Taylor, San Francisco.) ["Although the limiting dates for the whole work are 1540-1861, as set forth on the title page, I have found it desirable . . . to consider a number of maps published after the stated dates. In fact, this volume contains a rather extended discussion of significant maps published all through the 1860's, and a final chapter touches upon various notable maps of the 1870's—and even a few of still later date, down to 1884—which one way or another round out the work." (Part One, p. xi)] [Bibliocartography appears in Part Two.]
- 1963 1.382 *Mapping the Transmississippi West, 1540-1861. Volume Five. From the Civil War to the Geological Survey. Part Two.* San Francisco: Institute of Historical Cartography, pp. 223-487. [Bibliocartography, pp. 373-442.]
- NO DATE 1.383 *Mapping the Transmississippi West, 1540-1861.* Storrs-Mansfield, Connecticut: Maurizio Martino, and Parsippany, New Jersey: About Books, 5 volumes in 6. [1995?]

³⁴ For an index to all Wheat volumes, see Seavey, Charles A., *Mapping the Transmississippi West, 1540-1861 : an index to the cartobibliography* (Speculum Orbis Press, Winnetka, Illinois, for Map and Geography Round Table, American Library Association), 210 pp. (Map and Geography Round Table, Occasional Paper no. 3.) [Note that Wheat called each of his compilations a "bibliocartography".]

- [Reprint of the volumes originally published 1957-1963 by Institute of Historical Cartography. "This reprint is strictly limited to 350 copies" (title-page verso).]
- 2004 1.384 *Mapping the Transmississippi West, 1540-1861. Volume One, 1540-1804, and Volume Two, 1805-1845.* Mansfield Centre, Connecticut: Martino Publishing. [Spine title.] [State 1: 2 volumes in 1.] [Facsimile reproduction of Wheat (1957, 1958) reduced to quarto. Includes title-page for Martino followed by original title-page for Institute of Historical Cartography.]
- 2004 1.385 *Mapping the Transmississippi West, 1540-1861. Volume Three, 1846-1854, and Volume Four, 1855-1860.* Mansfield Centre, Connecticut: Martino Publishing. [Spine title.] [State 1: 2 volumes in 1.] [Facsimile reproduction of Wheat (1959, 1960) reduced to quarto. Includes title-page for Martino followed by original title-page for Institute of Historical Cartography.]
- 2004 1.386 *Mapping the Transmississippi West, 1540-1861. Volume Five, Civil War to the Geological Survey.* Mansfield Centre, Connecticut: Martino Publishing. [Spine title.] [State 1: 2 volumes in 1.] [Facsimile reproduction of Wheat (1963) reduced to quarto. Includes title-page for Martino followed by original title-page for Institute of Historical Cartography.]
- NO DATE 1.387 *Mapping the Transmississippi West, 1540-1861. Volume I (1540-1804), Volume II (1804-1845), Volume III (1846-1854).* Mansfield Centre, Connecticut: Martino Publishing. [Cover title. There is no separate title-page for the bound set.] [State 2 of 2004 ed., "Copyright 2004", "Two-Volume Reprint Edition" (Martino title-page verso): 3 volumes in 1.] [After 2004.] [Facsimile reproduction of Wheat (1957, 1958, 1959) reduced to quarto, but omits the folding plates, which are in Volume I between pp. 188/189 (WHEAT 157), in Volume II between pp. 56/57 (WHEAT 316) and 128/129 (WHEAT 398), and in Volume III between pp. 118/119 (WHEAT 764). Includes title-page for Martino followed by original title-page for Institute of Historical Cartography.] [An on-demand publication.]
- NO DATE 1.388 *Mapping the Transmississippi West, 1540-1861. Volume IV (1855-1860), Volume V: Part One (The Civil War to the Geological Survey), Volume V: Part Two (The Civil War to the Geological Survey).* Mansfield Centre, Connecticut: Martino Publishing. [Cover title. There is no separate title-page for the bound set.] [State 2 of 2004 ed., "Copyright 2004", "Two-Volume Reprint Edition" (Martino title-page verso): 3 volumes in 1.] [After 2004.] [Facsimile reproduction of Wheat (1960, 1963) reduced to quarto. Includes title-page for Martino followed by original title-page for Institute of Historical Cartography.] [There are no folding plates in the original Volumes IV, V.] [An on-demand publication.]

CROSS-LISTINGS TO STANDARD REFERENCE LISTS

In the field of bibliography there are many reference lists to which scholars and booksellers, as well as bibliographers, refer. The most common of these relate to the bibliography of American history, or some part of it; others are more specific to a geographical region. These standard reference lists usually have the advantage of uniquely enumerating each of the citations, and it is by these numbers that the titles are referred to in publications and correspondence. Some volumes cited in Volume 1 were brought forward into Volume 2 (this *Cartobibliography*) in order to cite important maps contained in them. The volumes that contain these maps are cited in Volume 1 in conventional bibliographical form, by author; and there they may have many more pertinent bibliographical cross-listings that pertain to the publication rather than any map products within it. See the Introduction to Volume 1 for extensive additional information.

The reference lists that are cross-listed in this *Cartobibliography* are listed here.

MCLAUGHLIN

McLaughlin, Glen (*with* Nancy H. Mayo). 1995. The mapping of California as an island : an illustrated checklist. *California Map Society, Occasional Paper 5*, 134 [143] pp.

Limited to maps that depict California as an island, this checklist is further useful to the present cartobibliography for these maps' accommodation of the Colorado River and others. Only those maps that have been examined for this Cartobibliography, and which depict rivers contributing to the strait, are cross-listed herein. Although selected maps are illustrated in McLaughlin's checklist, they generally are not useful for examination of the region of interest here. These maps have been examined for this Cartobibliography mostly on high-density digitized copies. The author remarks (p. x), "This is a work in progress. It will likely never be complete, as the quantity of material to be search is so vast, varied, and dispersed that unrecorded maps will continue to turn up." (The admission applies equally to the present cartobibliography.)

SHIRLEY

Shirley, Rodney W. 1993. *The mapping of the world : early printed world maps, 1472-1700*. London: New Holland (Publishers) Ltd. [3rd, revised ed.], [i-xxiv], IX-XLVI [XLVII], 1-669 pp.

The prolific accounting of early printed maps assembled by Shirley, each enumerated by number, allows for convenient reference to hundreds of maps that otherwise would be inaccessible to most researchers. The accounting also includes the provenance of examined and additional copies for many of the maps. The resolution of the reduced-

scale images (as compared to the originals) may not be entirely satisfactory for some purposes, but for general examination of geographical details they will suffice.³⁵

WHEAT

Wheat, Carl Irving. 1954–1963. *Mapping the Transmississippi West, 1540–1861* San Francisco: The Institute of Historical Cartography, 5 volumes in 6.

This title has long been a definitive check source on the subject. Sometimes it may be awkward to use, given that map numbers do not follow in order within the text (but are ordered in the separate bibliocartography in each volume). For a combined index, see Seavey, Charles A. 1992. *Mapping the Transmississippi West, 1540-1861 : an index to the cartobibliography*. Winnetka, Illinois: Speculum Orbis Press, for Map and Geography Round Table, American Library Association, 210 pp. (Map and Geography Round Table, Occasional Paper no. 3.).

The Wheat cross-listings do not appear in earlier editions of THE GRAND CANON. The format used herein lists items by volume/part number, followed by the *map number* listed in Wheat's cartobibliography. Most libraries and map sellers refer only to the map number, but I have included the volume number to assist users who may not be familiar with the cut-off points of Wheat's largely sequential order. If a map is illustrated, a separate notation is appended to the cross-listing, which indicates its page placement in Wheat's volume. The separate volumes and their cross-listing headers, are as follows:

WHEAT I:__ 1957. *Mapping the Transmississippi West, 1540-1861. Volume One. The Spanish entrada to the Louisiana Purchase, 1540-1804*. San Francisco: Institute of Historical Cartography, xiv, 264 pp.

WHEAT II:__ 1958. *Mapping the Transmississippi West, 1540-1861. Volume Two. From Lewis and Clark to Fremont, 1804-1845*. San Francisco: Institute of Historical Cartography, xiii, 281 pp.

WHEAT III:__ 1959. *Mapping the Transmississippi West, 1540-1861. Volume Three. From the Mexican War to the boundary surveys, 1846-1854*. San Francisco: Institute of Historical Cartography, xiii, 349 pp.

WHEAT IV:__ 1960. *Mapping the Transmississippi West, 1540-1861. Volume Four. From the Pacific railroad surveys to the onset of the Civil War, 1855-1860*. San Francisco: Institute of Historical Cartography, xiii, 260 pp.

WHEAT V:__ 1963. *Mapping the Transmississippi West, 1540-1861. Volume Five. From the Civil War to the Geological Survey. Part One [and] Part Two*. San Francisco: Institute of Historical Cartography, two volumes, *Part One*, pp. i-xviii, 1-222; *Part Two*, pp. 223-487. [The Bibliocartography for both parts appears in Part Two.] ["Although the limiting dates for the whole work are 1540-1861, as set forth on the title page, I have found it desirable . . . to consider a

³⁵ See also the [Introductory Notes for Section 1](#) for more information relating to the citation of early maps in this cartobibliography.

number of maps published after the stated dates. In fact, this volume contains a rather extended discussion of significant maps published all through the 1860's, and a final chapter touches upon various notable maps of the 1870's—and even a few of still later date, down to 1884—which one way or another round out the work." (Part One, p. xi)]

Given that these volumes are relatively difficult to access outside of specialized libraries, and that they command steep prices in the booksellers' market, they have also been reprinted in facsimile, in reduced size and without benefit of the fold-out plates. As a matter of convenience, these special and on-demand reprints are listed here:

NO DATE [1995?]. Storrs-Mansfield, Connecticut: Maurizio Martino, and Parsippany, New Jersey: About Books, 5 volumes in 6. ["This reprint is strictly limited to 350 copies" (title-page verso).]

2004. Mansfield Centre, Connecticut: Martino Publishing. [Two states: 6 volumes in 3, 6 volumes in 2.]

ONLINE MAP RESOURCES

A significant number of maps can be found as digitized resources on institutional, organizational, agential, and commercial websites around the world. Bearing in mind that the content and accessibility of these web-based resources may continually change (or even disappear) it is a very worthwhile effort to spend some time (a lot of time, preferably) perusing these digitized offerings.

A substantial number of the maps cited herein were located and examined virtually. At no time was this more appreciated than during the COVID-19 pandemic, when many of these resources were key to this ongoing project, viewed comfortably from home. A surprising number of them were in resolutions sufficient for very close examination. Special acknowledgment and thanks must be extended to the institutions and agencies who had their websites up and running during that worrisome time; and more generally, to all of the repositories and online sources that over the past couple of decades have made their cartographical products and rare books accessible to remote users. All of it has been astonishingly helpful; a prospect that to me—now a digitally confident collections-based researcher, librarian, and archivist—was unimagined at the start of my career a half century ago when almost everything was examined in person or with less agreeable photographic reproductions.

Some important sources of digitally accessible maps are listed below—it is not implied to be a complete list, as online searches for specific maps will reveal numerous other sources. The major libraries offer digital access to printed and manuscript maps from past centuries as well as more contemporary productions. Agencial sources can provide maps that are pertinent during the range of the agencies' existence; they may display current maps as well as historical out-of-print and superseded maps, as is most dramatically shown in the U.S. Geological Survey sites online.

The websites listed here have been especially useful to my own research into maps of the American Southwest.

COMMERCIAL WEBSITES OF ANTIQUARIAN MAP DEALERS

Some firms retain digital presentations of their past sales in addition to current offerings, although the illustrations of their stock are both opportunistic and perhaps short-lived. While a number of these websites host images at sufficient resolution for close examination, other websites do not. As a whole, while these businesses are not “collection-based” like those of academic institutions, such sites are worthwhile sources for the inspection of particular maps when they show up in the market. Established firms also may have well-researched information about the historical significance of a map with notes on cartographers and ateliers.

NOTE REGARDING THE TYPOGRAPHY OF AUTHOR NAMES AND MAP TITLES

Among the maps of the 16th, 17th, and 18th centuries, many author attributions and map titles appear with unusual spellings and typographical presentations. Wherever possible, the original typography of a map's author (or acknowledged creative source) and title have been reproduced precisely as printed. Some author names (as printed) vary from formulaically standardized names (see [examples](#) on INTRODUCTION p. 3). Typographical conventions like the interchanging of certain characters (such as “u” and “v”, “I” and “J”, and “w” and “vv”^{*}) are followed precisely; similarly reproduced here are special characters, unconventional ligatures, and super- and subscripts, some with basal dots. However, titles in all-capital letters are not usually reproduced because reading long runs of words printed in that fashion is difficult and with many instances on a page is distracting; instead, initial capitals are employed.

The original context of names and titles thus displayed is historically and cartobibliographically precise. In this specialized publication it is not the intention to employ a standardized authority list nor to follow a formulaic homogeneity of names and titles. The purpose of this is to allow readers who do not have any access to the originals, or to a satisfactory illustration, to discern the exact display of names, words and phrases as put to paper.

This device of course defeats the ability to search the digital PDF for some phrases using the basic keystrokes of the keyboard, but I have thought it important to convey information directly from the map, which is further helpful if this Cartobibliography is presented in a non-digital medium. This format also unleashes the typographical practices used by cartographers and those who lettered maps over the centuries, customs that might be unknown (and thus novel) to some users. This may also rivet the interest of some readers who might become all the more fascinated by the comportment of old maps, to encourage them to delve more deeply into the rich histories of cartography, the cartographers, and the ateliers who turned out these products.

* For example, the title of a map by “Iean Boisseav” [Jean Boisseau] (no date [1640?], [ITEM NO. 25.490](#))

Novvelle Description de toute la terre vniuerselle
might be modernized by some authors and catalogers to read

| SECTION 4 — GUIDE TO TOPOGRAPHIC QUADRANGLES IN THE U.S. AND MEXICO | 1565 |

ABSTRACT

THE CARTOBIBLIOGRAPHY is Volume 2 of *THE GRAND CANON : A Worldwide Bibliography of the Grand Canyon and Lower Colorado River Regions in the United States and Mexico*. It itemizes and often describes details on maps produced worldwide from the 16th to 21st centuries. Many citations for historical maps before the 20th century are chorographical; attention is on part of the map rather than the whole, in order to describe how the Grand Canyon and lower Colorado River regions are portrayed. Thus the principal purpose of the map may not be mentioned, such as when a map is of wider interest to cartographic historians for content that is unrelated to the physical geography of the Southwest. In some instances, remarks correct or amplify the work of earlier bibliographers. All forms of maps are listed: general, geologic and physiographic, and certain specialized maps; to which is added a complete guide to all scales of topographic map quadrangles in the greater Grand Canyon-lower Colorado River regions in the U.S. and Mexico, produced by the U.S. Geological Survey and Mexico's Instituto Nacional de Estadística y Geografía (as also used by the Servicio Geológico Mexicano). The kinds of maps cited here vary. Many are stand-alone productions, while others are included in atlases or accompany reports of explorations, some of them as large fold-outs, others as maps loosely laid in or even grouped in separate covers. Maps that appear as illustrations within books and periodicals are not generally considered. Neither are manuscript maps considered, although a few significant ones are cited; those that are of primary importance in the history of the Grand Canyon and the Southwest. Notes added to these citations provide more detailed information that describe relationships between features of physical geography, for the benefit of users who may thus determine that a map should be more closely examined, or it may suggest to them that a map is not of interest to work at hand. The Cartobibliography divides maps into two major groups (arranged alphabetically by cartographer or creator): 16th–18th centuries, and 19th–21st centuries; and there is a separate, consolidated chronological list of these maps. The 16th to 18th centuries in this region recorded human interactions that focused on the lower Colorado River, by international parties with interests in the region. Only manuscript maps ventured to embrace the area that now is known to be the Grand Canyon. The 19th century saw the first sponsored explorers in three centuries spanning the region, eventually delineating the Colorado River and its tributaries correctly, again reporting the Grand Canyon. And the 20th century witnessed an explosion of general and scientific maps of the region, including topographic mapping at large scales. More specifically detailed bibliographical products and statistical surveys can be derived from this Cartobibliography.

STATISTICAL SUMMARY

The Cartobibliography maintains the same format as that followed throughout [THE GRAND CANON](#). It also keeps in place each citation’s unique Item Number (a registration number only). Accordingly, the Item Numbers displayed in the Cartobibliography also divulge their original topical placements in [THE GRAND CANON](#) Volume 1. [See additional [notes](#) on p. xxiii herein.]

Citations of “general maps” that were *transferred outright* from the original Part 25 of Volume 1, or which have been more recently added as new to this Cartobibliography, can be identified by the Item Number prefix “**25.**”

Other prefixes from Volume 1 are:

9. *copied* from Part 9 (travel and trail guides)
10. *copied* from Part 10 (Colorado River guides)
11. *copied* from Part 11, Section 2A (separately published geologic maps in the Lower Colorado River region, which complement the geology citations pertaining to the Lower Colorado River region separate-coverage group of the bibliography), with a guide to topographic map quadrangles *transferred* from the “Appendix to Part 11”
18. *copied* from Part 18 (physical environment of the Grand Canyon region)
19. *copied* from Part 19 (biology and ecology of the Grand Canyon region)
24. *copied* from Part 24 (separately published geologic maps and special topographic maps in the Grand Canyon region, which complement the geology citations for the Grand Canyon region), with a guide to topographic map quadrangles *transferred* from the “Appendix to Part 24”

| CARTOBIBLIOGRAPHY CITATION COUNTS | | | | |
|-----------------------------------|------------|--------------|--------------|--------------|
| FROM TGC VOL. 1 | Section 1 | Section 2 | Section 4 | TOTAL |
| Part 9 | | 246 | | 246 |
| Part 10 | | 106 | | 106 |
| Part 11 | | 343 | 694 | 1,037 |
| Part 18 | | 2 | | 2 |
| Part 19 | | 2 | | 2 |
| Part 24 | | 454 | 391 | 845 |
| Part 25 | 714 | 1,723 | | 2,437 |
| TOTAL | 714 | 2,876 | 1,085 | 4,675 |

Section 3 is omitted from this table because it replicates, in chronological order, the contents of Sections 1 and 2. Additions that will appear in future editions of the Cartobibliography will employ the same system of Item Number enumeration: “General” maps will continue to use the **25.** prefix as derived from the topical arrangement of [THE GRAND CANON](#) and will appear only in this Cartobibliography; newly cited specialized maps will be assigned their respective prefixes as outlined above *and* will appear in both this Cartobibliography and the respective thematic parts of Volume 1/Part B of [THE GRAND CANON](#).

SECTION 1

MAPS OF THE 16TH–18TH CENTURIES

(1535–1800)

NOTES FOR SECTION 1

THE EARLIEST item cited in THE GRAND CANON is a set of printed gores for a globe, from *circa* 1535. Of course, this predates the earliest European record of contact with the region of interest to this Cartobibliography—1539 for the Colorado River, and 1540 for the Grand Canyon. My selection of two antedating items closest to 1539, from about 1535 and 1536, is purposeful. Since maps (including gores for globes) were the first printed materials to convey information about the region, for comparison I have cited these contemporary maps that were *recently available* at the close of the 1530s, so as to provide a graphic idea of the European understanding of this part of the world on the verge of the new geographical reports just noted. The set of gores for a lost globe, printed without attribution in Nuremberg(?) *ca.* 1535, imaginatively presents the west coast of America running westward north of the equator, merging promptly with “India” without the intervening ocean [Anonymous (no date, ITEM NO. 25.373)]. Similarly, gores by Caspar Vopell, “Nova & Integra Universi Orbis”, printed in Cologne in 1536 (ITEM NO. 25.374), depict the same arrangement, with “Hispania Nova” immediately south of and on the same land mass as “Asia Orientalis”.

As a matter of historical interest, the great map by Martin Waldseemüller, *Universalis cosmographia secundum Ptholomaei traditionem et Americi Vespucii aliorū[m]que lustrationes* (Strassburg?, 1507)—on which “America” appears for the first time—presumptuously depicts a mountainous land beyond the eastern edge of North America, labeled, “TERRA VLTERI⁹ INCOGNITA” (A Further Unknown) [see detail illustration on next page]. On this map these imagined mountains line the entire west coast of North America. The portrayal is, in fact, more than which was usually shown by mapmakers of the day; the expanses beyond the eastern coast often were conveniently replaced by conventional ornamentations or simply passed off the map sheet altogether. I am tempted to include this 1507 work in this Cartobibliography since it does figuratively, even if imaginatively, portray the region beyond its horizon that by the depiction of the mountainous area embraces the region covered by this Cartobibliography. However, I would also have to include regionally uninformative and superfluous publications between 1507 and 1535, which is not useful for the purposes of this Cartobibliography. (Also take note that the Waldseemüller map was copied to create gores for a globe, by Johann Schöner, 1517, which are illustrated online by the Library of Congress at <https://www.loc.gov/item/2016586441/>. Although those gores are fragments, America is distinctly shown among them, whereon the North American continent is like that of Waldseemüller’s, including the modified notation, “Vlterius incognita terra”; but it omits the montane ornamentation that abuts Waldseemüller’s map edge and substitutes a definite, though imaginative, western coastline on the Pacific.)

(Library of Congress)

Figure 20. Detail showing North America to Mexico and the Caribbean, from *Universalis cosmographia secundum Ptholomaei traditionem et Americi Vespucii alioru[m]que lustrationes*, by Martin Waldseemüller (no imprint [Strasbourg, France?], 1507), an immense map printed on 12 sheets [SHIRLEY 26] (SEE REMARKS ON PREVIOUS PAGE). This detail, here rotated 90° counterclockwise, illustrates a (then hypothetical) mountainous region on the western side of North America, labeled “Terra Ulteri⁹ Incognita.”) The name “America”—its first usage, honoring Amerigo Vespucci—appeared as Waldseemüller’s label on what we now call South America (see inset at right). The label “Parias” is on the area of what is now called Mexico. (The Library of Congress now holds this unique map, which is accessible online at

<https://www.loc.gov/resource/g3200.ct000725.>)

To offer citations in this bibliography for printed maps earlier than the 1535–1539 items mentioned above is superfluous. For example, the Ptolemaic representation, refigured with new perspectives, by Johannes Ruysch in his 1508 *Vniversatior Cogniti Orbis Tabvla ex Recentibvs Confect Observationibvs* depicts the western coasts of the Americas enveloped by scrollwork containing historical notes. North America itself is merely a few (Caribbean) islands and a miniature continental mass; its scrollwork reads “Hvc vsq naves Ferdinãdi Regis Hispanie p̄venerūt”. In 1512 Joannes de Stobnicza produced an untitled map of the world for *Introductio in Ptholomei Cosmographia cu longitudinibus et latitudinibus regionum et ciuitatum celebriorum ...* (Cracouie, 1512) on which the western seaboard of North America is planed off cleanly along a single line of longitude, with open ocean to the west. (Nordenskiöld, 1889, English ed., p. 68, commented on this map, saying it was “printed from a very rude and badly executed wood-cut”. It exemplifies the day’s lack of knowledge and carelessness in communicating fact.) Likewise, Joachimus Vadianus included in *Epitome trium terræ partium* (Tigvri, 1534) a world map, “Typvs Cosmographicvs Vniversalis”, that portrayed a mostly formless North American continent, labeled “Terra de Cuba”, with an east-west cigar-shaped embayment that is the Gulf of Mexico; and still the whole of the western seaboard is cleanly planed off exactly along a line of longitude for 40 degrees of latitude. Not much earlier, Pietro Coppo’s tiny map of the world, *Portolano* (Stampata in Venetia per Augustino di Bindoni, 1528), reproduced by Nordenskiöld (p. 103), displays the entire New World as composed soley of Iceland, Cuba and adjacent islands, and a peculiarly multi-tined South America that occupies about the same size area as Cuba and its islands; to the west of these the sea is filled with islands that are meant to draw attention to the Orient. Coppo’s American continents, “so awkward” as drawn, according to Nordenskiöld, reinforces our notion of the invisibility of the part of the world that is the attention of this Cartobibliography.

The planing off of the western seaboard even continued for far longer than it should have, as demonstrated in the 1551 *Charta Cosmographica, cvm Ventorum Propria Natvra et Operatione* (Cosmographia Petri Apiani, per Gemmam Frissium Illustrata, Parisiis), which is a somewhat cordiform map of the world that includes an elongated North America as “Baccalearum” with an effectively planar west coast that defined a strait (not labeled) connecting the Pacific Ocean (not labeled) with “Mare Atlanticvm”. Thereon the Americas are prominently labeled (on South America) “America”, continuing the fashion of Waldseemüller. The concept will be noted even among citations from among the dates embraced by this Cartobibliography, where Münster in *Geographia universalis vetus et nova ... Claudii Ptolemaei Alexandrini ...* (Basiliae, 1540, [ITEM NO. 25.375](#)) presents the continent with a slightly crenulated, north-south–trending western seaboard that may just as well have been planed off. A similar map, from 1548[?], is Münster’s *Die neüwe Iselen so zü unsern zeiten durch die König von Hispania im grossen Oceano gefunden sinde* (Basle, no date, [ITEM NO. 25.247](#)).

Another reason to cite 1535 as the earliest sensible date for citations in this Cartobibliography is that this was also the year in which Hernán Cortés sailed from the mainland to reach the tip of Baja California, where he attempted to establish there a port, Santa Cruz. This was the first European recognition that there was a separate seaway here, although, as seen in other records, he intimated that the western landmass was an island. (See [Note Regarding California as an Island](#), p. 11 below.) So Cortés’s Baja entrada may serve as the ideological launch point for a conscious recognition of a gulf/strait off the west coast of New Spain, as opposed to open ocean to the Orient.

The focus in this Section 1 of the Cartobibliography is really on the region where the Colorado River is depicted (regardless of whether it is labeled or not, or if it is labeled by other names [see a list of [nomenclature](#), INTRODUCTION p. 14 herein]). The citations are made usually without regard to the cartographical significance of the map or its makers. In more expansive, or more proper, cartographical studies this region is often overlooked because of far more significant regions that are presented on the map, such as the presumed Northwest Passage, or revisions to regions that are extralimital (often far so) to this Cartobibliography. In studying the North American area shown on these maps, one will notice with the passage of time a shifting around of areas of greatest interest; for example, decades during which more maps pay attention to (were more restricted to) the West Indies and Florida, or the North American eastern seaboard, or the Mississippi River region of the Gulf of Mexico and Louisiana. Thus some of the apparent temporal gaps in this Cartobibliography are attributable to the diversion of interest, when the North American Southwest was not even considered.

Thus my annotations do less to describe the map itself, but describe in as much detail as possible where the Colorado River falls, and the possible limits of its basin. Of course it would be ideal to illustrate each map, or at least the area of interest, but that is far beyond the purpose of this Cartobibliography and the resources available to me.

Numerous more maps are omitted from this Cartobibliography because, while they may show the form and placement of the continents and other large-scale geographical features, they do not show rivers. In a few special instances, however, a riverless map may be cited here, for reasons given in the citation.

In my chorographical notes I use some specific terminology that describes the reach of the Colorado River shown on a map—usually *starting* at the Gulf of California. This is because the headwater or other upstream areas depicted between maps vary greatly; their labels may geographically deviate on generations of maps; and the inclusion or omission of tributary streams likewise varies. Thus, the head of the gulf serves as a generally fixed reference point (even where it is malformed on early plans), so the geographic order of the narrative “goes against the flow” of the river. At my discretion some descriptions follow the natural course of the river; these are clear in context, such as when the Colorado follows a cartographically imaginative course across the Grand Canyon region.

The creator credit for a map might differ significantly from the credit given by other cartographers and bibliographers because this cartobibliography generally uses the date of publication (and thus public availability) rather than an attributed date for the map's delineation.

Among the citations in Section 1, note is made of “Quivera” (and variants) on many early maps. While “Quivera” is actually extralimital to this Cartobibliography, it is nevertheless a part of the greater exploratory story that appears throughout these citations, serving as a recognizable though confusingly migratory anchor point in that story. Many of the mapped notations of “Quivera” are geographically awry, about which Wheat (1957, Volume I, p. 21) remarks, sufficiently for our purposes, “The cartographic misplacement of Quivera is a story in itself . . .” The name has appeared on maps everywhere between the far Northwest part of the North American continent, to the region east and southeast of the confluence of the Gila and Colorado Rivers, and even far to the northeast not too distant from the Mississippi River (farther than where Quivera actually was). Sometimes it appears more than once on the same map. Indeed, Coronado’s “Quivera”, by various misassociations is misplaced also with the Hopi and other pueblo peoples, or the Seven Cities of Cibola, thus also may be mistakenly attached to the historical renditions of the side-trip to the Grand Canyon. Similarly, the Seven Cities are also extralimital to this Cartobibliography, though closer to the region of interest in that it embraces the country of the pueblos; they, too, are an integral part of the historical story followed in the first visit to the Grand Canyon, and they have sometimes been mislocated on maps.

Neither is it the purpose of this Cartobibliography to document the cartography of California unto itself, but rather its relationship in maps that portray the lower Colorado River region. Nor is it the purpose here to expound on the fancied geographies so prevalent—and so historically important and extensively studied—that take in the regions to the north of that covered by [THE GRAND CANON](#); for but one example, the great strait of Albion that promised a northwest passage from Europe to the Orient above North America. The mischaracterization of the Rio Grande is likewise notable on maps that are cited herein. While California was depicted as an island, the Rio Grande (under various names including Rio del Norte) turns from Santa Fe southwestward to empty into the strait. Some maps “corrected” this course, though sometimes awkwardly even while retaining the Californian strait, turning the Rio Grande to the Gulf of Mexico—even once *stating on the map* that it tunnels under a mountain range along the way! Often, the Rio Grande was depicted as heading in a large lake situated on the east side of a mountainous area that separated it from the Pueblos. Though not of disinterest, these portrayals of the Rio Grande are extralimital to this Cartobibliography. In this context, one would do well to read as an introduction Wheat’s first chapters.³⁶ (See the “[Cross-Listings to Wheat](#)”, INTRODUCTION p. 26.)

³⁶ Carl I. Wheat, *Mapping the Transmississippi West, 1540-1861. Volume One. The Spanish entrada to the Louisiana Purchase, 1540-1804*. San Francisco: Institute of Historical Cartography (1957).

Note Regarding Typography. Typographical elements are reproduced as precisely as possible (see also the separate note on [Typography of Author Names and Map Titles](#), INTRODUCTION p. 76 herein.). Some specific examples include titles from earlier centuries, where the letters “u” and “v” often were substituted outright or indiscriminately interchanged, even within the same title. For example, on Boisseav [Boisseau] (no date [1640?], ITEM NO. [25.490](#)),

Novvelle Description de toute la terre vniuerselle
might be modernized to read

Nouvelle Description de toute la terre universelle

Similarly, the letter “I” may be used for “J” and *vice versa*. Other verbatim spellings are noted, too, which may represent contemporary unstandardized spellings as well as typographical conventions; for example, in Beste (1578, ITEM NO. 25.402) the letter “w” is set *both as* “w” and as “vv”. When searching for such titles in online catalogs, users should bear in mind that some repositories may catalog holdings with standardized spellings, while others list items that reproduce more precise typographies. In this Cartobibliography, most titles are spelled faithfully to the original, although in some cases conventionalized titles are given unknowingly, having relied on other sources usually during the earlier years of compiling this Cartobibliography. The long “s”— f — is transcribed here as “s”, as it is only an archaic form of the letter and not a unique character unto itself. When they appear together, as “fs”, they are transcribed “ss”; however, when the combination appears as a peculiar ligature, it is transcribed as “ß”, which it resembles.

Note Regarding California as an Island and the Gulf of California a Strait, and Cross-Listings to McLaughlin. The geographical presentation of California variously as a peninsula and an island is well studied. It is not the object here to summarize this mightily interesting story, though for one outstanding example of the amount of material that is available visit Stanford University Library’s Glen McLaughlin Collection of California as an Island, <https://searchworks.stanford.edu/view/zb871zd0767>. The entire collection has been digitized, which includes numerous maps in books, though it largely omits world maps, deferring to the Shirley cartobibliography (see below). See also a complementing catalogue by McLaughlin, to which cross-listings in the present cartobibliography are made where pertinent.³⁷ In this Cartobibliography we are less concerned as to whether California is peninsular or insular than we are in knowing which rendition is presented in a map. It alerts us to where to look for the Colorado River; that is, how it was accommodated in the North American geography.

³⁷ Glen McLaughlin, with Nancy H. Mayo, *The Mapping of California as an Island : an Illustrated Checklist*. California Map Society, Occasional Paper 5 (1995), 134 [143] pp. The collection is “almost certainly the largest existing assemblage of maps depicting California as an island.” (p. ix). In this catalog, many, though not all, maps are illustrated, although at resolutions that are not generally useful for examining the geographical region of interest to this Cartobibliography.

It was rarely for pure geographical knowledge that the question of California's insularity was sought to be resolved. Rather, it was the overbearing political and commercial need to discover a Northwest Passage by sea between Europe and the East Indies. Identifying this passage by connecting it, if need be, to the Gulf of California, was the goal, which cartographers were eager to present so as to convey support for the existence of this passage. We see in those attempts various "western," "northern," or "icy" seas, straits named in different ways "Anian", and other contrivances. Some of these were either Arctic channels, or seas that effectively wiped out the entire North American landscape. In reality, the known waterway of the Gulf of California was either a convenience or an awkward bit of knowledge to accommodate in these constructions. The gulf really played second fiddle to the Northwest Passage (whatever it was called), though it was clear to many mariners and other hopefuls that the north-south strait should somehow connect to the passage.

Even though at the close of the 17th century Eusebio Francisco Kino demonstrably showed, in the field, that Lower California is a peninsula, that the Gulf of California is in fact a gulf and not a strait (Kino, manuscript, 1701, *ITEM NOS.* 25.1050, 25.1855; first in print, 1705, *ITEM NO.* 25.629; and redrawings thereafter [see under [Kino](#) (p. 122)], some map makers and geographers defiantly or carelessly continued to present the island well through the 18th century. Maps from the 19th century that still depict the island are usually reprintings of older maps, or reprintings using the older, original blocks or plates; particularly those produced in eastern Asia. The cartographical distinction between the island and peninsula by this time does not reflect geographical currency and thus is not practically realistic.

The *idea* of the Californian island has been traced to a novel that may have been written as early as 1496. Garci Rodríguez de Montalvo wrote the chivalric romance novel, *Las Sergas de Esplandián*, a sequel to *Amadís de Gaula*, Esplandián being a son of Amadís. Geographical scholars determined that it is the *Adventures of Esplandián* that first introduces the name, "California". The novel presents the island as one inhabited by Black women, ruled by its queen, "Calafia". The idea perfectly complemented the legend from the earliest Spanish explorers of this region that to the west of Mexico was an island supposed to be inhabited by Amazon women. Some exhibits and notations have intimated that the Rodríguez de Montalvo novel is the source of the mapped island of California, although the novel was not illustrated. Perhaps written as early as 1496, the earliest known edition is 1510 (not seen for this Cartobibliography, but a 1526 edition—"Sue impressa la presente obra en la muy noble y my mas leal ciudad de Burgos acosta y espesa de Juã de Jūta florentin" [colophon, leaf CXXVI recto]—was seen, which in "Capitulo. clvij" takes note of "California" [leaf CVIII verso]). Yet imagination and speculation are every much a part of historical accounts as they are of the writings of more modern scholars, who create the texts of historiographies that treat questions such as this. They have identified even earlier literature, of the 10th to 13th centuries, that may have influenced Montalvo. But here, we digress.

Briggs (1625, *ITEM NO.* 25.21) is the first proper map to have displayed California as an island, thus also the Gulf of California as a strait. The earliest cartographical depiction of any kind that shows California as an island is that of Antonio de Herrera y Tordesillas, in 1622, on

a small, ornamented map of the western hemisphere on the title-page of *Descriptio Indiæ Occidentalis per Antonium de herrera Regium Indiarum et Castellæ Historiographum* [Amsterdam]. The map displays no place names or rivers, except some coastal embayments of the continents that are river mouths; thus accordingly the map is not pertinent to this Cartobibliography.

A manuscript map from *circa* 1535–1537 is in Hernán Cortés's legal papers in the Archivo General de Indias, in Seville. This records the European recognition of the Gulf of California as a separate waterway. Even though there is no determination on the map that California is an island or a peninsula, cartographers and other historians have used this map and later contemporary documents of the 1540s to indicate that the island is meant. However, such final recognition came after the entrance to the gulf—and either offshore islands or the Baja peninsula itself—were first reached in 1533 by an expedition sent out by Cortés. The pilot Ortuña Ximénes (after having, with troops with him, murdered the overbearing captain, Diego Bezerra de Mendoza) found the islands, or Baja itself, but was himself killed by local inhabitants. Reports from surviving sailors eventually reached Cortés, who himself set out to the new land, arriving in the beginning of May 1535. In a matter of years, though, Baja California was more generally perceived to be a peninsula, though the idea of the island never went wholly away, and in the 1620s insularity was forcefully resurrected.

For historical perspective, I have contrived a means by which to quickly identify the maps cited herein that record the variant depictions of California as either a peninsula or an island—a geographical peculiarity that is well studied but which is far from the purpose of this Cartobibliography to review. Still, users may wish to easily sort out which among these citations refer to maps with peninsular or insular California. In the chronological cartobibliography ([Section 3](#)) I have inserted marginal symbols to distinguish these maps during the 16th–18th centuries when this dichotomy was present ([see p. 823](#)).

That so many of the insular California maps accommodate the Colorado River region by peculiarly sandwiching it midway along the east side of the strait, the concept may be unfamiliar to many users who are new to the subject. The following pages contain a few illustrative examples. Bear in mind as well that the progress of thought on insularity or peninsularity of California was never advancing over the span of decades, but that one concept or another was usually copied from other maps or was adopted as a matter of convenience, thus the concept of insularity continued well through the 18th century despite the matter having been factually settled in the early 1700s.

Figure 22. Fer 1713 Carte de la Mer du Sud. et des costes d’Amerique et d’Asie situées sur cette mer. Carte de la Mer du Nord, et des costes d’Amerique, d’Europe, et d’Afrique, situées sur cette mer. Par N. de Fer Geographe de sa Majesté Catolique. avec Privilege du Roy 1713. (McLaughlin 185, Spamer 25.1807)

“Les Californies ou Carolines” is shown as an island, separated from “Nouvelle Grenade ou Nouveau Mexique” by “Mer de Californie ou Mer Vermeille”. “R. del Tison” [Colorado River], and “R. Grande del Coral” [Gila River] are significantly reduced and isolated along the east side of the strait. “Riviere du Nord ou Brave” (the Rio Grande) is correctly depicted as flowing to the Gulf of Mexico, although it still is shown as heading in a large lake (“Lac de Canibas”).

Figure 23. Crépy [1735] Amérique Paris 1735 Chez Cher Crepy rue S.^t Jacques a S.^t Jacques. (McLaughlin 214, Spamer 25.1816)

"Californie" is separated from "Nouveau Mexique" by "Mer Rouge". McLaughlin indicates that the insularity of California is indefinite, inasmuch as the northern end of California and the adjacent lands to the east are ambiguously drawn, as noticed by the extension of the seaway that has an island, but the western coast of California-proper continues to the north and west (*not shown in this detail*); the limit of these portrayals is met by an informational text at the top of the map. Midway on the east side of the seaway is distinctly shown, in a confused manner, what appears to be an effort to accommodate information that California is a peninsula. "Rio Colorado" is shown as a single north-northeast-south-southwest stream heading near "Teguaino", arriving at the head of a linear north-south embayment. Near its mouth the Colorado receives a large river (not labeled) from the east-southeast along which is the label "Casagrande" (which identifies it as the Gila River, the headwaters of which are in a mountain range that separates it from the "Sulade R." that is the Rio Grande that reaches "Golfe du Mexique"). The portrayal of the Colorado River with a sliver of land to its west, where also small rivers are shown draining to the seaway, is reminiscent of the more modern depiction of California, in miniature on this map and independent of what must still be the great island of California.

Figure 24. Killian [1757?] General Charte von dem Mitternächte America und sonderlich denen darin befindliche Französ. Colonien, mit dem Wappen und Zeichen der Orientalischen u. Occidentalischen Französische Handels Compagnie. (McLaughlin 236, Spamer 25.1824)

"The island, "California", is separated from "Nova Granada" by "Mare Vermio olim Mare Rubrum". Although the rivers are not labeled, at least the noticeable south-southwest-flowing river with two headwater forks, reaching a prominent embayment, may be identified as the Colorado River. The river immediately parallel to it may be a misrepresented Gila River, although other contemporary maps include a variety of spurious rivers while omitting others. Note that it seems as though the Rio Grande is portrayed twice, each with headwater near the word "Granada" on this map: once in the form where it flows southwestwardly to the Californian strait, and again where it is corrected to flow southeastwardly to the Gulf of Mexico, a conflation that does appear in other contemporary maps. (Note as well that the Mississippi River is depicted as entering the northwestern corner of the Gulf of Mexico; and further, it has a tributary that bears a large lake north of the conflated headwaters just mentioned, which could also be interpreted as yet another rejiggering of the Rio Grande.)

A remarkably uninformed depiction of California and the Vermilion Sea on a
 MANUSCRIPT map by **Jean Baptiste Louis Franquelin [1678]**,
“Carte Genlle de la France Sept^{le} Contenant la descouerte du Pays des Illinois”

Figure 25. This is a detail of Franquelin’s map of the French holdings in North America that would be known as Louisiana in various geographical extents; it probably was not intended to be very informative for the region to the southwest. Note that “Mer Vermeille”, placed in the southwestern corner of the map, could be either a gulf or open sea, in which case California would be off the map to the west. But note the diminutive peninsula at the northeast corner that is labeled “Californie” (*enlarged in the inset*). If the Vermilion Sea is a strait, the noticeable river to the northwest of “Californie” could be any of the normally westward-draining rivers that are shown on the east side of the strait on contemporary maps; but if the sea is a gulf, then this river is the Colorado. In either case the curious placement and orientation of “Californie” defies convenient explanation. The river seen entering the Vermilion Sea to the southeast of “Californie” could be anyone’s educated guess. (The major river entering the Gulf of Mexico is the Mississippi River, and there seems to be no readily recognizable accommodation for the Rio Grande except perhaps for the noticeable embayment to the southwest of the mouth of the Mississippi, though it could receive a river other than the Rio Grande.)

This map detail is shown here (the map is not otherwise cited herein) to illustrate the kind of imaginative rendering of hearsay that was usual in the 17th century, muddled further by some peculiar misunderstanding of the geography of southwestern North America.

Cross-listings to Shirley. Most of the oldest maps are scarce, often accessible only in the special collections or rare-materials departments of large libraries—and some of those maps are in fact known from unique copies. Thus this Cartobibliography makes special mention of a number of printed maps that have been reproduced (usually much reduced in size, of course) in Rodney W. Shirley’s magisterial *The Mapping of the World : Early Printed World Maps, 1472-1700*. These are restricted to maps of the entire known world and do not include continental or regional maps.

Section 1 of this Cartobibliography inherits the Shirley cross-listings from earlier editions of THE GRAND CANON, which at the time were intended to be comprehensive only until about a century following the first European explorations of the region considered here; that is, to about 1640. This Cartobibliography now ignores this restriction. Further, the cross-listings to Shirley herein were based on those maps *illustrated* by Shirley since they could be examined for their pertinence to this Cartobibliography. These illustrations show the knowledge of this region’s geography at those times. For many purposes of general geographical and bibliographical studies the user will find Shirley’s reproductions adequate.

Shirley, Rodney W.

- 1984 *The mapping of the world : early printed world maps, 1472-1700*. London: Holland Press, XLVI, 669 pp. (Holland Press Cartographica, Volume 9.)
- 1987 *The mapping of the world : early printed world maps, 1472-1700*. London: Holland Press, XLVI, 669 pp. (Holland Press Cartographica, Volume 9.) [Reprinted with corrections.]
- 1993 *The mapping of the world : early printed world maps, 1472-1700*. London: New Holland (Publishers) Ltd., [i-xxiv], IX-XLVI [XLVII], 669 pp. [3rd, revised ed.] [The 1993 edition has been consulted for this Cartobibliography. Except for corrigenda, the principal listings are the same for all editions.]
- 2001 *The mapping of the world : early printed world maps, 1472-1700*. Riverside, Connecticut: Early World Press, 669 pp. [4th ed.]

The Shirley volumes enumerate each of the maps that are listed therein, 1–639. Many of them are illustrated, and these are the ones that have been examined for this Cartobibliography so that researchers may be able to at least more easily peruse them (in their smaller sizes) if the maps cannot otherwise be found or easily accessed in digital or original formats. (Some of the maps are unique, too, and Shirley does indicate the provenance of all of the maps examined.) Thus those maps that are illustrated by Shirley, and which are pertinent to this Cartobibliography, will appear with a notation as like other citations in this Cartobibliography that are cross-listed to reference lists; for example, SHIRLEY 115 is Shirley’s “Entry no.” 115—that is, map no. 115 in his list, with text on pp. 133, 135 and the map illustrated by Plate 99, p. 134. Except for the earliest maps, a map cited by Shirley is not cited in the present bibliography unless the region of interest is portrayed definitively, even if imaginatively.

Shirley’s citations were standardized by him for the sake of general users. Often, abbreviated titles are provided, and publishing information is Anglicized. For example, where

an original map might indicate “Amstelodami” in Latin, Shirley has listed it as the English “Amsterdam”. Further, Shirley cites many maps according to the names of their engravers; but if these maps appear within a larger work by another author, I arrange the citation according to publication (which is how it would be searched for if one wishes to examine a copy). I have used online catalogs to identify the publications in question.

The precise transcription of names and titles in particular may include faithful reproduction of some typographical elements and errors. This unconventional presentation is done so that those users who may not be able to see an original product can profit from the exact textual appearance and context. (See more complete information on INTRODUCTION [p. 76](#) herein.)

ANONYMOUS

PUBLICATION NOT DATED: DATE ESTIMATED OR ATTRIBUTED

- | | | | |
|---------|--------|--|-------------|
| NO DATE | 25.373 | <p>[No title.] Nuremberg[?], 12 gores. [Ca. 1535.] [Texts in Latin.]</p> <p>▶ Set of gores printed for a (lost) globe. The west coast of America imaginatively portrays the coast of the continent continuing westward above the equator, merging closely with "India" without the intervening ocean. (Shirley notes that the "gores were at one time erroneously attributed to Johann Schöner".)</p> <p><i>NOTE:</i> This is the earliest published work cited in THE GRAND CANON series. It is one of two items selected for this Cartobibliography that were composed <i>prior to</i> 1539 when the Colorado River was first encountered by European explorers. See the front matter herein regarding the earliest cited works [INTRODUCTION p. 28] and the selection of pre-1539 items.</p> | SHIRLEY 71 |
| NO DATE | 25.382 | <p>[No title.] Venice[?]. [Ca. 1555.] [In Italian.]</p> <p>▶ A copy of a map of the world originally by Giorgio Calapoda, which Shirley (p. 112) notes is "Also known as the 'Florentine goldsmith's map'." A severely deformed North American continent still depicts the Gulf of California and a bulbous Baja peninsula to the northwest of "Nveva Spagna".</p> | SHIRLEY 98 |
| NO DATE | 25.407 | <p>[No title.] Antwerp[?]. [Ca. 1587.]</p> <p>▶ Twenty-four gores printed for a globe. "Mer Vermelo o Rosso" is well delineated, with rivers entering near its head. The labels "Totontec" and "Marata" occupy the region of interest to this Cartobibliography.</p> | SHIRLEY 156 |
| NO DATE | 25.413 | <p>[No title.] [Rome or Venice.] [Ca. 1590.]</p> <p>▶ An uncompleted engraved world map, which depicts a broad North American continent with the Baja California peninsula labeled "California", and at the head of the gulf are three tributary rivers. The region of interest to this Cartobibliography is labeled, "Totontec".</p> | SHIRLEY 169 |

Anonymous (continued)

- SHIRLEY 174
- NO DATE 25.415 **Nova Totivs Orbis Descriptio.** Antwerp[?]. [Ca. 1590.] [In Latin, mostly.]
 Shirley (p. 193) observes that “the map is taken from the Gastaldi–De Jode world map of 1555” (SHIRLEY 100; see ITEM NO. 25.383) “but with extensive amendments to the original plate” and which shows the route of Drake’s circumnavigation.]
 ► Map of the world which portrays the Gulf of California, at the head of which a prominent river runs directly from the north, from well up into the continent (which is separated from Asia by a narrow strait). Tributaries from the east may be identified with the Gila and Colorado Rivers. Also of note is the label, “Cevola”.
- NO DATE 25.1665 **Americæ Tabula Nova Multis locis tam ex terrestri peregrinatione quam recentiori navigatione ab exploratissimis naucleris emendata et multo quam antea exactior edita.** [No imprint]. [In Latin with mixed labeling.]
 Lowery (1912, LC90, pp. 102-103) indicates a date of “17th cent.”; likely earlier than later, thus placed **early 1600s** herein.
 ► The peninsula, “California”, is separated from “Hispania Nova” by “Mare Vermeio”. A bulbous head to the gulf receives five rivers: 1) “Axa fluvius” from the northwest (into which it receives a prominent tributary [not labeled] from the north), 2) “R. de Coramara” from the north, 3) a river (not labeled) from the north but which heads principally to the east-northeast, 4) “R. del Aguada” from the east-northeast, 5) a river (not labeled) from the east-northeast. A large island (perhaps “I. de la Cruz”, a label that is on the mainland to its east) appears on the southeastern side of the head of the gulf, and between it and the mouths of “Axa fluvius” and “R. de Coramani” is a large area depicted by stippling (mudflats?), and to the immediate southwest of the island are four “+” symbols (rocks?). It seems that this area near the mouth of “R. de Coramara” is also labeled “G. de Coramara”. The name “Coramara”, or “Coromara”, is likely the river assumed by contemporary geographers to be that of Marco Polo’s river in China, even though on this map none of the depicted rivers travels very far from mountainous areas to the north and northwest of the head of the gulf. To the west of the head of the gulf the region is labeled “Totonteach Regnũ.”; to the east the region is labeled “Cevola”. Near the mouth of “Axa fluvius” is a place name, “Totonteach”. Between two headwater forks of “R. de Coramara” is “Septem Citta”. On the west bank of “R. de Coramara” not far from the mouth of the river is “Abacus nunc Granada”. Between “R. de Coramara” and the unlabeled river to its east is “Cevola”. Between that unlabeled river and “R. del Aguada” is the label “Braco de muche Flores, which may be meant to identify the unlabeled river.
 NOTE: A cartographical device to suggest an area unexplored is the note of Brazos de Miraflores (more correctly written here), which may imply a possible extension of the gulf that, upon continued exploration, would indicate that the gulf is in fact a strait.
 Also compare this map to Tattonus (1600, ITEM NO. 25.1120).
- SHIRLEY 330
- NO DATE 25.481 **Allgemeine Landes und Ûhr Tafel.** [No place.] [In German.]
 Shirley indicates a date of “c. 1630 (or later)?”, and although he also indicates it may be a “Separate publication?” he notes (p. 352), “The map may have come from an instructional book”
 ► The Gulf of California, separating the peninsula of “California” from “Nova Granata” has several tributaries converging at a bulbous head of the gulf.

Anonymous (*continued*)

- MCLAUGHLIN 20
- NO DATE 25.1641 **Amerique.** [No imprint.] [Paris?] [1660?] [In French.]
BROADSIDE; map with title, and extensive text regarding America on three sides, without title.
 ▶ “Californie Isle” is separated from “Mexicane” by a strait (not labeled). Midway on the east side of the strait, two very diagrammatically portrayed rivers arrive in parallel from the northeast in “Qvivira”, reaching two separate embayments. “Cibola” is labeled much farther north from the heads of these rivers, farther north than “Qvivira”.
- NO DATE 25.1746 **圖總國萬** [*read right to left*] [Bankoku sozu] [Map of all nations]. [Japan.] [Late 1600s.] [In Japanese.]
 Woodblock printing.
 ▶ North America depicts a peninsular California at the head of which are three stylized, “bird-foot” tributaries from the north, north-northeast, and northeast; the last has a tributary to it from the north-northwest that heads in a large lake, as portrayed on other contemporary maps. Labels in Japanese orthography not translated here.
- NO DATE 25.1723 **L[']Amerique Septentrionale.** [No imprint.] (“pag. 170.”) [Ca. 1705.] [In French.]
 ▶ The island, “Californie”, is separated from “Nouveau Mexique” by a strait. Midway on the eastern side of the strait is a mountainous area, to the south of which is an embayment that receives a river from the north and northeast, which in turn receives near its mouth a river from the east and southeast; neither is labeled. The island is shown in a very peculiar shape. The presence of a tributary system at the head of an embayment that, with the mountainous area, is reminiscent of the Colorado delta and the Sierras of California, suggests that this is a conflation of the insular California with Kino’s report demonstrating that California is a peninsula, with the Colorado arriving at the head of the gulf.
- MCLAUGHLIN 195
- NO DATE 25.1595 **Kaart der Reyze van drie Schepen naar het Zuydland in de Jaaren 1721 en 1722.** [Amsterdam?] [1720s.] [In Dutch.]
 The Stanford University Library’s Glen McLaughlin Map Collection of California as an Island indicates, “Possibly the work of Isaac Tirion. Shows the voyage of three Dutch ships under the command of Capt. Jacob Roggeveen from Amsterdam to Iava.”
 ▶ “California” is separated from “Nieuw Mexico” by a strait (not labeled). On the eastern side of the strait at two prominent embayments, the northern one receiving a river from the northeast; the southern one receiving two rivers, one from the northeast, the other from the east. “Quivira” is noted beyond the head of the second of these three rivers, while along its course is “Oraiva”.
- NO DATE 25.1413 **Изображение земного глобуса** [Izobrazhenie zemnogo globusa] [Representation of the terrestrial globe]. [Saint Petersburg, Russia]: [no imprint]. [1750s.] [In Russian.]
 ▶ “Калифорнія” (California) is separated from “Новая Гишпанія” (New Hispania) by “Море Чермное” (Red Sea). The head of the gulf receives a river (not labeled and without tributaries) that comes from the northeast.
 In Russian, but the name for the Gulf of California suggests elements of Ukrainian if not so-called Church Slavonic etymology; in this case, the word чермное, which is used here and suggesting the Red Sea of Bible history, translates into Russian as “red” although Russian maps may label the Middle East’s “Red Sea” as “Черное море” (Black Sea).

- NO DATE 25.1401 **Plano de la Costa comprendida entre el Rio Colorado o del Norte y Rio Asuncion en el Norte del Mar de California.** [Ca. 1770.] [In Spanish.]
MANUSCRIPT, Library of Congress, G4412.C63 1770.P4; digitized online at <https://www.loc.gov/item/2008621665/>.
 • As a manuscript this would not be cited in this Cartobibliography, but it is of importance in the history of the Southwest due to its early and unusual focus on the lower reaches of the Gila and Colorado Rivers.
 Library of Congress provides description of its copy: "Relief shown pictorially. Depths shown by soundings [*sic*; no depths are noted]. Oriented with north to the left [*sic*; north arrow is pointing to north-northwest]. Pen-and-ink and watercolors. Rice paper mounted on verso. Stamped label annotated in black ink on verso: Ex libris del Marqués de Pidal, no. 56."
 ► Map includes the names of some geographical features and areas of Indigenous habitation. Scale shown in "Karas". Map displays approximately 8,000 karas of the Río Colorado; and Bahía Adair is approximately 11,000 karas from the mouth of the Colorado.
- NO DATE 25.1414 **L'America Settentrionale, Divisa ne'suoi principali Stati.** [In Italian.]
In: Anonymous, Atlante novissimo ad uso dei giovani studiosi contenuto in carte XXVII. [No imprint.] [Ca. 1775.]
 The maps in this volume appear to be plates reused from other sources, as most of them carry variously different marginal numbers, some indicating other use in sources that are multiple volumes (as is this case with this map, which notes "T.III. 4.") It is quite rudimentary, as befitting the volume's intended audience.
 ► The Baja Peninsula is labeled "California"; it is separated from "N. Navara" by "Mare Vermiglio". Two rivers (not labeled) have a confluence just before arriving at the head of the gulf. The primary river follows a course southeastward from headwater in "Luigiana", crossing into "N. Messico", then southwestward to the confluence; the smaller river arrives directly from the east.
- NO DATE 25.1796 **l'Amerique Septentrionale.** [1702?] [In French.]
 ► "Ile Californie" is separated from "Nouveau Mexique ou Teguaio", "Nouveau Mexique", and "N. Grenade Marate" by "Mer Vermeille". On the east side of the strait are two rivers, the northerly one from the north-northeast, and the southerly one, which flows into the western lobe of a large, bilobed embayment, from the north-northeast.
 McLaughlin lists two states, both in *Geographie universelle* (no imprint [France, 1702?]).

[In Russian.]
In: Новый Атлас или собрание карт всех частей земного шара, почерпнутый из разных сочинителей и напечатанный в Санкт-Петербурге для употребления Юношества в 1793 году при Горном училище [Novyy Atlas ili sobranie kart vsehkh chastey Zemnago Shara, pocherpnutyy iz raznykh Sochiniteley i napechatanny v Sanktpeterburge dlya upotrebleniya Yunoshestva v 1793 godu pri Gornom Uchilishche] [New Atlas or a collection of maps of all parts of the Globe, drawn from various Composers and printed in St. Petersburg for use by the Youth in 1793 at the Mining School]. Санкт-Петербург [St. Petersburg]: [no imprint], 58 leaves.
This is map 52 in the atlas.
▶ "Р. Колорадо" [Река Колорадо] [reka Kolorado] [Colorado River] is depicted as a single river, without tributaries other than a more prominent Gila River (not labeled), between "Море Пурпуровое" [More Purpurovoye] [Purple (i.e. Vermilion) Sea] and undefined headwaters. Below the confluence of the Gila the river bifurcates before rejoining at the head of the gulf.
NOTE: Wheat (1957, Volume I) only briefly comments on this map ("a Russian map", p. 150), providing its title and that of the publication in which it appears only in modified English translation (p. 241). The citation here is created from the atlas itself.
-
- WHEAT I:229 [with map illustration facing p. 153]
- 1794 25.744 天經或問註解 [tenkyo wakumon chukai] [Heavenly commentary or Illustrated astronomy]. [Osaka, Japan: Sharin publishing house.] [In Japanese.]
See woodcut **MAP**, north polar projection with North and Central America. The title as given by Wheat (1957, Volume I, p. 242, including square brackets) is "Tenkyo Wakumon Chukai [North and Central America]", which is the title of the book, to which is added a description of the geographic coverage of the map at least as illustrated by Wheat. The information on publisher and date cited here are as given by Wheat; book title in Japanese is added *here* (see also the Bibliographical Note below). Wheat remarks that the map is ". . . included in a revised edition, in Japanese, of a rare Chinese volume by Yu I, a Chinese astronomer." Wheat further remarks (p. 153, his emphasis) that the map "is unique in that on it a vastly magnified peninsula of California is attached to the mainland *at its southern, rather than its northern extremity.*"
The **MAP** as illustrated by Wheat (facing p. 153) is half of a polar projection, with a caption (approximately rendered *here* as "地球改正面裏北").
- (*continued*)

Anonymous (continued)

► The peninsula is labeled (inverting the map and reading south to north), “カリオルニア”, which approximates the modern Japanese spelling of California (カリフォルニア). The map shows, interestingly, a significant river flowing into the (southern) head of the gulf, and otherwise on the eastern (mainland) side there are a few embayments such as those that appear on maps that depict California as an island, where the Colorado and other rivers enter the gulf mid-way through the “strait”. This map is cited here for its novelty and as an early Japanese perspective.

BIBLIOGRAPHICAL NOTE: OCLC record 851880447, as found on WorldCat online, lists the 3-volume title, “Tenkyo Wakumon Chukai : illustrated astronomy”, with authors “Irie Heima; Wakanaya Kohei”, publisher “Yedo : Kangyuhā” (no date), with the notation, “Includes map of North America with Baja California connected at the south rather than the north.” No other WorldCat record includes this notation, although there are records for similar editions.

A

Aa, Pieter van der [Aa, Pierre vander] [Vander Aa, Petrum]

- SHIRLEY 417
- 1702 25.1440 **Nova Delineatio Totius Orbis Terrarum per Petrum Vander Aa. Nouveau Carte du Monde.** (“Benevole Spectator, Offertur hic Generalis Mundi Tabula, correcta quantum fieri potuit atque majori, quam ante spatio extensa; imo etiam partæ nonnullæ majori forma incisæ.”) [Title in Latin and French, with map labeling in Latin and Spanish.]
 ► “America Septentrionalis” includes a continental mass, “Nova Albion”, extending westward across the Pacific Ocean from the northern end of the island of “California”. California is separated from “Nova Granada” by a strait (not labeled). On the eastern side of the strait there are two prominent gulfs; the northern one extends northward from the strait to a place with the label “Rey Coramede”, and there are two ill-defined, short rivers entering its head, one from the north-northwest, the other from the northeast. (This northern gulf, as portrayed, is strikingly much like the actual configuration of the Gulf of California with the Baja Peninsula.) The second, smaller gulf, extending northeastward from the strait, is met by a river from the north-northeast with headwater in a lake, which river is the Rio Grande as so depicted on many contemporary maps.

Leide: Chez Pierre vander Aa, Marchand Libraire.

► "California I" is separated from "Nova Mexicana Nova Granada Regn. Mexica" by "Mare Vermeio olim Mare Rubrum". A very prominent, three-headed embayment is on the eastern side of the strait, into which flow "R. del Tecon" (into the most prominent, northern head) and "R. Coral" (into the second-most prominent head). "Tecon" is shown with three tributary streams comprising its headwaters.

Agnese, Battista

WHEAT I:8

NO DATE 25.1589

[Map of western North America.] [Ca. 1556.] [In Italian.]

MANUSCRIPT • Although manuscripts are not generally cited herein, this map has been reproduced in Winship (1896, Plate 42, ITEM NO. 2.6973 in Volume 1/Part B of THE GRAND CANON), with the legend, "Battista Agnese's New Spain, Sixteenth Century After Kretschmer".

Wheat (1957, Volume I, p. 188) notes, ". . . attributed by Wagner to Agnese. Probably 1556." (see also his discussion, p. 21).

► The greater part of North America is blank, with the label "Nvova Spagna Prov". A mountains area is depicted across the entire area north and west of "Golfo Mexicano". The Gulf of California (not labeled) receives at its head a single,

generalized river from the north, which passes between two place markers, “Axa” and “Tigues”. Its headwater is in “Terra Incognita”.

Ahmed, Haggi [Ahmed, Hâcı] [*pseudonym?* of Membré, Michele, AND Cambi, Nicolò]

SHIRLEY 103

- NO DATE 25.385 [A complete and perfect map describing the whole world.] Venice. [1559?] [In Turkish.]
Map composed of six woodblocks that were used to make the earliest known impressions in 1795. The Gulf of California and Baja peninsula are shown. See also remarks with Ahmed (1795, ITEM NO. 25.1406).
- 1795 25.1406 **Kemâliyle nakş olunmuş cümle cihan numûnesi** [*orthography employs the Ottoman Arabic abjad, not reproduced here*]. [Venice]: [Pinelli]. [In Turkish.]
Illustrated by the Library of Congress at <https://www.loc.gov/item/2004626121/>. Title in transliteration and publication data as given by LOC. Various notes from LOC catalog record: “Map printed on 10 sheets pasted together. One of 24 impressions printed in 1795 from six woodcut blocks when found in the archives of the Council of Ten in Venice. Text states the map was translated into Turkish in 967 (Oct. 1559 to Sept. 1560). Map based on Oronce Fine’s cordiform map of 1534, according to Shirley’s Mapping of the world, 1993.”
► Not only is the cordiform map surrounded by extensive text (in the Ottoman Arabic abjad), but the map itself is completely infilled with glosses amidst confusing, and seemingly contrived, river systems; to such an extent that it requires very detailed examination to study this map. Nonetheless, North America is recognizable, and the Gulf of California is headed by a single river that reaches it from the far north-northwest, where are shown two converging rivers.
NOTE: Even though the note from Shirley indicates that the map is based on Oronce Fine’s map of 1534, Fine’s original maps of 1531 and 1540 (see Fine, 1540, ITEM NO. 25.1407), which follow a different projection, have elements likewise recognizable in this map.

Aigenler, Adamo

- 1668 25.1856 **Tabula Geographico-Horologa Universalis Novo hacten’ perfacili compendio exhibens quæ ubiq; locorum sit hora, ubi nox sit, ubi dies, quanta earundem longitudo, ubi & quando videri Eclipses possint. &c.** (“D. D. Ignatio et Francisco Xaverio de Universo Terrarum Orbe Optimè meritis Mathesis Ingolstadiana D. D. D. Anno M. DC. LXIV.”) [In Latin.]
In: Tabvla geographico-horologa universalis, problematis cosmographicis, astronomicis, geographicis, gnomonicis, geometricis illustrata, et vnae succinta methodo qvaslibet mappas geographicas delineandi. Publico certamini proposita in celeberrima, Catholoca et elctorali [sic] Unversitate Ingoldstadiensi, praeside Adama Aigenler Soc. Jesv, Sacræ Lingvæ et Matheseos Professore Ordinario, defendente Joanne Henrico Menrado vor Waltner, Ingolstadiensi Boio, Philosophiæ et Matheseos Stvdioso, Mense Avgvsti, Anno M.DC. LXVIII. Ingolstadii, Typis Ioannis Ostermayri.
Fold-out map between volume dedication and page 1.
► Map of the world, displaying North America greatly inflated in longitude, with its southwestern coast following a northwest-southeast trend, along which a Californian gulf (not labeled) is shown prominently with mouth open to the southwest but the gulf itself is northwest-southeast, separating “California” from “Nova Granata”. A bulbous, north-directed head receives three river systems (none labeled). The system arriving at the northwest part of the head shows headwaters in a mountainous area to the north; a single stream arriving at the northern part of the head comes from another mountainous area to the north; and a system arriving at the northeast

part of the head comes from the northeast, with two headwater forks, of which the north-south fork originates in a lake that is due west of the head of the “R. S. Laur.” (St. Lawrence River!).

NOTE: Ernest J. Burrus, *Kino and the cartography of northwestern New Spain* (Arizona Pioneers’ Historical Society, Tucson, 1965), points out that Padre Kino brought this volume, published by his teacher, Aigenler, to America (illustrated as Burrus’s Plate II, between pp. 12/13); it was influential in Kino’s own cartographical efforts.³⁸

Allard, Carolum [Allard, Carel]

- 1705 25.1622 **Americæ nova discriptio. Amstelodami Apud Carolum Allard.** [“Carolum Allard” seems to have been reengraved over another name.] [In Latin.]
In: Atlas major, ex novissimis, selectissimisque, a quovis auctore editis, cum generalibus omnium totius orbis terrarum regnorum, rerumpublicarum et insularum, tum particularibus in hisce sitarum regionum tabulis geographicis, juxta perfectissimam itinerariam seriem in hoc opere positis, consistens. Ad numerum 521 tabularum in tres tomos divisus. Tomus III. Amstelodam: Car. Allard.
 ► The island, “California”, is separated from “Nova Granada” by a strait (not labeled). Midway on the east side of the strait, two rivers (not labeled) converge directly into the strait; the more northerly, prominent one from the north, with two headwater forks, the western fork of which heads due north at a place labeled “Rey Coromedo”; the more southerly river meets first river from the north-northeast. East of these rivers is “Pueblos de Moqui”. Of interest is “Rio del Norto” (Rio Grande), which follows a course to the strait from a large lake to the northeast through “Marata regnum”, along which is the place name for “Real de Nueme Mogui” (presumably Santa Fe).

³⁸ It is well documented that Kino first understood Lower California to be a peninsula, based on his teacher’s map, and later shifted to accept contemporary beliefs in an insular California, as for example his adoption of the island from other sources, as shown in his 1695-1696 manuscript map, “Teatro de los Trabajos Apostoloicos de la Comp^a de Iesvs en la America Septentrional 1696” (with text on the map dated 1695), which is shown in Burrus, Plate VIII (between pp. 40/41), the original in the “Central Jesuit Archives in Rome.” On that map, “Californias ou Carolinas” is separated from “Parte de la Nueva España by “Mar de las Californias o Caroliinas”. Midway on the eastern side of the strait is an embayment that receives “Rio del Tizon” from the east-northeast, and “Rio Sonaca o de Hila” from the east. Another map, like the 1695-1696 map drawn to illustrate a biography of the martyred Padre Francesco Saverio Saeta, is from 1696-1697 (Burrus’s Plate IX, between pp. 40/41), “unknown until modern times”, delineates only the lands bounding the middle part of the supposed strait. There, “Parte de la California” is separated from the mainland by “Mar de la California o Mar Vermejo”. The prominent embayment on the eastern side of the strait receives only “Rio Grand del Coral” (the Gila River) from the east. This second map, in the “Central Jesuit Archives”, is also known for Kino’s sole representation of human figures, Padre Saeta being killed by Natives. By 1701, Kino had seen for himself that only the Río Colorado divided the landmass at the head of a marine gulf. [See listings for [Kino](#).]

Allardt, Hugo

- NO DATE 25.1670 **Americæ. Hugo Allardt Excudit Inde Kalver straet inde Werrelt Kaert.** ("Velde Schulp".) [In Latin.]
 Caption: **Nova totius Americæ sive Novi Orbis Tabula, Auct Hugo Allardt.**
 ► The island, "California", is separated from "Nova Granada" by a strait (not labeled). Midway on the east side of the strait three rivers (none labeled) arrive from the north and north-northeast: a small river into a large north-trending embayment; a significant river, with twin headwaters near "Rey Coromedo"; and a small river; the last two rivers arrive in adjacent, small embayments.

Alzate y Ramirez, Josef Antonio de

WHEAT I:149 [with two-page illustration between pp. 86/87]

- 1768 25.664 **Nuevo Mapa Geográfico de la América Septentrional, Pertenciente al Virreynato de Mexico: Dedicado á los Sabios Miembros de la Academia Real de las Ciencias de Paris por su mui rendido Servidor y Capellan D. Josef Antono de Alzate y Ramirez. Año de 1768.** ("Se hallará en Madrid, calle de Atocha, frente la casa de los Gremios.") ("Publicado bajo el privilegio de la Academia Real de las Ciencias de Paris.") [In Spanish.]
 ► "R^o Colorado ó del Norte, cuyo origen se ignora" is depicted between the head of "Golfo de California" and a part of the map that is effectively blank, showing only various isolated mountainous areas. "Rio Gila" is shown as a tributary from the east. Southwest of that confluence is drawn a short reach of a river that is implied by its proximity to connect with the Colorado, with the label, "R^o Amarillo de que dieron noticia los naturales al P^e Kino, año de 1702."
 Philip Lee Phillips, in the catalog of the Library of Congress's Lowery Collection (Woodbury, 1912, ITEM NO. 1.375 in Volume 1/Part B of THE GRAND CANON), notes (p. 349), "Another impression in this collection is identically the same, with the exception that it has not in the border 'Se hallará en Madrid . . .'" (ellipsis is part of quote).
 Wheat (1957, p. 218) notes: "Another copy, reengraved in Paris by Dezauche [see ITEM NO. 25.175], has some curious errors. For example, on the original Madrid edition the present Colorado River is labeled 'Ro. Colorado ó del Norte, cuyo origen se ignora.' On the French copy this appears as Rio Colorado, ô del Nortecuio Origen Seignora.""
- 1768 25.175 **Nuevo mapa geographico de la America Septentrional, perteneciente al Virreynato de Mexico.** Paris: Chez Dezauche, 1 sheet. ("Publié sous le Previlége de L'Académie R^{le} des Sciences de Paris".) [In Spanish.]
 ► The Río Colorado enters the head of the Gulf of California.
 See ITEM NO. 25.664 (above) for additional remarks.

Anville, N. N. [Anbile, N. N. [pseudonym]] (Middendorff, Gottfried Bernhard)]

WHEAT I:136 [as "Ambile"]

- 1757 25.1147 **Pimeria Alta con los Rios Colorado y Gila Segun las Observaciones mas recientes retratacia por Don N. N. Anville.** [In Spanish.]
MANUSCRIPT, Archivo General de Indias, MP-MEXICO,206BIS; digitized online at <http://pares.mcu.es/ParesBusquedas20/catalogo/description/21050> (©MECD. Archivos Estatales (España)).
 • As a manuscript this would not be cited in this Cartobibliography, but it is of importance in the history of the Southwest due to its early and unusual focus on the lower reaches of the Gila and Colorado Rivers.
 ► Below the confluence of "Rio Colorado" and "Rio Gila", the river bifurcates before rejoining at the head of the Gulf of California (not labeled). of additional

interest is the portrayal of “Rio de la Assumpcion”, a northerly tributary to the Gila labeled between the Gila and the confluence of “Rio Salado” and “Rio Verde o de Buena Esperanza”, and that the area between these last two is labeled “Moqui”, lying far to the east of the Colorado. Along the Colorado only “Yumas” is noted.

Arias, Benito (Montano)

SHIRLEY 125

- 1571 25.396 **Biblia Sacra, Hebraice, Chaldaice, Graece & Latine . . .** Antwerp. [1572.] [In Latin and Hebrew.]
- ▶ The North American continent lacks labeling except for “19.” on its western side, which keys to a legend, “Ophir” (also in Hebrew). The Gulf of California is prominent, into the head of which flow two parallel rivers from the northeast, from across much of the continent.
- Shirley notes (p. 150) that this map is included in “Montano’s Polyglot Bible”.

Arnoldi, Arnoldo di

- NO DATE 25.1484 **America.** [shown as “**AMERICA.**” (note “ME” looking like a ligature)]. [In Italian.]
- Library of Congress catalog record gives the imprint (in square brackets), [Siena, Italy: Mathej Florimj for. Senis, 1600?] and adds, “Described in: The mapping of North America / Philip D. Burden. 1996. p. 165.”
- ▶ The peninsula, “Clifornia” [sic] is separated from “Nuoua Granada” by the Gulf of California (not labeled, although the southern tip of the peninsula is labeled “C. Vermeio”). The head of the northwest-trending gulf twists to the north-northeast, where it receives from the northwest a river with two forks (the western one, not labeled, passes by a place labeled “Axa”, while the eastern fork, “Totontec flu.” that comes from the northeast, and the headwater of which is separated by a mountain range from “Sette città”; and the head of the gulf also receives from the east-northeast “R. Hermoso”, the headwaters of which are “Teguas rio” from the east and a tributary from the north heading in a lake surrounded by the “Sette città”, and en route to the gulf it passes “Ceuola”.
- 1600 25.442 **Descrittione vniversale della terra con lvso del navigare, nvovam accrescivta . . . Arnoldo di Arnoldo Fiamengo.** Senis. [In Italian.]
- ▶ The North American continent is labeled “Mexicana”. “Mar Vermeio” is depicted with several tributaries at its head. In the region of interest to this Cartobibliography are the labels “Tontontec” and “Cciuola” [sic] (other labels are illegible at the scale of reproduction in Shirley).
- Shirley’s two-page Plate 182 displays the ten-sheet map, but that “this example is a re-issue by Petrucci in the 1640s.”
- 1601 25.443 **Vniversale descrizione del Mondo . . . Arnodo [sic] di Arnoldo Fiamengo.** Siena. [In Italian.]
- ▶ The North American continent is labeled “Mexicana”. Numerous tributaries flow to the Gulf of California. In the region of interest to the bibliography is the label “Totontec” (other labels are illegible at the scale of reproduction in Shirley).

Arrowsmith, A. [Arrowsmith, Aaron]

- 1790 25.2276 **Chart of the World on Mercator's Projection. Exhibiting all the New Discoveries to the present Time: with the Tracks of the most distinguished Navigators since the Year 1700, carefully collected from the best Charts, Maps, Voyages, &c. Extant. And regulated from the accurate Astronomical Observations, made in three Voyages, Performed under the Command of Captⁿ James Cook, in the Years 1768, 69, 70, 71. ___72, 73, 74, 75. ___76, 77, 78, 79, & 80. Compiled and Published by A. Arrowsmith, Hydrographer To His Royal Highness the Prince of Wales.** ("London, Published acc^g to Act April 1st, 1790, by A. Arrowsmith N^o 10 Soho Square.")
- ▶ The western part of North America is essentially blank, with the exception of, in the northern portion of today's United States and southern Canada, a single mountain range, "Rock Mountains", from which conjecturally flow river systems east and west. From the southern tip of this range the "Rio Colorado or North R." follows a straight course south-southwest to the head of the "Sea of Cores or Gulf of California". The "Coral or Thread R." (labeled "Hila R." in an upper course) is a tributary from the east. Begining at that confluence the Colorado bifurcates around "Presentation I.", the two channels seeming to arrive at the gulf independently.
- 1798 25.635 **Chart of the Pacific Ocean drawn from a great number of printed and ms. journals by A. Arrowsmith, geographer, N^o 24 Rathbone Place, London, 1798.** London: A. Arrowsmith. ("Engraved by T.Foot *Weston Place Battle Bridge*".) 1 map on 9 sheets.
- Ornamental title displayed on upper-right sheet. Ornamental dedication on upper-left sheet: "To Joseph de Mendoza Rios Esq^r F.R.S. &c.&c. This Chart of the Pacific Ocean Is Dedicated, In testimony of Respect and Esteem, by His much Obliged Humble Serv^t A. Arrowsmith."; "George Allen, sculp." Each sheet includes notation, "London: Published Oct^r 1st 1798 by A. Arrowsmith. N^o 24 Rathbone Place." (or variant).
- ▶ Portolan chart of the of the Pacific basin, including routes and dates of explorations. "R. Colorado" is depicted at the head of the Gulf of California.
- NOTE:* This is the chart to which Lt. R. W. H. Hardy, R.N., referred during his 1826 survey of the mouth of the Colorado River (refer to Hardy, 1829, *ITEM NO.* 25.634, in Section 2 of this Cartobibliography).
- 1798 25.636 **Reduced chart of the Pacific Ocean from the one published in nine sheets by A: Arrowsmith.** [London]: [A. Arrowsmith]. ("London. *Published October 1st 1798, by A:Arrowsmith. N^o 24 Rathbone Place.*") ("*The Writing Engraved by George Allen.*") 1 sheet.
- Simplified, smaller version of the chart by Arrowsmith (1798, *ITEM NO.* 25.635).
- ▶ "R. Colorado" is depicted at the head of the Gulf of California.

WHEAT I:120

- 1744 25.1306 **Carte de l’Amerique Septentrionale Pour servir à l’Historire de la Nouvelle France. Dressée par N.B. Ing. du Roy, et Hydrog. de la Marine. 1743.** (“Dheulland Sculp.”) [In French.]
In: Charlevoix, P. De [Charlevoix, Pierre-François-Xavier de], *Histoire et description generale de la Nouvelle France, avec le journal historique d’un voyage fait par ordre du Roi dans l’Amérique Septentrionale* [sic]. Tome Premier. Paris: Chez Pierre-François Giffart. M DCC XLIV.
 Map faces p. 1.
 ▶ The entire west coast of North America, including the Baja peninsula, is labeled “Californie”; “Mer Vermeille” separates the somewhat inflated peninsula from “Nouveau Mexique”, with the Sonoran area at the head of the gulf labeled “Nouvelle Navare”. “Rio Colorado” follows a course from headwater southward to the confluence of a less significant river from the east (not labeled; the Gila River) before turning southwestward for a distance before bifurcating to arrive at the head of the gulf as two independent, south-flowing streams. North of the Colorado headwater area is the label, “Ici doivent etre les Pays de Quivira et de Taguaio dont on na aucune Connoissance Certaine”.

Bæck, E. [Baeck, Elias]

MCLAUGHLIN 174

- 1710 25.1621 **l’Amerique Septentrionale.** (“E. Bæck á.H. sculps. et exc. A.V.”) (“C.P.P.S.V.”) [In French; volume title-page in German and French.]
In: *Atlas geographicus, oder, Accurate Vorstellung der gantzen Welt bestehend in denen vornehmsten und northwendigsten universal und particular Landkarten nach dem berühmten französischen Geographo Hubert Lailot und anderere vornehmer Männer . . .* Sachs-Weimar: E. Baeck, 2 leaves, 26 maps.
 Frontispiece to volume signed “Elias Baeck à H. sculps. et exc. Aug. Vind.”
 Banner at top of map, regarding the discovery of America, in German and French.
 ▶ “Ile Californie” is separated from “Nouveau Mexique ou Teguaio” and “Nouveau Mexique ou N. Cienade Marate” by “Mer Vermeille”. Midway on the east side of the strait two rivers (not labeled) arrive from the northeast; one directly to the strait, the other to the head of the northwesterly lobe of a peculiarly shaped embayment.

[Baegert, Jacob]

- 1773 25.2499 **California per P. Ferdinandum Consak S.I. et alios.** *In:* *Nachrichten von der Amerikanischen Halbinsel Californien: mit einem zweyfachen Anhangfalscher Nachrichten. Geschreiben von einem Priester der Gesellschaft Jesu, welcher lang darinn diese letztere Jahr gelebet hat. Mit Erlaubnuß der Oberen.* Manheim: Churfüstl. Hof- und Academie-Buchdruckerey, fold-out map facing p. 1. [In Latin; volume in German.]
 ▶ The peninsula, “Californii [sic] is separated from “Pars Regni Mexicani” by “Mare Californiae”. “Rio Colorado” arrives at the head of the gulf from the northeast then turns southward into the gulf, where on either side of the head is labeled “arenæ” [sand] and the northwestern shore labeled “Limus” [forest]. On the eastern side are portrayed “Montes S. Clare” in “Pimeria”, and the entire northwestern side is labeled “Terra incognita”. “Gila-fluv.” meets the Colorado from the east above the

head of the gulf, near the northern limit of the map. On the map are depicted the exploratory routes of Padre Consag; the route labeled "1746" reaches into the head of the gulf and the mouth of the Colorado.

Bakewell, Thomas

- 1748 25.1819 **America a new most most exact Map laid down according to the observations communicated to the English Royall Society the French Royall Academy of Sciences and those made by the latest travellers, to this present Year 1748.** [*publisher's information is interjected here*] **Printed & Sold by Tho:Bakewell Next the Horn Tavern in Fleetstreet** [*continuation of title caption:*] **in which are explained all the Islands &c belonging to France, Spain, Holland, England &c. also the several Tracts made by the Galleons and Flota. with an account of their Sailing, and of the Course of the English Ships to and from jamaica, and all our Plantatians** [*sic*] **in the Continent of America. with an exact View of the takeing of Porto Bello by Admiral Vernon, exactly engrav'd from a drawing sent over by M^r Tho Woodwell aboard one of the Ships in the said expedition.** ("London. Where all Country Chapmen may be Furnish'd with the newest series of a Sheet Maps [*sic*] & Prints, Royal Sheet, Large & small Wood Cuts, Quarries, Lettrys &c. at the lowest Prices.")

► This map was seen in an unsatisfactory resolution online, in two sources. The island, "California", is separated from "Nova Mexicana Nova Granada" and "Regn Mexicana" by "Mare Vermeio olim Mare Rubrum". Midway on the east side of the strait is a very large embayment, which itself has two additional embayments on its eastern side. Into the head of the prominent embayment arrives a river ("R. del [Tison?]") from the north-northeast, which has three headwater forks. A short river ("R. Coral?") arrives from the northeast into the northerly of the small embayments on the east side.

- "Californie" is a peninsula, separated from "Nouv^{le} Navarre" by the Gulf of California (not labeled). "R. Colorado ou les Martirs" arrives decidedly from the northeast at head of the gulf after having received "R. des Apostres" (Gila River) from the east. Downstream from that confluence the river bifurcates before rejoining at the gulf; in between is labeled "I. de la Presentation" [most maps that use the label use the Spanish "Presentacion"]. North of the river a vast area is blank, with the label, "On peut placer ici les provinces de Quivira et Tegouaio dont on n'a acunes connoissances certaines".

Bellin (S.) [Bellin (Sieur)] [**Bellin, Jacques Nicolas**] [see also "B., N."]

Bellin Ingenieur de la marine 1764.*
- The peninsula, "Californie", is separated from "Nouv^{le} Navarre" by the Gulf of California (not labeled). A river (not labeled) arrives at the head of the gulf on a convoluted course from a mountainous region in the northern part of "Nouv.^{le} Mexique".

Bennett, R. [**Bennett, Richard**]

- 1759 25.1826 **America Drawn from the latest and best Observations, Describing all the European Settlements &c By R. Bennett Engraver.** ("Engraved for the Grand Magazine Printed for R. Griffiths in Paternoster Row 1759.") *Grand Magazine of Universal Intelligence*, 2 (January): [McLaughlin notes that binder's instructions indicate facing p. 25, but copy in New York Public Library has this map facing p. 57].
- The island, "California" (also labeled "New Albion" at the northern end), is separated from "N. Mexico" by "G of California or Red Sea". Midway on the east side of the strait there are several rivers (north to south): "R Guia" from the east-northeast; an unlabeled river from the northeast; "R d Angouchi" from the northeast, which heads in an area labeled "Great Tegouaio" (north of which is labeled "Parts Unknown") and which enters a long embayment; and an unlabeled river from the east that enters a broad embayment; south of this river is an unlabeled river from the southeast, with two headwater forks, which passes by "Casagrande".
-

Berey, Nicolas

- NO DATE 25.1481 **Carte de l'Ameriqve Corrigéé, et augmenteé dessus toutes les aultras cy deuant** ["eé" thus]. [Paris.] [1661?] [In French.]
 ► The northwestern part of North America is occluded by an inset map, a polar projection of the northeastern part of the continent. The west coast of the continent, from the tip of the Baja California to the high latitudes, progresses along a straight line to the northwest. The peninsula, "Californie", is separated from "Neveve Granada" by "La Mer Vermeille". The head of the northwesterly trending gulf twists to the northeast. Four rivers are received at the head of the gulf: 1) an unlabeled river from the west, which bifurcates before reaching the gulf; 2) a significant river from the northwest that comes from a region labeled "Tontonteach", to which there are two tributaries, one (not labeled) from the north-northeast, and "Totonteach fl." from the northeast; 3) a river (not labeled) from the northeast heading near "Ceuola" [*sic*]; 4) "R. Coromara" from the east-northeast, along which is "Cevola" [*sic*], and into which from the north is a short tributary from a large lake around which are seven symbols for habitations and the label, "Sept Villes".
NOTE: The river "Coromara" was assumed by contemporary geographers to be the same as that of Marco Polo's river in China.
- 1650 25.1400 **Charte Vnuerselle de Tovt le Monde. A Paris Chez Nicolas Berey, Anlvminevr de la Reyne Av Bovt dvPont Nevf Proche les Avgvstins av Devx Globes. 1650.** ("Hen' le Roy fecit" [Henri le Roy].) ("A haut et puissant Seigneur Messire Henry Auguste DeLomenie Comte de Brienne et de Montbron Baron de Boussac et de Pougy Con^{er} du Roy en ses Conseilz et Secretaire de ses Commandemens.") [In French, with mixed labeling in Latin and Spanish.]
 ► In "America Septentrio" [*sic*], "California" (with the lower extremity of the peninsula labeled "C. California") is separated from "Noua Mexico" and "Nova Hispania" by "Mare Vermeio". The gulf is shown oriented Northwest-Southeast, with at its head a broad multiple-bayed extension to the east. Five rivers converge at this crenulated head to the gulf. Two principal rivers (not labeled), each with headwater forks, converge from the northwest and the north, respectively. The northwesterly river comes from an East-West mountainous region labeled "Sierra Nevada Nivosi Montes" and an area labeled "Tolm. R." The northerly river comes from "Suala mons"; between its upstream branches are shown "Septem Citta". The third river (not labeled), comes from the northeast, with one of its branches coming from a lake; adjacent to the river is the label "Braco de mucho Flores". The fourth and fifth rivers, both small, come from the east; between them is the single label "R. del Aguada". "Cevola" is shown as a place between the third and fourth rivers.
NOTE: A cartographical device to suggest an area unexplored is the note of Brazos de Miraflores (more correctly written), which may imply a possible extension of the gulf that, upon continued exploration, would indicate that the gulf is in fact a strait.

Bertius, P. [Bertius, Petrus] [Bert, Pieter de]

WHEAT I:37

- 1624 25.1274 **Carte de l'Ameriqve Corrigéé, et augmenteé, dessus toutes le aultres cy deuant faictes par P. Bertius.** ["eé" thus] [In French.]
 ► "La Mer Vermeille" separates the peninsula "Californie" from "Neveve [*sic*] Granada". The head of the gulf receives three rivers (from west to east): a principal stream (not labeled) with three headwater areas and a place name, "Axa" (a tributary to this river from the northeast is labeled "Totonteach fl."); a relatively short stream (not labeled) from the northeast an area labeled "Ceuola"; and a river (not labeled) with headwater forks from the northeast, along which is a place name, "Cevola" (the northerly branch of this river comes from an unlabeled lake). The area at the head of

the gulf, between the principal and central rivers, is labeled “B. de buena guia”, and the area between the central and eastern rivers is labeled “Abacus ou Granada”.

SHIRLEY 138

- 1578 25.402 **[Map with no title.]**
In: A trve discovrse of the late voyages of discoverie : for the finding of a passage to Cathaya, by the Northvvest, vnder the conduct of Martin Frobisher generall : deuided into three bookes : in the first wherof is shewed, his first voyage : wherein also by the vway is sette out a geographicall description of the worlde, and what partes thereof haue bin discovered by the nauigations of the Englishmen : also, there are annexed certayne reasons, to proue all partes of the worlde habitable, with a generall mapp adioyned : in the second, is set out his second voyage, vvith the aduentures and accidents thereof : in the thirde, is declared the strange fortunes which hapened in the third voyage, with a seuerall description of the countrey and the people there inhabiting : with a particular card therevnto adioyned of Meta Incognita, so farre forth as the secretes of the voyage may permit. London: Imprinted by Henry Bynnyman, [16], 52, 39, 68 pp., 2 plates, map.
 ▶ The map depicts “America” with uncertain western shores but which includes a markedly stylized Gulf of California.

Bew, John

WHEAT I:191

- 1782 25.1179 **A Map of Mexico, or New Spain, from the latest Authorities.** London: John Bew. (“J. Lodge Sculp.”)
 ▶ “California” is separated from “New Navarre” by “Vermilion Sea or Gulf of California”. “Rio Colorado” is depicted from the head of the gulf a short distance into “New Mexico”. Between the confluence of “Rio de Apostes” (Gila River) and the gulf, the river bifurcates before rejoining at the gulf.

Bisselii, Joannis

- 1698 25.497 **[No title.]**
In: Argonauticon Americanorum, sive historiae periculorum Petri de victoria ac sociorum ejus. Libri XV. Gedani: Prostant apud Ægidium Janssonii à Waesberge, xxxvi, 405, [15] pp. **[In Latin.]**
 ▶ The frontispiece map shows the peninsula, “California”, separated from “Hispania Nova. Two rivers (not labeled) enter the head of the gulf, one from the northwest and the other from the northeast.

Blacus, G. I.

- 1666 25.1485 **[Gores for a 16.3-cm globe.]** (“Parisus apud G. Iollain sub signo vrbis Coloniae 1666” [Gérard Jollain].) (“auct: G·I·Blacus.”) **[In Latin.]**
 This is the same as the gores by Oterschaden (no date [ca. 1603], **ITEM NO.** 25.446).
 ▶ The gores are individually numbered. The area of interest to this Cartobibliography appears on gores 8 and 9. The western part of North America is labeled “Hispania Nova”, although the distance between “Sinus S Michael” (the Gulf of Mexico) and the west coast is severely foreshortened with no indication either of California or a Californian gulf (or strait), although “Temistitan” [*sic*] is noted along the southwestern coast and just beneath that label is a small, peculiar, bulbous

embayment oriented east-west. The west coast is essentially a straight north-south coastline, with the island “Zipangri” just off the southwestern coast, opposite “Temistitan”. Three rivers, one of them a large one, converge on the western side of the Gulf of Mexico, none of which can be convincingly made to be even imaginatively any of the rivers of the Colorado basin.

Blaeu ³⁹ [Blaew] [Blaeuw]

The label “Totontec” is noted; but other labels are illegible at the scale of reproduction in Shirley. |
|---------|--------|---|

³⁹ It has not been practical to follow through on many replicated editions of maps. It shall be sufficient to mention here the compound of editions based on inherited plates and creative editions of the genealogical and cartographical business lineage of Gerard Mercator, Rumold Mercator, Jodocus Hondius, Hendrik Hondius, and Jan Jansson, superseded in force by the family of Joan, Cornelius, and Willem Blaeu. Another familial group among cartographers cited herein are the Sansons—Nicolas Sanson d’Abbeville and his grandson, Pierre Moullart-Sanson, who was the uncle of Gilles Robert de Vaugondy. Users will find some of their works cited herein, but the listings of course are not comprehensive.

- SHIRLEY 300
- 1619 25.470 **[Nova et accurata totius terrarum orbis tabula ex optimis quibusq. in hoc genere auctorib. desumpta. et duob. planisphaeriis delineata, auct. Gul. Ianssonio 1619.]** Amsterdam. [In Latin.]
 Shirley (p. 324) notes that the map illustrated in his Plate 232 is the only known copy of this world map, but “which was dissected for mounting in bound form in 1645”. The title and original date “can be deduced from a later state of the map dating from 1645-46”.
 ► The Gulf of California is portrayed with numerous tributaries at its bulbous head.
- WHEAT I:40
- 1631 25.1277 **America nova Tabula. Auct: Guiljelmo Blaeuw. [In Latin.]**
Not seen for this Cartobibliography. However, Wheat notes (Volume I, p. 193) about the map by Merian (1638, ITEM NO. 25.1276; WHEAT I:43), “This map seems to have been taken directly from 1631–Blaeuw.” The chorographical notes for the Merian map are as follows: ► The peninsula of “California” is separated from “Nova Granada” by “Mar Vermeo”. At the head of the gulf a profusion of rivers enters: a river (not labeled) from the west-northwest, which bifurcates before reaching the gulf; “Axe flu.”, which reaches the gulf from the northwest, en route receiving two tributaries from the northeast, the second one labeled “Tontonteach”; and two rivers (not labeled) from the northeast, the more southerly of the two with headwater forks with the northerly branch coming from a lake (the area between these two southwesterly-flowing rivers is labeled “Cevola” and “Abacus nunc Granada”, with a place name at the confluences of the branches labeled “Ceuola”).
- 1662 25.2240 **Americæ nova Tabula. Auct: Guiljelmo Blaeuw.** (“Cum privilegio decem annorum.”) [In Latin.]
In: America, qvæ est geographiæ Blavianæ pars qvinta; liber vnvs. Volvmen Vndecimvm. Amstelædami, Labore & Sumptibus Ioannis Blæuv, M DC LXII.
 ► The peninsula of “California” is separated from “Nova Granada” by “Mar Vermeio”. The bulbous head of the gulf is shown with stippling (mud flats?) where is labeled “B. d. buena guia” and into which four river systems arrive (from west to east around the head): an unlabeled one from the west-northwest, which bifurcates before reaching the gulf; a major river system from the northwest, of which its main stems are labeled “Axe flu.” and “Tontonteach”; an unlabeled minor tributary from the north-northeast; and “R. Coromara” (Gila River) from the northeast. Into the “Coromara” river is a tributary from a large lake around which are labeled “Septem cita”, just south of which is a place name, “Cevola”, and west of which is a regional label, “Cevola”.

Blagrove, John

- SHIRLEY 191
- 1596 25.426 **Nova Orbis Terrarvm Descriptio [In Latin.]**
In: Astrolabium vranicum generale : a necessary and pleasaunt solace and recreation for nauigators in their long iorneying, containing the vse of an instrument or generall astrolabe : newly for them deuised by the author, to bring them skilfully acquainted with all the planets, starres, and constellacions of the heauens, and their courses, mouings, and apparences : called the (Vranicall astrolabe) . . . : fraught also by new deuise with all such necessary supplements for iudiciall astrology, as Alkabitius & Claudius Dariottus haue deliuered by their tables : whereunto for their further delight he hath annexed another inuention, expressing in one face the whole globe terrestriall, with the two great English voyages lately performed round about the world. [London?]: Printed by Thomas Purfoot, for William Matts, [68] pp.

► A north polar projection of the globe, which depicts a decidedly broad Gulf of California, at the head of which a network of tributaries converge.

Blome, Richard

MCLAUGHLIN 42 [State 3]

1682 25.1635

A New Mapp of America Septentrionale Designed by Moüsieur Sanson Geographer to the French King, and Rendred [sic] into English, and Illustrated by Richard Blome. By his Majesties Especiall Command. London. Printed for Richard Blome. ("To the R^t Hon^{ble} Anthony Earle of Shaftesbury Baron Ashley of Wimbourne S^t Giles, and Lord Cooper of Pawlet. This Mapp is most humbly D.D. by R.B.") ("Francis Lamb Sculp".)

In: Cosmography and geography : in two parts, the first, containing the general and absolute part of cosmography and geography, being a translation from that eminent and much esteemed geographer Varenius : wherein are at large handled all such arts as are necessary to be understood for the true knowledge thereof : the second part, being a geographical description of all the world, taken from the notes and works of the famous Monsieur Sanson, late geographer to the French King : to which are added about an hundred cosmographical, geographical and hydrographical tables of several kingdoms and isles of the world, with their chief cities, seaports, bays, &c. drawn from the maps of the said Sanson : illustrated with maps. London: Printed by S. Roycroft for Richard Blome.

► The island, "California", is separated from "New Grenada" by "Sea of Vermejo". Midway along the eastern side of the strait are two embayments, the northern one of which recieves "R of Anguchi" (though the river-proper is not drawn), and the southern one of which is bilobed, the northern lobe receiving "R del Tecon" from the north-northeast (its headwaters are in two forks), the southern lobe receiving "R of Coral" from the northeast. Mountains separate the river Tecon from "Zuny", "Cibola", and "Mogui" to the east.]

SHIRLEY 340

1636 25.484

Novvelle et exacte description de la terre vniverselle selon les auteurs modernes plus apromiez a la quelle a este ad ioute plusieurs obseruations pour l'intelligence dicelle par IB. Paris: Chez Iean Boisseau. [In French.]

► "California" is depicted as an island. The Gulf of California (not labeled), intimated to be a strait, interestingly depicts several tributaries converging from the north and northeast at the head of the gulf. What seems to be either a prominent tributary, or actually the gulf itself extending northward from the northwestwardly trending strait, is labeled "R. d. Coral" to the east of which are the "Pueblos de Moquis".

1646 25.687

Novvelle et Exacte Description de la Terre Vniverselle Selon les Auteurs Modernes plus Aprouuez A la quelle a este ad Ioute Plusieurs Obseruations Pour L'intelligence Dicelle par IB. ("A Paris Chez Iean Boisscau en Liste du pallais sur le qay [sic] qui Regarde la megisserie a la Fontaine de Iounene 1646".) ("Dd. AM Monsieur Priandy Con.^{er} de Residant de S A de Mantoue Pres du Roy".) [In French.]

► "California" is depicted as an island. The Gulf of California (not labeled), intimated to be a strait, interestingly depicts several tributaries converging from the north and northeast at the head of the strait. What seems to be either a prominent tributary (or perhaps in some fashion actually the gulf itself) extending northward from the northwestwardly trending strait, is labeled "R. d. Coral", to the east of which are the "Pueblos de Moquis".

Boisseav, Iean [Boisseau, Jean]

SHIRLEY 351

- NO DATE 25.490 **Novvelle Description de toute la terre vniuerselle en 2. hemispheres mōtrant les 2. polles du Monde avec unjndex par le moyen duquel ce peut facilement congnoistrela longitude eleuations distances des lieux, differences des climatz, parallels et meridiens ou sont aussi marquez les lieux des solstices et equinoxe et autres obseruations pour seruir d'introduction à la Geographie, le tout en françois pour l'vtilité publique— A Paris chez Louis Boißeuin a la rue S^tIaques a limage S^{te}Geneuiesue proche S^tSeuerin Auec priu du [sic].** ("A Paris, Chez Iean Boisseav, Enlumineur et laueur de Cartes Marines aubout du pont debois pres le Palois, alen seigne du Solleil leuant.") ("A Paris Chez I[*two or three characters illegible*].") ("Blanchin fc." [with monogram, thus].) [1640?] [In French.]
- ▶ "Californie" is separated from "Nouveau Mexico" by "Mer Rousse", which is a strait depicted without definite northern outlet and likewise California is without its northern extremity. On the eastern side of the strait a single river enters; it is in turn the contribution of two rivers, one a straight-line continuation to the northeast, the other a tributary from the north that is labeled "R. de Coral". To the south is another, large river (not labeled) entering the strait from a lake in the interior, which is recognizable as early depictions of the Rio Grande.
- NO DATE 25.2329 **Nouvelle description de l'Amérique.** *In: Tresor des Cartes Geographiques des Principaux Estats de L'univers.* Ce Vend A Paris, Chez Iollain rue S.^t Jaque a la Ville de Cologne. [In French.]
- Only one map is dated in this compilation, "Rvssie Auec ses confins 1659".
- ▶ The peninsula, "Californie", is separated from "Marata" by the Gulf of California (apparently not labeled; heavily filled by hachures). Two rivers arrive at the head of the gulf: a short river from the north-northwest, passing by a place-name "Tontontec", and a larger river from the north; the latter river receives a tributary (or perhaps it is the main stream) from the east, which passes through a large lake into which in turn two rivers arrive from the northeast and southeast, at which are shown "7 Citta".

Bolton (M!) [Bolton (Mister)] [Bolton, Solomon]

WHEAT I:127

- 1750 25.1173 **North America. Performed under the Patronage of Louis Duke of Orleans, First Prince of the Blood; by the Sieur d'Anville. Greatly Improved by M^r Bolton. Ingrav'd by R. W. Seale. MDCCL.** ("Gravelot delin. Walker sculp.") [No imprint.]
- ▶ "California", a peninsula, appears at the extreme western edge of the map, partly overlapping the border. It is separated from "New Navare" by "Californian Gulf". At the head of the gulf is the mouth of "R. Colorado de los Martyres", north of which is the tributary, "Grand River of the Apostles" (Gila River), from the east. Downstream from that confluence the river is bifurcated before rejoining at the gulf; in between is the label "I. Presentacion".
- 1752 25.1174 **North America. Performed under the Patronage of Louis Duke of Orleans, First Prince of the Blood; by the Sieur d'Anville. Greatly Improved by M^r Bolton. Engrav'd by R. W. Seale. MDCCLII.** ("Gravelot delin. Walker sculp.") [London]: Printed for John and Paul Knapton.

Bonne (Mr.) [Bonne (Monsieur)] [**Bonne, Charles-Marie Rigobert**]

WHEAT I:187

- NO DATE 25.272 **Amérique Septentrionale Par M. Bonne, Ingénieur-Hydrographe de la Marine.** [*In French.*]
In: Raynal, Guillaume, *Atlas de toutes les parties connues du globe terrestre, dressé pour l'histoire philosophique des établissemens et du commerce des Européens dans les deux Indes.* [Genève?]: [J. L. Peelet?], Plate 25. [*Volume ca. 1780? Other dates, imprints known.*]
 ▶ At the head of "M. Vermeille" is shown "R. Colorado" and, to the east of it, an unlabeled smaller tributary. A short distance up the Colorado from the gulf is shown an area that has the appearance of representing a lake, into which the Colorado flows from the north and, from the east, "R. de los Apostolos" (Gila River).
 On Plate 28, at the head of "Mer Vermeille" is shown "R. Colorado ou des Martirs". The area suggestive of a lake in Plate 25 is shown as separated streams, labeled "I. de la Presentation" [most maps that use the label use the Spanish "Presentacion"], converging at the head of the gulf, and the confluence of "R. de los Apostolos" is shown north of the bifurcate stream.
- NO DATE 25.2144 **Le Nouveau Mexique avec la partie septentrionale de l'ancien, ou de la nouvelle Espagne. Par M^r. Bonne, Ingénieur-Hydrographe de la Marine.** ("Andre' sculp.") ("Liv. VI. et X.") ("N^o 28.") [*In French.*]
 Variant of Plate 25 (see above).
In: Raynal, Guillaume, *Atlas de toutes les parties connues du globe terrestre, dressé pour l'histoire philosophique des établissemens et du commerce des Européens dans les deux Indes.* [Genève?]: [J. L. Peelet?], Plate 25. [*Volume ca. 1780? Other dates, imprints known.*]

- 1793 25.2052 **Carte Générale de l'Amérique Septentrionale. Par M. Bonne, Ingén^r. Hydrographe de la Marine. A' Venise Par P. Santini 1790. [In French.]**
In: Grenet (M. l'Abbé) *Atlas portatif a l'usage des colleges, pour servir a l'intelligence des auteurs classiques : dédié a l'Accademie de Padoüe.* [Maps contained therein dated 1788-1793.]
 ► The peninsula "Californie" is separated from "Nouv. Mexique" by "Mer Vermeille". Colorado R." is a simple south-trending stream that, at the confluence of the Gila River (not labeled) coming from the east, turns southwest into a lake-like extension at the northwestern extremity of the gulf.

Bonne, AND Desmarest (Messieurs) [Bonne, Rigobert, AND Desmarest, Nicolas]

- 1787 25.498 **Atlas encyclopédique, contenant la géographie ancienne, et quelques cartes sur la géographie du moyen age, la geographie moderne, et les cartes relatives a la géographie physique.** Paris: Hôtel de Thou, 65 pp., 140 plates. [In French.]
 See plate 117.
- 1788 25.499 **L'Ancien et le Nouveau Méxique, avec la Floride et la Basse Louisiane. Partie Occidentale. Par M. Bonne, Ingén^r-Hydrographe de la Marine. [In French.]**
In: *Atlas encyclopédique, contenant la géographie ancienne, et quelques cartes sur la géographie du moyen age, la geographie moderne, et les cartes relatives a la géographie physique.* [Seconde Partie.] Paris: Hôtel de Thou, Plate 117 [*sic*, 116].
 ► The peninsula, "Californie", is separated from "Nouv^e Navarre" and "Nouv^e Biscaye" by "Mer Vermeille". "Rio Colorado ou de los Martyres" arrives from a blank area of the map northeast of the head of the gulf, where before turning to the south-southwest to meet the gulf it receives an unlabeled, prominent tributary from the east, which is on a headwater labeled "Hila R." Downstream from that confluence the Colorado significantly bifurcates before rejoining at the trip of a northwest-trending gulf.
- 1788 25.2145 **Amerique Septentrionale. Par M. Bonne, Ingenieur-Hydrographe de la Marine.** ("André sculp."). [In French.]
In: *Atlas encyclopédique, contenant la géographie ancienne, et quelques cartes sur la géographie du moyen age, la geographie moderne, et les cartes relatives a la géographie physique.* [Seconde Partie.] Paris: Hôtel de Thou, Plate 31.
 ► The peninsula, "Californie", is separated from "Nouv. Mexique" by "Mer Vermeille". In the fashion by which the rivers were engraved, it is impossible to determine whether "R. Colorado" and "R. de los Apostolos" (Gila River) arrive coincidentally at the head of the gulf, or if they meet and immediately bifurcate before rejoining at the head of the gulf.

Botero, Giovanni

 Cölln: Andree.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

▶ Tributary rivers reach the head of the Gulf of California. The region of interest to this Cartobibliography includes the labels "Totonceac" and "Ceuola". In Shirley the map is attributed to Lambert Andreas.

- 1618 25.1886 **America. [In Latin.]**
In: Le relationi vniversali di Giovanni Botero Benese, divise in sette parti.
 Venetia: Appresso Alessandro Vecchi. . . . Nuouamente ristampate, & ricorrette.
 [Posthumous.]
- ▶ "Mar Vermeio" separates the Californian peninsula from the mainland. At the head of the gulf the entire region is labeled "Totontec Marta", where also "Ceuola" is labeled to the east. The mainland to the east of the gulf is labeled "Nova Hispania". The northern part of the eastern coast of the gulf is also labeled "Totoanteac". Two rivers (not labeled) converge near the head of the gulf, becoming a single stream entering from the north; they drain from a mountainous region.

Bowen, Eman. [Bowen, Emanuel]

WHEAT I:125

- 1748 25.1347 **A New & Accurate Map of Mexico or New Spain together with California[,] New Mexico &c. Drawn from the best Modern Maps & Charts & Regulated by Astron! Observ^{ns} By Eman:Bowen. [No imprint.]**
- ▶ The peninsula of "California" is separated from "Navarr" [*sic*] by "Sea of California". "Rio Colorado or of the North" arrives from the northwest at the head of the gulf, after having followed a course from the northeast from a region labeled "Great Teguaio" but which otherwise is occluded, "conveniently", by the informational note: "California which has been Described and Represented as an Island, even by very modern Geographers, was Discover'd by Father Eusebius Francis Kino a Jesuit, to be a Peninsula between the Years 1698 and 1701 who, together with other Jesuit Missionaries, travelled thither by Land & converted, a great Number of the Natives." "Rio Azul" (Gila River) is shown as a tributary whose confluence with the Colorado is some distance north of the head of the gulf.
- 1752 25.1348 **A New & Accurate Map of Mexico or New Spain together with California[,] New Mexico &c. Drawn from the best Modern Maps & Charts & Regulated by Astron! Observ^{ns} By Eman:Bowen. [No imprint.]**
- This map at least in the area of interest to this Cartobibliography is identical to the 1748 ed. (ITEM NO. 25.1347).
- ▶ The peninsula of "California" is separated from "Navarr" [*sic*] by "Sea of California". "Rio Colorado or of the North" arrives from the northwest at the head of the gulf, after having followed a course from the northeast from a region labeled "Great Teguaio" but which otherwise is occluded, "conveniently", by the informational note: "California which has been Described and Represented as an Island, even by very modern Geographers, was Discover'd by Father Eusebius Francis Kino a Jesuit, to be a Peninsula between the Years 1698 and 1701 who, together with other Jesuit Missionaries, travelled thither by Land & converted, a great Number of the Natives." "Rio Azul" (Gila River) is shown as a tributary whose confluence with the Colorado is some distance north of the head of the gulf.

Bowen, Eman., AND Gibson, John

- NO DATE 25.1830 **An accurate map of North America. Describing and distinguishing the British, Spanish and French Dominions on this great Continent; Exhibiting the Present Seat of War, and the French Encroachments, Also all the West India Islands Belonging to, and possessed by the Several European Princes and States. The whole laid down according to the latest and Most authentick Improvements, By Eman Bowen Geogr to His Majesty And John Gibson**

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Engraver. ("London Printed for Rob^t Sayer opposite Fetter Lane Fleet Street".)
[1755?]

► The northwestern part of North America is occluded by an inset map of the northeastern part of the continent. In the Southwest, only the southern part of the peninsula of "California" is shown by the edge of the map; it is separated from "New Navarr" [*sic*] by "Californian Gulf", of which only its southern end is shown before passing off the map to the northwest. North from there, two rivers are shown passing off the map to the west: "R. Colorado de los Martyres", from the northeast, with a tributary to it from the north; and "R. Grande de los Apostolos or del Coral" from the east, of which three of its headwater tributaries are labeled "R. de Buena Esperanza", "R. Azul or Blue R.", and "R. de Hila or Sonaca". Of additional interest on this map is the even spacing throughout all of the open areas small figures of trees, even in the Southwest.

Also shown in the lower left corner of the sheet is a reproduction of the Kino map of the northern Gulf of California region in English translation (for which see Kino, no date [1755], *ITEM NO.* 25.1468).

- 1776 25.577 **An accurate map of North America. Describing and distinguishing the British and Spanish dominions on this great continent; according to the definitive treaty concluded at Paris 10th Feb.^y 1763 : also all the West India islands belonging to, and possessed by the several European princes and states. The whole laid down according to the latest and most authentick improvements, by Eman Bowen Geog^f: to His Majesty and John Gibson Engraver.**

In: Jefferys, Thomas, *The American atlas: or, a geographical description of the whole continent of America.* London: R. Sayer and J. Bennett.

► In the northwestern quadrant "R. Colorado de los Martyres" and "R. Grande de los Apostolos or del Coral" are depicted flowing westward and converging (off of the map); the upper tributaries of the "R. Grande de los Apostolos" are: "R. de Buena Esperanza", "R. Azul or Blue R.", and "R. de Hila or Sonaca".

Bowles, Carington

- NO DATE 25.1443 **Bowles's New and Accurate Map of the World, or Terrestrial Globe, laid down from the Best Observations and newest Discoveries; particularly those lately made in the South Seas, by Anson, Byron, Wallis, Bouganville, Cook, and other celebrated Circumnavigators: Illustrated with a variety of useful Projections and Representations of the Heavenly Bodies; the most approved Astronomical and Geographical Definitions, Tables, and Problems; With an easy and familiar Explanation of the most curious and interesting Phœnomena in the Universal System. Printed for the Proprietor Carington Bowles, N^o 69 in S^t Pauls Church Yard, London. ("Printed for the Proprietor Carington Bowles, London.") [1780?]**

► The peninsula, "California", is separated from "New Mexico" by "Mar Vermejo". "R. Colorado" arrives at the head of the gulf from the northeast, with headwater in an area labeled "Teguayo". A significant tributary (not labeled) from the east, with numerous tributaries to it, is shown meeting the Colorado midway along its course; the label "Casa grande" indicates that this is the Gila River basin.

- 1783 25.1444 **Bowles's New Map of North America and the West Indies, Exhibiting The British Empire therein with the Limits and Boundaries of the United States. As also the Dominions Possessed in that Quarter, by the Spaniards, the French & other European States. The whole Compiled from the Best Surveys and Authentic Memoirs which have appeared to the Present Year 1783. Printed for the Proprietor Carington Bowles, N^o 69 S^tPauls Church Yard, London.**

► The northwestern part of North America is occluded by an inset map of the northeastern part of the continent. In the Southwest, only the southern part of the peninsula of "California" is shown by the edge of the map; it is separated from "New

Navarr" [*sic*] by "Californian Gulf", of which only its southern end is shown before passing off the map to the northwest. North from there, two rivers are shown passing off the map to the west: "R. Colorado de los Martyres", from the northeast, with a tributary to it from the north; and "R. Grande de los Apostolos or del Coral" from the east, of which three of its headwater tributaries are labeled "R. de Buena Esperanza", "R. Azul or Blue R.", and "R. de Hila or Sonaca".

Bowles, John

- 1740 25.1138 **A map of the world or terrestrial globe in two planispheres, laid down from the Observations of the Royal Academy of Sciences.** ("London Printed for John Bowles at the Black Horse in Cornhill. 1740.")
- ▶ Includes the note, "California was always thought an Island till a Spanish Jesuit in 1701 discover'd it was joynd to the Continent of which the Royal Society received information in 1708." "Albion or California" includes what is the Baja peninsula, and into the head of the Gulf of California (not labeled) flows a single river (not labeled) at a place labeled "N^o S^o de Bonagua". Northwest of the gulf is a moderately sized "Inconu. Gulf"; and the entire region of Albion and "New Mexico" serves as the southern coast of a huge, imaginary gulf labeled "not known but by the Savages", which on its northern side opens to the equally imagined "Straits of Anian".

Brouckner, Isaac

- In:* Brouckner, Isaac, *Nouvel Atlas de Marine Composé d'une carte generale, et de XII cartes particulieres, qui representent le globe terrestre jusqu'au 82^e degré du coté du nord, et jusqu'au 60^e du coté du sud Le tout dressé sur les observations les plus nouvelles et les plus approuvées* Berlin: Approuvépar l'Academie Roÿale des Sciences [1749], sheet "Nō VII".
- ▶ Sea chart, which includes the Gulf of California (not labeled), at the head of which arrives "Rio Colorado ou R. du Nord" from the northeast before turning to the southeast to reach the gulf; a tributary from the east some distance upstream is labeled "R. Bleue", which is the Gila River but borrows a name that usually appears on a tributary stream to it. No interior geographies are shown.

Brietto, Filippo

- 1648 25.2286 **Hoc est P̄vctvm Qvod Inter Tot Gentes Ferro et Igne Dividitvr.** ("A Paris, Chez Mich. van Lochoy, Graueur et jprimeur du Roy pour les tailles douces. demourant rüe S^t Jacques, a la rose blanche couronnée.") ("Inter pag. 98 et 99.") [In French, with map title in Latin; volume title in Latin.]
- In:* Brietto, Filippo, *Parallela geographiæ veteris et novæ.* Parisiis: Sebastiani Cramoisy et Gabrielis Cramoisy.
- ▶ "Californie Isle" is separated from the mainland by a strait (not labeled). Midway on the east side of the strait three rivers (not labeled) arrive from the north-northeast.
- 1648 25.2287 **La Division de l' Ocean dv Noveav Monde.** [In French, with map title in Latin; volume title in Latin.]
- In:* Brietto, Filippo, *Parallela geographiæ veteris et novæ.* Parisiis: Sebastiani Cramoisy et Gabrielis Cramoisy.

► The island, “Californie” is separated from the mainland by “Mer Vermeille”. Midway on the east side of the strait are shown the mouths of two rivers (not labeled).

Briggs, Henry

MCLAUGHLIN 2

1625 25.21

The North part of America Conteyning Newfoundland, new England, Virginia, Florida, new Spaine, and Noua Francia, wth y^e riche Iles of Hispaniola, Cuba, Jamaica, and Porto Rieco, on the South, and upon y^e West the large and goodly Iland of California. The bonds of it are the Atlantick Ocean on y^e South and East sides y^e South Sea on y^e west side and on y^e North Fretum Hudson and Buttons baye a faire entrance to y^e nearest and most temperate passage to Japā & China. (“R: Elstracke Sculpsit”.)

In: Purchas, Samuel, *Pvrchas His Pilgrimes. In five bookes. * * * The fourth, English Northerne Nauigations, and Discoveries: Relations of Greenland, Groenland, the North-west passage, and other Arcktike Regions, with later Rvssian Occvrrents. * * * The Third Part.* London: Printed by William Stansby for Henrie Fetherstone, 1140, [68] pp.

“The Fovrth Booke.”, pp. 699-853. See “Chap. XX. A briefe Discourse of the probabilitie of a passage to the Westerne or South Sea, illustrated with testimonies : and a briefe Treatise and Mappe by Master Brigges” (pp. 848-853, the concluding pages of Book IV, with the map between pp. 852/853 but which two leaves are also enumerated “852” and “853”).

► **MAP:** This map is historical for having been the first in English to portray California as an island (see herein [Note Regarding California as an Island](#) at the beginning of Section 1), despite also being shown as a peninsula on a map elsewhere in this title [see below]). “California” is separated from “Granada” by the strait (not labeled). On the east side of the strait is an embayment into which flow “R. del Tecon” (with headwater forks) and “R. de Corall”; to their east is the label “Pveblos de Moqvi”.

NOTE: “The Fifth Booke.” (pp. 855-1140, “Voyages, and Travels to and in the New World, Called America: Relations of Their Pagan Antiquities And Of The Regions and Plantations in the North and Sovth parts thereof, and of the Seas and Ilands adjacent.”) includes (p. 877) brief remarks on “The Prouince of *Civaloa*” [*sic*] and “California”. There are in Book V a half-page map (p. 857) with caption, “**Hondivus his Map of America.**”, and (p. 871) a large blank space of half a page with caption, “**Hondivs his Map of New Spaine.**” The map of America, in Latin, has the title, “**Americae descrip.**” ► On it, California is a peninsula, with “Mare Vermeilo” separating it from “Nova Granada”. Three rivers are shown entering the head of the gulf; although the western and central rivers are both large streams, only the center one is labeled, “Caramara flu.”

NOTE: The river “Caramara”, or “Coromara”, was assumed by contemporary geographers to be the same as that of Marco Polo’s river in China. McLaughlin indicates also reissued 1643.

*In: Voor-Bereidselen tot de Bybelsche wysheid, en gebruik der heilige en kerlijke historien; Tweede Deel. * * * Door een liefhebber der Joodsch oudheden t saamen gebragt, en met veele Print-verbeeldingen opgehelderd.* Tot Utrecht, By Hermannus Ribbius, Anthony Schouten, Boeckverkoopers. [Ornamental title-page to volume: *Ioodse oudniden, ofte voor-bereidselen tot de Bybelsche wysheid, en gebruyk der heilige en kerklyke historien. II. Deel.*
▶ 1) "Den Aardkloot van water ontbloomt . . ." (p. 909) imaginatively depicts a physiographic presentation of the globe of the earth stripped of water. The projection of "America" (only mountains are drawn, with no physical or political features labeled) shows an immense island of California separated from the mainland by a strait (apparently a deep one according to the pattern of hachure). Midway on the eastern side of the strait there are two narrow embayments; the northern one trends northward, creating to its west a miniature sort of Californian peninsula; the southern one trends east-northeast. 2) "Den Aardkloot nade Zondvloed . . ." (p. 911) depicts the earth after the Noachian Flood, which follows the same base map as the one just described, though with the addition of three islands in the strait, positioned between the two embayments just mentioned.

Cabot, Sebastian

SHIRLEY 81

- 1544 25.377 **[No title.]** Antwerp: [Cabot]. [In Latin.]
 ► A map of the world depicting the Americas in their entirety near the center of the sheet. The southwestern coast of North America depicts an oversized Californian peninsula with two tributaries at the head of the gulf, and a notation that this land was discovered by Herndo Cortes. Adjacent to the two tributaries are labels, thus, "mabubeyo."[?] (on the western tributary) and "Dametes."[?] (eastern tributary), with between them the label "Anconde s: Andres."

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Winship (1896, Plate 48, **ITEM NO.** 2.6973 in Volume 1/Part B of *THE GRAND CANON*), reproduces this map “after Kretschmer”, that gives these three labels as, respectively, “mababeyu”, “Damotel” [*sic*], and “Anconde s. andres”).

Shirley notes (p. 92), “The map also takes into account the explorations by Ulloa in 1539 and Coronado in 1540-42 into the interior of the south-west of the United States.” Compare also a 1769 redrawing of a manuscript map of the Gulf of California originally made by the pilot Domingo del Castillo in 1541, published in Cortés and Lorenzano (1770, **ITEM NO.** 25.2149), which is also [illustrated with the front matter herein](#) (Figure 12, INTRODUCTION p. 45).

This map, attributed to Sebastian Cabot, is the earliest published map to definitively portray the region at the head of the Gulf of California. It is sometimes suggested that Cabot’s Gulf of California is reproduced from the Castillo map; however, while similarities can be seen, accounting for artistic variance, Castillo depicts the gulf as trending northwest-southeast, with a prominent twist to the northeast at its head, while Cabot maps the gulf as trending effectively north-south, without any twist at the head. Cabot’s map, with legends in Latin, Spanish, and French, is illustrated online at <https://gallica.bnf.fr/ark:/12148/btv1b53148963q/f1.item.r> (which is also [illustrated with the front matter herein](#), Figure 13, INTRODUCTION p. 47); the Bibliothèque nationale de France catalogs this as (including square brackets) “[Mappemonde / par Sébastien Cabot en guise de titre, une inscription bilingue dont le texte latin est le suivant], Présentant dans son quart sud-ouest in hac protens in planum figura continetur totus terre glodus, insule Portus, flumina Sinus Syrtus Et Brevia Que Hatenus A Neoteris Adaperta Sunt...”. There is also a variant illustrated at <https://gallica.bnf.fr/ark:/12148/btv1b53189475q.r>; and a variant with completed text at <https://gallica.bnf.fr/ark:/12148/btv1b55011003p/f1.item.r>. The Cabot map has been indicated by some workers as a manuscript; however, given that these are engravings and that there are variants, and the fact that one is an imperfect printing with overstrikes, it should not be so indicated even if an individual copy is unique.

Wheat (1957, Volume I, p. 19) mentions the Cabot map but did not include it in his cartobibliography because it lacks “inland place names”.

- 1579 25.403 **[No title.]** Roma.
 ► Sheet including two small hemispheres, on which the North American continent merges seamlessly with Asia. A suggestion of the Gulf of California is delineated on the southern shore of "Hispannoma".

Carver, J. [Carver, Jonathan]

- 1781 25.241 **A New Map of North America, From the Latest Discoveries 1778. Engrav'd for Carvers Travels.**
In: Carver, J., Travels through the interior parts of North America, in the years 1766, 1767, and 1768. By J. Carver, Esq. Captain of a company of provincial troops during the late war with France. Illustrated with copper plates, coloured. The third edition. To which is added, some account of the author, and a copious index. London: Printed for C. Dilly, H. Payne, and J. Phillips.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► Map is a fold-out frontispiece. The peninsula, "California", is separated from "New Navarre" by "Gulf of California". The head of the gulf receives a river from the northeast, which is the contribution of three rivers systems in "New Mexico": 1) "Martyr's R", which flows south from headwater in an area labeled "Teguayo & Quivira"; 2) "Coloredo R" [*sic*] from the northeast, with headwater northwest of "S^t Fe"—these two rivers reach a confluence after which the river to the gulf does not specify which name is to be applied; and 3) a river from the east labeled only "Apostles", though the indication of "Casagrande" along its course shows it is the Gila River. Downstream from the confluence of the Gila and Colorado the river bifurcates but rejoins before reaching the gulf.

Cassini, Gio. M^a [Caßini, Gio. Ma.] [Cassini, Giovanni Maria]

- 1790 25.1451 **Globo Terrestre Delineato sulle Ultime Osservazioni Con i Viaggi e nuove scoperte del Cap. Cook Inglese** In Roma Presso la Caleograf^a Cam^{le} 1790 Gio. M^a Cassini C.R.S.inc. ("Gio. M^a Cassini Som^{co} inc.") [*In Italian.*]
Four sheets of gores for a 34 cm globe.
► The southwestern part of North America is split between two gores on different sheets. The peninsula, "California" is separated from "Nuovo Messico" by "Mar Vermiglio". The northwest head of the gulf twists to the northeast, where it receives independently two meagerly depicted rivers; the shorter one, from the northeast, is labeled "R. Colorado", the other, from the east, is not labeled.
- 1792 25.2371 **L'America Secondo Le ultime osservazioni Divisa Ne'suoi Stati Principali Roma Presso la Calcografia Camle. 1788.** ("Gio. M^a Cassini Som^o inc.") [*In Italian.*]
In: Nuovo atlante geografico universale : delineato sulle ultime osservazioni. Tom. I. Roma: presso la Caleogr. Camerale MDCCXCII.
► In "Nuovo Messico", "F. Colorado" [*sic*] arrives at the northwest-trending "M. Vermiglio" from the northeast, with headwater off to the north; a tributary to it (not labeled) comes from the east.
- 1798 25.1000 **La parte occidentale dell' antico, e nuovo Messico con la Florida e la bassa Luigiana. Delineata fulle ultime Osservazioni. Roma Presso la Calcografia Camenale.** ("Gio. Ma. Caßini som. inc.") [*In Italian.*]
In: Nuova atlante geografico universale delineato sulle ultime osservazioni, Tom. III, No. 21.
► In "Nuova Navarra", "R. Colorado o de los Martyres" is depicted between "Mer Vermiglio" (Gulf of California), coming from a blank region of the map. "Hila F." (Gila River) is shown with its confluence above a bifurcation of the Colorado north of the head of the gulf.
NOTE: This atlas sheet complements an eastern sheet, "La parte orientale dell' antico, e nuovo Messico con la Florida e la bassa Luigiana dellineata fulle ultime Osservazioni".

Cassini le Fils [Cassini, Jacques]

- NO DATE 25.1420 **Planisphere Terrestre. Suivant les nouvelles Observations des Astronomes. Goeree del." [Jan Goeree].) ("G. v. Gouwen Fecit." [Gilliam van der Gouwen].) [*1721 or later.*] [*In French, with title in French and Latin.*]

► Map is a north polar projection of the world. "Californie I." is separated from "Nouveau Mexique" by a strait (not labeled) passing between "M. de Californie" and "Destroit d'Anien". On the eastern side of the strait, two very meagerly represented rivers arrive in parallel from the north into an embayment. ("R. du Nord" [Rio Grande] is properly shown with outlet in "Golfe et Archipel de Mexique".)

Châtelain, Henri Abraham see C. (mr.)

Chetwind, Philippi

1666 25.1156

Americæ Descriptio Nova Imprensis Philippi Chetwind Will: Trevethen sculp 1666.
[London.] [Title in Latin, labels in English, Spanish, and Latin.]

A reprinting of Anne Seile (1663, ITEM NO. 25.1477, itself a reprinting of Henry Seile, 1652, ITEM NO. 25.1476) with modified title cartouche and re-engraved embellishments.) with modified title cartouche and reengraved embellishments.

► The island, "California" (its northern end labeled "Nova Albion"), is separated from "New Galicia" by "Mare Vermiglio". Near the northern end of the strait several rivers enter two embayments on the eastern side: "R. d Anguichi" from the north; and, into a single embayment, "R del Tecan" from the north (with two headwater forks, one to the north near "Acoma" and the other to the northeast north of "Cibola"), and "R d Corall" from the north-northeast with headwater also near "Cibola".

In: Le nouveau et curieux atlas, géographique, et historique, ou le divertissement des empereurs[,], roys, et princes. Tant dans la guerre, que dans la paix. Dedié A Monseigneur François Blovet de Camilly Evêque Comte de Toul, Prince du Saint Empire &c. Par son tres humble et tres Obeissant et fidele serui. Antoine Menard. A Paris rue S^t Jacques, chez Chiquet au Grand S^t Henry, et chez [truncated thus] [1719?].

► "Isle de Californie" is separated from "Nouveau Mexique ou Nouvelle Granade et Marata" by "Mer Vermeille D du Sud [sic]". Midway on the eastern side of the strait are three labeled rivers, all from the northeast (listed here north to south), "Bona Guia", "R. de Aguchi", and "Tecon R." The river Tecon empties into the

MCLAUGHLIN 191

northern lobe of a twin-lobed embayment, while between the two lobes arrives a short river (not labeled) from the northeast.

Map includes remark, "la Californie, est une des plus grandes Isles du Monde, On luy donne plus de quatre cens cinquante lieües de longueur, cent cinquante de largeur, et onze de circuit. Elle à été découverte les années suiuanes 1534.1535 1539.1540.et.1542."]

Chez Louis Renard [firm] [**Renard, Louis**]

- 1715 25.1614 **Planisphere Representant Toutel'Etendue du Monde. Dans l'Ordre qu'on a Suivi Dans ce Livre. NB. Les Chiffres Se Raportent aux Cartes et aux Pages des Descriptions.** ("A Amsterdam, Chez Louis Renard, Avec Privilège de Nosseigneurs les Etats de Hollande et de Wetfrise.") [In French.]
In: Atlas de la navigation, et du commerce qui se fait dans toutes les parties du monde. Expliquant par des cartes & par des descriptions particulières de toutes les côtes & ports de mer de l'univers, la nature, les productions, & les ouvrages ou manufactures de chaque país en particulier: la rigion, le gouvernement, & la manière de vivre des peuples; les marchandises que l'on porte d'un país à un autre; & celles que l'on rapporte de chaque país, & qui se débitent dans toutes les parties du monde pour l'utilité, la magnificence, la curiosité, & la nourriture des hommes, &c. On a marqué très-exactement les routes, les iles, bancs de sable, les profondeurs des ports, & généralement tout ce qui regarde la navigation. Les cartes & les descriptions se succedent très-ponctuellement les unes aux autres, & accomplissent le tour du monde, commençant toutes par les côtes où chaque carte précédente a fini. Le tout dressé sur les mémoires les plus récents; revû & corrigée sur les nouvelles observations. A Amsterdam, Chez Louis Renard, Marchand Libraire.
 ► A north polar projection of the world. "Californie Isle" is separated from "Indes Occidentale" (so labeled on the western part of North America) by a narrow strait (not labeled). On the eastern side of the strait are depicted two relatively significant waterways (not labeled), as implied by enlarged extensions of embayments; the northern one from the northeast, the southern one from the north.
- 1715 25.2148 **Magnum Mare del Zur cum Insula California. \ De Groote Zuyd-Zee en 't Eylandt California.** ("Gedruckt 't Amsterdam by L. Renard".) [In Latin, with title in Latin and Dutch.]

 ► The island, "California", is separated from "Nova Granada" by a strait (not labeled). Only the mouths of rivers are depicted. Midway on the east side of the strait are shown the mouths of "R. de Anguchi" and, arriving in a bilobed embayment, "R. del Tecon" and "R. de Coral".

Clark, J. [Clark, James]

- 1725 25.1602 **[Map of the western hemisphere, with north to the left.]** (“To Face ^ēTitle.”) (“J. Clark sc.”)
In: [DeFoe, Daniel], *A new voyage round the world, by a course never sailed before. Being a voyage undertaken by some merchants, who afterwards proposed the setting of an East-India Company in Flanders.* London: Printed for A. Bettesworth, at the Red-Lyon, in Pater-Noster-Row; and W. Mears, at the Lamb, without Temple-Bar.
 ► Frontispiece to DeFoe’s novel, depicting a haphazardly drawn American continent and westward-blowing tradewinds on either side of the equator. Though there are no labels, California is a large island very narrowly separated from the mainland by a strait of equal width throughout. Midway along the east side of the strait are two straight rivers that converge at the strait, one from the northeast, the other from the east.

Clerc, I. le [Clerc, Jean le]

- 1602 25.444 **Orbis Terrae Novissima Descriptio.** (“Authore Gerardo Mercatore, nuperimè verò iuxta recentiores Cosmographos aucta et recognita. I. Hondius Sculp. I. le Clerc excu. 1602.”) *[In Latin.]* SHIRLEY 234
 ► The peninsula, “California” is separated from “Marata” by the Gulf of California (not labeled). The area of the head of the gulf is labeled “Totontea. R.” Two river systems (not labeled) converge at the head of the gulf; one from the northwest, with headwater to the north in an area labeled “Tolm. reg”; the other from the east-northeast, which en route to the gulf passes “Ceuola” and “Granata”.
- 1633 25.445 **Orbis terrae novissima descriptio.** Paris. *[In Latin.]* SHIRLEY 233
 Shirley’s Plate 185 reproduces “state 3”, a 1633 printing of the 1602 map, which notes separately, “Authore Gerardo Mercatore, nuperimè verò, iuxta recentiores Cosmographos aucta et recognita. I. Hondius sculpt. I. le Clerc excu. 1633”.
 ► The Gulf of California separates “California” from “Marata”, and “Totontea. R.” is noted at the head of the gulf. Also labeled in the area of interest to the bibliography is “Ceuola”.

Clouet (M^r l’Abbé) [Clouet, Jean-Baptist-Louis]

- 1764 25.1339 **Carte d’Amérique divisée en ses principaux Pays Dressée sur les Mémoires les plus recents, et sur differents Voy^{ages} et assujettie aux Observations Astronomiques de M^{rs} de l’[]Academie Royale des Sciences. Cluveri, Philippi [Cluverius, Philppus] [Clüver, Philipp]

McLAUGHLIN 25

- 1661 25.1773 **America.** [No imprint.]
 ► Hastily engraved. The island, “California”, is separated from “Nova Hispania” by “Mare Vermeio”. Several rivers are shown arriving on the eastern side of the strait, none of which are labeled and none are shown arriving within an embayment. The most prominent river, arriving from the northeast, may be recognized as the Rio Grande. Farther north of it two rivers are shown arriving very close to each other; the more northerly one is more prominent, with two “scratchy” headwater forks. Due east of these rivers is labeled “Pueblos de Moqui”.
- 1694 25.1774 **America.** (“H Mosting Sculp.”) [No imprint.]
 This is a re-engraving, not much better, of Cluveri (1661, ITEM NO. 25.1773); not noticed by McLaughlin.
 ► The island, “California”, is separated from “Nova Granada” by “Mare Vermeio”. Several rivers are shown arriving on the eastern side of the strait, none of which are labeled and none are shown arriving within an embayment. The most prominent river, arriving from the northeast, may be recognized as the Rio Grande. Farther north of it two rivers are shown arriving very close to each other; the more northerly one is more prominent, with two headwater forks that head in the area labeled “Tolm regnum” with a place name, “Rey Coremedo”. Due east of these rivers is labeled “Pueblys de Moqui [sic]”.
- 1711 25.1619 **America.** (“Iohn Senex sculp^t”) (“Tab. 46 pag 415.”) [In Latin.]
In: Philippi Cluverii introductionis in universam geographiam, tam veterem quam novam, libri VI. Accessit P. Bertii Breviarium orbis terrarum. Londini: Impensis Joannis Nicholsoni.
 ► The island, “California”, is separated from “Nova Granada” by a strait (not labeled). Midway on the east side of the strait are two north-trending embayments; the northern one receives no river; the southern one is bilobed, with the western lobe receiving a principal river (not labeled) from the north, which has two headwater forks in an area labeled “Tolm regnum”, with “Par Coromed” at the head of the western fork, and the eastern lobe receives a very short river (not labeled) from the north-northeast. To the east of the bilobed embayment is the place marker, “Pueblos do Moqui”.

Colom, Arnold

MCLAUGHLIN 19

- 1658 25.1770 **Mar del Zur Hispanis Mare Pacificum.** [In Latin, with borrowed Spanish names.]
In: *Zee-atlas, ofte water-wereldt. Inhoudende een korte beschryvinge van alle de bekende zee-kusten des aardtrycks . Nieuwelycks uyt-ghegheven* [3rd ed.]. t'Amsterdam, Op 't Water, by de Nieuwen-brugh, in de Lichtende Colom, [map 18].
 McLaughlin notes, "Map does not appear in 1st or 2nd edition of the *Zee-atlas*." The dedication cartouche to Georgio Backer is signed "Arnold Colom."
 ► A portlan chart of the Pacific Ocean. "I^o California", is separated from the mainland (not labeled) by "Mare Vermio". Midway along the eastern side of the strait are two principal embayments. The northwestern one receives "R de Anguchi" from the north; the southeastern one receives "R. de Tecon" from the north (which has two headwater tributaries from the north and northeast), and "R. d. Coral" arrives independently into this embayment from the north-northeast. "Pueblos d. Moqui" are situated due east of these rivers.

Consag, Fernando [Konšćak, Ferdinand] [see also Baegert (1773)]

- 1757 25.768 **Seno de California, y su costa oriental nuevamente descubierta, y registrada desde el Cabo d las Virgenas, hasta sutexonino, que es el Rio Colorado año 1747. por el P.^o Ferdinando Consag. de la Comp^a d I^o S, Mission^o en la California:** ("Joseph Gonz.^z esculp^t Mⁿ".) [In Spanish.]
From: Appendice III. Derrotero del viage, que en descubrimiento de la Costa Oriental de Californias, hasta el Rio Colorado, en donde se acaba su Estrecho, hizo el Padre Fernando Consag, de la Compañia de Jesus, Missionero de Californias, por orden del Padre Christoval de Escobar y Llamas, Provincial de Nueva-España, de la Compañia de Jesus. Año de 1746.
In: *Noticia de la California y de su conquista temporal y espirtual hasta el tiempo presente, sacada de la historia manuscrita formada en Mexico año de 1739 por el Padre Miguèl Venegas, de la Compañia de Jesus : y de otras noticias, y relaciones antiguas, y modernas: Añadida de algunos mapas particulares, y uno general de la America Septentrional, Assia Oriental, y Mar del Sùr intermedio, formados sobre las memorias mas recientes, y exactas, que se publican juntamente: dedicada al Rey N^{tro}. Señor por la Provincia de Nueva-España, de la Compañia de Jesus. Tomo Tercero.* [Parte Quarta.] Madrid: En la Imprenta de la Viuda de Manuel Fernandez, y del Supremo Consejo de la Inquisicion, pp. 140-195, map.
 ► Map depicts the upper half of the Gulf of California. The mouth of "rio Colorado" is depicted at the top edge of map. Immediately to its west is a large embayment with three minor streams leading to it from an adjacent coastal chain of mountains labeled "Sierra de S. Juan Gualberto"; the immediate area is labeled "Los Reyes". Both embayments depict islands at their mouths. To the southwest of Los Reyes is a large stippled area, occupying the Baja shoreline as well as to the middle of the "MAR DE CALIFORNIAS" (typographically thus), nearly to "S^o Buenaventura" and "S^o Felipe d Jesus", labeled "Marismas" and "Pantanos" (marshes and swamps).

Coronelli, Marco Vincenzo [Coronelli, Vincenzo Maria]

MCLAUGHLIN 95 WHEAT I:66

Navarro Sc. Mex^o. año 1769.") [In Spanish.]
In: Historia de Nueva-España, escrita por su esclarecido conquistador Hernan Cortes, aumentada con otros documentos, y notas, por el ilustrissimo Señor Don Francisco Antonio Lorenzana, Arzobispo de Mexico. México: Imprenta del Superior Gobierno, del Br. D. Joseph Antonio de Hogal, facing p. 328, serving as a frontispiece to the section (pp. 329-400) with title, "Carta de Relacion, que D. Fernando Cortés, Gobernador, y Capitan General por su Magestad en la Nueva-España del Mar Océano Embió al Muy Alto, y Muy Potentísimo, Invictísimo Señor Don Carlos, Emerador Siempre Augusto, y Rey de España Nuestro Señor."
[This map is illustrated herein](#) (Figure 12, INTRODUCTION p. 45).
 ► The Californian peninsula is labeled "California" in small lettering near the southern tip. This map is significant for its being the earliest drawn record (1541) of the head of the Gulf of California (not labeled) and the Colorado River delta region (the river is labeled "Rio da buena Guia p^o ✕"), the manuscript redrawn in 1769 for this publication from the original found in the Cortés family papers. The map also seems to have left open the possibility that "California" is an island. On either side of the mouth of the Colorado are suggested two arms of the gulf, "Brazo de laguna p^o ✕" leading northwestward, and the more certainly drawn "Brazo de Miraflores p^o ✕" leading northeastward. Note as well the imagined illustration at top, "La Ciudad de Cibora", which identifies the region in which was believed to be the seven cities of Cibola.

Cóvens, Iean, AND Mortier, Corneille

- NO DATE 25.1007 **Novissima et Accuratissima Septentrionalis ac Meridionalis Americæ Descriptio, multis Locis recentibus aucta et correcté divisa in Omnes Partes Hodiernas per Fredericum de Witt Amstelodami Cum Privilegio D.D. Ordinum Holl. Westfrisæq3 [Hollandiae Westfrisæqve]. ex Officina I. Covens et C. Mortier.** [Ca. 1700.] [In Latin.]

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► California, an island, is separated from “Nova Mexico” by “Mare Vermio Olim Mare Rubrum”. On its eastern coast, “R. del Tecon” and “R. de Coral” are depicted converging at a dual-headed bay.

For a later ed. see Mortier, no date (ca. 1710), *ITEM NO.* 25.1008.

- 1722 25.1016 **Carte du Mexique et de la Floride des Terres Angloises et des Isles Antilles. du Cours et des Environs de la Riviere de Mississipi. Dressée Sur un grand nombre de memoires principalement sur ceux de M^{rs} d’Iberville et le Sueur Par Guillaume Del’Isle Geographe de l’Academie Royale des Sciences. a Amsterdam Chez Ian Covens & Corneille Mortier Avec Privilege 1722.** (“I. Stemmers Senior Sculp.”) [In French.]

Caption: **Tabula Geographica Mexicæ et Floridæ &c.**

► At the head of “Mer de Californie” are two embayments, each with its own tributary, “R. d Angouchi” and “R. del Tison”; the latter has a tributary to it, “R. de buena esperanza”, and these latter two together head in “Grand Teguaoi”.

WHEAT I:137

- 1757 25.1307 **L’Amerique Septentrionale, Dressée sur les Mémoires le plus récents des meilleurs Geographes, & publiée par Còvens & Mortier a Amsterdam. MDCCLVII.** [In French.]

► “Californie” is a peninsula, separated from “Nouv. Navarre” (subdivided as “Pimeria” and “Sonora”) by “Mer de Californie ou Vermeille”. “R Colorado de los Martyres” is shown on a mostly straight southwestward course from headwater in “Nouveau Mexique”, receiving along the way from the east “R. Grande de los Apostolos” (of which only two of several headwaters have labels, “R. de B. Esperanca” and “R. de Hila”). Southwest of the confluence the river bifurcates, with the label “I. de la Presentacion”, before rejoining a short distance above the head of the gulf, by which point the course is due south into a northwest-southeast embayment. A short stream (not labeled) from the west is tributary to the western channel in the bifurcated reach.

Crepy [Crépy, Jean Baptist]

MCLAUGHLIN 214

- 1735 25.1816 **Amerique * * * Paris 1735 Chez Cher Crepy rue S.^t Jacques a S.^t Jacques.** [In French.]

The title cartouche includes an extended text (omitted here) that summarizes a political history of America.

► “Californie” is separated from “Nouveau Mexique” by “Mer Rouge”.

McLaughlin indicates that the insularity of California is indefinite, inasmuch as the northern end of California and the adjacent lands to the east are ambiguously drawn, as noticed by the extension of the seaway that has an island, but the western coast of California-proper continues to the north and west; the limit of these portrayals is met by an informational text at the top of the map. Midway on the east side of the seaway is distinctly shown, in a confused manner, what appears to be an effort to accommodate information that California is a peninsula. “Rio Colorado” is shown as a single north-northeast-south-southwest stream heading near “Teguaoi”, arriving at the head of a linear north-south embayment. Near its mouth the Colorado receives a large river (not labeled) from the east-southeast along which is the label “Casagrande” (which identifies it as the Gila River, the headwaters of which are in a mountain range that separates it from the “Sulade R.” that is the Rio Grande that reaches “Golfe du Mexique”). The portrayal of the Colorado River with a sliver of land to its west, where also small rivers are shown draining to the seaway, is reminiscent of the more modern depiction of California, in miniature on this map and independent of what must still be the great island of California.

Crysantho (Presbytero) [Chrysanthos (Patriarch of Jerusalem)]

- 1700 25.1593 ΠΙΝΑΞ ΓΕΩΓΡΑΦΙΚΟΣ ΤΗΣΤΕ ΠΑΛΑΙΑΣ ΚΑΙ ΝΕΑΣ . . . D. T. V. Y. (le Sieur) [Avity, Pierre d' (sieur de Montmartin)]

- 1649 25.1669 **America noviter delineata Auct: Iudoco Hondio.** ("Fol. 200".) [In Latin, volume in French.]
In: *Les etats, empires et principautez du monde, representez par la decription des païs, moeurs des habitans, richesses des provinces, les forces, le gouvernement, la religion et les princes qui ont gouverné chacun état, avec l'origine de toutes les*

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

religions et de tous les chevaliers et ordres militaires, par le Sieur D. T. V. Y. Rouen: Chez Jean Berthelin.

► The peninsula of “California” is separated from “Nova Granada” by “Mar Vermeio”. A bulbous head of the gulf receives four rivers: 1) a river (not labeled) from the northwest heading in a region labeled “Tontonteach”, which bifurcates before reaching the gulf; 2) a principal river (not labeled) from the northwest, passing through “Tontonteach”, which receives a tributary from the northeast, “Totonteach fl”; 3) a small river (not labeled) from the north-northeast heading in an area labeled “Cevola”; 4) a significant river from the east-northeast, which passes by a place named (also) “Cevola”, and which receives a tributary that heads in a large lake by which are “Septem Cita”. Between rivers 1 and 2 is labeled “B d buena guia”, which may indicate a cartographical device noting Brazos de Buena Guia that may imply a possible extension of the gulf that, upon continued exploration, would indicate that the gulf is in fact a strait. Also of note is the label “P Coromara” at the mouth of river 4, which might a use of the “Coromara” (and variant spellings) that appears as a river on other maps, presumably assumed by contemporary geographers to be the same as that of Marco Polo’s river in China.

Danckertz, Corneille, AND Tavernier, Melchior [Danckerts, Cornelis, AND Tavernier, Melchior]

SHIRLEY 323

1628 25.479

Charte Vniuerselle de Tovt le Monde, en Laquelle Plvsievs Regions sont Representees Plvs Exactement Qvavx Precedentes & les Terres Novvellement Descovvertes Fidelityment Corrigees svr les Dernieres Relations des Anglois Hollandois et Avtres part—Corneille Danckertz et Melchior Tavernier. (“A paris Chez Melchior Tauernier, graueur et Imprimeur du Roy pour les Tailles douces deme en l’Isle due Palais.”) (“Av Lectevr Si tu desires Scauoir Amy lectour, pourquoy apres plusieurs Chartes Geographiques de tout de Monde, je mets celle cy en lumiere Seache que mon deßein n’a eu autre but que ton utilité. et que ayant depuis peu recouuert diuerses relations, qui corrigeoient le defaut qui se trouue aux procedentes, Ie n’ay espargné ny ma peine, ny mon temps pour rendre celle cy la plus correcte qu’il m’a esté poßible. Et sans faire prejudice au trauail d’aucun, Ie te puis aßeurer que Si le defir te touche, de faire voile vers l’Amerique, ou sur la mer du Sud, tu en pourras faire l’experience, et y voguer plus seurement, que cy deuant il n’a esté permis. Il ne Sera plus besoin que tu craignes deformais, en ceste Nauigation la quelque Malicieux Naupluis, qui pour vanger quelque injure particuliere te faße faire naufrage par quelque faux signal. Cest Amy lecteur ce que ce peu d’espace me permet de te dire pour le present. A^o1628.”) [In French.]

► “Californie Is.” is separated from “Granada” by a strait (not labeled) that opens to “Grand Ocean” to the north. For 20 degrees of longitude to the west of the northern part of California is open ocean, where then picks up the northwest trending coast of North America at “Serro Nevado” and “Nouvelle Albion”, which then arcs northwest to north. On the east side of the strait there is a small embayment that independently receives from the north “R. d. Tecon” and “R. Coral”. Farther to the south a significant river (not labeled, but is the Rio Grande) arrives from the northwest; its headwater is a large lake by which are “Sept: Villes” and to the east of which is marked “Ceuola”. Between “R. Coral” and this river is marked “Pueblos de Moqui”.

Danet, G. [Danet, Guillaume]

1729 25.1453

Carte Generale de la Terre ou Mape Monde Auec Les Quatre Principaux Systemes & les Figures des Sept Planetes le tout Selon les Nouvelles Obseruations 1729. (“Mis au jour par G. Danet Gendre de N. de Fer auec Privilege du Roy.”) (“Se vend a Paris chez G.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Danet sur le Pont N. Dame a la Sphere Royale; où on trouve les Ouvrages du S^r de Fer.”) (“F. le Roux pinx.”) (“D. Somique Sculp.”) [In French.]

► The peninsula, “Californie”, is separated from “Nouveau Mexique” by “M. Vermeille”. A river (not labeled) enters the head of the gulf from the northwest after having followed a course southwestward from the confluence of two branches, one from the north and the other from the northeast. Even though this implies that the map has been revised from a portrayal where California is an island, with the addition of the Colorado River, it is interesting that the eastern side of the gulf still retains embayments with short rivers (not labeled) that are vestiges of portrayals of the same rivers on contemporary maps that had had names like “R. de Tecon”, etc.

d’Anville ⁴⁰

d’Anville (S^r) [d’Anville (Sieur)] [**d’Anville, Jean Baptiste Bourguignon**]

1761 25.1370 **Hémisphère Occidental ou du Nouveau Monde** Publié sous les auspices de Monseigneur Louis Philippe Duc d’Orléans, Premier Prince du Sang. Par le S^r d’Anville, de l’Académie Royale des Belles-Lettres, et de celle des Sciences de Petersbourg, Secrétaire de S^rAlt?Ser? [sic] MDCCLXI. Sous le Privilège de l’Académie. Chés l’Aut,^r [sic] aux Galeries du Louvre. (“G. De-la-Haye.”) [In French.]

► The peninsula of “Californie” is separated from “Mexique” by “Mar Vermejo”. The “R. Colorado” basin is somewhat confused with that of the Gila River (not labeled), spanning the entire area from a latitude equal to the mouth of the Colorado to dispersed headwaters on the east and to the northeast in “Nouv? Mexique” [sic] at the latitudes of “S^{te} Fé” and “Taos”. The area to the immediate northwest is blank.

For a revision see Barbié du Bocage (1786, ITEM NO. 25.1371).

d’Anville (S^r), AND Bolton (Mr.) [d’Anville (Sieur), AND Bolton (Mister)] [**d’Anville, Jean Baptiste Bourguignon, AND Bolton, Solomon**]

1763 25.1448 **North America. Performed under the Patronage of Louis Duke of Orleans, First Prince of the Blood; By the Sieur d’Anville. Greatly Improved by M^r Bolton. Engrav’d by R. W. Seale.** (“Gravelot delin. Walker sculp.”) (“For Postlethwayt’s Dict: of Commerce.”)

Map in four sheets; title taken from Plate [II]. Plate III notes: “Maps for M^r Postlethwayt’s Dictionary of Commerce. which make a compleat Body of Geography of the whole World, Viz. North America, South America, Asia, Africa and Europe, printed on twenty four Sheets. Also a separate Map of the Coast of Guinea, with all the Forts and Settlements belonging to the several European Potentates, minutesly described.”; and with notation, “A. Walker del. & Sculp.”

► The northwestern part of North America (on Plate I) is omitted, replaced by an inset map of the northeastern part of the continent. The Southwest, which overlaps Plate I and Plate III, portrays only the lower part of the peninsula, “Californie”, which is separated from “New Navare” [sic] by “Californian Gulf”. The head of the gulf, overlapping onto the western margin of the map, receives “R. Colorado de los Martyres” from the northeast. Shortly above the mouth at “S. Dionysio” it receives from the east “Grand River of the Apostles” (Gila River), which among several headwater tributaries is “Hila R.” Downstream from the Gila confluence, the river bifurcates with “I. Presentacion” labeled between the channels, which converge again at the entrance to the gulf.

⁴⁰ See also Governor Pownall (Thomas Pownall) regarding similar maps with the notation, “Compiled from M^r. d’Anville’s maps of that Continent, and Corrected in the Several Parts belonging to Great Britain, from the Original Materials of Governor Pownall, MP.” And see Robert Sayer for similar maps copied from d’Anville.

D’Anville AND Robert (Sieurs) [d’Anville, Jean Baptiste Bourguignon, AND Robert de Vaugondy, Didier]

- NO DATE 25.623 **A New Map of North America, with the British, French, Spanish, Dutch & Danish Dominions on the great Continent; and the West India Islands, Done from the latest Geographers, with great Improvements from the Sieurs D’Anville & Robert. London. Printed for Rob^t Sayer Map and Printseller at the Golden Buck in Fleet Street. [1750?]**
- The southwestern portion of North America depicts the head of “G. of California” separating California from “New Navarr”. The area of “New Mexico” west of “R. del Norte” (Rio Grande) and south of the (mythical) “River of the West” shows only a line of mountains and the largely empty space used for the comment, “California was always thought to be an Island, till Eusebius Francis Kino a Jesuit between the Years of 1698 and 1701 discovered it joynd to the Continent, of which the Royal Society receiv’d information in 1708.” A faintly drawn, short river is shown entering the head of the Gulf of California.

De l’Isle [and variant spellings] *see under* **L’Isle**

Delamarche, C. F. [Delamarche, Charles François]

- 1792 25.1436 **Amérique ou Index Occidentales, avec les Nouvelles Découvertes du Capit^e Cook, depuis le Détroit de Behrings ou du Nord, dans l’Océan Pacifique du Nord et Sud. Par C. F. Delamarche Géographe et Successeur de Robert de Vaugondy. A Paris Rue du Foin S^t Jacques, au Collège de M^r Gervais. 1792. [In French.]**
- The peninsula, “Californie”, is separated from “N^e Navarre” and “Sonora” by “M. Vermeille”. The head of the gulf is a progressively narrowing waterway to the north and northeast, shown even a bit beyond the confluence of “R. Gila”. “R. Colorado” is labeled on the main stream, including the narrowing part of the head of the gulf, though the Colorado is meagerly represented as coming from headwater in a mountainous area to the west of “S^a Fé” (compared to the larger drainage basin of the Gila, with several headwaters).

Delarochette [Delarochette, Louis Stanislas d’Arcy]

- NO DATE 25.1467 **A New Map of North America, wherein the British Dominions in the Continent of North America, and on the Islands of the West Indies, are carefully laid down from all the Surveys, hitherto made; and the Boundaries of the New Governments, as well as the other Provinces, are shown. Also Extracts from the Definitive Treaty of Peace in 1763, relative to the Cessions made to his Britannick Majesty on the Continent of North America, and to the Partition agreed on for the Islands. (“This Map is Laid down by Delarochette and Engraved by Tho:Kitchin”.) [1763?]**
- The northwestern part of North America is occluded by an inset map of the northeastern part of the continent. In the Southwest, only the southern part of the peninsula of “California” is shown by the edge of the map; it is separated from “New Navarr” [*sic*] by “Californian Gulf”, of which only its southern end is shown before passing off the map to the northwest. North from there, two rivers are shown passing off the map to the west: “R. Colorado de los Martyres”, from the northeast, with a tributary to it from the north; and “R. Grande de los Apostolos or del Coral” from the east, of which three of its headwater tributaries are labeled “R. de Buena Esperanza”, “R. Azul or Blue R.”, and “R. de Hila or Sonaca”.

Delarochette, L. [Delarochette, Louis Stanislas d'Arcy]

- NO DATE 25.1384 **Bowles's New Pocket Map of North America, Divided Into It's Provinces, Colonies, &c. by J. Palairet, Geographer; lately Revised and Improved with many Additions, from D'Anville, Mitchel, & Bellin, by L. Delarochette.** ("Printed for the Proprietor Carrington Bowles, N^o 69 in S^t Pauls Church Yard, London.")
 One source catalogs this map as 1766. Yale University catalogs this map as *ca.* 1771.
 In the area of interest to this Cartobibliography, this is identical to Delarochette (1765, *ITEM NO.* 25.242).
 ► The peninsula, "California", is separated from "New Navarre" by "Californian Bay". "Martyrs R" is shown coming southward from a region labeled "Teguayo and Quivira very little Known", before turning southwestward toward the head of the gulf. In its southward course it receives from the northeast a river (not labeled). Before reaching the gulf it receives a river (Gila River) that is labeled only on its headwater forks, "Good Hope R" and "Apostles R"; the Colorado-Gila confluence is marked "S^t Denis". Below that confluence its course bifurcates, rejoining just before reaching the gulf at the head of a northwest-oriented embayment.
- NO DATE 25.1188 **Bowles's New One-Sheet Map of North America, Divided Into It's Provinces, Colonies, States, &c. by J. Palairet, Geographer; lately Revised and Improved with many Additions, from D'Anville, Mitchel, & Bellin, by L. Delarochette. Printed for the proprietors Bowles & Carver, No. 69, St. Paul's Church Yard, London. [1798 or later.]** CITED WITH WHEAT I:245
 The Library of Congress catalogues a copy of this map as 1784.
 ► A copy seen with owner's date of 1811 is studied here: "California" is separated from "New Navarre" by "Californian Bay". "Martyres R" is shown on a southward course to the confluence of a river (not labeled) coming from the northeast, before continuing southwestwardly to the head of the gulf, en route receiving from the east a tributary to it (the Gila River, actually), the forks of which are labeled (without clear indication as to which is the principal stream) "Good Hope R." and "Apostles R." Below the confluence the river bifurcates before rejoining just before the head of the gulf.
NOTE: WHEAT I:245 (1798) lists this map (ellipses and square brackets are part of quote) as having been "Published in Carrington *Bowles' Universal Atlas*. . . . by John Palairet. . . . London [1794-98]." This publication is Palairet, Jean, *Bowles's universal atlas : being a complete collection of new and accurate maps, of all the known countries in the world : displaying the whole surface of the terraqueous globe : laid down from correct surveys, new discoveries, and authentic documents*. Printed for the proprietor Carrington Bowles, N^o 69 in St. Pauls Church Yard, London. Wheat adds, "Another edition names Bowles & Carver as printers", which is the map cited here.
- 1765 25.242 **A Map of North America by J. Palairet with considerable Alterations & Improvem^{ts}, from D.'Anville, Mitchell & Bellin. by L. Delarochette. 1765.** ("Printed for John Bowles at the Black Horse in Cornhil, & Carrington Bowles in S^t Pauls Church Yard, London.") WHEAT I:147
 ► The peninsula, "California", is separated from "New Navarre" by "Californian Bay". "Martyrs R" is shown coming southward from a region labeled "Teguayo and Quivira very little Known", before turning southwestward toward the head of the gulf. In its southward course it receives from the northeast an unlabeled river. Before reaching the gulf it receives a river (Gila River) that is labeled only on its headwater forks, "Good Hope R" and "Apostles R"; the Colorado-Gila confluence is marked "S^t Denis". Below that confluence its course bifurcates, rejoining just before reaching the gulf at the head of a northwest-oriented embayment.

Desnos [Desnos, L. C.] [Desnos, Louis-Charles]

- 1760 25.1840 **l'Amerique Meridionale et Septentrionale Dreßée sur les Nouv^{les} Decouv^{tes} et dernieres Relations des meilleurs Navigateurs decetemps Conformes aux Observations Astronomiques Corrigéé [sic] et Augmentéé [sic] par L. C. Desnos Ingénieur pour les globes et Spheres Rue S^t Jacques au Globe A.P.D.R a Paris. 1760. [In French.]**
- ▶ California is a peninsula, though the label "Californie" appears on the mainland to the north and following it into the peninsula is a label that has been nearly eradicated. "Mer Vermeille" separates the peninsula from "Nouvell^e Navare" and "Vieux Mexique". The head of the northwest-southeast-trending gulf twists to the northeast, where a single island is depicted. Here "Cotorado R." [sic] arrives along a mostly southwesterly course, having issued from a mountain range to the north that also parallels the river to its west nearly to the confluence of the Gila River (not labeled but identified by the place name "S. Denis").
- 1781 25.1461 **N^{le} Carte d'Amerique Dressée sur les Mémoires les plus récents et assujctie aux dernieres Observations Astronomiques Dédié au roy. Par son tres humble tres Obeissant Serviteur et Fidel Sujet Desnos. Corigée et augmentée A.P.D.R. 1781. [In French.]**
- Caption: **Amerique Septentrionale et Meridionale Divisée en Ses Principaux Pais et Subdivisée par Audience Dressée sur les Mémoires les plus récents et assujctie aux dernières Observations Astronomiques par Le P^{er} et L. C. Denos Géographes Ingénieur pour les Globes et Sphères rue S^t Jacques au Globe 1770.**
- ▶ The peninsula, "Californie", is separated from "Nouvelle Navarre" by "Mer Vermeille". "Rio Colorado ou Riv. du Nord" arrives at the head of the gulf from the north-northeast; its headwater area is depicted as a mountainous area north of which is labeled "Les Pays de Quivira et de Taguaio". In the first part of its course it is shown running through mountains, serving as the boundary between "Californie" and "Nouveau Mexique". A short distance from the gulf the Colorado receives "R. Bleue" (Gila River) from the east-northeast, depicted only as a short stream without tributaries. Downstream from that confluence the Colorado bifurcates and the channels arrive widely separated at the head of the gulf. The east side of the delta is shown as a mountainous area.

Doncker, Hendrick

MCLAUGHLIN 21

- 1660 25.1771 **Pascaart vertoonende de Zeecusten van Chili, Peru, Hispania Nova, Nova Granada, en California.** 't Amsterdam. By Hendrick Doncker Boeckverkooper inde Nieuwe brugh steegh in 't Stuiermans gereedtschap. [In Dutch.]

► A portlan chart of part of the eastern Pacific Ocean. The island, "California", is separated from "Nova Granada" by a strait (not labeled). Only the mouths of rivers are shown. Midway along the eastern side of the strait are two embayments; the northerly one receives "R. de Anguchi", while a more southerly, bilobed embayment receives "R. del Tecon" in the more northerly embayment, and "R. de Coral" in the adjacent southern embayment.

MCLAUGHLIN 61

- 1676 25.1779 **Mar del Zur Hispanis Mare Pacificum.** [In Dutch.]

The dedication cartouche to Georgio Backer is signed "Hendrick Doncker".

In: De Nieuwe Grootte Vermeerderde Zee-Atlas ofte Water-Werelt, Vertoonende alle de Zee-Kustem des Aerdtrycks, Seer dienstigh voor Schippers, Stuurlieden en Lief-hebbers der groote Zeevaert. By Hendrick Doncker, t'Amsterdam.

► A portolan chart of the Pacific Ocean. "I^a California" is separated from the mainland (not labeled) by "Mare Vermio". Midway on the east side of the strait arrive three rivers (north to south): "R. de Anguchi", "R. de Tecon", and "R. d. Coral", the latter two of which arrive in the same embayment.

Doppelmaiero, Iohanne Gabriele [Doppelmayr, Johann Gabriel]

- NO DATE 25.1607 [Map of the world.]

In: Basis Geographiæ Recentioris Astronomica in qua situs locorum insigniorum geographici ea exactitudine, qua celeberrimi Astronomi eosdem per observationes è plurimis luminarium et circumjobialium Eclipsibus nobis hactenus suppeditarunt pro certiori Geographiæ stabilimento positi designantur a Iohanne Gabriele Doppelmaiero Math. PP. operâ Ioh. Bapt. Homanni S.C.M. Geogr. Cum Privilegio (Norinbergæ.) Sac. Cæs. Majestatis. [1738?] [In Latin.]

► **BROADSIDE**, containing a map of the world with bare labeling (the North American continent labels only "Quebek", "Boston", and the city of "Mexico"). California is depicted as an island, nearly breached through in two places. On the east side of the strait is a wide, bilobed embayment, to the easterly lobe of which arrive two rivers; a short river from the northeast, and a longer river from the east.

Doppelmayr, Johann Gabriel

- 1719 25.1606 [Map of the world.]

In: Doppelmayr, Johann Gabriel, Neue und gründliche Anweisung, wie nach einer universalen Methode grosse Sonnen-Uhren auf jeden ebenen Flächen als lauter horizontale, und zwar diejenige, die in dem Meridiano eines vorgegebenen Orths ohne Abweichung sich befinden, als eigentliche, die aber davon abgehen, als reducirte Horizontal-Uhren so wohl aus einem arithmetischen Fundament auf verschiedene Arth accurat zu beschreiben, als auch gantz geometrisch, nach der sphærischen Geometrie, richtig zu verzeichnen, dann aber auf solchen allerhand astronomische Vorstellungen, als die Paralleli des Æquatoris vor die XII. Himmels-Zeichen und Tag-Längen, die Paralleli des Horizons, oder die Almucanthat, die Azimutha, endlich die Stunden-Linien der babylonischen, italiänischen, nürnbergischen und jüdischen Uhr, so wohl aus einem arithmetischen als geometrischen Grund gehörig zu ziehen, zur weitem

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Erklärung der neuvermehrten Welperischen Gnomonique. Nürnberg: gedruckt bay Johann Michael Spörlin seel. Wittib. Verlegts Johann Christoph Weigel, Kunsthändler. [In German.]

► California (not labeled) is separated from “N: Mexico” by a strait. The island is oddly configured, with a heavily scalloped coastline on its ocean side; its northern end is aligned north-south, while its southern end is aligned northwest-southeast, with a noticeable peninsular form at the far southeastern part. The form of the strait is seemingly a remarkable hybrid that contains its own mainland peninsula in mid-strait, with the strait aligned north-south north of there and northwest-southeast south of there. At the head of the strait are depicted twin embayments, one north-directed, the other northeast-directed. While no rivers are depicted in this part of the continent, the presence of the north-south mainland peninsula, itself reminiscent of the Baja peninsula despite the presence of the Californian island, contrasts with the twin-lobed embayment that appears on the east side of the strait shown on many maps that depict the island of California, and where are also depicted rivers that include the Colorado (under various names). This map thus seems to mix the two geographies even while depicting the certainty of a strait.

Dourado, Fernão Vaz

NO DATE 25.1590

Terra Antipodv Regis Castele Invéta: a Xpöforo Colvbo:Janvési. [1580.] [In Portuguese and Latin.]

MANUSCRIPT • Although manuscripts are not generally cited herein, this map has been reproduced in Winship (1896, Plate 48, **ITEM NO.** 2.6973 in Volume 1/Part B of *THE GRAND CANON*), with the legend, “Dourado’s Terra Antipodv Regis Castele Inveta”. Lowery (1912, p. 83, **ITEM NO.** 1.375 in Volume 1/Part B of *THE GRAND CANON*), without description, indicates a date of 1580, from which we may infer that it is from the 1580 issue of Vaz Dourado’s six known manuscript atlases (1568-1580).

► “La Mar Bermeio” separates California (not labeled) from “Bimini Regio”; the area on either side of the head of the gulf has the label, “Fernão Cortes a Descvbrio”. The head of the gulf receives two rivers, the western one (not labeled) from the northwest, the eastern one (labeled “buena guia”) from the north. Only the lowest portion of each river is depicted.

Doylé, William

NO DATE 25.1178

WHEAT I:150

A Map of all the British Dominions beyond the Atlantic together with the intermix’d & adjacent Estates of the other European Powers &c. never before exhibited in one View in any Map whatever By William Doylé, LLB. (“J. Prockter sc.”)

In: Some account of the British Dominions beyond the Atlantic: containing chiefly What is most interesting and lest known with respect to those Parts: particularly, The important Question about the North West Passage Is satisfactorily discussed: with a large map; in which The said supposed Passage, and all the Arctic Regions, are more fully delineated than ever before: By William Doylé, L.L.B. London: Printed for the Author, by J. Browne; And sold by W. Domville, at the Royal Exhchange; W. Flexney, opposite Gray’s Inn Gate, Holborn; S. Bladon, in Pater-noster Row; J. Almon, in Piccadilly; J. Ridley, in St. James’s Street; J. Fox, in Westminster-Hall; and M. Thrush, Salisbury-Court, Fleet Street. [1770?]

► The peninsula of “California” is separated from “Quivira” by “Vermilion Sea”. Two rivers (not labeled) converge independently at the head of the gulf.

Drogenham, Gerrit

- NO DATE 25.1617 **De Aardkloot volgens d'hedendaagse gedaante.** ("tegen Pag. 11.") [1715?] [In Dutch.]
 ► The island, "California" is separated from "Mexico" by a strait (not labeled). Midway on the eastern side of the strait are four small rivers (not labeled), from the north and north-northeast, the northernmost and southernmost of which enter embayments in the strait.

Dunn, Samuel

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- "I. Californie" is separated from "Quiuera ou N. Albion" [*sic*] by "Mer Vermeille". On the east side of the strait several rivers arrive from the north- and north-northeast, including (from north to south) "R. Anguchi", "R. de Tecon" (which has two headwater forks), and an adjacent river (not labeled, which also has two headwater forks). "Moqui" is labeled at the head of the eastern fork of the latter mentioned, unnamed river.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► "I. Californie" is separated from "N. Mexique" by "M. Vermeille". Midway on the east side of the strait are two rivers; the northern one (not labeled) from the northeast, the southern one, "R Nort" (which is the Rio Grande) from the northeast heading in a lake upstream from "S^a Fé".

1682 25.2350 **Noweav Mexique [or Novveav Mexique]. [In French.]**
This is the same as Du Val (1670, ITEM NO. 25.1645).

► "I. Californie ou N^e Albion" is separated from "Qvivira ou N. Albion" and [Novveav Mexique] by "Mer Vermeille". Midway on the east side of the strait, four rivers are depicted (from north to south): "R. de Anguchi" from the northeast; "Anguchi R" from the northeast; and, arriving independently at the head of an embayment, "Tecon R." from the north-northeast (its northeastern headwater fork labeled "Cicuia R."), and a river (not labeled, but labeled on its northwestern headwater fork "Huex R.") from the northeast.

[In French.]

► "I. Californie" is separated from "Nouveau Mexique" by "Mer Vermeille", with the strait open to the north in "Destroit d'Anion". Midway along the eastern side of the strait is a north-trending gulf that receives "R-Tecon" from the northeast.

Du-val, P. [Du Val, P.] [Duval, Pierre]

MCLAUGHLIN 66 WHEAT I:60

1679 25.1163 **l'Amerique Suivant les dernieres Relations, avec les Routes que l'on tient pour Les Indes Occidentales. par P. Du-val Geographe Ordinaire du Roy.** Paris: Chez l'Auteur. ("Liebaux Sculpsit".) [In French.]

In: Les acquisitions de la France par la paix. Avecque les cartes géographiques des lieux mentionés dans les articles des traitez de Munster, des Pyrenées, de Lorraine, d'Aix-la-chapelle, de Nimmegue.

This is the upper left of a four-sheet map.

► "Isle Californie" is separated from "Nouveau Mexique" by "Mer Vermeille". On the eastern side of the strait is an embayment into which two rivers separately flow, "R. del-tecon" (a large river with headwater forks in "Quivira ou N^e Albion") and "R. de Coral". [McLaughlin notes a second state, imprint changed to "A Paris Chez melle Du Val Fille de l'Auteur Sur le Quay de l'Orloge proche le coin de la rue de Harley a l'ancien Buis 1679".

Dv val, P. [Du Val, Pierre]

1661 25.1495 **A Carte Generale dv Monde dressée sur les relations les plus recentes Par P. Dv val Geogr^s Ord^{re} du Roy 1661.** ("A Paris chez N. Berey Enlumineur du Roy au bout du Pont neuf proche les Augustins aux deux Goobes".) ("Auec priuilege du Roy.") [In French.]

► "I. Californie" is separated from "Novveav Mexique" by "Mer Vermeil". The strait opens to "Dest. d'Anion" to the north. Both the island and the strait trend northwest in their lower two-thirds, turning to the north in the upper one-third. Near the northern part of the northwest-trending part of the strait, a single river (not labeled) enters the strait from the north, with two headwater forks trending to the north-northeast and the northeast, which has near its head a place labeled "Grenade" that is north of "S^a Fé".

Du Val d'Abbeville, P. [Du Val d'Abbeville, Pierre] [Duval, Pierre]

MCLAUGHLIN 15 WHEAT I:64

- 1655 25.1768 **Ameriqve Autrement Novveav Monde et Indes Occidentales Par P. Du Val d'Abbeville Geographe Ordinaire du Roy Pour Vingt Ans 1655.** [In French.]
 ▶ "Californie Isle" is separated from "Nouvelle Grenade" by "Mer Ve'rmeille". Four rivers arrive in the strait from the northeast; only "R. de Nort", the southernmost river, is labeled (this is the Rio Grande). The two central rivers arrive in a single embayment; the more northwesterly of the two has two headwater forks, and this comes from an area labeled "Quiuira ou N. Albiō.", which represents the Colorado.
- 1714 25.2071 **L'Ameriqve autrement Le Novveav Monde et Indes Occidentales Par P. Du Val d'Abbeville Geographe Ordinaire du Roy. A Paris. Chez Mad. le Du Val Fille de l'Auteur Sur le Quay de l'Orloge du Palais. Avec Priuil. du Roy. Pour Vingt Ans. 1684.** [In French.]

► “California” is an island separated from “Granada” by “Mar Vermei”. Midway on the east side of the strait is a long, narrow, north-trending embayment, into which two short rivers converge, with the label alongside the embayment, “R. d. Coral”. To the west is another, similar embayment with two rivers (not labeled). Both river systems head in an area with the place name “Rey Coromeda”.

Ellis, Henry

1750 25.1839 [Map.]

In: *Considerations on the great advantages which would arise from the discovery of the North West Passage, and a clear account of the most practicable method for attempting that discovery.* [No imprint] [London], 8 pp., map.

► On the west coast of North America, the wide peninsula, “California”, is separated from “Navarr”, “Sonora”, and “Mexico” by a gulf (not labeled) that trends northwest-southeast but opens to the sea on a striking turn to the southwest; the head of the gulf is of a peculiar anvil-shape, with embayments on the west and east sides. Into the western embayment arrives “Colorado R.” from the north and northeast, which receives some distance from the sea a tributary (not labeled) from the east, and the river bifurcates and rejoins before reaching the gulf. North of the river’s headwater is a vast region labeled “Parts Undiscovered”. No other rivers are depicted in the gulf region.

Elsheimer, Adam

1598 25.434 [No title.]

In: Brennerum, Sebastianum [Brenner, Sebastian], *Continuator Temporis Qvinqvennis : Das ist: Fünffjäriger Histori Erzählung ander, dritter vnnnd vierdter Theil sampt warhafftiger Beschreibung aller fürnemmen vnnnd denckwirdigsten Geschichten, so sich innerhalb 5. Alles . . . auß Jacobi Franci, Jansonii, järigen und halbjärigen Relationibus zusammen getragen und . . . verbessert, also daß es auff die erste Quinquennal Jacobi Franci folgen möge.* Franckfurt am Mayn; Brachfeldt. [1599.] [In German.]

Map engraver’s initials only are present, as “Æ”. The map principally portrays the circumnavigation of Cornelius Houtman, 1595-1598 (including improbable passages through the isthmus of Panama and the Northeast Passage over Asia).

► An exaggerated North American continent portrays a large northwest-trending Gulf of California at the head of which enters two separate tributaries.

Elwe, Ian B^t [Elwe, Jan Barend]

- 1792 25.2431 **Amerique Septentrionale Divisée en Ses Principales Parties.** a Amsterdam. Chés Ian B^t Elwe. MDCCXCII. *In: Atlas.* Amsterdami: Chés I B Elwe. [In French, with map labels in French and Spanish.]
- ▶ “Isle de Californie” is separated from “Nuevo Mexico” by “Mer Rouge”; the supposed strait, however, depicted as northwest-southeast trending, turns northward and narrows substantially to a point, beyond which to the north the map is blank nor is an eastern coast of the island depicted. On the east side of the point, two rivers arrive from the northeast, “Tecon R.” and “R. de Coral”; the former has two headwater forks, the western one heading at “Rey Cormedo”.

Endasian, Elia [? Էնդասեան, Էլիա]

- 1787 25.1417 ԱՄԵՐԻԿԱ [America]. Venice: Vans Srboyn Ghazaru. [In Armenian.]
- Title printed in all capitals, thus. *For bibliographical purposes, the title with initial capital only is “Ամերիկա”.* Library of Congress’s catalog record adds information in transliteration [including square brackets]: “Amerika, ăst nor ashkharhagrakan znnut’eants’ : p’oragreal i Vĕnĕtik i Vans Srboyn Ghazaru i t’uis merum 1236, 1787.”; “Mkhit’arean Miabanut’iwn i Venetik.”; “Vĕnĕtik : i Vans Srboyn Ghazaru, [1787]”. “Vĕnĕtik” (Venice) is Վենետիկ in the original orthography.
- Map is illustrated online by LOC at <https://www.loc.gov/item/78695985/>.
- ▶ California is a peninsula. Two rivers converge at the head of the gulf; one from the northeast, the other from the east.

Ende, Josua van den

- NO DATE 25.448 **[Nova et exacta terrarum orbis tabula geographica ac hydrographica.]** Amsterdam. [Ca. 1604.] [In Latin.]
- SHIRLEY 243
- Shirley (p. 255) notes, “Title missing but believed to be ‘Nova et exacta terrarum orbis tabula geographica ac hydrographica.’” Twelve sheets each with the signature of Ende.
- ▶ “Mar Vermeio” separates “California” from “Nova Granada”, with several tributaries converging to the head of the gulf. Of note in the area of interest to this Cartobibliography are the labels “Tontontecac” and “Ceuola”.

[Engel, Samuel]

- 1765 25.1287 **Carte de la partie Septentrionale et Orientale de l’Asie, qui comprend la grande Tartarie, le Kamschatka et Tesso avec la Mer Glaciale et ses Côtés dressée en 1764. par M^r *** [sic].** [In French.]
- In:* [Engel, Samuel], *Memoires et observations geographiques et critiques sur la situation des pays septentrionaux de l’Asie et de l’Amerique, d’apres les relations les plus recentes. Auxquelles on a joint un essai sur la route aux Indes par le Nord, & sur un commerce très vaste & très riche à établir dans la mer du Sud. Avec deux nouvelles cartes dressées conformément à ce système. Par Mr. *** [sic].* Lausanne: Chez Antoine Chapuis.
- It is regarded that this publication is the first to reliably dismiss the idea that California is an island.
- See on this map, **INSET II**, “La Nouvelle Grenade et la Californie”.
- ▶ The inset map depicts the head of “Mer Vermeille”, which receives at its head four rivers (from west to east): 1) a river (not labeled) from the west; 2) “Totontecac flu.”, a river with headwater forks, from the northwest and northeast; 3) a very short

river (not labeled) from the northeast; and 4) a prominent river (not labeled) from the east and north, heading in a large lake. A habitation place name for “Totontec” appears on the Totontec river not far from its mouth in the gulf. The point of land between 2 and 3 has the label “B. de Buenaguia”; and the point between 3 and 4 is “P. de Miraflores”. The places, “Granata” and “Ceuola”, are due east of the head of the gulf on the largest river.

[Euler, Leonhard]

NO DATE 25.1412 **Mappa Geographica Americæ Septentrionalis ad emendatiora Exemplaria adhuc edita jussu Acad. Reg. Scient. et Eleg. Litt. descripta.** [Berolini?] [1760?] [Title in Latin; labels in Latin, German, Spanish, and English.]

Map printed on four sheets, in the margins labeled individually (in German), “40. Nordl: America I. theil” (northwest quadrant), “41. Nordl: America II. theil” (northeast quadrant), “42. Nordl: America III. theil” (southwest quadrant), “43. Nordl: America IV. theil” (southeast quadrant). The main title cartouche appears on the northeast quadrant, adding to the title, “Pars II”; the northwest quadrant has a cartouche, “Americæ Septentrionalis Pars I”; the southeast quadrant has a cartouche, “Americæ Septentrionalis Pars IV”; the southwest quadrant has a cartouche containing linear measures.

The Library of Congress’s copy, illustrated at <https://www.loc.gov/item/75693276/>, is annotated (including square brackets), “From: Geographischer Atlas. Berlin, bey Johann Michael Kunst. [1745-1772?]”.

► The map omits the northwestern part of the continent; and in fact, the head of the Gulf of California and the west coast of the Baja Peninsula run into the margins of the northwest and southwest quadrant sheets; the west coast is not depicted. The peninsula, “California” is separated from “New Navare” by “Californian Golf”. “R. Colorado de los Martyres” enters the head of the northwest-extending gulf from the northeast, having followed a mostly straight course from the northeast with headwater in “New Mexico”. It receives from the east “Grand River of the Apostles” (Gila River), and a short distance downstream from that confluence the river divides around “I. Presentation” before converging again upon entering the gulf.

Euler, L. [Euler, Leonhard]

1753 25.2267 **Mappa Geographica Americæ Septentrionalis ad emendatiora Exemplaria adhuc edita jussu Acad. Reg. Scient. et Eleg. Litt. descripta.** [Title in Latin; labels in Latin, German, Spanish, and English.]

4 sheets. Refer to “Americæ Septentrionalis Pars I.” and “Americæ Septentrionalis Pars III.”

In: Atlas geographicus omnes orbis terrarum regiones in XLI tabulis exhibens jussu Academiae Regiæ Scient. et Eleg. Littl. Berolini: ex Officina Michaelis.

► The peninsula of "Californie" is separated from "Nouveau Mexique" and "Mexique ou N^{le} Espagne" by "Mer Vermeille". "Rio Colorado" is delineated on a straight south-southwesterly course from headwater to the gulf, receiving "R. del Coral" (Gila River) from the east. Below that confluence the river seems to bifurcate, with its western course faintly drawn and paralleled by a dotted line, before rejoining at the head of the gulf. The area at the head of the gulf is labeled "N. Navarre".

1753 25.2269

Mappa Mundi Generalis ad emendatiora exempla adhuc edita jussu Acad: Reg: scient: et eleg: litt: Boruss: descripta. ("27. Mappa Mundi Generalis".) ("I. C. Rhode del.") (Sauerbrey Sculp.") [Title in Latin; labels in Latin, German, and French.]

Boruss. ad emendatiora, quæ adhuc prodire exempla descriptus atque ad usum potissimum scholarum et institutionem juventutis editus. / Atlas géographique représentant en XLI cartes toutes les régions de la terre gravé par ordre de l'Académie Royale des Sciences et Belles Lettres de Prusse d'après les meilleurs exemplaires qui ayent parû jusqu'icy à l'usage principalement des ecoles. Berolini: ex Officina Michaelis.

► "California" is made barely to be a peninsula, separated from "Mexico ou: Neu Spanien" by a gulf (labeled, but partly illegible, apparently "Mer Vermeille". The head of the gulf twists to the west, nearly cutting off the peninsula. "f. Colorado" is delineated reaching the head of the gulf on a south-southwesterly course from a mountainous headland, with a tributary from the east-northeast about two-thirds the way along its course (probably the Gila River but seemingly too far north).

1753 25.2270

Tab: Geogr: Americæ ad emendatiora quæ adhuc prodierunt exempla jussu Acad: Reg: Scient: et eleg litt: Boruss descripta. ("2. America".) [Title in Latin; labels in Latin and French.]

In: Atlas geographicus omnes orbis terrarum regiones in XLI tabulis exhibens jussu Academiae Regiae Scient. et Eleg. Littl. Boruss. ad emendatiora, quæ adhuc prodire exempla descriptus atque ad usum potissimum scholarum et institutionem juventutis editus. / Atlas géographique représentant en XLI cartes toutes les régions de la terre gravé par ordre de l'Académie Royale des Sciences et Belles Lettres de Prusse d'après les meilleurs exemplaires qui ayent parû jusqu'icy à l'usage principalement des ecoles. Berolini: ex Officina Michaelis.

► The peninsula, "California" is separated from "Mexicvm Novum" by "Mar Vermej o Rubrum vel Purpureum". "f. Colorado" follows a straight south-southwesterly course from "Tegvaio" to the gulf, receiving "F. Coral" from the east, at which confluence the Colorado bifurcates before rejoining at the gulf.

F

Faden, William

- 1797 25.2081 **A Map of America, or the New World, wherein are introduced all the known parts of the Western hemisphere, From the Map of D’Anville; with the necessary alterations, and the addition of the Discoveries made since the Year 1761. London: Published by W. Faden, Geographer to the King and to H.R.H. the Prince of Wales, Charing-Cross. April 12th 1797.** (“W^m: Palmer sculp.”)
- ▶ The peninsula “California” is separated from “New Navarra” by “Sea of Cortes or Marvermeja” [*sic*]. “Rio Colorado” is delineated on a south-southwesterly course, the first part of which is against the west side of a linear mountain range, arriving at the head of the gulf. “R. del Coral” (Gila River) is delineated on a westerly course, turning to parallel the Colorado all the way to the gulf, although at the turn there is also a mark that seems to connect it with the Colorado creating an island around which the Colorado and Gila flow. “R. del Azul” is a tributary to the Gila from the north, paralleling the Colorado to the east of the mountain range aforementioned. North of those headwaters is an area labeled “Quivira”.

Fer, N. de [Fer, Nicolas de]

- NO DATE 25.1784 **Amerique Septentrionale Par N.De Fer.** (“Tome 2. page 323”.) [1689?] [In French.] MCLAUGHLIN 100
- McLaughlin notes date of “1689?” in checklist, “Possibly from a pocket atlas”; the online catalog record for the McLaughlin collection at Stanford gives a date of “ca. 1685”.
- ▶ “Isle Californie” is separated from “Nouveau Mexique” by “Mer Vermeille”. Only two rivers are shown on the east side of the strait: “Del Tecon R” from the northeast, with two headwater forks, and “Du Nort R” (which is the Rio Grande).
- 1645 25.1491 **Nouvelle et Exacte Description dv Globe Terrestre Reveve Corrigee et Avcmentee Svivant les Dernieeres Relations des Anglois et Hollandois par Gvillavme Blaev. 1645.** (“A Paris, Chez Anthoine de Fer Marchand detaillles, doulees Enlumineur es Cartes Geographiques, Demeurant en L’isle du Pallais, sur le Quay qui regarde la megisserie, proche le pont au Change, a l’angé de Fer. 1645”.) (“Henri le Roy Fecit”.) [In French.] SHIRLEY 364
- Shirley notes that this map was based on one by Visscher, not Blaeu; thus it is listed here under the publisher’s name. Ornamented by costumes of the world.
- ▶ The northwest coast of North America, north from the island of California, proceeds due west across the Pacific Ocean, where the land is labeled “Nouvelle Albion”. “Californie Is” is separated from “Granade” [*sic*] by a strait (not labeled). Midway on the east side of the strait is a prominent north-trending embayment—gulf— that receives at its head two rivers; there is a label, “R. d. Coral”, that runs along the length of that embayment and the river that meets it from the northeast. The other river comes from the north, with headwater by a place labeled “Rey Coramedo”.

- MCLAUGHLIN 111

 ▶ "Isle de Californie" is separated from "Nouveau Mexique" and "Vieux Mexique" by "Mer Vermeille". Midway along the eastern side of the gulf, several rivers arrive from the northeast (from north to south): an unlabeled river, "Aguchi R", "Tecon R.", and a short unlabeled river. The last two arrive independently at a bilobed embayment.

MCLAUGHLIN 196 WHEAT I:102

- 1720 25.1168 **La Californie ou Nouvelle Caroline. Teatro de los Trabajos Apostolicos de la Compa. e Jesus en la America, Sept^e. Dressée sur celle que le Viceroy de la Nouvelle Espagne envoya illy apeu d'Années a M^{rs} de l'Academie des Sciences. Par N. de Fer Geographe de sa Majesté Catolique. A Paris. dans l'Isle du Palais a la Sphere Royale 1720. [In French.]**

► The island, "Californas [*sic*] ó Carolinas" is separated from "Nuevo Mexico" by "Mare de las Californas ó Carolinas". A single embayment on the eastern coast of the strait receives at its head the "Rio del Tison" (with headwater forks), and, closer to the opening of the embayment, on its eastern side, receives "Rio grande del Coral" (the label is beyond that river's mouth, in the strait). The "Tison" and "Coral" rivers are neatly and completely shown as the only river systems in the immediate region, which reach the solitary, and diminutive, gulf. Of note is that upstream along this latter river is a short tributary from the northeast labeled "Rio Colorade" [*sic*]. Also of interest is that the Rio grande del Coral covers a significant drainage area to the east and southeast.

- 1754 25.1789 **L'Amérique Septentrionale et les Terres Polaires Arctique Dressée par N. de Fer.** ("A Paris Chez l'[]Auteur rue St Jacques, à la Sphere Royale avec Privil. du Roy 1754.") ("7" also appears at the upper right of the publisher's cartouche.) ("C. Inselin Sculp.") [In French.]

► While this is a reissue of Fer (1693, ITEM NO. 25.1787; 1705, ITEM NO. 25.1788), with a revised publisher's cartouche, the western coast of the continent has been refigured on this plate. "Californie" is made a peninsula, and at the head of "M. Vermeille" a single river (not labeled and identical in form to the river on the earlier plates) arrives from the northeast. The east and west coastlines of the gulf from that point southward are identical to the earlier plates, demonstrating that only the northern part of the strait depicted on the earlier maps was refigured.

Fine, Oronce [Finaeus, Orontius]

SHIRLEY 66

- 1540 25.1407 **Nova, et Integra Vniversi Orbis Descriptio.** [Paris.] [In Latin.]
- Although North America is labeled "Asia", its southwestern coast running up against the map edge on this double-cordiform projection shows the general area of Mexico, recognized by the label "Parias", which recalls Martin Waldseemüller's projection of 1507 (see in the [Notes for Section 1](#)). What might be mistaken for a rendering of the Gulf of California might be a misinformed portrayal of the Yucatan peninsula on the Mexican mainland, made more disorienting by the projection used in this map. Fine's 1531 map of the same title (with a different dedication), although identical at least in this area, is not cited herein for the reason that it too far antedates useful citations for this Cartobibliography, as explained in various introductory notes. Thus, the 1540 edition is as equally uninformative for the lower Colorado River region as are the two pre-1540 titles cited herein. Neither edition resembles, in the North American Southwest, Fine's somewhat more accurate 1534/1536 cordiform map, *Recens et Integra Orbis Descriptio Orontivs F. Delph. Regi⁹ Mathematic⁹ Faciebat*, which delineates a much clearer (if contrived) western coast including the label "Parias" and an unambiguous Gulf of Mexico, though North America is still labeled "Asia".

SHIRLEY 116

- 1566 25.1587 **[Map of the world, without title, in cordiform projection.]** ("Ioannes Pavlvus Cimerlinus Veronēsis in æs incidebat Anno 1566".) (Dedication: "Ill^{mo} Viro Henrico Dño. Matreours, & Comiti Arandelliaē etc. Dño. suo Colendi⁹. * * * Tuę amplitudinis dediti⁹. I^o: Paulus Cimerlinus Veroneñ.") [In Latin.]

► North America is merged with Asia to the west; in fact, the area immediately to the northwest of the Gulf of Mexico (not labeled) carries the large label, "Catay",

although to the south of the gulf is land labeled “Parias”, which indicates what today is Mexico, and on the western side of the continent from this gulf is “Messigo”. There are also various rivers that flow to “Mar De Svr” on the west, but although some are named they are indeterminate here. *The rivers flow directly to the open sea, in which many islands are portrayed off the American coast, though none of these imagined islands are the classical Californian island; thus neither strait nor gulf can be interpreted.

NOTE: A copy of this map in the library at Harvard University (accessible online at <http://id.lib.harvard.edu/alma/990088477880203941/catalog>), the copy referred to for this Cartobibliography, lacks the caption and is considered by Shirley to be a proof copy). The finished map bears the caption: **Cosmographia uniuersalis ab Orontio olim descripta.**

Font, Pedro

- 1776 25.1955 **Mapa correspondiente al diario que formó el P. F. Pedro Font del viage que hizo a Monterey y puerto de San Francisco.** (“P. F. Petrus Font fecit. Ures anno 1776.”) (“Escala de 28 leguas Mexicanas por tierra.”) [In Spanish.]
MANUSCRIPT, John Carter Brown Library, Brown University; digitized online at <https://jcb.lunaimaging.com/luna/servlet/detail/JCBMAPS~1~1~2131~109410008:Mapa-correspondiente-al-diario-que>.
 - As a manuscript this would not be cited in this Cartobibliography, but it is of importance in the history of the Colorado River and the Southwest. The map was removed from Font’s manuscript diary, cataloged by the John Carter Brown Library as “[Diario que forma el p\[adre\] fr\[ay\] Pedro Font p\[redica\]dor ap\[ostoli\]co del Colegio de la Santa Cruz de Queretaro en el viage que hizo á Monterey y puerto de San Francisco 1775 y 1776.](#)”
 - This map includes the lower Gila River and the Colorado River delta region, also delineating Font’s routes of travel, enroute to and from the West Coast, crossing “Rio Colorado” at the Gila confluence. The Colorado is sketched generally, with its mouth at a position on the northeastern side of the head of “Mar de California”. The head of the gulf is delineated with stippling, identifying mudflats and shoals.
- 1777 25.1046 **Mapa del viage que hizo el P.F. Pedro Font á Monterey y Puerto de San Francisco; y del viage que hizo el P.F. Francisco Garcés por el rio Colorado hasta su desemboque, y para arriba hasta el Moqui.** (“P.F. Petrus Font fecit. Tubutama anno 1777.”) [In Spanish.]
MANUSCRIPT, Archivo General de Indias, MP-MEXICO,537; digitized online at <http://pares.mcu.es/ParesBusquedas20/catalogo/show/21492> (©MECD. Archivos Estatales (España)).
 - As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest. Charles E. Chapman, *Catalogue of materials in the Archivo General de Indias for the history of the Pacific coast and the American Southwest* (University of California Press, Berkeley, 1919), p. 441, notes that this map had accompanied Charles’ item-no. 3001 [square brackets are part of the quotation], “1775. Oct.1 [21?]-Jan.3. 1777. Fr.Francisco Garcés”.
 - Compare also the manuscript maps cited herein, by Garcés (1777, *ITEM NO.* 25.1045), Veléz y Escalante (1777, *ITEM NO.* 25.602), Font (1778, *ITEM NO.* 25.1047), and Miera y Pacheco (1777, *ITEM NO.* 25.1115; 1778, *ITEM NO.* 25.1048). As a result of varied citations made of these maps over the years, all are cited in this Cartobibliography with clarified information provided as closely as possible based on examinations of all of these maps and information with their catalog records.
 - On this map is figured one of the first notations of what we know now as the Grand Canyon: “Puerto de Bucareli” is labeled at the confluence of “Rio Colorado” and

WHEAT I:169

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

"R. Jaquesita" (*i.e.*, Little Colorado River). This earliest non-Indigenous name for the canyon was given by Padre Francisco Garcés in 1776 during his visit to the Havasupai, honoring the Viceroy of New Spain, Antonio María Bucareli y Ursúa. Garcés's journal was not published until 1900 (see Elliott Coues, *On the trail of a Spanish pioneer* [Francis P. Harper, New York, 1900]). See also as well the published woodcut map by Manuel Villavicencio (1781, *ITEM NO.* 25.510), which, credited to Garcés and Font in 1777, likewise includes "Puerto de Bucareli" and which is the first printed map to include a name for the Grand Canyon. The Colorado River is shown with its outlet at a somewhat broadened head of "Mar de California".

NOTE: The diary mentioned here is "Expediente sobre la expedición del padre fray Francisco Garcés y su compañero fray Pedro Font, desde la misión de San Javier del Bac hasta los ríos Colorado y Gila, por la provincia del Moqui", Archivo General de Indias, GUADALAJARA,516,N.36, digitized online at <http://pares.mcu.es/ParesBusquedas20/catalogo/show/12788670> (©MECD. Archivos Estatales (España)); cataloged with a note reading in part, "Iniciado por carta fray Diego Jiménez Pérez, padre guardián del Colegio de Santa Cruz de Querétaro. Incluye: Copia del Diario de fray Francisco Garcés del viaje que hizo junto con fray Pedro Font hasta la junta de los ríos Colorado y Gila, y provincia del Moqui, escrito en Tubutama, el 3 de enero de 1777. Comprende desde el 1 de octubre de 1775 al 17 de septiembre de 1776."

- 1778 25.1047 **Plano Que conti^o las Provincias de Sonora, Pimerías, Papaguería, Apachería, Rios Gila y Colorado y tierras descubiert^s hasta el Puerto de S^o Fran^o en la California Septemtrional y hasta el Pueblo de Oraybe en la Provincia de el Moqui, con arreglo a los diarios de el Coronel D^o Ant^o Crespo y de los P.P. As a result of varied citations made of these maps over the years, all are cited in this Cartobibliography with clarified information provided as closely as possible based on examinations of all of these maps and information with their catalog records.]
- While this map portrays much of the same region as the other two maps (above), it notably omits the notation of Puerto Bucareli at the confluence of "R. Colorado" and "R. de S. Pedro Jaquesila" (Little Colorado River). Somewhat confusingly, just to the south of that confluence is another, that of "R. de S. Anton^o

Jabesua" from the southeast, and just to the north of the Jaquesila is a short tributary (not labeled), also from the southeast. There are numerous other variations between the maps. The Colorado River is shown with its outlet at a somewhat broadened head of "Golfo de Californias".

Forlani, Paolo

- 1565 25.659 **Universale Descrittione di Tvтта la Terra Conosciuta Fin Qvi.** ("Paulo forlani Veronese fecit. Ferando berteli Exc.") [In Italian.]

SHIRLEY 112 WHEAT I:11 [illustration between pp. 22/23]

► Portrays the Gulf of California and the Baja peninsula (neither labeled). At the head of the gulf arrives a prominent river system from the far northwest; in its lower reach it is labeled "Tontonteach f." and it extends well up into a continent that connects westwardly to Asia at "Zangar" and "Tibet". Perhaps confused, a river with very peculiarly drawn, bifurcating and rejoining tributaries arrives at the head of the gulf independently from the east, but tributaries to it are from the northwest and north, which may be identified with the Gila and Colorado Rivers. Also of note is the label, "La Sete Cita" to the east of this latter river system.

[Forlani, Paolo]

- 1566 25.569 **IL Disegno del discoperto della noua Franza, ilquale s'e hauuto ultimamente dalla nouissima nauigatione de Franzesi in quel luogo: Nel quale si uedono tutti l'Isolle, Porti, Capi, et luoghi fra terra chein quella sono. Venetys æneis formis Bolognini Zaltery Anno. M.D.LXVI.** [Venice]: [engraved by Bolognini Zaltieri]. [In Italian; with title vignette in Italian and Latin.]

WHEAT I:12 [credited to Zaltieri; with illustration facing p. 24]

Produced by Zaltieri without credit to Forlani. Known best as the first map to portray the triangular form of North America, separated from Asia by a narrow strait ("Streto de Anian"). The Gulf of California (not labeled) is quite poorly formed.]

► At the eastern part of the head of the gulf a river enters from the northeast, which flows from the confluence of "Tigna f" [Ringworm River] (flowing from the north from a region labeled "Qvivira Pro:") and "R. Tontonteach" (flowing from the northeast from "Civola Hora" and "Granata"; at that confluence is the place name for "Tontonteach". "Tigna f" itself has two prominent headwater streams, and closer to its "Tontonteach" confluence it receives from the north-northwest "R. Axa" that comes from "Qvivira Pro:". It is somewhat unclear as to which stream gives its name to the Colorado at the gulf.

This map is included in the atlas by Antoine Lafréry [1575?], *Geografia Tavole moderne di geografia de la maggior partedel [sic] mondo di diversi avtori raccolte et messe secondo l'orine di Tolomeo con idisegni [sic] di molte citta et fortezze di diverse provintie stampate in rame con stvdio et diligenza : in Roma.*]

Foster, George

- 1738 25.1817 **A New and Correct Map of America laid down According to the Accurate Improvements of Senex, Moll and other Modern Geographers. Humbly Inscribed to his Royal Highness Frederick Prince of Wales. 1738.**

MCLAUGHLIN 213 [State 3]

► The island, "California" (also labeled "New Albion"), is separated from "New Mexico" by "Gulf of California or Red Sea". Midway on the east side of the strait is a mightily confused arrangement of rivers and their corresponding embayments (north to south): (1) "R. Guia" reaches the strait directly from the northeast without reaching an embayment; (2) an unlabeled river reaches the strait directly from the north-northeast, turning to the west to avoid an embayment to the south and reaching the strait without entering an embayment; (3) and (4) enter a forked embayment, the northerly river (not labeled) coming from the northeast and striking the head of the

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

western fork, and the southerly, very short river, "R d'Augochi", coming from the northeast and striking the head of the eastern fork; (5) and (6) a single embayment that receives at its head "Taon R" from the north-northeast, which itself has a tributary from the east, "R Good Hope" (rivers 4 and 5 head in an area labeled "Great Teguaio", north of which is labeled "Parts Unknown"), and the east side of this last embayment receives from the east-southeast a large river with several headwater forks (including "R Azul" and "Senaca R") but along which it receives a tributary, "R Coralado" [*sic*] from the northeast. ("The North R.", which is the Rio Grande, correctly reaches the "Gulf of Mexico".)

NOTE: Although the name "R[io] Coralado" seems to conflate Rio Colorado and Rio Coral (Gila River), the river's poor portrayal nonetheless is distinct from the similarly poorly portrayed Gila River drainage.

MCLAUGHLIN 213 [State 4]

NO DATE 25.1818

A New and Correct Map of America laid down According to the Accurate Improvements of Senex, Moll and other Modern Geographers. Humbly Inscribed to his Royal Highness George Prince of Wales. [1752?]

With the exception of awkward reengraving in the cartouche, this is the same map as Foster (1738, *ITEM NO.* 25.1817).

► The island, "California" (also labeled "New Albion"), is separated from "New Mexico" by "Gulf of California or Red Sea". Midway on the east side of the strait is a mightily confused arrangement of rivers and their corresponding embayments (north to south): (1) "R. Guia" reaches the strait directly from the northeast without reaching an embayment; (2) an unlabeled river reaches the strait directly from the north-northeast, turning to the west to avoid an embayment to the south and reaching the strait without entering an embayment; (3) and (4) enter a forked embayment, the northerly river (not labeled) coming from the northeast and striking the head of the western fork, and the southerly, very short river, "R d'Augochi", coming from the northeast and striking the head of the eastern fork; (5) and (6) a single embayment that receives at its head "Taon R" from the north-northeast, which itself has a tributary from the east, "R Good Hope" (rivers 4 and 5 head in an area labeled "Great Teguaio"), and the east side of this last embayment receives from the east-southeast a large river with several headwater forks (including "R Azul" and "Senaca R") but along which it receives a tributary, "R Coralado" [*sic*] from the northeast. ("The North R.", which is the Rio Grande, correctly reaches the "Gulf of Mexico".)

NOTE: Although the name "R[io] Coralado" seems to conflate Rio Colorado and Rio Coral (Gila River), the river's poor portrayal nonetheless is distinct from the similarly poorly portrayed Gila River drainage.

Foxe, Luke

1635 25.2477

[Partial north polar projection to display Northwest Passage.]

In: Foxe, Luke, *North-VVest Fox, or, Fox from the North-west passage. * * ** By Captaine Lvke Foxe of Kingstone vpon Hull, Capt. and Pylot for the Voyage, in his Majesties Pinnace the Charles. Printed by his Majesties Command. London: B. Alsop and Tho. Favvctet, facing p. 1.

► The publication pertains to Foxe's explorations of the Northwest Passage as the 16th such voyage after others also discussed herein. This partial north polar projection includes—at its lower-left margin and overlapping the ring of enumerated lines of longitude and extending to the edge of the paper—the northern extent of the island of California ("Part of California") and the island-filled strait between it and the mainland. These clearly are borrowed from another map. On the eastern side of the strait is displayed, roughly, three linear embayments (not labeled), with at the head of the center one a diagrammatic building with the label "Rey Coromeda", which can be identified as the Colorado River. Of note, to the east of these, is a similarly crude

embayment-like drawing labeled “Part of R. del North” (*i.e.* Rio Grande), which interestingly is not depicted as a river but as an embayment, the mouth of which is off the map to the southwest.]

Fráchus, Jacobus [Franco, Giacomo]

SHIRLEY 152

NO DATE 25.1588

Cosmographia Unversalis ab Orontio Olim Descripta. (“Jacobus Fráchus. fec.”) (“Rafael. faitel for.”) [Venice.] [Ca. 1590.] [In Latin.]

This is a reduced-size copy of Fine (1566, ITEM NO. 25.1587), with different decorations and border elements.

► North America is merged with Asia to the west; in fact, the area immediately to the northwest of the Gulf of Mexico (not labeled) carries the large label, “Catay”, although to the south of the gulf is land labeled “Parias”, which indicates what today is Mexico, and on the western side of the continent from this gulf is “Messigo”. There are also various rivers that flow to “Mar De Svr” on the west, but although some are named they are indeterminate here.

Francoso, Diego

WHEAT I:208

1787 25.1182

Californias: Antigua y Nueva. [México.] (“Notas. En èsta Carta no se escribⁿ los nombr^s de tod^s las Yslas, P^{tos} Rios, y demàs, p^r ser hecha p^r solo demostrar lo q^e andubo, y Mision^s q^e fundò en la Nvā Calif^a el V.P. Fr. Junipero Sèrra, presid^{te} de èllas. La long^d es arreglada el meridiano de S. Blas. Diego Francoso Sc. Mex^{co} a^o 1787.”) [In Spanish.]

► This map portrays only the Californias, “NUEVA CALIFORNIA” and “ANTIGUA CALIFORNIA” (typographically thus), with “Golfo de California”. At the head of the gulf is shown, simply, “R Colorado” with “R Gila” a tributary to it farther to the north.

This map is also noted by historians to be the first to delineate a boundary between Old and New California.

Fürst, Paulus [Fürst, Paul]

NO DATE 25.1486

[Gores for a 20-cm globe.] [Nuremberg.] (“Typis Iacobi ab Heyden Argentinae.”) [Ca. 1660.] [In Latin.]

► The western coast of North America spans four gores. The peninsula, “California”, is separated from “Nova Hispania” by “M. Vermeio”. The head of the gulf receives three rivers (none labeled): 1) a river from the northwest, with two tributaries, with headwater to the east of “Serra Nevada” [*sic*] and passing through an area labeled “Totontec”; 2) a river from the north with two headwaters; 3) a river from the northeast with headwater by a place labeled “Cerola”.

G

Gage, Thomas

1655 25.1668

Americae Descrip. [In Latin; volume is in English.]

In: Gage, Thomas, *A new survey of the West-Indias: or, The English American his travail by sea and land: containing a journal of three thousand and three hundred*

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

miles within the main land of America. * * * Also, a new and exact discovery of the Spanish navigation to those parts: And of their dominions, government, religion, forts, castles, ports, havens, commodities, fashions, behaviour of Spaniards, priests and friars, blackmores, mulatto's, mestiso's, Indians; and of their feasts and solemnities. * * * The second edition enlarged by the author, and beautified with maps. By the true and painful endeavours of Thomas Gage, preacher of the Word of God at Deal in the County of Kent. London Printed by E. Cotes, and sold by John Sweeting at the Angel in Popes-head-alley, M. DC. LV.

► The peninsula, "California", is separated from "Nova Granada" by "Mare Vermeio". Three rivers arrive at the immediate head of the gulf: 1) a prominent river (not labeled) from the northwest, which has headwaters from the north, draining a region labeled "Tom. Reg."; 2) "Caramara flu.", which drains from the north in "Nova Granada"; 3) a smaller river (not labeled) from the northeast.

NOTE: The river "Caramara", or "Coromara", was assumed by contemporary geographers to be the same as that of Marco Polo's river in China.

Garcés, Francisco Tomás Hermenegildo

WHEAT I:170 [with illustration facing p. 92]

1777 25.1045

Mapa formado sobre el diario de viage que hizo el P.F. Fran^{co} Garcés al Rio Colorado, S^o Gabriel y Moqui en 1777. Baquioba. [In Spanish.]

MANUSCRIPT, Archivo General de Indias, MP-MEXICO,535; digitized online at <http://pares.mcu.es/ParesBusquedas20/catalogo/show/21490> (©MECD. Archivos Estatales (España)).

- As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest. Charles E. Chapman, *Catalogue of materials in the Archivo General de Indias for the history of the Pacific coast and the American Southwest* (University of California Press, Berkeley, 1919), p. 441, notes that this map had accompanied Charles' ITEM NO. 3527, "1777. Apr. 18. Queretaro. Fr. Diego Ximenez Perez to [José de Gálvez]." [square brackets are part of the quotation]. This map includes the paths of journeys taken by Padre Francisco Garcés. (Garcés's journal was not published until 1900; see Elliott Coues, *On the trail of a Spanish pioneer* [Francis P. Harper, New York, 1900].)

- Compare also the manuscript maps cited herein, by Font (1777, **ITEM NO.** 25.1046; 1778, **ITEM NO.** 25.1047), Veléz y Escalante (1777, **ITEM NO.** 25.602), and Miera y Pacheco (1777, **ITEM NO.** 25.1115; 1778, **ITEM NO.** 25.1048). As a result of varied citations made of these maps over the years, all are cited in this Cartobibliography with clarified information provided as closely as possible based on examinations of all of these maps and information with their catalog records.

NOTE: The diary mentioned in the map title is "Expediente sobre la expedición del padre fray Francisco Garcés y su compañero fray Pedro Font, desde la misión de San Javier del Bac hasta los ríos Colorado y Gila, por la provincia del Moqui", Archivo General de Indias, GUADALAJARA,516,N.36, digitized online at <http://pares.mcu.es/ParesBusquedas20/catalogo/show/12788670> (©MECD. Archivos Estatales (España)); cataloged with a note reading in part, "Iniciado por carta fray Diego Jiménez Pérez, padre guardián del Colegio de Santa Cruz de Querétaro. Incluye: Copia del Diario de fray Francisco Garcés del viaje que hizo junto con fray Pedro Font hasta la junta de los ríos Colorado y Gila, y provincia del Moqui, escrito en Tubutama, el 3 de enero de 1777. Comprende desde el 1 de octubre de 1775 al 17 de septiembre de 1776."

► The map includes one of the first notations of what we know now as the Grand Canyon: "Puerto de Bucareli" is labeled at the confluence of "R. Colorado" and "R. Jaquesila" (Little Colorado River). This earliest non-Indigenous name for the canyon was given by Garcés in 1776 during his visit to the Havasupai, honoring the Viceroy of New Spain, Antonio María Bucareli y Ursúa. Interestingly, the confluence is shown west-northwest of "Oraibi", with "R. Jaquesila" passing by the "Moqui" pueblos

just to their northwest, dipping southwestward before turning northwestward to reach the Colorado along a west-trending reach of that river. It is there that the Colorado, having come generally from the northeast, again resumes a southwesterly course at the entrance to a very mountainous region. Just to southwest of the confluence another, shorter tributary (not labeled) reaches the Colorado from the southeast; this is Cataract Creek, Garcés's path is shown reaching it not far upstream from its confluence with the Colorado. The only other tributaries to the Colorado are (upstream from the Little Colorado) and unlabeled river from the northeast that is likely the San Juan River; "R. de S^{ta} Maria" (Bill Williams River) from the east-northeast; and "R. Gila" from the east-northeast. Between the Gila confluence and the somewhat broadened head of "Mar de California", the Colorado follows a southwesterly course. To the west of the mouth of the Colorado is an interestingly shown embayment with hints of several tributaries reaching it from the north and northwest.

See also as well the published woodcut map by Manuel Villavicencio (1781, [ITEM NO. 25.510](#)), which, credited to Garcés and Font in 1777, likewise includes "Puerto de Bucareli" and which is the first printed map to include a name for the Grand Canyon.

Gastaldi, Giacomo

- | | | |
|---------|---------|--|
| NO DATE | 25.1475 | <p>Universale della Nvovamente \ Parte del Mondo Ritrovata. [No imprint.] [1565?] [In Italian.]</p> <p>► By the typography it would seem that the entirety of North America is labeled "La Nova Spagna". A pudgy Californian peninsula (not labeled) is separated from the mainland by "Mar Vermiglio". The head of the gulf narrows considerably and reaches in a narrow, tapering line due northwest into the continent where nearby place names are "Cicuich", "Axa", "Cucho", "Tiguus", and "Cibola".</p> <p>The upper left and right corners have the numbers 455 and 456, thus this is likely to be from, or intended for, a larger publication. There are variants, of other dates. The Stanford University Library catalog record indicates for this edition, ". . . Ramusio's map of the Western Hemisphere [is] the earliest obtainable map to accurately depict the Americas . . . attributed to Giacomo Gastaldi. It is the first map to depict the names derived from the travels of Francisco Vasquez Coronado in the Southwestern US, including Quivira, Sierra Nevadas, Cicuic, Axa, Cucho, Cibola and Tiguas." Note that the "first" refers to place names more than to physical geography. (The reference to Ramusio is to Ramusio, 1556, ITEM NO. 25.762.)</p> |

Geelkercken, Nicolaes van

SHIRLEY 269

- NO DATE 25.456 **Universi orbis tabula de integro delineata.** Amsterdam[?]. [Ca. 1610.] [In Latin.]
 ► “America Septentrionalis” includes a Gulf of California separating “California” and “Nova Mexico” at its head, where two vague tributaries enter. Other labels are illegible at the scale of reproduction in Shirley.

Gendron, Pedro

- 1754 25.1458 **La America Dispuesta segun el Sistema de M^r Hasius profesor de Mathematicas en la Universidad de Witembergo, anadidos los ultimos descubrimientos por M. de Lisle. Dedicado A Ex^{mo} S^r Conde de Povolide Señor de las Villas de Castro Verde, parabela, y otras Gentil hombre de Camara de sua Alesa A S^r Infante D. Antonio de Portugal. Por Pedro Gendron. Año 1754. [Madrid?] [In Spanish.]**
 ▶ The peninsula, “California”, is separated from “N. Navarra” by “Mar Bermejo”. “R. Colorado” arrives at the head of the gulf from the northeast, receiving the Gila River (not labeled) from the east. Downstream from that confluence is shown a large island in the river. The Colorado heads in an area labeled “Tavaio habitado por los Tiguas”, although it is depicted as running along the boundary between “Nveva Albion” and “Megico Nvevo”.

Gilbert, Humphrey

- 1576 25.400 **A General Map, Made Onelye for the Particvler Declaration of This Discovery.** SHIRLEY 136
In: A discourse of a discoverie for a new passage to Cataia . . . London.
 ▶ A stylized Gulf of California, in the simple form of two pointed gulfs open to “Mare facificum vulgo Mare del Sur”; one gulf aligned northward, the other east-northeastward. Between these are labeled “Quiuia” and “Ceuola”. Map is simplified after one by Ortelius, 1564.

Girault, S. [Girault, Simon]

- 1592 25.418 **Le Globe Terrestre. [In French.]** SHIRLEY 181
In: Globe dv monde : contenant vn bref traité du ciel & de la terre. Lengres: Iehan des Preyz [Jean des Preyz], 91 pp.
 ▶ The North American continent is labeled “La Merique [*sic*] ov Indes Nouvelles.” A narrow Gulf of California is depicted with tributary streams at its head, one of which drains the eastern portion of the continent.

Gio. Tommaso Masi e Comp. [firm]

- 1777 25.2388 **Nuova ed esatta Carta Della America Ricavata dalle Mappe, e Carte piu approvate.** (“Andrea Scacciati Scolpi.”) (“Giuseppe Pazzi Scrisse.”) [In Italian.]
In: Atlante dell’ America contenente le migliori carte geografiche, e topografiche delle principali città, laghi, fiumi, e fortezze del Nuovo Mondo : con una succinta relazione dei diversi stabilimenti Europèi in quella parte di globo, e principalmente dei luoghi, che servono adesso di teatro alla prefente guerra fra i Coloni Inglesi, et la Madre Patria. Livorno MDCCLXXVII. Presso Gio. Tommaso Masi, e Comp. Con Approvazione.
 ▶ At the head of “G. di California”, “Ouiquintas F.” (the Colorado River!) arrives on a relatively short course from the northeast, the region north of it shown as blank. “F. Gela” (Gila River) is a tributary from the east.

Girava [Girava, Jeronimo]

- 1556 25.300 *Dos libros cosmographia : compuestos nueuamente por Hirnymo Girava Tarragonès : con el tiempo Girava.* Milan, 271 pp., map. [In Spanish.]
See **MAP** of the world.
► Includes very stylized “Nveva España” with “Mar roxo” possibly indicating Gulf of California with tributary river.

Girava, Jeronimo de

SHIRLEY 101

- 1556 25.384 **Typo de la Carta Cosmographica de Gaspar Vopellio Medebvrgense.** [In Italian.]
Shirley gives place of printing as Venice; Nordenskiöld (1889) gives place of printing as Milan.
Map of the world noted by Shirley to be “A reduced version of Caspar Vopell’s wall map of 1545, now lost.” (p. 116).
► A remarkably imaginative North American continent depicts a due west- to northwest-trending Pacific coast directly from the Panamanian isthmus to “Asia”; the entire region is labeled “Nveva España”. Along that coast, due north of the island of “Malucas”, is a large embayment labeled “Mar roxo”, which tapers in a meandering fashion a considerable distance northward into the continent, where it heads in a mountainous area. Two nearby, meandering waterways also reach “Mar de Svr” generally from the north, each with an isled delta; the western one of these is a large system draining even from “India Oriental”.

Godson, W.

- NO DATE 25.1408 **A New and Correct Map of the World Laid down according to the Newest Observations & Discoveries In several different Projections: Including y̅ Trade Winds[,] Monsoons[,] Variation of the Compass, and Illustrated with a Cœlestial Planisphere, the various Systems of Ptolomy, Copernicus, and Tycho Brahe. Together wth y̅ Appearances of the Planets &c.** (“Sold By George Willdey at y̅ great Toy & Print Shop, y̅ corner of Ludgate-street next S^t Pauls-Church Yard London.”) (“W. Godson Delin^t.”) [1702.]
► “Isle of California” is separated from “New Mexico” by a strait (not labeled). On the eastern side of the strait is an embayment into which two rivers independently flow; one from the northeast, the other from the east-southeast.

Golikov, Ivan Ivanovich [Голиков, Иван Иванович]

- 1787 25.1439 **Генеральная карта, представляющая удобные способы к умножению Российской торговли и мореплаванию по Тихому и Южному океану** [General’naya karta, predstavlyatsushchaya udobnye sposoby k umnozheniyu Rossyskoy trgovli i moreplavaniyu po Tikhomu i Yuzhnomu okeanu] [General map presenting the convenient methods of increasing Russian trade and navigation in the Pacific and Southern Oceans]. [Saint Petersburg, Russia]: [no imprint]. [In Russian.]
► Map includes the southwestern part of North America. The peninsula, “Калифорния” (California), is separated from “Сонора” (Sonora) by “алое Море” (sic, Scarlet Sea). The gulf narrows progressively toward the north, where it meets entering there “Р. Колорадо” (i.e., Река Колорадо) (Reka Kolorado, Colorado River), which follows a short course from the northeast, with headwater by mountains by “С. Фе” (Santa Fe). Some distance from the head of the gulf the Colorado receives from the east “Р. Гила” (i.e., Река Гила) (Gila River), which is portrayed as a more substantial river with multiple tributaries.

Goos, A. [Goos, Abraham]

MCLAUGHLIN 1

- 1624 25.1763 **'t Noorder deel van West-Indien.** ("Goos sculpsit". [with monogram, thus]) ("Fol. 65".)
[In Dutch.]
In: West-Indische Spieghel, waer inne men sien kan, alle de eylanden, provintien, landschappen, het machtige ryck van Mexico, en 'tgout en silver-rycke landt van Peru. 'Tsampt de coursen, havenen, klippen, koopmanschappen, etc. soo wel inde Noort als in de Zuyt-zee. Als mede hoe die vande Spanjaerden eerst ge invadeert syn. Door Athanasium Inga, Peruaen, van Cusco. 'tAmstelredam: By Broer Iansz. ende Iacob Pietersz. achter, Boeckvercooper op den Dam/ inde Wachter.
► The island, "California", is separated from "Nova Granada" by "Mar Vermeio". Midway along the eastern side of the strait are two principal embayments. The northwestern one receives "R de Anguichi" from the north; the southeastern one receives "R. del Tecon" from the north (which has two headwater tributaries from the north and northeast that come from a region labeled "Rey Coramedo"), and "R. d. Corall" arrives independently into this embayment from the north-northeast. "Pueblos de Moqui" are situated due east of these rivers.
- 1643 25.1764 **'t Noorder deel van West-Indien.** ("Goos sculpsit" [with monogram, thus]) ("Fol. 51".)
[In Dutch.]
In: Journalen van drie Voyagien/ 'tAmstelredam: By Iacob Pietersz Wachter, Boeck-verkooper op den Dam/ inde Wachter.
The same map as in Goos (1624, ITEM NO. 25.1763).
► The island, "California", is separated from "Nova Granada" by "Mar Vermeio". Midway along the eastern side of the strait are two principal embayments. The northwestern one receives "R de Anguichi" from the north; the southeastern one receives "R. del Tecon" from the north (which has two headwater tributaries from the north and northeast that come from a region labeled "Rey Coramedo"), and "R. d. Corall" arrives independently into this embayment from the north-northeast. "Pueblos de Moqui" are situated due east of these rivers.

Goos, Pieter

- 1666 25.1647 **Paskaerte Van Nova Granada. en t'Eylandt California. t'Amsterdam by Pieter Goos op't Waater inde Vergulde Zeespiegel A° 1666.** [In Dutch.]
In: De Zee-Atlas, ofte water-weereld (Amsterdam).
► The island, "California", is separated from "Nova Granada" by a strait (not labeled). Only the mouths of rivers are depicted. Midway on the east side of the strait are "R. de Anguchi" at the head of a north-trending embayment; and "R. del Tecon" and "R. de Coral" in one embayment, the former north-trending and the latter north-northeast trending.
Reissued in various eds. thereafter. Compare also Loon and Waesberge (1668, ITEM NO. 25.1648).
- 1667 25.2251 **Orbis Terrarvm Nova et Accvratissima Tavla. auctore Petro Goos. / Nieuwe Werelt kaert uyt gegeven tot Amsteldam by Pieter Goos.** [In Latin with title in Latin and Dutch; volume in French.]

► The island, "California" is separated from "Nova Granada" by a strait (not labeled). Midway on the eastern side of the strait is an embayment into which a short river (not labeled) flows, and a longer river with two headwater forks (not labeled)

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

reaches the western “cape” of the embayment from the north, originating near a place-name labeled “Rey Cormedo”; east of this river is “Pueblos de Moqui”.

- 1667 25.2252 **Paskaerte Van Nova Granada. en t'Eylandt California. t'Amsterdam by Pieter Goos op't Waater inde Vergulde Zeespiegel A? 1666.** [In Dutch; volume in French.]
In: L'atlas de la mer, ou monde aquaticque, representant toutes les costes maritimes de l'universe descourvertes & cogneues. Tres necessaire & commode pour tous pilotes, maistres de navire & marchands. Mis nouvellement en lumiere & imprimé. Amsterdam: Chez Pieter Goos.
 This is the same as Goos (1666, **ITEM NO.** 25.1647).
 ► The island, “California”, is separated from “Nova Granada” by a strait (not labeled). Only the mouths of rivers are depicted. Midway on the east side of the strait are “R. de Anguchi” at the head of a north-trending embayment; and “R. del Tecon” and “R. de Coral” in one embayment, the former north-trending and the latter north-northeast trending.
-

Green, John

- 1753 25.1140 **A chart of North and South America, including the Atlantic and Pacific Oceans, with the nearest coasts of Europe, Africa, and Asia.** London: T. Jefferys, 6 sheets.
 ► “Vermilion Sea” separates the peninsula of “Kalifornia” from a part of “New Albion”. North of the head of the gulf converge “R. Colorado” and the larger “Rio Grande”; between the confluence and the gulf the river bifurcates before rejoining at the head of the gulf.
-

Greene, Robert

- 1676 25.1137 **A new mapp of the world By Robert Greene at the Rose & Crown in Budg row.** [London.]
 ► “California” is shown as an island. On the eastern side of the strait separating it from “Nova Granada” is a small embayment into which two rivers flow, one them a little more prominent and has headwater forks. East of these rivers is the label, “Pueblos de Moqui”.
-

Grent, Will. [Grent, William]

- 1625 25.475 **A new and accvrate map of the world drawne according to the truest descriptions, latest discoueries, and best obseruations that haue been made by English or strangers. VVith briefe and most plaine notes vpon the vvhole body of cosmographie, for the easie vnderstanding thereof: pleasant and vsefull for all such as desire to know further then of their owne home.** [London]: “Are to be sould by Tho: Ieñer [Thomas Jenner] at the white Beare in Cornehill”.
BROADSIDE, 93 × 75 cm, with letterpress text surrounding the 68 × 42-cm map.
 ► The North American continent is labeled “America Mexicana”. “California” is portrayed as an island with a flat, east-west northern shore, though north from there is a broad waterway separating it from “Anian” (also a part of “America Mexicana”) with suggestions that it connects with the “Hudsons bay” area. Several tributaries flow to the eastern side of the strait. Although the labels are too reduced for legibility in Shirley’s reproduction, a detail of the area of California is displayed in an unnumbered figure on p. 341, which notes three tributaries (not labeled) from an area labeled “Rey Coronado” that is westerly from an area labeled “People of Neuw Mexico”. The area presumably that is Sonora is labeled “Marata”. The strait is not named.

SHIRLEY 313

Güssefeld, F. L. [Güssefeld, Franz Ludwig]

WHEAT 241

- 1797 25.1187 **Charte von Nord America Nach astronomischen Bestimmungen und den neuesten Charten von Dalrymple, Arrowshmit, Edwards, u.a.m. neu entworfen von F. L. Güssefeld. Nürnberg bey den Homannischen Erben. 1797. Mit Röm. Kaiserl. allergn. Freyheit.** ("I. Rausch Sc. Nürnrb.") [In German.]
- ▶ "California" is separated from "Neu Navarra" by "Marj Verejo". "Martyres f." flows a short distance from the north-northeast before it enters the head of the gulf, after having received a tributary from the east labeled on its two forks (without clear indication as to which is the principal stream), "R. Gr. d. I Apostolo." [sic] and "Hila f." Between the confluence and the gulf, the river bifurcates and enters the gulf in two independent courses.

Gvtiero, Diego [Gutiérrez, Diego]

- 1562 25.138 **Americae sive Quartae Orbis Partis Nova et Exactissima Descriptio Avctore Diego Gvtiero Philippi Regis Hisp. etc. Cosmographo. Novvs Orbis. [In Latin.]

In: Anghiera, Pietro Martire d', *De orbe nouo Petri Martyris Anglerii Mediolanensis, protonotarij, & Caroli Quinti senatoris decades octo, diligenti temporum obseruatione, & vtilissimis annotationibus illustratae, suóque nitori restituae, labore & industria Richardi Hakluyti, Oxoniensis Angli : additus est in vsum lectoris accuratus totius operis index.* Parisiis: Apud Guillelmum Aauray, via D. Ioannis Bellouacensis, sub insigni Bellerophontis coronati.

► This map, "Novvs Orbis", engraved by Philippe Galle, and dedicated to Richard Hakluyt, editor of this Latin edition, depicts "Nuevo Mexico" and a river extending from the head of the Gulf of California to an imagined large lake in the western interior of North America. The dedication is presented in a cartouche: "Doctiss. et ornatiss. Rich. Hakluyto F.G.S. Cui potius quam tibi Orbem hunc novum dicassem: cum tu assiduis eruditiss. libris tuis ipsum eundem in dies illustriorem reddas. Eum igitur Uti tua humanitate dignum est accipe, teq nos vicissim amabimus. Paris. cal. Maij. MDLXXXVII."

Wheat (1957, Volume 1, p. 190) remarks, "Hakluyt had this map prepared for Volume II of his *Voyages*, but this volume may not have been ready for publication, so he used the map to illustrate the Peter Martyr, to which it had no pertinence."

[Halley, Edmund]

McLAUGHLIN 207

1728 25.1603

[Sea chart of the world.]

In: *Atlas Maritimus & Commercialis : or, a General view of the World, so far as relates to Trade and Navigation: Describing all the Coasts, Ports, Harbours, and Noted Rivers, according to the Latest Discoveries and most Exact Observations : Together with a Large Account of the Commerce Carried on by Sea between the several Countries of the World, As likewise of all Inland Trade by means of Navigable Rivers; The Rise, Progress, and Decay thereof, in its Various Branches; With Methods for farther Improvements. To which are Added Sailing Directions for all the Known Coasts and Islands on the Globe; With a Sett of Sea-charts, some laid down after Mercator, but the greater Part according to a New Globular Projection, Adapted for measuring Distances (as near as possible) by scale and Compass, and Authorized by Letters Patent under the Great Seal of Great Britain.* London: Printed for James and John Knapton, William and John Innys in St. Paul's Churchyard; John Darby in Bartholomew-Close, Arthur Bettesworth, John Osborn and Thomas Longman in Pater-noster-Row; John Senex in Fleetstreet; Edward Symon in Cornhil; Andrew Johnston in Peters Court in St. Martins Lane; and the Executors of William Taylor deceas's.

► "California" is an island separated from "New Spain" by "Mar Vermejo or Red Sea". Only the mouths of rivers are depicted. Midway along the eastern side of the strait are "R de Anguchi", positioned at an embayment, and "R Coral", positioned on the eastern one of a twin embayment.

Happeli, Everh. Gv. [Happell, Eberhard Werner]

McLAUGHLIN 92

1684 25.1782

[Map of the Americas.] ("Heinricus Irnsingerus Sculpsit. A^o 1684.") [In Latin; volume in German.]

In: Happell, Everh. Gv., *Historia moderna Europæ, oder eine historische beschreibung deß heütigen Europæ* Ulm: druckts und verieges Matthæus Wagner / Anno 1692. [This map, with an accompanying map of the eastern hemisphere, follows p. [xxiv].]

► The island, "California", is separated from "Nova Granada" by a strait (not labeled). Several rivers on the east side of the strait are shown, but only "R. del

Norte" (Rio Grande) is labeled. North of that river are two rivers that strike the strait from the north-northeast; the larger of the two has two headwater forks, and to the east of these two separate river systems is "Pueblos de Moqui".

Haræi, F. [Verhaer, Franciscus]

- 1614 25.462 **Novvs typvs orbis, ipsvs globvs, ex analemate Ptolomæi didvctvs, stvdio F. Haræi.** Antverpiae A.C. [In Latin.]
- ▶ The Gulf of California separates "California" from "Nova Hispania", and into the head of which three tributaries run. Of note in the area drained by the principal tributary, to the northeast, are "Ceoula" and "Sept citas".

Hashimoto, Sōkichi [橋本宗吉]

MCLAUGHLIN 243

- 1796 25.1056 噶蘭新譯地球全圖 [Oranda shinyaku chikyū zenzu] [New translation of the map of the whole earth]. [Kyoto]: Okada Shinjiro, Asano, and Kitazawa. (Examined by Sekisui Nagakubo of Mito.) [In Japanese, with elements in Chinese orthography.]
- Cover title (in Dutch): **Algemeene Waereld Kaart.**
- Woodblock or copperplate; 6 states recorded. One state is from a different publisher (Osaka: Rinzo Soya [Sotani]). Also later eds.
- WHEAT I:238 (1957, Volume I, pp. 153, 245) describes a copy as "printed in Yedo (Tokyo)", "one Mito Sekiusi being named as its author". The copy seen by Spamer is at Stanford University Libraries, accessible online at <https://searchworks.stanford.edu/view/vs669fp1439> with title, in square brackets, "[Oranda shinyaku chikyū zenzu : The complete map of the whole World, newly translated from Dutch sources]". Title in Chinese orthography from WorldCat, which corresponds to the text at upper-left of sheet.
- ▶ The sheet portrays two world hemispheres surrounded by copious text. The Gulf of California is shown as a strait, with the adjacent portion of the continent prominently labeled "北亞墨利加" [Běi yà mò lìjiā] [North America]. The middle of the eastern portion of the gulf is portrayed as mountainous. One very short river, flowing into the gulf from the northeast, is shown to the south of this area.
- NOTE: Other states seen are without text or with noticeably variant text and layout (for example, John Carter Brown Library, Brown University (<https://jcb.lunaimaging.com/luna/servlet/detail/JCBMAPS~1~1~3854~101979:Oranda-shinyaku-chikyū-zenzu=-The-m>)). [Sites accessed March 2020.]

Hederich, Benjamin

- 1733 25.1605 **Novissima Americae Repraesentatio.** [In Latin; volume in German.]
- In: M. Benjamin Hederichs, Rect. Schol. Hayn. Anleikung Zu den fürnehmsten Historischen Wissenschaften, Benanntlich der Geographie, Chronologie, Genealogie und Heraldica, Der Historia Vniversali, Notitia Auctorum, Den Römischen Antiquitäten und der Mythologie, So fern solche einem politen Menschen insonderheit aber denen, so die Studia zu profequiren gedencken, nützlich und nöthig. Mit Königl. Poln. u. Churs. Sächs. Privilegio. Fünfte und mit einigen nützlichen Land-Chärtgen zum ersten mahl vermehrte Auflage.* Berlin: Christoph Gottlieb Nicolai.
- Map, "Tab VI", faces p. 76.
- ▶ The island, "California" (labeled "Nova Albion" at its northern end), is separated from "Nova Granada" by "Mare Vermeio s. Mare rubrum". Midway along the eastern side of the strait is a prominent northeast-trending embayment, which at its head independently receives to rivers (not labeled); one from the northeast, the other from the east-southeast.

Hennepin, Louis de

- MCLAUGHLIN 124 [STATE 1] WHEAT I:77
- 1697 25.1342 **Carte d'un tres grand Pays entre le Nouveau Mexique et la Mer Glaciale Dediée a Guillaume III^E Roy de la Grand Bretagne Par le R.P. Louis de hennepin Mission: Recol: et Not: Apost: Chez G. Broedelet a Utreght.** ("J. V. Vianen del et fecit".) [In French.]
 ▶ "Californie." (with a small label in its northern part, N. Albion") is portrayed in an unusual configuration, in the form wherein it has been depicted on many maps as an island, separated from "Nouveau Mexique" by "Mar Vermeilie [sic] ou Mer Rouge.", with principal rivers entering the gulf from the mainland; yet California's form here is a fattened peninsula, narrowing considerably to its north where it is barely joined to the mainland with a short river from the northwest nearly cutting it off. In turn, there is a narrow strait to the north of California that separates California from an immense "Terre de Iesso." that occupies the entirety of the northern Pacific Ocean between America and Asia. None of the rivers coming to the gulf are labeled, though in the middle part of the eastern shore is a significant river with headwater forks coming from the northeast that can be taken as the Colorado, which enters an embayment north of the only place name on this side of the gulf, "Port de S^{te} Clara".
- MCLAUGHLIN 124 [State 2]
- 1698 25.1343 **Amerique Septentrionalis Carte d'un tres grand Pays entre le Nouveau Mexique et la Mer Glaciale Dediée a Guillaume III^E Roy de la Grand Bretagne Par le R.P. Louis de Hennepin Mission: Recol: et Not: Apost: Chez C. Specht a Utreght 1698.** ("J. V. Vianen del et fecit".) [In French.]
In: Hennepin, Louis de, Nouvelle decouverte d'un tres grand pays situé dans l'Amérique, entre le Nouveau Mexique, et la Mer Glaciale, avec les cartes, & les figures necessaires, & de plus l'histoire naturelle & morale, & les avantages, qu'on en peut tirer par l'établissement. des colon. Le tout dedie à Sa Majesté britannique. Guillaume III. Amsteradm: Chez A. van Someren.
 ▶ There are some small but significant changes in this map compared to its 1697 ed. (ITEM NO. 25.1342), including the addition of more place names. "Californie." (with a small label in its northern part, N. Albion") is now meant to be portrayed as an island, separated from "Nouveau Mexique" by "Mar Vermeilie [sic] ou Mer Rouge." What had been a narrow neck of land at its northern extremity is now awkwardly redrawn as a narrow strait with two islands, south of the short river that otherwise would nearly cut off this land from the mainland. The more significant strait to the north of California remains between America and Asia, with a small label, "Anian", at the easternmost part of "Terre de Iesso.", which of course is meant to bring attention to the mythical Northwest passage that was known as the Strait of Anian. The large river entering the Gulf of California midway along the eastern shore is now labeled "R. de Tecon".

Herrera, Antonio de [Herrera y Tordesillas, Antonio de]

- 1601 25.1696 **Descripcion de las Yndias Ocidentales.** [In Spanish.]
In: Historia General de los hechos de los castellanos en las Islas i tierra firme del mar oceano : decada qvarta. Madrid: Iuan Flamenco, SEPARATELY PAGINATED SECTIONS.
 See section with separate title-page, "Descripcion de las Indias Ocidentales de Antonio de Herrera coronista Mayor desv Mag^d delas Indias y sv coronista de Castilla : Al Rey Nro^d Señor. En Mad: enla emplen^{ta} Real 1601." (96 pp. , maps).
 ▶ The map (between pp. 3/4 and indicated as "1. Tabla" on p. 2), displays the Americas and westernmost coasts of Portugal and Africa, and easternmost China and the East Indies. In North America (not labeled), rivers are displayed only as

indentations at their mouths. "California" is separated from "Nveva Espana" by a gulf, at the head of which are three parallel, north-trending indentations.

Heylyn, Peter

MCLAUGHLIN 13

1703 25.1623

America.

In: Cosmography : in four books. Containing the chorography and history of the whole world: and all the principal kingdoms, provinces, seas, and the isles thereof. By Peter Heylyn, D.D. Improv'd with an historical continuation to the present times, by Edmund Bohun, Esq; with a large and more accurate index, than was in any of the former editions, of all the kingdoms, provinces, countries, inhabitants, peoples, cities, mountains, rivers, seas, islands, forts, bays, capes, forests, &c. of any remarque in the whole world: Revised and cleared from a multitude of mistakes, which had crept into former impressions. And five new-engrav'd maps, according to the best and most exact projection. London: Printed for Edw. Brewster, Ric. Chiswell, Benj. Tooke, Tho. Hodgkin, and Tho. Bennet, [7th ed.].

Stanford University Library's Glen McLaughlin Map Collection of California as an Island catalogs this map with the note, "Possibly the work of Robert Morden."

► The island, "California" (on which "Nova Albion" is labeled on its western coast), is separated from "New Mexico" and "New Grenada" by a strait (not labeled). Midway along the eastern side of the strait, three rivers are shown arriving at the strait (from north to south): "Bona Guia R" from the northeast, heading near "Quivira" and "Cormedo"; "R. Angucht" from the north; and "Tecon R" from the north, which arrives at the head of an embayment. Due east of that embayment is placed "The 7 Citties".

Heyns, Zacharie

SHIRLEY 209

1598 25.435

Vniversvs Terrarvm Orbis. [Title in Latin; volume in French.]

In: Le Miroir du Monde, ou, Epitome du Théâtre d'Abraham Ortelius : Auquel se represente, tant par Figures que par Caracteres, la vraye situation, nature & propriété de la terre Universelle : Aggrandi & enrichi, entre autres, de plusieurs belles Cartes du Pais-bas. Amsterdam: Zacharie Heyns.

► This map crudely portrays the continents, with a sketchy Gulf of California into which a tributary descends from the north.

Shirley (p. 228) notes that this map is "among the last maps to be produced from woodblocks."

Hollar, W. [Hollar, Wenceslaus]

MCLAUGHLIN 62

1676 25.1642

A new and Exact Map of America and Ilands [sic] therevnto belonging, Published and are to be Sold by Iohn Garrett at the South Entrance into Royal Exchange of London. ("W Hollar fecit".) ("This California, was in times past thought to beene a part of y^e Continent and so made in all maps, but by further discoveries was found to be an Iland long 1700 legues," [sic].)

► "Iland of California" is separated from "New Grenada" by "The Vermian Sea". Midway on the east side of the strait three rivers arrive from the north-northeast: "R. de Anguchi", and, independently to a single embayment, "R. de Tecon" and "R. de Coral". The river Tecon has two headwater forks, one near a place marked "Rey Coromedo". "Pueblos de Moqui" are places due east from these three rivers, in the foothills of a large mountainous area that separates them from "Rio del Norte" (Rio Grande) (Santa Fe is not marked), the course of which is south-southwest from a large lake, turning west-southwest before reaching the strait.

Holm, Thomas Campanius

MCLAUGHLIN 149

- 1702 25.1798 **Totius Americæ Descriptio.** ("T.C.H. fe.") ("pag:I", "Tab. I.") [In Latin; volume in Swedish.]
In: Kort beskrifning om provincien Nya Sverige uti America, som nu förtjden af the engelske kallas Pensylvania. Af lärde och trowärdige mäns skrifter och berättelser ihopaletad och sammanskrefwen, samt med åthskillige figurer utzirad af Thomas Campanius Holm. Stockholm/ Tryckt uti Kongl. Boktr. hos Sal. Wankijfs Änkia med egen bekostnad/ af J. H. Werner.
 ▶ "California Ins." is separated from "N. Mexico" by "M. Rubrum". On the east side of the strait are three rivers (none labeled); the central one heads in a mountainous area and arrives at the strait from the northeast; the southerly one heads in a large lake and also arrives from the northeast and may thus be identified as the Rio Grande.

Homann, Iohannes Baptista [Homann, Johann Baptist]

- NO DATE 25.1710 **Totius Americae Septentrionalis et Meridionalis Novissima Repræsentatio quam ex singulis recentium Geographorum Tabulis collectâ luci publicæ accommodavit Iohannes Baptista Homann Sac. Cæs. Maj. Geog. e-Reg. Boruß. Societ Scientiarum membrum Norimbergæ. [1707-1712?] [In Latin, with occasional labels in French and Spanish.]**
 ▶ "California" is a peninsula separated from "Sonora" by "Mare Vermeio Sive Mare Rubrum". The head of the gulf, as with the gulf as a whole, trends decidedly to the northwest. At the very head arrives from the north (after having abruptly turned from a west course) a tributary that at its end seems to divide round an island (not labeled). Just to the east meet two streams, "Coloredo" [*sic*] from the northeast, and the Gila River (not labeled) from the east. The Colorado follows a relatively short course from a mountainous region labeled (in French) "Grande Montaigne qui se tend jusqu a Rio de Hila". North of "California" and west of "Nova Mexico" the continent is completely blank, although the far northwestern coastline, presumably connecting with Asia (not shown), is labeled "Terra Esonis Incognita".
- NO DATE 25.1711 **Totius Americae Septentrionalis et Meridionalis Novissima Repræsentatio quam ex singulis recentium Geographorum Tabulis collectâ luci publicæ accommodavit Iohannes Baptista Homann Sac. Homañiana (Officina) [Homann's Workshop] [Homann's heirs]

McLAUGHLIN 229 [1746]

1741 25.1311

America cum Supplementis Poly-Glottis. ("Opera Godofr: Henselii, delineata." "Excusa prostat in Officina Homañiana." "S. Dorn. sc:") [In Latin.]

In: Henselio, Godofredo, Synopsis vniversæ philologiæ; in qua: miranda vnitas et harmonia lingvarvm totivs orbis terrarvm occvlta, e literarvm, syllabarvm; vocvmqve navra & recessibvs, eruitur. Cum grammatica, LL. Orient. harmonica, synoptice tractata; nec non descriptione orbis terr. quoad linguarum situm & propagationem, mappisqve geogrphico-polyglottis. In gloriam linguarum conditoris, vsumque tam exegeticum quam scholasticum, quo linguæ, a studiosa juventute, breviori negotio disci, emphastesque vocum, uberiori messe colligi possint, adornata, a Godofredo Henselio, Scholæ A. C. ap. Hirschb. Rectore. Norimbergæ: in Commissis apvd Heredes Homannianos, 1741. (492, [29] pp., 4 maps, plates).

The map here cited is between pp. 482/483, which plate includes two boxes, unrelated to the map, featuring orthographic elements of Persian and Brahman languages.

► The map is a bare outline, with "California" shown decidedly as an island, separated from the mainland labeled only "Mexico", "Florida", "Virginia" and "Canada" (with "Florida" seeming to embrace part of the Southwest). This would not bear citing here were it not for a single river (not labeled) with headwater forks that comes to the Californian strait midway along its eastern shore. (The only other rivers depicted in North America are the Mississippi and St. Lawrence.) The entire western portion of North America carries the notation, "Ex Septentrione longissimiq; mirabili migrasse versus Meridiem Mexicanos olim Incolæ Product."

Homannianis Heredibus [Homann's heirs]

WHEAT I:237 [in error as 1796]

1746 25.1186

Americæ Mappa generalis Secundum legitimas projectionis stereographicæ regulas, relationes que recentissimas et observationes Sociorū Acad. reg. sc quæ Parisiis est aliorumque auctorum nec non secundum mentem D.I.M Hasii M.P.P. in partes suas methodicas divisa nunc concinnata et delineata ab Aug. Gottl. Boehmio Phi. Magistro. In lucem proferentibus Homannianis Heredibus. A. M D CC XXXX VI. [In Latin.]

► "California" is separated from "Nov Navarra" by "Mare Vermejo Rubrum vel Purpureum". "f. Colorado" is depicted entering the head of the gulf very generally from the north-northeast, with "f. Coral" (Gila River) a tributary to it from the east. At the confluence, the river, still on a southwesterly heading, divides to flow around an island positioned at the head of the gulf.

NOTE: Wheat (1957, Volume I, p. 151) erred in reading the Roman numeral date of this map as "1796", which lead him to make the comment that this was "an unthinkably out-of-date map". A variant of this map, same date, has been seen that

may indicate that this map (ITEM NO. 25.1186) is a corrected version. The other (original?) version notes “f. Colorado” [*sic*] and has a title cartouche that is slightly different and with slightly different calligraphy: **Americae Mappa generalis Secundum legitimas projectionis stereographicæ regulas, relationesque recentissimas et observationes Sociorū Acad reg sc quæ Parisiis est aliorumque auctorum nec non secundum mentem D I M. Hasii M P P. in partes suas methodicas divisa nunc concinnata et delineata ab Aug. Gottl. Boehmio. Phil. Magistro In lucem proferentibus Homannianis Heredibus. A. MD.CC XXXVI.** It is not known which variant Wheat may have seen.

Amstelodami. [In Latin.]
After Nicolaes Geelkercken.
▶ “American Septentrionalis sive Mexicana” portrays the Gulf of California with several tributaries at its head, from the region labeled “Quiuera Regna”.

Hondio, Henr. [Hondius, Henricus]

- 1641 25.1497 **Nova Totivs Terrarvm Orbis Geographica ac hydrographica Tabvla. Auct: Henr:Hondio.**
 (“Amstelodami Excudit Ioannes Ianβonius”.) (“Doctissimis Ornattissimisq; Viris D.D. Davidi Sanclaro, Antonio de Willon, et D. Martinio, Matheseos in illustriss. Academia Parisiensi Professoribus eximiis in veræ amicitiaē *μνημόσυνον* D.D. Henr. Hondius A^o. 1641”.) [In Latin.]
▶ The northwestern coast of North America, north of the island of California, strikes due west across the Pacific, where the land is labeled “Nova Albion”. The island, “California”, is separated from “Granada” by a strait (not labeled). Midway along the east side of the strait is a significant, north-trending embayment—gulf—into which two rivers are received; one (not labeled) from the north-northwest, with headwater near a place labeled “Rey Coromedo”; the other is “R. d. Coral” from the northeast, the label for which runs along the river and the entire length of the embayment.

Hondio, Henrico

WHEAT I:41

- 1631 25.1121 **America noviter delineata. Auct:Henrico Hondio. 1631.** [No imprint.] [In Latin with mixed labeling.]
▶ “California” is displayed as a peninsula. At the head of “Mar Vermeio” is a large area depicted by stippling, distinctly different from the depictions of islands. There, two rivers enter the gulf, a minor river, not labeled, from the north and northeast, and a major river from the northwest, a tributary to which is labeled “Totontec flu.” To the west of the head of the gulf is the label “Tontontec”; to the east “Cevola”, northeast of which are symbols for cities with the label “Septem Cita”.
NOTE: This map appears in various editions of the *Nouvel Atlas* by Jan Jansson.

⁴¹ It has not been practical to follow through on many replicated editions of maps. It shall be sufficient to mention here the compound of editions based on inherited plates and creative editions of the genealogical and cartographical business lineage of Gerard Mercator, Rumold Mercator, Jodocus Hondius, Hendrik Hondius, and Jan Jansson, superseded in force by the family of Joan, Cornelius, and Willem Blaeu. Another familial group among cartographers cited herein are the Sansons—Nicolas Sanson d’Abbeville and his grandson, Pierre Moullart-Sanson, who was the uncle of Gilles Robert de Vaugondy. Users will find some of their works cited herein, but the listings of course are not comprehensive.

- 1633 25.2396 **America noviter delineata. Auct:Henrico Hondio. 1631. [In Latin with mixed labeling.]**
In: l'Appendice de l'Atlas de Gerard Mercator et Iudocus Hondius. Contenant diuerses nouvelles tables et descriptions tres emples de l'Allemagne, France, Pays Bas, Ialie, et de l'un et l'autre Inde, tout mis en son ordere. Traduit du Latin en Francois et mis en lumiere par Henry Hondius. A Amsterdam chez henry Hondius, demeurant sur le Dam, a l'enseigne du chien vigilant. A°.D. 1633.
 This map is the same as Hondio (1631, ITEM NO. 25.1121).
 ▶ "California" is displayed as a peninsula. At the head of "Mar Vermeio" is a large area depicted by stippling, distinctly different from the depictions of islands. There, two rivers enter the gulf, a minor river, not labeled, from the north and northeast, and a major river from the northwest, a tributary to which is labeled "Totontec flu." To the west of the head of the gulf is the label "Tontontec"; to the east "Cevola", northeast of which are symbols for cities with the label "Septem Cita".
NOTE: This map appears in various editions of the *Nouvel Atlas* by Jan Jansson.

Hondio, Iud. [Hondius, Jodocus]

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

ysdem non panci tabulas ediderunt: sed liceat dicere nullus adhuc prodijt Mundi Typus qui tam concinnè, in exiguo spatio singula contineret: videbis in America Septent. plurima inutara eße: sunt etiam in Oceano Tartaricoet circa illum nova permulta: sunt et alibi. Amice Lector utere hac Tabula novißimâ et perfectissimâ: sic: enim est: nam ut cœteri taceant. Pindarus testis est: dies inquit sequentes testes sunt sapientißimi 1636".) [In Latin.]

Map includes extensive border text, titled [in French]: *Briefve Declaration de la Division, Forme & singularitez du monde*. ("A Paris, Chez la veusue Ian le Clerk, ruë saint Ian de Latran, à la Salemandre Royale. 1622.")

► The northwestern part of North America is blank, occluded by a cartouche. The coast of northwestern America, from north of California, strikes due west across the Pacific, where the land is labeled "Nova Albion". "California" is a peninsula, separated from "Hispania Nova" by the Gulf of California" (not labeled). The northwest-trending gulf twists to the northeast at its head, where it receives a peculiar arrangement of river systems (none labeled), all from the north-northwest: two short rivers on the western side of the gulf head, and a large river system in the center. This latter river has a primary headwater beyond a mountain range in the blank part of the map. It has a tributary from the northwest, with headwater forks, in an area labeled "Quivira Regn." (with "Quivira" itself marked on the west coast). Near the head of the gulf this river receives from the east a relatively short river in the midst of which is a large lake into which feed two short rivers, one from the east-northeast (at the head of which is a place labeled "Zuni") and one from the east-southeast (along which are places labeled "Civola" and "7.Citta"). (Regarding the lake just mentioned, there is a mountain range separating it from yet another lake close by, which is the source(!) of "R. S Laurens" (St. Lawrence River), ironically positioned just about where would be the Grand Canyon.)

SHIRLEY 354

- 1640 25.491 **Nova totius terrarum orbis geographica ac hydropographica [sic] tabula auct. Iud Hondio.** Paris: Chez Nicolas Berrey. [In Latin.]
 ► The Gulf of California depicts several tributaries entering at its head, from the region labeled "Quivera Regn".
- 1653 25.2338 **Nova Totius Terrarum Orbis Geographica ac Hydrographica Tabula auct:Iud Hondio.** ("De L[']impression de Mariette rue S^t jacques a l'Esperance 1642") ("Hpicart fecit.") [In Latin.]
In: Theatre geographiqve de France, contentant les cartes particvlieres de ses provinces. Et celles de ses frontier & pays adjacens. Paris: Chez Pierre Mariette. [Dated 1653.]
 ► The peninsula, "Californi" [sic] is separated from "Culias Hispania" [sic] by the Gulf of California (not labeled). At the head of the gulf two short rivers (not labeled) arrive, both from the north-northwest.; the place-name "Tontontecac" is positioned on the western river; and the area to the north of them is labeled "Quivira Regn". To the north of these rivers, two large rivers converge, continues southward, then, short of the gulf, turns abruptly east to a lake with no outlet. Just north of that lake is another, from which "Río S Laureno" [sic] has a course due east, then northeast where it is labeled "S Laurens flu".
- 1655 25.1500 **Nova Totius Terrarum Orbis Geographica ac Hydrographica Tabula auct:Iud:Hondio.** ("Cevan à Paris. Chez Io Hain [engraved over another name] rüe S^t Iacques à l[']enseigne de la Ville de Cologne. 1655" [the first "5" is reengraved over another numeral].) ("Doctissimis Ornatissimisq: viris, D.D. Henrico Briggio, et Ed Wrichto, medicis celeberrimis. Matheseos eximiis Professoribus, in amicitia veræ $\mu\eta\eta\mu\acute{o}\sigma\upsilon\sigma\upsilon\upsilon\upsilon$ D.D. Iud Hondius A^o 1655" ["55" seems to be reengraved].) [In Latin, with publisher's information in French.]

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► In the area of interest to this Cartobibliography, at least, this is the same as Hondio (1636, **ITEM NO.** 25.1499) but which refigures a part of the area east of the head of the gulf. The northwestern part of North America is blank, occluded by a cartouche. The coast of northwestern America, from north of California, strikes due west across the Pacific, where the land is labeled "Nova Albion". "California" is a peninsula, separated from "Hispania Nova" by the Gulf of California" (not labeled). The northwest-trending gulf twists to the northeast at its head, where it receives a peculiar arrangement of river systems (none labeled), all from the north-northwest: two short rivers on the western side of the gulf head, and a large river system in the center. This latter river has a primary headwater beyond a mountain range in the blank part of the map. It has a tributary from the northwest, with headwater forks, in an area labeled "Quivira Regn." (with "Quivira" itself marked on the west coast). (Comparing the map by Hondio, 1636, the river (with a lake) meeting this latter river just north of the head of the gulf has been removed, although the various place names are retained ["Zuni", "Civola", "7.Citta", and others]. Interestingly, the nearby lake and river north of the mountain range, the source(!) of "Rio S Laurens" (St. Lawrence River), is retained.

Hondio, Iud. [Hondius, Jodocus (junior)]

SHIRLEY 296

1617 25.469 **Nova totius terrarum orbis geographica ac hydrographica tabula auct: Iud. Hondio.** [Amsterdam]: Iud. Hondius. [In Latin.]

► The Gulf of California is portrayed with three tributaries entering at its head.

Hondio, Iudoco [Hondius, Jodocus (junior)]

NO DATE 25.1498 **America noviter delineata Auct: Iudoco Hondio.** ("Ioannes Ianßonius excudit.") [Ca. 1622.] [In Latin.]

► The entire northwestern part of North America is blank, occluded by an inset map that is a polar projection of the northeastern part of the continent. "California" is a peninsula, the west coast of which continues with the continent's west coast on a northwesterly line across the Pacific. California is separated from "Nova Granada" by "Mar Vermeio". The head of the northwest-trending gulf twists to the northeast; and the northwestern quadrant of the head is displayed with stippling on this map. The head of the gulf receives four river systems: 1) a river from the northwest that bifurcates before reaching the gulf; 2) a river from the northwest, into which are two tributaries, one of them "Totonteaflu" [*sic*] from the northeast (river systems 1 and 2 cross an area labeled "Tontontea"); 3) a short river from the north-northeast, in an area labeled "Cevola"; 4) a river from the east-northeast that passes a place name, "Cevola", into which is a tributary from a large lake by which are "Septem Cita". Mountains separate the short river (3) from the "seven cities".

NO DATE 25.1501 **America noviter delineata Auct: Iudoco Hondio.** ("Pietro Todeschi f.") [Bologna, Italy.] [1670s?] [In Latin.]

► The entire northwestern part of North America is blank, occluded by an inset map that is a polar projection of the northeastern part of the continent. "California" is a peninsula, the west coast of which continues with the continent's west coast on a northwesterly line across the Pacific. California is separated from "Noua Granada" by "Mar Vermeio". The head of the northwest-trending gulf ends in a bulbous shape. The head of the gulf receives four river systems: 1) a river from the northwest that bifurcates before reaching the gulf; 2) a river from the northwest, into which are two tributaries, one of them "Tontonteaflu" [*sic*] from the northeast (river systems 1 and 2 cross an area labeled "Tontontea"); 3) a short river from the north-northeast, in an area labeled "Cevola"; 4) a river from the east-northeast that passes a place name, "Cevola", into which is a tributary from a large lake by which are "Septem Cita". Mountains separate the short river (3) from the "seven cities".

Jaillot, Hubert [Jaillot, Alexis Hubert] *see also* **Iaillot, Hubert**

- 1694 25.1487 **Mappe monde ou Description du Globe Terrestre & Aquatique Présentée a Monseigneur le duc de Bourgogne Par son tres Humble et tres Obéissant Serviteur H:Jaillot a Paris M-D-C-XCIV. [In French, with caption in Latin.]**
 Caption: **Nova Orbis Tabula. ad usum Serenissimi Burgundiæ Ducis. Authore H:Jaillot. Parisiis 1694.**
 Verso contains "Tables Geographiques des Divisions du Globe Terrestre. Par le S^r Sanson, Geographe ordinaire du Roy."
 ► "Isle de Californie" is separated from "Nouveau Mexique" by "Mer Vermeio". Midway along the eastern side of the strait an embayment independently receives two rivers; a principal river from the north with headwaters near a place labeled "Rey Coromedo", and a lesser river from the north-northeast from near a place labeled "Cibola". Of note is the label "Moqui" to the east of these rivers, and "Quivira" some distance to the southeast of these rivers, beyond "R. del Norte" (Rio Grande, which by convention on contemporary maps flows southwestwardly to the strait).

In: [Atlas Novus. Quinta Pars.] Amstelodami, Apud Ioannem Ianßonium. [In copy seen the volume title block area is blank.]
 ▶ A portlan chart of the Pacific Ocean. "I^a California", is separated from the mainland (not labeled) by "Mare Vermio". Midway along the eastern side of the strait are two principal embayments. The northwestern one recieves "R d. Anguchi" from the north; the southeastern one receives "R. de Tecon" from the north (which has two headwater tributaries from the north and northeast that come from a region labeled "Rey Coramedo"), and "r. d. Coral" arrives independently into this embayment from the north-northeast. "Pueblos d. Moqui" are situated due east of these rivers.

Choffard fecit Ornamenta. 1760.” [Pierre-Philippe Choffard].) [In French.]
 ▶ The peninsula, “Californie”, is separated from “Nouv. Mexique” by “M. Vermeille”. A river (not labeled) arrives at the head of the gulf; its two branches head in the northeast and east.
- 1784 25.2256 **Mappe Monde ou Description du Globe Terrestre assujettie aux Observations Astronomiques Par le S^r Janvier Géograph A Venise Par François Santini, rue S^{te} Justine près la dite Eglise. Chez M. Remondini. [In French.]**
In: Atlas universel dressé [sic] sur les meilleures cartes modernes 1784. Venise: P. Santini, Chez M. Remondini. [Variants noted.]
 ▶ Colorado River runs in a rudimentary fashion southwest through the Grand Canyon-lower Colorado River regions (not labeled), after receiving the Gila River (not labeled) from the east reaching “M. Vermeille”.]
- 1784 25.2257 **Nouvelle Mappe Monde dediée au progrès de nos connoissances A Venise Par François Santini, rue S^{te} Justine près [sic] la dite Eglise. Chez M. Remondini. [In French.]**
In: Atlas universel dressé [sic] sur les meilleures cartes modernes 1784 : Seconde Partie. Venise: P. Santini, Chez M. Remondini.
 ▶ “R. Colorado” is depicted on a straight course from “Quivira” to “M. Vermeille”, bifurcating before reaching the gulf. The Gila River (not labeled) is a tributary from the east.
- 1784 25.2258 **l’Amerique divisé en ses principaux Etats Asujettie aux Observations Astronomiq^{es} Par le S^r Janvier Géograph A Venise Par François Santini, rue S^{te} Justine près la dite Eglise. Chez M^r Remondini. [In French.]**
In: Atlas universel dressé [sic] sur les meilleures cartes modernes 1784 : Seconde Partie. Venise: P. Santini, Chez M. Remondini.
 ▶ What appears to be a foreshortened Colorado River (not labeled) arrives from the northeast at the tip of “Mer Vermeille”, the head of which is tightly constrained and arcing from the northwest to northeast. A large Gila River (not labeled) is a tributary from the east at that tip.

Jefferys, T. [Jefferys, Thomas]

- NO DATE 25.1465 **North America. T. Jefferys sculp.** [No place]. [1750s.]
 ▶ The peninsula, “California”, is separated from “Navarr” [sic] by “G. of California”. A single river (not labeled) reaches the northwestern head of the gulf on a course that is due west before turning sharply south to the gulf; this is the Gila River, which en route passes “Casa Grande”. Immediately north of the river is an area labeled “Great Teguaio”.
- 1753 25.1289 **CHART, containing the Coasts of CALIFORNIA, NEW ALBION, and RUSSIAN DISCOVERIES to the North; with the Peninsula of KAMCHATKA, in ASIA, opposite thereto, And ISLANDS, dispersed over the PACIFIC OCEAN, to the north of the LINE.**
In: A chart of North and South America, including the Atlantic and Pacific Oceans, with the nearest coasts of Europe, Africa, and Asia. London: T. Jefferys, 6 charts.
 ▶ The Baja peninsula is labeled “Kalifornia”, adjacent to the “Vermilion Sea”; the lands north of which are labeled “New Albion”. The head of the Gulf of California receives a foreshortened “R. Colorado” and, tributary to it from the east, “Rio

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Grande"; downstream of that confluence the river bifurcates before rejoining at the head of the gulf.

- 1768 25.1652 **A General Map of the Discoveries of Admiral de Fonte, Exhibiting the great Probability of a North-West Passage.** By Thomas Jefferys, Geographer to the King.
*In: The great probability of a North West passage: Deduced from observations on the letter of Admiral de Fonte, who sailed from the Callao of Lima on the discovery of a communication between the South Sea and the Atlantic Ocean; and to intercept some navigators from Boston in New England, whom he met with, then in search of a North West passage. Proving the authenticity of the admiral's letter. With three explanatory maps. * * * 3d. A general map of the discoveries of Admiral de Fonte. By Thomas Jefferys, Geographer to the King. With an appendix. Containing the account of a discovery of part of the coast and inland country of Labrador, made in 1753. The whole intended for the advancement of trade and commerce.* London: Printed for Thomas Jefferys, at Charing-Cross.
- Fold-out frontispiece displays a remarkable, even confusing, series of straits and rivers across the northern part of North America. The southeast corner of the map includes the northern part of Spanish "New Mexico", to the latitude of a simply drawn east-west river (not labeled) that passes by "Casa Grande" (thus the Gila River), which at the bottom edge of the map meets "Rio Colorado" that follows a mostly straight south-southwest course from an area labeled "Quivira". Just south of the confluence the Colorado passes off the map. East of the Colorado is the label "Moqui", and southeast from there, not far north of "Casa Grande", is the label "Zuni or Cibola". On the bottom of the map, the corresponding area to the west that would be northern California is labeled "New Albion". Although lower California and the Gulf of Mexico are not shown, by the geographical presentation of the confluence of the Colorado and Gila it is meant that California is a peninsula.

Jode, Cornelis de *see also* Iudæis, Cornelio de

Kaerius, Petrus, AND Goos, Abrahamus [Keere, Pieter van den, AND Goos, Abraham]

SHIRLEY 286

- 1614 25.463 **[No title.]** Amsterdam. [In Latin.]
 Set of 12 gores printed for a globe 26 cm in diameter.
 As noted by Shirley, overcrowded with detail; and the name of Petrus Plancius appears in inscriptions, by whose name Shirley lists this work.
 ▶ Tributaries flow to the head of "Mar Vermeio", but labeling is otherwise too reduced in Shirley's plate to be legible.
-

Keere, Pieter van den *see* Kærio, or Kaerius, or KærI

Keith, William

WHEAT I:117

- 1738 25.1170 **A New and Correct Map of America laid down According to the Accurate Improvements of Senex, Moll and other Modern Geographers. Humbly Inscribed to his Royal Highness Frederick Prince of Wales 1738.**

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

In: Keith, William, *The history of the British plantations in America. with a chronological account of the most remarkable things, which happen'd to the first adventurers in the several discoveries of that new world. Part I. Containing the history of Virginia; with remarks on the trade and commerce of that colony.* London: Printed at the Expence of the Society for the Encouragement of Learning, by S. Richardson; and Sold by A. Millar at Buchanan's Head in the Strand, J. Nourse at Temple-Bar, and J. Gray in the Poultry, Booksellers to the Society, 187 [188] pp. [Only one volume produced.]

Other than the map, this volume is not pertinent to this Cartobibliography.

At least in the area of interest to this Cartobibliography, the map, facing p. 17, poorly reproduces Foster (1738, **ITEM NO.** 25.1817).

► "California", an island, is separated from "New Mexico" by "Gulf of California or Red Sea". On the eastern coast of the strait are two embayments, one which receives "R. d Angochi", the other which receives "Taon R." A tributary to the "Taon" is "R. Good Hope". Also of note is a river that is tributary to the strait south of "Taon", labeled "Conaca R", which has a northern tributary to it in turn labeled "R. Coralado" [*sic*].

NOTE: Although the name "R[io] Coralado" seems to conflate Rio Colorado and Rio Coral (Gila River), the river's poor portrayal nonetheless is distinct from the similarly poorly portrayed Gila River drainage.

Kęrl, Petri [Keere, Pieter van den]

SHIRLEY 274

NO DATE 25.458

Nova Totius Orbis Mappa, ex Optimis Auctoribus Desumta, Studio Petri Kęrl. ("Amstelreda: mi apud Petrũ Kęrum & Theodorum Petri sub signa pręli albi".) [*Ca.* 1611.] [*In Latin.*]

► The peninsula of "California" is separated from "Nova Granata" by "Mare Vermeio". The label "Tontontec regnum" appears at the head of the gulf, into the head of which is a river system that heads in an area with a more prominently labeled "Tolm Regnum" lying to the northwest; this river system, comprising "Axa fl" and "Tontontec fl" arrives at the northwestern part of the head of the gulf where appears the label "Baia d. buena guia. Two other, short rivers arrive at the northeastern part of the head of the gulf, from the north-northeast and northeast, respectively; and a tributary to the second of these, from the north, heads by a large lake at which appear "Septem Citi", and between these two rivers is the label "Cevola" but along the river from the northeast is also a place name, "Cevola". To the south of the mouth of the Tontontec-Axa river system a river arrives from the west-northwest. Between these two rivers is the label "Tontontec".

Keulen, G. van [Keulen, Gerard van]

 ▶ Portolan chart. "I. California" is separated from "Nova Granada" and "Nova Hispania" by a strait (not labeled). Only the mouths of rivers are shown. Midway on the east side of the strait are the rivers (north to south) "R. de Anguchi", "R. del Toucan", and "R. de Carol", the latter two entering one embayment.
- NO DATE 25.2264 **Wassende Graade Kaart Van alle bekende Zeekusten op den geheeten Aardbodem. door Voogt Geometre. t'Amsterdam, by Iohannes van Keulen Boekrerkoper aande Niewen—brug Inde Gekroonde loots-man. Met Previlegie voor 15 Iaren.** ("P. Pickart Fec.") [In Dutch.]
 ▶ Portolan chart. "I. California" is separated from "Nova Hispania" by a strait (not labeled). Only the mouths of rivers are delineated; along the eastern side of the strait is a bilobed bay labeled "R. de Carol", which refers to the Gila River only.
 Seen in a "well used" composite sea atlas in the David Rumsey Collection, in which the only map that has a date ("Nieuwe Pascaert van Oost Indien" by Ioannes van Keulen) is 1680.
- NO DATE 25.2265 **[No title; a portlan chart of the Pacific Ocean and part of the northwestern Atlantic.]** ("tot Amsterdam by Gerard van eulen Aan de Nieuwe brug Met Previlegie.") [In Dutch.]
 ▶ "I. California" is separated from "Nova Grandada" and "Nova Hispania" by a strait (not labeled). Only the mouths of rivers are delineated; along the eastern side of the strait is a bilobed bay with labels "R. del Toucan" and "R. de Carol".
 Seen in a "well used" composite sea atlas in the David Rumsey Collection, in which the only map that has a date ("Nieuwe Pascaert van Oost Indien" by Ioannes van Keulen) is 1680.

Kilian, Georg Christoph

MCLAUGHLIN 236 [State 1]

- NO DATE 25.1823 **Carte Generale de l'Amerique Septentrionale et principalement des Colonies Francoises qui s'v trouvent Armes de la Compagnie Francoise des Indes Orientales et Occidentales. [1757?] [In Latin, with title caption in French.]**
 With the exception of the title, this is the same map as Kilian (no date, ITEM NO. 25.1824).
 ▶ The island, "California" (also labeled "Albion" at its northern end), is separated from "Nova Granada" by "Mare Vermio olim Mare Rubrum". Midway along the east side of the strait is a north-trending embayment into the head of which two rivers (not labeled) independently arrive; the western one from the north-northeast, with two headwater forks, and the eastern one heads at a point that nearly touches the confluence of the western river's forks and follows an arcing course from south-southeast to south-southwest. Although the rivers are not labeled, at least the noticeable south-southwest-flowing river with two headwater forks, reaching a prominent embayment, may be identified as the Colorado River. The river immediately parallel to it may be a misrepresented Gila River, although other contemporary maps include a variety of spurious rivers while omitting others. Note that it seems as though the Rio Grande is portrayed twice, each with headwater near the word "Granada" on this map: once in the form where it flows southwestwardly to the Californian strait, and again where it is corrected to flow southeastwardly to the Gulf of Mexico, a conflation that does appear in other contemporary maps. (Note as well that the Mississippi River is depicted as entering the northwestern corner of the Gulf of Mexico; and further, it has a tributary that bears a large lake north of the conflated

headwaters just mentioned, which could also be interpreted as yet another rejiggering of the Rio Grande.)

MCLAUGHLIN 236 [State 3]

NO DATE 25.1824

General Charte von dem Mitternächte America und sonderlich denen darin befindliche Französ. Colonien, mit dem Wappen und Zeichen der Orientalischen ü. Occidentalischen Französische Handels Compagnie. Note that it seems as though the Rio Grande is portrayed twice, each with headwater near the word "Granada" on this map: once in the form where it flows southwestwardly to the Californian strait, and again where it is corrected to flow southeastwardly to the Gulf of Mexico, a conflation that does appear in other contemporary maps. (Note as well that the Mississippi River is depicted as entering the northwestern corner of the Gulf of Mexico; and further, it has a tributary that bears a large lake north of the conflated headwaters just mentioned, which could also be interpreted as yet another rejiggering of the Rio Grande.)

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Kino, Eusebio Francisco ⁴³ [Kino, Eusebe-François] [Kino, Eusebio Francesco] [Kino, Eusebius Francis] [Kino, Eusebius Franz] [Chino, Eusebium Fran.]

see also [Kino](#) in Section 2 herein for items published after the 18th Century

NO DATE 25.1468 **The Passage by Land to California, Discover'd by Father Eusebius Francis Kino a Jesuit; between the Years 1698 and 1701, before which, and for a Considerable Time Since California has always been described in all Charts & Maps as an Island.**
INSET ON: Bowen and Gibson (no date [1755?], ITEM NO. 25.1830), *An accurate map of North America. Describing and distinguishing the British, Spanish and French Dominions on this great Continent; Exhibiting the Present Seat of War, and the French Encroachments* ("London Printed for Rob^t Sayer opposite Fetter Lane Fleet Street".)

► The inset map reproduces Kino's, in English translation, portraying the Colorado River (not labeled) between the head of "Sea of California" and a point northeastward from the confluence of "Rio Hila". Of interest is the insertion in relatively blank areas equally spaced small symbols of trees, in the same fashion as included in the main map by Bowen and Gibson.]

WHEAT I:83

1701 25.1050 **Paso por Tierra a la California y sus confinantes nuevas Naciones, y Misiones nuevas dela Compañia de JHS. en la America Septentrional Descubierto, andado y demarcado por el**

⁴³ For an extensive study of Kino's cartographical works, see Ernest J. Burrus, *Kino and the Cartography of Northwestern New Spain* (Arizona Pioneers' Historical Society, Tucson, 1965). Kino's 1701 manuscript map (ITEM NOS. 25.1050, 25.1855) is of seminal importance in the history of the Colorado River, whereby he showed conclusively that the river mouth is at the head of the Gulf of California, that California is not an island. The originals that he made do not survive, but we know of the plan through many copies (for example, the two cited herein). Kino's map was first published in 1705 (ITEM NO. 25.629), from a copy made by Bartolomé Alcázar in Madrid, which he had sent to Paris (Burrus, p. 17, and note 23 [p. 23]), and thereafter for decades it appeared in numerous other publications, redrawn and embellished, sometimes in translation. Burrus (p. 17) also notes that the map "was copied or imitated countless times from a copy which reached France; closest to the original are the three printed editions of Nicholas de Fer (Paris, 1700, 1705, and 1720) . . ." Kino's far-reaching impact upon geographers and cartographers in Europe is too broad even to summarize here. Refer to Burrus's "Chapter Five, The Influence of Kino's Maps on the Cartographer of Northwestern Spanish America" (pp. 61-76). Kino's 1710 manuscript map (see Kino, 1824, ITEM NO. 25.1854), which Burrus calls his most "most complete map", is even more important than his map of 1701, although it was not rediscovered until Burrus found it in 1962 in the D'Anville collection of the Bibliothèque nationale de France. That map, though, is a copy "prepared for engraving" in 1724 and is the only extant version of it. Burrus published it for the first time (his Plate 13, between pp. 50/51), noting (p. 20), ". . . many other cartographers copied the map, its data and nomenclature, without crediting Kino or even mentioning his name"; "all printed versions of the 1710 map omit the author's name" (p. 69). Burrus (p. 1) elaborated, "I came to realize its exceptional significance when I found that several hundred subsequent [manuscript and printed] maps not only copied its geographic features but even its very nomenclature." Unfortunately, many cartographers either did not accept Kino's corroboration of a peninsular California or did not know about it, and well through the 18th century California was mapped variously as a peninsula or an island. (Regarding California as an island, see also comments at the beginning of [Section 1](#) herein.)

*So as to maintain the intellectual continuity of this map, this Cartobibliography groups all references to Kino's map under Kino, regardless of the author of the publication in which variants appear. For a useful, lengthy summary of known issues of this map with significant cartobibliographical commentary, though now somewhat dated, see pp. 215-219 in the Library of Congress production by Woodbury Lowery, *The Lowery Collection : a descriptive list of maps of the Spanish possessions within the present limits of the United States, 1502-1820* (ed., notes by Philip Lee Phillips) (U.S. Government Printing Office, Washington, D.C., 1912). [Again, it is not the purpose of this *Cartobibliography* to offer a historiographical study, but only to provide chorographical notes of maps that been seen, and any pertinent bibliographical notes that might pertain to the cited item.]*

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Padre Eusebio Francisco Kino Jesuita, desde el año de 1698. hasta el de 1701. [In Spanish.]

MANUSCRIPT (variant), Archivo General de Indias, MP-MEXICO,95; digitized on the Archivos Españoles website, <http://pares.mcu.es/ParesBusquedas20/catalogo/show/20921> (©MECD. Archivos Estatales (España)).

- As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Colorado River and the Southwest. This is one variant copy of the map by which Kino proved that the Colorado River entered at the head of the Gulf of California, and thus that California is not an island; a map that was faithfully ignored by most cartographers for decades more.

- ▶ "Rio Colorado, u del Norte" is delineated flowing directly from the northeast to enter the head of "Mar de California", southwest of the confluence of the Gila River (labeled "R. Hila" on a headwater fork). The gulf separates "Tierras de la California" from "Nvevo Mexico".

1701 25.1855 **Paso Por Tierra a la California y sus Confinantes Nuevas Naciones y nuevas Misiones dela Compania de IHS. en la America Septentrional. descubierto, y anaado y demarcado Por el P. Eusebio Franc^{co}. Kino Jesuita desde el año de 1698 asta elde 1701. [In Spanish.]**

MANUSCRIPT (variant), original in "the Jesuit archives of Chantilly (near Paris)" (Burrus). Published for the first time by Ernest J. Burrus, *Kino and the Cartography of Northwestern New Spain* (Arizona Pioneers' Historical Society, Tucson, 1965), Plate XI, between pp. 44/45.

- As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Colorado River and the Southwest. This is one variant copy of the map by which Kino proved that the Colorado River entered at the head of the Gulf of California, and thus that California is not an island; a map that was faithfully ignored by most cartographers for decades more.

- ▶ "Rio Colorado, ù del Norte" is delineated flowing directly from the northeast to enter the head of "Mar de la California", southwest of the confluence of the Gila River (labeled "R. Hila" and "R. Azul" on two headwater forks). The gulf separates "Parte de la California" from "Parte de la Nueva Espana".

1705 25.629 **Passage par terre A la Californie Decouvert par le Rev. Pere=Eusebe-François Kino Jesuite depuis 1698 jusqu'a 1701 ou l'on voit encore les Nouvelles Missions des PP. de la Compag^e de Jesus. ("Gravée par Inselin.") [In French.]**

In: Le Gobien, [Charles], Aux Jesuites de France. *Lettres edificantes et curieuses, ecrites des Missions etrangeres par quelques missionnaires de la Compagnie de Jesus. V Recueil.* Paris: Chez Nicolas le Clerc, pp. [iii]-[xxx], fold-out **MAP** between pp. [xxxii]/1.

"Approbation" by C. de Precelle (p. [288]) communicates the fifth collection of letters, dated Sorbonne, January 27, 1705.

- ▶ "Rio Colorado ò del Norte" is delineated flowing directly from the northeast to enter the head of "Mer de la Californie", southwest of the confluence of "R. de Hila" (Gila River). The gulf separates "Parte de la Californie" from "Nouveau Mexique" and "Nouv. Espagne".

Le Gobien provides general remarks relating to this issue of the *Lettres*; but specifically includes references to the travels of Eusebe-François Kino (pp. [xvii]-[xx]), with notes of "le grand fleuve Colorado ou du Nord" (p. [xix]) and the remark (p. [xx]), "Vous verrez le progrez de cette découverte d'une maniere très-sensible sur la Carte qu'en a fait lui-mesme le Pere Kino, qui est fort habile dans les Mathematiques", that relates to Kino's map (which is appended).

The map, published in the *Lettres* for the first time, is translated and redrawn from Kino's original manuscript map in Spanish (simpler in appearance from manuscript copies [see Kino, 1701, **ITEM NOS.** 25.1050, 25.1855]). Based on the date

WHEAT I:89

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

of the volume's "Approbation", it is possible that the plate itself was prepared earlier than 1705. Using the same plate, the map was also printed in the May 1705 issue of the Jesuit journal sometimes cited as *Mémoires de Trévoux* (see [ITEM NO. 25.1857](#)). The 1705 map thereafter was reprinted and redrawn in numerous sources over several decades, in several languages.

The map published in the *Lettres* is prefaced by more general remarks by Charles Le Gobien ([ITEM NO. 2.28021](#) in Volume 1/Part B of [THE GRAND CANON](#)) (pp. [iii]-[xxx]) that relate to this issue of the *Lettres*, in which see pp. [xvii]-[xx] for comments that pertain to Kino's travels and to this map, with notes of "le grand fleuve Colorado ou du Nord" (p. [xix]) and the comment (p. [xx]), "Vous verrez le progrez de cette découverte d'une maniere très-sensible sur la Carte qu'en a fait lui-mesme le Pere Kino, qui est fort habile dans les Mathematiques." This is the first published map that records personal observations of the lowermost Colorado River, whereby Kino established that (lower) California is a peninsula, not an island as had been put forward from the time of Coronado; although others doubted his findings for some time still.

For publications of Kino's original manuscript (not resdiscovered until the early 20th century), see Kino (1919, [ITEM NO. 2.3848](#) in Volume 1/Part B of [THE GRAND CANON](#), Bolton's English translation) and Kino (1922, [ITEM NO. 2.3847](#), in Spanish). Refer also to Marcou (1878, [ITEM NOS. 25.1063, 25.1064](#)) in Section 2 herein. See also a comparative reproduction of five maps by Didier Robert-de-Vaugondy (1777, [ITEM NO. 25.628](#)).

WHEAT I:89

1705 25.1857

Passage par terre A la Californie Decouvert par le Rev. Pere=Eusebe-François Kino Jesuite depuis 1698 jusqu'a 1701 ou l'on voit encore les Nouvelles Missions des PP. de la Compag^e de Jesus. ("Gravée par Inselin".) [*In French.*]

In: "Article LXXI. *Lettres edificantes & curieuses, écrites des Mißions étrangères par quelques Mißionnaires de la Compagnie de Jesus. V. Recueil.* A Paris chez Nicolas le Clerc, ruë Saint Jacques 1705. in 12. pages 287." *Memoires pour l'Histoire des Sciences et des Beaux Arts* (Recueillis par l'Ordre de Son Altesse Serenißime Monseigneur Prince Souverain de Dombes, Trevoux), (May): fold-out **MAP** between pp. 744/745.

Article LXXI (pp. 729-751) is an unsigned summary of the fifth collection of letters from missionaries of the Society of Jesus, which volume included introductory commentary by Charles Le Gobien who mentioned Kino's travels, and therein published Kino's map ([ITEM NO. 25.629](#)), redrawn from Kino's original manuscript map in Spanish (simpler in appearance from manuscript copies [see Kino, 1701, [ITEM NOS. 25.1050, 25.1855](#)]). Here in the *Mémoires* the map is printed again, from the same plate.

► "Rio Colorado ò del Norte" is delineated flowing directly from the northeast to enter the head of "Mer de la Californie", southwest of the confluence of "R. de Hila" (Gila River).

The 1705 map thereafter was reprinted and redrawn in numerous sources over several decades, in several languages. This map (as with that in the *Lettres Edifiantes*) is the first published map that records personal observations of the lowermost Colorado River, whereby Kino concluded that (lower) California is a peninsula, not an island as had often been put forward from the time of Coronado; although others doubted his findings for some time still.

For publications of Kino's original manuscript (not resdiscovered until the early 20th century), see Kino (1919, [ITEM NO. 2.3848](#) in Volume 1/Part B of [THE GRAND CANON](#), Bolton's English translation) and Kino (1922, [ITEM NO. 2.3847](#), in Spanish). [Refer also to Marcou (1878, [ITEM NOS. 25.1063, 25.1064](#)) in Section 2 herein.

See also a comparative reproduction of five maps by Didier Robert-de-Vaugondy (1777, [ITEM NO. 25.628](#)).

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- 1709 25.771 **A Passage by Land to California Discover'd by the Rev. Father Eusebius Francis Kino jesuite between y^e years 1698 and 1701.**
In: Picolo, Francis Maria, An extract of a memoir, concerning the discovery of a passage by land to California; with a map and description of the country. Presented to the Royal Council of Guadalaxara in Mexico, by Francis Maria Picolo. Taken from the letters of the missionary Jesuits, printed at Paris. *Philosophical Transactions* (Royal Society, London), 26(318) [for November/December 1708]: 232-240, **MAP**. Picolo dated "Guadalaxara, February 10, 1702".
- 1710 **Nuevo Reyno de la Nueva Navara con sus confinantes otros Reynos 1710. [In Spanish.] MANUSCRIPT See Kino (1724).**
- 1721 25.1591 **A Passage by Land to California Discover'd by the Rev. Father Eusebius Francis Kino jesuite between y^e years 1698 and 1701.**
In: Motte, Benjamin, *The Philosophical Transactions from the year MDCC. (Where Mr. Lowthorp ends) to the year M DCC XX. Abridg'd, and dispos'd under general heads. Vol. II.* London: Printed for R. Wilkin, R. Robinson, S. Ballard, W. and J. Innys, and J. Osborn.
 See in "The Philosophical Transactions From the Year 1700. to 1720. Abridg'd and methodically Digested. Part IV. The Philological and Miscellaneous Papers." **MAP** (Plate 16) faces p. 211. Accompanies "Of a Passage by Land to California, n. 318. p. 232." (pp. 211-214), which is a reprinting of Picolo (1709) [see Kino, 1709].
- 1724 25.1854 **Nuevo Reyno de la Nueva Navara con sus confinantes otros Reynos 1710. ("Copie' sur l'original MS! le 9^e de Sept^embre 1724.") [In Spanish, with annotation in French in cartouche at upper-right.]**
MANUSCRIPT, digitized on the Bibliothèque nationale de France website, <https://gallica.bnf.fr/ark:/12148/btv1b85961304?rk=21459;2> (last accessed 4 July 2024).
 • As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Colorado River and the Southwest; it has, however, been more recently published.
 This is a 1724 copy, the only extant version of a map drawn by Kino in 1710, shortly before his death, which was drawn for his diary but became separated from it. It was discovered in 1962 by Ernest J. Burrus in the D'Anville collection of BNF, who described it as "prepared for engraving". Burrus published it for the first time in *Kino and the Cartography of Northwestern New Spain* (Arizona Pioneers' Historical Society, Tucson, 1965, Plate 13 (between pp. 50/51), noting that it is Kino's "most complete map". See particularly Burrus's "Chapter Two A Chronological List of Kino's Cartographical Productions", of which the 1710 map is discussed on pp. 19-20; and elaborated upon in "Chapter Four Examination of Key Maps", pp. 33-59. Burrus also points out (p. 51) that "Penisla is a spelling peculiarly his [Kino's], partly from the Italian penisola and the rest from the Spanish península."
 ► "Penisla de California" [*sic*] is separated from "Pimeria" and "Nueva Biscaya" by "Mar de California, o Mar Vermejo segun las Mapas". The head of the gulf narrows noticeably to the northwest, where it receives R^o G^o Colorado de los Martyres". The Colorado arrives to the area from the northeast. Shortly below the confluence of "R^o Grande de los Apostolos" (Gila River), the channel bifurcates to surround "Isla de la Presentacion poblada de mucha Gentilidad"; the island spans one full degree of latitude. The northerly channel arcs from southwest to southeast; the southerly channel follows a course due south, arcing to the southwest, where it joins the northerly channel at the head of the gulf. On the California peninsula is the notation, "Penisla de California nuevamente averiguada por el P.^e Kino, de la Comp.^a de Jesus, en el descubrim.^{to} de el Año de 1702."

- 1726 25.1049 **Via terrestris in Californiam comperta et detecta Per R. Patrem Eusebium Fran. Chino è S.I. Germanum. Adnotatis nevis Missionibus equisdem So'ctis ab Anno 1698. ad annum 1701.** [Map in Latin and German; text in German.]

Map caption: "Tabula Californiæ Anno 1702. Ex autopticâ observatione delineata à R.P. Chino è S.I." *Side legend:* "Tabula Geographica R. P. Eusebÿ Franc. Kino Tridentin è Soc. IESU." *Binder's instruction in lower right of plate:* "Zu Num. 53. in dem II. Theil und zu Num. 73. in dem III. Theil." (regarding which, see notes below).

In: Stöcklein, Josepho, *Allerhand So Lehr-als Geist-reiche Brief/ Schrifften und Reis-Beschreibungen/Welche von denen Missionariis der Gessellschaft JESU Auß Beyden Indien/ und andern Uber Meer gelegenen Ländern/ Seit Anno 1642. bis 1726. in Europâ angelant seynd. Jeßt zum erstenmahl Theils aus handschriftlichen Urkunden/ theils auß denen Französischen Lettres Edifiantes verteutscht und zusammen getragen Von Josepho Stöcklein gedachter Gesellschaft Jesu Priestern. Anderer Theil* [Volume 1, Part 2 = Volume 2] *Von Anno 1688. bis 1700. Ausgurg und Grätz/ verlegts Philipp/ Martin/ und Johann Veit/ seel. Erben/ Anno 1725 [sic].*

This copies the map published in Kino (1705, [ITEM NO. 25.629](#)), now offering labels in Latin and German.

► "Coloratus fl. seu Nord-Strom" (Coloratus fluvius seu Nord-Strom, in mixed Latin and German) is delineated flowing directly from the northeast to enter the head of "Mare Californiæ", southwest of the confluence of "Azul oder Blaufluss", with "Gila fl." a tributary to it to the east. The gulf separates "Californiæ Pars" from "Novum Mexicum" and "Novæ Hispaniæ Pars". In addition, this map emends Kino's by extending it southward to include the mouth of the gulf. The marginal notation in print divides the upper two-thirds of the map as "Tabula Geographica R. P. Eusebÿ Franc. Kino Tridentini é Soc. IESU"; the lower two-thirds (which is extralimital to this Cartobibliography) as "Tabula Chartæ Patris Chino addita."

• Ernest J. Burrus, in *Kino and the Cartography of Northwestern New Spain* (Arizona Pioneers' Historical Society, Tucson, 1965) noted that this 1702 rendition by Kino had been believed to be the Padre's last map portrayal of the Californian gulf, until the 1710 manuscript was found (Kino, 1724, [ITEM NO. 25.1854](#)). Burrus remarks (p. 70), "The chart was reproduced with great accuracy by the world's outstanding map-makers, geographers and historians, with the result that for over a century and a half it was the standard cartographical representation of northwestern Spanish America and southwestern United States."

NOTES: There is some inconsistency in the citation for this map, perhaps due to its collation at different places of two volumes, at least, as suggested by citations that have been seen and by the binder's instructions on the map plate, "Zu Num. 53. in dem II. Theil und zu Num. 73. in dem III. Theil." Spamer has seen one notice of a copy of Stöcklein for sale that indicated, "in vol. 1, part 2, no. 54 is Eusebio Kino's . . . famous engraved map 'Via terrestris in Californiam.'" (note that this volume is the *Anderer Theil*, which, although technically part 2 of Volume 1, is in order of the entire series effectively Volume 2). The Lowery Collection of the Library of Congress (listing no. 253 in Lowery, 1912, [ITEM NO. 1.375](#) in Volume 1/Part B of [THE GRAND CANON](#)) indicates, separately, "Vol. 1. pt. 2. p. 74" and "no. 53, p. 75". Citations for this map have been seen also as in Volume 3 of Stöcklein's ongoing series. (Take note that the "numbers" [no.] referred to, and perhaps mistakenly implied by some citations, are not issue numbers within individual volumes, but pertain to enumerated text items; these numbers continue sequentially through all volumes.)

This ongoing series is also known, and often cited, by the title that appears on the half-title page (Volume 1 cited), *Der Neue Welt-Bott Mit allerhand Nachrichten Dern Missionariorum Soc. JESU.*, and the ornamental title-page, *Der Neue Welt-Bott mit aller hand nachrichten deren Missionarien Soc. Jesu*; thus some citations refer to it simply as "Welt-Bott".

In the citation presented here ([ITEM NO. 25.1049](#)), the full title of the unique volume is cited. Regarding the dates of publication, Volume 1 of Stöcklein's series (*Seit An. 1642. biß aus das Jahr 1726. . . . Erster Bund oder die 8. Erste Theil*, which

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

includes his text ITEM NOS. 1-35) is dated 1726, as is Volume 3 (with text ITEM NOS. 64-80); thus the 1725 date on the *Anderen Theil* (with text ITEM NOS. 36-63) is either an error or it was published out of order (not determined here).

Spamer has seen the fold-out Kino map in Volume 2, facing p. 75, which prints the conclusion of "Numerus 52" and the start of "Numerus 53"; the text of "Numerus 52" relates to the Mexican missions in 1688. Spamer did not see the map anywhere in the associated Volume 3 that he also examined, although it is apparent that it is to nos. 71 and 72 therein that the map is likely to have been intended to accompany; this section of the volume has the caption, "Brief Aus Nord-America, und zwar insonderheit Von der nunmehr entdeckten Landschafft California, samt einer hierüber gefertigten Land-Karten R. P. Eusebii Francisci Chino è Soc. JEsu [sic]." Specifically, it is no. 71 (pp. 31-34) with which the map must have been intended: "Numerus 71. Zuschrift R.P. Caroli le Gobien, deren Indischen Franßösichen Missioinen Soc. JEsu bestellten General-Procuratorius zu Paris, und Welt- berühmten Verfassers deren Lettres Edifiantes, An Die Priester der Gesellschaft Jesu in Franckreich." The running head on p. 31 reads, "Num. 71. An. 1708. P. le Gobien zu Paris von California."; the running heads on pp. 32-33 give the year correctly as "1705." Thus, although the map was published in the *Anderen Theil*, the associated text is in the *Dritter Theil*. The variations in some cited placements of the map may be due to miscollations or due to variously bound fascicles.

- 1731 25.772 **A Passage by Land to California Discover'd by ⁶ Rev. Fath:^r Eusebius Francis Kino Jesuit^e between the Years 1698 & 1701.** ("Hulett Sculp.")
In: Jones, Henry, *The Philosophical Transactions (from the year 1700, to the year 1720.) Abridg'd, and dispos'd under general heads. Vol. V. The second edition.* London: printed for J. and J. Knapton, D. Midwinter, and A. Ward, A. Brettesworth and C. Hitch, W. Innys, F. Fayram and T. Hatchett, J. Osborn and T. Longman, J. Pemberton, C. Rivington, F. Clay, J. Batley, and R. Hett.
 See in "The Philosophical Transactions Abridg'd. Part II. Containing the Philological and Miscellaneous Papers." (separately paginated).
 This map ("Plate LX. Vol. V. Part II page 192.", "Fig. 74.") is between pp. 192/193 and copies Kino (1805, ITEM NO. 25.629).
 Accompanies "Of a Passage by Land to California, and a Description of that Country by Fr. Maria Picolo, taken from the Letters of the Missionary Jesuits. n. 318. p. 232." (pp. 191-196), which is a reprinting of Picolo (1709) [see Kino, 1709].
- 1731 25.724 **Vn Passaggio per Terra a California Scoperto dal P. Eusebio Francesco Kino. Giesuita. fra l'i Anni 1698. et 1701.** [In Italian.]
In: *Saggio delle Transazioni Filosofiche della Società Regia compendiate da Beniamino Mottes dall' anno 1700. al 1720. tradotte dall' idioma Inglese dal cavaliere Tommaso Dereham Baronetto della Gran Bretagna, e membro della Società suddetta. Tomo Terzo.* Napoli: Moscheni, e Compagni.
 See "Di un Passaggio per terra a California; scoperto dal P. Eusebio Francesco Kino Gesuita dal 1698., al 1701." (pp. 183-188); **MAP**, facing p. 183.
 ► The map displays "Rio Colorado ó del Norte", which heads in "Il Mare di California".
 This copies the map published in Kino (1705, ITEM NO. 25.629).
 The upper-right of the map is marked "Tom. III. pag. 183."
 A variant has been seen for this Cartobibliography, from a source as yet unidentified, marked "Tom. V. Tav. I.", with title "Un Passaggio per terra a California Scoperto del P. Eusebio Fran^{co} Kino Gesuita fra gl' Anni 1698 et 1701."
- 1743 25.1052 **Passage by land to California. Discover'd by Father Eusebius Francis Kino a Jesuit; between the years 1698, & 1701: containing likewise the new Missions of the Jesuits.**
Accompanying: Le Gobien, Charles, To the Jesuits of France. [Item signed "Le Gobien".]

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

▶ Reproduction of Kino's map, which portrays "Rio Colorado ou del Norte" and "R. de Hila".
- 1757 25.1309 **Mapa de la California su Golfo, y Provincias fronteras en el Continente de Nueva España.** ("I^l Peña sculp. M^l") [In Spanish.]
In: Venegas, Miguel, *Noticia de la California, y de su conquista temporal, y espiritual, hasta el tiempo presente, Sacada de la historia manuscrita, formada en Mexico año de 1739. por el Padre Miguèl Venegas.* Madrid: Imprenta de la Viuda de Manuel Fernández y del Supremo Consejo de la Inquisición.
▶ The fold-out map is in *Tomo Tercero* [Volume 3]. It reproduces Kino's, with added ornamental illustrations bordering it, portraying "Rio Colorado, ò del Norte" between the head of "Golfo de California ò Mar Roxo de Cortes" and a point northeastward from the confluence of "Rio Gila".
- 1759 25.1127 **An accurate Map of California, Drawn by the Society of Jesuits, & dedicated to the King of Spain. 1757.** ("J. Gibson Sculp.:"; "Vol. I. page 13".)
In: Venegas, Miguel, *A natural and civil history of California: Containing an accurate description of the country, its soil, mountains, harbours, lakes, rivers, and seas : its animals, vegetables, minerals, and famous fishery for pearls. [etc.]. Translated from the original Spanish of Miguel Venegas, a Mexican Jesuit, published at Madrid 1758.* London: printed for James Rivington and James Fletcher, 2 volumes, 455, 387 pp. [Howes notes that this is an English ed. with omissions.]
▶ The map reproduces Kino's, portraying "Rio Colorado ó del Norte" between the head of "Gulph of California or Cortes's Red Sea" and a point northeastward from the confluence of "Rio Gila".]
- 1762 25.1053 **Passage by land to California. Discover'd by Father Eusebius Francis Kino a Jesuit; between the years 1698, & 1701: containing likewise the new Missions of the Jesuits.**
Accompanying: Le Gobien, Charles, To the Jesuits of France. [Item signed "Le Gobien".]
In: Lockman (Mr.) [Lockman, John], *Travels of the Jesuits, into various parts of the world: particularly China and the East-Indies. Intermix'd with an account of the manners, government, civil and religious ceremonies, natural history, and curiosities, of the several nations visited by those Fathers. Translated from the celebrated Lettres edifiantes & curieuses des Missions estrangeres, par les Missionaires de la Compagnie de Jesus. A work so entertaining and curious, that it has already been translated into most of the European languages. This work is illustrated with maps and sculptures, engraved by the best masters. To which is now prefixed, An account of the Spanish*

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- settlements, in America, with a general index to the whole work.* [London]: printed for T. Piety, 2nd ed., corrected, pp. 348-356.
 See p. 356, Colorado River, *in passing*; and Kino's **MAP** facing p. 395.
 ► Colorado River is labeled "Rio Colorado or of the North" [*sic*].
- 1777 25.1739 **Carte de la Californie d'Après les observations le plus exactes, Pour servir à l'Historie Générale des Voyages.** ("A. v. Krevelt, sculps. Amsteld. 1777.") [*In French.*]
In: Prévost, Antoine-François (ed.), *Histoire générale des voyages : ou nouvelle collection de toutes les relations de voyages par mer et par terre, qui ont été publiées jusqu'à présent dans les différentes langues de toutes les nations connues . . . Tome Vingt-Deuxieme. Nouvelle Édition.* Amsterdam: Chez E. Van Harrevelt, and Chez D. J. Changuion.
MAP: This reproduces Kino's map as modeled by Venegas (1757, see **ITEM NO.** 25.1309), without any specific credit.
 ► The Colorado River is labeled "Rio Colorado ou du Nord".
- 1777 25.1898 **The Passage by Land to California. Discover'd by Father Eusebius Francis Kino a Jesuit, between the Years 1698 and 1701, before which, and for a Considerable Time Since California has always been described in all Charts & Maps as an Island.**
INSET ON: Pownall, *A New and Correct Map of North America, with the West India Islands. Divided according to the last Treaty of Peace, Conducted at Paris, 10th Feb^y. 1763. wherein are particularly Distinguished the Several Provinces and Colonies, which Compose the British Empire, Laid down according to the Latest Surveys, and Corrected from the Original Materials, of Gover^r. Pownall, Mem^{br}. of Parlia^{mt}. 1777.* (At lower right of sheet: "London. Printed for Rob^t Sayer and J^{no} Bennett, N^o 53. Fleet Street. as the Act directs 25th Feb^y. 1777.")
- 1786 25.1205 **The Passage by Land to California. Discover'd by Father Eusebius Francis Kino a Jesuit, between the Years 1698 and 1701, before which, and for a Considerable Time Since California has always been described in all Charts & Maps as an Island.**
INSET ON: Pownall, *A New Map of North America, with the West India Islands. Divided according to the Preliminary Articles of Peace, Signed at Versailles, 20, Jan. 1783, wherein are particularly Distinguished the United States, and the Several Provinces, Governments &ca which Compose the British Dominions, Laid down according to the Latest Surveys, and Corrected from the Original Materials, of Gover^r. Pownall, Mem^{br}. of Parlia^{mt}. 1783.* (At lower right of sheet: "London. Printed for Rob^t Sayer, Map, Chart & Printseller, No. 53 Fleet Street, as the Act directs August 15th 1786.")
 Compare also the imprint for Pownall (1786, **ITEM NO.** 25.1203); Wheat makes no reference to the 1786 date on this sheet.)
- 1788 25.2309 **P. Eusebius Franz Kino aus der G. J. entdeckte zwischen dem 1698 und 1701 J. dass Californien eine Halbinsel sey.** [*In German.*]
INSET on F. A. Schræmbl, **Generalkarte von Nordamerica samt den Westindischen Inseln Verfasst von Herrn Pownall Neu herausgegeben von Herrn F. A. Schræmbl MDC.CLXXXVIII.** ("Gestochen von J. Stenger in Wien".) ("N. 20.")
 Redrawing in German translation of Kino's map.
 ► The Colorado River is not labeled. The Gila river is labeled "Rio Grande de los Apostolos", with "Fl. Hila" on a headwater branch.
- 1794 25.1206 **The Passage by Land to California. Discover'd by Father Eusebius Francis Kino a Jesuit, between the Years 1698 and 1701, before which, and for a Considerable Time Since California has always been described in all Charts & Maps as an Island.**
INSET ON: Pownall, *A New Map of North America, with the West India Islands. Divided according to the Preliminary Articles of Peace, Signed at Versailles, 20, Jan.*

1783, wherein are particularly Distinguished the United States, and the Several Provinces, Governments &c which Compose the British Dominions, Laid down according to the Latest Surveys, and Corrected from the Original Materials, of Gover^r. Pownall, Mem^{br}. of Parlia^{mt}. London: Publish'd by Laurie & Whittle, N^o. 53 Fleet Street. 12th May 1794.

Kircher, Athanasius

- 1675 25.57 **Geographia Conjecturalis de Orbis Terrestris Post Diluvium; transformatione ex variorum geographorum sententia cui author subscribit. [In Latin.]**
In: Athanasii Kircheri è Soc. Jesu Arca Noë in tres libros digesta, quorum I. De rebus quae ante Diluvium : II. De iis, quae ipso Diluvio ejusque duratione : III. De iis, quae post Diluvium à Noëmo gesta sunt, quae omnia nova methodo, nec non summa argumentorum varietate, explicantur, & demonstrantur. Amstelodami: Joannem Janssonium à Waesberge, 240 pp., 7 plates. [Volume conventionally indexed as *Arca Noë*.]
 ▶ Only the continent is labeled, "America Septentrionalis", with the Californian peninsula shown and two river systems converging at the head of the Gulf of California.

Kitchen, Thomas, Jr. [for Thomas Sr. see **Kitchin**]

- 1799 25.1446 **A New Map, of the World. with all the New Discoveries. By Cap^t Cook and other Navigators Ornamented with the Solar System The Eclipses of the Sun Moon & Planets &c. By T. Kitchen Geographer. London. Published as the Act directs. Aug^t 1st 1788, by I. Evans.N^o41 Long Lane. West Smithfield.**
 ▶ The peninsula, "California", is separated from "New Mexico" by a gulf (not labeled). This is a remarkable rendition, wherein at the northwestern head of the gulf a short river arrives from the northwest, it having headed in a lake in "New Albion". Yet, preserving the sort of depictions whereby the Gulf of California is represented by a strait (and California as an island), two rivers (not labeled) arrive independently at an embayment; one from the northeast, the other from the east.

Kitchin, Thomas, Sr. [for Thomas Jr. see **Kitchen**]

- 1763 25.2245 **World. Mapped Monde.** ("T. Kichin Sculp.") [Map with title cartouche in English; map caption in French.]
In: A new general, and universal atlas. Containing forty five maps by Andrew Dury. Engraved by Mr. Kitchin, & others. Printed for & sold by A. Dury at the Indian Queen, in Dukes Court St. Martin's Land, Robt. Sayer at the Golden Buck in Fleet treet, & Carington Bowles in St Pauls Church Yard, London.
 ▶ The Gulf of California (not labeled) has two heads, into the western head of which arrives a simply drawn river (not labeled) from the north.]
- 1774 25.1428 **North America Drawn from the latest & best authorities. By Tho^s Kitchin.** ("Engrav'd for Guthries, new Geographical Grammar.") *In: Guthrie, William, A new geographical, historical, and commercial grammar and present state of the several kingdoms of the world.* London: printed for J. Knox, 4th ed., improved and enlarged.
 ▶ On this map, which appears in Volume 2, "California" is separated from "New Navarre" by "Gulf of California". "Martyr's R." reaches the northwestern extremity of of the gulf from the northeast. At "S^t Denis" is the confluence of this river with a river that on two of its headwaters is labeled "Good Hope R." and "Apostles R."

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Downstream from the confluence, the river bifurcates, before rejoining at the head of the gulf.

- WHEAT I:172
- 1777 25.1094 **Mexico, or New Spain; in which the Motions of Cortes may be traced. For the Rev. D^r Robertson's History of America. By Tho^s Kitchin Sen^r Hydrographer to his Majesty.** ("Published according to Act of Parliam^t Sept^r 29th 1777 by W. Strahan; and T. Cadell in the Strand.")
In: Robertson, William (1777), *The history of America*. London: A. Strahan.
 ▶ "Rio Colorado" is shown as a single, short stream extending from a region labeled "Teguas" and "Vermilion Sea or Gulf of California". The river with headwater forks is portrayed between the confluence of "R. of the Apostles" (Gila River) and the gulf.
- 1778 25.1381 **Mexico, of Nieuw Spanje; tot het nagaan der vorderingen van Cortes Tot D^r Robertson's Gesehiedenis van America. Door Thom^s Kitchin Sen^r Kaartmaaker zyner Britt. Majesteit.** ("A. v. Krevelt, sculps. Amstord. 1778.") [In Dutch.]
 ▶ The peninsula of "California" is separated from "Nieuw Navarre" by "Vermillion-Zee of Golf van California". "Rio Colorado" is depicted arriving at the head of the gulf from the northeast, after having received "Riv. der Apostelen" (Gila River), downstream from which point the Colorado bifurcates to form a large island before rejoining just before reaching the gulf.
- WHEAT I:210
- 1787 25.1445 **North America Drawn from the latest and best Authorities.** ("Engraved for Jn^o Harrison N^o 115 Newgate Street, Sep^r 29th 1787.") ("T. Kitchin Del.") ("Engrav'd by G Terry.")
 ▶ The peninsula, "California", is separated from "New Navarre" by "Gulf of California". A river (not labeled) meets the northwestern tip of the gulf from the northeast, with headwater to the north in an area labeled "Teguayo & Quivira". It has a tributary from the northeast. A short distance above its mouth it receives from the east a river (Gila River) that is identified only by labels on two headwater tributaries, "Good Hope R." and "Apostles R.". Just below this confluence the river bifurcates before rejoining as it arrives at the head of the gulf.
- 1795 25.1382 **Mexico, or New Spain; in which the Motions of Cortes may be traced. For the Rev. D^r Robertson's History of America. By Tho^s Kitchin Sen^r Hydrographer to his Majesty.** ("Published according to Act of Parliam^t Sept^r 29th 1795 by W. Strahan; and T. Cadell in the Strand.")
 ▶ "Rio Colorado" is shown as a single, short stream extending from a region labeled "Teguas" and "Vermilion Sea or Gulf of California". The river is portrayed as a bifurcated stream between the confluence of "R. of the Apostles" (Gila River) and the gulf.

 ▶ "Ile Californie" is separated from "Nouveau Mexique ou Teguaio", "Nouveau Mexique", and "N. Grenade Marate" by "Mer Vermeille". On the east side of the strait are two rivers, the northerly one from the north-northeast, and the southerly one, which flows into the western lobe of a large, bilobed embayment, from the north-northeast.

Langren, Arnoldus F. ab [Langren, Arnold Florisz. van]

SHIRLEY 186

- NO DATE 25.421 **Typvs orbis terrarvm.** [Amsterdam.] [In Latin.]
 Shirley notes that this map is after Oretelius' then-current, third, world map.
 ▶ The Gulf of California is prominent, with the peninsula labeled "California", and the gulf notably widens at its head and into which several tributary rivers flow. "Totontec" and "Ceuola" are labels noted in the region of interest to this Cartobibliography.

Langren, Henrici a [Langren, Henrik-Florent van]

SHIRLEY 218

- NO DATE 25.439 **Nova et accurata, totius orbis terrarum geographica et hydrographica tabula, recognita et aucta opera Henrici a Langren.** Amsterdam. [Ca. 1599.] [In Latin.]
 Shirley notes (p. 236), "No sheets from Van Langren's large map survive, and these two sections [Plates 174, 175] are from photographs taken in 1925."
 ▶ Plate 174 depicts most of North America, with part of "Mare Vermeio" at the left edge, at which also is noted the truncated regional label, "[C]evola", adjacent to which is a city symbol with the label, "Civola" (or "Cevola").

Lat, Ian de

MCLAUGHLIN 232

- NO DATE 25.1822 **Kaartje van het Nooder-deel van America.** ("Geteket en Uitgegeven tot Almelo by Jacobus Keizer en tot Deventer by Ian de Lat.") ("O. Lindeman fecit.") [1747.] [In Dutch.]
 ▶ The island, "Caliefornie" [sic], is separated from "Nieuw Mexico", "N Navarre", and "N. Biscaye" by a strait, which in its mid-point thins effectively to the width of a river, giving the impression that there are two gulfs, one open to the sea in the north, the other open to the south, though joined by the thin channel. On the eastern side in this stretch two rivers (not labeled) enter the waterway at either end of this thin channel, both from the northeast; the northerly one heads near a place labeled "Quivirao", and the southerly one heads in an area west of "S^{te} Fé" and which passes by "Oraiva". This latter river also has a tributary from the east, the confluence of which is not far from the sea. ("Noort R.", the Rio Grande, is correctly shown reaching "Golf van Mexico".)

Laurie and Whittle [firm]

- NO DATE 25.1171 **A new & Correct Map of America, With the West India Islands.** London: Laurie and Whittle. [Ca. 1794.]
- ▶ With the exception of closing off the northern part of the “strait” between California and the mainland, and labeling it “Californian Gulf”, the southwestern portion of the map is the same as that of Foster (1738, *ITEM NO.* 25.1817): On the eastern coast of the gulf are two embayments, one which receives “R. d Angochi”, the other which receives “Taon R.” A tributary to the “Taon” is “R. Good Hope”. Also of note is a river that is tributary to the gulf south of “Taon”, labeled “Conaca R”, which has a northern tributary to it in turn labeled “R. Coralado” [sic].
- NOTE:* Although the name “R[io] Coralado” seems to conflate Rio Colorado and Rio Coral (Gila River), the river’s poor portrayal nonetheless is distinct from the similarly poorly portrayed Gila River drainage.
- 1799 25.1334 **A New Map of the World, with Captain Cook’s Tracks, his Discoveries and those of the other Circumnavigators.** London: Published 12th Feb^{ry} 1799. By Laurie & Whittle. N^o 53, Fleet Street. (“W. Palmer sc.”)
- See “Western Hemisphere or New World.”
- ▶ “California” is separated from “New Navarra” by “Sea of Cortes”. “R. Colorado” is depicted simply on a direct north-south course to the head of the gulf. It receives near the gulf a tributary, “R. Azul” that parallels the Colorado on the east before swinging westward to make the confluence.
- For the second ed. see Laurie and Whittle (1808, *ITEM NO.* 25.1335) in Section 2 herein. The second ed. is unchanged in the part of the globe described here.

Le Rouge [Rouge, George Louis le] *see under* **Rouge****Lea, Philip**

- 1685 25.1479 **North America Divided into its III Principall Parts 1st English Part Viz English Empire containing y^e Articklands near Hudsons Bay[,] New North & South Wales New Britain N Foundland N Scotland N England N York N Jarsey Pensylvania Maryland Virginia Carolina Carolania or Florida California Sommer I^s Bahama I^s Jamaica & c y^e Cariby I^s II. Spanish P^t viz N Spain p^t of y^e Antilles III French p^t viz N France & p^t of y^e Cariby I^s [sic].** McLAUGHLIN 107 [1690]
- ▶ The island, “California”, is separated from “New Mexico” and “Marata” by “Red Sea of Vermejo”. Midway along the east side of the strait is a north-trending embayment that receives independently “R. Tecou” from the north (with two forks, one having headwater near “Rey Coromedo”), and “R. Coral” from the north-northeast.
- Of extralimital interest on this map is the course of the Rio Grande, labeled “R Escondado”. Its headwater is in a lake north of “S Fe als New Mejico”, then its course is southwest before turning southeast to the “Bay of Mexico”. En route on that part of the course it passes through a mountain range (not labeled), with the remarkable annotation, “the River runs Under”. “Rio Norte” (also the Rio Grande) had for some time been mapped from the lake north of Santa Fe, feeding to the strait. In this map, “Rio Norte” is still shown as a tributary to the strait, with its headwater just west of the lake and jogging to the southwest en route to the sea.
- 1690 25.1634 **A New Mapp of America Devided According to the Best and latest Observations and Discoveries wherein are discribed by thear Proper Names the severall Countries that Belonge to y^e English which are wholly left out in all French and Dutch Maps viz New Scotland. Philip Lea at \hat{y} Atlas and Hercules in Cheapside = ... and by I. Overton at the White Horse without Newgat London. [all spellings and punctuation thus]. (“James Moxon Sculp.”) (“Philip Lea. Excudit.”) (“To this, Europe, Asia, and Africa, are made Tables for ready finding any Place &c: by Phi: Lea at the Atlas & Hercules in Cheapside at \hat{y} Corner of Fryday Street”.)

► The island, “California” (labeled “New Albion” at its northern end), is separated from “Marrata” in “New Mexico” by “Sea of Vermejo”. Four rivers arrive in the middle of the eastern shore of the strait; “R. Aguchi” from the northeast, a river (not labeled) from the north-northeast, and, into one embayment, “R. Tecon” from the north” and “R. Coral” from the northeast. (“North R.” [Rio Grande] is depicted on a generally southwesterly course from a large lake north of “S^t Fe or New Mexico” to an embayment in the strait some distance south of the rivers Tecon and Coral [compare Lea, 1685, ITEM NO. 25.1479].)

Leth, And. de, AND Leth, Henry de [Leth, Andries de, AND Leth, Hendrik de]

MCLAUGHLIN 220

NO DATE 25.1600

Carte Nouvelle dela Mer du Sud, dressé par Ordre des principaux Directeurs, & tirée des memoires les plus recents et des Relations des Navigateurs les plus Modernes, tant de France que d'Espagne, l'on y'a joint, diverses remarques Curieuses Donné au Public, par And: & Henry de Leth à Amsterdam sur le Pont de la Bourse au Pescheur. Uyt gegeven door And: en Hend: de Leth, tot Amsteldam op de Beurs-Zluys, in de Visser. [1740.] [In French, with caption in French and Dutch, and cartouche texts in Latin, French, and Dutch.]

(“Nova Maris Pacifici Tabula, jussu primariorum moderatorum delineata recentissimis commentarüs reëntioramque navigantium, tam Gallorum quam Hispanorum &. Relgarum, relationibus depromta i cui subjunguntur variæ observationes curiosæ & detectiones graduum inxta modum regionis & navigatõnis”.)

(“Messieurs Cette Carte de la Mer du Sud à été [*sic*] exactement dressée, sur les memoires Geographiques, &c Mathematiques les plus nouveaux & les Observations les plus recentes, pour faire voir aux Marchands, et Actionnistes, le veritable Sujet des Gains et des Pertes.”)

(“Neeuwe Kaart van de Zuyd Zee, opgesteldt door order van de Bewinthebbers, en nagesien volgens de verhaalen der naauwkeurigste Zee luy den, soo van Fransen als van Spagsen, Engelse en Hollanders & en men heeft daar by gevoeglaverschey de ontdekkingon weegens de hoogten en breten van de grade neven de üsantien van t'Land, en Zeevaart en anderen uytrindigne.”)

► The island, “Les Californies ou Carolines”, is separated from “Nouvelle Granade” and “Nouveau Mexique” by “Mer de Californie ou Mer Vermeillee” [*sic*]. However, there is also a notation beneath the label: “Que Quelques Modernes Croyent etre attache au continent de l’Amerique par la Partie Septent”. Midway on the east side of the strait is a single river (not labeled) that follows a course first south-southwest then due west to the strait, circumventing a mountainous area to its west, north of which is labeled “Grand Quivier”, and south, “Pimerie” in “Senora”. The only other rivers that are shown reaching the strait are a major river system (not labeled) that arrives at the northern part of the strait from the northeast, and the small “R del Fuerte” that arrives near the southern end of the strait from the northeast in “Vieux Mexique”. Of additional note is the label, “Moqui”, placed east of a mountainous area that separates it from the presumed headwater lake of the Rio Grande (not labeled) that flows to “Golfe de Mexique”. The unlabeled river that flows southerly then west, noted above, has a headwater not too distant and south-southwest of the imagined lake.

De l'Isle (M.) [De l'Isle (Monsieur)] [**L'Isle, Guillaume de**]

WHEAT I:131 [with illustration facing p. 141]

1752 25.670

Carte Générale des Découvertes de l'Amiral de Fonte, et autres Navigateurs Espagnols, Anglois et Russes pour la recherche du Passage à la Mer du Sud. Par M. De l'Isle de l'Académie royale des Sciences &c. Publiée à Paris en Septembre 1752. [In French.]

► Displays a remarkable series of interconnecting lakes and rivers across the northern part of North America. The southeast corner of the map includes the northern part of "Californie" with New Mexico (not labeled) to its east. Geography is shown to the latitude of the simply drawn east-west river "R. del Coral" that passes by "Casa Grande" (thus the Gila River), which meets "Rio Colorado" that follows a mostly straight south-southwest course from an area where "Quivira" is labeled to the northeast that fronts the mythical "Mer de l'Ouest". The course of the Colorado passes between two mountain ranges. Just south of the confluence the Colorado ends. East of the Colorado is the label "Moqui", and southeast from there, not far north of "Casa Grande", is the label "Zuni". Although lower California and the Gulf of California are not shown, by the geographical presentation of the confluence of the Colorado and Gila it is meant that California is a peninsula.

De l'Isle (M^r.) [De l'Isle (Monsieur *or* Mister)] [**L'Isle, Guillaume de**]

NO DATE 25.1653

A General Map of the Discoveries of Admiral De Fonte and other Navigators, Spanish, English, and Russian, in quest of a Passage to the South Sea, By M^r. De l'Isle Sep^r 1752. [Ca. 1761.]

► A simplified, reduced redrafting of De l'Isle (1752, ITEM NO. 25.670), but which adds the peninsula of "California" and the Gulf of California (not labeled) that separates it from "New Mexico". "Colorado R." is shown reaching the head of the gulf from the north-northeast, with the Gila River (not labeled) coming directly from the east. The entire course of the Colorado is shown passing between two mountain ranges.

L'Isle, Guglielmo de [**L'Isle, Guillaume de**]

1750 25.1441

Carta Geografica dell' America Settentrionale. [In Italian.]

In: Atlante novissimo, che contiene tutte le parti del mondo, nell quale sono esattamente descritti gl'imperj, le monarchie, stati, repubbliche, ec. del Sig Guglielmo de L'Isle, Volume Secondo: ed ultimo, al quale si premette la seconda parte della introduzione alla geografia. del Sig Sanson di Abbeville In Venezia, Presso Giambatista Albrizzi Q. Gir.

► The northwestern part of North America is blank and much of the space is used for the ornamental title cartouche. Although "California" is depicted with a peninsula, separated from "Sonora" by "Mar di California", the gulf in fact ends indeterminately at the north where much of the blank area begins, thus it is implied that it is a strait. On the eastern side of the strait, near the northern end as delineated, two rivers converge at an embayment: "Fiu. di bona guia" from the northeast with headwater in a mountainous area west of "Acoma"; this river has a tributary (not labeled) from the northeast midway on its course to the gulf. The second river, that meets the "Bona Guia" at the strait, is "Fui:del Coral" [*sic*], from the east, with several tributaries inland in "Nuovo Messico".

L'Isle, Guillaume de

NO DATE 25.1425

l'Amerique Septentrionale. Dressée sur les Observatons de M^{rs} de l'Academie Royale des Sciences. & quelques autres, & sur les memoires les plus recens Par G. de l'Isle

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- Geographe. a Amsterdam Chez R. & J. Ottens, Geogrâphes dans le Kalverstraat au Carte du Monde.** [1760?] [In French.]
- The entire northwestern part of North America is blank, with the space partly used for legends. "Californie" is separated from "Sonora" by "Mer de Californie ou Mer Vermeille". The head of the gulf is drawn with an embayment on the eastern side and a short continuation of the gulf to the north before ending indecisively without closure, thus implying that the nature of California, whether an island or a peninsula, is not confirmed. A river arrives in the eastern side of the embayment at the head of the gulf; a short distance upstream is the confluence of two rivers: "R. de bona guia", which shows its course from the northeast where there are two headwater tributaries, and "R. de Corol", which shows its course from the east with three headwater tributaries. The relationship of these rivers to the gulf remains the same as by which California is considered to be an island.
- NO DATE 25.1426 **America Septentrionalis. Concinnata juxta Observationes Dñi Academiæ Regalis Scientiarum et nonnullorum aliorum, et juxta annotationes recentissimas Per G. de L'Isle, Geographum Venalis prostat Augustæ Vindelicorum apud Tobiam Conr. Lotter Geogr. et Calcogr.** ("G. F. Lotter, Sculps.") [1772?] [In Latin.]
- The entire northwestern part of North America is blank, with the space partly used for legends. "California" is separated from "Sonora" by "Mare Californiæ vel Mare Purpureum". The head of the gulf is drawn with an embayment on the eastern side and a short continuation of the gulf to the north before ending indecisively without closure, thus implying that the nature of California, whether an island or a peninsula, is not confirmed. Two rivers independently arrive in the eastern side of the embayment at the head of the gulf: "Fl. boni præsidii", which shows its course from the northeast where there are two headwater tributaries, and "Fl Coral", which shows its course from the east with three headwater tributaries. The relationship of these rivers to the gulf remains the same as by which California is considered to be an island.
- NO DATE 25.1411 **Mappa Totius Mundi Adornata juxta Observationes Dñi Academiæ Regalis Scientiarum et nonnullorum aliorum, secundum annotationes recentissimas. Per G. de L'Isle Geographum Parisiis. Prostat nunc in Officina Tobiaë Conradi Lotter Geogr. et Chalcogr. Aug. Vind.** ("Annotatio Autor reddit ratione in sua nova Introductione in Geographiam de mutatiomibꝫ, quas fecit in hac Mappa, sicut etiam de cœteris, quas in lucem edidit.") [1775?] [In Latin.]
- Date is as given by Library of Congress, with the note, "Date principally obscured". I did not see this on the map, although beneath the "Annotatio" is vague (eradicatèd?) engraving that may be a place of publication and date. LOC further notes, "Appears in Tobias Conrad Lotter's Atlas géographique de cent et huit cartes gènérales et spéciales. Augsburg, 1778."
- "California" is separated from "Sonora" by "M. Purpureum". The peninsula is labeled "P. de la Paix". A single river (not labeled) strikes the northeastern head of the gulf from the northeast, with headwater by or beyond "S[†] Fe" (there is a line depicting a river extending east from the label "S[†] Fe", which could be either a continuation of the river flowing to the Gulf of California, or a headwater of "Fl. Bravo" [Rio Grande] that flows to the Gulf of Mexico, as "S[†] Fe" may interrupt either of these lines). Note, however, that on the map of L'Isle (1700, ITEM NO. 25.1423) this extended line shows there as a connection, via a partly dashed line, to what is labeled there as "Mississipi R." [sic].
- 1700 25.1423 **Mappe-monde Dreßé sur les Observations de M^{rs} de l'Academie Royale des Sciences et quelques autres et sur les memoires les plus recens. A son Altesse Royale Monseigneur Le Duc de Chartres Par son tres humble et tres obeißant Serviteur G. de l'Isle Geographe.** ("A Paris Chez l'Auteur Rue des Canettes pres de S[†] Sulpice. SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- la Nouvelle Introduction à la Geographie des changemens qu'il a fail sur cete Carte aussi bien que sur les autres qu'il a mises au jour.") [In French.]
- ▶ The entire northwestern part of "Amerique Septentrionale" is blank. "Californie" (the peninsula is labeled "P. de la Paix") is separated from "Sonora" by "M. Vermeille". A single river (not labeled) strikes the northeastern head of the gulf from the northeast, with headwater by "Santa Fé".
- 1703 25.243 **Carte du Mexique et de la Floride des Terres Angloises et des isles Antilles du Cours et des Environs de la Riviere de Mississipi [sic] Dressée Sur un grand nombre de memoires principalem^t sur ceux de M^s d'Iberville et le Sueur Par Guillaume Del'Isle Geographe, de l'Academie Royale des Scièces A Paris Chez l'Auteur sur le Quai de l'Horloge** [several words eradicated] **Privilege du Roy po^r 20.ans 1703.** ("C. Simoneau. fecit".) [In French.]
- Library of Congress notes: "Appears in the author's Atlas de géographie, Paris, 1712?"
- ▶ Only the lower extremity of "Californie" appears at and in the west margin of the map; it is separated from "Nouveau Mexique" by "Mer de Californie". Although the upper extent is not shown, the manner in which the eastern side of the gulf is portrayed is reminiscent of depictions where California is an island. At the northern extent of the gulf as seen in this view, before passing off the map, the east side includes two adjacent embayments on north-northeast headings. Into the head of the western one flows "R. d Angouchi" from the north-northeast; into the head of the eastern one flows "R. del Tison from the north-northeast and, independently into the eastern side of the embayment from the east and southeast, "R. Sonaca ou de Hila". The river Tison has headwater in an area labeled "Grand Teguaio" and has a tributary from the east-southeast, "R. de buena esperanza, which has headwater in the pubelo region of "Nouveau Mexique".
- NOTE:* This plate also was used quite late, in 1763, in *Atlas géographique contenant la mappe monde et les quatre parties avec les differents etats* (Paris: Chez Lattré).
- 1718 25.1424 **l'Amerique Septentrionale. Dreñée sur les Observations de M^s de l'Academie Royale des Sciences. & quelques autres. & sur les Memoires les plus recens. Par G. de l'Isle Prem^r Geographe du Roy a Paris. Chez l'Autheur sur le Quai de l.Horloge Avec Privilege du Roy pour 20. ans. 1700.** ("N. Guerard inv et Fec" [Nicholas Guérard].) [In French.]
- The Library of Congress catalog record for this map indicates (including square brackets) "1700 [i.e. 1718]" and "Imprint date from R. V. Tooley's French mapping of the Americas, item 31."
- ▶ The entire northwestern part of North America is blank, with the space partly used for legends. "Californie" is separated from "Sonora" by "Mer de Californie ou Mer Vermeille". The head of the gulf is drawn with an embayment on the eastern side and a short continuation of the gulf to the north before ending indecisively without closure, thus implying that the nature of California, whether an island or a peninsula, is not confirmed. Two rivers independently arrive in the eastern side of the embayment at the head of the gulf: "R. de bona guia", which shows its course from the northeast where there are two headwater tributaries, and "R. de Coral", which shows its course from the east with three headwater tributaries. The relationship of these rivers to the gulf remains the same as by which California is considered to be an island.
- 1742 25.1999 **l'Amerique Septentrionale Dressée sur les Observations de M^s de l'Academie Royale des Sciences. & quelques autres. & sur les Memoires les plus recens. Par G. de l'Isle. a Amsterdam Chez I. Covens & C. Mortier. Avec Privilege.**

Côvens & Corneille Mortier. [Ornamental title-page for volume: *Atlas novus ad usum serenissimi Burgundiæ Ducis. Atlas François. à l'usage de Monseigneur le Duc de Bourgogne contenant les cartes, et [obliterated] des empires, monarchies, royaumes, eet etats du monde. a Amsterdam chez Iean Côvens et Corneille Mortier Avec Privil.*] [The David Rumsey collection notes, "our copy has 1742 on the index and no date on the title page".

► "R de bona guia" is delineated on a mostly southwesterly course from an area west of an area labeled "Nouv Mexique" (distinct from the large-capitalized "Nouveau Mexique" of the greater region) and "Mer de Californie ou Mer Vermeille". Also arriving independently at what seems to be the head of the gulf, from the east, is "R de Coral".

- 1745 25.2040 **Carte du Mexique et de la Floride des Terres Angloises et des Isles Antilles du Cours et des Environs de la Riviere de Mississipi. Dressée Sur un grand nombre de mémoires principalem^t sur ceux de M^{rs} d'Iberville et le Sueur. Par Guillaume De l'Isle Géographe de l'Académie royale des Sciēces. A Paris Chez l'Auteur sur le Quaide l'Horloge [text eradicated] Privilège du Roy po^t 20.ans. 1703. ("C. Simanneau. fecit".) ("Ph. Buache P.G.d.R. d. l'A.R.d.S. Gendre de l'Auteur. Avec Privilege du 30 Av. 1745.") [In French.]**

► "Mer de Californie" runs off the edge of the map, thus it is not clear whether it means to illustrate a gulf or if it is a strait. At that point where it runs off the map are depicted two embayments at the head (or on the eastern side of a strait); the western one is labeled "R. d'Angouchi", the eastern one is labeled "R. del Tison" that heads in an area labeled "Grand Teguao". R. del Tison receives a large tributary from the east, labeled "R. de buena esperanza" that heads in an area labeled the towns of "les Moqui" and "Zuni ou Cibola". Into the southern part of the same embayment at receives R. del Tison arrives from the east and southeast a river labeled on a headwater fork "R. Sonaca ou de Hila", which interestingly has among is various tributaries one labeled "R. Colorado".

- 1763 25.2266 **Carte du Mexique et de la Floride des Terres Angloises et des isles Antilles du Cours et des Environs de la Riviere de Mississipi [sic] Dressée Sur un grand nombre de memoires principalem^t sur ceux de M^{rs} d'Iberville et le Sueur Par Guillaume Del'Isle Geographe, de l'Academie Royale des Sciēces A Paris Chéz l'Auteur sur le Quai de l'Horloge [several words eradicated] Privilege du Roy po^t 20.ans 1703. ("C. Simoneau. fecit".) [In French.]**
In: Atlas géographique contenant la mappe monde et les quatre parties avec les differents etats (Paris: Chez Lattré).

NOTE: A very late reuse of this plate.

► Only the lower extremity of "Californie" appears at and in the west margin of the map; it is separated from "Nouveau Mexique" by "Mer de Californie". Although the upper extent is not shown, the manner in which the eastern side of the gulf is portrayed is reminiscent of depictions where California is an island. At the northern extent of the gulf as seen in this view, before passing off the map, the east side includes two adjacent embayments on north-northeast headings. Into the head of the western one flows "R. d Angouchi" from the north-northeast; into the head of the eastern one flows "R. del Tison from the north-northeast and, independently into the eastern side of the embayment from the east and southeast, "R. Sonaca ou de Hila". The river Tison has headwater in an area labeled "Grand Teguao" and has a tributary from the east-southeast, "R. de buena esperanza, which has headwater in the pubelo region of "Nouveau Mexique".

L'Isle, Guil., AND Dezauche [L'Isle, Guillaume de, AND Dezauche, Jean-Claude]

- 1783 25.1427 **Carte du Mexique et des Etats Unis d'Amérique, Partie Méridionale. Dressée sur un grand nombre de memoires, et sur les meilleures Cartes du Pays. Assujétie aux Observations**

Astronomiques de M^{rs} de l'Academie Royale des Sciences. Par Guil. De l'Isle I^{ers} Géogr. du Roi Nouvellement Revuë et Augmentée Par Dezauche Successeur des S^{rs} De l'Isle et Phil. Buache premiers Géographes du Roi. a Paris Rue des Noyers Année 1783. Avec Privilège du Roi. 1783. ("Simoneau. fecit".) ("Ph. Buache P.G.d.R. d. l'A.R.d.S. Gendre de l'Auteur. Avec Privilege du Roi".) [In French.]

► The southern extremity of (the island of?) "Californie" is separated from "Sonora" by "Mer de Californie". The gulf passes off the map at a point where there are on the eastern side two adjacent embayments; the western one receives "R. d'Angouchi"; the larger, eastern one receives "R. del Tison", to which some distance upstream is a tributary from the east, "R. de bueno esperanza", that heads in an area of "Nouveau Mexique" that labels "Apaches de navaio" to the north and "les Moqui" to the south. Also of note is that the eastern embayment receives directly from the east-southeast "R. Sonaca ou de Hila". By inference of the embayments on the eastern side of the gulf, it seems likely that California is considered to be an island, as so depicted on other maps of the type.

Lok, Michael

1582 25.1594

Illvstri Viro, Domino Philippo Sidnæo Michael Lok Civis Londinensis Hanc Chartam Dedicabat:·1582. [In Latin, volume in English.]

In: Hakluyt, Richard, *Diuers voyages touching the discoverie of America, and the ilands adiacent vnto the same, made first by all of our Englishmen, and afterward by the French-men and Britons and certaine notes of aduertisements for obseruations, necessarie for such as shall heereafter make the like attempt, with two mappes annexed heereunto for the plainer understanding of the whole matter.* London: For Thomas VVoodcocke, dwelling in Paules Church-yard, at the signe of the blackebear.

► California (not labeled, but Cabo San Lucas is labeled "C. Californo") is a peninsula, but just barely; its northern end, where "Quiiiri" is labeled, is connected to the mainland by a narrow strip of land adjacent to "Sierre Neuada". The gulf is labeled "Mare Bermeio", separating the peninsula from "Cvliacan" and "Galicia". Midway along the eastern side of the gulf are three stylized rivers coming from the northeast; the central one enlargens in midcourse, with an island there. Near the heads of that river and the next one south is the place name, "Ceuola". Of note is that north of California and the "Sierre Neuada", and indeed entirely across the North American continent to abut the Canadian maritimes, is the vast northern sea, "Mare de Verrazana 1524". (It should be kept in mind that Lok was an investor in an early expedition to seek out the great northern sea or Northwest Passage near Baffin Island; and this map was somewhat secretively created for investors in Humphrey Gilbert's searches for the passage from a Newfoundland colony.)

Longchamps et Janvier (S^{rs}) [Longchamps et Janvier (Sieurs des)] [Longchamps, Sébastien G., AND Janvier, Jean Denis]

1754 25.1175

l'Amerique Divisée en Tous Ses Pays et Etats, Dressée Sur de Nouveaux Memoires et Sur les dernieres Observations. A Paris, Chés les S^{rs} Longchamps et Janvier, Géographes, Rue Saint Jacques, á l'Enseigne de la Place des Victoires. Avec approbation et Privilège du Roy 1754. ("Gravée par Chambon.") [In French.]

WHEAT I:133 [credited only to Longchamps]

► This map is printed with north to the left. "Californie" is separated from "Nouveau Mexique" by "Mer Vermeille ou de Californie". "Rio Colorabro" [*sic*] arrives at the head of the gulf sharply from the northeast. A tributary (not labeled; the Gila River) has its confluence north of there, and between that confluence and the gulf the river bifurcates before rejoining at its mouth.

Lons, Dirck

SHIRLEY 309

- 1622 25.472 **Nova totius terrarum orbis geographica ac hydrographica tabula.** Amsterdam: Dirck Lons. [In Latin.]
- ▶ The Gulf of California is portrayed with numerous tributaries entering at its head. Most labeling is not legible at the scale of reproduction in Shirley, but of note in the area of interest in this Cartobibliography are “Tontontecac” and “Cevola”.

Loon, Iohannes [Loon, Jan van]

- 1668 25.1649 **Paskaerte van Nova Hispania Perv en Chili. 't Amsterda, By Iohannes van Loon, Plaetsnyder en Zeecaertmaker.** [In Dutch and Latin.]

The same plate, in French, is used, as which appeared in the first ed. (Manesson Mallet, 1683, ITEM NO. 25.1379), now with a caption in German.

► "Isle de Californie" is separated from "Nouveau Mexique" by "Mer Vermeio". Midway along the eastern side of the strait three rivers run into three independent embayments: "Tecon R.", "Coral R.", and a river (not labeled). "Tecon R." is the principal stream, with headwater forks near a place name, "Rey Coromedo".

Mariette, Pierre

- 1646 25.2072 **Carte de l'Ameriqve Corrigeé, et augmentee, dessus toutes les autres cy deuant. Faictes L[']annee 1646 [sic]. [In French.]**
In: Theatre géographique de France. Paris: Chez Pierre Mariette.
 ► The peninsula, "Californie", is separated from "Neveve Granada" by "La Mer Vermeille". The head of the gulf receives four rivers (from west to east): an unlabeled stream from the west-northwest that forks before entering the northwest side of the gulf; a principal stream (not labeled) with three headwater areas and a place name, "Axa" (a tributary to this river from the northeast is labeled "Totontec fl.") ("Totontec" also is labeled spanning the Axa as well as between the first and second rivers); a relatively short stream (not labeled) from the northeast an area labeled "Ceuola"; and a river (labeled "R. Coromara") along which is a place name, "Cevola" (a tributary of this this river comes from an unlabeled lake to the north beside which are several city symbols and the label "Sept"). The area at the head of the gulf, between the second and third rivers, is labeled "B. de Buena guia", usually affiliated with the Colorado, and the area between the third and fourth rivers is labeled "Abacus ou Granada".

Martin, Benjamin

- 1794 25.1418 **A Map of the World on a New Projection with a Delineation of the Various Parts and Phænomina of the Solar System, to facilitate the Principles and Study of Geography and Astronomy, By Benj. Martin. with Improvements, and the Addition of the New Discoveries.** ("London. Published by Laurie & Whittle, N^o 53 Fleet Street. as the Act Directs, May, the 12th 1794.")
 ► The peninsula, "California", is separated from "New Navarra" by the Gulf of California (not labeled), which trends northwestward before tapering to a long northward portion, which there receives a meagerly drawn river (not labeled) with a course southwestward then due south into the gulf. The headwater area of that river abuts a broad region labeled "Vast Tracts of Land Unknown" in "New Mexico".

Massa, Giovanni Battista

- NO DATE 25.1455 **Americae. et Proximar Regionvm Orae Descriptio.** [Venice]: [Conati Rascicotti]. [1590s?] [In Latin.]
 ► The peninsula, "California.", is separated from "Granata" by "Mar Vermeio". Two rivers arrive independently at the head of the gulf: 1) a river from the northwest, with two branches (from the northwest [not labeled], and from the northeast ["Totontec flu."]); 2) "Rio Hermoso" from the east-northeast, the headwater extent of which is labeled "Tiguas rio." and along which is the place, "Ceuola", due east from the head of the gulf.

Medina, Pedro de

- 1549 25.1285 **Nvevo Mvndo.** [In Spanish.]
In: Libro de grandezas y cosas memorables de España Agora de nuevo fecho y copilado por el Maestro Pedro de Medina vezino de Seuilla. Dirigido al Serenissimo y muy escrarecido Señor Don Filipe Principe de España, &c. Nuestro señor. M.D.xlix. [No imprint], [x], clv leaves. [Title from colophon (leaf [ii] recto) featuring royal coat of arms. Volume ornamental title-page (leaf [i] recto) features a map with caption, "ESPAÑA", and title legend, *Libro de grãdezas y cosas memorables de España.*
- An outline map of the New World appears in the section, "Prouincia del Andaluzia", "Capitulo, liij. Dela muy noble ciudad de Cordoua.", leaf lxiiij verso, with cartouche, "NVEVO MVNDO" (caption on leaf is "Nuevo Mundo"). North America is not wholly shown, omitting its northernmost part and showing westward only as far as the city of "Mexico"; the entire western part of the continent is conveniently beyond the edge of the map, where also appears an occluding banner that reads awkwardly (due to crowding of incompletely carved letters), "NEA ESPANA". This map is cited here for its notable treatment of un conveyed information relating to the western part of North America even nearly a decade following the Spanish explorations and *entradas* there.
-

Mendoza y Gonzalez, Juan Antonio de

McLAUGHLIN 206

- NO DATE 25.1601 **Mappa dela Obscurasion dela Tierra enel Eclypse de Sol, de XXII. de Março, de MDCCXXVII. delineada porel Contador D. Juan Antonio de Mendoza y Gonzalez para la Obseruasion delongitud.** ("Pereaesculpιο".) [In Spanish.]
In: Mendoza y Gonzalez, Juan Antonio, Spherographia de la obscuracion de la tierra, en el eclipse de sol, de 22. de Marzo de 1727. Methodo de observarle, y de corregir los reloxes. Delineada por D. Juan Antonio de Mendoza, y Gonzalez, professor de las ciencias mathematicas, contador, agrimensor vniversal de este Royno de Nueva-España. Con Licencia. En mexico: por Joseph Bernardo de Hogal. en la Calle de la Monterilla. [1727.]
- Fold-out map in a [12]-page pamphlet pertaining to the solar eclipse of 22 March 1727, which depicts the track of totality and area and timings of the partial eclipse; engraved over a crude map of Central and North America. "California" is an inflated island separated from the mainland by a strait (not labeled); only "Sinaloa" is labeled along the southern end of the strait. The strait itself is narrow and is nearly pinched shut where it reaches the large gulf to the north labeled "Anian". No rivers are depicted on this map, but midway along the strait is a prominent embayment in which is an island. Numerous labels of place names on this map are engraved upsidedown or in reverse.
-

Mercator⁴⁴**Mercator, Gerardus**

- SHIRLEY 78
- 1541 25.376 **[No title.]** Lovanii: Edebat Gerardus Mercator Rupelmundanus. **[In Latin.]**
 ► Set of gores printed for a globe 41 cm in diameter, on which the western coast of North America depicts a simple mountain range and the label “Hispania noua”.
- SHIRLEY 119 WHEAT I:13
- 1569 25.392 **Nova et avcta orbis terrae descriptio ad vsvm nauiganteum emendate accommodata. Aeditum autem est opus hoc Duysburgi an:D:1569 mense Augusto. [In Latin.]**
 World map on which the northwestern portion of North America, including much of the region of interest to this Cartobibliography, is obscured by an ornamental text box, from beneath of which are shown rivers that go to the head of the Gulf of California. Shirley notes (pp. 140-141), “On twenty-one sheets, Mercator’s map is the first one constructed using the projection that bears his name.”
 Examined for this Cartobibliography from the digital version online at Bibliothèque nationale de France, <https://gallica.bnf.fr/ark:/12148/btv1b7200344k>.
 ► “Tontontec regnum” is labeled north of the Gulf of California (not labeled). Two principal river systems reach the head of the gulf: [1] from the northwest arrive the combined flows of “Axa fluius” (from the northwest and north) and “Tontontec flu” (from the northeast), and [2] the Gila River (not labeled) from the east. “Ceuala” is noted along the Gila. On the east side of the head of the gulf is the label (in Spanish), “el estero”, by which two rows of three evenly placed dots are positioned in the gulf, perhaps implying mudflats.
- WHEAT I:23
- 1587 25.1266 **Orbis Terrae Compendiosa Descriptio Quam ex Magna Vniuersali Gerardi Mercatoris Domino Richardo Gartho, Geographiæ ac ceterarum bonarum artium amitori ac fautori summo, in veteris amicitie ac familiaritatis memoriã Rumoldus Mercator fieri curabat A^o M.D.Lxxxvii. [Geneva.] [In Latin.]**
 Wheat (1957, Volume 1, p. 190) notes that this is a “Reduced copy of 1569-Mercator [see ITEM NO. 25.392] on a different projection.” The western hemisphere from this map is reproduced in Winship (1896, Plate 49, ITEM NO. 2.6973 in Volume 1/Part B of THE GRAND CANON), “after Nordenskiöld”.
 ► In the western portion of North America (the Americas are labeled “America sive India nova”), the Gulf of California (not labeled) is headed by a river with headwater forks that passes through “Tontontec r.” from the north; another river with headwater forks reaches the head of the gulf from the east, passing through “Marata” and passing places labeled “Ceuala” and “Gramata”.

⁴⁴ It has not been practical to follow through on many replicated editions of maps. It shall be sufficient to mention here the compound of editions based on inherited plates and creative editions of the genealogical and cartographical business lineage of Gerard Mercator, Rumold Mercator, Jodocus Hondius, Hendrik Hondius, and Jan Jansson, superseded in force by the family of Joan, Cornelius, and Willem Blaeu. Another familial group among cartographers cited herein are the Sansons—Nicolas Sanson d’Abbeville and his grandson, Pierre Moullart-Sanson, who was the uncle of Gilles Robert de Vaugondy. Users will find some of their works cited herein, but the listings of course are not comprehensive.

Merian, M. [Merian, Matthaus]

WHEAT I:43

- 1638 25.1276 **America noviter delineata.** (“M. Merian fecit.”) [In Latin.]
 ► The peninsula of “California” is separated from “Nova Granada” by “Mar Vermeo”. At the head of the gulf a profusion of rivers enters: a river (not labeled) from the west-northwest, which bifurcates before reaching the gulf; “Axe flu.”, which reaches the gulf from the northwest, en route receiving two tributaries from the northeast, the second one labeled “Tontonteach flu.” (the region through which these southeasterly-flowing rivers is labeled “Tontonteach”); and two rivers (not labeled) from the northeast, the more southerly of the two with headwater forks with the northerly branch coming from a lake (the area between these two southwesterly-flowing rivers is labeled “Cevola” and “Abacus nunc Granada”, with a place name at the confluences of the branches labeled “Ceoula”).
 Wheat notes (Volume I, p. 193), “This map seems to have been taken directly from 1631–*Blaeuw*.” (i.e., *Blaeuw*, 1631, ITEM NO. 25.1277; WHEAT I:40).
- 1638 25.1885 **Nova Totius Terrarum Orbis Geographica ac Hydrographica Tabula Wahre Biltnüz des Gantzen Erden Kräyses mit allen seinen theilen.** [Frankfurt.] [In Latin, with title also in German.]
 ► A northwest-trending Gulf of California (not labeled), separating “California” from “Noua Granada”, turns to the northeast at its head, where it receives five tributaries. On the northwest side of this head arrives a significant stream from the northwest and north, coming from a region labeled “Totonteach”; it arrives generally at a label, “Baia de bonagui”. At the very head of the gulf arrives an insignificant

tributary that separates "Totontec" from a region mislabeled in the same size print, "Ceuola", though probably meant to be the name in smaller print below it, "Granada". A mountain range extends to the north from the head of this small tributary. At the northeast side of the head of the gulf arises a stream from the northeast that is forked in its headwaters; the tributary fork from the north comes from a lake near which and south of which are "Septem Citao".

Metellus, Ioannes [Matal, Jean]

- 1602 25.1303 **Americae sive Novi Orbis Proximarvmq; Regionum oræ descriptio.** [In Latin.]
In: Metellus, Ioannes Natalius, *Speculum orbis terrae*. Ursellis/Oberursel: Cornelius Sutorius.
 ▶ "Lifornia" [sic] is shown as a peninsula, separated from "Abacus nūc Granata" by a long, narrow gulf (not labeled), which receives at its head, independently, "Totontec flu:" from the northwest to northeast, and a river labeled both "rio Hermoso" and, toward its headwater, "Tiguas rio", coming from the east. There are two place names, "Totontec" on a northwestern tributary to Totontec flu:, and "Totontec" at the confluence of that tributary and Totontec flu:. A place name, "Ceuola", appears on the "rio Hermoso" (Gila River) that in its headwater extent is labeled "Tiguas rio".

Meursium, Jacobum [Meursius, Jacob van] [Meurs, Jacob von]

MCLAUGHLIN 50 WHEAT I:57 [with credit to Montanus]

- 1673 25.1159 **Novissima et Accuratissima Totius Americæ Descriptio per Jacobum Meursium.** [Map in Latin; volume in German.]
In: Montanus, Arnoldus, *Die Unbekante Neue Welt, oder, Beschreibung des Welt-teils Amerika, und des Sud-Landes : darinnen vom Ursprunge der Ameriker und Sudländer und von den gedenckwürdigen Reysen der Europier darnach zu : wie auch von derselben Festen Ländern, Inseln, Städten, Festungen, Dörfern, vornähmsten Gebeuen, Bergen, Brunnen, Flüssen und Ahrten der Tiere, Beume, Stauden, und anderer fremden Gewächse : als auch von den Gottes-und Götzen-diensten, Sitten, Sprachen, Kleider-trachten, wunderlichen Begäbnissen, und so wohl alten als neuen Kriegen, ausführlich gehandelt wird.* Amsterdam : Jacob von Meurs.
 ▶ "California" is an island, with the Gulf of California (not labeled) separating it from "Nova Granada". On the eastern side of the strait, two rivers enter into two embayments: "R. del Tecon" (with headwater forks) and "R. Coral".
 This map is the same as that of Schagen (in Montanus), 1671, ITEM NO. 25.1157).

Miera y Pacheco, Bernardo de *see also* Veléz y Escalante

WHEAT I:173

- 1777 25.1115 **Plano Geografico de la tierra descubierta, y demarcada, por D^o Bernardo de Miera y Pacheco al rumbo del Noroeste, y oeste del nuevo Mexico, quien fue en compañía de los RR^s PP^s Fr. Fran^{co} Atanacio Dominguez, Visitador Comisario y Custodia de esta, y Fr. Silvestre. Velez de Escalante, siendo una del numero de las diez personas que acompañaron a dichos RR. PP^s** [In Spanish.]
MANUSCRIPT, British Museum, Additional Manuscripts 17661-C. [A photographic reproduction of this map is in the University of California at Berkeley, digitized online at <https://www.lib.berkeley.edu/EART/maps/g4300-1777-m5.html>.]
 • As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest.
 ▶ On the British Museum copy cited here, "Rio Grande Colorado" is depicted to the confluence of "Rio de Nabajo", north of which the river is labeled "R. de los

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Saguaganas” (with some apparent correction to its course). The southwestern part of the map adjacent to the Colorado bears the notation, “Este Rio Colorado desde la fuente de los dos Riuos de Zaguaganas, y Nabajo para abajo vamui encasonado de Redra colorada, y mui profundo, y escarpado su cajon sin Arboles.”]

- Note that there are variants of Miera’s map from the Domínguez-Escalante expedition; this one is cited as an example without getting into the issues of historical cartography, which are beyond the purpose of this Cartobibliography. For a helpful commentary, refer to Wheat (1957, Volume I, pp. 94-116), who devotes an entire chapter to the Miera manuscript variants produced during 1777-1778, noting (p. 99) that there are “at least six distinct manuscript copies, each exhibiting some differences from the others”. The map referred to in this citation (25.1115) is Wheat’s “Type A”, specifically “1777 Miera, I”. Wheat further observes that the British Museum manuscript, “Additional Manuscripts No. 17,661-C . . . bears at least some evidence of being the original map that accompanied Escalante’s *Diario Derrotero* when in May of 1777 it was sent on its way from Santa Fe to the Viceroy of New Spain at the direction of Colonel Pedro Fermín de Mindueta, then Governor of New Mexico” (p. 100). (This was acquired by the British Museum in 1848, listed then as “Plano geografico de la tierra descubierta y demarcada por Don Bernardo de Miera y Pacheco al rumbo del Noroeste y Oeste del Nuevo Mexico’ [1771-1779]” (square brackets are part of quotation; in *Catalogue of Additions to the Manuscripts in the British Museum, in the years MDCCCXLVIII-MDCCCLIII* (Printed by Order of the Trustees, 1868), p. 43.) See also a fuller description in *Catalogue of the Manuscript Maps, Charts, and Plans, and of the Topographical Drawings in the British Museum. Volume III*. (Printed by Order of the Trustees, 1871), p. 504: “Plano geografico de la tierra descubierta y demarcada por Don Bernardo de Miera y Pacheco, al rumbo de noroeste y oeste del Nuevo Mexico, quien fue en compania de los RR. PP. Fr. Francisco Atanacio Dominguez, visitador comisario y custodio de esta, y Fr. Silvestre Velez de Escalante, siendo uno del numero de las diez personas que acompañaron a dicho RR. PP.;’ drawn on a scale of 6¾ leagues (of 20 to a degree) to an inch: 2 f. 8 in. × 2 f. 4 in. [Add. 17,661.c.]” (square brackets are part of quotation). The item title as given in the present bibliography is as read precisely from the map itself.

Compare also the manuscript maps cited herein, by Garcés (1777, **ITEM NO.** 25.1046), Font (1777, **ITEM NO.** 25.1046; 1778, **ITEM NO.** 25.1047), and Veléz y Escalante (1777, **ITEM NO.** 25.602). As a result of varied citations made of these maps over the years, all are cited in this Cartobibliography with clarified information provided as closely as possible based on examinations of all of these maps and information with their catalog records.

1778 25.1048 **Plano Geografico de los Descubrimientos hecho por Dⁿ Bernardo Miera y Pacheco y los RR^s P^s Fr. Francisco Atanasio Dominguez y Fr. Silvestre Vele^s S. Felipe R^l de Chiguagua Año de 1778. [In Spanish.]**

Jacques, à S^t pierre près la rue de la Parcheminerie. 1789. N^o 252. ("Et à l'Orient chés Duquesnel M^d. d'Estampes place des presminil.") [In French.]

The date may have been partly reengraved from "1785".

► The peninsula, "Californie", is separated from "Nouvelle Navarre" by "Mer de Californie ou Vermeille". "R. Colorado de Martyres" arrives at the head of the gulf on a mostly straight course from the northeast, receiving from the east "R. Grande de los Aposolos" (*sic*, Gila River). Downstream from that confluence the river bifurcates before rejoining at the head of the northwest-extended gulf.

Moll, Herman

WHEAT I:105 [as 1720]

NO DATE 25.1122 **Map of North America According to y^e Newest and most Exact Observations.** ("B. Lens delin. G. Vertue Sculp.") [1715?]

Complete title from title panel: **To the Right Honourable John Lord Sommers Baron of Evesham in y^e County of Worcester President of Her Majesty's most Honourable Privy Council &c. This Map of North America According to y^e Newest and most Exact Observations is most Humbly Dedicated by your Lordship's most Humble Servant Herman Moll Geographer. Sold by H. Moll over against Deverux Court in y^e Strand Printed for I. Bowles Print & Map seller at the Black Horse in Cornhill and T. Bowles Print and Mapseller next to the Chapter house in S^t Pauls Church yard, and over against Devereux Court, without Temple Bar. And by P. Overton Map and Printseller near S^t Dunstons Church Fleetstreet. and by John King at the Globe in the Poultry.**

Library of Congress catalogs this map with date of "[1715?]" under the title, "This map of North America".

► "California" is an island separated from the mainland by "Gulf of California or Red Sea". Midway along the eastern coast of the gulf there are three embayments, each headed by a river, from north to south, an untitled river, "R. d'Angouchi", and "Tison R.", the last of which has a tributary, "R. of Good Hope". These rivers come from an area with the label "Great Teguaio", the northern part of "New Mexico", north of which is an expanse, "Parts Unknown". Note that east of these rivers is an area with numerous place names including "Moqui", and that in this area there is a river labeled "R. Sonaca", with several tributaries that include a rather minor one from the northeast labeled "R. Colorado". The geography is thus decidedly mixed.

NO DATE 25.1462 **A New and Correct Map of the World. Laid Down According to the Newest Discoveries, and From the Most Exact Observations. By Herman Moll Geographer. Printed and Sold by I. Bowles Map and Print Seller at the Black Horse in Cornhill & by T. Bowles Map & Print Seller next to y^e Chapter house in S^t Pauls Church Yard and by P. Overton, Map & printseller near S^t Dunstons Church Fleet Street. And by John King at y^e Globe in y^e Poultry.** ("To His most Sacred Maiesty George II^d. By the Grace of God King of Great Britain[,] France & Ireland Defender of the Faith &c. This Map is humbly dedicated.") [1736?]

► The island, "California", is separated from "N. Mexico" by "Gulf of California". On the eastern side of the strait a convoluted embayment independently receives three rivers; the northern and central ones are not labeled but come from an area to the northeast labeled "G. Teguaio", while the southern river, "R. Sonaca" comes from the east-southeast and passes en route "Casa grande", thus it is the Gila River.

MCLAUGHLIN 78

1681 25.1781 **America.** ("H. Mol schulp." [sic]) *In*: Moore, Jonas, *A new systeme of the mathematicks* London, Printed by A. Godbid and J. Playford, for Robert Scott, Bookseller in Little Britain.

► "Californie I." is separated from "N. Mexico" by "M. Vermeille". Only two rivers are shown on the east side of the strait, "R. Nort" (which is the Rio Grande) and an unlabeled river north of it, striking the strait from the northeast. Other than "L

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Combas”, the headwater lake of the Rio Grande, and the town “S^a Fe”, no other labeling appears on this part of the map.

- 1698 25.1630 **Carte De La Partie du Millieude L’Amerique.** [In French.]
In: Dampier, Guillaume, *Nouveau voyage autour du monde : où l’on décrit en particulier l’isthme de l’Amérique, plusieurs côtes & isles des Indes occidentales, les isles du Cap Verd, le passage par la Terre del Fuego, les côtes méridionales du Chili, du Pérou & du Mexique, l’isle de Guam, Mindanao & les autres Philippines, les isles orientales qui sont près de Cambodie, de la Chine, Formosa, Luçon, Celebes, &c., la Nouvelle Hollande, les isles de Sumatra, de Nicobar & de la Sainte Hélène & le cap de Bonne-Espérance : où l’on traite des différens terroirs de tous ces pais, de leurs ports, des plantes, des fruits & des animaux qu’on y trouve, de leurs habitans, de leurs coûtumes, de leur religion, de leur gouvernement, de leur négoce, &c.* A Amsterdam, Chez Paul Marret.
 ► The southernmost part of “Californie I.” is shown at the northwest corner of the map, where it is separated from “N. Mexique” by “Mer Vermejo ou de Californie”. Just where the strait passes of the map to the northwest is an embayment that receives at its head two rivers (not labeled), one from the north, the other from the northeast. (Farther south, a long river (not labeled) reaches the strait from the east after having followed an arcing course from the north, which river is likely the Rio Grande as similarly depicted on contemporary maps.)
- 1701 25.769 **The Isle of California. New Mexico. Louisiane. The River Misisipi. and the Lake’s of Canada. Herman Moll Facit.**
In: *A system of geography: or, a new and accurate description of the Earth in all its empires, kingdoms and states. Illustrated with history and topography, and maps of every country, fairly engraven on copper, according to the latest discoveries and corrections, by Herman Moll. To which are added alphabetical index’s of the names, anncient as well as modern, of all the places mention’d in the work. And a general index of remarkable things.* London: printed for Timothy Childe, [34], 444, [2], 230, [28] pp. [Ornamental title-page: *A system of geography with new maps.*]
 See in (as noted in contents) “Part II. Of the other three Quarters, Asia, Africa, and America.”, with a separate title-page:
A system of geography: or, a new and accurate description of the Earth, in all its empires, kingdoms, and states. Part the Second, containing the description of Asia, Africa, and America. Written in Latin by Joan. Luyts Professor in Acad. Ultraj. English’d with large additional accounts of the East-Indies, and the English plantations in America. Illustrated with maps, fairly engraven on copper, according to the modern discoveries and corrections, by Herman Moll. London: printed for Tim. Childe. (Part II is separately paginated.)
 See in particular: “A General and Particular Description of America. First written in Latin by Joan. Luyts, and now improv’d with very particular Accounts of the English Plantations; and maps laid down according to the latest Observations and Discoveries.” (pp. 148-157); specifically, Chapter II, “Northern America and the Arctick Countries” (pp. 152-157).
 ► This map (p. 152; in the copy seen the map is inverted) displays the “Gulf of California” separating the island, “California” from “New Mexico or New Granada or Marata” and “P[art]. of Mexico or New Spain”. Four principal rivers are shown entering the eastern side of the gulf midway through its channel (from north to south): “Bona Guia R.”, “de Aguchi R.”, “Tecon R.”, and “de Coral R.” Also of note is the misplacement (in English) of “The 7 Cittys” east of “Coral R.”
- 1711 25.1618 **A new & Exact Map of the Coast, Countries and Islands within ŷ limits of ŷ South Sea Company, from ŷ River Aranoca to Terra del Fuego, and from thence through ŷ South Sea,**
 MCLAUGHLIN 181 [State 1]

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

to ŷ North Part of California &c. with a View of the General and Coasting Trade Winds. And perticular Draughts of the most important Bays, Ports &c. According to ŷ Newest Observations, By Herman Moll Geographer.

In: A view of the coasts, countries and islands within the South-Sea-Company. Containing an account of the discoveries, settlements, progress and present state; together with the bays, ports, harbours, rivers, &c. The various winds and soundings; the product, people, manufactures, trade and riches of the several places: viz. From the River Aranoca to Terra del Fuego, and from thence through the South Sea to the farthest bounds of the late Act of Parliament. To which is added, An account of former projects in England for a settlement, and the accomplishment of the last in the establishing the new company; with a list of the commissioners names appointed by Her Majesty to take the subscriptions. As also some useful observations on the several voyages that have been hitherto publish'd. The whole collected from the best authors, as well manuscripts as printed. Illustrated with a general map, and particular draughts of the most important places; by Herman Moll, Geographer. London: Printed for J. Morphew near Stationers Hall.

The map (in the copy seen) is interleaved in the Preface to the volume, although one catalog record seen indicates that it follows the Preface. Several states are known, varying in the number of inset maps and with changed title.

► The top of the map cuts off the northern part of the "Gulf of California" that separates "California" from "New Mexico", which by the name of the seaway implies that California is a peninsula. Midway on the eastern side of the gulf are embayments that resemble the same kind of embayments that were depicted on maps that show the waterway as a strait, into which the Colorado and other rivers flowed. The northwesterly of the two embayments is twinned, with one arm to the north and the other to the northeast, though no river is depicted entering either one. Adjacent to that embayment to the southeast is single embayment, aligned northerly, which receives from the east a river (not labeled) that passes by a place marked "Casagrande D. 1694", thus this must represent the Gila River, its placement there apparently a carryover from when the guide map had portrayed the strait; however, it may be "correct", which thus would indicate that the gulf is meant in fact to be a strait. (The "North R.", which is the Rio Grande, is properly shown descending to the "Gulf of Mexico.")

MCLAUGHLIN 173 [reissue of 1709 state]

1714 25.1804

America.

In: The compleat geographer : or, The chorography and typography of all the known parts of the earth. London: Printed for A. and J. Churchill.

Map appears on p. 143; the block is too large for the space allotted and is overprinted on parts of the text.

► Western North America is very simply drawn. The island, "California", is separated from "New Mexico" by "M. Vermeille". Just two rivers (not labeled) are shown draining to the strait; a simple river from the northeast, and, south of there, a longer river that passes by "S^{ta} Fe", thus is the Rio Grande.]

1719 25.1346

A New & Correct Map of the Whole World Shewing ŷ Situation of its Principal Parts. viz the Oceans, Kingdoms, Rivers, Capes, Ports, Mountains, Woods, Trade-Winds, Monsoons, Variation of ŷ Compass, Climats, &c. With the most Remarkable Tracks of the Bold Attempts which have been made to Find out the North East & North West Passages. The projection of this Map is Call'd Mercator's the Design is to make it Useful both for Land and Sea. And it is laid Down with all possible Care, According to the Newest and Most Exact Observations By Herman Moll Geographer. 1719. ("L. Cheron delin."; "E. Kirkall sculp.") ("Sold by H:Moll where you may have his New Atlas or Set of Twenty-five Two-sheet Maps, bound or single, all Colour'd according to his Direction.")

► The island, "California" (with "New Albion" labeled at its northern end), is separated from "New Mexico" by "Gulf of California or Red Sea". Midway along the

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

gulf's eastern shore are shown three rivers (not labeled) coming generally from the northeast, and north of them "B. Guia" likewise coming from the northeast; all come from an area labeled "Parts Unknown" and "G. Teguao".

Variant: Identical except for the *addition* beneath Moll's note of sales: "Sold by I. King at the Globe in the Poultry near Stocks Market Printed for John Bowles at the Black Horse in Cornhill and The Bowles in S^t Pauls Church Yard."

NOTE: It is interesting that Wheat (1957, Volume I) does not cite Moll's map, though likely because of his criterion that it must contain useful inland labeling. However, with [WHEAT I:112](#) he mentions this map in his discussion of the untitled map featuring "Brobdingnag" from Volume I, Part II, of Lemuel Gulliver's (Jonathan Swift, *pseudonym*) *Travels into several remote nations of the world* (London, 1726).

McLAUGHLIN 197

1720 25.704

A New Map of the North Parts of America claimed by France under ^o names of Louisiana, Mississippi [*sic*], Canada and New France with ^o Adjoyning Territories of England and Spain. [London]: H. Moll. ("The Projection of this Map is Call'd Mercator's, And it is laid Down according to the newest and Most Exact Observations By H. Moll Geographer. 1720.") ("Sold by H. Moll over against Devereux Court between Temple Bar and S^t Clements Church in the Strand, where you may have his New and Compleat Atlas, or Set of Twenty-Seven Two-Sheet Maps, bound or single, All compos'd and done, according to the Newest and most Exact Observations. Sold by Tho: Bowles next ^o Chapter House in S^t Pauls Church Yard, Iohn King at ^o Globe in ^o Poultry near Stocks Market and Iohn Bowles at the Black Horse in Cornhill.") ("A Great part of this Map is taken from ^o Original Draughts of M^r Blackmore, the Ingenious M^r Berisford now Residing in Carollina, Cap^t Nairn and others never before Publish'd [*sic*], the South West Part of Louisiana is done after a French Map Published at Paris in 1718. and we give you here the Division or Bounds according to that Map, which Bounds begin 30 Miles S. West from Charles Town in Carolina and run on to ^o Indian Fort Sasquesahanok 30 miles west of Philadelphia &c.") ("NB. The French Map mention'd in the Title is done by Mons^r Delisle and Publish'd [*sic*] by him at Paris in Iune 1718. which I am ready to shew to any Gentlemen [*sic*] that desires it.")

► Only the lower part of the Baja Peninsula is depicted, labeled "Part of California", which is separated from "New Mexico" by "Gulf of California", which runs off the map to the north-northwest. California is implied to be an island, however, by the arrangement of the rivers here noted. On the east side of the gulf there is an embayment headed by a river, "Tison R."; a tributary to this river is "R. of Good Hope" (Gila River, if "Tison" is the Colorado); they head in a region labeled "Great Teguao", to the north of which is a vast area labeled "Parts Unknown", though the "Good Hope" heads more directly in an area labeled "Zuni". Note as well that to the south of these rivers, entering the eastern side of the same embayment is a much larger river system, the principal stream labeled "R. Sonaco", a name that has likewise been given to the Gila on some other maps, the headwaters of which are south of "Acoma". Northwest of "Tison R." is another river, "R. Anguchi", that arrives in a separate embayment of the gulf; and there are other rivers farther to the northwest, not labeled.

McLaughlin notes a second state: "Title states: . . . with the adjoyning Territories . . . (rather than 'y^e') * * * Sold by Geo. Grierson Printer to the Kings Most Excellent majesty, at the Kings Arms and two bibles in Essex Street Dublin"]

1723 25.1313

The Isle of California. New Mexico. Louisiane. The River Misisipi. and the Lake's of Canada. Herman Moll Fecit.

► "California" (also labeled in part "New Albion") is an island separated by "Gulf of California" from "New Mexico, Granada or Marata" and "P. of Mexico or New Spain." On the east side of the gulf is an embayment headed by a river, "Tecon R.";

farther south in this embayment is “du Coral R.” Farther north are “de Aguchi R.” and “Bona Guia R.” Southeast(!) of these rivers is “The 7 Cittys”.

- 1729 25.1604 **Map of the World According to Marcators [sic] projection, Shewing the Course of M^r Funnell^s Voyage Round it.** (“Co: Voy: Vol: IV. Facing the Title.”)

To accompany: A voyage round the world. Being an account of Capt. William Dampier’s expedition into the South Seas in the ship *St. George*. With his various adventures and engagements, &c. Together with a voyage from the West Coast of Mexico to East India. By W. Funnell, Mate to Capt. Dampier.

In: *A collection of voyages. Vol. IV.* London: Printed for James and John Knapton, at the Crown in St. Paul’s Church-Yard.

This map is the frontispiece to the volume.

► “California” is shown as an island, separated from “New Mexico” by a strait (not labeled). Midway on the east side of the strait single, linear river (not labeled) arrives from the north. Just to the northwest of that mouth is an embayment, which seems to receive a very short river (not labeled) from the northeast. (Of additional note on this map is the depiction of “Meschasipi R.”, which enters the northwestern side of “Bay of Mexico”.)

MCLAUGHLIN 180 [reissue]

- 1745 25.1806 **A Map of Mexico or new Spain[,] Florida now called Louisiana and Part of California &c. By H: Moll Geographer.** (“page.766V2”.)

In: *A collection of voyages and travels, consisting of authentic writers in our own tongue, which have not before been collected in English, or have only been abridged in other collections. Vol. II.* London: Printed and Sold by Thomas Osborne of Gray’s-Inn.

► The top of the map cuts off the northern part of the “Gulf of California or Red Sea” that separates “Part of California” from “New Mexico”, but whether California is meant to be a peninsula or separated from the mainland by a strait is unclear. Midway on the eastern side of the gulf are embayments that resemble the same kind of embayments that were depicted on maps that show the waterway as a strait, into which the Colorado and other rivers flowed. The northwesterly of the two embayments is twinned, with one arm to the north and the other to the northeast; each receives a river. Adjacent to that embayment to the southeast is single embayment, aligned northerly, which receives at its head a river from the north-northeast as well as a river from the east that is labeled on a headwater fork “R. Sonica” and which passes by a place marked “Casagrande”, thus this must represent the Gila River (“The North R.”, which is the Rio Grande, is properly shown descending to the “Gulf of Mexico”.)

McLaughlin indicates that this is a reissue of a 1711? map.

Monath, P. C.

MCLAUGHLIN 238

- 1758 25.1825 **Totius Americæ Descriptio Nova. Norimbergæ apud P. C. Monath.** [In Latin, with volume in German.]

In: *Kurzverfassetete Kinder Geographie, in acht und vierzig Lectionen eingetheiler, und mit bendthigten Charten verschen. In französischer Sprache verfasset durch den Herrn Abt Lengler du Fresnoy, und zum Neuzen der Jugend in die teutsche übersezet, nunmehr aber von neuem übersehen, in vielen Stücken deutlicher gemachet, mit nicht wenigen nützlichen Zufäzen vermehret, und insonderheit zum Gebrauch für Teutsche eingerichtet. Dritte, um vieles verbesserte, und vermehrte, Auflage.* Nürnberg, bei George Peter Monath, between pp. 48/49.

► “California I.” (also labeled “Nova Albion” at its northern end) is separated from “N. Mexico” by “Mare Rubrum”. Midway on the east side of the strait is an embayment, which receives on its eastern side a river (not labeled) from the east-

southeast, a river with two headwater forks. Just to the northwest of this embayment a solitary river (not labeled) arrives in the strait from the north-northeast. (The first river's headwaters about the course of "Magdalen Na fl" [sic], with headwater just south of "S. Fe", which could be the Rio Grande in as much that it flows to "Sinvs Mexicanvs" and that there is no corresponding, misdirected course of that river to the Californian strait.)

Monte, Urbano

SHIRLEY 239

- 1603 25.447 **Totivs orbis terrarum exacta descriptio.** Milano. [In Latin.]
 ▶ A north polar projection of the world. "Mare Vermeio" separates "California" from "Marata". Three tributaries converge toward the head of the gulf, at which "Tontontec" is labeled.

Moore, Jonas

McLAUGHLIN 79

- 1681 25.1639 **New Mexico.** *In:* Moore, Jonas, *A new systeme of the mathematicks: Containing * * * VIII. A new geography, or a descripton of the most eminent countries and coasts of the world, with maps of them, and tables of the latitude and longitude. Composed by Sir Jonas Moore Knight, late Surveyor General of His Majesty's Ordnance, and Fellow of the Royal Society: And designed for the use of the Royal Foundation of the Mathematical School in Christ-Hospital. By His Majesty's special command.* London, Printed by A. Godbid and J. Playford, for Robert Scott, Bookseller in Little Britain.
 ▶ "I: California or N^{ew} Albion" is separated from "Qvivira or N Albon" [sic] by "Mar Vermeio". Midway on the east side of the strait, four rivers are depicted (from north to south): "R. de Anguchi" from the northeast; "Anguchi R" from the northeast; and, arriving independently at the head of an embayment, "Tecon R." from the north-northeast (its northeastern headwater fork labeled "Cicuia R."), and a river (not labeled, but labeled on its northwestern headwater fork "Huex R") from the northeast.
 Compare also du Val (1670, ITEM NO. 25.1645; 1679, ITEM NO. 25.1646).

Morden, Robert

- 1693 25.1632 **New Mexico vel New Granata et Marata et California by R. Morden.** [In English, with title in muddled English and Latin.]
In: *Geography rectified, or, A description of the world, in all its kingdoms, provinces, countries, islands, cities, towns, seas, rivers, bayes, capes, ports : their ancient and present names, inhabitants, situations, histories, customs, governments, &c. : as also their commodities, coins, weights, and measures, compared with those at London.* London: Printed for Robert Morden and Thomas Cockerill, at the Atlas in Cornhill, and at the Three Legs in the Poultre, over against the Stocks-Market.
 Map appears on p. 585.
 ▶ The boundaries of New Mexico (containing New Granata and Marata) are not defined, although the southern part of the map delineates boundaries for "Cinaloa", "New Biscay", and "Part of New Spain". "The Iland [sic] of California" is separated from [New Mexico] by "Sea of California or Vermeijo". The northern end of the strait is nearly closed off by islands and a flattened, southwest-facing coast of "Quⁱviria" [sic]. Midway on the eastern side of the strait are two embayments. The northern one, relatively small and trending to the north-northeast, receives "P [sic] Aguchi or Bona Guia" from the northeast, north of which is a place marked, peculiarly, "Reylorpado". The southern embayment is bilobed, the northern lobe receiving "R Tecon" from the north-northeast, and the southern lobe receiving "R Coral" from the

northeast. ("R Bravo" [Rio Grande] is correctly depicted arriving at the Gulf of Mexico (not labeled).

Morden, Robert, AND Berry William

SHIRLEY 272

NO DATE 25.253 **[Map of the world.]** London: Robert Morden and William Berry. ("To Cap^t John Wood this Map of the World Drawn according [*sic*] to Mercators Projection is humbly Dedicated By Rob^t Morden & Will^m Berry Sold at y^e Atlas in Cornhill & at y^e Globe in y^e Strand London.") [1690?] [Labeling in English, Spanish, and Latin.]

Map principally displays the Americas.

► The island, "California" (with its northern end labeled "Nova Albion"), is separated from "Nova Granada" by "Mare Vermejo". Midway along the east side of the strait it appears that "R d Tecon" flows due south from a place marked "El Rey Coronado" [*sic*] directly into the strait, although its lower end is shown widening a little. Arriving there independently from the northeast is "R Coral".

Morse, Jedidiah

1794 25.2056 **A New Map of North America from the latest and best Authorities 1794.** ("Published Octob^r 10.th 1794, by J. Stockdale, Piccadilly.") ("Allen sculp.^t.")
In: Morse, Jedidiah, The American geography; or, a view of the present situation of the United States of America: astronomical geography; geographical definitions, discovery, and general description of their boundaries; mountains; lakes; bays, and rivers; natural history; production; population; government; agriculture; commerce; manufactures; and history. —A concise account of the war, and of the important events which have succeeded; a particular description of kentucky, the western territory, the territory south of Ohio, and Vermont: of their extent; civil divisions; chief towns; climates; soils; trade; character; constitutions; courts of justice; colleges; academies; religion; islands; Indians; literary and humane societies; springs; curiosities; histories; mines; minerals; military strength, &c. with a view of the British, Spanish, French, Portuguese, and Dutch dominions, on the continent, and in the West Indies, and of Europe, Asia, and Africa. A new edition, revised, corrected, and greatly enlarged by the author. London: Printed for John Stockdale, Piccadilly. 1794.
 ► The peninsula "California" is separated from "New Navarra" by "Gulf of California"; to the north of the peninsula is "New Albania" on the west and "New Mexico" on the east. "Colorado R." is depicted on a straight south-southwesterly course to the gulf. "Coral R." (Gila River) arrives independently at the head of the gulf from the east. "Blue R." is a significant tributary to the Coral, its course south to south-southwest and running entirely parallel to the Colorado. To the far north, between "Head of the Missouri unknown" and "R Oregon" is "Quivira". (Of additional note is the Rio Grande of the Gulf of Mexico, which is labeled "Wilde or North River".)

WHEAT I:244 [with illustration facing p. 150]

1797 25.770 *The American gazetteer, exhibiting, in alphabetical order, a much more full and accurate account, than has been given, of the states, provinces, counties, cities, towns, villages, rivers, bays, harbours, gulf, sounds, capes, mountains, forts, Indian tribes, and new discoveries, on the American continent, also of the West-India Islands, and other islands appendant to the continent, and those newly discovered in the Pacific ocean Boston: at the presses of S. Hall, and Thomas and Andrews, [unpaginated], maps.*

MAPS not seen for this Cartobibliography, but Wheat (Volume 1, facing p. 150) illustrates "A New Map of North America Showing all the New Discoveries 1797". See text entries in Morse: "Coral River, in New Mexico, runs a course W. by S. and empties into the head of the gulf of California, close by the mouth of the Collerado river [*sic*]"

(ENTIRE ENTRY) "*Pedro, St.* a town of New-Mexico, N. America, situated on the S side of Coral river, near the confluence of that river with the Colorado. The united stream runs a short way southward, and falls into the north part of the Gulf of California."

(ENTIRE ENTRY) The text entry for "*Oregan River*" [*sic*] reads, "*See River of the West*", which is a superficial entry; and although there is no separate entry for the Columbia River, later editions that do give distinctly different the geographic coordinates for the Pacific Ocean mouths of the Columbia and the River of the West (see remarks with ITEM NO. 2.26977 in Volume 1/Part B of THE GRAND CANON).]

Mortier, Pierre

- SHIRLEY 559
- NO DATE 25.1626 **Carte Generale de Toutes les Costes du Monde, et les Pays Nouvellement Decouvert. Dressé sur les Relations les plus Nouvelles. Et Principalement sur la Carte que Monsieur N.  ► The island, "Californie", is separated from "Nouveau Mexique" by "Mer Vermeio ou Mer Rouge". Only river mouths are portrayed on this map. Midway on the east side of the strait are indications for (north to south) "R. d’Anguchi", "R. del Toucan", and "R. de Coral".
- NO DATE 25.1008 **Novissima et Accuratissima Septentrionalis ac Meridionalis Americæ Descriptio, multis Locis recentibus [*sic*] aucta et correcté divisa in Omnes Partes Hodiernas per Fredericum de Witt Amstelodami Cum Privilegio D.D. Ordinum Holl. Westfrisizæq3 [Hollandiaie Westfrisizæqve]. ex Officina P. Mortier. [Ca. 1710.] [In Latin.]**
 ► California, an island, is separated from "Mexico" by "Mare Vermio olim Mare Rvbrvm". On the east side of the strait, "R. de Tecon" and "R. de Coral" are depicted converging at the head of a bay.
 For an earlier ed. see (Covens and Mortier, no date (ca. 1700), ITEM NO. 25.1007.)
- SHIRLEY 622
- NO DATE 25.1627 **Carte Generale du Monde, ou Description du Monde Terrestre & Aquatique \ Generale Waereld Kaart, of Beschryving van de Land en Water Waereld. ("A Amsterdam Chez Jean Còvens Corneille et Pierre Mortier.") (I. van Luchtenburg, Delin. et Sculpfit.) ("Tom. 1. Pag 2.") [1730?] [In French; with titles in French and Dutch.]**
In: Historie des Ouder en Nieuwen Testaments (Amsterdam).

► The island, “Californie”, is separated from “Nouv. Mexique” by “Mer Vermeio ou Mer rouge”. On the east side of the strait, four rivers arrive: “R. D. Anguchi” from the northeast to an embayment; “R. d. Toucan” from the northeast to an embayment; an exceedingly short river (not labeled) from the northeast to an embayment; a bilobed embayment receives “R. Coral” from the north to a north-northwest trending lobe, and a river (not labeled) from the northeast to a north-northeast trending lobe. (These are distinct from “R. de Nort” (Rio Grande), which is shown some distance farther to the south, arriving from a large lake to the northeast to the head of an east-northeast trending embayment.)

Moullart-Sanson, Pierre

SHIRLEY 592

NO DATE 25.1637 **Hemi-sphere Occidentale du Globe Terrestre Veue en Concave, l'oeil étant à la Convexité du Globe vis à vis la Section du 90^me Meridien avec l'Equateur et a une distance egalle au Demi-Diametre de la Carte où sont l'Amérique Septentrionale[,] l'Amérique Meridionale et Partie des Terres Arctiques et Antarctiques sous divisées en leurs Regions.** (“Representation du Globe en Concave.”) (“1. page 1^{re} partie.”) [1707?] [In French.]

► An interesting projection, viewing the surface of the earth as if seen from inside the globe. The island of California (not labeled) is separated from “Nouveau Mexique” by a strait (not labeled). On the east side of the strait a single river (not labeled), with two headwater forks, arrives from the northeast.

The same as in Sanson (Les S^{rs}) (1705, ITEM NO. 25.1636), with emended title.

Mount, Richard, AND Page, Thomas

MCLAUGHLIN 201 [State 1 (sic)]

1721 25.1809 **A Generall Chart of the South Sea from the River of Plate to Dampiers Streights on y^e Coast of New Guinea.**

In: Atlas maritimus novus, or The new sea-atlas. London: Printed for Richard Mount, and Tomas Page on Tower-Hill.

► A portlan chart of the Pacific Ocean. The island, “California”, is separated from “New Spaine” by a strait (not labeled). Only the mouths of rivers are depicted. Midway on the east coast of the strait are (north to south) “R. d: Anguchi” and, entering into one embayment, “R: del Toucan” and “R: d Carol”.

This state of the map, listed by McLaughlin as “State 1” with no attribution in cartouche, probably should be “State 2” because a poorly eradicated attribution can be seen, beginning, “By S...” McLaughlin’s “State 2” lists the attribution, “By S. Thornton Hydrographer at the England Scotland & Ireland in the Minorities London”.

Müller, Johann Ulrich

MCLAUGHLIN 108

1692 25.1597 **America Septentrionales.** [Title in Latin; volume in German]

In: Kurtz-bündige Abbild- und Vorstellung der gantzen Welt / worinnen alle in derselben/ sonderlich aber in Teutschland/ belegene Königreich/ fürstenthumer/ Provintzen und Landschafften/ vornehme Städte/ Bestugen/ hohe Schulen/ Flüz/ Berge/ Insuln und Wälder/ &c. Wie nicht weniger die jetzigen hohen Regenten dieser und jener Länder bemercket werden. Ulm: Verlag Georg Wilhelm Kühnen, VARIOUSLY ENUMERATED LEAVES [103 total].

Volume is a translation of *Geographia totius orbis compendiaris*. This is plate III accompanying “Das Mitternächtische America”. Plates are enumerated in separate sequences for different parts of the volume.

► “I. California” is separated from “N. Mexico” by “M. Vermilio”. On the east side of the strait, north of “R. Nort” (Rio Grande), is a river (not labeled) arriving from the northeast, northwest of “S. Fe”.

- 1692 25.2151 **Nova Mexico.** [Title in Latin; volume in German]
In: Kurtz-bündige Abbild- und Vorstellung der gantzen Welt / worinnen alle in derselben/ sonderlich aber in Teutschland/ belegene Königreich/ fürstenthumer/ Provintzen und Landschafften/ vornehme Städte/ Bestugen/ hohe Schulen/ Flüsz/ Berge/ Insuln und Wälder/ &c. Ocean is dotted with islands, and not far off the west coast of “Chamaho” is “Zipangri”. South America includes the label “Nouus orbis” and, more prominently, in German Fraktur, “Die Nüw Welt” (Die Nüw Welt). There is also the notation there, “Insula Atlantica quam uocant Brasiln et Americam”, in part taking its cue from the Waldseemüller map of 1507 that first placed the label “America” on the South American continent.

- SHIRLEY 92
- NO DATE 25.1473 **Das erst general/inhaltend die beschreibung und den circkel des gantzen erdtreichs und Möres.** [Basel?]: [Sebastian Henricpetri]. [Includes the monogram “”, which identifies the engraver David Kandel.] [1569?] [In German.]
- The very stylized North American continent is divided in this projection on the line of longitude running through the western part of the Americas, such that the eastern parts are on the west edge of the map and the western parts on the east edge. North America is shown only with the labels “Terra Florida” (on the eastern part) and “Temi stitan” (on the western part). The west coast of North America is shown only as a wavering line runing north-south. Not far off the west coast is “Zipangri”. South America carries the label, “America Vel Brasiln ins.”, in part taking its cue from the Waldseemüller map of 1507 that first placed the label “America” on the South American continent.
- SHIRLEY 163
- NO DATE 25.409 **Die erste General Tafel/die Beschreibung und den Circkel des gantzen Erdtreichs und Meers innahaltend.** [Basel?]: [Sebastian Henricpetri]. [1588?] [Text and map title in German, map labels in Latin.]
- Text on verso gives title, in part, **Die erste General. Die Erste Landtafel/begreiff in sich der gantzen Erdkugel umbkreis auf die Ebne auszubreitet . . .**
- The very broad North American continent is labeled “India vel Armerica Nova” [*sic*] (text on verso gives “India vel America nova” and “New Indien”). The Gulf of California (not labeled) is recognizable, with a narrowing extension of it to the northwest and north which would represent the Colorado River (not labeled). Another river meets this generalized gulf midway, from the east-northeast, while yet another river parallels it that meets the mouth of the gulf. The area between the first two rivers is labeled “Granata”, while farther to the northwest is “Quiuira Regnum”. East of the gulf is the label “Hispannia noua” (text on verso also gives “New Spanien”).
- WHEAT I:20
- NO DATE 25.1155 **Americae sive novi orbis, nova descriptio.** [In German, with map title in Latin.]

 ► Actually a map of North and Central America and a portion of South America on four sheets. The island, “California”, is separated from “N^{ua} Mexico” and “N^{ua} Granada” by “Seno Vermejo”. Midway on the east side of the strait, two rivers (not labeled) arrive; the northerly one from the north-northeast, running its length between two mountain ranges, with headwater off the map to the north, and the southerly one from the northeast. “Quivera” is labeled to the northwest of these rivers.
 McLaughlin notes two states, 1660, 1670-1671.

MCLAUGHLIN 23 WHEAT I:53

Nolin, I. B. [Nolin, Johann Baptiste]

WHEAT I:88

- 1704 25.1165 **L’Amerique Septentrionale, ou la Partie Septentrionale des Indes Occidentales. ou se trouve le Canada ou Nouvelle France[,] La Floride[,] la Virginie[,] les Isles Antilles[,] le Nouveau Mexique et al Nouvel^e Espagne[.] Dressée sur les Memoires les plus Nouveaux.** Paris: Chez I. B. Nolin. (“Le S^r Nolin Auteur de cette carte en a fait plusieurs autres de l’Amerique Septentrionale Sçavoir le Canada[,] le Nouveau Mexique, l’Archipelague du Mexique ou sont les Isles Antilles. etc.”) [In French.]
 ▶ “Is. de Californie” is separated from “Nouveau Mexique, ou N:Granata, et Marata.” by “El Mar Vermeio, ou Mer rouge, et de Cortes.” On the eastern side of the strait is a three-headed embayment, into which “Rio de Tecon” flows to the northern one and “Rio de Coral” flows to the central one.
- 1708 25.1449 **Le Globe Terrestre Representé en Deux Plans-Hemispheres Dressé Sur la Projection de M^r de la Hyre de l’Academie Royale des Sciences, et sur plusieurs Routiers et Memoires des plus habiles Pilotes et Savans Voyageurs le tout rectifié et calculé selon les dernieres observations. et Dedié a M^{re} L’Abbé Bignon Conseiller d’Etat Ordinaire Par son tres humble et tres obeissant serviteur I-B-Nolin Geographe ordinaire du Roi. A Paris Chez l’Auteur sur le Quay de l’Horloge du Palais a l’Enseigne de la Place des Victoires Vers le Pont-Neuf. Avec Privilege du Roi. 1708.** (“Le S^r Bocquet Peintre a inventé et gravé les Sujets qui acompagne ce Planisphere, Sur les Penséesque le S^r Nolin luy a Communiqué. A Paris Chez I. B. Nolin Geographe ord: du Roy. Sur le Quay de l’Horloge du Palais à l’Enseigne de la Place des Victoires, Vers le Pont-Neuf. Avec Privilege du Roy.” [Nicolas François Bocquet.]) [In French.]
 ▶ The northwestern part of North America, with the presumed continental mass to the west of it, is labeled “Terres Inconnues”. The peninsula, “Californie”, is separated from “Nouveau Mexique”, “Nouvelle Ganate”, and “P. de Cinaloa” by “G. de Californie”. A meandering “Bonagua R.” enters the gulf from the north-northeast, with headwater to the northwest of “S^a Fe”, west of an area labeled “P. de Cibola”; there are no tributaries to it. Some distance south of the mouth of the Bonagua, “Sanaca R.” comes to the gulf from the east, which is a name sometimes given to the Gila River on contemporary maps. (A close look at the map discerns that the name “Bonagua R.” looks very much like “Bonagina R.”, but the dot from the “i” is misplaced due to crowding of other labels.)
- 1755 25.1433 **L’Amerique Dreßeé sur les Relations les plus Recentes rectifiéés Sur les dernieres observations Dedié et Presentée a sa Majesté tres Chrestienne Louis XV par Son tres humble tres obeissant et fidel Sujet I-B-Nolin Geografe. NO DATE 25.1799

L’Amerique Septentrionale. ("M. Ôgier fecit".) [[1702?](#)] [[In French.](#)]

► "Isle Californie" is separated from "Nouveau Mexique ou N. Grenade et Marate" by "Mer Vermeille". Midway on the eastern side of the strait two rivers (not labeled) arrive from the northeast; the southern one arrives at the head of a large, bilobed embayment.

Ogiluium, Johanem [Ogilby, John]

MCLAUGHLIN 51

1671 25.1158

Novissima et accuratissima Totius Americæ Descriptio per Johanem Ogiluium Cosmographum Regium. ("F. Lamb Sculp".) [[Map in Latin; volume in English.](#)]

In: America: being the latest, and most accurate description of the New VWorld; containing the original of the inhabitants, and the remarkable voyages thither. The conquest of the vast empires of Mexico and Peru, and other large provinces and territories, with the several European plantations in those parts. Also their cities, forrresses [sic] towns, temples, mountains, and rivers. Their habits, customs,

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

manners, and religions. Their plants, beasts, birds, and serpents. With an appendix, containing, besides several other considerable additions, a brief survey of what hath been discover'd of the unknown south-land and the Arctick region. Collected from most authentick authors, augmented with later observations, and adorn'd with maps and sculptures, by John Ogilby Esq, His Majesty's Cartographer, Geographick Printer, and Master of the Revels in the Kingdom of Ireland. London: Printed by the Author, and are to be had at his House in White Fryers.

► "California" is an island, with "Mare Vermejo" separating it from "Quivira" and "Nova Mexico". On the eastern side of the strait, two rivers enter into two embayments: "R del Tecon" (with headwater forks) and "R Coral"; they come from an area with a place marker labeled "Ciloba" [*sic*].

This map is effectively plagiarized from Schagen (in Montanus, 1671, *ITEM NO.* 25.1157).

Ortelio, Abrah. [Ortel, Abraham]

SHIRLEY 114 WHEAT I:10

1564 25.390 **Nova totivs terrarvm orbis ivxta neo tericorvm traditiones descriptio.** Antwerp. [*In Latin.*]
 ► Several rivers are depicted as coming from the western North American continent to "Mar Vermeo". Of note are "R. Totontecac" that comes southwestward from "Cevola", and "R. Tigvas" that comes southward from "Qvivor Regio".

Ortelius, Abraham [Ortel, Abraham]

NO DATE 25.1398 **Typvs Orbis Terrarvm.** ("Ab. Ortelius describ. cum priuilegio decennali.") [*In Latin.*]
 Library of Congress gives publishing data in square brackets as "[Amstelodami? : s.n., 1628?]."
 ► The southwestern part of the continent "America sive India Nova" depicts the California area as a peninsula. The Gulf of California (not labeled) receives at its head a river that descends from the north and northwest from an area labeled "Totontecac", with two tributaries: one short one from the northeast, also from "Totontecac", and a long river from the east-northeast, passing by places labeled "Ceuola" and "Granata". The rivers are not labeled.

NO DATE 25.1727 **Americae Sive Novi Orbis, Nova Descriptio.** ("Cum Priuilegio decennali Ab. Ortelius delineab. et excudeb".) [*Ca. 1618-1630.*] [*In Latin.*]
 The final state of Ortelius's map of the Americas, with principal changes in the area around the Strait of Magellan.
 ► The northwestern part of North America is occupied by an ornamental cartouche, "Vltierius Septentrionem versus hic regiones incognitæ adhuc sunt." The peninsula, "California", is separated from "Marata" by "Mar Vermeio". A river system converges at the head of the gulf; "Rio Hermoso" (Gila River) arrives from the east-northeast; its upper part is labeled "Tigvas rio". Part way along that river is "Ceuola". A river (*i.e.*, the Colorado) arrives from the north-northwest, the result of the convergence of two rivers at "Tototontecac"; an unlabeled river from the northwest heading in an area labeled "Tolm", and a river from the northeast heading in a mountainous area and labeled "Totontecac flu.", along which is the place "Chucho".

- SHIRLEY 122 WHEAT I:14
- 1570 25.393 **Typvs Orbis Terrarvm.** [In Latin.]
In: Theatrvm orbis terrarvm. Antverpiae: Apud Aegid. Coppenium Diesth.
 [Atlas.]
 ▶ A world map that depicts the Gulf of California (not labeled) as a gulf headed by three principal rivers (none labeled) that come from the region labeled "Totontec", which includes places named "Axa", "Totontec", and "Ceuola", among others.
 The western hemisphere of this map is reproduced in Winship, 1896, Plate 47, ITEM NO. 2.6973 in Volume 1/Part B of THE GRAND CANON.) Library of Congress indicates for its separate map copy that Shirley ascribes a date of 1579 or later.
- WHEAT I:15 [1587 issue in illustration facing p. 25]
- 1570 25.2152 **Americae Sive Novi Orbis, Nova Descriptio.** [In Latin.]
In: Theatrvm orbis terrarvm. Antverpiae: Apud Aegid. Coppenium Diesth.
 [Atlas.]
 ▶ A map of the Americas which depicts the same general layout as shown in "Typvs Orbis Terrarvm" but labels the gulf "Mar Vermeio" and the central and eastern of the three rivers, respectively, "Totontec fl." and "Tiguas rio."
- WHEAT I:16
- 1570 25.2153 **Tartariae Sive Magni Chami Regni tÿpus.** [In Latin.]
In: Theatrvm orbis terrarvm. Antverpiae: Apud Aegid. Coppenium Diesth.
 [Atlas.]
 ▶ A map that focuses on northern Asia and the North Pacific, but which to the east is shown the bare outline of northwestern North America ("Americae Nel Novi Orbis Pars"), which for details displays only "Mar Vermeio" and four tributaries to it; the three tributaries that converge at the head of the gulf are "Rio Axa", "Rio Tiguas" with a tributary to it (not labeled), and "Rio Totontecas."
NOTE: Lowery (1912, ITEM NO. 1.375 in Volume 1/Part B of THE GRAND CANON), p. 83, remarks, "This map was first published in the earliest edition of Ortelius of 1570. It was republished in all the editions up to 1612, including the english [*sic*] of 1606."
- SHIRLEY 132
- 1574 25.398 **Tiipus [*sic*] Orbis Terrarum.** [In Latin; volume in German.]
In: Spieghel der Werelt . . . Antwerp: Philippe Galle. [1577.]
 ▶ The labels "Totontec" and "Marata" occupy the region of interest to this Cartobibliography. The Gulf of California is not much more discernible than a river. Shirley notes (p. 156), "From the *Epitome*, Ortelius' pocket-size atlas."
- WHEAT I:24
- 1589 25.1272 **Maris Pacifici, (quod vulgò Mar del Zur) cum regionibus circumiacentibus, insulisque in eodem passim sparsis, novissima descriptio.** ("Genio et ingenio nobili Dn. Nicolao Roccoxio, Patricio Antverpiensi, eivsdemqve vrbis senatori, Abrahamus Ortelius Regiæ M^{ts} geographus sub. merito dedicabat. 1589.") ("Cum privilegijs Imp. & Reg. Maiestatum, nec non Cancellariæ Brabantiae, ad decennium.") [In Latin.]
 ▶ The peninsula of "Califormia." [*sic*] and "Noua Hispania." are separated by "Mar Vermejo.", at the head of which are (from west to east) an inlet labeled "Baia bermosa"; a river, "R. grande", flowing from the north; and a river, "R. hermoso", flowing from the northeast.
 The 1589 map is actually known from later eds. of *Theatrum Orbis Terrarum*; this one given as Antwerp, 1603.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- 1592 25.1123 **Typvs orbis terrarvm.** [In Latin.]
In: Theatrvm orbis terrarvm. Antverpiæ : in officina Plantiniana, auctoris aere et cura. [Atlas.]
 ► A world map that depicts the Gulf of California (not labeled) as a gulf headed by three principal rivers (none labeled) that come from the region labeled "Totontec", which includes places named "Axa", "Totontec", and "Ceuola", among others.
- 1603 25.1124 **Tartariae Sive Magni Chami Regni tÿpus.** ("Cum Priuilegio"). [In Latin.]
In: Theatrvm orbis terrarvm. Antverpiæ, Apvd Ioannem Bapt. Vrintivm. [Atlas.]
 ► Map focuses on northern Asia and the North Pacific, but which to the east is shown the bare outline of northwestern North America ("Americae Nel Novi Orbis Pars"), which for details displays only "Mar Vermeio" and four tributaries to it; the three tributaries that converge at the head of the gulf are "Rio Axa", "Rio Tiguas" with a tributary (not labeled) to it, and "Rio Totontecas."

Oterschaden, Ioañes [Oterschaden, Johann]

SHIRLEY 237

- NO DATE 25.446 **Noua et integra vniversi Orbis descriptio.** ("Reuerēdiss. et illustriss. D^o D^o Urbano Sangelasio-Episcopo Coñingierisi, Ioañes Oterschaden Belga humillimè D·D·") [Ca. 1603.] [In Latin.]
 12 gores for a 17-cm globe.
 ► The western part of North America is labeled "Hispania Nova", although the distance between "Sinus S Michael" (the Gulf of Mexico) and the west coast is severely foreshortened with no indication either of California or a Californian gulf (or strait), although "Temistitan" [*sic*] is noted along the southwestern coast and just beneath that label is a small, peculiar, bulbous embayment oriented east-west. The west coast is essentially a straight north-south coastline, with the island "Zipangri" just off the southwestern coast, opposite "Temistitan". Three rivers, one of them a large one, converge on the western side of the Gulf of Mexico, none of which can be convincingly made to be even imaginatively any of the rivers of the Colorado basin.

Ottens, R., AND Ottens, I. [Ottens, Reinier, AND Ottens, Josua]

Te Amsterdam By Reinier en Iosua Ottens.
 The same map as in Chez Louis Renard (1715, ITEM NO. 25.2148).
 ► The island, "California", is separated from "Nova Granada" by a strait (not labeled). Only the mouths of rivers are depicted. Midway on the east side of the strait are shown the mouths of "R. de Anguchi" and, arriving in a bilobed embayment, "R. del Tecon" and "R. de Coral".

Overton, Henry

McLAUGHLIN 209 ["1730"]

- 1711 25.1432 **America.** ("Printed & Sold by Henry Overton at the White horse without Newgate London 1711.") ("To Her most Sacred Maj:^{ty} Ann Queen of Great Britain. France and

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Ireland This Mapp of America Is Most Humbly Dedicated by Your Majesties most Dutyfull Subject Henry Overton 1711.” (“H. Hillsberg Aqua Fortisc.”)

► The map includes the legend: “California, by former Geographers was allways taken for part of y^e Continent; but by a Mapp (taken by y^e Dutch from y^e Spaniards) its found to be an Island, to contain where broadest 500 Leagues; from Cape Menocino even to Cape S.^t Luke according to Francis Gaule &c y^e foremention’d Mapp to extend in length 1700 leagues.” The island, “California”, is separated from “New Granada” by a strait. On the eastern side of the strait is an embayment that receives independently “R del Tecon” from the north (which has two headwater streams) and “R Coral” from the northeast.

MCLAUGHLIN 222

1741 25.1820 **A New & Correct Map of the Trading Part of the Wst Indiex, including the Seat of War between G^t Britain and Spain; Likewise the British Empire in America, with the French and Spanish Settlements adjacent thereto; Adorn’d with Prospects of y^e most considerable Towns, Ports, Harbours &c. therein contain’d from the latest & best Observations, 1741. Dedicated to the Hon^{ble} Edward Vernon Esq^r Vice Admiral of the Blue and Commander in chief of all his Maj.^s Ships in the West Indies, by H.O.** (“Printed for and Sold by Henry Overton at the White Horse without Newgate London.”)

► The island, “California”, is separated from “New Mexico” by “Gulf of California or Red Sea”. Midway on the east side of the strait are three embayments, which receive (north to south) an unlabeled river from the northeast, “Angouchi R.” from the northeast, “Tison R.” from the north-northeast (which has a tributary to it from the east, “Good Hope R.”), and a large river from the east with numerous headwaters, among which are “Azul R.” and “Sonata R.”, and along which it passes “Casagrande”. The “Good Hope R.” heads near the “Zuni” and “Moqui” towns. To the north is “Great Teguao”, which incudes “Quivira”, and beyond which to the north is labeled “Parts Unknown”.

Overton, Iohn [Overton, John]

MCLAUGHLIN 40 [State 3]

1668 25.1650 **A New and most Exact map of America Described by N I Vischer and don into English Enlarged and Corrected according to I Bleau and Others with the Habits of y^e people & y^e manner of y^e Cheife Sitties y^e like never before London. Printed Coloured and are to be sould by Iohn Overton at y^e White horse neere the Fountaine Tavern Without Newgate.** (“This California was in times past thought to beene a part of y^e [sic] Continent and so made in all maps but by further discoveries was found to be an Iland long 1700 legues”.)

► “Iland of California” is separated from “New Granada” by “The Vermian Sea”. Midway on the east side of the strait are three rivers, all from the north-northeast: “R de Anguele”, “R de Tecon”, and “R de Corol”; the latter two arrive independently at the head of one embayment.

P

Palairt, J. [Palairt, Jean] *see also* Delarochette, L. [Delarochette, Louis Stanislas d’Arcy]

1755 25.1457 **Carte de l’Amérique Septentrionale 1754. [In French.]**
In: Atlas méthodique, composé pour l’usage de son altesse sérénissime Monseigneur le prince d’Orange et de Nassau, stadhouder des sept provinces-unies,

etc. etc. etc. Londres: chez Mess. J. Nourse & P. Vaillant; Amsterdam: J. Neaulme; Berlin: P. Gosse.

► The northwestern part of North America is blank. The peninsula, “Californie”, is separated from “Nouv: Navarre” by “Mer Vermielle”. This map is notable for its inclusion of “R. del Norte” (Rio Grande) from north of “St^{ra} Fé” to the Gulf of Mexico, but no rivers are shown in the area north of the Gulf of California.

Pereira, António

NO DATE 25.797

[Early representation of Newfoundland, Lower California, the Amazon, and the Ladrões.] [Lisbon?] [ca. 1546.] [Map with principal features in Latin, place names in Portuguese.]

MANUSCRIPT illuminated world map (partial) on vellum.

• Although manuscripts are not generally cited herein, it is reproduced in the paper by Cortesão (citation below) and noted here for its association with an unrecognized cartographer very soon following the earliest Spanish explorations of the gulf.

► Depicts the Gulf of California with at its head interesting twin long estuaries, one trending north-northwestward and the other northwestward; the former seems to depict a river coming from the northeast to meet it, although it may be an aberration of an adjacent artistic ornament. A small label, “mar vermejo”, appears on the eastern landmass at the head of the gulf. The entirety of the gulf trends northwest-southeast (contrast notes that appear with Cabot, 1544, *ITEM NO.* 25.377).

See also Armando Cortesão, “António Pereira and his map of circa 1545; an unknown Portuguese cartographer and the early representation of Newfoundland, Lower California, the Amazon, and the Ladrões”, *Geographical Review*, 29(2) (April 1939): 205-225 (see particularly “Gulf and Peninsula of California”, pp. 211-214). At that time the map was in the family archives of Gyles Isham in London. One of three parts (the other two are missing), the map is now in the John Carter Brown Library, Brown University, digitized online at <https://jcb.lunaimaging.com/luna/servlet/detail/JCBMAPS~1~1~1673~102490002:-Early-representation-of-Newfoundla> [*sic*], and cataloged there the same as is cited here, with date “[ca. 1546]”.

Petrini, Paolo

1700 25.1793

America Settentrionale Dedicata All'Eccell. Sig. Principe d'Auellino etc. (“Corretta, et aumentata, secondo le Relatio^{ne} più moderne, da N. Sanson d'Abbeuile Giofrafo di sua Maestà Christ^{ma} l'an. 1700. in Pariggi A spese di Palo Petrini, et da lui si vendono in Napoli a S. Biaggio de Librari.”) (“Antonius Donzel Gallus sculpsit.”) [*In Italian.*]

► “Isola di California” is separated from “Nvovo Messico” by “Mare Vermeio ò Mare Rosso”. Midway on the east side of the strait arrive “R. de Anguchi” from the north, and, independently into an embayment to the south, “R. de Tecon” from the north and “R. de Caral”. Tecon has two headwater forks in the area with the label “Rey Coromedo”.

MCLAUGHLIN 189

1718 25.1608

l'America Meridionale e Settentrionale Ordinata Secondo l'ultime relazione, e Secondo l'ultime scoperte; I punti pircipali della quale son messi sopra le osseruazioni de Sig^{ra} dell' Accademia Reale delle scienze in Parigi da Nicolo de Fer e data in luce da Paolo Petrini in Napoli l'anno 1718. cō priuil. di S. Cesarea e Cattolica Maesta. [*In Italian.*]

► “Isola di California” is separated from “Nvovo Messico ó Nova Granata”, “Marata”, and “Vecchio Messico” by “Mare Vermeilla”. On the east side of the strait three rivers arrive in proximity: 1) “deAquihi R.” (or “deAquihi R.”) from the north-

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

northeast; and into twin lobes of a single embayment, 2) "Tecon R." from the northeast, and 3) a shorter river (not labeled) from the northeast.

- 1722 25.1609 **l'America Meridionale e Settentrionale Ordinata Secondo l'ultime relazione, e Secondo l'ultime scoperte; I punti principali della quale son messi sopra le osseruazioni de Sig^{ri}dell' Accademia Reale delle scienze in Parigi descritta da Gvillavme De L'Isla e data in luce da Paolo Petrini in Napoli l'anno 1722. cō priuil. di S. Cesarea e Cattolica Maesta.** ("Giuseppe Pietrasanta Sculp.") [In Italian.]

► In the area of interest to this Cartobibliography, at least, this map is identical to Petrini (1718, [ITEM NO. 25.1608](#)): "Isola di California" is separated from "Nvovo Messico ó Nova Granata", "Marata", and "Vecchio Messico" by "Mare Vermeilla". On the east side of the strait three rivers arrive in proximity: 1) "deAqui R." (or "deAguihi R.") from the north-northeast; and into twin lobes of a single embayment, 2) "Tecon R." from the northeast, and 3) a shorter river (not labeled) from the northeast.

Petty, Francis

SHIRLEY 215

- 1598 25.437 **Typvs Orbis Terrarvm.** [Title in Latin; volume in Dutch.]
In: Beschryvinge vande overtreffelijcke ende wijdtvermaerde zee-vaerdt vanden edelen heer ende meester Thomas Candish, met drie schepen uytghevarenden 21 julij 1586 ende met een schip wederom ghekeert in Pleymouth, den 9 september 1588 : Hebbende (door't cruycen vander zee) gheseylt 13000 mylen : vertellende zyne vreemde wonderlijcke avonturen ende gheschiedenissen, de ontdekkinghe der landen by hem beseylt. Amstelredam: Cornelis Claesz.

► The frontispiece of this volume includes this map, which stylizes the continents. The Gulf of California is only a V-shaped embayment with a single tributary entering its head from the far north.

Pisani, Octauij [Pisani, Octavio]

SHIRLEY 344

- 1637 25.486 **Globvs terrestris proiectvs.** Antwerpie: Petrus Verbist. [In Latin.]
 Verbist's adaptation of Pisani's 1612 map (Octavy Pisani, [ITEM NO. 25.459](#)).
 ► An unusual south polar projection of the globe with the land masses drawn in mirror image from how they should appear. The (true) southwestern portion of "America Borealis" lies at the edge of the spherical projection. "Mare Vermeio" separates "California" from "Nova Hispania", and a single tributary system comes from "Tontontec Regnum" to the head of the gulf. In addition, there is a suggestion at the head of the gulf that a strait continues the gulf to the (true) northeast; however, the farther lands are not included.

Pisani, Octavy [Pisani, Octavio]

- 1590 25.417 **Orbis terrarvm typvs de integro mvltis in locis emendatvs auctore Petro Plancio. Beschrijvinghe der geheeler werelt, van nieus in velen plaetsen verbeteret door Petrum Plancium.** [Amsterdam]: [Laurens Jacobszoon]. [In Latin with title in Latin and Dutch.]

Shirley (p. 194) indicates the map appears in “Dutch bible”, but without further citation; also notes variant states and later printings.

► The North American continent is labeled “America Sive India Nova”, but the middle portion, including the Southwest, is more prominently labeled “Mexicana”. The Gulf of California is prominent, with the peninsula labeled “California”, and the gulf notably widens at its head and into which several tributary rivers flow. Numerous other labels are affixed in the region.

SHIRLEY 187

- 1594 25.422 **Orbis terrarvm typvs de integro multis in locis emendatus auctore Petro Plancio 1594.** (“Ioannes à Duete : cum iunior fecit.”) [Amsterdam.] [In Latin.]

This map seen in: *Histoire de la navigation de Iean Hvgves de Linschot Hollandois: Aux Index Orientales : Contenant diverses descriptions des lieux iusques à present descouverts par les Portugais: observations des costumes & singularitez de delà, & autres declarations. Avec annotations de B. Paludanus . . . Troixiesme edition augmentee.* Amsterdam: Chez Evert Colppenburgh, 1638.

► The North American continent is labeled “America”, but the middle portion, including the Southwest, is more prominently labeled “Mexicana”. The Gulf of California is prominent, with the peninsula labeled “California”, with the opposite mainland area labeled “Marata”. Six rivers (none labeled) are depicted arriving at the head of the gulf; in clockwise order, 1) a river from the northwest that bifurcates around an imposing island at its mouth; 2) a river from the northwest; 3) a river from the north that has two prominent forks, one from the north-northwest, along which is the place name “Axa”, the other from the northeast, along which is the place name “Chucho”, with their confluence not far from the mouth of the combined river and along which reach is the place name “Toconteac”; 4) a short river from the northeast that arrives independently at the same point as river no. 3; 5) a river from the east-northeast, along which are place names, “Granata” and “Ceuola”; 6) a river from the east. The greater area north adjacent to the head of the gulf is labeled “Totontec Re:”.

SHIRLEY 183

- 1592 25.419 **Nova et exacta terrarvm orbis, tabvla geographica ac hydrographica.** Antverpiae: apvi Joan nem Baptistam Vrient. [In Latin.]

Wall map of the world in 18 sheets.

► The North American continent is labeled “Mexicana”. “Mar Vermeio” is delineated with numerous place names and the peninsula is labeled “California”. Several well defined tributaries come to the head of the gulf. In the area of interest to this Cartobibliography, of note are the labels “Tonontac” and “Ceuola”. Numerous place names are indicated, but are not legible at the scale of reproduction in Shirley, who notes (p. 199), the map is known from “one tattered copy” in the “Colegio del Corpus Christi Valencia, and is not easily accessible to visitors.”

The Boston Public Library noted having received in 1927 13 sheets of “colotype facsimiles” of this “World map published in Amsterdam by Cornelis Claesz and in Antwerp by Johannes Baptista Vrient, 1592” (“A Selected List of Books Recently Added

to the Library”, *More Books* [Bulletin of the Boston Public Library], 3(6) (September 1928): 271).

Porcacchi, Thomaso

WHEAT I:17

1572 25.1125

Mondo Nvovo. [In Italian.]

In: L'Isola piv famose del del Mondo descritte da Thomaso Porcacchi da Castiglione Arretino e intagliate da Girolamo Porro Padovano al Sereniss. Principe et Sig.^{te} il S. Don Giovanni d'Avstria General della Santiss. Lega. Con Privilegio. Venetia: Approeßo Simon Galignarii & Girolamo Porro, 117 pp.

Later eds. with variant dedications on title-page and imprint. The 1572 and 1620 eds. have been seen for this Cartobibliography.

► This map (p. 101) shows North and Central America. It depicts at the head of the Gulf of California (not labeled) three rivers that converge to a single channel before entering the northeastern corner of the gulf. The western river is labeled both “R. Ara” and “Tigua f.”; they come from a region to the north and northwest labeled “Quiuira”; the eastern river comes from a region to the northeast labeled “Civola Hora Granata”. An area at the mouth of the combined rivers is labeled, on the eastern side, “Tontontecac”.

NOTE: Wheat (1957, Volume I, p. 26, note 11) remarks that this map is “almost an exact, although much reduced, copy of Zaltieri’s 1566 map” (see Forlani, 1566, ITEM NO. 25.569). Caribmap online (www.caribmap.org/porcacchi.php, accessed 1 June 2020) indicates that of the eight editions of this work (1572, 1576, 1590, 1604, 1605, 1620, 1686, 1713) “[l]ittle or no alterations were made in the copperplates of the first six editions . . . and therefore it is often difficult to determine the date of publication of the numerous separate maps in circulation.” Note is made also that “later editions of all copperplate prints appear more faded”. Caribmap distinguishes maps separated from these editions by their ornamental headpieces, which are illustrated on the website (the 1572, 1686, and 1713 editions have no headpieces). Of the 1572-1620 eds., Caribmap records that the map of the New World, *Mondo Nuovo*, appears on p. 101 in the 1572 ed. and on p. 161 in the others.

1620 25.1260

Mondo Nvovo. [In Italian.]

► This map includes “America sive India nova” that displays an exaggerated Baja peninsula with a narrow Gulf of California with tributaries. Labels are not legible at the scale of reproduction by Shirley.

Porte, Franc-Antoine de la

SHIRLEY 292

- 1616 25.466 **Jardinage de Facon Nouvelle.** Paris. [In French.]
 ► **BROADSIDE** with text, with illustration depicting a walled garden supposedly laid out in the form of a world map. The Gulf of California is portrayed even larger than the Gulf of Mexico, with two tributaries running to its head. No labeling other than for continents and oceans. (The text is not reproduced in Shirley.)

Pownall (Gover^t) [Pownall (Governor)] [**Pownall, Thomas**] ⁴⁵

- 1777 25.1470 **A New Map of the Whole Continent of America, Divided Into North and South and West Indies. with a Descriptive Account of the European Possessions, as Settled by the Definitive Treaty of Peace, Concluded at Paris, Feb^y 10th 1763. Compiled from M^r. d’Anville’s maps of that Continent, and Corrected in the Several Parts belonging to Great Britain, from the Original Materials of Governor Pownall, MP. London, Printed for Rob^t Sayer and John Bennett, N^o 53, Fleet Street, as the Act directs. 15th Feb^y 1777.**
 ► The peninsula, “California”, is separated from “New Navarre” by “Californian Gulf or Mar Vermejo”. “Rio Colorado de los Martyres” is drawn very generally from headwaters in an area labeled “Teguayo Grande” on a generally straight course to the head of the gulf. Along the way it receives a tributary (not labeled) from the northeast. “Rio Grande Azul or Blue R” is a tributary to the Colorado, with “R. Hila” a tributary to it farther to the east. A faintly drawn river follows an independent course parallel to and east of the Colorado, between a point south of the confluence of the “Rio Grande Azul” and the gulf.
- 1777 25.1897 **A New and Correct Map of North America, with the West India Islands. Divided according to the last Treaty of Peace, Conducted at Paris, 10th Feb^y 1763. wherein are particularly Distinguished the Several Provinces and Colonies, which Compose the British Empire, Laid down according to the Latest Surveys, and Corrected from the Original Materials, of Gover^t Pownall, Mem^{br} of Parliam^{nt} 1777. (At lower right of sheet: “London. Printed for Rob^t Sayer and Jⁿo Bennett, N^o 53. Fleet Street. as the Act directs 25th Feb^y 1777.”)**
 ► “California” is separated from “New Navarr” [*sic*] by “Californian Gulf”, but the head of the gulf passes off the map. “R. Colorado de los Martyres” is shown flowing to the southwest before passing off the map, coming from bifurcated headwaters beyond which to the northeast is labeled “Tegueo Grande or Teguas Nation”. “R. Grande de los Apostolos or del Coral” [Gila River] is shown flowing westward before passing off the map; several headwaters are labeled “R. de Buena Esperanza”, “R. Azul or Blue R.”, and “R. de Hila or Sonaca”.
 An **INSET** map, however, replicates Kino’s map of this region (originally in 1705), with the title here as **The Passage by Land to California. Discover’d by Father**

⁴⁵ The maps here all are noted to have been “Corrected from the Original Materials, of Governor Pownall, Member of Parliament”, which contributed to numerous maps under various imprints not all of which are creators of the edition but may be only map sellers. These maps are consolidated under Pownall in order to retain their provenance and to credit the intellectual source.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

Eusebius Francis Kino a Jesuit, between the Years 1698 and 1701, before which, and for a Considerable Time Since California has always been described in all Charts & Maps as an Island.

- WHEAT I:196 [with date 1783]
- 1786 25.1202 **A New Map of North America, with the West India Islands. Divided according to the Preliminary Articles of Peace, Signed at Versailles, 20, Jan. 1783, wherein are particularly Distinguished the United States, and the Several Provinces, Governments &ca which Compose the British Dominions, Laid down according to the Latest Surveys, and Corrected from the Original Materials, of Gover^r. Pownall, Mem^{br} of Parlia^{mt}: 1783.** (At lower right of sheet: "London. Printed for Rob^t Sayer, Map, Chart & Printseller, No. 53 Fleet Street, as the Act directs August 15th 1786.")
- Compare also the imprint for Pownall (1786, **ITEM NO.** 25.1203); Wheat makes no reference to the 1786 date on this sheet.)
- ▶ "California" is separated from "New Navarr" [*sic*] by "Mar Vermejo or Californian Gulf", but the head of the gulf passes off the map. "R. Colorado de los Martyres" is shown flowing to the southwest before passing off the map, coming from bifurcated headwaters beyond which to the northeast is labeled "Tegueo Grande or Teguas Nation". Discover'd by Father Eusebius Francis Kino a Jesuit, between the Years 1698 and 1701, before which, and for a Considerable Time Since California has always been described in all Charts & Maps as an Island.**)

- 1794 25.2083 **A New Map of the Whole Continent of America, divided into North and South and West Indies. wherein are exactly Described the United States of North America as well as the Several European Possessions, according to the Preliminaries of Peace signed at Versailles Jan. 20 1783. Compiled from M'd'Anville's Maps of that Continent, with the addition of the Spanish Discoveries in 1775 to the North of California & Corrected in the several Parts belonging to Great Britain. from the Original Materials of Governor Pownall, MP. London. Published by Laurie & Whittle, N^o 53, Fleet Street. as the Act directs, 12th May 1794.**
- ▶ "California" and "New Navarre" are separated by "Mar Vermejo". "Rio Colorado de los Martyres" is drawn very generally from headwaters in an area labeled "Teguayo Grande" on a generally straight course to the head of the gulf. Along the way it receives a tributary (not labeled) from the northeast. "Rio Grande Azul or Blue R" is a tributary to the Colorado, with "R. Hila" a tributary to it farther to the east. A faintly drawn river follows an independent course parallel to and east of the Colorado, between a point south of the confluence of the "Rio Grande Azul" and the gulf.

Price, C. [Price, Charles]

- 1714 25.1415 **A New and Correct Map of the World Projected Upon the Plane of the Horizon laid down from the Newest Discoveries and most Exact Observations By C. Price Sold by G. Willdey at the Great Toy Shop next the Dog Tavern in Ludgate Street where may be had several of the Maps of this Size 1714.** ("H: Fergason, delin, et Sculp, London.")
- The bottom of the map inserts numerous engravings of various objects (*e.g.*, a clock, pistol, snuff box, chess board, scissors, globe), with the legend, "These and many other usefull Instruments and Curiositys are made to the Utmost Perfection and Sold wholesale or Retaile by George Willdey at the place above mentioned."
- ▶ Map based on polar projections of the two hemispheres. "California" is an island, separated from "New Mexico" by "Gulf of California". Midway along the eastern side of the gulf is a single river (not labeled) arriving from the southeast to an embayment of the gulf; to the north of it is noted the land of "Moquis", and to the south "Pimeria or Country of Pimas" and "Sonora".

Probst, Ioh. Mich. [Probst, Johann Michael]

MCLAUGHLIN 242

- NO DATE 25.1828 **America. verlegt von Ioh:Mich:Probst. in Augsburg. [In Latin, with title in German.]**
In: Atlas minor ex tabulis geographicis. [1784?]
- ▶ The island, "California" (also labeled "Nova Albion" at its northern end), is separated from "Nova Granada" by "Mare Vermeo". Midway on the east side of the strait is a single, prominent, cone-shaped east-west embayment into which a river (not labeled) with two headwater forks arrives from the southeast.
- McLaughlin indicates that this is a re-engraving of Schreibern (no date [1749], **ITEM NO.** 25.1827).

Ptolemy ⁴⁶**Quadum, Mathium [Quad, Matthias] [Quadas, Matthias] [Qvaden, Matthis]**

SHIRLEY 197

1596 25.429

Typvs Orbis Terrarvm, ad Imitationem Vniversalis Gerhardi Mercatoris. [In Latin.]

In: Europae totius terrarum orbis partis praestantissimae generalis ac particularis descriptio, tabulis novem et sexaginta expressa . . . Coloniae: Typis L. Andreae, laminis vero ac sumptibus I. Bussemachers, 66 [67] double leaves.

► The Gulf of California is exceedingly narrow, into the head of which arrives a single river with tributaries, one significant tributary from the east, and a tributary from the northwest with two forks in in an area labeled "Tolm regnũ". Alongside its course is the label "Axa Tonceac". North of the label, "Tolm regnũ", the entire northwestern part of North America is occluded by an ornamental cartouche of "Iesvs Christvs".

Winship (1896, Plate 54, **ITEM NO.** 2.6973 in Volume 1/Part B of **THE GRAND CANON**) reproduces "after Nordenskiöld" a copy of this map credited to 1608, which

⁴⁶ *The Geography, or Geographia, of Ptolemy is the geographical work, ca. 150 C.E., by Klaúdios Ptolemaíos (Κλαύδιος Πτολεμαίος) of the 2nd century. Of course, Ptolemy himself is not the author the editions mentioned in this bibliography, inasmuch that the scribes who preserved his writings moved his manuscript *Geography* forward through the centuries in ever-changing and enlarged formats, employing Ptolemy's cartographical methods and descriptions, until he became the *de facto* authority on geography for centuries, even eventually in print, after which the results of explorations devolved his work toward ever more modern and "corrected" perspectives; the most notable of which was the inclusion of the New World. Such a progression of authority is analogous to the celebrated *Webster's Dictionary*. **In this Cartobibliography, the producers of various editions of Ptolemy's *Geography* are credited, rather than "Ptolemy";** for example, the engraver Gastaldi, or to Rosaccio, an author who brought it more to date although based on the Ptolemaian system.*

The Geography survives from manuscript copies dating to at least the 10th century and was a focus of scholarly Renaissance Europe, when the author was known in Latin translation as Claudius Ptolemaeus. The Byzantine monk Maximus Planudes was the first, after 1295, to create maps based on a copy of Ptolemy's re-written text. For a well-annotated bibliography of the early editions of Ptolemy's *Geography*, see the compilation by [Wilberforce Eames], *A List of Editions of Ptolemy's Geography, 1475–1730* (New York, no imprint, 1886, 45 pp.). Only 50 copies of Eames' work were printed (but today readable in digital form online), yet nonetheless it was the contemporary bibliographical reference at the time when the great early historians of the American West and Southwest were working. The forty editions of Ptolemy cited there testify to the profusely repeated attention to this ancient work during even the first two and a half centuries after the invention of modern printing. Readers may wish to also refer to the lengthy discussions and itemizations in A. E. Nordenskiöld, *Facsimile-atlas of the early history of cartography with reproductions of the most important maps printed in the XV and XVI centuries. Translated from the Swedish original by Johan Adolf Eklöf, Roy. Swed. Navy and Clements R. Markham, C.B., F.R.S.* (Printed by P. A. Norstedt & Söner, Stockholm, 1889), 141 pp., 51 plates. [coverage to 1550, actually]. Also a facsimile reprint 1961, 1970, Kraus Reprint Corp., New York. Also a facsimile reprint, with new introduction by J. B. Post (Dover Publications, Inc., New York, 1973; "unabridged and corrected republication" of the 1889 English ed.). Therein see "Catalogue of editions of Ptolemy's geography" (pp. 12-29) (59 editions cited, 1472-1883, which excludes 26 works "erroneously enumerated among editions of Ptolemy's geography" (1512-1715). Original Swedish edition of Nordenskiöld: *Facsimile-Atlas till kartografiens äldsta historia innehållande afbildningar af de rigtigaste kartor tryckta före år 1600* (Printed by P. A. Norstedt & Söner, Stockholm, 1889).

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

at least in the area of interest to this Cartobibliography is identical. This map also appears in Quad (1600).

- 1600 25.2475 **Typvs Orbis Terrarvm, ad Imitationem Vniuersalis Gerhardi Mercatoris.** ("Colonizæ laminis Iani buxemechers.") [In Latin; volume in German.]
In: Geographisch Handtbuch. In welchem die gelegenheit der vornembsten Lantschafften des gantzen Erdtbodems in zwejvnd achtzig in kupffer geschnittenen Taffeln furgebildt. Mit beygefügter notwendiger Beschreibung vnd auslegung derselben: also das jedes Landes art, natur, gelegenheit, sitten, völker, fruchtbarkeit, handtirung, sampt andere zu wissen nutzliche sachen, schriftlich vnd augenscheinlich nach notturfft daraus mögen erlernet werden. Zugericht durch Matthis Qvaden Kupfferschneider. Coln am Rein: Bey Iohan Buxemacher Kunstdrucker vff'S. Maximuni Strass daselbst. MDC.
 ► The overly broad peninsula of California (not labeled) is separated from the mainland (where nearby is the label "Granata") by an exceedingly narrow gulf; in fact, its width is barely distinguishable from the width of the river that reaches it head from the northwest. The upper portion of the peninsula and hence part of the mainland has the label "Axa Tonteach" running parallel to the river and its northwest tributary. Three tributaries converge at the head of the narrow river/gulf; one from the northwest and one from the northeast (these two come from an area with the label "Tolm regnñ"); and a third, longer tributary from the east that can be attributed as the Gila river. None of the river features are labeled.
- 1600 25.2068 **Novi Orbis Pars Borealis, America Scilicet, Complectens Floridam, Baccalaon, Canadam, Terram Corterialeam, Virginiam, Norombecam, pluresque alias prouincias.** ("Colonizæ laminis Iani buxemechers.") [In Latin; volume in German.]
In: Geographisch Handtbuch. In welchem die gelegenheit der vornembsten Lantschafften des gantzen Erdtbodems in zwejvnd achtzig in kupffer geschnittenen Taffeln furgebildt. R

Ram, Ioannem de [Ram, Joannem de]

- NO DATE 25.1599 **Novissima et Accuratissima Totius Americæ per Ioannem de Ram.** (“Cum privilegio ordinum Hollandiæ et Westfrisæ.”) [Ca. 1685.] [In Latin.]
 ► The island, “California”, is separated from “Nova Granada” by a strait (not labeled). Midway on the eastern side of the strait are three rivers (not labeled) that enter two embayments from the north. The central, principal river has two forks, the western one of which passes by a place marked “Rey Coromedo”.

Ramusio, Giovanni Battista

WHEAT I:9 [with illustration facing p. 13]

- 1556 25.762 **Universale della parte del mundo nuovamente ritrovata** [America, with “La Nova Spagna”]. [In Italian.]
In: Terzo volvme delle navigationi et viaggi : nel qvale si contengono le nauigationi al Mondo Nuouo, alli antichi incognito, fatte da don Christoforo Colombo Genouese, che fu il primo à scoprirlo à Re Catholici, detto hora le Indie occidentali, con gli acquisti fatti da lui, et accresciuti poi da Fernando Cortese, da Francesco Pizzarro, & altri valorosi capitani, in diuerse parti delle dette Indie, in nome dela Ces. Maes. Con lo scoprire la gran città di Temistitan nel Mexico, doue hora è detto la Nvova Spagna, et la gran Prouincia del Perù, il grandissimo fiume Maragnon, et altre città, regni, & prouincie. La nauigationi fatte dipoi alle dette Indie, poste nella parte verso Maestro Tramontana, dette hora la Nvova Francia, scoperte al Re Christianiss, la prima volta da Bertoni & Normandi, et dipoi da Giouanni da Verrazzano Fiorentino, & dal Capitano Iacques Cartier. Si come dimostrano le diuerse relationi, tradotte di lingua Spagnuola & Francese nella nostra, & raccolte in questo volume. con tauole di geographia, che dimostrano il sito di siuerse isole, città, & paesi. Et figure diuerse di piante, & altre cose à noi incognite. Et con l’indice copiosissimo di tutte le cose piu notabili in esso contenute. Con Priuilegio del Sommo Pontefice, & dello Illustriſſ. Senato Veneto. Venetia: Stamperia de Givnti, 453 leaves. [Leaves rather than pages are enumerated.]
 Pertinent sections by collected writers are cited separately in [THE GRAND CANON](#) Volume 1/Part B; see: Alarcón (1556, [ITEM NO. 2.1029](#)), Ulloa (1556, [ITEM NO. 2.6438](#)), Vazquez de Coronado (1556, [ITEM NO. 2.2125](#)).
 ► The map depicts a waterway extending northwestward from the head of the Gulf of California. (See Gastaldi, no date [1565?], [ITEM NO. 25.1475](#).)
- 1606 25.248 **Universale della parte del Mondo Nuovamente Ritrovata.** Venice: Ramusio. [In Italian.]
 ► The map, first published in 1556, roughly depicts the Gulf of California and, among other locales, “Cibola”.

Reid, John [see also Smith, Reid, and Wayland (firm)]

WHEAT I:233

- 1795 25.1345 **A General Map of North America Drawn from the Best Surveys 1795.** (“Scoles, sc”.) (“Published by John Reid N. York.”)
 This is the same map as that published by Smith, Reid, and Wayland (1795, [ITEM NO. 25.1344](#)).

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► The peninsula of “California” is separated from “Navarre” by “Gulf of California”. The head of the gulf receives two rivers that flow closely in parallel from the north-northeast; their point of bifurcation is where a single river from the east turns abruptly southward; this river is labeled on one of its headwater streams “R. Hila”. The Colorado is not depicted; the area in which it should be shown is mostly blank, save for two mountain ranges and three place names, “Quivira”, “Axaas” [*sic*], and “Bagopas”.

Reilly, Franz Joh. Jos. von [Reilly, Franz Johann Joseph von]

- 1795 25.1464 **Karte von Amerika Nach D’Anville und Pownall Neu verzeichnet herausgegeben von Franz Joh. Jos. von Reilly.** (“Zu finden im von Reilly’schen Landkarten und Kunstwerke Verschleiss Komptoir. Wien 1795.”) (“Gastochen von Kil. Ponheimer.”) [*In German.*]
- The peninsula “Theil von Kalifornien”, is separated from “Neu Navarra” by “Meer Vermejo oder Der Kalifornische”. In the fashion by which the rivers were engraved, it is impossible to determine whether “Colorado Fl.” and a tributary (not labeled; Gila River) arrive coincidentally at the head of the gulf, or if they meet and immediately bifurcate, and arrive separately at the head of the gulf.

Ricci, Matteo *refer also to* Sekisui

WHEAT I:30

- NO DATE 25.1043 **坤輿萬國全圖 [Kunyu Wanguo Quantu]** [*A map of the myriad countries of the world or Great universal geographic map.*] [Peking]: [*for the Wanli Emperor (萬曆帝) (Zhu Yijun, 朱翊鈞)*], woodblock prints in 6 panels. [1602.] [*In Chinese.*]

Data conveyed in this citation are constructed from the LOC record, examination of the LOC copy, and other sources.

This is the third edition of Ricci’s effort, recompiled from Western sources, produced with Zhong Wentao and Li Zhizao. The map measures approximately 6 × 12 feet. See this map online at the Library of Congress, <https://www.loc.gov/item/2010585650> (accessed 17 March 2020). LOC catalog record includes exhibition note: “Rare 1602 World Map, the First Map in Chinese to Show the Americas, Library of Congress, Washington, D.C., Jan. 12 to April 17, 2010.”

► In the region of interest to this Cartobibliography, on panel “二幅” [èr fú] [scroll 2] — properly reading the six enumerated rolls or panels from right to left, which is panel “e” in the Library of Congress catalog record that lists the panels from left to right — there are three rivers tributary to the head of the Gulf of California, between two of which is the label “多朶德亞河” (undeciphered here but indicates a “river”).

Wheat (1957, Volume I, p. 191) lists this map only as (including square brackets), “[Map of the World, woodcut, done in China about 1600.]”. Wheat there also reports “[a]n 1821 hand-painted copy from Japan now in the author’s collection”

NOTES: For more on this edition, see *Il mappamondo Cinese del p. Matteo Ricci S. I. : terza edizione Pechino 1602, conservato presso la Biblioteca Vaticana. Commentato, tradotto e annotato dal p. Pasquale M. d’Elia S. I.* (Città del Vaticano: Biblioteca Apostolica Vaticana, 1938), xxvi, 273, [2] pp., 30 plates [in Italian]. See also, for example, J. F. Baddeley, “Matteo Ricci’s Chinese World-Maps, 1584-1608, *The Geographical Journal* (London), Vol. 50, no. 4 (October, 1917), pp. 254-270, with fold-out between pp. 256/257, “The World Map by Father Matteo Ricci in the Collection of the Royal Geographical Society”.

WHEAT I:33 [with illustration facing p. 36; Wheat dates as 1601]

- NO DATE 25.661 **山海輿地全圖 [Sankai yochi zenzu.]** [Tokyo]: [Yamazaki Kimbei], woodblock print, hand-colored. [1735?] [*In Japanese.*]

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

A copy of Ricci (no date [1602], **ITEM NO.** 25.1043). Title cited here is from Library of Congress; title in Chinese orthography (from map) translates as **Map of Mountains Seas and Geography**. LOC catalogs this map with the transliteration *Sankai yochi zenzu*, attributed to Akitaya Taemon Naniwa, [1785?], with contributor Sekisui Nagakubo.

The title given by Wheat (Volume 1, p. 192), only in transliteration, is *Saikai kochi zenzu*. Wheat notes, "This 'Complete topographical map of the land and sea' was published in Tokyo by Yamazaki Kimbei rather early, but bears no date. It was based on a Chinese original printed in 1601, doubtless drawn by one of the Jesuit missionaries then active in China, probably Father Matteo Ricci or one of his associates." Wheat does not ascribe a date to this map but includes it in his work under "1601". (Other sources referred to for the present bibliography attribute the original map to Ricci in 1602.) Although Wheat's illustration (from his own copy of this map) is cropped to display only the upper-right portion that shows North America, it is identical to the copy shown by the Library of Congress (<https://www.loc.gov/item/gm71005079/>, accessed 17 March 2020).

► This map is simpler than the 1602 version, with some modification to the labels of geographical features. In the region of interest to this Cartobibliography, it differs from the 1602 version in that there are four rivers tributary to the head of the Gulf of California; each with headwater forks (in the 1602 version none of the streams are shown with headwaters). The two middle streams seem to be drawn as more principal streams than the other two, the western one with the label, "多朵德西河" (undeciphered here but indicates a "river"; note the slight variation from the label on the Chinese original).

Robert de Vaugondy, Didier

1777 25.628

MCLAUGHLIN 241 [1770] WHEAT I:160 [as "1772 Vaugondy"]

Carte de la Californie suivant I la Carte manuscrite de l'Amérique de Mathieu Néron Peccien dressée à Florence en 1604. II Sanson 1656. III De l'Isle Amérique Sept 1700. IV le Pere Kino Jesuite en 1705. V La Société des Jésuites en 1767. La Côte orientale depuis le C. des Vierges jusqu'à l'embouchure du R. Colorado est extraite de la Carte de P. Ferdinand Goneague dressée en 1746. [In French.]

In: Suite du recueil de planches, sur les sciences, les arts libéraux, et les arts mécaniques, avec leur explication. Deux cens quarante-quatre planches. Paris: Chez Panckoucke, Chez Stoupe, Chez Brunet; and Amsterdam: Chez M. M. Rey [*which concludes*: Diderot, Denis, and d'Alembert, Jean Le Rond (1770 and following), *Encyclopédie, ou dictionnaire raisonné des sciences, des arts et des métier* (Paris)].

► Entire chart is "Suppl. 5^e Carte" (upper-right corner), "164." (lower-right corner). This chart comprises a comparative set of five earlier maps, each of which portrays the entirety or most of what is Baja California and the entirety or most of what is the Gulf of California. Each map shows the Colorado River under various names and with other confluent streams. Map II displays California as an island.

In the volume's contents page (p. 19) this entire chart is listed as "**V. Autres cartes diverses de la Californie.**" See also "Avertissement" (following the volume's title-page), which notes that the plates therein complement the encyclopedia. The date "1767" on the legend for map V on this chart is an error for 1757; it copies Consag (1757, **ITEM NO.** 25.768).

Chart not signed but all attributions seen credit Didier Robert de Vaugondy. Date for volume sometimes given as 1770, which is derived from the first volume of the encyclopedia.

NOTE: Chart also seen in **variants: 1)** omitting the supplement number at upper-right, with "187=188" at lower-left and "R.S" (Robert Sieur?) at lower right; **2)** with only "Suppl. 5^e Carte" at upper-right corner.

Robert de Vaugondy (fils) [son of Robert de Vaugondy (*i.e.*, of Gilles (Le Sieur) Robert de Vaugondy)] [**Robert de Vaugondy, Didier**]

see also Vaugondy (M. de)

WHEAT I:129 [with illustration facing p. 140,

but is cropped and does not display the title; Wheat includes date as 1750]

NO DATE 25.668 **Amérique Septentrionale dressée sur les relations les plus modernes des voyageurs et navigateurs, ou se remarquent Les Etats Unis. Publiée en 1750 et corrigée par S^r Robert de Vaugondy Géographe.** [No imprint.] [In French.]

A revision including the United States and an inset at upper-left portraying northwestern North America, which previously had been labeled “Terres Inconnues” and where the title had previously been placed.

Title from Wheat 129. Wheat notes: “The copy of this map in the writer’s collection is one of the later re-issues of Vaugondy’s 1750 map [ITEM NO. 25.665], the curious insert of the West being retained, although the United States has been added.” Thus, Wheat’s copy post-dates 1776.

NO DATE 25.669 **Amérique Septentrionale dressée sur les relations les plus modernes des voyageurs et navigateurs, ou se remarquent. les Etats Unis. Par le S. Robert de Vaugondy, Géographe.** [No imprint.] [In French.]

Title as displayed on map, but a date of 1793 is attributed by an online sale.

A revision including the United States and an inset at upper-left portraying northwestern North America, which previously had been labeled “Terres Inconnues” and where the title had previously been placed. The details pertaining to the Colorado River are the same as for the 1750 ed. (ITEM NO. 25.665).

► “Rio Colorado” enters the head of “Mer Vermeille ou de Californie”, flowing in a mostly direct line from the north-northeast. From the confluence of the Colorado and the “R. Grande de los Apostolos” (Gila River) to the sea is a peculiar double channel.

1750 25.665 **Amérique Septentrionale, dressée, sur les relations les plus modernes des voyageurs et navigateurs, et divisée suivant les différentes possessions des Européens. Par le S^r Robert de Vaugondy, fils de M^r Robert Géographe ordin. du Roy. Avec privilege. 1750.** [No imprint.] [In French.]

► “Rio Colorado” enters the head of “Mer Vermeille ou de Californie”, flowing in a mostly direct line from the north-northeast. From the confluence of the Colorado and the “R. Grande de los Apostolos” (Gila River) to the sea is a peculiar double channel.

1775 25.666 **Amérique Septentrionale dressée, sur les relations les plus modernes des voyageurs et navigateurs, et divisée suivant les différentes possessions des Européens. Publiée en 1750 et corrigée en 1775, par le S. Robert de Vaugondy Géog. ord. du Roi et du feu Roide Pologne Duc le Lorr? et de Bar, de la Societé [sic] royale de Nanci et Censeur royal.** [No imprint.] [In French.]

► A revision with an inset at upper-left portraying northwestern North America, which previously had been labeled “Terres Inconnues” and where the title had previously been placed. The details pertaining to the Colorado River are the same as for the 1750 ed. (ITEM NO. 25.665). “Rio Colorado” enters the head of “Mer Vermeille ou de Californie”, flowing in a mostly direct line from the north-northeast. From the confluence of the Colorado and the “R. Grande de los Apostolos” (Gila River) to the sea is a peculiar double channel.

1783 25.667 **Amérique Septentrionale dressée, sur les relations les plus modernes des voyageurs et navigateurs, ou se remarquent. les Etats Unis. Publiée en 1750 et corrigée en 1783, par le S. Robert de Vaugondy Géographe.** [No imprint.] [In French.]

► A revision including the United States and an inset at upper-left portraying northwestern North America, which previously had been labeled “Terres Inconnues”

and where the title had previously been placed. The details pertaining to the Colorado River are the same as for the 1750 ed. (ITEM NO. 25.665). "Rio Colorado" enters the head of "Mer Vermeille ou de Californie", flowing in a mostly direct line from the north-northeast. From the confluence of the Colorado and the "R. Grande de los Apostolos" (Gila River) to the sea is a peculiar double channel.

Robert (Sieur) [Robert de Vaugondy, Gilles] ⁴⁷

1766 25.1456 **An Accurate Map of North America Drawn from the Sieur Robert, with Improvements.** ("G. Rollos sculp.") *In*: Brookes, R., *The general gazetteer: or, compendious geographical dictionary*. London: Printed for J. Newberry, R. Baldwin, W. Johnston, S. Crowder, B. Law, J. Koote, Becket and De Hondy, and B. Collins, 2nd ed.

▶ The entire northwestern part of North America is not drawn and is labeled "Parts Unknown". The peninsula, "California", is separated from "New Navarre" by "Vermillion Sea". "R. Colorado" heads in the northern part of a widened California where it is labeled "New Albion" and follows a southwesterly course to the head of the gulf, receiving shortly before its mouth "R. Grande" (Gila River) from the east. Downstream from that confluence the river bifurcates and the channels arrive independently at the head of the gulf.

Robert de Vaugondy (S.) [Robert de Vaugondy (Sieur)] [**Robert de Vaugondy, Gilles**]

NO DATE 25.1700 **Par^{tie} du Mexique où de la Nouv.^{le} Espagne ou se trouve l'Aud^{ce} de Guadalajara, Nouveau Mexique, Nouvelle Navarre, Californie &c. Par le S^r Robert de Vaugondy Fils de M^r Robert Géog du Roi A. Pr. 1749.** [*sic*]. [*In French.*]

In: *Atlas Portatif*. [1769?] ("187.")

▶ "Californie" is separated from "Nouvelle Navarre" by "Mer Vermeille ou de Californie". The head of the gulf narrows markedly to the northwest, where it receives "R. Colorado" from the northeast. Below the confluence of "R. Grande de los Aspotolos" [*sic*] (Gila River), the Colorado bifurcates and seems to arrive on courses that converge at the gulf. The Colorado's upstream end is off the map, in "Nouveau Mexique".

NO DATE 25.1447 **l'Amérique Septentrionale et Méridionale divisée suivant ses Différens Pays. Par le S^r Robert de Vaugondy Géographe. Se trouve A Paris Chez le Cit? Delamarche Géographe. Rue du Foin S^r Jacques au Collège [*sic*] de M^{tr}? Gervais.** [Typographical use of "?" thus.] ("Arrivet inv. & Sculp.") [1780s.] [*In French.*]

▶ This map omits most of the northwestern part of North America. The entire area that is today the western United States is blank except for the label, "l'on place ici les Provinces de Quivira et Teguaio". The peninsula, "Californie", is separated from "Nouvelle Navarre" by "Mer Vermeille ou de Californie". At the northwestern head of the gulf, "R. Colorado" arrives from the northeast. A short distance before the mouth at "S. Dionisio" it receives "R. Grande de los Apostolos" (Gila River) from the east. Just downstream from this confluence, the river bifurcates; the two channels arrive independently at the head of the gulf.

1762 25.1466 **Canada, Louisiane, Possessions Angl? Par le S. Robert de Vaugondy Géog? ord? du Roi, de S. M. Polonoise Duc de Lorr? et de Bar, et de la Société royale de Nanci. Avec Privilège**

⁴⁷ It has not been practical to follow through on many replicated editions of maps. It shall be sufficient to mention here the compound of editions based on inherited plates and creative editions of the genealogical and cartographical business lineage of Gerard Mercator, Rumold Mercator, Jodocus Hondius, Hendrik Hondius, and Jan Jansson, superseded in force by the family of Joan, Cornelius, and Willem Blaeu. Another familial group among cartographers cited herein are the Sansons—Nicolas Sanson d'Abbeville and his grandson, Pierre Moullart-Sanson, who was the uncle of Gilles Robert de Vaugondy. Users will find some of their works cited herein, but the listings of course are not comprehensive.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

1762. [The typographical use of “?” thus.] (“A Paris chés l’Auteur Quai de l’Horloge près le Pont neuf.”) (“Arrivet inv. & Sculp.”) (“Gravé par E. Dussy.”) [In French.]

► An **INSET** map depicts the northwestern part of North America. The peninsula, “Californie”, is separated from “Nouveau Mexique” by the Gulf of California (not labeled). The head of the northwest-trending gulf twists to the east, where it receives two converging rivers (not labeled); one directly from the northeast, the other, a larger stream with several tributaries, from the east (along which is noted “Casagrande”, thus this is the Gila River.) The inset map carries the legend, “Les Terres pointillées dans ce Supplément sont les Découvertes attribuées à un Amiral Espagnol nommé, De Fonte ou De Fuente. Nous les avons tracées d’après la Carte de M. Joseph Delisle publiée en 1753. sans cependant les adopter, à moins que dans la suite elles ne devieñent authentiques.”

- 1778 25.1430 **Mappe Monde ou Carte Générale du Globe Terrestre dessiné [sic] les regles de la Projection des Cartes réduites. Par le S. Robert de Vaugondy Géographe ordinaire du Roi, de S. M. Polonoise Duc de Lorraine et de Bar, et de l’Academie royale des Sciences et Belles lettres de Nancy, et Censeur royal. a Paris Chez Fortin Ing^r Mécanicien du Roy pour les Globes et Sphères Rue de la Harpe près la rue du Foin 1778.** [The typographical use of “?” thus.] (“Gravé par E. Dussy.”) (“Arrivet inv & Sculp.”) [In French.]
- The peninsula, “Californie”, is separated from “N.^{lle} Navarre” by “Mer Vermeille”. A river (not labeled) arrives at the northwestern extent of the gulf from the northeast and east, comprising a large drainage basin. Downstream from the final confluence the river bifurcates before rejoining at the head of the gulf.
- 1778 25.1431 **Canada, Louisiane, Possessions Angl^{es} Par le S. Robert de Vaugondy Géog^{ord} du Roi, de S. M. Polonoise Duc de Lorr^{et} de Bar, et de la Société royale de Nanci. 1778.** [The typographical use of “?” thus.] (“Arrivet inv. & Sculp.”) (“Gravé par E. Dussy.”) [In French.]
- An **INSET** map depicts the northwestern part of North America. The peninsula, “Californie”, is separated from “Nouveau Mexique” by the Gulf of California (not labeled). The head of the northwest-trending gulf twists to the east, where it receives two converging rivers (not labeled); one directly from the northeast, the other, a larger stream with several tributaries, from the east (along which is noted “Casagrande”, thus this is the Gila River.) The inset map carries the legend, “Les Terres pointillées dans ce Supplément sont les Découvertes attribuées à un Amiral Espagnol nommé, De Fonte ou De Fuente. Nous les avons tracées d’après la Carte de M. Joseph Delisle publiée en 1753. sans cependant les adopter, à moins que dans la suite elles ne devieñent authentiques.”

Roberts, Henry

- 1784 25.1651 **A General Chart: Exhibiting the Discoveries made by Captⁿ James Cook in this and his two preceeding Voyages; with the Tracks of the Ships under his Command By Lieut^t Hen^r Roberts of His Majesty’s Royal Navy.** (“W. Palmer sculp.”)
- The peninsula of “California” is separated from “New Mexico” by “Gulf of California”. The northern end of the gulf tapers northward, where it seamlessly receives “Colorado R.” from the north. The Colorado is shown a bit peculiarly, with a noticeable northeast-southwest channel that turning southward just before meeting the gulf; the southwest course is continuous to a point not far north of the confluence of “Gila R”, beyond which it is depicted only as a short, faint line from the east-northeast. The Gila is depicted as a tributary with several headwater forks, from the east-southeast. (The headwaters of the Gila nearly meet the main channel of “Rio Norte” [Rio Grande] that descends south-southeastward from “St^o Fee” before turning southeast to the “Gulf of Mexico”.) No other geographical labels are placed in this immediate area.

NOTE: As noticed by cartographical historians, this map is the first to depict North America both in an essentially correct shape and an approximately correct breadth of longitude. Variants are noted.

Rocque, John

NO DATE 25.536

**A General Map of North America; In which is Express'd The several New Roads, Forts, Engagements, &c. taken from Actual Surveys and Observations Made in the Army employ'd there, From the years 1754, to 1761: Drawn by the late John Rocque, Topographer to His Majesty. **

Cartes Generales de L'Amerique Septentrionale; En les quelles font exprimès Les Nouvelles Routes, Forts, Batailles, &c. d'après les Observations qui ou etè faites depuis l'An 1754, jusqu'a l'An 1761; Recueillies par seu Jean Rocque, Topographe de Sa Majesté Britannique, &c. ("Publish'd Acording [*sic*] to the Act, by M. A Rocque in the Strand & A. Dury in Dukes Court S^t. Martins Lane.") [1762?] [Title in English and French; texts on map in English.]

► By the title, details focus more on the eastern portion of the continent. In the region covered by this Cartobibliography is depicted the "R. Colorado de los Martyres" and "R. des Apostres" [Gila River], below the confluence of which, notably, the river flows into a lake cut off from the head of "The Sea of California", although next to it is the label, "Isle de la Presentation" [most maps that use the label use the Spanish "Presentacion"], which is found on other maps identifying a bifurcated stretch of the Colorado between the Gila confluence and the gulf; thus, perhaps the depiction by hachures of a lake is erroneous, and a connecting stream between it and the gulf is accidentally omitted.

Rosaccio, Giuseppe [Rosaccio, Giuseppe] [Rosaccio, Gioseffo]

NO DATE 25.1502

Vniversale Descrittione di Tvtto il Mondo di Giuseppe Rosaccio Cosmographo. 1597. ("Intaglio Giouan Batista Mazza Venetiano, Maestro delle Stampe della Zecha di Venetia. 1597.") ("Ioan Bat. Mazza feci".) [1643?] [In Italian.]

Large map engraved on ten sheets.

This is effectively the same as Rosaccio (1597, *ITEM NO.* 25.431) but for which the Library of Congress catalog notes: "Probably the second state of the map. Differs from the first state in the reworking of Tierra del Fuego to include the Straits of Magellan. Presents Staten Island, west of Tierra del Fuego, as an island, presumaly based on the observations of Hendrik Brouwer in 1643. Differs from the state owned by the Harry Ransom Center by the presence of a blank cartouche off the wst coast of Africa in the center of the map."

► The second sheet of the upper row includes the region of interest to this Cartobibliography. "California" is depicted as a peninsula. At the head of "Mar Vermeio" two major rivers converge; one (not labeled) reaches it from the east, which includes a place labeled "Ceuola". The larger river reaching the gulf from the northwest has headwater forks some distance upstream; the river coming from the north is labeled "Tonteach f.", and the river coming from the northwest is labeled "Axa f.", which in turn comes from the far northwest.

 ▶ A broad, foreshortened gulf, “Mar Vermeio”, separates the peninsula of “Calmifor” from “Marta”. “R. Tontontean” reaches the head of the gulf from the north-northwest, having arced from a source to the northeast off the top of the map; its course divides “Ovivira Regno” on the west from “Tolman Regno” on the east. At the mouth of that river (at the Colorado delta) the area is labeled “Totontean. R.” A second, lesser river reaches the northeast corner of the gulf from the north, having following an arcing course from the east, passing “Chucho” en route. Some distance to the east-southeast from the head of the gulf is “Ciuola”.
- 1599 25.2038 **America.** [In Italian, with map title in Latin and labels in Italian and Latin.]
In: Geografia di Clavdio Tolomeo Alessandrino, tradotta di Greco nell’Idioma Volgare Italiano da Girolamo Rvscelli, et hora nuouamente ampliata da Gioseffo Rosaccio . . . Et vna breue descrittione di rutta la terra, distinta in quattro libri

In Venetia, MDXCIX. Appresso gli Heredi di Melchior Seffa. [Map, p. 126, in *Descrittione della Geografia Vniversale, Libro Quarto*].

► The Californian peninsula (not labeled) is separated from the mainland by “Mar Vermeio”. At the head of the gulf, where it is labeled “Totontec” (and “Marta” farther east), two rivers (not labeled) from a mountainous region converge, one from the northwest, a larger one from the northeast, following from there a short course south to the gulf. “Ceuola” is labeled to the east; “Quiuira” to the far northwest.

Rossi, Giuseppe de see **Rubeis, Iosephus de**

Le Rouge [Rouge, George Louis le]

WHEAT I:121

1744 25.1314 **Mappe Monde Nouvelle Dediée a Monseigneur le Comte de Maurepas Ministre et Secretaire d’Etat. Par son tres humble et tres Obeissant Serviteur Le Rouge, Ingenieur Geographe du Roi. a Paris. Rue des Augustins vis a vis le panier Fleuri. 1744.** (“Paris chez le S^r le Rouge rue des grands Augustins vis a vis le panier Fleuri.”) (“Les Indes sont corrigées par M. Daprais Cápitaine des Vaisseaux de la Compagnie.”) [In French.]

► The Baja peninsula is labeled “Californie”, separated by the Gulf of California (not labeled) from “Mexique”. A principal river (the Colorado River, not labeled) falls from headwater in an area labeled “Quivira” in “Nouv^{le} France” generally south until twisting southwest and then southeast to arrive at the head of the gulf. A single, modest river is a tributary at the point where the Colorado twists southwestward; the Gila River (not labeled).

1774 25.1315 **Mappe Monde Nouvelle Dediée a Monseigneur le Comte de Maurepas Ministre et Secretaire d’Etat. Par son tres humble et tres Obeissant Serviteur Le Rouge, Ingenieur Geographe du Roi. a Paris. Chez Crepy rue S. Jacques a S. Pierre pres la rue de la Parcheminerie 1774.** (“Paris chez le S^r le Rouge rue des grands Augustins vis a vis le panier Fleuri.”) (“Les Indes sont corrigées par M. Daprais Cápitaine des Vaisseaux de la Compagnie.”) [In French.]

► In the area of interest to the bibliography, at least, this is identical to the 1744 map (with the exception of the different imprint). The Baja peninsula is labeled “Californie”, separated by the Gulf of California (not labeled) from “Mexique”. A principal river (the Colorado River, not labeled) falls from headwater in an area labeled “Quivira” in “Nouv^{le} France” generally south until twisting southwest and then southeast to arrive at the head of the gulf. A single, modest river is a tributary at the point where the Colorado twists southwestward; the Gila River (not labeled).

Rouillard, I.

1691 25.1832 **Carte Generale de la Nouvelle France ou est compris la Lovisiane Gaspesie et le Nouveau Mexique avec les Isles Antilles—Dressée sur les memoires les plus nomieux 1691.** (“I. Rouillard. delinearit.”) (“L. Boudan Sculp.”) [In French.]

► Only the eastern part of lower California (labeled “Partie de Californie”) is depicted, separated from “Novvelle Espagne” by “Mer Vermeille”, which passes northwestwardly off the map. By its arrangement and the depiction of the rivers described here, California is an island. Part way on the eastern side of the strait is a trilobed embayment, into which a meager river (not labeled) enters the northern embayment from the northeast; a more significant river (not labeled, with two small tributaries received en route to the gulf) enters the central embayment from the northeast. North of the headwater area for this latter river the map is occluded by an ornamental title cartouche.

Rubeis, Iosephus de, AND Hondius, I. [Rossi, Giuseppe de, AND Hondius, Jodocus]

SHIRLEY 289

- NO DATE 25.464 [No title.] [Milan or Rome.] [1615?] [In Latin.]
 Set of 12 gores printed for a globe 21 cm in diameter.
 ▶ "M. Vermeio" separates "California" from "Nova Hispania", and into the head of which several tributaries flow. Other labels are not legible at the scale of reproduction in Shirley.

Ruggles, E., jun'r. [Ruggles, Edward, Jr.]

WHEAT I:214 [with illustration facing p. 152]

- 1788 25.672 **Map of the world, drawn from the latest discoveries and best authorities.** Pomfret, Connecticut: E. Ruggles jun'r. sculp^t.
 ▶ In "New Mexico", "Martyr R." is shown flowing principally from the northeast, entering the head of the "Gulf of California".

- 1561 25.2476 **Orbis Descriptio.** [Map in Latin; volume in Italian.]
In: La Geografia di Clavdio Tolomeo Alessandrino, nuouamente tradotta di Greco in Italiano, da Girolamo Rvscelli . . . Venetia: Vencenzo Valgrisi.
 ▶ Double-hemisphere map of the world. The peninsula of California (not labeled) is separated from "Galicia Nova" by a broad gulf. Two river systems (not labeled) arrive at the head of the gulf; one from the north and northeast, the other from the east. These river systems drain a very large portion of the North American continent; both head in a mountainous region that lies in the area that may be recognized as the Appalachians and the Canadian maritime region.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

- 1561 25.2155 **Carta Marina o da Navigare.** [Map in Latin; volume in Italian.]
In: La Geografia di Clavdio Tolomeo Alessandrino, nuouamente tradotta di Greco in Italiano, da Girolamo Rvscelli Venetia: Vincenzo Valgrisi, pl. XXXVI.
 ► Map depicts the head of the Gulf of California.
- 1561 25.2156 **Nveva Hispania Tabvla Nova.** [Map in Latin; volume in Italian.]
In: La Geografia di Clavdio Tolomeo Alessandrino, nuouamente tradotta di Greco in Italiano, da Girolamo Rvscelli"
 ► An enlargement and slightly corrected version of the map by Gastaldi (1548, ITEM NO. 25.2150) that portrays "R. Tontontean" entering the head of "Mar Vermeio".
- 1561 25.2157 **Orbis Descriptio.** [Map in Latin; volume in Italian.]
In: La Geografia di Clavdio Tolomeo Alessandrino, nuouamente tradotta di Greco in Italiano, da Girolamo Rvscelli" Venetia: Vincenzo Valgrisi.
 ► Two hemispherical maps of the world. A broad North American continent (not labeled) is almost wholly drained to the Gulf of California; the eastern side of the gulf is labeled "Galicia Nova". The western part of the content extends continuously to the west, labeled "Terra Incognita", joining with the Asian continent.

Russell, John

- 1794 25.1183 **A General Map of North America Drawn from the best Surveys By J. Russell. 1794.** WHEAT I:228
 ("London, Publish'd as the Act directs, July 26, 1794, by H. D. Symonds N^o 20 Pater Noster Row.") ("J. Russell sculp^t Constitution Row Gray's Inn Lane.")
 ► "California" is separated from "Navarre" by "Gulf of California". "R. Hila" (Gila River), is shown, labeled on a headwater, with the Colorado River absent(!) even though the region from which it would flow includes a few place names (*e.g.*, "Quivira") and mountain ranges. The Gila comes from the east, and at the point where would be the confluence of these two rivers, this river turns southward and bifurcates, reaching the head of the gulf in two separated embayments. A major portion of the western part of North America is mostly blank.
- 1799 25.1738 **North America, Drawn from the Best Authorities By J:Russell.** ("J. Russell sculpsit.") WHEAT I:247
 ("Published as the Act directs by C.Dilly and G.G.&J.Robinson April 7th 1799.")
 ► Although this map is a new engraving, in the area of interest here it displays the same features as shown by Russell (1794, ITEM NO. 25.1183). "California" is separated from "Pimeria" and "Navarre" by "Gulf of California". "R. Hila" (Gila River) is shown, with the Colorado River absent(!) even though the region from which it would flow includes a few place names (*e.g.*, "Quivira") and mountain ranges (though in the area noticed here one range has been removed). The Gila comes from the east, and at the point where would be the confluence of these two rivers, this river turns southward and bifurcates, reaching the head of the gulf in two separated embayments. A major portion of the western part of North America is mostly blank.]

S., I. [Speed, John]

MCLAUGHLIN 3 WHEAT I:39 [credited to Goos]

1626 25.1062

America with those known parts in that unknowne worlde both people and manner of buildings Discribed and inlarged by I.S. Ano. 1626. (“Are to be sold by Thomas Baßett in Fleet Street and by Richard Chiswell in St Pauls Churchyard.”) (“Abraham Goos Amstelodamiensis Sculpsit.”)

▶ “California” is separated from “New Granada” by a strait (not labeled). Several mainland rivers are tributary to the northern part of the strait, including two that converge at a single embayment, “R. del Tecon” and “R. de Corall”. The prominent tributary south of them, “R. del Norte”, is in fact the misaligned Rio Grande of the Gulf of Mexico. “R. del Ticon”, with headwater forks, comes from a locale labeled “Rey Coromedo”.

McLaughlin indicates three states, 1626, 1662, 1676.

Saliba, Antonino

SHIRLEY 146

1582 25.404

Nvova figvra di tvtte le cose che sono e del continvo si genera no dentro la terra e sopra nellaere composta per il magnifico Antonino Saliba Maltese dal gozo . . . Neapoli: Marius Cartarius Incidebat. [In Italian.]

▶ A circular portrayal of the world. The North American continent embraces “Nova Spagna” in which the Gulf of California is delineated, with a brief extension of a river at its head.

Sandrart, Iacobum de [Sandrat, Jakob von]

NO DATE 25.1785

Nova Tabula Americæ Sic dictæ ab Americo Vesputio Florentino, qui Emanuelis Portugalliæ Regis auspicijs eam Anno 1497. (:detectis priüs A. 1492 ā Chirstophoro Columbo Hispanio. lâ, Cuba, et Iamaicâ Insulis:) primus ex Europæis, quantum qui dem constat, ingreßus erat. recens illustrata per Iacobum de Sandrart Norimbergæ. (“Ioann Bapt. Homann sculpsit.”) [1690s.] [In Latin.]

▶ The island, “California”, is separated from “Nova Mexico” by “Mare Vermio olim Mare Rubrum”. Midway on the east side of the strait, “R. de Anouchi” reaches the strait from the north-northeast; south of it, into a large embayment arrive side by side “R de Tecon” from the north and “R de Coral” from the northeast.

Sanson see also Moullart-Sanson**Sanson (M.) [Sanson (Monsieur)] [Sanson d’Abbeville, Nicolas]**

NO DATE 25.1389

Nova Orbis Tabula ad Usum Serenißimi Burgundiæ Ducis Mappede-monde Dreßé sur les Observations de M^{rs} de L’Academie Royale des Sciences et quelques autres et sur les memoires les plus recens Par M. Sanson. (“Se Vend a Amsterdam Chez Pierre Mortier Avec Privilege.”) [1696?] [In French, with ornamental banner in Latin.]

▶ “Californie” (with its peninsula carrying the label “P. de la Paix”) is separated from “Sonora” by “M. Vermeille”. A single river (not labeled) arcs from the northeast to south-southeast before arriving at the head of the gulf.

- 1650 25.1767 **Americqve Septentrionale Par N. Sanson d’Abbeville Geog. du Roy A Paris Chez l’Auteur Et chez Pierre Mariette rue S. Jacques a l’]Esperāce 1650. Auec priuilege du Roy pour vingt Ans. [In French.]**

► “Californie Isle” is separated from “Nouvelle Grenade” by “Mar Vermejo”.

Midway along the eastern side of the strait are two principal embayments; the northerly one receives “R. de Anguchi” from the north; the southerly one is bilobes, with “R. del Tecon” (a major river with two headwater forks) arriving in the westerly lobe from the north, and “R. de Coral” in the easterly lobe from the north-northeast. “Zuny”, “Cibola”, and “Moqui” are all clustered nearby to the east.

MCLAUGHLIN 17 WHEAT I:50

- 1656 25.1769 **Le Nouveau Mexique, et la Floride : Tirées de diverses Cartes, et Relations. Par N.Sanson d’Abbeville Geogr ord^{re} du Roy. A Paris. Chez Pierre Mariette, Rue S. Jacques a l’Esperance Avec Privilege du Roy, pour vingt Ans. 1656. (“Somers Sculp.”) [In French.]**

► “Californie Isle” is separated from “Nuevo Mexico” and “Nueva Granada” by “Mar Vermeio”. Midway on the eastern side of the strait is a bilobed embayment, the westerly lobe of which receives “R. de Tecon” from the north-northeast and the easterly lobe receives “R. de Coral” from the northeast. The river Tecon has two headwater tributaries, the westerly one of which descends from a place labeled “Rey Coromede”. “R. del Norte”, heading in a large lake, is actually the Rio Grande of the Gulf of Mexico, but which is interpreted on this map as flowing to the Californian strait, a common contemporary interpretation.

MCLAUGHLIN 18 [Americqve Septentrionale]

- 1657 25.507 **Audience de Guadalajara, Nouveau Mexique, Californie, &c. Par N. Sanson d’Abbeville Geogr. ordin[aire] du Roy. Aveqc Privilege pour 20 Ans. 1657. [In French.]**

In: L’Americqve en plvsievr cartes, & en divers traittes de geographie, et d’histoire. Là où sont descripts succinctement, & avec vne belle methode, & facile. Ses empires, ses peuples, ses colonies, leurs moeurs, langves, religions, richesses &c. Et ce qu’il y a de plus beau, & de plus rare dans toutes ses parties, & dans ses isles. Dedie’e a Monseigneur Monseigneur Fovcqvvet, Conseiller dv Roy en tovs ses conseils, et chancelier des ordres de Sa Maieste’. Paris: Chez l’Avthevr.

See text, “Mexique, ou Nouvelle Espagne”, pp. 5-[12], and this map.

► “Californie Isle” is separated from the mainland “Nouveau Mexique” by “Mar Vermejo”. Midway on the eastern side of the strait is a bilobed embayment into which two rivers arrive, “R. de Tecon” and “R. de Coral”; the former is substantially larger and with two headwater branches.

► An interesting projection, viewing the surface of the earth as if seen from inside the globe, thus West to the right. The island of California (not labeled) is separated from “Nouveau Mexique” by a strait (not labeled). On the east side of the strait a single river (not labeled), with two headwater forks, arrives from the northeast.

Sanson, Gulielmi [as Gulielmi Sanson Nicolai Filii] [**Sanson, Guillaume**]

MCLAUGHLIN 46 [1669, reissue]

- 1690 25.1633 **Atlantis Insula à Nicolao Sanson Antiquitati Restituta; Nunc demum Majori Forma delineata, et in decem Regna, Iuxta decem Neptuni Filios Distributa. Præterea Insulæ, Nostræq; Continentis Regiones quibus Imperavere Atlantici Reges; aut quas Armis Tentavere. ex Conatibus Geographicis Gulielmi Sanson Nicolai Filii. CIO IOC LXVIII. Cum Privilegio [reno inserted] ad Viginti Annos Lutetiæ Parisiorum. Apud Autrorem in Ædibus Regus 1690.** ("Atlantis Insulæ pars Septentrionalis, non tantum ad Asiæ Magnitudinem accedit, sed etiam ejus figuram, situm, et Insularum Circumjacentium Maultitudinem Imitatur.") [In Latin.]

Various states noted, 1669-1741. In this state, the line "Apud Autrorem" is written over an eradicated line, and the line "in Ædibus Regus 1690" is added below it, a bit forced.

► The Americas are labeled "Atlantis Insula Altera Continens", with the southwestern portion of North America and Central America labeled "Atlas". The Atlantic Ocean is labeled both "Oceanus Atlanticus" and "Atlanticum Pelagus"; the Pacific Ocean is labeled "Atlanticum Pelagus" [sic]. A large island of California (not labeled) is separated from "Atlas" by a strait. Five rivers (none labeled) come to the eastern side of the strait from the northeast. Other than a midcontinental mountain range in North America, no features are marked or labeled, aside from Mexico City(?) being labeled "Machimos id est Bellatrix".

McLaughlin gives the original date of 1669, which has not been seen for this Cartobibliography, nor is it included in the digitized McLaughlin collection online.

MCLAUGHLIN 223

- 1741 25.1821 **Novus Orbis potius Altera Continens Sive Atlantis Insula à Nicolao Sanson Antiquitati Restituta; Nunc demum Majori Forma delineata, et in decem Regna, Iuxta decem Neptuni Filios Distributa. Præterea Insulæ, Nostræq; Continentis Regiones quibus Imperavere Atlantici Reges; aut quas Armis Tentavere. ex Conatibus Geographicis Gulielmi Sanson Nicolai Filii. CIO IOC LXVIII. Cum Privilegio [reno inserted] ad Viginti Annos a Paris Ch's les S. Robert Geog. du Roi quai de l'Horloge ·1741·** [In Latin, with imprint in French.]

With the exception of the addition to the beginning of the cartouche text and the changed imprint, this is the same map as in Sanson (1690, ITEM NO. 25.1633).

► The Americas are labeled "Atlantis Insula Altera Continens", with the southwestern portion of North America and Central America labeled "Atlas". The Atlantic Ocean is labeled both "Oceanus Atlanticus" and "Atlanticum Pelagus"; the Pacific Ocean is labeled "Atlanticum Pelagus" [sic]. A large island of California (not labeled) is separated from "Atlas" by a strait. Five rivers (none labeled) come to the eastern side of the strait from the northeast. Other than a midcontinental mountain range in North America, no features are marked or labeled, aside from Mexico City(?) being labeled "Machimos id est Bellatrix".

Sansone, Gvglielmo [**Sanson, Guillaume**]

MCLAUGHLIN 65 WHEAT I:59

- 1677 25.1336 **l'America Settentrionale Nuouamente corretta, et accresciuta secondo le relationi più moderne, da Gvglielmo Sansone Geografo di S-M-Christianis^a E data in luce da Gio. Giacomo de Rossi, in Roma nella sua Stamperia alla Pace, l'Anno 1677.** ("Giorgio Widman Sculp.") [In Italian.]

► "Isola di California" is separated from "Nvovo Messico" by "Mar Vermei ò Mar Rosso". Midway along the eastern coast of the strait three rivers are received from the northeast: "R. de Anguchi", and, into an embayment, "R. de Tecon" and "R. de Coral". Tecon is shown as a principal river, with headwater forks, the western branch of which heads in a place labeled "Rey Coromedo".

Santini, François

- 1784 25.2259 **Carte des Nouvelles Decouvertes au Nord de la Mer du Sud, Tant à l'Est de la Sibérie et du Kamtchatka, Qu' à l'Ouest de la Nouvelle France A Venise Chez François Santini, rue S^{te} Justine près la dite Eglise. Chez M. Remondini.**
In: Atlas universel dressé [sic] sur les meilleures cartes modernes 1784 : Second Partie. Venise: P. Santini, Chez M. Remondini.
 ► The whole of North America is included on this map. "Rio Colorado" is delineated on an unembellished course from mountainous regions southwest to south, where after receiving "R. del Coral" (Gila River) from the east bifurcates then rejoins at the head of "Mer Vermeille".

Sanuto, Giulio, AND Sanuto, Livio [?]

SHIRLEY 129

- 1574 25.397 **[No title.]** Venice.
 Twenty-four gores printed for a globe 71 cm in diameter. Shirley notes (pp. 152-153), "One of the largest surviving sets of printed gores, possibly by the Sanuto brothers."
 ► "Mar Vermeio" is prominent, into which the Colorado River and tributaries flow.

Savigny, Christofle de

- 1587 25.1881 Geographie. **[In French.]**
In: Tableavx. Accomplis de tous les arts liberavx, contenans brievement et clerement par singvliere methode de doctrine, vne generale et sommaire partition des dicts arts, amassez et redvicts en ordre povr le sovlagement et profit de la ievnesse. A Paris, Par Iean & François de Gourmont freres, demeurants ruè Saint Ian de Latran. Avec privilege dv Roy, pp. X-Y.
 ► A bare map of the world ornaments p. X, depicting the continents and rivers thereon, with no labeling except the names of the continents. The western coast of North America runs generally northwest-southeast along its entire reach. A decidedly inflated Californian peninsula is shown, with a gulf on its eastern side that is indistinguishably any larger than two rivers that reach its head; one from the northwest and north, the other, much larger, from the northeast and east.

Sayer, Robert⁴⁸

- 1772 25.1437 **A Map of the Whole Continent of America, divided into North and South and West Indies with a Copious Table Fully shewing the several Possessions of each European Prince & State, As Settled by the Definitive Treaty concluded at Paris Feb^y 10th 1763. the Clauses of which relative thereto are inserted. Compiled from M^r D'Anvilles Maps of that Continent. 1772.** ("London Published as the Act Directs 1st April 1772. By Rob^t Sayer Map & Printseller at the Golden Buck near Serjeants Inn Fleet Street.")
 ► The peninsula, "California", is separated from "New Navarre" by "Californian Gulf or Mar Vermejo". Two rivers arrive at the head of the northwesterly-trending gulf from the northeast; one is very small, which in fact is likely a redrawing of the two courses around what has been labeled variously as "I. de la Presentacion" and similar names on other maps, except in this case the two courses arrives independingly at the

⁴⁸ See also Governor Pownall (Thomas Pownall) regarding similar maps with the notation, "Compiled from M^r d'Anville's maps of that Continent, and Corrected in the Several Parts belonging to Great Britain, from the Original Materials of Governor Pownall, MP."

head of the gulf. A distance upstream from the gulf at "S Dionisio" is the confluence of "Rio Colorado de los Martyres" (from the north-northeast with headwater in an area labeled "Teguayo Grande") and "Rio Grande" (from the east), but in the manner by which the lines are drawn and the labels applied it makes it seem as though the Colorado is a tributary to the "Rio Grande", the latter also being the larger drainage basin with two of its headwater streams labeled "Azul or Blue R" and "R Hila" (along which "Casagrande" is depicted).

Sayer, R., AND Bennett, J. [Sayer, Robert, AND Bennett, John]

- 1775 25.1454 **Chart containing the Coasts of California, New Albion, and Russian discoveries to the North, with the Peninsula of Katschatka, in Asia, opposite thereto, And Islands, dispersed over the Pacific Ocean, to the North of the Line. \ North America and the West Indies, with the opposite Coasts of Europe and Africa.** ("Published according to Act of Parliament. 10 June 1775. by R. Sayer & J. Bennett. N^o 53 in Fleet Street.") ("IV".)
Map in two sheets.
▶ The peninsula, "California", is separated from "New Mexico" by "Vermilion Sea". The head of the northwestward-trending gulf twists to the northeast, where at the head it receives "Rio Colorado", the course of which runs from the northeast heading in an area labeled "Teguayo". Before reaching the gulf, it receives a river (not labeled) from the east, which is the Gila River, along which course is labeled "Casa-grande".

Schagen, Gerardvm A.

Sumptibus Joannis Caspari Bencard, Bibliopolæ Academiæ Dilinganæ. Monachii, Typis, Mariæ Magdalenæ Rauchin Viduæ.
 ▶ "Ins. California" is separated from "Novum Mexicvm" by "Mare Vermeio". Numerous rivers are shown reaching the strait, including (north to south) "R. de Totontec", two unlabeled rivers, "R. de Anguchi", "R. del Teco", unlabeled river, "Rio de Coral", and "Rio del Nort" (Rio Grande, which heads in a large lake). The Teco and Anguchi rivers head in an area labeled "Cibola", just north of which is "Qvivira". The map is further peculiar in that it depicts the entire region as generally mountainous, covered with symbols for trees. In the area east of the headwaters of these rivers is "R. Grande", which also heads in a large lake, "Lac de Keton", yet is also labeled "Meschasipi Flu.", and to the immediate east of which are displayed the Great Lakes; overall a remarkable contraction of geography. Note that this differs from the outwardly similar map by Scherer (1710, ITEM NO. 25.1794).] (In the lower right of the plate are figures holding three unrolled maps; one of these maps is labeled "Hispanor Cvra" and "Novvum Mexicvm cum California", which simply depicts [with no other labels] the island of California separated from the mainland by a narrow strait, into which flow numerous, nearly identical rivers.)

chartis geographicis, ac figuris. Augustæ Vindel. Dilingæ & Francofurti, pud Joannem Casparum Bencard, Bibliopolam, between pp. 84/85.

► “Ins California” is separated from “Novum Mexicvm” by “Mare Vermeio”. Numerous rivers are shown reaching the strait, of which the only one labeled is “Rio del Nort” (Rio Grande), and it is not possible to discern which among the others could be those that are usually labeled “Tecon” (etc.) and “Coral”. The map is further peculiar in that it depicts the entire region as generally mountainous, covered with symbols for trees. In the area just north of “Rio del Nort” is a headwater of “Fl. Mesaschipi”, and to the immediate east of which are displayed the Great Lakes; overall a remarkable contraction of geography. Note that this differs from the outwardly similar map by Scherer (1703, [ITEM NO. 25.1801](#)).

Schraembl, F. A.

1788 25.2307 **Generalkarte von Nordamerica samt den Westindischen Inseln Verfasst von Herrn Pownall Neu herausgegeben von Herrn F. A. Schräembl MDC.CLXXXVIII.** (“Gestochen von J. Stenger in Wien.”) (“N. 20.”) [[In German.](#)]

► On the western side of the map, “Californischer Meerbusen”, separating “Californien” from “Neu Navarra”, passes off the map to the northwest. There is no question that the map is meant to display California as a peninsula, in that an inset map reproduces Francisco Kino’s pioneering map of the Colorado River delta region (for which see under Kino herein). Depicted farther to the north, passing off the map to head toward the gulf, are “Colorado de los Martyres Fl.”, its course to the southwest and two headwater forks) and “Rio grande le los Apostolos od Korallen Fl.” (Gila River, which is labeled on a headwater fork, “Fl. Hila od. Sonaka”), its course to the west.

1789 25.2308 **Genralkarte sämtlicher Entdeckungen auf den drei grossen Weltreisen des Kapit. Jakob Cook. Verfasst von Herrn Heinrich Roberts Lieut. Neu herausgegeben von Herrn F. A. Schräembl zw finden in eigenem Verlage in Wien 1789.** (“H. Benedicti sc.”) (“N^o 106 A.” “N^o 106 B.”) [[In German.](#)]

► “Mb. von Californien” is drawn cursorily with a broad head that twists northward, where it receives, at the same scale, “Colorado Fl.”, which extends inland only a short distance before interfering with “Rio del Norte” (which is the Rio Grande of the Gulf of Mexico). Some distance north of the the apparent head of the gulf “Gila od. Hila Fl.” is a tributary of the Colorado from the east-southeast. Blank areas on this map are filled with small tree-like symbols.

Schreibern, Johann George

 ► The island, "California" (its northern end labeled "Nova Albion"), is separated from "New Galicia" by "Mare Vermiglio". Near the northern end of the strait several rivers enter two embayments on the eastern side: "R. d Anguichi" from the north; and, into a single embayment, "R del Tecan" from the north (with two headwater forks, one to the north near "Acoma" and the other to the northeast north of "Cibola"), and "R d Corall" from the north-northeast with headwater also near "Cibola".
 McLaughlin indicates three states, 1652, 1663, 1666.

Sekisui, Nagakubo

see also Sekisui in Section 2

- NO DATE 25.1719 **Kaisei Chikyu Bankoku zenzu.** [Japan.] [Late 1700s.] [In Japanese.]
 Woodblock map; a reduced copy in Japanese translation of a world map by Matteo Ricci. Map title in Japanese orthography not available to this Cartobibliography.
 This is cited from a copy in the John Carter Brown Library, which catalogs it with a "normalized date" of 1780.
 ► Two simple rivers are shown at the head of the Gulf of California, where a large island is positioned. One river arrives there from the northeast; the other arrives downstream of the island from the northwest.

Seller, John

- NO DATE 25.1488 **Novissima totius terrarum orbis tabula. Auctore Joh: Seller Hydrographo Regis.** [London.] [1675?] [In Latin.] SHIRLEY 460
 ► The island, "California", is separated from "Nova Granada" by a strait (not labeled). Midway along the east side of the strait is a bilobed embayment, into each part of which flows a river. The westerly embayment receives a significant river from the north with two forks heading near a place marked "Rey Coromedo"; the easterly

embayment receives a smaller river also from the north. To the east of these rivers is a place marked "Pueblos d Aloque".

MCLAUGHLIN 69

- 1679 25.1640 **New Mexico.**
In: Seller, John, *Atlas minimus or a book of geography shewing all the empires, monarchies[,] kingdoms, regions[,] dominions[,] principalities and countries, in the whole world. By John Seller Hydrograph^r to the King. And are sold at his house at the Hermitage in Wapping. and in Pope's head Alley in Cornhill Lon.* ("Ja Clark Sculp".)
 ► The island, "California" (labeled "Nova Albio" [*sic*] at its northern end), is separated from "Nova Granada Hispania" by a strait (not labeled). Midway on the east side of this crude map are shown four rivers (not labeled) arriving in embayments, from the north to north-northeast.

Senex, Iohn [Senex, John]

- NO DATE 25.1814 **North America According to the Latest Observations.** [London.] [1722.]
 ► "Isle of California" is separated from "Mexico" by "Mar Vermejo or Red Sea". Midway on the east side of the strait are shown two prominent rivers (not labeled), which independently enter the east side of an embayment. The northerly river has two headwater forks; the course arcs from west to southwest before reaching the embayment. The southerly river has various tributaries and follows a course generally west before reaching the embayment; its headwaters about the course of "R. de Norte" (the Rio Grande, which is correctly depicted draining to the "Gulf of Mexico").
 MCLAUGHLIN 210
- NO DATE 25.1815 **North America According to the Latest Observations.** ("front Page 342".) [London.] [1730.]
 With the exception of the binder's note, this is the same map as in Senex (no date, ITEM NO. 25.1814).
 ► "Isle of California" is separated from "Mexico" by "Mar Vermejo or Red Sea". Midway on the east side of the strait are shown two prominent rivers (not labeled), which independently enter the east side of an embayment. The northerly river has two headwater forks; the course arcs from west to southwest before reaching the embayment. The southerly river has various tributaries and follows a course generally west before reaching the embayment; its headwaters about the course of "R. de Norte" (the Rio Grande, which is correctly depicted draining to the "Gulf of Mexico").
 McLaughlin notes several dates of this map, with various reissues.
 WHEAT I:92
- 1710 25.1166 **North America Corrected from the Observations communicated to the Royal Society at London, and the Royal Academy at Paris. By Iohn Senex F.R.S. 1710[.] Printed for T. Bowles in St Pauls Church Yard, John Bowles and Son, in Cornhil, & Rob^t Sayer in Fleet Street.** ("Iohn Senex Sculp^t".)
 ► A portion of the California peninsula is shown at the extreme west of the sheet, overlapping onto the ornamental border. It is separated from "New Mexico" by "The Sea of California". There are two embayments at the head of the gulf, into which flow separately "R. Angouchi" into the western bay and "R del Tison" into the eastern, larger bay. Upstream on the "Tison", "R de Buena Esperança" is shown as a large tributary to it from the east. Notably, "R. Sonaca or Hila" is shown as a significant stream from the east, entering the southern part of the large embayment of the gulf that also receives the "Tison"; and upstream on the "Hila" is a relatively short tributary from the northeast labeled "Colorado R".

 ► The map is completely cluttered with the names of places and features. The island, “California” (also labeled “Nova Albion” at its northern end), is separated from “Nova Granada” by “Mare Vermeio Sive Mare Rubrum”. Midway along the east side of the strait are three rivers (north to south): “R de bona Guia” (with two headwater forks in an area labeled “Grand Teguao”) from the northeast, an unlabeled river (with two headwater forks near the place labeled “Acoma”) from the northeast, and “R de Coral” from the southeast. The latter two arrive in the same embayment.

WHEAT I:199

- 1784 25.1833 **Novus Orbis sive America meridionalis et Septentrionalis, per sua Regna Provincias et Insulas iux'ta observationes et descriptiones recentiss, divisa et adornata cura et opera matth. Seutter, Sac. Cæs. Maj. Geogr. Aug. Vind.** (“Anjezo in Verlag bey Iohañ Michael Probst, Chalcogr in Augspurg. 1784.” “Con Gratia et Privil. S. R. I. Vicariatg, in partibg Rheni, Sueuiæ, et Juris Franconici.”) [In Latin.]
 ► The island, “California”, is separated from “Nova Granada” by “Mare Vermeio sive Mare Rubrum”. On the eastern side of the strait is an embayment into which two rivers (not labeled) flow.

Seýfrid, I. H. [Seifried, J. H.]

- NO DATE 25.2450 **Typus Orbis Terrarum. I. H. Seýfrid, delineavit.** (“Wilhelm Pfann. sculpsit.”) [No imprint.] [Map in Latin; card title in German.]
 A miniature map in a deck of playing cards, on “Das ♠ As” (The Ace of Spades). Although the Colorado River is absent, this map is cited here for its novelty. The David Rumsey map collection indicates, crediting Lucian Stefan, 2023, that it copies a map from Johann Hoffmann, “Europæisch-Geographische Spiel-charte” (Nurnberg, 1678).
 ► In “America” a gulf (not labeled) separates the peninsula, “California”, from “Nova Hispania”. Where various rivers of the world are delineated (without labels), North America shows only the St. Lawrence River.

Sijpe, Nicola van [Sype, Nicola van]

SHIRLEY 149

- NO DATE 25.406 **La Herdike Enterprinsc Faict par le Signevr Draeck d’Avoir Cirqvít Tovte la Terre.** Antwerp[?]. [Ca. 1585.] [In Dutch, French, and Latin.]
 ► The head of the Gulf of California splits into three very prominent branches (not labeled) in “Nova Hispanie”; one to the northwest, one to the north, and one (very extended) to the northeast. In this form they appear simply as narrowed extensions of the gulf itself. Of particular note is the positional marker for “Cuola” placed on the eastern side of the mouth of the gulf.

Smith, Reid, and Wayland [firm] [see also Reid]

- 1795 25.1344 **A General Map of North America Drawn from the Best Surveys 1795.** ("Scoles, sc".)
("Published by Smith, Reid, & Wayland".)
This is the same map as that published by Reid (1795, [ITEM NO. 25.1345](#)).
▶ The peninsula of "California" is separated from "Navarre" by "Gulf of California". The head of the gulf receives two rivers that flow closely in parallel from the north-northeast; their point of bifurcation is where a single river from the east turns abruptly southward; this river is labeled on one of its headwater streams "R. Hila". The Colorado is not depicted; the area in which it should be shown is mostly blank, save for two mountain ranges and three place names, "Quivira", "Axaas" [sic], and "Bagopas".
-

Solis [Solis, Hernando de]

- NO DATE 25.1490 **Tipvs Orbis Terrarvm.** ("Solis fecit Valla dolid".) [1603?] [In Spanish, with title in Latin.]
▶ The northern part of the continent, "America o Nuevas Indias" is very broad, with its southwestern coast arcing from northwest-trending by the Californian peninsula to west in an area labeled "Qvvira Reino", before turning northward to "Anian". The Californian peninsula is not labeled; it is separated from the greater area of "Noeua espanna" by the Gulf of California (not labeled). Two river systems (not labeled) arrive at the head of the gulf; one from the northwest, from an area labeled "Totonteaç"; the other, much longer, from the northeast, passing en route places labeled "Ceuola" and "Granada".
-

Sornique, J.

- 1722 25.1810 **Carte Particuliere du Golphe de Mexique et des Antisles.** ("J. Sornique Sculp.")
("tome 1. page 1.") [In French.] MCLAUGHLIN 202
▶ "Californie Isle" is separated from "Nouvelle Grenade" by "Mer Vermeio". On the east side of the strait only "R. de Nort" (Rio Grande) is labeled, but north of these two rivers (not labeled), one much larger than the other, heading in a mountainous area, reach the strait from the northeast.
-

Speed, Iohn [Speed, John] see also "S., I."

- 1626 25.1666 **A New and Accvrat Map of the World Drawne according to y^r truest Descriptions latest Discoueries & best Obseruations y^t [sic] haue beene made by English or Strangers. 1626.** ("Are to be sold in pops-head [sic] Alle by Geor:Humble.")
In: A prospect of the most famous parts of the world . . . together with all the provinces, counties and shires, contained in that large theater of Great Brittaines Empire. Performed by Iohn Speed. (The Theatre of the Empire of Great Britaine, etc). London: Printed by Iohn Dawson for George Humble, 1627.
▶ North America is labeled "North America or Mexicana". The island, "California", is separated from "Granada" by a strait (not labeled). Midway on the east side of the strait are two adjacent north-trending embayments; the eastern one is prominent, with two tributaries at its head, and the embayment itself is labeled "R. de Coral" (which on most charts might have been labeled R. de Tecon or similarly). East of this embayment is "Pueblos de Moqui".
-

Speed, John

- 1676 25.2249 **A New and Accvrat Map of the World Drawne according to y^e truest Descriptions latest Discoueries & best Obseruations y^e haue beene made by English or Strangers. 1651.**
In: A prospect of the most famous parts of the world, viz. Asia, Africa, Europe, America, with these empire and kingdoms therein contained By John Speed. To which are added in this New Edition . . . as also the descriptions of His Majesty's dominions abroad; with a map fairly engraven to each description London: Printed for Thomas Basset at the George in Fleet-street, and Richard Chiswel at the Rose and Crown in St. Paul's Church-yard, MDCLXXVI.
 ► Essentially the same map as Speed (1626): North America is labeled "North America or Mexicana". The island, "California", is separated from "Granada" by a strait (not labeled). Midway on the east side of the strait are two adjacent north-trending embayments; the eastern one is prominent, with two tributaries at its head, and the embayment itself is labeled "R. de Coral" (which on most charts might have been labeled R. de Tecon or similarly). East of this embayment is "Pueblos de Moqui".
- 1676 25.2250 **America with those known parts in that unknowne worlde both people and manner of buildings Discrib'd and enlarged by I. S. Ano. 1626.** ("Are to be sold by Thomas Baßett in Fleet street, and by Richard Chiswell in St Pauls Churchyard.") ("Abraham Goos Amstelodamiensis Sculpsit.")
In: A prospect of the most famous parts of the world, viz. Asia, Africa, Europe, America, with these empire and kingdoms therein contained By John Speed. To which are added in this New Edition . . . as also the descriptions of His Majesty's dominions abroad; with a map fairly engraven to each description London: Printed for Thomas Basset at the George in Fleet-street, and Richard Chiswel at the Rose and Crown in St. Paul's Church-yard, MDCLXXVI.
 This is the same plate as that of "I. S." [John Speed] (1826, ITEM NO. 25.1062).
 ► "California" is separated from "New Granada" by a strait (not labeled). Several mainland rivers are tributary to the northern part of the strait, including two that converge at a single embayment, "R. del Tecon" and "R. de Corall". The prominent tributary south of them, "R. del Norte", is in fact the misaligned Rio Grande of the Gulf of Mexico. "R. del Ticon", with headwater forks, comes from a locale labeled "Rey Coromedo".
 McLaughlin indicates three states, 1626, 1662, 1676.

Spilsbury, J.

- 1763 25.2246 **North America.** ("J. Spilsbury Sculp.") Caption: **Amerique Septen^{le}** [Map with title cartouche in English; caption in French.]
In: A new general, and universal atlas. Containing forty five maps by Andrew Dury. Engraved by Mr. Kitchin, & others. Printed for & sold by A. Dury at the Indian Queen, in Dukes Court St. Martin's Land, Robt. Sayer at the Golden Buck in Fleet treet, & Carington Bowles in St Pauls Church Yard, London.
 ► The head of "Vermeille Sea" is "T"-shaped, with a significant river system (no part labeled) arriving from the west into the western lobe. The major stream, presumably the Colorado, comes from the north, in an area labeled "Teguajo" in "New Albion" or "Louisiana" (boundary not distinguished); two other streams from "New Mexico" are tributaries from the northeast and east; the latter of which is presumably the Gila River. The general course then is to the west-southwest before turning half-circle to the east to meet the gulf.

Stoopendaal, Daniel

SHIRLEY 498

NO DATE 25.1616

Werelt Caert. [Amsterdam.] [1716.] [In Latin, with title in Dutch.]

► The island, "California" (labeled "Nova Albion" in its northern part), is separated from "Nova Granada" by a strait (not labeled). Midway along the eastern side of the strait there is the appearance of two twin rivers arriving from the north; however, it is likely that these are awkward depictions of two north-trending embayments. The westerly of these, though, is headed by two rivers (not labeled) that independently arrive at the head of the embayment; one from the north and the other from the north-northeast, both of which head in an area near which is labeled "Rey Coromado".

Stridbeck, Johann

MCLAUGHLIN 141

NO DATE 25.1795

Der Neuen West Bergriff. Bestehende in 2 Haupt Theilen als Nord America und Sud America. Warinnen der erste Meridian nach Frantzosischer art gezogen. [1700?] [In German.]

► The island, "California", is separated from "Nu. Mexico" [sic] by a strait (not labeled). On the east side of the strait there are three rivers (not labeled); the central one, from the north, is likely in the region of interest here because the southerly river, a prominent one, heads in a large lake which is like that of the supposed course of the Rio Grande.

Tauernier jdrographe [*sic*] de sa Majeste & auec son priuilege pour 20 ans. A^o 1643.**
- The northwestern part of North America is blank, over which is a cartouche: “Dans Ceste partie Septentrionale [*sic*] de L’Amerique Cest fait plusieurs Nouelles decouuertes tant par les Francois que par les Anglois entre les quelles est l’jsle [*sic*] de Californe [*sic*] que lon Croyoit sy deuant estre vnne a la Contiente la quelle est entre le Tropique de Cancer & le 45 Parallele plus se Voit aussy la Mer de Hudson nouvellement des couuerte par Thomas Button”. Features on the map: “I. de Ciliforni” [*sic*] is separated from “Novvelle Granade” by “Mer de Vermio”. Midway on the east side of the strait is a river (not labeled) coming from the northeast, heading in an area labeled “Roy Coromedo” and “Pueblos de Moqui”.

Tauernier, Melchior, AND Bosse, Abraham [Tavernier, Melchior, AND Bosse, Abraham]

SHIRLEY 332

- NO DATE 25.482 **[No title].** Paris. [Ca. 1630.] [In Latin.]
- The southwestern portion of “Amerique Septentrionalis” is rather stylized. An imaginatively formed Gulf of California, broader at its head, separates “Californie” and “N. Grenade”, but California is only a label, with no coastline to the west. The eastern side of the gulf is sparsely marked with tributaries, but none at its head.

Thevet, André

WHEAT I:18

1581 25.1051

Qvarte Partie dv Monde. (“A Paris, chez Guillaume Chaudiere, Ruë S. Iaques, à l’enseigne du Temps & de l’Homme Sauvage. 1581.”) (“Andre Thevet. Cosmographe du Roy. Je sçay bien, Amy lecteur, que quelques hōmmes tres-doctes parcideuant ont mis en lumiere la Carte de ceste Quatriesme partie de l’vniuers: mais pour ne l’auoir veuë& icelle illustré comme i’ay faict, pourroyent pareillement errer: ce qui m’a a bon droict incité de te la representer plus correcte que les precedentes, y obseruât les degrez de longitude & latitude, selon l’ordre Cosmographique: ensemble tu y verras plusieurs riuieres, goulfes. mōtaignes, plages & promontoires, desquelz ie t’ay faict assez ample description dans mon Histoire, à fin que tu ayes dequoy te contenter.”) [In French.]

Caption: **Le Nouveau Monde Descouvert et Illvstre de Nostre Temps.**

In: La cosmographie vniverselle d’Andre Thevet Cosmographe dv Roy. Tome Second. Paris: Chez Gillaume Chaudiere, [7] leaves, leaves 469-1025, [17] leaves, maps. [Leaves, rather than pages, are enumerated.] [“1575.” (see note below regarding date and map placement).]

► Regarding the map in question, the detailed engraving of labels is so fine that they are illegible except upon examining an original map or a very high-density scan of it. In the area of interest to this Cartobibliography there are no specific place names of political geography (such as California), although the coastal area to the northwest has a label, “Quiuer”, and to the far northwest a prominently displayed “La Royaume d’Anian” alongside the fabled “Destoit d’Anian”. To the east of the head of the Gulf of California is the label, “Tontontec”, and farther to the southeast in present central Mexico, “Novvelle Espaigna”. The Californian peninsula is separated from the mainland by “la mer Rouge”. Two tributaries are depicted at its head, the western one of which has headwaters as well, from the northwest to northeast; the eastern tributary, from the northeast, comes from that region labeled “Tontontec”; a third tributary, very prominent, comes westward to the eastern shore of the gulf near its head, after draining areas of the east and west such as that which would be expected with a misaligned Rio Grande of the Gulf of Mexico (it also passes by “Ceuola”. Of additional note on this map is the cluttering in all open spaces by small symbols of trees, even in the Southwest.

NOTE: The volume has generally been cited as Thevet (1575, Volume 2). Lowery (1912, p. 79, item 61) cites the placement of the map as “v. 2, preceding book 21, p. 903”; Wheat (1957, Volume 1, p. 189) cites the placement as “Vol. 2, following p. 936”. In fact, the volume by Thevet has the title-page: *La cosmographie vniverselle d’Andre Thevet Cosmographe dv Roy. Tome Second*, with the date 1575. However, this volume, using the title-page thus, contains only “Tome Troisieme” (leaves 469 recto–936_[1] verso) and “Tome Qvatrieme” (leaves 903_[2] recto–1025 verso), so noted at the beginnings of those parts (leaves 469 recto and 903_[2] recto, respectively). The volume contains leaves enumerated 469-1025 (*leaves 903-936 have their enumeration duplicated in error* [not noted by the cartobibliographers cited here]), plus an unenumerated 7 and 17 leaves preceding and following the text leaves, respectively. In this volume, Thevet’s “Livre XX”, which is a part of “Tome Troisieme”, comprises leaves 877 recto–936 verso. “Livre XXI”, which is a part of “Tome Qvatrieme”, comprises leaves 903_[2] recto–936_[2] verso, 937 recto–953 verso (903-936 therein being the replicated enumeration).

The **MAP** is associated with “Tome Qvatrieme”, which begins with the caption, “Cosmographie vniverselle de Andre Thevet Cosmographe dv Roy. Tome Qvatrieme. Description de la qvatrieme partie dv monde, illvstree de nostre temps.” The map of interest here is between Livre XX and Livre XXI, and thus between the leaves 936 verso/903_[2] recto. All of the maps in this volume carry the date “1581.”, as cited here. Most citations seen for Thevet’s Volume 2 have the date 1575 and the imprint, “Chez Pierre l’Huillier”; the discrepancy, as observed here, is not resolved, but it seems that this work was produced over a period of time at a firm that changed

hands, as both are cited as in "rue S. Iaques". One WorldCat record offers for the Guillaume Chaudier imprint, "Differs from other edition of 1575 in printer, spacing of last lines of preface, and does not have a portrait." The 1581 date for the map in question is adopted.

Thompson, G. [Thompson, George]

WHEAT I:248

1799 25.1737

New Map of America Divided into its Kingdoms, States, Governments and other Subdivisions. from the Latest Observations. London. Publish'd May 1st:1799.by G.Thompson, N^o 43 Long Lane, West Smithfield.

BROADSIDE. Includes border inset maps and illustrations, and text. The name, "Pasaros" is engraved at the lower right of the title cartouche.

▶ "California" is separated from "New Navarre" by "G of California". "R. Colorado" follows from headwater a southwesterly course along the west side of "Azul M^{ts}", turns briefly to the south-southeast where it receives a tributary (not labeled, and imaginative?) from the northeast that runs between the east size of the "Azul M^{ts}" and a shorter, parallel range (not labeled), then follows a course south-southwest toward the head of the gulf. "Coral R." is received from the east, below which confluence the Colorado bifurcates and arrives along two independent courses at the head of the gulf.

Thornton, John

SHIRLEY 521 WHEAT I:63

NO DATE 25.1164

A new Map of the World According to M^r Edward Wright Commonly called Mercator's Projection. London: John Thornton. ("La Clark sculp.") [Ca. 1683.]

▶ "California", an island, is separated from "New Granada" by a strait (not labeled). On the eastern side of the strait is an embayment into which two simply drawn rivers enter separately. Of North America, only the coasts and notable rivers are delineated.

Thornton, Samuel

1700 25.1628

A New and Correct Mapp Of the World, According to M^r Edward Wright Commonly called Mercator's Projection With a View of the Winds and Variation. By Sam^l Thornton Hydrographer at the signe of England Scotland and Ireland in the Minories London.

▶ "California" is an island separated from "New Granada" by "Sea of Vermejo". Midway on the east side of the strait is a north-northeast trending, bilobed embayment. The north-northwest trending lobe receives a river, with two headwater forks, descending some distance from the north; the north-northeast trending lobe receives a river descending some distance from the northeast. Curiously, three labels appear aligned along the east coast of the strait, to the west of these rivers: "R. d. Anguchi, "Toucan", and "Coral", without decided indication to which features they belong. (Some distance south of these is "R. del Nort", descending from a large lake, following a south-southwest course to an embayment.) (Of additional interest on this map is "The Great River Missisipy", not far east from these rivers, that arrives at the northwest corner of "Bay of Mexico".)

Tillemon (S!) [Tillemon (Sieur de)] [Tillemon, Jean-Nicholas de]

WHEAT I:119 [credited to Nolin]

1742 25.1172

Le Nouveau Mexique appelé aussi Nouvelle Grenade et Marata. Auec Partie de Californie, Selon les Memoires les plus Nouveaux. Par le Pere Coronelli Cosmographe de la SS^{me}

Republique de Venise[.] Corrigée et augmentée Par le S^r Tillemon. Paris: Chez I. B. Nolin. [In French.]

The map carries the printed date "1742". Wheat (1957, Volume I, p. 211) comments, "On the Library of Congress copy of this map is a pencil notation '1680,' referring to the Corenelli map of which this 1742 map is a palpable copy." See also Coronelli (ca. 1685), ITEM NO. 25.30 (WHEAT I:66).

► Only the southernmost portion of "Isle de Californie" appears in the southwestern corner of the map, separated from "Nouveau Mexique" and "Nouvelle Espagne" by "Mer de Californie, ou Mar Vermejo". On the eastern side of the strait is a large, double-headed embayment, into which the larger head flows "Rio de Tecon" from the north. In between the two heads "Rio de Coral" independently reaches the strait from the northeast.

Tirion, Isaak

WHEAT I:148

1765 25.1177 **Kaart van het Westelyk Gedeelte van Nieuw Mexico en van California Volgens de laatste Ontdekkingen der Jesuiten en anderen. te Amsterdam by Isaak Tirion. MDCCLXV. [In Dutch.]**

► "California" is separated from "Nieuw Mexico" by "De Vermiljoen Zee". "Riv. Colorado of del Norte" is depicted between the head of the gulf and a point not far north of the confluence of "Riv. Gila" before passing off the top of the map.

Tramezini, Michaelis [Tramezzino, Michele]

SHIRLEY 97

1554 25.381 **[Map of the continents surrounding the Pacific Ocean.]** ("Cvm Privilegio Svmmi Pont et Senat Venet", "Michaelis Tramezini Formis M.D.LIIII.", "Ivlivs de Mvsis Venet", "in aes Incidit M.D.LIIII." [In Italian.]

► The North American continent is labeled "Novvs Orbis". The continuously narrow Californian peninsula (not labeled), is separated from "Nova Galitia" by a gulf labeled "Mar uermeia" at its northern end and, more prominently, "Golfo Nuovo" at its southern end. The peninsula is oriented north-northwest/south-southeast in its southern third, north-south in its northern two-thirds. It is barely connected to the continent by a narrow neck of land that is cut off to the north by a river, "R de peturan", coming from the east-southeast directly to the ocean (not labeled). The gulf dwindles to a point at its northern end. No river is portrayed there (except for the westbound "R de peturan" just noted). Only one river is shown entering the gulf, "R. de S. piero", from the east-northeast but is far to south, near the mouth of the gulf. Near the head of the gulf, on its eastern side, is the label "Pueblo di Michel" (apparently corrected from "Puedlo di Michel").

Turner, R. [Turner, Richard]

1798 25.504 **Nth. America.**

In: *A view of the earth: Being a short but comprehensive system of modern geography.* London: for G. G. and J. Robinson, 5th ed., 52 pp., maps, plates.

► See the map (facing p. 19) and pp. 19-20. The map depicts "G. of California" separating "California" from "Navarr". A single tributary enters the head of the gulf, but veers due eastward toward "Casa Grande" in "Granada or New Mexico" and thus may be correlated with the Gila River.

V

Valck, G. [Valk, Gerard]

1686 25.1385 **Mappe-monde Geo-Hydrographique ou Description Generale du Globe Terrestre et Aquatique en Deux-Plans-Hemispheres, ou sont exactement remarquées en General Toutes les Parties de la Terre et de l'Eau Suivant les relations les plus nouvelles, par G. Valck. [In French.]**

► On the map of "Amerique Septentrionale", the island of "Californie" is separated from "Nouveau Mexique" by "Mer Vermeille". Midway along the eastern shore of the strait is an embayment that receives two rivers (not labeled) from the north and northeast; the longer one, from the north, comes from a place labeled "R. coromeda".

MCLAUGHLIN 153

NO DATE 25.1800 **l'Amerique Septentrionale & Meridionale divisée [sic] en ses principales parties. ou sont distingués les vns des autres les Estats suivant qu'ils appartiennent presentement Francois, Castillans, Portugais, Anglois, Suedois, Danois, Hollandois. &c. In: Valck, Gerard, and Valck, Leonard, *Atlantis sylloge compendiosa . . . or Nova totius geographia telluris projectio*.

► "Isle de Californie" is separated from "Nouveau Mexique"/"Nuevo Mexico" by "Mar Vermeio ou Mer Rouge". Midway on the eastern side of the strait arrive the rivers (north to south) "R. de Aguchi" from the north-northeast, and, into a single embayment, "R. de Tecon" from the north-northeast and "R. de Coral" from the northeast. R. de Tecon has two headwater forks in the area where is labeled "Rey Coromedo".

Valk, Gerado, AND Valk, Leonardo [Valk, Gerard, AND Valk, Leonard]

MCLAUGHLIN 176

1710 25.1620 **America Aurea Pars Altera Mundi. Auctoribus Gerardo et Leonardo Valk. Cum Privilegio Ordinum Hollandiæ et West Frisiæ. [In Latin.]**

► The island, "California" (labeled "Nova Albion" in its northern part), is separated from "Nova Mexico" by "Mare Rubrum". Midway on the east side of the strait is a prominent north-northeast trending embayment, which receives at its head a river (not labeled) with two headwater branches. Another river (not labeled), with several tributaries to it, arrives from the east midway on the eastern side of the embayment.

Valk, Gerardum, AND Schenk, Petrum [Valk, Gerard, AND Schenk, Peter]

McLAUGHLIN 14 WHEAT I:49

- 1653 25.1279 **America Septentrionalis.** ("Amstelodami, Penes Gerardum Valk et Petrum Schenk.")
 [In Latin, with borrowed Spanish names.]
 Wheat (1957, Volume I, p. 194) notes, "This map was produced from the same plate as *1652-Jansson (48)*." (i.e., Ianssonius, 1652, ITEM NO. 25.1278).
 ▶ "Insula California" and "Nueva Granada" are separated by "Mare Vermio". On the eastern side of the strait is an embayment into which two rivers come independently: "R. del Tecon", which is a larger stream from the north, with headwater forks in a region labeled "Rey Coromedo"; and a smaller stream from the northeast, "R. de Coral", which comes generally from a region where "Pueblos de Moqui" is noted. Just north of this embayment "R. de Anguchi" flows directly into the strait.

Van Ewyk, Nicolas [Van Ewyk, Nicolaas]

- 1752 25.2401 **Nouvelle Carte de la Moitie Septentrionale du Globe Terrestre, montrant la Variation du Compas, ou le Merveilleux accord enchainé des mouvemens réglés et ne jamais cessans du vivant pourvoir Magnetique; telles qu'on les trouvez l'An 1750. tous dans un sens, tres exactement joints et unis ensemble dans leurs Raisons oposées par multitude d'Observations propres et autres, par Nicolas Van Ewyk; cy-devant Capitaine de Nayire au service de la noble Compagnie des Indes-Orientales des Pais-Bas Unis. servant de Lumiere tres util de la Navigation et de la Physique. à Amsterdam pour l'Autheur 1752, avec Privilege. /**

Alles in eene Zin, zeer Nauwkerig door Meenigruldige eigen, als andere Observatiën in haar overstaande Reeden te saam gevoegt, en vereenigt door Nicolaas Van Ewyk; wel eer Schip Heer in dienst der Ed: Oestindische Maatschappy, der Vereenigde Nederlanden. Zeer dienstig tot nuttig Licht der Zeevaart, en der Natuurkunde. te Amsterdam voor den Autheur 1752, met Privilege. [Map in French; titles in French and Dutch.]
 ▶ North polar projection. "R. del Coral" (Gila River) is labeled along the river's reach from the east, arcting to the southwest to the head of "Mer Vermeille". At the turn into that change of course a "tributary" river (not labeled, but which actually is the Colorado), arrives from the northeast from a region where "Quivira" is indicated as a place-name beyond mountains that lie north of "Santa Fé".

Vander Aa *see* **Aa****Vaugondy***see also* **Robert de Vaugondy (fils)** [Robert de Vaugondy, Didier]*see also* **Robert de Vaugondy, Gilles****Vaugondy (M. de)** [Vaugondy (Monsieur de)] [**Robert de Vaugondy, Didier**]

- 1772 25.1460 **Carte des parties nord et ouest de l'Amérique dressée d'apres les relations les plus authentiques par M... en 1764 Nouvelle édition réduite par M. de Vaugondy en 1772.** [Ellipsis thus.] ("Suppl 1^{re} Carte".) [In French.]
 ▶ The western coast of North America north of "Californie" runs sharply to the west-northwest across the Pacific Ocean; the land there is labeled "Grand Quivira". The peninsula, "Californie", is separated from "Nouvelle Navarre" by "Mer Vermeille". "R de los Apostolos" (Gila River) arrives at the head of the gulf from the east-

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

northeast; three of its headwater tributaries are labeled "R Azul", "R. Hila", and "R. S. Maria", with the Apostolos' principal headwater to the northeast at a lake labeled "L. des 7 Nations". "R. Colorado ot Totontoac" [*sic*] is shown on a course west of and approximately parallel to the main course of Apostolos and as a tributary to the latter. Downstream from that confluence, another river arrives from the northwest, with its two headwater branches labeled "R. Ticon ot Aza" [*sic*] and "R de Quivira".

- 1772 25.1654 **Carte Générale des Découvertes de l'Amiral de Fonte représentant la grande probabilité d'un Passage au Nord Ouest par Thomas Jefferys Géographe du Roi à Londres 1768.** ("Cette Carte a été traduite par M. de Vaugondy et gravée à Paris en 1772.") ("Suppl. 8^e Carte.") [*In French.*]
 A redrafting and translation of Jefferys (1768, *ITEM NO.* 25.1652).
 ► Displays a remarkable, even confusing, series of straits and rivers across the northern part of North America. The southeast corner of the map includes the northern part of Spanish "Nouv Mexique", to the latitude of a simply drawn east-west river (not labeled) that passes by "Casa Grande" (thus the Gila River), which at the bottom edge of the map meets the Colorado River (not labeled) that follows a mostly straight south-southwest course from an area labeled "Quivira". Just south of the confluence the Colorado passes off the map. East of the Colorado is the label "Moqui", and southeast from there, not far north of "Casa Grande", is the label "Zuni ou Cibola". On the bottom of the map, the corresponding area to the west that would be northern California is labeled "New Albion". (Although lower California and the Gulf of Mexico are not shown, by the geographical presentation of the confluence of the Colorado and Gila it is meant that California is a peninsula.)

Veléz y Escalante, Antonio

- 1777 25.602 **Derrotero hecho por Antonio Veléz y Escalante, Misionero para mejor conocimiento de las Misiones, pueblos de Indios y Presidios que se hallan en el Camino de Mon-terrey a Santa Fé de Nuevo Mexico. Laus deo Anno Domini 1777.** [*In Spanish.*]
MANUSCRIPT, Library of Congress, map collection, call number G4300 1777.V4, 1 sheet, pen-and-ink and watercolor; digitized online at <https://www.loc.gov/item/96686648/>. [*See also illustration in the front matter herein.*] *The map is likely the work of Bernardo de Miera y Pacheco.*
 • As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest.
 • Compare also the manuscript maps cited herein, by Garcés (1777, *ITEM NO.* 25.1045), Font (1777, *ITEM NO.* 25.1046; 1778, *ITEM NO.* 25.1047), and Miera y Pacheco (1777, *ITEM NO.* 25.1115; 1778, *ITEM NO.* 25.1048).
 As a result of varied citations made of these maps over the years, all are cited in this Cartobibliography with clarified information provided as closely as possible based on examinations of all of these maps and information with their catalog records.
 ► On this map is figured the first notation of what we know now as the Grand Canyon: "Puerto de Bucareli" is labeled at the confluence of Rio Colorado and Rio Jaquesita (*i.e.*, Little Colorado River). This earliest non-Indigenous name for the canyon was given by Padre Francisco Garcés in 1776 during his visit to the Havasupai, honoring the Viceroy of New Spain, Antonio María Bucareli y Ursúa. Garcés's journal was not published until 1900 (see Elliott Coues, *On the trail of a Spanish pioneer* [Francis P. Harper, New York, 1900]). See also as well the woodcut map by Manuel Villavicencio (1781, *ITEM NO.* 25.510), which, credited to Garcés and Font in 1777, likewise includes "Puerto de Bucareli" and which is the first printed map to include a name for the Grand Canyon.]⁴⁹

⁴⁹ Special note is made here that relates to other important manuscript holdings, in the Archivo General de Indias (Seville), that place this map in contemporary perspective (see in Chapman, Charles E., *Catalogue of materials*

Venegas, Miguel

- 1757 25.508 **Mapa de la America Septent-^l Asia Oriental y Mar del Sur Intermedio Formado sobre las Memorías mas recientes y exactas hasta el año de 1754.** ("Manuel Rodriguez, sculpst".) ("M.A.de 1756".) [In Spanish.]

Uyt het oorspronkelyk spaans van Miguel Venegas, Jesuit te Mexico, te Madrid in 't jaar 1758 uytgekomen, in't engels, en nu in 't nederduyts vertaald door J.J.D. . . .* Haarlem: G. Enschedé, 2 volumes in 1, 436, 375 pp. [In Dutch.]
- 1767 25.765 *Histoire naturelle et civile de la Californie, contenant une description exacte de ce pays, de son sol, de ses montagnes, lacs, rivières et mers, de ses animaux, végétaux, minéraux, et de sa fameuse pêcherie des perles : les mœurs de ses habitants, leur religion, leur gouvernement, et leur façon de vivre différens voyages, et tentatives qu'on a faites pour s'y établir, et reconnoître son Golfe et la côte de la Mer du Sud.* ("M. E**." [sic], translator.) Paris: Chez Durand, 3 volumes, 360 [and **MAP**], 375, 354 pp. [Howes gives dates of volumes as 1766-1767, but 1767 dates only given in volumes seen.] [In French.]
- 1769 25.766 *Natürliche und bürgerliche Geschichte von Californien : nebst einer neuen Charte dieses Landes und der benachbarten Meere. Aus dem Englischen übersetzt und herausgegeben von Johan Christoph Adelung.* Lemgo: Meyerschen Buchhandlung, 3 volumes in one (*Erster Theil*, 184 pp.; *Zweiter Theil*, 198 pp.; *Dritter und letzter Theil*, 176 pp.). [Howes gives date as "1769-[1770]".] [In German.]

Verbiest, Pieter [Verbist, I.] [Uerbist, I.]

- 1630 25.483 **Ampla et accuratissima universi orbis terrarum tabula geographica aucta et emendata auct. I. verbist. Antverpia: Sumptibus Petri ver bist.** ("Peter ver Bist sculpsit et excudit".) [In Latin.] SHIRLEY 338
 ► California is depicted somewhat awkwardly as an island. A tributary enters the eastern side of the strait near its midpoint, along which one label is "Cevola".
- 1636 25.485 **Nova totius terrarum orbis geographica ac hydrographi[ca] emendata auct. I uerbist. Antwerpiensis: Petri Ver bist.** [In Latin.] SHIRLEY 342
 ► California is depicted decisively as an island. The Gulf of California is a strait opening awkwardly into the interior of "America Septentrionalis". Tributaries are sparsely marked on the eastern side of the strait, and one label in the region is "Cevola".
- 1674 25.1592 輿坤 [read right to left] [Kunyu] [The whole earth]. [Peking.] [In Chinese.] MCLAUGHLIN 56
 Wood-cut blocks.
 Stanford University Library's Glen McLaughlin Map Collection of California as an Island indicates multiple states (including square brackets): 1) "Published in Peking, [1674]"; 2) "Published in Canton, 1856, possibly from new blocks"; 3) "Published in Seoul, 1860, by order of the King Cho Chou of Korea, probably from the 1856 blocks"; 4) "Published in the 1930s, probably in Seoul from 1856 blocks, but lacking decorative borders".

► California is depicted as an island. On the eastern side of the strait between it and the American mainland is an embayment that receives two rivers from the north and northeast; the former is more significant and displays two headwater forks; a label is adjacent to it, “德說河” [?], which is the name of a river (not determined here). Another, short river, also from the north, parallels it to the west.

Verhaer, Franciscus see **Haræi, F.**

Villasenor, Joseph, AND Sanchez

- 1754 25.1613 **Societatis Iesu In America Septentrionali pro Gloria Dei laborantis Sedium Jchnographia, Secundo Ignatio, A Primo Ignatio Conditore SS.^{mo} Decimo sexto Præposito Generali Ejusdem Societatis, A.R.P.N. Ignatio Vicecomiti, Diu desideratæ Mexicanæ Provinciæ divisioni, In Provinciam, et Vice-Provinciam, Humanissime annuenti Ann. 1754. D. C. O.** (“D. D. Joseph Villasenor, et Sanchez delin Ann. 1751.”) (“Ioannes Petroschi sculp. Romæ A. 1754.”) **[In Latin.]**
- Map of the province of New Mexico (not labeled) between “California” (the Baja peninsula) and the valley of the “Rio grande del Norte” (Rio Grande of the Gulf of Mexico) north of “Passo”. “Rio Colorado” reaches the head of the Gulf of California (not labeled) along a straight course from the north-northeast. Three islands are shown in the mouth of the river. “Rio Gila” is depicted disjointed, without headwater or confluence, to the east of the Colorado. Rivers and numerous missions are delineated throughout the region south of there, in “Pimeria”, “Sonora”, and “Cinaloa”.
-

Villavic^o, Manuel [Villavicencio, Manuel]

- 1781 25.510 (SCULPSIT) **Carta geographica de la costa, y parte de la peninsula de la California naciones que comprehende hasta el Nuevo Mexico, y viàge q’ hizieron Fr. Fran^{co} Garces, y Fr. Pedro Font al Rio Colorado[,] S. Gabriel, y Moqui el año de 1777.** [México]: [no imprint], 1 sheet, “Escala de 60 Leguas de à 5000. baras.” [scale ca. 1:9,000,000]. **[In Spanish.]**
- Notes found in descriptions of this map indicate that it may have been prepared for a book that was never published. This is the first map to portray the landscape of the entire lower Colorado River (with the expected geographical faults).
- Map labels the lands of Native American groups. “R. Colorado” is delineated up into present-day Utah, passing through a mountainous terrain in the vicinity of Grand Canyon. The river enters the Gulf of California (not labeled) at its northeastern head. The routes of travel followed by Padres Francisco Garcés and Pedro Font are delineated. Also of note is the label, “Puerto de Bucareli” at the confluence of “R. Colorado” and “R. Jaquesia” (Little Colorado River).
- This is the first *printed* map to label what later became known as the Grand Canyon. (The first manuscript map to note a name appears to have been the one specially cited herein as Veléz y Escalante (1777, *ITEM NO. 25.602*); and see also that map [illustrated in the front matter herein](#), Figure 11, INTRODUCTION p. 43).
-

Visscher, N. [Visscher, Nikolaus]

- NO DATE 25.1483 **Novissima et Accuratissima Totius Americæ Descriptio. per N. Visscher.** [Amsterdam.] (“t Eylandt dri Coningen”). (“Amplifimo Spectatmo Prudentissimo Domino. D. Cornelio Witsen I.V.D. Consuli et Senatori Urbis Amstelædamensis in Potentissimo Ordinum Generalium Consessu Deputato, ac Consilii Societatis Indicæ Occidentalis Assessori dignissimo, Tabulam hanc D.D. N. Visscher.”) [1660?] [In Latin.]
- The island, “California”, is separated from “Nova Granada” by a strait (not labeled). On the east side of the strait three rivers are received from the north: “R. de Anguchi”, and, independently into one embayment, “R. del Tecon” and “R. Coral”.

Visscher, N. Iō. [Visscher, Nikolaus]

- 1657 25.1482 **Noua America Descriptio Per N. Iō. Visscher Gerard Lollaii Exudit 1657.** [Amsterdam?] [In Latin.]
- Library of Congress catalog record notes, “Sheet issued as part of a set of 5 maps; one map covers entire world and 4 maps cover individual continents.”
- The western coast of North America, from the tip of the Baja Peninsula to high latitudes, runs continuously to the northwest. The peninsula, “California”, is separated from “Nova Granada” by “Mare Vermeio”. The head of the gulf is bulbous, into which five rivers flow: 1) a river from the northwest, which has two forks (the western fork is labeled “Axa flu”, coming from the north and to the west of which is the label “Tolm Reg”, and an eastern fork (not labeled) also from the north; 2) “Caramana flu” from the north (between these first two rivers is the label “tontontec”); 3) a river (not labeled) from the northeast; 4) “R. del. Aguada” from the northeast; 5) a river (not labeled) from the east-northeast.

Visscher, Nikolao [Visscher, Nikolaus]

- NO DATE 25.1410 **Orbis terrarum nova et accuratissima tabula. Auctore Nicolao Visscher.** (“N. P. Berchem invent.”) (J. de Visscher sculpsit.) [Amsterdam]: Nikolao Visscher. [1690?] [In Latin.]
- “California.” is depicted as an island, labeled in its northern part “Nova Albion”. It is separated from “Nova Granada.” by a strait (not labeled). On the eastern shore of the strait is a divided embayment that receives two rivers (not labeled) from the north; the northerly one has headwater forks by a place labeled “Rey Coromede”. “R. del Norto” (Rio Grande) is to the south of these rivers.

Visscher, Nikolaum Iō. [Visscher, Nikolaus]

- 1631 25.1116 **Americæ nova descriptio.** (“Abraham Goos, Sculpsit.”) [In Latin.]
- California depicted as a peninsula. At the head of “Mare Vermeio” converge three rivers, “Axa flu”, with headwater forks, from the northwest, “Caramara flu”, from the north (both of which come from an area labeled “Totontec”); and an unlabeled river, from the northeast. “Cevola” is marked not far north of the head of the gulf.
- NOTE:* The river “Caramara”, or “Coromara”, was assumed by contemporary geographers to be the same as that of Marco Polo’s river in China.

- WHEAT I:42
- 1636 25.1275 **Americæ Nova Descriptio Per Nicolaum Iō. Visscher. Anno 1636.** (“Abraham Goos, Sculpsit.”) [In Latin, with some borrowed Spanish.]
- ▶ The peninsula of “California” and “Nova Granada” are separated by “Mare Vermeio”. The head of the gulf receives three principal rivers (from west to east): “Axa flu” from the north and northwest, with an unlabeled tributary to it from the north, and near the gulf along this river is a place name, “Cevola”; “Caramara flu”, from the north and passing through an area labeled “Totontec”; and a river (not labeled) from the northeast (not far south of which is a river labeled “R. del Aguada”. The area between the rivers “Axa” and “Caramara” at the head of the gulf is labeled “Abacus nunc Granata”, and between “Caramara” and the unlabeled river to its east is the label “G de Caramara”. Between that third river and “R. del Aguada” to its south is labeled “Braco de Muchas Flores”.
- NOTE:* A cartographical device to suggest an area unexplored is the note of Brazos de Miraflores (more correctly written), which may imply a possible extension of the gulf that, upon continued exploration, would indicate that the gulf is in fact a strait.
- NOTE:* The river “Caramara”, or “Coromara”, was assumed by contemporary geographers to be the same as that of Marco Polo’s river in China.

Vischerius, Nicolaus Joannis [Vissherius, Nicolaus Ioannis; Vißcherius, Nicolaus Ioannis] [Visscher, Claes Janszoon] [Piscatore, Nicolaus Ioannis; Piscatore, Nicolaus Iohannide]

- SHIRLEY 294
- NO DATE 25.467 [No title.] Amstelodami. [Ca. 1617.]
- Exceptional border ornamentation in the form of historical, seasonal and occupational scenes.
- ▶ The Gulf of California is portrayed with tributaries entering at its head.
- SHIRLEY 288
- 1614 25.465 **Orbis terrarum typus de integro in plurimis emendatus, auctus, et icunculis illustratus.** Amstelodami. [In Latin.]
- ▶ “America Septentrionalis, sive Mexicana” displays the Gulf of California with tributaries running to its head.
- SHIRLEY 346 WHEAT I:44
- 1639 25.487 **Orbis Terrarum Typus De Integro Multis In Locis Emendatus Auctore N. I. Piscadore.** (“Tabellam hanc excudit, Amstelodami Anno 1639. Pieter Goos sculpsit.”) [In Latin, with shared Spanish names.]
- ▶ “California” is shown as an island. Midway along the eastern side of the northwest-southeast trending strait is a large north-south gulf labeled “R. d. Coral”, which at its head bifurcates as two rivers, the northeastern one sharing the name. Shirley (plate 263) illustrates the second state of this map (1st state, 1638). Wheat (Volume 1, p. 194) also indicates “French Reproduction, n.d.”
- 1652 25.1489 **Orbis Terrarum Typus de Integro Multis in Locis Emendatus. Auctore N. I. Piscatore.** (“Nicolaus Ioannis Vißcherius Tabellam hanc excudit Amstelodami Anno 1652 Pieter Goos Sculpsit.”) [In Latin.]
- ▶ The island, “California”, is separated from “Granada” by a strait (not labeled). Midway along the east side of the strait is a long north-south embayment—a gulf—that receives two rivers; the label “R. d. Coral” is written along the entire length of the gulf and the easterly of the two rivers, which flows from the northeast. The westerly river flows from the north-northwest from a place labeled “Rey Coromedeo”. To the east of this gulf is a place labeled “Pueblos de Moqui”.
-

Voisin, Lancelot du

SHIRLEY 148

- 1582 25.405 **Les Trois Mondes.** [map title]. [In French.]
In: Le Seigneur de la Popelliniere, *Les trois mondes*. Paris : L'Oliuier de Pierre L'Huillier.
 ► The North American continent labels "Totontec" and "Marata" occupy the region of interest to this Cartobibliography.
-

Vopelleus, Caspar [Vopell, Caspar]

SHIRLEY 73

- 1536 25.374 **Nova & Integra Universi Orbis. Descriptio.** Coloniae [Cologne]. [In Latin.]
 ► Three sections only of gores for a globe, depicting North America and "adjacent" Asia, and part of Central America. They depict the same arrangement as the gores cited for Anonymous (no date [ca. 1535] [ITEM NO. 25.373]), but with "Hispania Nova" immediately south and on the same land mass as "Asia Orientalis".
NOTE: This is one of two items selected for this Cartobibliography that were composed prior to 1539, when the Colorado River was first encountered by European explorers. See the front matter herein regarding the [earliest cited works](#) [INTRODUCTION p. 28] and the selection of pre-1539 items.
-

SHIRLEY 123

- 1570 25.394 **Nova et integra vniversalisque orbis totivs ivxta Germanam neotericornvm traditionem descriptio.** Antwerpiae: Bernardum Puteanum [Bernard van den Putte]. [In Latin.]
 ► The western portion of the North American continent appears similar to many other contemporary maps until one sees that to the north of "Hispania Nova" (in the area of Mexico) lie "Cathay R[egio].", "Asia Magna" and "India Orientalis" where would appear to be the western United States. Although numerous rivers come to "Mare Indicvm Avstrale" and "Mare Eovmre de Svr", the Gulf of California or the Baja peninsula are not discerned.
-

Vrient., Joachem Baptistam [Vrients, Jan Baptist]

SHIRLEY 192

- 1596 25.427 **Orbis Terræ Compendiosa Descriptio ex peretissimorum totius orbis Gæographorum operibus desumpta.** [In Latin.]
In: Linschoten, Jan Huygen van, *Itinerario, voyage ofte schipvaert, van Ian Huygen van Linschoten naer Oost ofte Portugaels Indien, inhoudende een corte beschryvinghe der selver landen ende zee-custen . . .* Amstelredam: Cornelis Claesz.
 ► An exaggeratedly broad North America is labeled across its central part, "Mexicana". Tributaries approach the head of the Gulf of California. Part of the region of interest to this Cartobibliography is labeled "Totontec".
-

W

Walton, Ro. [Walton, Robert]

- NO DATE 25.1643 **A New, Plaine, and Exact Map of America:described by N:I: Visscher, and don into English, enlarged, and Corrected, according to I:Blaeu, with the habits of the Countries, and the manner of the cheife Citties:the like never before.** ("Printed, Colered, and are to be sold

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

by Ro:Walton aty⁶Globe and Compass in S^t Paules Church yard between y^e two north doores".) [1660?]

► The island, "California", is separated from "New Granada" by a strait (not labeled). In the northern part of the east side of the strait are shown three rivers reaching the strait: "R d Anguchi" from the north, and, into a common embayment, "R d Tecon" from the north and "R d Coral" from the north-northeast. The river Tecon has two headwater forks.

Wassenaer, Nicolaus a [Wassenaer, Nicolaes van]

SHIRLEY 327

1661 25.480 [No title.] Amstelodami.

► California is depicted as an island. "Mar Vermeio" is a strait, to which numerous tributaries come from "Nova Granada" to the east. Most labels are illegible at the scale of reproduction in Shirley.

Shirley notes (p. 352), "Although dated 1661, the original plates of this six-sheet map were issued over thirty years earlier."

Wells, Edward

MCLAUGHLIN 142 [State 4]

NO DATE 25.1422

A New Map of North America Shewing its Principal Divisions, Chief Cities, Townes, Rivers, Mountains & c. Dedicated To His Highness William Duke of Gloucester. ("Delin. MBurg. sculpt. Univ. Oxon.")

In: Wells, Edward, *A new sett of maps both of ancient and present geography, wherein not only the latitude and longitude of many places are corrected, according to the latest observations; but also the most remarkable differences of ancient and present geography may be quickly discern'd by a bare inspection or comparing of correspondent maps; which seems to be the most natural and easy method to lead young students (for whose use the work is principally intended) unto a competent knowledge of the geographical sciences. Together with a geographical treatise particularly adapted to the use and design of these maps.* London: Printed for J. and J. Bonwicke, S. Birt, to Osborne, E. Wicksteed, and T. Cooper. ("Imprimatur, Gu. Paynter, Vice-Can. Oxon.") [1722.] [This map is no. "39" (printed beneath the cartouche).

► The "Golf of California or Vermilion Sea." separates the island, "California." from the area labeled "New Mexico or New Granada, Discovered about 1540, of a barren soil and little known.", to the north of which is a blank area labeled "Parts As Yet Unknown." About one-third of the distance from the southern end of the strait, on the eastern side, a single river (not labeled) descends to the gulf from the northeast. This is like the Rio Grande, as it heads to the north of the place marker for "S^t Fe or New Mexico." To the north of its mouth along the strait is an embayment, into which usually on maps of this time are shown rivers associated with the Colorado, but in this space is the remark about the "discovery" of New Mexico. (The "Meschasipi R." [Mississippi River] is shown entering the northwesternmost part of the Gulf of Mexico, with at its mouth "New French Settlement.")

McLaughlin indicates four states, 1700-1704, with reissues to 1722.

Wheat, Carl Irving

[cited here in Section 1 for his inclusion of maps of 16th–18th centuries]

Wiegel, Christoph (the elder)

MCLAUGHLIN 203

- NO DATE 25.1812 **Nova Tabula Americæ**. [Nuremberg.] [1725.] [In Latin.]
 ► The island, "California" (also labeled "Nova Albion" at its northern end), is separated from "Nova Granada" by "Mare Vermio olim Mare Rubrum". Midway on the eastern side of the strait are three rivers (north to south): an unlabeled river heading near "Lago d'Oro" arriving from the north; and, received into the head of one embayment, "R. de Tocon" from the north-northeast (with two headwater forks, one of which heads by "Rey Coromedo") and an unlabeled river from the northeast (which is noted on contemporary maps at Rio de Coral and similar spellings).

MCLAUGHLIN 204

- NO DATE 25.1813 **Nova Orbis Sive totius Americæ cum adiacentibus Insulis Nova exhibitio.** [Nuremberg.] [1725.] [In Latin.]

This is the same map as Wiegel (no date, ITEM NO. 25.1812) except for the revised title cartouche.

► The island, "California" (also labeled "Nova Albion" at its northern end), is separated from "Nova Granada" by "Mare Vermio olim Mare Rubrum". Midway on the eastern side of the strait are three rivers (north to south): an unlabeled river heading near "Lago d'Oro" arriving from the north; and, received into the head of one embayment, "R. de Tocon" from the north-northeast (with two headwater forks, one of which heads by "Rey Coromedo") and an unlabeled river from the northeast (which is noted on contemporary maps at Rio de Coral and similar spellings).

Wilkinson, R. [Wilkinson, Robert]

- NO DATE 25.1185 **A new Map of North America, agreeable to the Latest Discoveries.** [No imprint.] [Ca. 1790.]

► "California" is separated from "New Navarra" by "Gulf of California". "Rio Colorado, or North River" is shown entering the head of the gulf from the north-northeast. A tributary to it, from the east (the Gila River, actually) is labeled only on the principal portion of it that comes from the same general area as the headwater of the Colorado, labeled "Blue R." Below the confluence of the Colorado and "Blue" the river arcs to the south to reach the head of the gulf. Just to its east is shown a minor river paralleling the Colorado, coming from near the confluence area and reaching the gulf independently; it suggests a revision of the bifurcated portrayal of the lowermost Colorado often seen on contemporary maps.

See also Wilkinson (1794, ITEM NO. 25.1184).

WHEAT I:230

- 1794 25.1184 **A New Map of North America, agreeable to the Latest Discoveries.** ("London, Published Jan^y. 1st. 1794, by R. Wilkinson, N^o. 48, Cornhill." "T. Conder Sculp^t.")

This map is redrawn from that one shown by Wilkinson (no date [ca. 1790], ITEM NO. 25.1185).

► "California" is separated from "New Navarra" by "Gulf of California". "Rio Colorado or North R." is shown entering the head of the gulf from the north-northeast. A tributary to it, from the east (the Gila River, actually) is labeled only on the principal portion of it that comes from the same general area as the headwater of the Colorado, labeled "Blue R.". Below the confluence of the Colorado and "Blue" the river arcs to the south to reach the head of the gulf. Just to its east is shown a minor river paralleling the Colorado, coming from near the confluence area and reaching the gulf independently; it suggests a revision of the bifurcated portrayal of the lowermost Colorado often seen on contemporary maps.

Willdey, George

MCLAUGHLIN 199

- NO DATE 25.1808 **[Map of North and Central America.]** ("To his Sacred & most Excellent Majesty George by the Grace of God King of Great Britain France and Ireland &c. This map of North America (Corrected from the latest Discoveries and Observations) is most humbly Dedicated by his Majesty's most Obedient Subject & Serv^t George Willdey".) ("H. Ferasson, delin. et Fecit, London.") [1720.]

In: Modern geography; or all the known countries in the world ([London: John Senex] for T. Bowles & T. Bowles & son.

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► Lower California passes into the western margin of this map and off the map, but it is labeled "California I."; it is separated from "New Mexico" by "The Sea of California". Where the east coast of the strait passes off the map are two embayments, which at first glance make it appear that the sea is a gulf. "R. Anguchi" arrives in the western embayment from the northeast. "R. del Tisan" heads in an area labeled "Great Teguao" and arrives in the eastern embayment from the northeast; some distance from the sea it receives a significant tributary, "R de Buena Esperanca", from the east, which heads near several place markers of towns of "the Moqui". Into the seaward part of this eastern embayment arrives, from the east and southeast, a significant river system without label but which is labeled on a headwater tributary "R Sonaco or Hila"; midway along this river system "R Colorado" is depicted arriving from the northeast, with its own head south of "the Moqui" towns.

Wit, F. de [Wit, Frederick de]

MCLAUGHLIN 49

- NO DATE 25.1777 **Novissima et Accuratissima Totius Americæ Descriptio. per F. de Wit. Amstelodami.** ("F. de Wit excudit.") [Ca. 1670.] [In Latin, with publisher's information in Dutch.]
 ► The island, "California", is separated from "Nova Mexico" by "Mare Vermio olim Mare Rvbrvm". Midway on the east side of the strait are three rivers (north to south): "R. de Anouchi" from the north-northeast; "R. de Tecon" from the north (which has two headwater forks near "Rey Coromedo"), and, arriving in the same embayment as with Tecon, "R. de Coral" from the northeast.
- NO DATE 25.2084 **Nova Orbis Tabvla, in Lvcem Edita, A. F. de Wit.** [In Latin, with publisher's information in Dutch.]
In: Atlas. Amsterdam: Frederick de Wit. [Ca. 1682.]
 ► The island, "California", is separated from "Nova Granada" by a strait. Midway on the eastern side of the strait a bilobed embayment receives two streams from the north, the larger of which heads in an area labeled "Rey Coromedo".
- NO DATE 25.2165 **Novissima et Accuratissima Totius Americæ Descriptio. per F. de Wit. Amstelodami.** ("F. de Wit excudit.") [In Latin, with publisher's information in Dutch.]
In: Atlas. Amsterdam: Frederick de Wit. [Ca. 1682.]
 ► The island, "California", is separated from "Nova Mexico" by "Mare Vermio olim Mare Rvbrvm". Midway on the east side of the strait are three rivers (north to south): "R. de Anouchi" from the north-northeast; "R. de Tecon" from the north (which has two headwater forks near "Rey Coromedo"), and, arriving in the same embayment as with Tecon, "R. de Coral" from the northeast.
- NO DATE 25.1805 **Recentissima Novi Orbis Sive Americæ Septentrionalis et Meridonalis Tabula Per Fred. de Witt. Amst: cum Privilegio. ex Officina R.&I. Ottens.** [In Latin.]
In: Atlas minor sive geographia compendiosa in qua orbis terrarvm pavcis . . . Atlas nouveau, contenant toutes les parties du monde . . . Amsterdam: R. & J. Ottens. [1710?]
 ► The island, "California", is separated from "Nova Granada" by "Mare Vermio Mare Rubrum". Midway on the east side of the strait three rivers arrive: an unlabeled river from the north-northeast, "R. de Tecon" from the north (which has two headwater forks by "Rey Coromedo"), and an unlabeled river from the northeast; the latter two arrive independently at the head of a large embayment.
- 1660 25.1493 **Nova Totius Terrarum Orbis Tabula Auctore F. de Wit.** ("t Amsterdam by Frederick de Wit in de Calvertstraet inde [sic] Witte Paskaeret, 1660".) [In Latin, with publisher's information in Dutch.]

MCLAUGHLIN 178

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

► The island, “California”, is separated from “Granada” by a strait (not labeled) that is open to the north where the entire northwestern part of North America is blank. Midway on the east side of the strait is a prominent north-trending embayment—a gulf—that receives two short rivers (not labeled), the westerly one from the north-northwest heading by a place labeled “Rey Coromedo”; the easterly one, from the northeast, is labeled “R. d. Coral” along it and the entire length of the gulf. To the east is “Pueblos de Moqui”.

MCLAUGHLIN 24

1660 25.244

Nova Totivus Americæ Descriptio. Auct. F. de Wit. 1660. [No imprint.] [In Latin.]

► The island, “California”, is separated from “Nova Granada” by a strait (not labeled), which incidentally seems clogged with islands throughout its entire northern half. At the middle of the eastern side of the strait two rivers (not labeled) arrive; the principal one from the north, where its western headwater fork heads at a place labeled “Rey Coromedo”, and the more easterly one, shorter, from the north-northeast. To the east of these rivers is “Pueblos de Moqui”.

McLaughlin notes three states.

SHIRLEY 499

1680 25.1494

Nova Totius Terrarum Orbis Tabula, ex officina F. de Wit. Amstelodami. [In Latin.]

► “California Insvla.” is separated from “N. Grenada.” by “M. Vermeio”, which hosts a number of islands throughout its northern half. Midway on the eastern side of the strait is a single river (not labeled) arriving from the north and north-northeast, with headwater in a mountainous area north of “Acoma”. To the north of that mountainous area is labeled “Cibola.”

MCLAUGHLIN 59 [State 2]

1705 25.1778

Magnum Mare del Zur cum Insula California. \ De Grootte Zuyd-Zee en 't Eylandt California. (“Gedruckt 't Amsterdam by Frederick de Wit inde Calverstraet.”) [In Latin with title and publisher's information also in Dutch.]

Date from McLaughlin.

► A portalan chart of part of the Pacific Ocean. The island, “California”, is separated from “Nova Granada” by a strait (not labeled). Only the mouths of rivers are depicted. In the middle of the eastern side of the strait are (north to south) “R. de Anguchi”, “R. del Tecon”, and “R. de Coral”, the latter two arriving within the same embayment.

SHIRLEY 221

1599 25.441

[Map of the world with cartouche, “Diev et Mon Droit”.]

In: Hakluyt, Richard, *The principal nauigations, voyages, traffiques and discoveries of the English nation, made by sea or ouer-land, to the remote and farthest distant quarters of the earth, at any time within the compasse of these 1600 yeres: diuided into three seuerall volumes, according to the positions of the regions, whereunto they were directed. The first volume containeth the worthy discoveries &c. of the English toward the north and northeast by sea, as of Lapland, Scrikfinia, Corelia, the Baie of S. Nicolas, the Isles of Colgoieue, Vaigatz, and Noua Zembla, towards the great riuier Ob, with the mighty empire of Russia, the Caspian Sea, Georgia, Armenia, Media, Persia, Boghar in Bactria, and diuers kingdomes of Tartaria: together with many notable monuments and testimonies of the ancient forren trades, and of the warrelike and other shipping of this realme of England in former ages. VVhereunto is annexed a briefe commentary of the true state of Island, and of the northren seas and lands situate that way : as also the memorable defeat of the Spanish huge Armada, Anno 1588. The second volume comprehendeth the principall nauigations, voyages, traffiques and discoveries of the English nation made by sea or*

SECTION 1: MAPS OF THE 16TH–18TH CENTURIES

ouer-land, to the south and south-east parts of the world, as well within as without the Streight of Gibraltar, at any time, within the compasse of these 1600. yeres: diuided into two seueral parts, & c. London: George Bishop, Ralph Newberie, and Robert Barker.

Shirley (p. 238) notes that this untitled two-sheet map, “sometimes found in the second volume of Richard Hakluyt’s epic work”, has no imprint or acknowledgment, but which is “now reckoned to be the work of the mathematician Edward Wright”.

► Virtually the entire interior of North America (not separately labeled) is blank, with all geographic names lined up on the coastlines. The peninsula, with the label “C:California” presumably for the southern cape, is separated from “New Mexico” by an overly wide Gulf of California (not labeled), with numerous names written on its eastern shore only. At the head of the gulf is portrayed an exceedingly short reach of a single river, “R:grande”, entering the gulf from the north-northwest. To its west a principal embayment is labeled “B.Bermejo”. To its east is the label, “Totontec”. Notably, the label “Cibola” appears well to the southeast of these points.

Wytfliet, Cornelius à [Wytfliet, Corneille]

- 1597 25.264 **Vtrivsque Hemispherii Delineatio.** *In: Descriptionis Ptolemaicae augmentum, siue Occidentis notitia : breui commentario illustrata.* Louvanii: Tÿpis Iohannis Bogardi, 191 pp., plates, maps. [In Latin.]
- Map includes “America Sive India Nova” that displays an exaggerated Baja peninsula and Gulf of California with tributaries. The region of interest to this Cartobibliography is labeled “Totontec Reg.” There is no distinction between the gulf and the river that arrives at its head.
- WHEAT I:29
- 1597 25.2166 **Granata Nova et California.** [In Latin.]
- In: Descriptionis Ptolemaicae augmentum, siue Occidentis notitia : breui commentario illustrata.* Louvanii: Tÿpis Iohannis Bogardi, 191 pp., plates, maps.
- Map displays a gulf between “California” and “Granata Nova” labeled “Mar Vermeio” at its northern end and “Californiæ Sinvs” at its southern end. A large delta (depicted by mudflats?) is shown at the head of the gulf, into which a river flows from the north-northwest; that river has two forks, the western one labeled “Axa flu.”, the eastern one labeled “Totontec flu” that depicts “Cucho” at its headwater. Also depicted, to the east, is a major river that heads south from a large lake by “Septem ciuitatum Patria” and follows an arcing course to the west-southwest, passing en route “Ceuola” and “Granata”, reaching the northeastern corner of the head of the gulf, thus there conflicting with the Axa/Totontec river. This major river on many other contemporary maps is drawn to reach the southern part of the east side of a supposed Californian strait (where California is shown as an island); this river in fact supposedly being the Rio Grande (of the Gulf of Mexico). Somewhat confusingly, a narrow inlet is positioned between the mouths of these two rivers at the head of the gulf; the label “B. de buena guia” appears between it and Axa/Totontec, and “B. de Miralfloras” appears between it and the Rio Grande. Elsewhere, these two *brazos* are drawn to imply possible extensions of the gulf that, upon continued exploration, would indicate that the gulf is in fact a strait. However, these labels, so juxtaposed to two definite river systems, seem only to be uncorrected adoption of geographic names from other maps. Also, there is a third river (not labeled) that reaches the northwestern corner of the head of the gulf from the west, below the Axa/Totontec delta, having headwater to the northwest along a mountain range.

► The island, “California” (labeled at its northern end “Nova Albion”), is separated from “Nova Granada” by “Rubrum Mare avt[?] [*i.e.* aut?] Vermeio”. Midway along the eastern side of the strait is a large, east-northeast trending embayment that receives at its head two rivers (not labeled), one from the northeast, the other, a larger system, from the east-southeast. To the east of the headwaters of these rivers is a place southeast of “S Fe” labeled “Quaquiri”, though to the northeast is a place labeled “Quivira”.

SECTION 2

MAPS OF THE 19TH–21ST CENTURIES

(1801–present)

NOTES FOR SECTION 2

IN DESCRIBING MANY of the maps in this Cartobibliography I use some specific terminology that describes the reach of the Colorado River shown on a map—usually *starting* at the Gulf of California. This is because the headwater or other upstream areas depicted between maps vary greatly; their labels may geographically deviate on generations of maps; and the inclusion or omission of tributary streams likewise varies. Thus, the head of the gulf serves as a generally fixed reference point, so the geographic order of the narrative “goes against the flow” of the river.

As a historical reminder, maps of the “United States” prior to the 1848 Treaty of Guadalupe Hidalgo that ceded much of Mexico’s northwestern territory to the U.S. often omit the southwestern portion of North America.

Where the credit to the cartographer might differ significantly from the credit as given by others, I include either a notation or a cross-index to facilitate finding such works.

Largely absent from Section 2 are corporate specialty maps like the “free gas station map” distributed by oil companies mostly during the middle part of the 20th century, often produced with the cooperation of map-publisher behemoths—the ubiquitous Rand McNally for one. The compilation of such maps and the profuse number of their editions and variants would be a major project unto itself.⁵⁰

A large number of specialized railroad maps of the 19th century were commissioned by specific companies to promote their routes, both freight and passenger. These maps were produced by various engravers and printers; and even though the subject of the map is often not pertinent to this Cartobibliography, it is the base map used in the production that is described herein. The selection of such maps cited is representative and should not be considered to be a comprehensive list.

Regarding the cross-listings to “Wheat”, see separate [remarks](#) (INTRODUCTION *p.* 26). As for this Section 2, one will notice that a preponderant number of 19th century maps cited by Wheat are due to his broad historical focus on regions that are extralimital to THE GRAND CANON overall, such as those that relate to the Northwest boundary of the United States, the maps of the gold fields and mining regions especially of California, the Yellowstone region, and the Black Hills. Thus, many of Wheat’s citations do not appear herein.

An additional resource for detailed maps of small parts of towns and cities is the Library of Congress’s “Sanborn Fire Insurance Maps Online Checklist”, which “provides a searchable database of the fire insurance maps published by the Sanborn Map Company housed in the

⁵⁰ For a general historical introduction, see James R. Ackerman, “American Promotional Road Mapping in the Twentieth Century”, *Cartography and Geographic Information Science*, Vol. 29, No. 3 (2002), pp. 175-191.

collections of the Geography and Map Division. The online checklist is based upon the Library's 1981 publication *Fire Insurance Maps in the Library of Congress* and will be continually updated to reflect new acquisitions." It is accessible at <https://www.loc.gov/collections/sanborn-maps>.

Numerous geologic and topographic maps of parts of the region covered by this Cartobibliography may now be accessed online, most of which may also be downloaded. These are available through the U.S. Geological Survey's National Geologic Maps Database (sponsored by the USGS and the Association of American State Geologists), <https://ngmdb.usgs.gov>. This resource contains recent and legacy topographic maps (through topoView) from the 19th to 21st centuries. The geologic maps (through mapView) are those produced by the USGS as well as by various state agencies.

Historical note regarding the so-called “River of the Sulfurous Pyramids”. On numerous maps of the Southwest, originating with Alexander von Humboldt's influential 1811 map of New Spain (see under [Humboldt](#) in this Section), there often appears some variant or translation of the peculiarly named “River of the Sulfurous Pyramids”—for example, “Rio de las Piramides Sulfureas”, “R. de los Pyramides Sulfurcas” [*sic*], “R. de Pyramides”, and “R. Pyramid”, even the remarkably butchered “Rio de los Panami des surfurcas”. This is a name derived from the 18th century Spanish cartographer Bernardo de Miera de Pacheco, who had accompanied the Domínguez–Escalante Expedition of 1776 and whose manuscript map(s) (see [Miera y Pacheco](#) in Section 1) were among those that Humboldt had relied upon when he was in Mexico. The name is a corruption, as masterfully explained by C. Gregory Crampton, “Humboldt's Utah, 1811” (*Utah Historical Quarterly*, v. 26, no. 3 [July 1958], pp. 269-282):

“They crossed over the rim of the Great Basin and descended Ash Creek along the Hurricane Cliffs until they reached the Virgin River, called by them the Rio Sulfureo, or Sulphurous River, for they discovered or were near the mineralized La Virken Hot Springs at the mouth of Timpoweap Canyon. The Virgin (a later Spanish name—Virgen) appears as the *Rio de las Piramides Sulphureas*, a corruption on the Humboldt map of one of the names Miera applied to the Virgin. But the term Miera most frequently uses is the Rio Sulfureo de los Piramides, or the Sulphurous River of the Pyramids, and from a study of his maps it is clear that the word pyramid is intended to describe the mountainous towers and temples to the east of the trail at this point and to the north of it as they headed back toward New Mexico. This may be regarded as the first description of the intricately carved escarpments peculiar to the southern exposures of the High Plateaus of Utah which find classic expression in Zion National Park and Monument not far from the Spanish Trail of 1776.” (p. 275)

One example, selected from the citations herein to introduce the confused geographical relationships of the River of the Sulfurous Pyramids, is that shown in the 1825 school atlas in German by Johann Ruhle von Lilienstern (ITEM NO. 25.1216, under “R. v. L.”). Paralleling the “Colorado fl” (Colorado River) to its west, depicted by a mostly dotted line beginning north of the latitude of the San Juan River, is a river labeled on its upper reach and drawn

with a solid line, “R. de los Pyramides Sulfurcas” [*sic*], and on its lower reach shown with a dotted line labeled “Martires fl” (*i.e.*, the mythical River of the Martyrs); this river then arcs south and southeastward to enter the upper western side of the Gulf of California, depicted only at its end by a short solid line. Other maps are even more confused; some of them show this same, combined river running off to the Pacific Ocean on California’s coast, or the “pyramid” river as an orphaned stream without clear headwaters or confluence with a receiving river; further, the so-called River of the Martyrs is usually drawn as a separate river. Of course, many of these relationship simply repeat (or sometimes tweak) information displayed on preexisting maps; and given the poor geographical knowledge of a good portion of the Southwest, these depictions were not really intended to show precision, despite the advertising efforts claims of the commercial ateliers.

Colorado River Mile 0. By convention, mileages on the Colorado River are measured today both up- and downstream from the U.S. Geological Survey’s stream gauge near Lees Ferry (see a detailed historical and technical overview by Topping *et al.*, 2003⁵¹). However, due to the methods of tying together the surveys of the upper Colorado (1921) and lower Colorado (1923)—see in this Cartobibliography Birdseye and Gerdine, 1922, **ITEM NO. 10.122**, and Birdseye, 1924, **ITEM NO. 10.119**, respectively—there is a gap of 0.63 mile between the two respective Mile 0 points, as shown here (from Birdseye, 1924, Sheet A); this may be called “Mile Null”, or, more drolly, the “world’s shortest mile”.

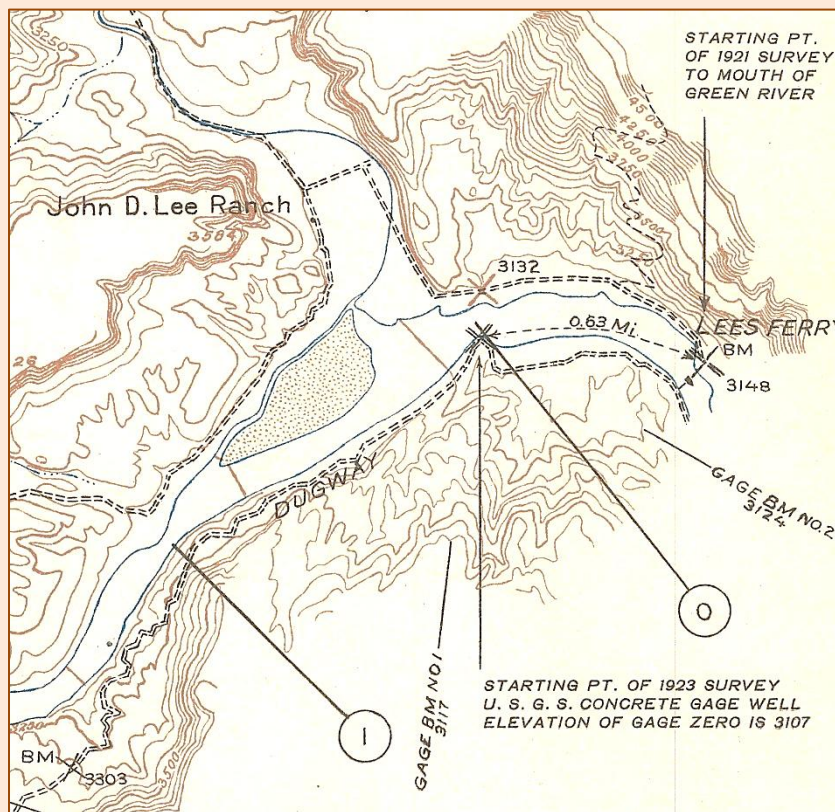

Figure 26

⁵¹ David J. Topping, John C. Schmidt, and L. E. Vierra, Jr., 2003, Computation and analysis of the instantaneous-discharge record for the Colorado River at Lees Ferry, Arizona—May 8, 1921, through September 30, 2000. *U.S. Geological Survey, Professional Paper 1677*, 118 pp.

Egloffstein, Dutton, and Matthes: A Bibliographical Review of Pioneer Mapping of Grand Canyon

THREE MEN, neatly a generation apart, provided the most significant, pioneering maps of the Grand Canyon.

Friedrich Wilhelm von Egloffstein (1824–1885) delineated the first map of the canyon (1861), stunningly embracing its entire extent but later widely discussed for its improbable depiction of the main portion of the canyon (see [Figure 27](#) [p. 248] herein). The shortcomings are not the tricks of geographical invention but because he was not able to properly survey the territory during a relatively brief dash across the northern tier of New Mexico Territory in 1858; in fact, he never saw the eastern Grand Canyon. Egloffstein also delineated a number of scenic views taken during the expedition, which also have been the subject of discussion. The effort was nonetheless masterful. (John Strong Newberry had produced the first geological map of the Grand Canyon region using Egloffstein’s map as a base, also published in the 1861 report of the Ives expedition, but the geology thereon is superficial.) (See also herein the section on the [Egloffstein model](#) of the Grand Canyon map and later variants [p. 247 and following].)

Clarence Edward Dutton (1841–1912) is acclaimed for producing the magnificent *Atlas* that accompanied his *Tertiary History of the Grand Cañon District* (1882), which includes the first comprehensive geological maps for the canyon.

François Émile Matthes (1874–1948) surveyed most of the eastern portion of Grand Canyon in 1902–1903 on plane tables to produce the first large-scale topographical map quadrangles. Particularly well known to generations of geologists and map enthusiasts is the Bright Angel quadrangle, which with later-produced geological maps of the quadrangle are used to this day in introductory geology courses.

The citations below are gathered from Volume 1/Part B of [THE GRAND CANON](#).

C. E. Dutton

Numerous contemporary notices and abstracts of Dutton’s *Tertiary History* (1882) will be found in Parts 2 and 21 of [THE GRAND CANON](#) Volume 1/Part B (Bibliography); and reviews of Dutton’s publication as well as later reprintings will be found in Part 30. Some of the contemporary notices are by prominent American and European geologists and geographers of the day. Many of these likely take note of Dutton’s maps, although the citations in Volume 1 do not generally indicate the content of those notices. A few citations of specific interest are included in the list below.

The Egloffstein Model and Variants

(Examples 1861–1885)

IN 1858, the Colorado River Exploring Expedition commanded by Army lieutenant Joseph C. Ives ascended the Colorado in a small, purpose-built steamboat from the Gulf of California nearly to where today is Las Vegas Wash in the lower Lake Mead area. A land expedition set out from Beale's Crossing, which reached the Grand Canyon (descending to the Colorado River on Peach Springs Wash and again at Cataract Creek where a descent to the river was aborted). The cartographer of the expedition, Friedrich Wilhelm von Egloffstein, produced the first fairly accurate maps of the lower Colorado River and (less reasonably) the Grand Canyon region. The maps were published in Ives' formal report, a U.S. congressional document, in 1861. The Grand Canyon map is largely conjectural in the central and eastern parts of the canyon because it was impossible for the explorers to reach the Colorado River nor the geographically significant confluence of the Little Colorado River. They never saw the main, now world-famous, part of the South Rim.

Egloffstein's delineation of the Colorado and its tributaries in the Grand Canyon region became the standard model for years. Accordingly, various reinterpretations of these relationships appeared on maps, even stubbornly long after the more definitive explorations made by John Wesley Powell on the Colorado River in 1869 and again on the river 1871–1872 and afterward on the adjacent plateaus to the north. Powell's river expeditions produced no published maps for the river course, but his years-long geological and geographical surveys on the High Plateaus did finally generate accurate area maps at least at small scales (generally 1:250,000). The course of the Colorado was firmly established by Powell's surveys, as was also the geographical position of the Little Colorado confluence (though as yet still not astronomically pinpointed), facts that were not always conveyed on newer, commercially produced maps.

▲ **Figure 27. Egloffstein, F. W. von [Egloffstein, Friedrich Wilhelm von] 1861 Map No. 2. Rio Colorado of the West, Explored by 1st Lieut. Joseph C. Ives, Top. Eng.^{rs} under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Capt. Top. Eng.^{rs} in charge, by order of Hon. John B. Floyd, Secretary of War. 1858. drawn by Fr^{hr}. F. W. v. Egloffstein. Topographer to the Expedition. Scale of 12 miles to one Inch or 1:760320. In: Ives, Joseph C., *Report upon the Colorado River of the West, explored in 1857 and 1858 by Lieutenant Joseph C. Ives, Corps of Topographical Engineers, under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Captain Topographical Engineers, in charge. By order of the Secretary of War.* Washington, D.C.: U.S. Government Printing Office. (Volume: *U.S. 30th Congress, 1st Session, House Document 90, Serial 1058.*) (Spamer 25.944)**

This map is well known for its highly conjectural depiction of the greater Grand Canyon region. It served as the authoritative, standard model for some time. *Big Cañon of the Colorado* is labeled prominently. *Colorado Plateau* is labeled on the south side of the Colorado. Notably, *Cataract Creek* is a tributary to *Little Colorado or Flax River*, which in turn reaches the *Colorado River* nearly at longitude 113° W. At the Little Colorado confluence the main Colorado is depicted arriving from the northeast, although that course is shown only a short distance before it fades into unmapped territory to the north. A short distance northeast of the confluence of *Diamond River* a prominent tributary (not labeled) arrives from the northwest; this is Parashant Canyon. Between the Colorado and the Parashant tributary the features of the plateau are labeled *North Side M^{ts}*.

Next three pages (Figures 27A–C): Details of the central and eastern Grand Canyon areas, and of the confluences area of the Little Colorado River, Cataract Creek, and Colorado River (on which note the labels for “Cataract Creek” and “Yampais Village”).

Figure 27A. Detail of the central Grand Canyon area. The confluence of *Diamond River* (*Diamond Creek*) is shown at bottom center. Just upstream from there, the awkwardly drawn open space is the *Parashant Canyon* area (on the north side), as it might be interpreted in distant views from the south-side plateau. The noticeable thin lines on the south side are the routes traveled by the Ives expedition in 1858, which Egloffstein accompanied.

Some later cartographers have forced the *Colorado River*, in its course from Utah, into the *Parashant Canyon* position, even though Egloffstein displays the *Colorado* arriving from the northeast to reach the supposed confluence of the *Little Colorado River*. The *Little Colorado* is seen in this detail (*see also further details on the next two pages*) arriving from the southeast, turning to the southwest and receiving the tributary *Cataract Creek* from the southeast, before continuing west-southwest to its confluence with the main *Colorado*. Some later cartographers retained Egloffstein's course for the *Colorado* coming from Utah. They occasionally retained the *Parashant Canyon* tributary (but never labeled it separately), while other times they eliminated it altogether.

Figure 27B. Detail of the Diamond Creek–Parashant Canyon area. The noticeably bulbous space is the confluence area of Parashant Wash; its openness is exaggerated by the cartographer not having filled in the intricate canyon walls there while superimposing a landscape of faint, narrowly spaced tributaries. The generalities of the open space is a topographical interpretation likely influenced by long, horizontal sight lines from the plateau.

In addition to the dashed lines of the routes of the Ives expedition, note the solid line delineating a supposed *Ind[ian]. trail* between *Diamond River* and an undefined minor Colorado tributary independent of the nearby *Cataract Creek* (no doubt it was meant to join with the *Yampais Village*; see next page).

Figure 27C. Detail of the confluences of the Little Colorado River, Cataract Creek, and Colorado River (on which here note the labels for *Cataract Creek* and *Yampais Village*, the latter being the village of the Havasupai tribe known today as Supai). The stream arriving from the northeast is the Colorado River; the one from the east is the Little Colorado River; and Cataract Creek (labeled) from the southeast. All of these interpretations by Egloffstein were the result only of distant views, not on detailed ground-based surveys except on the west side of Cataract Creek. What he interpreted as the Little Colorado River coming from the east and southeast was in fact the main Colorado; the stream from the northeast possibly mismapped as an extension of Kanab Creek. The Ives expedition never saw the easternmost part of the Grand Canyon, nor the actual Little Colorado confluence, the definitive location of which remained unknown until John Wesley Powell's first Colorado River expedition of 1869. The crenulated system of tributaries is conceptually stylized rather than precise.

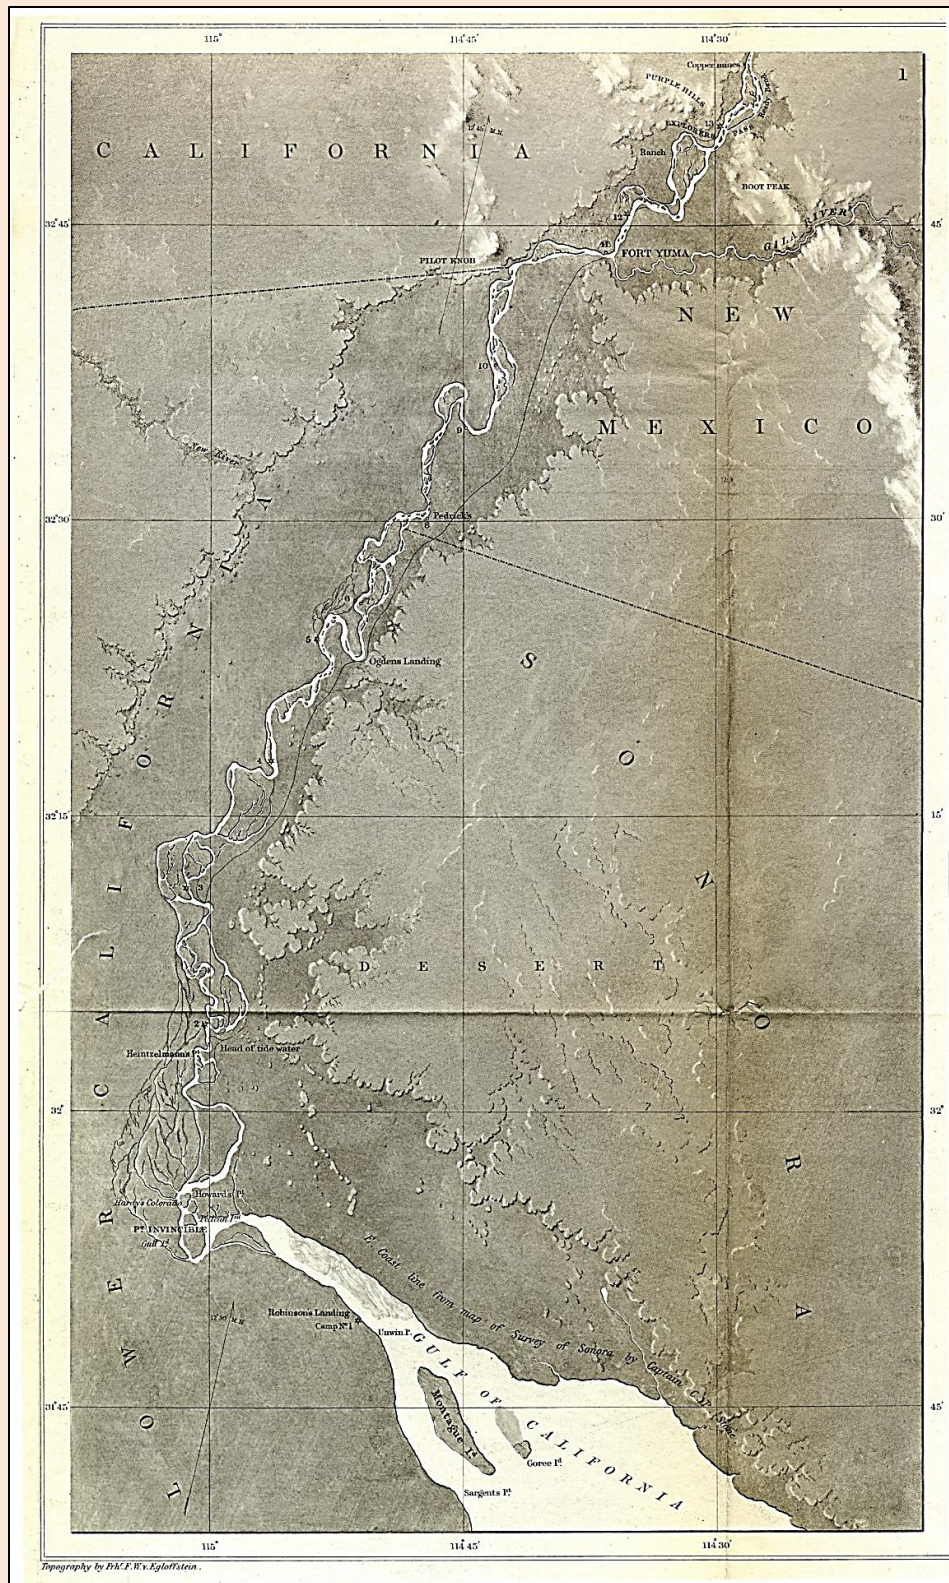

▲ ► **Figure 28. Egloffstein, F. W. von [Egloffstein, Friedrich Wilhelm von] 1861 Map No. 1. Rio Colorado of the West, Explored by 1st Lieut. Joseph C. Ives, Top^l Eng^{rs} under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Capt. Top^l Eng^{rs} in charge, by order of Hon. John B. Floyd, Secretary of War. 1858. drawn by Fr^{hr} F. W. v. Egloffstein. Topographer to the Expedition. Scale of 6 miles to one Inch or 1:380160. In: Ives, Joseph C., *Report upon the Colorado River of the West, explored in 1857 and 1858 by Lieutenant Joseph C. Ives, Corps of Topographical Engineers, under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Captain Topographical Engineers, in charge. By order of the Secretary of War.* Washington, D.C.: U.S. Government Printing Office. (Volume: *U.S. 30th Congress, 1st Session, House Document 90, Serial 1058.*) (Spamer 25.493)**

This map (four panels on one sheet) depicts the region bounding the Colorado River between its mouth in the Gulf of California (left panel) and the head of navigation, in the vicinity of where today is Hoover Dam. The course of the river is very well displayed, including the intricate channeling of the delta region (*see Figure 28A*).

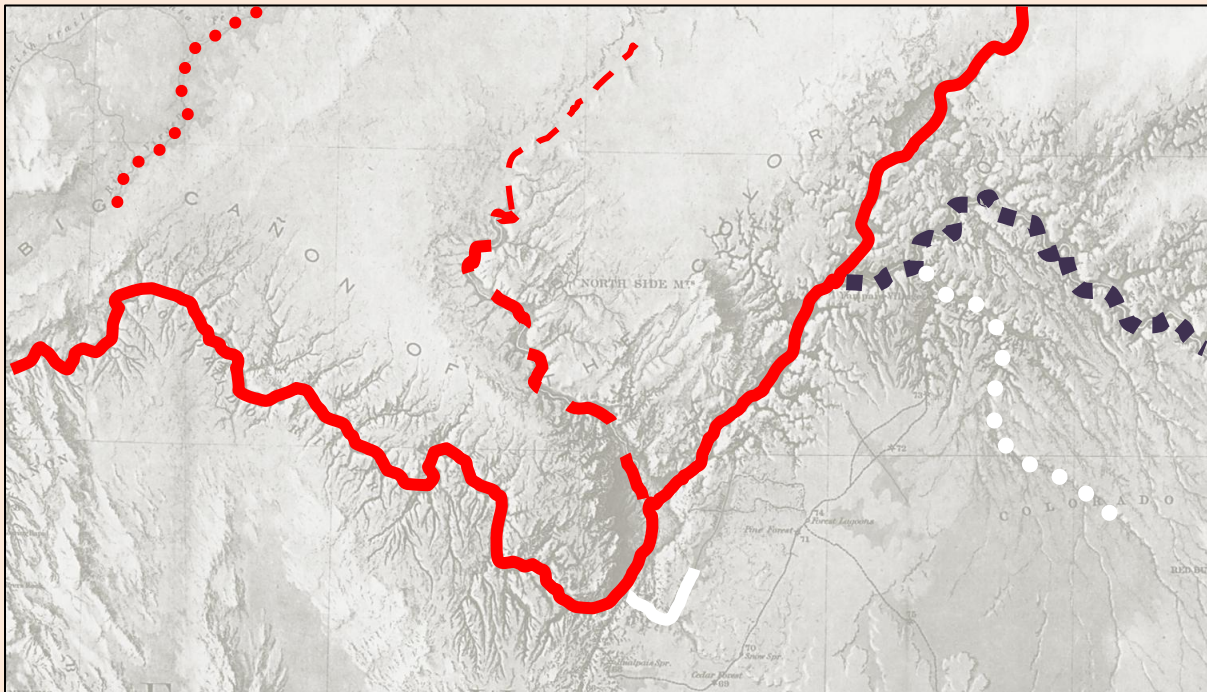

“Map No. 1” shows the river corridor along its north–south axis; “Map No. 2” (*Figure 27*) shows the Grand Canyon region east–west; the division is at the so-called Great Bend of the Colorado, where the river’s course below the confluence of the Virgin River transitions from west to south.

DIAGRAMS OF THE EGLOFFSTEIN MODEL

Earle Spamer

Figure 29

Egloffstein Model (Original)

Solid red line = Colorado River.

Long-dashed red line = Parashant Canyon tributary, on some Egloffstein map variants implied to be the course of the Colorado River (see Figure 30), omitted or modified on others. (The dashed line is made narrower where Egloffstein's projected course is more conjectural.)

Short-dashed dark purple line = Little Colorado River.

Large-dotted white line = Cataract Creek.

Solid white line = Diamond Creek.

Small-dotted red line = Virgin River. (The confluence area was not interpreted by Egloffstein because the Ives Expedition had not reached that part of the river.)

Figures 29 and 30 are designed to unambiguously convey this information also when reproduced in monochrome format.

SECTION 2: MAPS OF THE 19TH-21ST CENTURIES

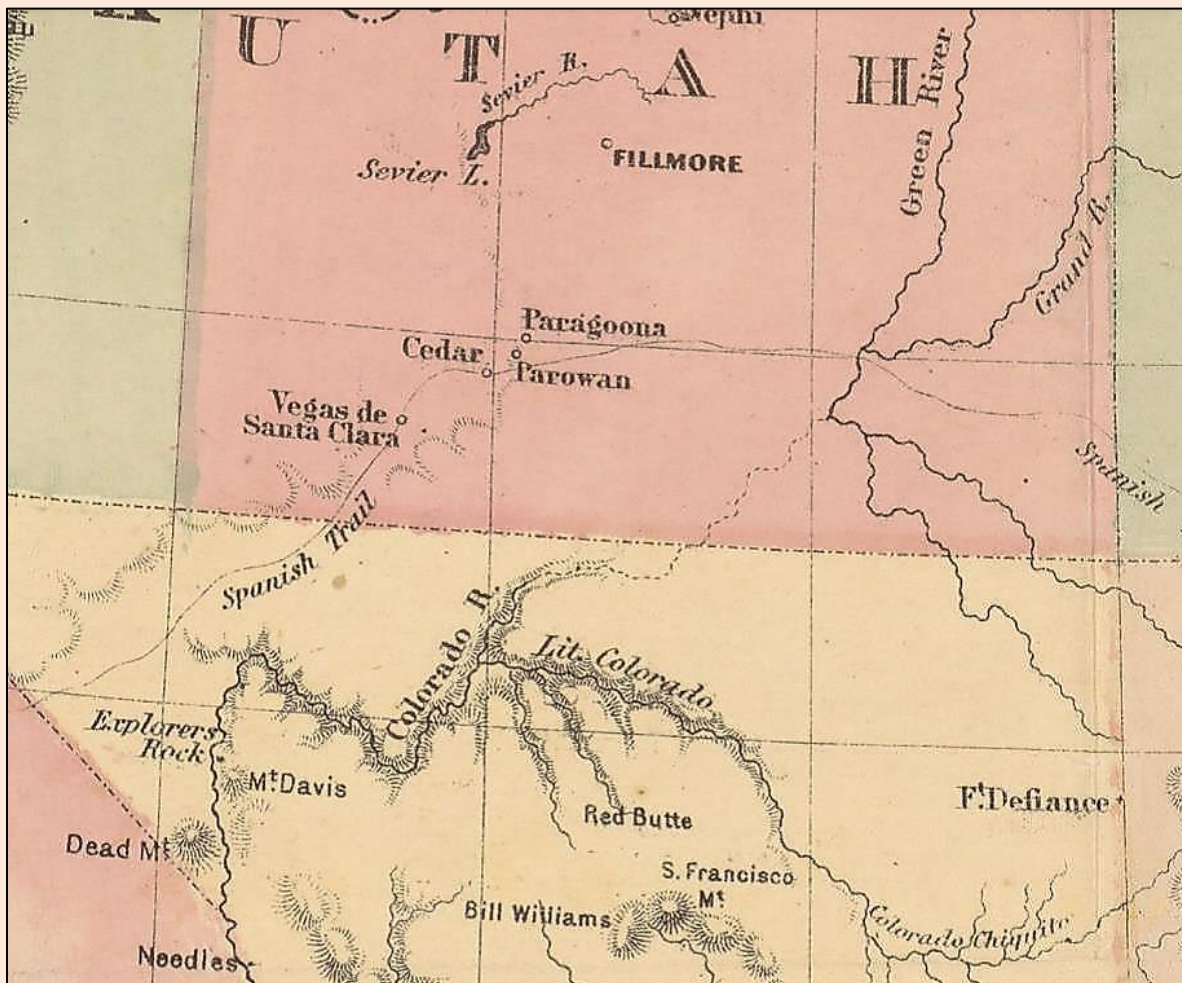

◀ ▲ **Figure 31. Colton, J. H. [Colton, Joseph Hutchins] 1865 Colton's Map of California, Nevada, Utah, Colorado, Arizona & New Mexico. Published by J.H. Colton 172 William St. New York. In: Colton's general atlas, containing one hundred and eighty steel plate maps and plans, on one hundred and eight imperial folio sheets, drawn by G. Woolworth Colton. Letter-press descriptions, geographical, statistical, and historical, by Richard Swainson Fisher. New York: J. H. Colton Co., and London: Bacon and Co. (Spamer 25.1703)**

This is a remarkable confusion that, influenced by the Egloffstein map and in some measure “filling in” the unknowns of that map, do not even closely follow Egloffstein’s suggested courses, while boldly forcing the Colorado through Egloffstein’s Parashant Canyon route (refer to **Figure 27** and details).

In its lower course the Colorado River is labeled *Rio Colorado*; from the confluence of *Grand River* and *Green River* through *Big Cañon of the Colorado* it is labeled *Colorado River*. Downstream from the Grand–Green confluence, the Colorado’s course is southwestward, but before reaching the Utah–Arizona boundary it turns due west, eventually turning southwestward again to cross the boundary due north of the mapped *Cataract Cr.* confluence. Then it turns southeastward (through the Parashant Canyon route) to a point north-northwest of the *Diamond Cr.* confluence, thence turns south-southwest to Diamond Creek and west-northwest to the confluence of *Virgin River* at *Head of Navigation* above the confluence of *Rio Vegas* (Las Vegas Wash) and the head of *Black Cañon*.

Colorado Chiquito River (Little Colorado River) follows a northwestward course before turning sharply to the southwest, receiving *Cataract Cr.* at *Yampais Vill.* where it turns briefly northwestward where it receives a tributary (not labeled) from the northeast (a Kanab Creek extension?). From that point it turns southwestward to its confluence with the Colorado, at the point aforementioned north-northeast of the Diamond Creek confluence.

▲ ► **Figure 32. Goldthwait, J. H. [Goldthwait, Jonathan H.] 1865 Map of the Territories & Pacific States to accompany "Across the Continent" by Samuel Bowles.** *In:* Bowles, Samuel, *Across the continent: A summer's journey to the Rocky Mountains, the Mormons, and the Pacific States, with Speaker Colfax.* By Samuel Bowles, Editor of *The Springfield (Mass.) Republican*. Springfield, Massachusetts: Samuel Bowles and Co.; New York: Hurd and Houghton. [Except for the map, this book is extralimital to this cartobibliography.] (Spamer 25.1251)

Below the confluence of *Green River* and *Grand R.*, the *Colorado R.* follows a southwestward course to the confluence of what probably is the San Juan River. Beyond this juncture the Colorado's course is delimited conjecturally by a dashed line, turning westward once the Utah–Arizona boundary is crossed. It then aligns on Egloffstein's supposed course that comes to the confluence of the *Lit. Colorado River* (also labeled *Colorado Chiquito*) in what is actually the central Grand Canyon. The Colorado, between a point north of the Little Colorado confluence and the great bend, as well as the lower course of the Little Colorado and unlabeled tributaries to it, is demarcated by hachures to indicate encanyoned reaches.

▲ ► **Figure 33. Hartley, William B. [1865?] Hartley's map of Arizona from official documents. Office 32 Pine St. N.Y. [No imprint.] (Spamer 25.50)**

Rio Colorado comes into Arizona following the Parashant Canyon route, labeled *Canon of the Colorado R.* about where Egloffstein placed his banner label, passing to the west of the *North Side Mts.* to reach the confluence of *Little Colorado R.* Egloffstein's own interpreted Colorado River course, coming from the northeast to the confluence of the Little Colorado River near *Yampas Village* on the unlabeled Cataract Creek, is reduced to a meager tributary to the Little Colorado, which may be an interpretation of an extension of Kanab Creek. Farther downstream on the Colorado, still on a southerly course before turning westward, is the confluence of Diamond Creek (not labeled) and the notation *Hualpais Village* (Peach Springs).

▲ ► **Figure 34. U.S. Army Corps of Engineers [Corps of Topographical Engineers] 1867 Old Territory and Military Department of New Mexico compiled in the Bureau of Topog! Eng^{ES} of the War Dep! chiefly for military purposes under the authority of the Secretary of War 1859 Partially revised and corrected to 1867.** (Spamer 25.97)

With some embellishment, the wholly conjectural course of *Rio Colorado* is southwest along a lightly dotted line from Utah to strike the confluence of *Flax River* (Little Colorado River) according to Egloffstein's conjectured confluence area. Egloffstein's Parashant Canyon tributary is inexplicably extended with implied certainty into Utah, its upper course paralleling the Colorado. From *Diamond R.* (Diamond Creek) the Colorado's course continues, there labeled *Colorado River*, mostly northwestward to the confluence of *Rio Virgen* (Virgin River) below which on its southerly course it becomes definitive in light of the data from the Ives expedition. *Big Cañon of the Colorado Riv.* is labeled just about where Egloffstein's prominent banner label is placed on his map.

▲ ► **Figure 35. Lloyd, J. T. [Lloyd, James T.] 1868** Lloyd's Topographical Railway Map of North America, or the United States Continent in 1900 J.T. Lloyd, Publisher {New York 23 Cortland St. {London, 83 Fleet Street 1868. ("Entered according to Act of Congress in the Year 1865 by J. T. Lloyd, in the Clerks Office of the District Court of the U. S. for the Southern District of New York.") ("Scale of Map $83\frac{1}{4}$ Miles to an inch or 1:5,274,720 of Nature.") [Regarding the title, Phillips notes, "Giving 1900 as the possible date for the completion of certain railroads, etc." (Phillips, P. Lee, *A list of maps of America in the Library of Congress preceded by a list of works relating to cartography* [Washington: Government Printing Office], p. 610).] (Spamer 25.2009) **[See also Figure 40.]**

Rio Colorado is delineated from the confluence of *Green Riv.* and *Grand R.* to the gulf. En route it receives *Rio San Juan* from the east and shortly later *Rio de Chelly* from the southeast before turning to run westwardly north of the Arizona-Utah boundary. It eventually turns southwest and southeast to reach the confluence of *Colorado Chiquito or Flax* (Little Colorado River) along the Parashant Canyon route. The Little Colorado, as with Egloffstein's interpretation, receives *Cataract Cr.* shortly before reaching the main Colorado.

The *Yampais Village* place marker is mispositioned at the Cataract–Little Colorado confluence. Opposite that point an unlabeled tributary from the northeast, which is on Egloffstein's projected course of the Colorado from Utah, may be a misinterpreted extension of Kanab Creek.

Just downstream from the supposed Colorado–Little Colorado confluence is the confluence of another tributary (not labeled, Diamond Creek) from the southeast, where *Hualpais Vil* (Peach Springs) is misplaced at that confluence (Diamond Creek's course is virtually occluded by the "Hualpais Vil" label). In the western Grand Canyon another tributary (not labeled) arrives from the south, which would be the "Yampais Creek" (or similar name) of other contemporary maps.

Detail is in grayscale and unsharpened to better read the labeling. Note that “Head of Navigation” is placed at the Virgin River confluence.

▲ ► **Figure 36. Freyhold, Edward 1868** Head Quarters Corps of Engineers. War Department. Territory of the United States from the Mississippi River to the Pacific Ocean: Originally prepared to accompany the Reports of the explorations for a Pacific Railroad Route; Made in accordance with the 10th and 11th sections of the Army Appropriation Act of March 3rd 1853; Compiled from authorized explorations and other reliable data by Lieut. G. K. Warren, Top'l. Eng'rs, in the Office of Pacific R.R. Surveys, War Dept. under the direction of Bvt. Maj. W. H. Emory, Topl. Eng'rs, in 1854. Capt. A. A. Humphreys, Top'l. Eng'rs. in 1854-1858. Recompiled and redrawn under the direction of the Chief of Corps of Engineers by Edward Freyhold 1865-66-67-68. ("Engraved & printed by Julius Bien, N.Y.") (Spamer 25.347, Wheat V:1185)

The course of *Rio Colorado* is depicted from the confluence of *Green River* and *Bunkara River* (Grand River); in the upper course the Colorado is labeled *Rio Colorado Grande*. From the *Supposed junction of the Rio Colorado & Flax Riv.* [Little Colorado River] to near *Wallapi Valley* (Hualapai Valley) the Colorado is depicted conjecturally by a dashed line, to the north of which, to *Rio Virgin*, is blank on this map. On the south side of the river in the Grand Canyon area are two tributaries that are shown heading toward the Colorado: *Lava Cr.* and *Parke Cr.*; on other maps these are shown as tributaries to one or the other, or a single tributary, that is *Cataract Creek*. The *Little Colorado* is depicted flowing northwestward to the Colorado. [It is this map that John Wesley Powell likely had available prior to his 1869 Colorado River expedition (*vide* Richard Quartaroli).]

Compare Freyhold, 1869 (**Figure 38**).

▲ Figure 36A. Freyhold, Edward 1868 (*greater and enhanced detail*)

This image is digitally enhanced to accentuate the faintly suggested course of the Colorado River downstream from the *Supposed junction of the Rio Colorado & Flax Riv.* It clearly borrows from Egloffstein's map by including the routes followed by *Lt. Ives* in 1858 and *Sitgreaves* in 1851, but it noticeably departs from the Egloffstein model by plotting the Little Colorado confluence at about where it should be and in eliminating Egloffstein's Parashant Canyon tributary. In fact, it omits everything north of the Grand Canyon's South Rim, with the river's course conjecturally shown by a dotted line, despite some of Egloffstein's features (Parashant Canyon among them) really being more or less accurate.

From this it is additionally clear why this map was likely of special interest to Powell by its suggestion of a reasonable course for the Colorado through the Grand Canyon, based as it was on Egloffstein's observations in the Diamond Creek area and some more general understandings from other sources about the courses of the Colorado and Little Colorado as they approached the Grand Canyon. The map (see previous page) correctly portrays the Little Colorado's course, with, at either end of the Grand Canyon, the Paria River (not labeled) and the *Rio Virgin–Muddy River* contribution.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

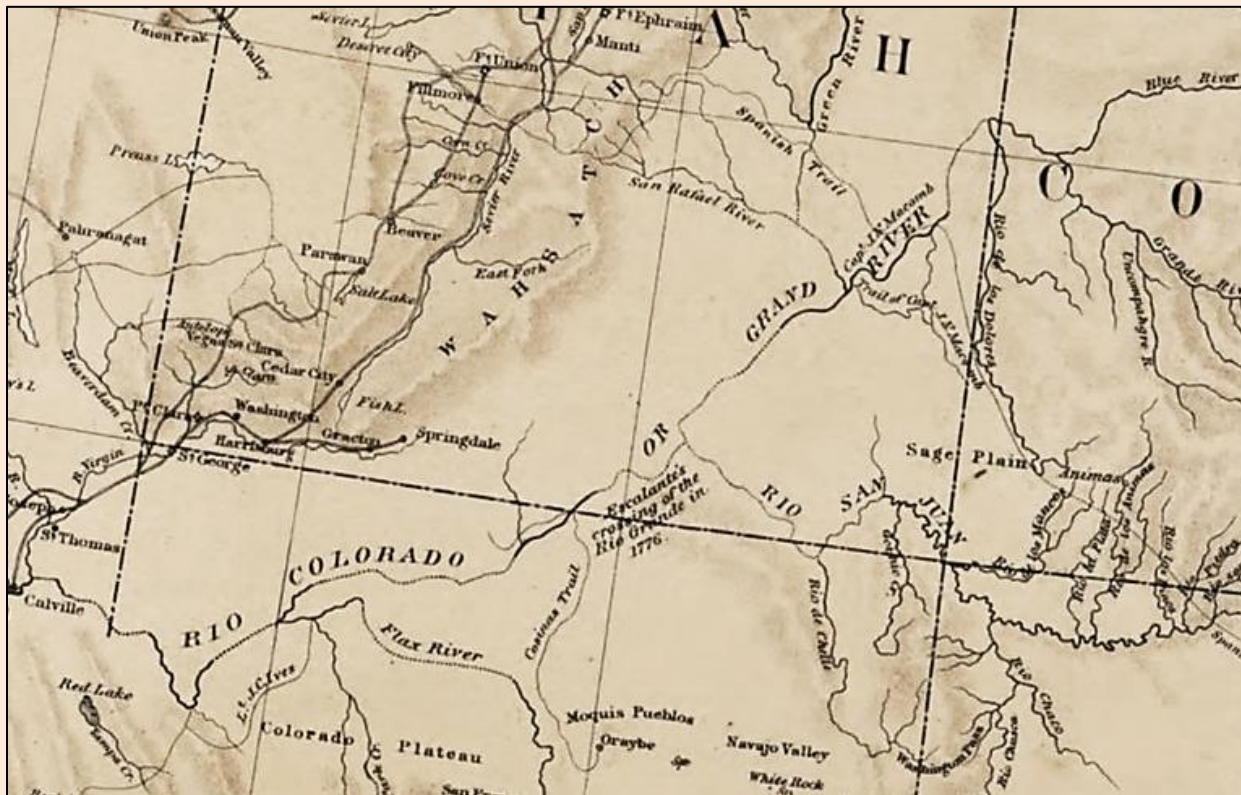

◀ ▲ **Figure 37. Palmer, William J. [1868] Map of the Route of the Southern Continental R.R. with connections from Kansas City Mo.,] Ft. Smith Ark. and Shreveport La. Giving a general View of the Recent Surveys of the Kansas Pacific Railway Co., across the Continent Made in 1867 & 1868. under the direction of Gen. W^m. J. Palmer. On the Routes of the 32nd and 35th Parallels.** [First state.] *In: Report of surveys across the continent, in 1867-'68, on the thirty-fifth and thirty-second parallels, for a route extending the Kansas Pacific Railway to the Pacific Ocean at San Francisco and San Diego. By Gen. Wm. J. Palmer. December 1st, 1868.* ("J. F. Gedney Lith, Washington. D.C.") [First state of this map. Even though the volume has been indicated to have been first available in 1869, it is clear that the map had already been produced by 1868.] (Spamer 25.600)

This is the first map to display the "Grand Canyon" name, specifically as *Grand Cañon of the Colorado River* (so labeled between the confluences of *Rio San Juan* and *Rio Virgen*). The Colorado River is labeled *Rio Colorado* on its lower course, and as *Colorado River* between the confluence of the Virgin River and the confluence of the *Green River* and *Grand River* upstream.

The course of the Colorado in the western Grand Canyon region is reasonably like that as now known, but between there and the Green-Grand confluence it runs mostly southwesterly, reflecting the influence of Egloffstein's map, and specifically Egloffstein's intended course of the Colorado from Utah to the Little Colorado River confluence, with *Cataract Cr.* a tributary to the Little Colorado. Downstream from there, in the western Grand Canyon, is a river (not labeled) with an arc-shaped course from southwest around to southeast before striking the Colorado, which is the Parashant Canyon interpretation from Egloffstein's map, though it heads in Utah.

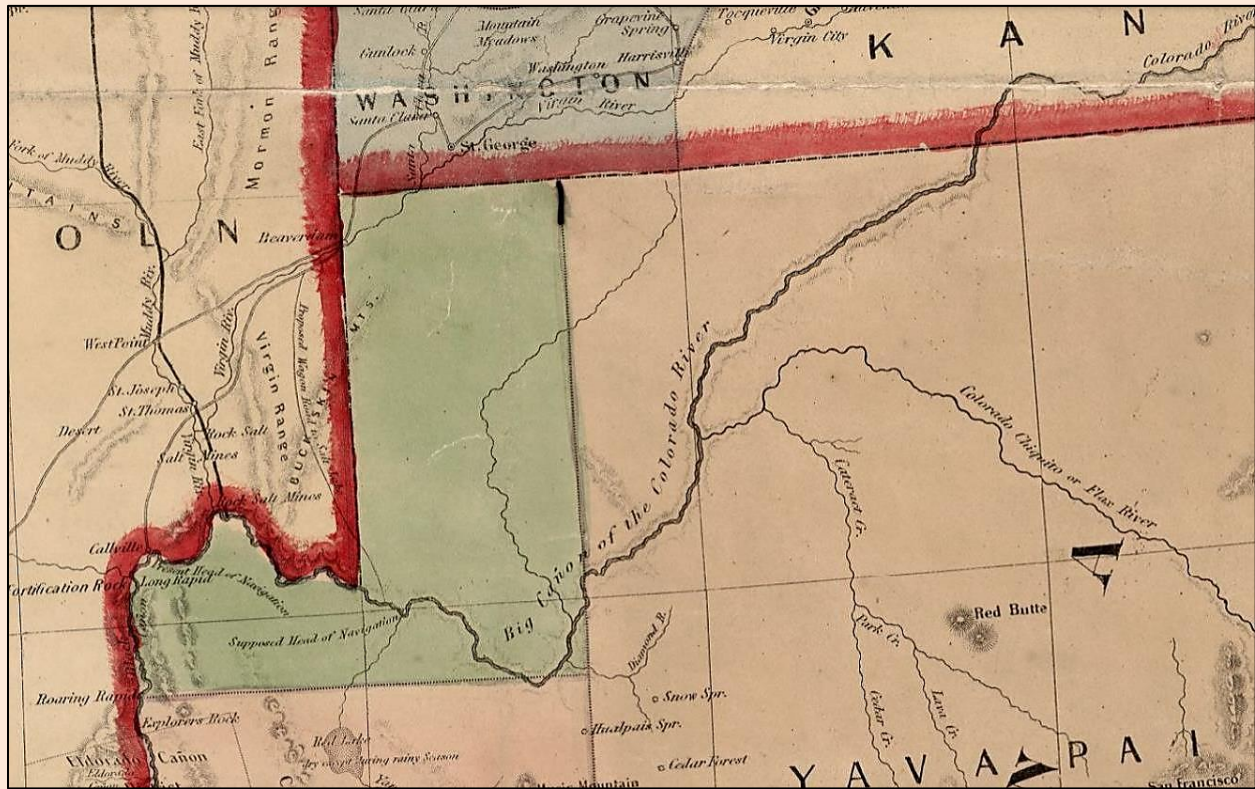

▲ **Figure 38. Freyhold, Edward 1869 Office of the Chief of Engineers War Department Military Map of the United States compiled and drawn by E. Freyhold 1869.** (“Engraved & printed by Julius Bien, N.Y.”) (“Note. In the compilation of this map the Authorities designated on the map of the Western Territories as well as others of more recent date have been used.”) (Spamer 25.1535)

The course of *Rio Colorado* or *Grand River* is labeled on the area that is the canyon regions of northern Arizona and southeastern Utah. The course is depicted conjecturally by dotted lines, except for 1) a reach around the confluence of *Green River* and what actually is the *Grand River* (labeled farther upstream *Grande River*), 2) around the confluence of the *Paria River* (not labeled), 3) a reach around the confluence of *Flax River* (*Little Colorado River*), and 4) a reach around the confluence of *Diamond Creek* (not labeled).

The *Little Colorado* (part of its lower course marked by a dotted line) reflects Egloffstein’s geography, meeting the *Colorado* from the east in the central part of where the *Grand Canyon* is situated, and which shortly before it meets the *Colorado* receives from the southeast *Cataract Creek* (not labeled, but on one of its headwater forks is labeled *Park Cr.*). The *Parashant Canyon* tributary of Egloffstein is absent.

Between the *San Juan* and *Little Colorado River*, the unlabeled small tributary is the *Paria River*. Crossing the *Paria* is an Indian route, *Cosinas Trail*, also confusingly labeled and mispositioned, “*Escalante’s crossing of the Rio Grande in 1776.*”

Compare Freyhold (1868) (**Figure 36**), which is, at least with respect to the stream courses, closer to reality.

▲ **Figure 39. A. L. Bancroft and Co. 1871 Bancroft's, Map of California, Nevada, Utah and Arizona, Published By A. L. Bancroft, & Comp^y. Booksellers & Stationers San Francisco Cal. 1871.** ("Engraved & printed by Julius Bien, N.Y.") ("Note. In the compilation of this map the Authorities designated on the map of the Western Territories as well as others of more recent date have been used.") (Spamer 25.1249, Wheat V:1219)

Colorado River comes from off the map on the east (not shown in this detail). *Big Cañon of the Colorado River* is labeled between the confluences of *Colorado Chiquito or Flax River* and *Virgin River*. *Cataract Cr* is a tributary to the Little Colorado, with headwaters labeled as *Park Cr.*, *Lava Cr.*, and *Cedar Cr.* A tributary (not labeled) reaches the Colorado from the north in the mid-canyon area on the Parashant Canyon track, with headwater nearly at the Utah boundary. The Colorado follows the route implied by Egloffstein.

▲ **Figure 40. Lloyd, J. T. [Lloyd, James T.] 1871 Lloyd’s Topographical Map of America 1871 Projected by J.T. Lloyd E. Lloyd, Publisher {New York 30 Cortlandt St. {London, 83 Fleet Street. (“Entered according to Act of Congress in the Year: 186[illegible] by J. T. Lloyd, in the Clerks Office of the District Court of the U. S. for the Southern District of New York.”) 4 sheets. (Spamer 25.1884)**

This is a reprinting of Lloyd (1868; see *Figure 35*), an example of retitling a map for other purposes.

▲ **Figure 41. Powell, J. W. [Powell, John Wesley] 1878 Department of the Interior[,] U.S. Geographical and Geological Survey of the Rocky Mountain Region[,] J. W. Powell, in charge. Map of the United States exhibiting the grants of lands made by the general government to aid in the construction of railroads and wagon roads. 1878[.] For explanation see chapter on “Land Grants in aid of Internal Improvements”[.] (The base chart was engraved for the Statistical Atlas of the United States.)** *In:* Powell, J. W., Report on the lands of the arid region of the United States, with a more detailed account of the lands of Utah. *U.S. 45th Congress, 2nd Session, House Executive Document 73.* (U.S. Geographical and Geological Survey of the Rocky Mountain Region.) (Spamer 25.1254, Wheat V:1290)

This reused map is a very peculiar choice for Powell, years after his own explorations on the Colorado River and mapping the adjacent parts of the Colorado Plateau. The Colorado River is not labeled in its lower course but appears as *Rio Colorado* or *Grand River* on its upper course (*as shown here*). Not only is the Grand Canyon not labeled, but the river course through the region is depicted on a more or less northeast–southwest course and is shown alternately with solid and conjecturally dotted lines. The Little Colorado River (not labeled) is shown as a tributary to the Colorado in the central Grand Canyon region, with Cataract Creek (also not labeled) a tributary to it, which follows Egloffstein’s interpretation. Cataract Creek and the lower part of the Little Colorado are shown with solid lines, although a portion of the lower part of the Little Colorado upstream from the confluence is depicted by a dotted line.

The shaded area delineates the land-grant area for the Atlantic & Pacific Railroad, with 40- and 50-mile boundaries approximately paralleling the route.

◀ **Figure 42. Vallardi, Ant. 1885 America Settentrionale 1885 Stabto. dell' Editore Ant. Vallardi Via Sta. Margherita, 9. Milano G. B. Paravia e C. Torino-Roma-Milano-Firenze.** (Spamer 25.2089)

This astonishingly outdated, confused, rather imaginative Italian map is included with the Egloffstein variants only by reason of a vague correlation to that geographical style; but beyond that, it is peculiarly unique, a contributing source thus far not identified for this presentation.

The course of *Rio Colorado* is shown from the confluence of *Green R.* and *Bear R.* to *Golfo di California o Mare Vermiglio o Mare di Cortez* (Gulf of California or Vermilion Sea or Sea of Cortez). From that confluence the Colorado's course arcs from south to southwest, then turns south again to cross the *Utah–Nuovo* Messico boundary, receiving no tributaries in this reach.

Some distance into what today is Arizona, the Colorado turns westward, at which point is the confluence of a tributary from the east. Just a short distance to the east along this tributary is the place-name *Oribe* (*i.e.* Oraibi, one of the Hopi pueblos), seemingly badly positioned at the confluence of *R. S. Gió*. (San Juan River, which comes from the east-northeast) and an unlabeled river from the southeast (surely the Little Colorado River). (Note that on this map there is also a *R. S. Gioachimo*, a headwater branch of a major tributary to *R. S. Gió*.; that major tributary is itself not labeled.) The reach of the Colorado tributary between *Oribe* and the Colorado is not separately labeled, thus ambiguous, although it seems reasonable that it is a continuation of the Little Colorado. The entire region northeast of the confluence at *Oribe* is labeled *Grande Deserto* (Great Desert), an additional peculiarity given that the one-time Grand Desert label was applied to the sparingly watered western plains.

In this case the geography in the immediate area is reminiscent of Egloffstein's, with perhaps the Parashant Canyon interpretation for the Colorado's course, though inexplicably the already well-mapped western-Grand Canyon course of the Colorado to the great bend area is wholly ignored. From the Parashant confluence the Colorado instead arcs from west to southwest, continuing without much deviation from an arc to the south then to the south-southeast in order to reach the gulf.

The Virgin River does not appear on this map, but *Rio Gila* is a tributary to the Colorado about where it should be in relation to the gulf.

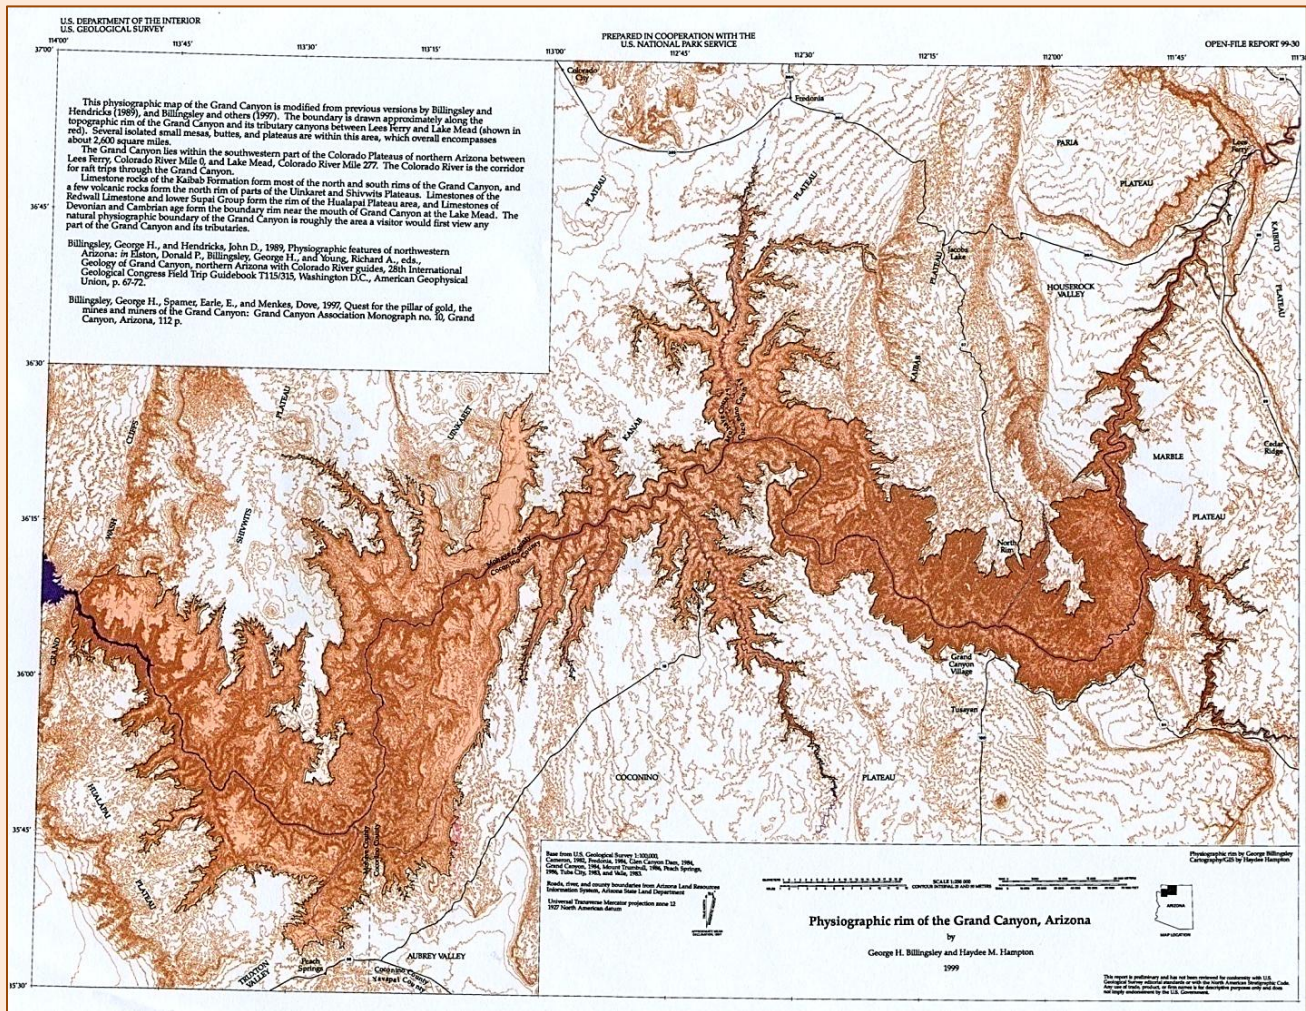

Figure 43. George H. Billingsley and Haydee M. Hampton, **Physiographic Rim of the Grand Canyon, Arizona**, U.S. Geological Survey Open-File Report 99-30 (1999), scale 1:250,000, contour intervals 25 and 50 m. <https://pubs.usgs.gov/publication/of9930> (last accessed 3 January 2025)

Not a typical topographic or geological map, but one uniquely Grand Canyon. The physiographic rim is interpreted along both sides of the canyon, from Lees Ferry (on the Northeast) to the Grand Wash Cliffs (on the West), embracing Marble Canyon (from Lees Ferry nearly to the Little Colorado River that enters from the Southeast) and Grand Canyon. The rim is plotted not along lines of equal elevation as like topographic contours but along what can be construed as the “edge” of the canyon. While the precise “edge” may be subjectively defined in some areas, where the rim is not immediate and precipitous, this map nonetheless for the first time displays the true figure of the canyon without respect to definitions of political geography or to stylistic generalities that cause imprecision. By convention, the two sides of the canyon, separated by the Colorado River, are called the North Rim and the South Rim.

Note that the physiographic rim also runs along the rims of significant tributaries, the most prominent ones of which are Kanab Creek (on the North), the Little Colorado River (on the East), and Cataract/Havasu Creek (on the South). The mappers, though, had not indicated the lengths of the two rims as drawn on the map. These were later measured by Susan S. Priest (U.S. Geological Survey) using ArcInfo data points from Billingsley and Hampton’s data set. The crenulated north side measures 1,384 miles along the rim contour. Despite the great asymmetry between the two sides, the south side is astonishingly a nearly identical 1,373 miles. (Data were first sent from Billingsley to Spamer in 2010. These figures were included in a publication by E. E. Spamer, “What Lies Behind the Grand Canyon?”, *Annals of Improbable Research*, Vol. 16, no. 5 [September/October 2010], cover, 1, 6-10.)

The George Billingsley Maps

“Just because the Grand Canyon has been mapped does not mean it’s all done.”

Billingsley, quoted by Naomi Lubick (2005)

NO GRAND CANYON CARTOGRAPHER has accomplished more than George H. Billingsley. During his tenure with the U.S. Geological Survey in Flagstaff, Arizona (retired 2012), and afterward, he published 277 geologic maps of areas in the general region of interest to this Cartobibliography. These were published between 1976 and 2019, nearly all of them by the USGS. (He worked on some maps outside of this area, too, which are omitted here.) Most of these were produced as sole or lead author; just 14 of the maps listed here note Billingsley as an author other than lead.

While Billingsley’s later work embraced the assistance of those who produced digital publications, for which he handed off his essential mapping work to them, most of his maps were done the long-established way, with surveys in the field followed by office work on paper at a drafting table. Much of his field work was conducted by driving to remote parts of the Arizona Strip or on lands of the Navajo Nation. Other work was carried out in equally remote areas, including sites inside the canyons reached by helicopter or by boat on the Colorado River. Even so, as Lubick quotes him, “I have not been everywhere.” The style of his mapping, I have observed, one can visually identify even amidst the work of others—and at a distance, no less.

Doubtfully anyone will surpass Billingsley’s output, certainly with boots-on-the-ground fieldwork coupled with drafting table figuring and drawing. Such productivity demands that a separate cartobibliography for his Grand Canyon regional fieldwork be presented here.

For some biographical and professional background on George Billingsley, see the following print and online resources (*all URL hyperlinks last accessed 12 December 2024*):

Billingsley, George

- 2018 My experience as a seasonal park ranger at Havasu Campground in Grand Canyon National Park, 1970. *In*: Quartaroli, Richard D. (compiler, ed.), *Celebrating 100 years of the National Park Service, November 2016 : a gathering of Grand Canyon historians : ideas, arguments, and first-person accounts*. Grand Canyon, Arizona: Grand Canyon Association, pp. 64-71.

Billingsley, George, AND Steiger, Lew

- 2011 George Billingsley. *Boatman’s Quarterly Review*, 24(1) (Spring): 1, 30-43. [Billingsley oral history interview.]
Read a transcript of, or listen to, the full-length interview through the Northern Arizona University, Cline Library, Colorado Plateau Digital Collections; recorded October 26, 2007, duration 2:23:16 (143:17 minutes); interviewed by Lew Steiger for the River Runners Oral History Project, Grand Canyon River Guides:

| 1992 | 24.19 | Geologic map of the Rock Canyon quadrangle, northern Mohave County, Arizona. <i>U.S. Geological Survey, Open-File Report 92-449</i> , 17 pp., 1 sheet, scale 1:24,000. |
| 1992 | 24.20 | Geologic map of the Jumpup Canyon and Big Springs quadrangles, Mohave and Coconino Counties, Arizona. <i>U.S. Geological Survey, Miscellaneous Investigations Map I-2290</i> , scale 1:62,500. |

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1993 24.21 **Geologic map of the Lost Spring Mountain East quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 93-565*, 9 pp., 1 sheet, scale 1:24,000.
- 1993 24.22 **Geologic map of the Lost Spring Mountain West quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 93-566*, 11 pp., 1 sheet, scale 1:24,000.
- 1993 24.23 **Geologic map of the Dutchman Draw quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 93-587*, 12 pp., 1 sheet, scale 1:24,000.
- 1993 24.24 **Geologic map of The Grandstand quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 93-588*, 15 pp., 1 sheet, scale 1:24,000.
- 1993 24.25 **Geologic map of the Little Tanks quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 93-682*, 13 pp., 1 sheet, scale 1:24,000.
- 1993 24.26 **Geologic map of the Russell Spring quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 93-717*, 17 pp., 1 sheet, scale 1:24,000.
- 1993 24.27 **Geologic map of the Wolf Hole Mountain and vicinity, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Investigations Map I-2296*, 1 sheet, scale 1:24,000.
- 1994 24.28 **Geologic map of the Formaster Well quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 94-243*, 1 sheet, scale 1:24,000, text 10 pp.
- 1994 24.29 **Geologic map of the White Pockets quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 94-244*, 1 sheet, scale 1:24,000, text 11 pp.
- 1994 24.30 **Geologic map of the Little Clayhole Valley quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 94-290*, 1 sheet, scale 1:24,000, text 11 pp.
- 1994 24.31 **Geologic map of the Antelope Knoll quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 94-449*, 1 sheet, scale 1:24,000, text 18 pp.
- 1994 24.32 **Geologic map of the Hat Knoll quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 94-554*, 1 sheet, scale 1:24,000, text 14 pp.
- 1994 24.33 **Geologic map of the Moriah Knoll quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 94-634*, 1 sheet, scale 1:24,000, text 15 pp.
- 1997 24.34 **Geologic map of the Mount Logan quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 97-426*, 1 sheet, scale 1:24,000, text 21 pp.
- 1997 24.35 **Geologic map of the Mount Trumbull NW quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 97-488*, 1 sheet, scale 1:24,000, text 19 pp.
- 1997 24.36 **Geologic map of the Poverty Spring quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 97-493*, 1 sheet, scale 1:24,000, text 13 pp.

Billingsley, George H., AND Bohannon, R. G.

- 1995 24.37 **Geologic map of the Elbow Canyon quadrangle, northern Mohave County, Arizona.** *U.S. Geological Survey, Open-File Report 95-560*, 1 sheet, scale 1:24,000, text 17 pp.

Billingsley, George H., AND Breed, William J.

- 1986 24.38 **Geologic map of the Bright Angel Trail, Grand Canyon, Arizona.** Tulsa, Oklahoma: American Association of Petroleum Geologists, 1 sheet (2 sides)
Base map is topographic map by Washburn (1981), scale 1:4800, contour interval 25 feet); accompanied by text (Breed *et al.*, 1986, **ITEM NO.** 23.22).

Billingsley, George H., AND Dyer, Helen C.

- 2003 24.364 **Geologic map of the upper Hurricane Wash and vicinity, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2410*, scale 1:31,680, text 23 pp.

Billingsley, George H., AND Graham, Scott E.

- 2003 24.365 **Geologic map of the lower Hurricane Wash and vicinity, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2396*, scale 1:31,680, text 27 pp.

Billingsley, George H., AND Hampton, Haydee M.

- 1999 24.39 **Physiographic rim of the Grand Canyon, Arizona.** *U.S. Geological Survey, Open-File Report 99-30*, 1 sheet, scale 1:250,000, contour intervals 25 and 50 m. ("This report is preliminary and has not been reviewed for conformity with U.S. Geological Survey editorial standards or with the North American Stratigraphic Code.") [Illustrated herein ([Figure 43](#), p. 278).]
Also downloadable GIS (Geographic Information System) data file in ARC/INFO format, "Physiographic rim of the Grand Canyon, Arizona: A digital database", with explanation, 10 pp. (<https://pubs.usgs.gov/publication/ofr9930>).
- 2000 24.219 **Geologic map of the Grand Canyon 30' × 60' quadrangle, Coconino and Mohave Counties, northwestern Arizona.** *U.S. Geological Survey, Geologic Investigations Series, I-2688, Version 1.0*, 1 sheet, text 15 pp.
Poster style sheet, displaying map with supplementary images and key on three sides.
- 2001 24.221 **Geologic map of the House Rock Spring quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2367*, scale 1:24,000, text 17 pp.

Billingsley, George H., AND Huntoon, Peter W.

- 1983 24.40 **Geologic map of Vulcan's Throne and vicinity, western Grand Canyon, Arizona.** Grand Canyon Natural History Association, scale 1:48,000.

Billingsley, George H., AND Priest, Susan S.

- 2010 24.350 **Geologic map of the House Rock Valley area, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 3108*, 1 sheet, scale 1:50,000; pamphlet, 23 pp.
- 2013 24.370 **Geologic map of the Glen Canyon Dam 30' × 60' quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 3268*, 41 pp., 3 sheets, scale 1:50,000.

Billingsley, George H., AND Wellmeyer, Jessica L.

- 2001 24.222 **Geologic map of the Cane quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2366*, scale 1:24,000, text 7 pp.
- 2003 24.232 **Geologic map of the Mount Trumbull 30' × 60' quadrangle, Mohave and Coconino Counties, northwestern Arizona.** *U.S. Geological Survey, Geologic Investigations Series, I-2766*, scale 1:100,000, text 36 pp.

Billingsley, George H., AND Workman, Jeremiah B.

- 2000 24.216 **Geologic map of the Littlefield 30' × 60' quadrangle, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Geologic Investigations Series, I-2628*, 1 sheet, scale 1:100,000, 25-page text.

Billingsley, George H.; Antweiler, John C.; Beard, L. Sue; Lucchitta, Ivo; AND Lane, M. E.

- 1986 24.41 **Mineral resource potential map of the Pigeon Canyon, Nevershine Mesa, and Snap Point Wilderness Study Areas, Mohave County, Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-1860-A*, 1 sheet with text, scale 1:50,000, and 10-pp. text in pamphlet.

Billingsley, George H.; Antweiler, John C.; AND Ellis, Clarence E.

- 1983 24.371 **Mineral resource potential of the Kanab Creek Roadless Area, Coconino and Mohave Counties, Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-1627-A*, 1 sheet with text, 10 pp.

Billingsley, George H.; Barnes, Charles W.; AND Ulrich, G. E.

- 1985 24.42 **Geologic map of the Coconino Point and Grandview Point quadrangles, Coconino County, Arizona.** *U.S. Geological Survey, Miscellaneous Investigations Map I-1644*, 1 sheet, scale 1:62,500.

Billingsley, George H.; Beard, L. Sue; Priest, Susan S.; Wellmeyer, Jessica L.; AND Block, Debra L.

- 2004 24.368 **Geologic map of the lower Grand Wash Cliffs and vicinity, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2427*, scale 1:31,680, text 23 pp.

Billingsley, George H.; Block, Debra L.; AND Dyer, Helen C.

- 2006 24.271 **Geologic map of the Peach Springs 30' × 60' quadrangle, Mohave and Coconino Counties, northwestern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2900*, 16 pp., 1 sheet, scale 1:100,000.

Billingsley, George H.; Felger, Tracey J.; AND Priest, Susan S.

- 2006 24.238 **Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2895*, 22 pp., 1 sheet, scale 1:100,000.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5' quadrangles (scales 1:24,000) within the Valle 30' × 60' quadrangle, all of which can be accessed directly from this webpage: <https://pubs.usgs.gov/sim/2006/2895/24k/images/> (accessed 10 July 2024). Quadrangles are as follows:

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2006 24.239 **National Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.240 **Supai Camp quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.241 **Hualapai Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.242 **Baldy Basin quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.243 **Box K Ranch quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.244 **Metzger Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.245 **Tusayan West quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.246 **Tusayan East quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.247 **Dike Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.248 **Supai Camp SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.249 **Hazen Hole Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.250 **Rosebud Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S.*

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.251 **Little Harpo Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.252 **Howard Hill quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.253 **Red Butte SW quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.254 **Red Butte quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.255 **Rose Well Camp West quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.256 **Rose Well Camp East quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.257 **Black Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.258 **Tin House quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.259 **Markham Dam quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.260 **Miller Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*
- 2006 24.261 **Valle Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895. [7.5' quadrangle, scale 1:24,000.]*

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2006 24.262 **Molly Ann Draw quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.263 **Rhodes Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.264 **Big Bud Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.265 **Bishop Lake quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.266 **Howard Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.267 **Red Hill Ranch quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.268 **Mixon Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.269 **Howard Lake quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.270 **Hobble Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]

Billingsley, George H.; Goodwin, Gregory; Nagorsen, Sarah E.; Erdman, Monica E.; AND Sherba, Jason T.

- 2019 24.865 Geologic field photograph map of the Grand Canyon region, 1967-2010. *U.S. Geological Survey, General Information Product 189*, 11 pp.
<https://pubs.er.usgs.gov/publication/gip189>.
 This is a guide to an online collection of "1,211 geotagged photographs collected [by Billingsley] during 43 years of geologic mapping". "The photographs document some key geologic features, structures, and rock unit relations that were used to compile nine geologic maps of the Grand Canyon region published at 1:100,000 scale, and many more maps published at 1:24,000 scale." [For the online

dataset and photo catalog, see: Billingsley *et al.* (2019), Geologic and related photographs of the Grand Canyon region (1967-2010): a photograph collection by George Billingsley. *U.S. Geological Survey, Data Release*, <https://doi.org/10.5066/F7WS8SHW>. (Link to USGS ScienceBase catalog: <https://www.sciencebase.gov/catalog/item/5a9751d5e4b06990606c5197>.)

Billingsley, George H.; Hamblin, W. Kenneth; Wellmeyer, Jessica L.; Block, Debra; AND Dudash, Stephanie

- 2001 24.223 **Geologic map of part of the Uinkaret Volcanic Field, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2368*, scale 1:31,680. [Mount Trumbull-Toroweap Valley area.]

Billingsley, George H.; Harr, Michelle; AND Wellmeyer, Jessica L.

- 2000 24.224 **Geologic map of the upper Parashant Canyon and vicinity, northern Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2343*, scale 1:31,680, text 27 pp. [Upper Parashant Canyon-Grassy Mountain area.]

Billingsley, George H.; Priest, Susan S.; AND Dudash, Stephanie L.

- 2002 24.366 **Geologic map of the Clayhole Wash and vicinity, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2394*, scale 1:31,680, text 20 pp.

Billingsley, George H.; Priest, Susan S.; AND Felger, Tracey J.

- 2004 24.360 **Geologic map of Pipe Spring National Monument and the western Kaibab-Paiute Indian Reservation, Mohave County, Arizona.** *U.S. Geological Survey, Miscellaneous Investigations Map I-2863*, scale 1:31,680, 1 sheet.

- 2007 24.274 **Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2977*, scale 1:100,000, 1 sheet, 33 pp.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5' quadrangles (scales 1:24,000) within the Cameron 30' × 60' quadrangle, all of which can be accessed directly from this webpage: <https://pubs.usgs.gov/sim/2007/2977/24k/images/> (accessed 10 July 2024). Quadrangles are as follows:

- 2007 24.275 **Grandview Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]

- 2007 24.276 **Grandview Point NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]

- 2007 24.277 **Hellhole Bend quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]

- 2007 24.278 **Coconino Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S.*

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.279 **Cameron North quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.280 **Cameron NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.281 **Goldtooth Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.282 **Appoloosa Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.283 **Harbison Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.284 **Peterson Flat quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.285 **Willows Camp quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.286 **Coconino Point SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.287 **Cameron South quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.288 **Cameron SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*
- 2007 24.289 **The Landmark quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977. [7.5' quadrangle, scale 1:24,000.]*

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2007 24.290 **Gold Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.291 **Dog Knobs quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.292 **Lockwood Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.293 **Campbell Francis Wash quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.294 **Gray Mountain.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.295 **Wupatki NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.296 **Badger Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.297 **Rock Head quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.298 **Ebert Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.299 **Chapel Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.300 **SP Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2007 24.301 **East of SP Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.302 **Wupatki SW quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.303 **Wupatki SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.304 **Standing Rocks.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.305 **White Water Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.306 **Wupatki NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]

- 2008 24.316 **Geologic map of the Fredonia 30' × 60' quadrangle, Mohave and Coconino Counties, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 3035,* scale 1:100,000, 1 sheet, 23 pp.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5' quadrangles (scales 1:24,000) within the Fredonia 30' × 60' quadrangle, all of which can be accessed directly from this webpage: <https://pubs.usgs.gov/sim/3035/24k/images/> (accessed 10 July 2024). Quadrangles are as follows:

- 2008 24.317 **Colorado City quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30' × 60' quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035.* [7.5' quadrangle, scale 1:24,000.]
- 2008 24.318 **Moccasin quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30' × 60' quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035.* [7.5' quadrangle, scale 1:24,000.]
- 2008 24.319 **Kaibab quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30' × 60' quadrangle, Mohave and Coconino Counties, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 3035.* [7.5' quadrangle, scale 1:24,000.]
- 2008 24.320 **Fredonia quadrangle.** [As part of 1:100,000 scale] Geologic map of the Fredonia 30' × 60' quadrangle, Mohave and Coconino Counties, northern

The precise transcription of names and titles particularly among the older maps of this section may include faithful reproduction of some typographical elements and errors. This unconventional presentation is done so that those users who may not be able to see an original product can profit from the exact textual appearance and context. (See more complete information on INTRODUCTION [p. 76](#) herein.)

ANONYMOUS

PUBLICATION NOT DATED: DATE ESTIMATED, ATTRIBUTED, OR KNOWN FROM ORIGINAL RECEIPT

- NO DATE 25.1403 世界萬國日本ヨリ海上里數国印王城人物圖 [Sekai bankoku Nihon yori kaijō risū kunijirushi ōjō jinbutsuzu]. [All the countries in the world . . .] [Japan]: [no imprint]. [Mid-19th century?] [In Japanese.]
Library of Congress also offers another title in transliteration, “Sekaizu ichiran”. LOC illustrates this map online (<https://www.loc.gov/item/88691685/>) and catalogs it with a date of “18--?”, though if the name of the river as translated here is correct it may indicate a mid-19th century date since the name “Colorado River of the West” was in use.
Woodblock print displaying a map of the world with illustrations of costumes, and marginal texts.
▶ The Americas are barely recognizable with North America, interestingly, showing but one major river that flows broadly and sinuously from the central portion of where would be the United States to the southwest at the Gulf of California. The peninsula there is labeled “カリホルニヤ” (California, which is close to the modern Japanese spelling, カリフォルニア) and the mouth of the gulf is labeled “東紅海” (East Red Sea, perhaps implying a variant of Vermilion Sea). The gulf and the inland river are effectively indistinguishable, becoming increasingly wider toward the open sea. A label along its course appears to be “西砂川” (possibly West Sand River, or Sand River of the West).
- NO DATE 25.2247 [Maps on playing cards.] [Producer undetermined.] [1842?] [In French.]
Date estimated by the David Rumsey Map Collection, Stanford University, <https://www.davidrumsey.com>.
While playing cards, as ephemera, would not normally be cited in this Cartobibliography, these items are of special interest in that they use maps for their illustrations. Those that pertain to this interest are card no. 14, “**Amérique**”, which displays the American continents, with an unlabeled Gulf of California and a meagerly drawn single river entering it from the north; and card no. 38, “**Mexique ou Nouvelle Espagne**”, which displays North and Central America, on which a somewhat large Gulf of California (not labeled) receives at its head the “Colorado”, the course of which is south and southwest, with no tributaries shown.

Anonymous (continued)

- NO DATE 25.1962 **[Map of boundary lines in the United States established by treaty.]** ("E Gilman, Draftsman." "P.S. Duval's Lith^y. Philad^a".) [1848?]
 ► Map, with two tables of data. The map is colored, with various treaty lines delineated with dashed or solid lines in different colors, the latest being "the Treaty of 1848 with Mexico". "Rio Colorado" is delineated along a generalized southwesterly course from headwaters (not labeled); enroute there is a single, short tributary from the east-northeast (not labeled, but its position below the 35th parallel and its general appearance probably indicates the Bill Williams River). "Gila River" has its confluence with the Colorado at "San Pedro", where, as generally delineated, also begins the head of the "Gulf of California".
- NO DATE 25.1135 **[Copy of the world map by Sekisui.]** Nagasaki: EIJDO. [Ca. 1850.] [In Japanese.]
 ► A crude woodblock printing. The shapes of the Americas are almost unrecognizable, printed in a solid color. A ridiculously drawn Gulf of California displays a tributary river that "worms" its way into the continent, with the overall appearance that they are a single feature.
- NO DATE 25.1713 **[Banoku chikyu sankai.]** [Woodcut kawaraban map of the world.] [Japan.] [Ca. 1855.] [In Japanese.]
 ► Small wood block map with the Americas in particular very peculiarly formed but recognizable. A huge Californian gulf appears with two "tentacle-like" rivers at its head, one from the northeast, the other from the north-northwest. The Japanese orthography has not been translated for this Cartobibliography.
 This map, with further historical notes, was seen online at <https://www.raremaps.com/gallery/detail/55551/map-of-the-world-bankoku-chikyu-sankai-anonymous-kawaraban>; accessed May 10, 2021). Title in Japanese orthography and translation not obtained.
- NO DATE 25.2471 **Map and Historical Data on the Great Southwest's Lost Mines.** [No imprint.] 1 sheet (21 × 17 inches; printed in green on laid paper). [Mid-20th century.]
 This map was seen as an offering in the "April 11th [2024] Rare Book Highlights" from Back of Beyond Books, Moab, Utah. The description reads: "A watermark indicates 'Wausau Laid' paper, but no other authorship." "An uncommon map, of unknown origin & date, covering Arizona and parts of California, Nevada, Utah and New Mexico, detailing the lost mines in each area. It's possible this map was based on the maps & writings of John T. Mitchell in 'Desert Magazine,' in the 1930s & later in the '50s. His books on lost mines of the Southwest were reprinted in 1970 by Rio Grande Press, which may coincide with the printing of this map. Alternatively, inferring from the quality of the laid paper used, it's also possible this map was a placemat published by a small restaurant chain, also during the 1960s or '70s." (The size, however, seems a bit large for the usual sort of illustrated placemats often in use in less-economical restaurants.) Within the area of pertinence to this Cartobibliography, "lost mines" are denoted only in the lower Colorado River region.
- NO DATE 25.1 **Deutsche Übersetzung Urlaubsplanner für Nordarizona.** Sedona, Arizona: Map-A-Zine, [8] pp. [In German.]
 This is a translation to accompany Cox (no date, ITEM NO. 25.31), *Map-A-Zine of northern Arizona.* [Copy purchased new, 1994.]
- NO DATE 25.637 **Colorado River Heritage Greenway Park and Trails : The Riverwalk Exploration Trail.** [No imprint], 1 sheet. [Laughlin, Nevada.] [Ca. 2015.]

Anonymous (continued)

- NO DATE 25.1892 **Grand Canyon National Park Map : Illustrated Trails.** [No imprint], booklet format, [38] pp. with laminated wraps. [An on-demand publication.] [Copy acquired as new, 2022.]

Portions of shaded-relief topographic maps overprinted with trail and other symbols. Text interleaved, comprising travel advice. No credits.

Note: The cover displays a photograph of Horseshoe Bend, in Glen Canyon.

DATED PUBLICATIONS, GROUPED BY YEAR

- 1843 25.541 The North-West boundary question. *Dublin University Magazine*, 21 (March): 377-394, map.
See **MAP**, which displays U.S. boundaries in the West as then drawn. Colorado River, pp. 377, 379, *in passing*.

- 1845 25.542 **[Note of manuscript map by Albert Gallatin sent to Geographical Society at Paris.] [In Italian.]**
In: Biblioteca Italiana [SECTION]. *Reale Istituto Lombardo di Scienze, Lettere ed Arte, Giornale, e Biblioteca Italiana* (Milano), 10(30): 393-394.
"Il signor Alberto Gallatin . . . ha mandato alla Società geografica di Parigi una carta manoscritta di quelle regioni fra il Missouri e l'Oceano pacifico . . . La parte più interessante delle medesime è la dimostrazione dell'immenso spazio che occupa il deserto di sabbia fra il Rio Colorado e la catena marittima dei monti della California, l'unico del suo genere in quel vastissimo continente. Tutto quello ch'è a borea fra il Rio Colorado e la California, era infino ad ora terra incognita. Il confine settentrionale del deserto è presso a poco sotto il latitudinario quarantesimo primo. Cuopre otto gradi di longitudine, ma solamente sotto quello di 32° 30', da dove si prolunga per circa cento miglia più verso mezzodi al di qua e di là del golfo di California."

- 1848 25.1538 **Amerika'yı şimali kıt'ası haritasıdır** [*orthography employs the Ottoman Arabic abjad*] [**Map of America's northern continent**]. [Bayrūt, Lebanon?]: Maṭba'at Jarīdat al-Hawādith. [**In Turkish.**]

Date given as 1265 (*i.e.*, 1848 or 1849).

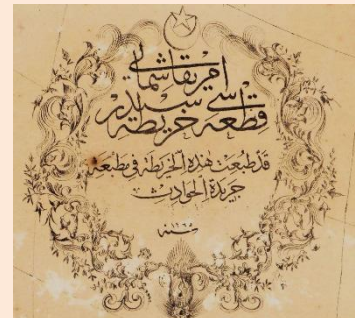

Title in transliteration and publication data as given by Library of Congress.

► All labels are in the Ottoman Arabic abjad.

The Colorado River is shown on a course from multiple mountainous headwaters southwest to the head of the Gulf of California, where the Gila River arrives independently from the east.

Map is illustrated at Library of Congress,

<https://www.loc.gov/item/2008624893/>; cartouche is reproduced *here*.

Anonymous (continued)

- 1852 25.1694 **Kart over De Nordamerikanske Forbundsstater.** [In Norwegian.]
In: Anonymous, *Amerika, Ole Bull og det nye Norge*. Bergen: S. O. Dahl. [The volume itself pertains to the Norwegian violinist, Ole Bull.
 ► Fold-out map in the back of volume. This is a roughly drawn, colored map of North and Central America, with a portion of western Europe and Africa. Most of northwestern "Mexico" is labeled (by key) "Californien"; the Baja peninsula is labeled directly, "Nedre Californien". Rivers are only sketched in roughly; most are not labeled. The head of "Den Californiske Bugt" trends northeastward, where it receives a river (not labeled) arriving from the northeast, where a place name, "St. Pedro", is marked. Just upstream from there a major river arrives from the east and northeast (the Gila River, presumably). To the northeast of that confluence are shown a peculiarly arranged triplet of rivers: the western river's course (apparently the one that reaches the gulf) arcs from southwest to south, with a bifurcated headwater, one course of which seems to come from a lake; the central river is a tributary to the western river, of comparable size, that arrives from the northeast; and the eastern river, also a tributary to the western river yet the largest of those shown in this area, follows a slightly meandering course from the northeast, with its headwater at the common junction of the boundaries of "Californien", "Oregon", and "Missouri Gebet".
-
- 1855 25.746 Curious blunders. *In:* The Library [SECTION]. *The Home Circle* (Nashville, Tennessee), 1 (February): 95.
 Credited to *Portland Transcript*.
 ► Includes: "America was first presented as a great peninsula of Asia, mixed up and joined with Japan, China, &c. Maps were shown in which China is in the closest neighborhood to Mexico, on which the Great Rio Colorado of California has its source in Siberia, and where the Tartars and their horses and camels are presented about the Rocky Mountains."
- 1855 25.965 **Map of New-Mexico and the territory, acquired by the Gadsden Treaty, also showing the proposed Southern or Texan rail road route.** *Geographical and Commercial Gazette* (J. Disturnell, New York), 1(2) (April):.
 Wheat (1960, Volume 4, p. 197) remarks, "This is probably by Gray or Ehrenberg, and the plate has been cut off of a plate of a larger map . . ."
 ► "Rio Colorado" displayed in rather ragged fashion between "G of California" and the confluence of "Green River" and "Grand River", which straddle "Sierra della Landerna" [*sic*]. Seems also to display "Rio Colorado Chiquito" flowing westward to a confluence just below this confluence, northwest of "San-Francisco" (San Francisco Peaks). Southwest of there is the confluence of "Rio Virgen", which is shown coming from the north before turning southeastwardly to a confluence with the Colorado.
NOTE: "Sierra della Landerna" is a misspelling of Sierra de la Lanterna, regarding which see the [note](#) in the Introduction herein.

A

A. Fullarton and Co.

- NO DATE 25.1146 **United States North America. By G. H. Swanston Edin^g** ("A. Fullarton & C^o Edinburgh, London & Dublin." "Eng^d by G. H. Swanston Edinburgh.") *In: The royal illustrated atlas, of modern geography : with an introductory notice by D^r. N. Shaw, Secretary to the Royal Geographical Society &c.* London and Edinburgh: A. Fullarton and Co. [1872.]
- ▶ "R. Colorado" is depicted between the head of "Gulf of California" and the confluence of "Green R." and "Grand R." It is drawn generally along an arc through the Grand Canyon region. Tributaries are "R. S. Juan", "Little Colorado R.", a tributary (not labeled) that is Cataract Creek, "Virgin R.", "Bill Williams F^k", and "R. Gila". Certain point place names are given, including "S^t Bartolome" at the confluence of the Little Colorado River, and "Bucarelli" on the south side of the Colorado between the Little Colorado and Cataract Creek, which is of course an old label for Puerto de Bucareli.
- NO DATE 25.2167 **North America Including the most recent discoveries in the Arctic Seas and West Coast, from Government charts and reports, United States survey &c.** *In: The royal illustrated atlas, of modern geography : with an introductory notice by D^r. N. Shaw, Secretary to the Royal Geographical Society &c.* London and Edinburgh: A. Fullarton and Co. [1872.]
- ▶ The course of "R. Colorado" differs markedly from that shown on the map of the United States, following a mostly straight course between the gulf and its headwaters where the Green is labeled "R. Colorado" and "Grand R." is a tributary to it. Other tributaries include "R. Nabajoa" (San Juan River), "R. Yaguesila" (Little Colorado River), "Pyramid R." (the Virgin River, confused with the so-called, misrepresented and mistranslated, river of the "sulfurous pyramids"), "R. S. Maria" (Bill Williams River), and "Rio Gila", the last of which meets the head of the gulf along with the Colorado. At the confluence of the Little Colorado is a place label, "Conception". Also of note is that the Colorado, between its headwater and the confluence of the Little Colorado, follows the east side of "Colorado Range".
- See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

A. L. Bancroft and Co.

WHEAT V:1219

- 1871 25.1249 **Bancroft's, Map of California, Nevada, Utah and Arizona, Published By A. L. Bancroft, & Comp^y Booksellers & Stationers San Francisco Cal. 1871.**
- ▶ "Colorado River" is shown between south of Yuma and north of the Utah/Arizona boundary before passing off the map to the east. "Big Cañon of the Colorado River" is labeled between the confluences of "Virgin River" and "Colorado Chiquito or Flax River", to which the latter "Cataract Cr" is a tributary; headwaters of Cataract Creek are "Park Cr.", "Lava Cr.", and "Cedar Cr." A river (not labeled) reaches the Colorado from the north in the mid-canyon area. Thus even after Powell's first expedition the portrayal is still that reminiscent of the Egloffstein map in Ives.

- 1876 25.1131 **Bancroft's, Map of California, Nevada, Utah and Arizona Published by A. L. Bancroft, & Comp^y Booksellers & Stationers San Francisco Cal. 1876.**
 ▶ "Colorado River" is shown between south of Yuma and north of the Utah/Arizona boundary before passing off the map to the east. "Big Cañon of the Colorado River" is labeled between the Virgin River and the confluence of "Colorado Chiquito or Flax River", to which the latter "Cataract Cr" is a tributary. A river (not labeled) reaches the Colorado from the north in the mid-canyon area. Thus even after Powell's expeditions the portrayal is still that reminiscent of the Egloffstein map in Ives.

WHEAT V:1301

- 1882 25.1256 **Bancroft's New Map of California and Nevada compiled from the latest and most reliable official sources and special surveys. 1882. Published by A. L. Bancroft & Co. San Francisco. Copyright 1882 by A. L. Bancroft & Co.**
 ▶ Almost no features are depicted on the Arizona side of the Colorado River. The river in Mexico is shown in detail. East of the confluence of "Virgin River" is the label "Supposed Head of Navigation". The river passes off the map to the east at the confluence of a tributary from "Virgin Range" on the north, labeled only "Wash" (probably Grand Wash).

A. L. Scholten [firm]

- 1852 25.1758 **Vereenigde Staten van Noord Amerika.** ("Atlas der Aarde N^o 22." "Sterndruk van J H. van de Weijer." "Te Groningen bij A L Scholten". "Gedeponeerd".) [In Dutch.]
In: Atlas der geheele aarde. Voor school en huis, naar de laatste ontdekkingen en staatkundige veranderingen bewerkt; in 24 kaarten met aardrukskundige overzigten. Groningen: A. L. Scholten, 24 maps, text.
 In the unpaginated text with caption, "Overzigten van de Vereenigde Staten van Noord Amerika", "Rio Colorado" is listed, without further information.
 ▶ In "Opper Californie", "Colorado riv[ier]" is depicted cursorily, following a gentle arc from headwaters to the head of the Gulf of California (not labeled). The only tributary is the generally-drawn Virgin River (not labeled). The Gila River (not labeled) is obscured by the line depicting the U.S.-Mexico boundary. South of that line, the Colorado bifurcates before reaching the gulf.
- 1852 25.2168 **Noord Amerika en West Indië.** [In Dutch.]
In: Atlas der geheele aarde. Voor school en huis, naar de laatste ontdekkingen en staatkundige veranderingen bewerkt; in 24 kaarten met aardrukskundige overzigten. Groningen: A. L. Scholten, 24 maps, text.
 ▶ "Colorado riv[ier]" is depicted quite cursorily, with no tributaries, although the label "Gila" does appear alongside the national boundary.

A. T. Andreas [firm]

- 1874 25.1010 **Topographical map of the United States. Published by A. T. Andreas, Lakeside Building. Chicago 1873.**
In: An illustrated atlas of the State of Minnesota. Chicago: A. T. Andreas.
 ▶ Topography is shown only as generalized positions of mountains. "Colorado Riv." is labeled on the lower reach of the river. The river in the Grand Canyon region, between "Rio Virgin" and "Colorado Chiquito R" is depicted by a wildly and conjecturally undulating line. Above the Little Colorado the river, between the confluences of "R San Juan" and "Green R" is labeled "Rio Colorado or Grand R", the latter which seems continues into Colorado and there into which flows the "Bunkara or Blue r R" [sic].

Akisato, Yamane

- 1906 25.1984 **[Bankoku chin chizu chiri tokeihyo.] New Atlas & Geography Table.** [Shobido]: Nakamura. **[In Japanese.]**
 Data for this citation were obtained from examining the catalog record and copy in the David Rumsey collection,
https://www.davidrumsey.com/luna/servlet/view/search?q=pub_list_no%3d%229820.000%22&qvq=lc:RUMSEY%7E8%7E1&mi=0 (accessed 17 February 2023). Title on cover given in English and Japanese; back cover gives publisher's information in Roman orthography ("Nakamura") and place (Shobido) in Japanese (Japanese orthography not available to this cartobibliography; transliterations are from the David Rumsey record). Date of publication given in this record as "Meiji 39 (1906)".
 ▶ The **map of North America** (labeled in Japanese) is generalized, principally displaying political units. In the area pertinent to this Cartobibliography, only the Colorado River is labeled and is sketched in very generally, with headwaters on the Grand River, omitting(!) the Green River; tributaries (likewise not labeled) are the San Juan, Little Colorado, Virgin, and Gila Rivers. In the Grand Canyon area the Colorado is shown passing between hachures that roughly delineate tablelands. The 35th- and 32nd-parallel railroads are delineated very generally.

- 1918 25.1577 **General Map of Transcontinental Routes with Principal Connections.** New York: American Automobile Association. ("Copyright 1912, 1913, 1914, 1916, 1918".)
 ▶ Routes are keyed to colored overprints in a variety of symbols. Crossing northern Arizona are shown "National Park-Park Hwy." with loop route between Flagstaff-Grandview-Grand Canyon-Anita-Williams, and the coincident "National Old Trails Road" (omitting the Grand Canyon loop); in California, Nevada, and Utah between Needles-Searchlight-Las Vegas-St. Thomas-Toquerville is shown the "Arrowhead Trail"; and across southern Arizona are shown the "Southern Natational Hwy." and "Old Spanish Trail". Also of note on this map is the symbol at "Grand Canyon of the Colorado" marking "Bass Camp", although with no connecting road delineated.
- 2007 25.288 **Colorado River guide map : boating and watersports, casinos and points of interest, Lake Mead, Yuma, lodging and camping, Bullhead City, Hoover Dam, Lake Havasu, Lake Mohave, Laughlin, Needles, Parker.** Automobile Club of Southern California, folded map. (AAA Explore Series.)

Andreas Atlas Co.

- 1875 25.2064 **New Railroad map of the United States[,] the Dominion of Canada[,] Mexico and the West Indies.**
In: Illustrated historical atlas of the State of Iowa. Chicago: Andreas Atlas Co., pp. 16-17).
 ▶ "Rio Colorado" is delineated between head of "Gulf of California" and the confluence of "Green R." and "Grand River". From that confluence the Colorado's course is southwest into Arizona, where soon after crossing into that territory it turns due west along the Utah-Arizona boundary, before turning south-southwest to the confluence of "Little Colorado" from the east-southeast. Near that confluence on the Little Colorado is the confluence of an unlabeled tributary that is Cataract Creek. At the point recognizable as where is the confluence of Diamond Creek there arrives a tributary (not labeled, not Diamond Creek) that begins at forked heawaters nearby, flows west into a lake, then the outlet on the north side of the lake sends the stream eastward to the Colorado confluence; this appears to be what is labeled on other maps variously as "Yampais" creek. At the end of the Colorado's westward course is the confluence of "Santa Clara" (Virgin River), from where the Colorado heads southwest then south, receiving en route a tributary (not labeled) from that northwest that passes by the place name "Vegas", which must indicate Las Vegas Wash. Other tributaries are an unlabeled river from the east and north (Bill Williams River), a tributary from the northwest (not labeled), and "Rio Gila" from the east. Sketched in are the routes of the 35th parallel railroad (without label) and the 32nd parallel railroad ("Texas Pacific R. R.").

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

NOTE: The title cited here is one of a series of atlases that were customized (commissioned?) for specific counties or states of the United States, which were published during the 1870s and 1880s at least. There are variances to all.

Andree, Richard

- 1881 25.2021 **Nordamerika. [In German.]**
In: Richard Andree's Allgemeiner Handatlas in sechsundachtzig Karten mit erläuterndem Text. Herausgegeben von der Geographischen Anstalt von Velhagen & Klasing in Leipzig. Bielefeld and Leipzig: Verlag von Velhagen und Klasing, pp. 82-83. Scale 1:20,000,000.
 ▶ "Colorado R." is delineated between the Gulf of California and the confluence of "Green R." and "Grand R."; its course approximately correct. Enroute it receives the tributaries "San Juan R." from the east-southeast, the Little Colorado River" (not labeled) from the southeast, Kanab Creek (not labeled) from the north, the Virgin River (not labeled) from the north, Bill Williams River (not labeled) from the east and northeast, and "Rio Gila" from the east.
- 1881 25.2169 **Vereinigte Staaten von Nordamerika. [In German.]**
In: Richard Andree's Allgemeiner Handatlas in sechsundachtzig Karten mit erläuterndem Text. Herausgegeben von der Geographischen Anstalt von Velhagen & Klasing in Leipzig. Bielefeld and Leipzig: Verlag von Velhagen und Klasing, pp. 86-87). Scale 1:10,000,000.
 ▶ "Colorado R.", its course approximately correct, is delineated between the Gulf of California and the confluence of the Green and Grand Rivers; enroute it receives the tributaries "S. Juan R." from the east, Paria River (not labeled) from the northwest, "Colorado Chiquito" (Little Colorado River) from the southeast, Kanab Creek (not labeled) from the north), Cataract Creek (not labeled) from the south-southeast, "Virgin R." from the north and northeast, an unlabeled short tributary from the west and northwest, "Bill Will. F." (Bill Williams River) from the east and north, an unlabeled short tributary from the northwest, and "Rio Gila" from the east. Virtually the entire reach of the river is depicted as encanyoned. The Grand Canyon is labeled "Gr. Colorado Cañon", while the label "Marble Can." is positioned between the Little Colorado River and Cataract Creek.
- 1881 25.2170 **Die Pacifischen Staaten der Union. [In German.]**
In: Richard Andree's Allgemeiner Handatlas in sechsundachtzig Karten mit erläuterndem Text. Herausgegeben von der Geographischen Anstalt von Velhagen & Klasing in Leipzig. Bielefeld and Leipzig: Verlag von Velhagen und Klasing, p. 88. Scale 1:5,000,000.
 ▶ "Rio Colorado", its course approximately correct, is delineated between "Golf v. California" a point east of "Kanab Wash". The central portion of the Grand Canyon is labeled "Grand Cañon of the Colorado", while the reach east of Kanab Creek is labeled "Marble Cañon". Other tributaries, in addition to several minor, unlabeled ones, include "Cataract Cr." from the south-southeast, "Grand Wash" from the northeast, "Virgin R." from the north and northeast, "Bill Williams Fork" from the east and north, and "Rio Gila" from the east.
- 1906 25.2022 **Nordamerika. [In German.]**
In: Andrees Allgemeiner Handatlas in 139 Haupt- und 161 Nebenkarten nebst vollständigem alphabetischem Namenverzeichnis. Fünfte, völlig neubearbeitete und vermehrte Auflage. Jubiläumsausgabe. Herausgegeben von A. Scobel. Bielefeld and Leipzig: Verlag von Velhagen und Klasing, pp. 181-182). Scale 1:10,000,000.
 ▶ The river "Colorado" is delineated between "Golf von Californien" and the confluence of "Green R." and "Grand R."; enroute it receives among the labeled tributaries "Fremont R." from the northwest, "Escalante R." from the northwest, "S.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Juan R." from the east, "Paria R." from the northwest, "Lit. Colorado" from the southeast, "Virgin R." from the north and northeast, and "Rio Gila" from the east; principal unlabeled tributaries are Cataract Creek from the south-southeast and Bill Williams River from the east and north. The Grand Canyon is labeled "Gr. Colorado Cañon"; "Marble Can" is labeled between the Paria and Little Colorado Rivers.

Andriveau-Goujon, Eugène

- 1850 25.1223 **Carte de l'Amérique du Nord Publiée Par E. Andriveau-Goujon, Rue du Bac, N^o 17. Paris, 1849. [In French.]**
In: Atlas Classique et Universel de Géographie Ancienne et Moderne contenant les Découvertes et les Divisions les plus Nouvelles dans les cinq parties du monde pour servir à la Lecture des Voyages, des Ouvrages Historiques et des meilleurs, Traités de Géographie. Publié par J. Andriveau-Goujon. Adopté par le Ministre de la Guerre pour les Bibliothèques Régimentaires. Nouvelle Édition. A Paris Chez l'Éditeur, Rue de Bac, N^o21, map 41.
 ► "Vielle Californie" and "Sonora" are separated by "Golfe de Californie ou Mer de Cortes". "R. Colorado" is depicted along a long arc between the head of the gulf and headwaters east of "Lac Timpanogos" (Great Salt Lake). It receives only the tributaries "R. S. Joaquin" (San Juan River) and "R. de las Navajoas" (the Little Colorado River mislabeled). "Rio Gila" is shown reaching the head of the gulf independently of the Colorado.
- 1860 25.2226 **Carte générale des États-Unis et du Mexique comprenant l'Amérique Centrale et les Antilles E. Andriveau-Goujon, Éditeur. Paris, Rue du Bac, N^o 21. 1860. ("Dressée par A. Vuillemin.") [In French.]**
In: Atlas Universel. Paris: E. Andriveau-Goujon, Map no. 48.
 ► "R^o Colorado del Occidente" reaches the head of the "Golfe de Californie" where the label "Emb^o du Rio Colorado" appears. The river is drawn to the confluence of "R^o Virgen (S^{ta} Clara)", turning into the Grand Canyon region where it reaches the confluence of "R^o Verde (Green R.)" and "R^o Grande", which courses are parallel to each other and southwest. Tributary to the lower Grand is "R^o de Lino ou Colorado Chico", the lower reach of which is delineated by a dotted line. The San Juan River is not labeled but is a tributary to the Grande upstream from the Little Colorado. Separating the Colorado and Green Rivers from the Virgin is "S^{ra} de la Lanterna".
NOTE: "Sierra de la Lanterna" appears in an 1854 gazetteer with geographic coordinates that place it at the location of the Kaibab Plateau; see Baldwin and Thomas (1854, ITEM NO. 2.17346 in Volume 1/Part B of THE GRAND CANON), p. 1076.
- 1862 25.1005 **Carte générale des États-Unis et du Mexique comprenant l'Amérique Centrale et les Antilles E. Andriveau-Goujon, Éditeur. Paris, Rue du Bac, N^o 21. 1862. ("Dressée par A. Vuillemin.") [In French.]**
In: Atlas Universel. Paris: E. Andriveau-Goujon, Map no. 48. [In the area of interest to this Cartobibliography the map is the same as in Andriveau-Goujon (1860).
 ► "R^o Colorado del Occidente" reaches the head of the "Golfe de Californie" where the label "Emb^o du Rio Colorado" appears. The river is drawn to the confluence of "R^o Virgen (S^{ta} Clara)", turning into the Grand Canyon region where it reaches the confluence of "R^o Verde (Green R.)" and "R^o Grande", which courses are parallel to each other and southwest. Tributary to the lower Grand is "R^o de Lino ou Colorado Chico", the lower reach of which is delineated by a dotted line. The San Juan River is not labeled but is a tributary to the Grande upstream from the Little Colorado. Separating the Colorado and Green Rivers from the Virgin is "S^{ra} de la Lanterna".
NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1867 25.725 **États-Unis (Etats de l'Ouest.)** Paris: E. Andriveau-Goujon. [In French.]
This map appeared with the two notations at upper-right of sheet, "Atlas Usuel N° 30." and "Atlas Universel N° 44." Published in a number of editions beginning in the 1860s, in *Atlas usuel de géographie moderne* and in *Atlas universel de géographie ancienne et moderne*.
▶ "Rio Colorado del Occidente" reaches the head of the Gulf of California where the label "Emb^{re} du Rio Colorado" appears. The river is drawn to the confluence of "R^o Virgen (S^{ta} Clara)", turning into the Grand Canyon region where it reaches the confluence of "R. Colorado Chico" and is connected with dotted lines with "R. Verde (Green R.)", "R^o Grande", and "R. S. Juan". Separating the Colorado from the Virgin is "S^{ra} de la Lanterna".
NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.
- 1870 25.2114 **Carte générale des États-Unis et du Mexique comprenant l'Amérique Centrale et les Antilles.** Paris: E. Andriveau-Goujon. Nouvelle Édition. ("N° 24.") ("Atlas Usuel N° 31." and "Atlas Universel N° 45.") [In French.]
In the Southwest this map is unchanged from Andriveau-Goujon (1862).
▶ "Rio Colorado del Occidente" reaches the head of the Gulf of California where the label "Emb^{re} du Rio Colorado" appears. The river is drawn to the confluence of "R^o Virgen (S^{ta} Clara)", turning into the Grand Canyon region where it reaches the confluence of "R. Colorado Chico" and is connected with dotted lines with "R. Verde (Green R.)", "R^o Grande", and "R. S. Juan". Separating the Colorado from the Virgin is "S^{ra} de la Lanterna".
NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.
- 1876 25.2115 **Carte générale des États-Unis et du Mexique comprenant l'Amérique Centrale et les Antilles.** Paris: E. Andriveau-Goujon. Nouvelle Édition. ("N° 24.") ("Atlas Usuel N° 31." and "Atlas Universel N° 45.") [In French.]
In the Southwest this map is unchanged from Andriveau-Goujon (1862).
▶ "Rio Colorado del Occidente" reaches the head of the Gulf of California where the label "Emb^{re} du Rio Colorado" appears. The river is drawn to the confluence of "R^o Virgen (S^{ta} Clara)", turning into the Grand Canyon region where it reaches the confluence of "R. Colorado Chico" and is connected with dotted lines with "R. Verde (Green R.)", "R^o Grande", and "R. S. Juan". Separating the Colorado from the Virgin is "S^{ra} de la Lanterna".
NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.

- 1895 25.2085 **ΒΟΡΕΙΣ ΑΜΕΡΙΚΗ** [Βορεισ Αμερικη] [Voreis Ameriki] [North America] ("Ανεστησ Κωσταντινιδησ Εκδοτησ" [Anestis Konstantinides Publisher]. Scale 1:40,000,000. [In Greek.]
In: ΝΕΩΤΑΤΟΣ ΓΕΩΓΡΑΦΙΚΟΣ ΑΤΛΑΣ ΠΡΟΣ ΧΡΗΣΙΝ ΤΩΝ ΓΥΜΝΑΣΙΩΝ, ΕΛΛ. ΣΧΟΛΕΙΩΝ ΚΑΙ ΠΑΡΘΕΝΑΓΩΓΕΙΩΝ [Νεωτατοσ Γεωγραφικος Ατλασ Προς Χρησιν Των Γυμνασιων, Ελλ. Σχολειων και Παρθεναγωγειων] [Neotatos Geografikos Atlas Pros Chrisin Ton Gymnasion, Ell. Scholeion kai Parthenagogeion] [New Geographical Atlas for the Use of Gymnasiums, Greek Schools and Preschools]. Αθηναισ: Ανεστη Κωνσταντινιδου [Athens: Anesti Konstantinidou].
▶ "Π. Κολοράδος" (Ρ[otámi] Kolorado) (Colorado River) is delineated cursorily between "Κόλπ. της Καλιφόρνιας" (Κόλπ. tis Kalifórnias) (Gulf of California) and headwaters, receiving tributaries (not labeled) from the east-southeast (San Juan River) and southeast (Little Colorado River, with its confluence essentially on the Utah-Arizona boundary). "Ριο Ηίλας" (Rio Hila) (Gila River) is a tributary from the east

(with the town of "Πρεσκόπη" [Prescott] positioned along it[!]). (The boundaries of the states and territories are a bit off, with Utah-Colorado too far west such that the Four Corners does not occur.

Annerino, John, AND Chen, Hilda

- 2017 25.1671 **Hiking Trails of Grand Canyon National Park.** *In: Hiking the Grand Canyon : a detailed guide to more than 100 trails : commemorative hiker's edition.* New York: Skyhorse Publishing, 356 pp., map.
 Map is a removable fold-out, compiled by John Annerino, drawn by Hilda Chen, for trails in eastern Grand Canyon; single side, 20¾ × 31¾ inches, black and green on glossy stock.

Antillon, Isidora de

WHEAT I:252

- 1802 25.1191 **La America Septentrional desde su extremo Norte hasta 10° de Latitud segun las ultimas observaciones y descubrimientos, para el Curso de Geografia de D. Isidoro de Antillon de Orden de S. M. Año de 1802.** ("F. Selma la grabé." "P. Gangoiti la escribio".) [In Spanish.]
 ▶ "Californias" are separated from "Sonora" (as a part of "Provincias Internas N^o Mexico") by "Golfo de California ó de Cortés". "R. Colorado" is portrayed between the head of the gulf and the confluence of "R. Nabajoa" and "R. de las Zaguanas". Southeast of this confluence a tributary (not labeled) meets the Colorado from the east (Little Colorado River). "R. Gila" meets the Colorado just before it reaches the gulf.

Apgar, E. A., AND Apgar, A. C.

- 1873 25.2398 **Map of the Pacific States and Territories.** By E. A. & A. C. Apgar. ("Jewett & Chandler, Engravers, Buffalo.")
In: Apgar, E. A., and Apgar, A. C., Apgars' geographical drawing book. Philadelphia: Cowperthwait and Co. ("Entered, according to Act of Congress, in the year 1873, by F. [sic] A. & A. C. Apgar, in the office of the Librarian of Congress, at Washington".)
 ▶ Map with accompanying text beneath it, "Directions for Drawing." A very simplistic map delineating and labeling principal rivers, some mountains (diagrammatically shown only by wavy lines) and boundaries of U.S. states and territories. "Colorado R." is delineated between "Gulf of California" and the confluence of "Green R." and "Grand R.", with the only tributaries being "Little Colorado River" from the east and southeast and "Gila R." from the east. The Colorado below the Green-Grand confluence follows a southwesterly course all the way to where is the central Grand Canyon region, where it receives the Little Colorado, thus indicating it follows a model of the Egloffstein geography.

Aquamaps, Inc.

- 1986 10.66 **Colorado River recreation guide : an atlas of the Colorado River from Grand Lake, Colorado to Yuma, Arizona.** Denver, Colorado: Aquamaps, Inc., SEPARATELY PAGINATED SECTIONS. Arrowsmith, A. [Arrowsmith, Aaron]

WHEAT I:253

- 1802 25.1192 **A Map Exhibiting all the New Discoveries, in the Interior Parts of North America, Inscribed by Permission To the Honorable Governor and Company of Adventurers of England Trading into Hudsons Bay, In testimony of their liberal Communications To their most Obedient and very Humble Servant, A. Arrowsmith. N. 24 Rathbone Place, January 1st 1795—Additions to 1802.**

► “California” is separated from “New Navarra” by “Gulf of California”, north and northwest of which is shown mostly blank. “Rio Colorado or Red River” and “R. del Coral” are depicted as separate streams, with the Colorado coming from the northeast and the Coral coming from the east; once near each other both continue on separate courses southwestward to the head of the gulf. One of the upper tributaries of the “Coral” is labeled “Rio Hillo”. One of two northerly tributaries to the “Coral” is labeled “Rio del Azul or Blue R.”, both of which have headwaters common with the Colorado.

NOTE: The 1795 ed. [WHEAT I:231] does not display the southwestern or southern part of North America, thus it is not cited in this Cartobibliography.^{53,54}

⁵³ Historians of the Lewis and Clark Expedition have well discussed a **MANUSCRIPT** map (WHEAT I:239 [as “c. 1796 The West”]) of the western part of North America by Nicholas King, 1803, now in the Library of Congress (cataloged there, in square brackets thus: “[Lewis and Clark map, with annotations in brown ink by Meriwether Lewis, tracing showing the Mississippi, the Missouri for a short distance above Kansas, Lakes Michigan, Superior, and Winnipeg, and the country onwards to the Pacific]”, digitized online at <https://www.loc.gov/item/98687178/>). This map has been identified as having been modified from a part of the just-published map by Arrowsmith (1802, ITEM NO. 25.1192, WHEAT I:253) and apparently the manuscript had been taken on the expedition. (For a discussion, see John Logan Allen, *Passage Through the Garden : Lewis and Clark and the Image of the American Northwest* (University of Illinois Press, Urbana, 1976), pp. 97-103, figure 21 [pp. 100-101].) (King’s map is also illustrated in Gary Moulton, *The Journals of the Lewis and Clark Expedition. Volume 1. Atlas of the Lewis and Clark Expedition* (University of Nebraska Press, Lincoln and London, 1983), map 2.) The manuscript map includes in its southwestern part bare sketches of three rivers flowing south to southwestward: “Rio Colorado” on the west, “Rio des los Apostolos” to its east, and farther east “Rio Norte or Rio Bravo” that is the Rio Grande. North of the headwater areas of these rivers is a broad swatch labeled “Conjectural”. The course of each of these rivers is an emendation because they are displayed very differently from their courses (and labeling) on the Arrowsmith map (see below). Allen (figure 22, p. 116) also displays “the King 1803 map compared with a modern base map”, which overlays the King river courses on the modern base map. Interestingly, and coincidentally, the “Rio des los Apostolos” parallels the upper Colorado River to its east about to the position where would be the eastern Grand Canyon; the “Rio Colorado” parallels the upper Colorado River to its west to where would be the confluence of the Colorado and Virgin Rivers. Take note as well that on many contemporary maps, the supposed river of the Apostles is usually shown west of the lower course of the Colorado River, often without definite headwaters or outlet though occasionally meeting the lowermost Colorado near the Gulf of California. On examining Allen’s overlay against the King map, it is apparent that there is a disconnection; that, with respect to latitude, King placed these rivers several degrees too far north according to his lines of latitude. Although the relationships of all the rivers on King’s map are faithful in proportion to each other on Allen’s overlay (compared to King’s original), for some reason the overlay shows the Colorado actually reaching to the correct latitude for Grand Canyon as shown on the modern base map. (For comparison here, the 1802 Arrowsmith map shows the area north and northwest of the “Gulf of California” as mostly blank. “Rio Colorado or Red River” and “R. del Coral” are depicted as separate streams, with the Colorado coming from the northeast and the Coral coming from the east; once near each other both continue on separate courses southwestward to the head of the gulf. One of the upper tributaries of the “Coral” is labeled “Rio Hillo”. One of two northerly tributaries to the “Coral” is labeled “Rio del Azul or Blue R.”, both of which have headwaters common with the Colorado. “Rio Bravo or Rio Rio del Norte” is more correctly shown on the course of the Rio Grande southward and southeastward from the vicinity of Santa Fe.)

⁵⁴ See also the 1805 **MANUSCRIPT** map (WHEAT II:270): “A Map of part of the Continent of North America, Between the 35th and 51st degrees of North Latitude, and extending from 89° Degrees [*sic*] of West Longitude

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1804 25.2275 **Map of America by A. Arrowsmith 1804.** ("London. Published 4th September 1804 by A. Arrowsmith N^o10 Soho Square.") ("Engraved by W. West, the Hills by H. Wilson.")
 ► With the exception of a single range, "Stony Mountains", running north-south through the western part of North America, the lands on either side are blank south of the Canadian and north of the Mexican provinces. "Rio Colorado" is delineated alongside the eastern portion of the western blank area, following an effectively straight south-to-south-westerly course to meet the head of "Gulf of California"; no tributaries are shown. A larger river system, with two tributary systems, arrives from the northeast nearly to the Colorado then closely parallels it all the way to the gulf.
- 1808 25.1755 **Map of the World on a Globular Projection, Exhibiting Particularly the Nautical Researches of Capⁿ James Cook, F.R.S. with all the Recent Discoveries to the present Time, carefully Drawn by A. Arrowsmith. Hydrographer to H.R.H. the Prince of Wales. The Plan Work Engraved by T. Foot.—The Writing by Wigzell & Mozeen.** ("January 1st 1794—Additions to 1799. D^o ___ to 1808." "I. Puke Sculp^t." "London. Published as the Act directs, Jan^y 1st 1794, by A. Arrowsmith, N^o 10 Soho Square.")
 Cartouche: "E. Dayes del.", "W. Wilson sculp".
 ► The peninsula, "California", is separated from "Sonora" by "Gulf of California". The head of the gulf twists from northwest to north-northeast, where it receives two channels from the north-northeast, which form a very extended island, at the head of which "R. Hila" arrives from the east. There is no indication of the Colorado River; in fact, the entire region north of "R. Hila" is effectively blank except for three place names, "Axas", "Bagopas", and "Quivira".
- WHEAT II:295
- 1810 25.1054 **A new map of Mexico and adjacent provinces compiled from original documents By A. Arrowsmith 1810. London. Published 5th October 1810. by A. Arrowsmith 10 Soho Squ^e Hydrographer to H.R.H. the Prince of Wales. Engraved by E. Jones. 4 sheets.**
 This map is copied without credit from Humboldt (1808), showing "Rio Colorado" generally, and at the confluence of "R. Jaguesila" the label "Puerto de Bucarelli" (Puerto de Bucareli).]

to the Pacific Ocean: Compiled from the Authorities of the best informed travellers by M. Lewis. Note, The Missouri River from Fort Mandan in Lat. 47° 25' 47" N, and in Long. 101° West from the meridian of Greenwich, is corrected by Celestial Observations. The Country West of Fort Mandan is laid down principally from Indian information.", "Copied by Nicholas King, 1805." (Library of Congress, digitized online at <https://lccn.loc.gov/00560525>.) The southwestern quadrant of this sketch map depicts "River Colorado" and "R. de los Apostolos.", both flowing southward from headwaters south of the area of interest to Lewis and Clark; they converge at the head of "Gulf of California", where is labeled "S^t Pedro". This map, as was the 1803 manuscript map, is illustrated in Allen's *Passage Through the Garden* (pp. 232-233), with a comparable overlay on a modern base map (p. 234) The 1805 map is illustrated in Moulton's *Atlas of the Lewis and Clark Expedition*, map 32b (and variants, 32a, 32c). Notably, the southwestern rivers are shown a decidedly farther distance to the west than they are in reality. The Colorado never was a river of consideration by the explorers, only one of which they were aware.

Note as well that the manuscript map of the expedition by William Clark, 1811, and its published version (in *History of the Expedition Under the Command of Captains Lewis and Clark: To the Sources of the Missouri, thence Across the Rocky Mountains and down the River Columbia to the Pacific Ocean*, Prepared for the Press by Paul Allen, Esquire [*historically known to have been edited by Nicholas Biddle*], Bradford and Inskeep, Philadelphia, 1814), do not embrace the Colorado River headwaters. However, an 1810 manuscript map, "A Map of part of the Continent of North America" (Yale University, last accessed 9 December 2024, https://collections.library.yale.edu/catalog/2012144?child_oid=1053073), signed by William Clark, includes "Rio Colorado" to the "G of California", which includes along the Colorado River between the confluences of "Rio Languanans" and "Rio Jasquevilla" the label "Puerto del Bacorilli" (*sic*, Puerto de Bucareli), and its position that belie its having been copied at least in this part from Pike's 1810 map, which was there mislabeled as "Puerto del Bacorelli".

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1811 25.1193 **A Map Exhibiting all the new Discoveries, in the Interior Parts of North America, Inscribed by Permission To the Honorable Governor and Company of Adventurers of England Trading into Hudsons Bay, In testimony of their liberal Communications To their most Obedient and very Humble Servant, A. Arrowsmith— Hydrographer to H.R.H. the Prince of Wales. N^o10 Soho Square, January 1st 1795—Additions to 1811.**
 ▶ In the area of interest to this Cartobibliography, the map is unchanged from that of Arrowsmith (1802, [ITEM NO. 25.1192](#)). "California" is separated from "New Navarra" by "Gulf of California", north and northwest of which is shown mostly blank. "Rio Colorado or Red River" and "R. del Coral" are depicted as separate streams, with the Colorado coming from the northeast and the Coral coming from the east; once near each other both continue on separate courses southwestward to the head of the gulf. One of the upper tributaries of the "Coral" is labeled "Rio Hillo". One of two northerly tributaries to the "Coral" is labeled "Rio del Azul or Blue R.", both of which have headwaters common with the Colorado.
NOTE: The 1795 ed. [[WHEAT I:231](#)] does not display the southwestern or southern part of North America, thus it is not cited in this Cartobibliography.
- [WHEAT II:313](#)
- 1814 25.1209 **A Map Exhibiting all the New Discoveries, in the Interior Parts of North America, Inscribed by Permission To the Honorable Governor and Company of Adventurers of England Trading into Hudsons Bay, In testimony of their liberal Communications To their most Obedient and very Humble Servant, A. Arrowsmith, Hydrographer to H.R.H. the Prince of Wales. N^o10 Soho Square, January 1st 1795—Additions to 1811.** ("Additions to June 1814.") ("London, Published 1 Jan. 1795 by A. Arrowsmith N^o10 Soho Square.-----Additions to 1802".) [All dates thus.]
 ▶ "California" is separated from "Sonora" by "G. of California", north and northwest of which is shown mostly as blank. "Rio Colorado" is depicted between the head of the gulf and the confluence of "R. Nabajoa" (San Juan River) and "R. Zaguuanas". "R. Jaquesila" (Little Colorado River) is a tributary from the east, a short, unlabeled tributary from the east (Bill Williams River?) is in the lower course of the Colorado, and "R. Gila" reaches the Colorado a short distance above the head of the gulf.
NOTE: The 1795 ed. [[WHEAT I:231](#)] does not display the southwestern or southern part of North America, thus it is not cited in this Cartobibliography.
- 1819 25.1993 **A New Map of Mexico and Adjacent Provinces Compiled from Original Documents by A. Arrowsmith 1810.** ("London. Published 5th October 1810. by A. Arrowsmith 10 Soho Squ^e. Hydrographer to H.R.H. the Prince of Wales.") ("Engraved by E. Jones".)
In: Arrowsmith, A., *Atlas to Thompson's Alcedo; or dictionary of America and West Indies; collated with all the most recent authorities, and composed chiefly from scarce and original documents, for that work, by A. Arrowsmith, Hydrographer to His Royal Highness the Prince Regent.* London: Printed by George Smeeton.
 ▶ "Rio Colorado" is depicted between the Gulf of California and the confluence of "R. Zaguuanas" and "R. Nabajoa", following an effectively straight southwesterly course until shortly before reaching the gulf, where it turns to the south-southeast where it also receives "R. Gila" from the east. At the confluence of "R. Jaguesila" (Little Colorado River) is the label "Puerto de Bucarelli" (Puerto de Bucareli). It also receives "R. S. Maria" (Bill Williams River) in its lower course. Paralleling the Colorado to its west, marked with an arrow indicating a southwestward flow though without source or confluence, is "R. de las Pyramides (sulphureous) The Mouth of this River is unknown". Paralleling part of the lower course, with an arrow indicating a northeastward flow, is "R. de los Martires, without source or confluence.
 See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1819 25.2171 **A Map Exhibiting all the new Discoveries in the Interior Parts of North America, Inscribed by Permission to the Honorable Governor and Company of Adventurers of England Trading into Hudsons Bay, In testimony of their liberal Communications To their most Obedient and very Humble Servant, A. Arrowsmith hydrographer to H.R.H. the Prince of Wales.**
[Southwest sheet.] ("N^o 10 Soho Square. January 1st 1795 Additions to 1811. 1818.") ("Additions to June 1814.") ("London. Published 1 Jan. 1795 by A. Arrowsmith N^o10 Soho Spuare [sic] ___ Additions to 1802.") ("Puke sc.")
In: Arrowsmith, A., *Atlas to Thompson's Alcedo; or dictionary of America and West Indies; collated with all the most recent authorities, and composed chiefly from scarce and original documents, for that work, by A. Arrowsmith, Hydrographer to His Royal Highness the Prince Regent.* London: Printed by George Smeeton.
▶ "R. Colorado" is depicted between "G. of California" and the confluence of "R. Zaguuanas" and "R. Nabajoa", following an effectively straight southwesterly course until shortly before reaching the gulf, where it turns to the south-southeast where it also receives "R. Gila" from the east; enroute it receives the tributaries "R. Jaqueila" (Little Colorado River) and an unlabeled tributary (Bill Williams River). Paralleling the Colorado to its west are two streams, each without defined headwater or confluence: "R. de las Pyramides, and "R. de Martires".
See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
NOTE: The 1795 ed. [[WHEAT I:231](#)] does not display the southwestern or southern part of North America, thus it is not cited in this Cartobibliography.

WHEAT II:358

- 1824 25.1210 **A Map Exhibiting all the New Discoveries, in the Interior Parts of North America, Inscribed by Permission To the Honorable Governor and Company of Adventurers of England Trading into Hudsons Bays, In testimony of their liberal Communications To their most Obedient and very Humble Servant, A. Arrowsmith. N^o10 Soho Square, January 1st 1795—Additions to 1811.18.19.24.** ("London, Published 1 Jan. 1795 by A. Arrowsmith N^o10 Soho Square—Hydrographer to His Majesty.")
▶ "California" is separated from "Sonora" by "G. of California", north and northwest of which is shown mostly as blank. "Rio Colorado" is depicted between the head of the gulf and the confluence of "R. Nabajoa" (San Juan River) and "R. Zaguuanas". "R. Jaquesila" (Little Colorado River) is a tributary from the east, a short, unlabeled tributary from the east (Bill Williams River?) is in the lower course of the Colorado, and "R. Gila" reaches the Colorado a short distance above the head of the gulf.
NOTE: The 1795 ed. [[WHEAT I:231](#)] does not display the southwestern or southern part of North America, thus it is not cited in this Cartobibliography.

Arrowsmith and Lewis [Arrowsmith, Aaron, AND Lewis, Samuel]

WHEAT II:259 [with illustration facing p. 2]

- 1804 25.673 **Louisiana.** ("drawn by S. Lewis") ("Tanner Sc.") *In:* *A new and elegant general atlas, comprising all the new discoveries, to the present time; containing sixty-five [sic] maps, drawn by Arrowsmith and Lewis.* Philadelphia: John Conrad and Co.; Baltimore: M. and J. Conrad and Co.; Washington City: Rapin, Conrad and Co.; Petersburg: Somervell and Conrad; and Norfolk: Bonsal, Conrad and Co., Map 55.
▶ Labels "New Albion" and "New Navarre" at the head of the "Gulf of California", where *no* river enters it, although two short rivers are shown in New Albion that drain to the Pacific. The mountain spine labeled "Mⁿ. de la Roche" and "Stoney Mⁿ." (the French *montagne*) passes directly through the region where the Grand Canyon is situated.
- 1804 25.2172 **Spanish Dominions in North America.** *In:* *A new and elegant general atlas, comprising all the new discoveries, to the present time; containing sixty-five [sic] maps, drawn by Arrowsmith and Lewis.* Philadelphia: John Conrad and Co.; Baltimore: M. and J.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Conrad and Co.; Washington City: Rapin, Conrad and Co.; Petersburg: Somervell and Conrad; and Norfolk: Bonsal, Conrad and Co., Map 57.”

► In “New Mexico” and “Pimeria Navarre” the Colorado River seems to be absent, and what must be the Gila River (not labeled) passes southwest then westward to a point where it turns south and divides into two widely separated streams that converge independently to the head of the “Gulf of California”.

- 1812 25.674 **Louisiana.** (“drawn by S. Lewis”)
In: A new and elegant general atlas. Comprising all the new discoveries, to the present time. Containing sixty three maps, drawn by Arrowsmith and Lewis. Intended to accompany the new improved edition of Morse’s Geography, but equally well calculated to be used with his gazetteer, or any other geographical work. Boston: Thomas and Andrews, 1 volume with 63 maps, Map 50.
 ► Labels “New Albion” and “New Navarre” at the head of the “Gulf of California”, where *no* river enters it. The mountain spine labeled “M^o de la Roche” and “Stoney M^o” passes directly through the region where the Grand Canyon is situated.
- 1812 25.2173 **Spanish Dominions in North America.**
In: A new and elegant general atlas. Comprising all the new discoveries, to the present time. Containing sixty three maps, drawn by Arrowsmith and Lewis. Intended to accompany the new improved edition of Morse’s Geography, but equally well calculated to be used with his gazetteer, or any other geographical work. Boston: Thomas and Andrews, 1 volume with 63 maps, Map 52.
 ► In “New Mexico” and “Pimeria Navarre” the Colorado River seems to be absent, and what must be the Gila River (not labeled) passes southwest then westward to a point where it turns south and divides into two widely separated streams that converge at the head of the “Gulf of California”.

Arrowsmith, J. [Arrowsmith, John]

- 1832 25.2103 **Mexico, by J. Arrowsmith.** (“London, Pub^d 15 Feb^y 1832, by J. Arrowsmith, 35, Essex S^t Strand.”)
In: The London atlas of universal geography, exhibiting the physical and political divisions of the various countries of the World, constructed from original materials. London: J. Arrowsmith. [1838.] [Atlas sheet, no. “44”.]
 ► “R. Colorado” is depicted on a more or less straight northeast-southwest course between the head of “Gulf of California” and headwaters east of “Youta or G^t. Salt L.” Tributaries are “R. Nabajoa” (San Juan River), “J. Jaquesila” (Little Colorado River), a short tributary (not labeled) from the northwest between the San Juan and Little Colorado, “Pyramid or Adams R.” from the north and northwest, “R. S. Maria” (Bill Williams River), and “R. Gila”, which reaches the head of the gulf independently of the Colorado. At the confluence of the Little Colorado is the label “P^to Bucarelli” (Puerto de Bucareli).
 See also [remarks](#) on the “river of the sulfurous pyramids” in the Notes for Section 2.
- 1834 25.1211 **Mexico, by J. Arrowsmith.** (“London, Pub^d 15 Feb^y 1834, by J. Arrowsmith, 33 East S^t Red Lion Square.”) *In: The London atlas of universal geography, exhibiting the physical and political divisions of the various countries of the World, constructed from original materials.* London: J. Arrowsmith. [1838.] [Atlas sheet, no. “44”.]
 ► “R. Colorado” is depicted on a more or less straight northeast-southwest course between the head of “Gulf of California” and headwaters east of “Youta or G. Salt L.” Tributaries are “R. Nabajoa” (San Juan River), “J. Jaquesila” (Little Colorado River), a short tributary (not labeled) from the northwest between the San Juan and Little Colorado, “Pyramid or Adams R.” from the north and northwest, “R. S. Maria” (Bill Williams River), and “R. Gila”, which reaches the head of the gulf independently

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

of the Colorado. At the confluence of the Little Colorado is the label "Ptº Bucarelli" (Puerto de Bucareli).

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

- 1839 25.2305 **The coasts of Guatemala and Mexico from Panama to Cape Mendocino with the Principal Harbours in California. 1839.** ("London, Smith Elder & Cº 1839.") ("John Arrowsmith [sic]").
In: Forbes, Alexander, *California: A history of Upper and Lower California from their first discovery to the present time, comprising an account of the climate, soil, natural productions, agriculture, commerce, &c. A full view of the missionary establishments and condition of the free and domesticated Indians. With an appendix relating to steam navigation in the Pacific.* London: Smith, Elder and Co.
 ► Sketch map includes the Gulf of California (not labeled) and the peninsula, "L" or Old California". "R. Colorado" is delineated on an effectively straight southwesterly course from headwater to the gulf, arcing to the south only at the final reach. It receives en route two tributaries (not labeled, which may be the San Juan and Little Colorado Rivers) from the east, one tributary (not labeled, which may be the Virgin River) from the north, and "R. Gila" from the east.
- 1840 25.1212 **Mexico, by J. Arrowsmith.** ("London, Pub^d 15 Feb^y 1840, by J. Arrowsmith, 10 Soho Square.")
 ► "R. Colorado" is depicted on a more or less straight northeast-southwest course between the head of "Gulf of California" and headwaters east of "Youta or G. Salt L." Tributaries are "R. Nabajoa" (San Juan River), "R. Jaquesila" (Little Colorado River), a short tributary (not labeled) from the northwest between the San Juan and Little Colorado, "Pyramid or Adams R." from the north and northwest, "R. S. Maria" (Bill Williams River), and "R. Gila", which reaches the head of the gulf independently of the Colorado. At the confluence of the Little Colorado is the label "Ptº Bucarelli" (Puerto de Bucareli).

WHEAT II:459

Asher and Adams [firm]

- NO DATE 25.1149 **Asher & Adams' Arizona.**

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

*In: Asher & Adams' new commercial topographical and statistical atlas and gazetteer of the United States: with maps showing the Dominion of Canada, Europe and the world. * * * Compiled, drawn and engraved under the supervision of the publishers, by their own engineers, topographers, and artists, from the most recent official reports, astronomical observations, surveys, records, and documents of the United States and Territories, the Dominion of Canada, the several States, railroad companies etc.* New York: Asher and Adams.

Map is on pp. 139/140), dated 1874: "Entered according to Act of Congress in the year 1874 by Asher & Adams in the Office of the Librarian of Congress at Washington"; the "4" in the date seems to have been re-engraved, awkwardly.

► "Colorado River" is depicted from south of "Ft. Yuma" and "Arizona City (Yuma P.O.)" to just north of the Arizona-Utah boundary. In the Grand Canyon region, the river follows a wildly sinuous course between "Little Colorado R." and "Rio Virgin", with "Grand Canon of the Colorado" labeled at its western end. "Lava Creek" (Cataract Creek) is shown as a tributary from the south. Also labeled are "Boulder Canon" and "Black Canon".

1873 25.1142

Asher & Adams' geological map. United States and territories.

In: Asher & Adams' new commercial, topographical, and statistical atlas and gazetteer of the United States: with maps showing the Dominion of Canada, Europe and the World . . . Compiled, drawn, and engraved under the supervision of the publishers . . . New York: Asher and Adams.

Map is on pp. 111/112, dated 1874.] Scale 1 inch = 110 miles.

► Hand-colored map. An early portrayal of the Grand Canyon and lower Colorado River regions following on the 1861 portrayals by Newberry. In the Grand Canyon region it depicts only "Volcanic Rocks" and "Paleozoic. Including Silurian, Devonian and Permian." In the lower Colorado River region it depicts only areas marked as "Eozoic. Including Laurentian, Labradorian and Huronian." The base map depicts the Colorado River (not labeled) most irregularly throughout the region, with the Virgin, Little Colorado, and San Juan Rivers (not labeled) as tributaries. In western Grand Canyon, "Hualapais Vil." is noted as a place (*i.e.*, Peach Springs).

Atchison, Topeka and Santa Fe Railway System

1899 25.1550

The Atchison, Topeka and Santa Fe Railway System. 1899. ("Eng'd by American Bank Note Company, New York.")

► Main routes are highlighted in red; spurs in black. The "Santa Fe Pacific R. R." main route is shown crossing northern Arizona, passing closest to "Grand Canon of the Colorado" at "Peach Sprs." A spur line is shown between Kingman and Chloride. The Grand Canyon, and "Marble Canon", are depicted as encanyoned.

Atlantic and Pacific Railroad Co.

1883 25.611

- 1933 25.984 Guide to the Colorado mines. (Foreword by Robert Ernest Cowan.) *California Historical Society Quarterly*, 12(1) (March): 3-10, frontispiece map.
 (Cowan, pp. 3-4; Note by the Publication Committee, p. 4; "Guide to the Colorado Mines", pp. 5-10, a reprinting of H. H. Bancroft and Co., 1863, **ITEM NO.** 2.29140 in Volume 1/Part B of **THE GRAND CANON**. Appended: "A trip to the Colorado mines in 1862; from the reminiscences of Mahlon Dickerson Fairchild, pp. 11-17.)
MAP reproduces the one that appeared with the 1863 ed.: **Bancroft's map of the Colorado mines published by H. H. Bancroft and Co., San Francisco, Cal. 1863.**
 ► "Colorado" depicted from Mexico to the Grand Canyon region. Grand Canyon labeled "Big Canon of the Colorado". The main stem of the Colorado is shown as coming from the north approximately where Kanab Creek is situated.]
-

Barber, B. B., AND Willard, A.

- 1835 25.1320 **Map of the United States of America with its territories & districts. Including also a part of Upper & Lower Canada and Mexico. Published by B,B,Barber & A,Willard, Hartford, 1835.** [Commas and spacing, thus.]
 ► Over much of the Southwest is placed, "conveniently", a table of distances of principal towns from the "Seat of Government", with populations according to the 1830 U.S. Census, and "comparative heights of the principal Mountains in the United States and its Territories". The Southwest is furthermore portrayed sparsely, with "Rio Colorado" shown crudely between the head of the "Gulf of California" and headwaters. No tributaries are labeled other than "Rio Gila", which converges at the head of the gulf along with the Colorado. There is an unusual representation of "Rio de las Piramides sulfureas", the so-called, misrepresented and mistranslated, river of the "sulfurous pyramids", which is depicted heading in an area west of where the Grand Canyon is situated, flowing southwestward and southward, finally turning southeastward to enter the west side of the Gulf of California some distance below the mouths of the Colorado/Gila.
 See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
 For a later ed. see Reed and Barber (1850, **ITEM NO.** 25.1720). For a still later ed., which in the Southwest displays features identically to the 1835 ed. but without the occluding table, see Reed and Barber (1852, **ITEM NO.** 25.1150).

 ► In "Méxique" there is a single river (not labeled) divided into two channels at the head of a the Gulf of California (not labeled).
-

Bartholomew, J. G. [Bartholomew, John George]

- NO DATE 25.1576 **The National Geographic Magazine Map of Mexico Prepared by J. G. Bartholomew, Gilbert H. Grosvenor, Editor.** ("The Edinburgh Geographical Institute".) ("John Bartholomew & Co".)
 Library of Congress ascribes date "1911?". LOC copy of map bears stamp, "Library Dep't of State. May 22: 1912".
 ▶ "Rio Colorado depicted between "Castle Dome" in Arizona and head of "Gulf of California". Its course is depicted by a generally undulating line.

Bartholomew, John [Bartholomew, John, Jr.]

- NO DATE 25.1869 **British Empire Throughout the World Exhibited in One View. Compiled by John Bartholomew Junr. F.R.G.S.** ("A Fullarton & Co Edinburgh, London & Dublin.") ("Figures Designed & Engraved by A. Thom." [refers to ornamental illustrations of clothed and costumed people from around the world].) ("Engraved by J. Bartholomew [sic], Edinr.") [Ca. 1850.]
 ▶ Simplistic base map depicts continents and rivers. "R. Colorado" is depicted on a generalized, mostly southwesterly course to the head of "G of California", with "R. Gila" the only tributary, from the east-northeast.
- NO DATE 25.2399 **(United States, N^oII (Western Division) The Pacific States, the Territories and a Portion of the North-Western States. By J. Bartholomew, F.R.G.S.** ("George Philip & Son, London & Liverpool.") [Ca. 1873.]
 ▶ "Rio Colorado" is delineated between "Gulf of California" and confluence of "Green R." and "Grand R." From that confluence the course is south-southwest to the confluence of "R. San Juan" (from the east-southeast), thence west for some distance north of the Utah-Arizona boundary, then southwest and arcing to south-southwest to the confluence of "Little Colorado or Flax R." from the east-southeast, continuing in that direction to the confluence of Diamond Creek (not labeled), thence west-northwest to the confluence of "Rio Virgen" from the north and northeast, thence southwest to "Calville" [sic], and southward to the gulf. Cataract Creek (not labeled) is shown as a tributary to the Little Colorado just above the confluence with the main Colorado. A tributary (not labeled) from the northwest is shown between the Little Colorado and Diamond Creek; and "R. Yampa is shown as a tributary passing through "Red L." before reaching the Colorado from the south-southwest. The overall geography and various labels indicate it follows the Egloffstein model. "Big Cañon" is labeled between Calville and the Yampa confluence, and the Colorado is shown with hachures as passing through various plateaus.
- 1856 25.1106 **Western States, including California, Oregon, Utah, Washington, New Mexico, Nebraska, Kansas, Indian Territory &c.** ("Published by A. & C. Black, Edinburgh". "Printed in Colours by Schenck & Macfarlane, Edinburgh." "Drawn & Engraved by J. Bartholomew, Edinburgh".)
WHEAT IV:905
In: Black's atlas of North America. A series of twenty maps constructed and engraved by John Bartholomew, with introductory letter-press and a complete index. Edinburgh: Adam and Charles Black, map 18.
 ▶ "Rio Colorado" is depicted from south of the international boundary below "Camp Yumas" and the confluence of "Green River Fork of R. Colorado" and "Grand River, Fork of Rio Colorado". The Green and Grand are depicted to flow parallel to each other into the Grand Canyon area, where between them in southernmost Utah is the label "Sierra de la Laterna" [sic]. "Rio San Juan" and "Little Colorado R." are shown as tributaries to the Grand in the eastern Grand Canyon area. A tributary (not labeled; Cataract Creek) reaches the Colorado in the mid-canyon area, although the middle part of its course from near "Mt. Sigreaves" and "Mt. Kendricks" is shown by

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

a dotted line. "Ojo del Archillen" and "Mohave R." are shown as tributaries to the Colorado from the west, not far south of the confluence of "Virgin R." (which in turn displays a tributary from the northwest (Muddy River?) labeled as "Ojo del Gaeton".

NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.

- 1870 25.1693 **United States by J. Bartholomew, F.R.G.S.**
In: *The student's atlas, consisting of thirty-two maps of modern geography, embracing all the latest discoveries and changes in boundaries, and six maps of ancient and historical geography.* London, Glasgow, and Edinburgh: William Collins, Sons, and Company, map 28.
 ▶ "Rio Colorado" is depicted between "Gulf of California" and the confluence of "Green R." and "Grand R." Its course between that confluence and the confluence of "R. Virgen" is drawn generally, southwestward to the confluence of "Lit. Colorado", thence generally west-southwest to the Virgin. Tributaries in the lower Colorado River reach are an unlabeled, small tributary from the west; a larger, unlabeled tributary from the east (Bill Williams River), and "R. Gila" from the east-northeast. A river (not labeled) is depicted between the Salton Sea (not labeled) and the Colorado at the southerly international boundary.
- 1871 25.2359 **United States. By J. Bartholomew, F.R.G.S.** ("Engraved and Printed in Colours by J. Bartholomew, Edin.?" ("A. Fullarton & C^o London & Edinburgh."))
In: *A descriptive hand atlas of the world.* Edinburgh, London, and Dublin: A. Fullarton and Co. [The cover indicates "Pt. C" and the imprint gives the publisher's locations as "London, & Edinburgh."] [Map 22.]
 ▶ "Rio Colorado" is delineated between the head of "Gulf of California" and the confluence of "Green R." and "Grand R."; the lower courses of the Green, Grand, and tributaries in "Utah" are delineated by dashed lines, the Colorado's course becoming a solid line at the Utah-Arizona boundary. It follows a south-southwesterly course to the confluence of "Colorado Chiquito" from the southeast, then turns west-southwesterly to the confluence of "R. Virgen", thence southward to the gulf. Cataract Creek (not labeled) seems to be shown with its confluence midway through what is the Grand Canyon. On the lower course of the Colorado, unlabeled tributaries arrive from the west, east, and (this being the Bill Williams River) east; with "Rio Gila" a tributary from the east. On the west side of the Colorado from southernmost Utah into northern Arizona is "S^o de la Lanterna".
NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.
- 1873 25.758 **(Pacific States) California, Nevada, Oregon, Washington, Idaho, Utah, Arizona and part of Montana.** *In:* *Zell's descriptive hand atlas of the world.* Philadelphia: T. Ellwood Zell, 55 maps, separately paginated texts and indices. (Ornamental title page: *A descriptive hand atlas of the world.*)
 ▶ The "Rio Colorado" between the confluence of "Lit. Colorado or Flax River" and approximately where the Diamond Creek is situated, is represented only by a conjecturally dashed line. The river upstream from the confluence is labeled "Rio Colorado grande". The region south of the confluence is labeled "Colorado Plateau"; the region immediately north of the river is blank. The lower Colorado River region is labeled "Great Colorado Val."
- 1884 25.2120 **General Map of the United States. By J. Bartholomew, F.R.G.S.** ("Engraved & Printed in colours by J. Bartholomew, Edin.?" ("Published by A. & C. Black, Endinburgh."))
In: *Black's general atlas of the world : new and revised edition : embracing the latest discoveries, new boundaries, and other changes : accompanied by introductory letterpress and index.* Edinburgh: Adam and Charles Black, Map 40/41.
 Compare this map against **ITEM NO.** 25.2121 from the same volume.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “Rio Colorado” is shown between the “Gulf of California” and the confluence of “Green R.” and “Grand R.” While its course is reasonably accurate, the label “Marble Canon” appears between the confluence of “R. Colorado Chiquito Lit. Colorado R.” (from the southeast). The label “Big Canon” appears between the confluences of Diamond Creek (not labeled) and “Virgen R.” The label “Painted Desert” is written across the area north of the Colorado and east of it. Two unlabeled tributaries reach the Colorado from the southeast; one of them, Cataract Creek, the other, east of it, uncertain, heading at “Humphrey’s Peak”.

- 1884 25.2121 **California, Nevada, Oregon, Washington, Idaho, Utah, Arizona[,] Montana, Dakota, Wyoming, Nebraska, Colorado, Kansas &c.** (“J. Bartholomew, Edinburgh.”) (“Published by A. & C. Black.”) [These labels seemed to have been eradicated and reengraved.]
In: Black’s general atlas of the world : new and revised edition : embracing the latest discoveries, new boundaries, and other changes : accompanied by introductory letterpress and index. Edinburgh: Adam and Charles Black, Map 44^M.
 Compare this map against [ITEM NO. 25.2120](#) from the same volume.
 ► “Rio Colorado”, as labeled on its lower reach, and “Rio Colorado grande”, as labeled on its upper reach, is shown between the “Gulf of California” and the confluence of “Green R.” and “Grand R.” While its course is reasonably accurate, the label “Marble Canon” appears between the confluence of “Colorado Chiquito or Flax River” (from the southeast and labeled “Lit. Colorado R.” on a headwater branch) and the confluence of “Kanab Cañon” (from the north). The label “Big Cañon of the Colorado” appears between the confluences of “Cataract Cr.” (from the southeast) and “Virgin R.” (from the northeast and north-northeast). The label “Painted Desert” is written along the lower course of the Little Colorado. Parallel to and to the east of Cataract Creek is “Parke Cr.”, the course of which turns to the northeast approximately where today is Royal Arch Creek. “Buckskin Plateau” is the label for the Kaibab Plateau. To the west, “Yampa Cr.” is shown running to “Red L.” but no longer is continued to the Colorado.

Bartlett, John Russell

- [WHEAT III:798](#) [with illustration facing p. 240]
- 1854 25.759 **General Map Showing the Countries Explored & Surveyed by the United States and Mexican Boundary Commission in the Years 1850, 51, 52 & 53. Under the direction of John R. Bartlett, U.S. Commissioner.**
In: Personal narrative of explorations and incidents in Texas, New Mexico, California, Sonora, and Chihuahua, connected with the United States and Mexican Boundary Commission, during the years 1850, '51, '52, and '53. New York and London: D. Appleton and Co., 2 volumes, 506 pp., 624 pp., map. [Map printed by J. H. Colton and Co., New York.]
 ► “Rio Colorado” is depicted between “Gulf of California” and confluence of “Green River” and “Grand River”. However, the Green and Grand run parallel to each other to the Grand Canyon region below “Little Colorado”, where they also straddle a mountainous area; and as such, the Little Colorado River is depicted as a tributary to the Grand River. “Mohave R.” is shown as a tributary to the Colorado from the west.
- 1854 25.760 *Personal narrative of explorations and incidents in Texas, New Mexico, California, Sonora, and Chihuahua, connected with the United States and Mexican Boundary Commission, during the years 1850, '51, '52, and '53.* London: George Routledge and Co., and New York: D. Appleton and Co., 2 volumes, 506 pp., 624 pp., **MAP**. [See Bartlett (1854, [ITEM NO. 25.759](#)).]
- 1854 25.761 *Personal narrative of explorations and incidents in Texas, New Mexico, California, Sonora, and Chihuahua, connected with the United States and Mexican Boundary Commission, during the years 1850, '51, '52, and '53.* New York: D. Appleton and

Co., and London [not indicated], 2 volumes in 1, 506, 624 pp., **MAP**. [See Bartlett (1854, **ITEM NO.** 25.759).]

Baur, C. F. [Baur, Carl Friedrich]

1857 25.2078 **Der Vereinigten Staaten und Mexico** (Bl. XIV). ("Entw. u. Zeichn. v. C. Baur, Jng. [sic] Topograph".) ("Bassermann'sche Verlagshandlung in Mannheim.") ("Bf. Walther lith.") [In German.]
In: Atlas für Handel u. Industrie [sic]. *Für Kaufleute, Fabrikanten u. Gewerbetreibende, Handlungs-u. Gewerbe-Schulen, polytechnische Lehr-Anstalten etc., entworfen, gezeichnet und mit erläuternden Notizen versehen von C. F. Baur Ingenieur Topograph*. Mannheim: Verlagsbuchhandlung von Friedrich Bassermann. [Volume title prints "JNDUSTRIE" thus.
 ▶ "Rio Colorado" is depicted between "MB v. Californien" (contrived ligature thus) and unlabeled headwaters; its course arcs from an upstream confluence south to southwest, receiving two tributaries (presumably the San Juan River from the east and northeast (thus) just north of the boundary of "Utah" and "New Mexico") and presumably the Little Colorado River, which, coming from the east, turns briefly northward to the Colorado, about where today would be recognized the central Grand Canyon). After the confluence of a stream from the northwest and northeast (the Virgin River), the Colorado's course is southward to the gulf, receiving enroute an unlabeled tributary from the northwest (undetermined), an unlabeled tributary from the northeast (Bill Williams River), and "Rio Gilo" (*sic*, Gila River) from the east.

Beale, Edward F.

1858 25.774 **Preliminary map of the western portion of the reconnaissance and survey for a Pacific rail road route near the 35th par. made by Capt. A. W. Whipple, T.E. in 1854-4. With additions showing the route of the proposed wagon road from Fort Defiance to the Colorado together with several lateral explorations, by E. F. Beale Supt. 1857-8**. ("Lith. of J. Bien, 60 Fulton Street N.Y.") Map scale 1:900,000.
In: Wagon road from Fort Defiance to the Colorado River. Letter from the Secretary of War, transmitting the report of the superintendent of the wagon road from Fort Defiance to the Colorado River. *U.S. 35th Congress, 1st Session, House of Representatives Executive Document 124, Serial 959*, 87 pp., map.
 Wagner and Camp (1982, p. 555) also cite, "Beale's five-page preliminary report, without the map, is included in the 35th Congress, 1st Session, Senate Document 43, Serial 922"; this is cited with Storm 215 with the inclusion, Senate

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Executive Document 43. Storm (1968, p. 35) also cites 35th Congress, 1st Session, House Executive Document 124, Serial 959. Storm 215 indicates, "The first title is the preliminary report of the reconnaissance and the second title is the final report, but the latter lacks the map. See Number 216 for a copy with map."]

► "Great Colorado" is depicted from Mexico to the confluence of "Colorado Chiquito". In the Grand Canyon region, the river is delineated roughly by two parallel lines with the label "Approximate Position of Great Colorado" (the double lines continue onto the trace of the Little Colorado, while the main Colorado (not labeled) is delineated northward by a roughly drawn single line beyond the New Mexico/Utah boundary.

Beasley, T. D. [Beasley, Thomas Dykes]

- 1890 25.1553 **Official Map of San Diego County[,] California Compiled from latest official maps of U.S. surveys, Railroad and Irrigation surveys, County Records, and other reliable sources, and Drawn by T. D. Beasley Under supervision of Jas. D. Schuyler C.E. 1889.** ("Copyright 1890, by T. D. Beasley.")
- This map is based upon the older county boundaries. "Colorado River" is shown, after having passed through "Yuma City", continuing some distance southwestward before passing off the map. No geographical details are shown south of the international border. The map comprises chiefly the arrangement of Township and Range sections.

BELKNAP COLORADO RIVER GUIDES⁵⁵**Belknap, Bill, AND Belknap, Buzz [Belknap, William, Jr., AND Belknap, William, III]**

- 1974 10.136 **Westwater, Lake Powell, Canyonlands National Park : Canyonlands river guide.** Boulder City, Nevada: Westwater Books, 63 pp.
- Includes the Colorado River in Glen Canyon between Glen Canyon Dam and Lees Ferry.
- Waterproof and non-waterproof states. Front wrap for waterproof state adds "Waterproof Edition".

Belknap, Bill; Belknap, Buzz; AND Evans, Loie Belknap

- 1991 10.137 **Belknap's revised waterproof Canyonlands river guide : Horsethief & Ruby, Westwater, Labyrinth & Stillwater, Cataract Canyon, Lake Powell.** Evergreen, Colorado: Westwater Books, 71 [72] pp.
- Includes the Colorado River in Glen Canyon between Glen Canyon Dam and Lees Ferry.
- 1996 10.138 **Belknap's revised waterproof Canyonlands river guide : Horsethief & Ruby, Westwater, Labyrinth & Stillwater, Cataract Canyon, Lake Powell.** Evergreen, Colorado: Westwater Books, 79 [80] pp.

⁵⁵ These citations of river guides produced by different members of the Belknap family are based substantially on information provided by Richard D. Quartaroli, whose collection of river maps and his knowledge of them is incomparable [for an early review see the symposium presentation by Quartaroli, "Evolution of the printed Colorado River guide in Grand Canyon, Arizona", in Michael F. Anderson (compiler, ed.), *A gathering of Grand Canyon historians; ideas, arguments, and first-person accounts; proceedings of the inaugural Grand Canyon History Symposium, January 2002 (Grand Canyon Association, Monograph 13, 2005)*, pp. 155-162].

The Belknaps have produced guides in the form of strip maps for various western rivers, appearing in many editions and printings, and in waterproof and non-waterproof states. Those that include lower Glen Canyon (that reach between Glen Canyon Dam and Lees Ferry), Marble Canyon, and Grand Canyon are listed here. Some printings of specific editions indicate they are revisions, while in other printings minor changes may be noted by those familiar with these maps, though those volumes do not state that they are revisions. Pertinent points, when known, are included in citations. It has not been possible to list every unique publication because not every known edition and printing have been seen. Further, there may be the occasional discovery of what seem to be variants; for example, Spamer's copy of Belknap's (1969, *ITEM NO.* 10.5) 4th printing (1973) of the non-waterproof state has a back cover like that of the 1st printing, which might indicate the use of wraps overstocked from earlier printings. In the case of the Canyonlands maps (Belknap and Belknap, 1974; Belknap *et al.*, 1991, 2006, 2010, which include the Colorado River in lower Glen Canyon), fewer printings within eds. have been seen by Quartaroli or Spamer. The lower Glen Canyon reach was also first added to the Grand Canyon maps in Belknap and Evans' 2017 ed., though it also continues to appear in the Canyonlands guide.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- Includes the Colorado River in Glen Canyon between Glen Canyon Dam and Lees Ferry.
- 2006 10.139 **Belknap's waterproof Canyonlands river guide : all new color edition : Horsethief & Ruby, Westwater, Labyrinth & Stillwater, Cataract Canyon, Lake Powell.** Evergreen, Colorado: Westwater Books, 75 [80] pp.
Includes the Colorado River in Glen Canyon between Glen Canyon Dam and Lees Ferry.
- 2010 10.140 **Belknap's waterproof Canyonlands river guide : all new edition : Horsethief & Ruby, Westwater, Labyrinth & Stillwater, Cataract Canyon, Lake Powell, Glen Canyon.** Evergreen, Colorado: Westwater Books, 77 [80] pp.
Includes the Colorado River in Glen Canyon between Glen Canyon Dam and Lees Ferry. "Glen Canyon" added to front cover for the first time.
- 2021 10.143 **Belknap's waterproof Canyonlands river guide : all new edition : new: read-as-you-run format : Horsethief & Ruby, Westwater, Labyrinth & Stillwater, Cataract Canyon, Lake Powell, Glen Canyon.** Evergreen, Colorado: Westwater Books, 77 [80] pp. (Ninth printing of ALL NEW EDITION: 2021 (Revised 3/1/21)".)
Includes the Colorado River in Glen Canyon between Glen Canyon Dam and Lees Ferry.

Belknap, Buzz [Belknap, William, III]

- 1969 10.4 **Powell centennial : Grand Canyon river guide : river map, historic photographs, Major Powell's own story : special river runners waterproof edition.** New York, Salt Lake City, and San Francisco: Canyonlands Press, [48] pp.
Printed on water-resistant paper, wraps same stock as text; spine both string-stitched and saddle-stapled.
- 1969 10.5 **Powell centennial : Grand Canyon river guide : river map, historic photographs, Major Powell's own story.** Boulder City, Nevada: Westwater Books, [48] pp.
Wraps heavier stock than text; perfect-bound. Waterproof and non-waterproof states; 10 printings through 1983. 5th through 10th printings (1974-1983) with reset text on front wrap and Westwater Books river guides promotion on back wrap.

Belknap, Buzz, AND Evans, Loie Belknap

- 1989 10.6 **Belknap's waterproof Grand Canyon river guide : all new color edition.** Evergreen, Colorado: Westwater Books, 95 [96] pp.
New ed. of Belknap (1969); beginning with 2nd printing noted as "revised edition" on title-page verso. Eighteen printings (2nd, 1991; 3rd, 1992; 4th, 1993; 5th, 1994; 6th, 1995; 7th, 1996; 8th, 1997; 9th, 1998; 10th and 11th, 2000; 12th, 2001; 13th, 2003; 14th and 15th, 2004; 16th and 17th, 2005; 18th, 2006.) [With minor updates, inasmuch as the 1992 printing is the first to include a note relating to the drop of Lava Falls Rapid.
- 2007 10.60 **Belknap's waterproof Grand Canyon river guide : all new edition.** Evergreen, Colorado: Westwater Books, 111 [112] pp.
This is the last printing of the Belknap Grand Canyon guides that employs for river mileages just the system based on the 1924 U.S. Geological Survey Plan and Profile (see Birdseye, 1924, [ITEM NO. 10.119](#)).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2008 10.124 **Belknap's waterproof Grand Canyon river guide : all new edition.** Evergreen, Colorado: Westwater Books, 111 [112] pp.
2nd printing. This printing concurrently employs two river mile systems: the 1924 U.S. Geological Survey Plan and Profile (see Birdseye, 1924, [ITEM NO. 10.119](#)), and the 2002 U.S. Geological Survey, Grand Canyon Monitoring and Research Center survey ([ITEM NO. 10.48](#)).
- 2009 10.125 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 113 pp.
3rd printing. This printing concurrently employs two river mile systems: the 1924 U.S. Geological Survey Plan and Profile (see Birdseye, 1924, [ITEM NO. 10.119](#)), and the 2002 U.S. Geological Survey, Grand Canyon Monitoring and Research Center survey ([ITEM NO. 10.48](#)).
- 2010 10.126 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 113 pp.
("Fourth printing of ALL NEW EDITION: 2010 (Revised 1/31/10)".)
Beginning with this printing, the Belknap Grand Canyon guides employ for river mileages only the system from the 2002 U.S. Geological Survey, Grand Canyon Monitoring and Research Center survey ([ITEM NO. 10.48](#)).
- 2011 10.127 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 119 [120] pp.
("Fifth printing of ALL NEW EDITION: 2011 (Revised 1/31/11)".)
- 2012 10.128 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 119 [120] pp.
("Sixth printing of ALL NEW EDITION: 2012 (Revised 1/31/12)".)
- 2013 10.129 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 119 [120] pp.
("Seventh printing of ALL NEW EDITION: 2013 (Revised 1/15/13)".)
- 2014 10.130 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 119 [120] pp.
("Eighth printing of ALL NEW EDITION: 2014 (Revised 1/15/14)".)
- 2015 10.131 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 119 [120] pp.
("Ninth printing of ALL NEW EDITION: 2015 (Revised 1/1/15)".)
- 2016 10.132 **Belknap's waterproof Grand Canyon river guide : all new edition : updated with campsites and new USGS mileage points.** Evergreen, Colorado: Westwater Books, 119 [120] pp.
("Tenth printing of ALL NEW EDITION: 2016 (Revised 10/5/15)".)
- 2017 10.89 **Belknap's waterproof Grand Canyon river guide : all new expanded edition : includes additional pages! : new read-as-you-run format : Glen Canyon Dam to Lees Ferry : expanded geology photo section.** Evergreen Colorado: Westwater Books, 127 [128] pp.
("First printing of ALL NEW EXPANDED EDITION: 2017 (2/17/17)".)
This new ed. includes that reach of Glen Canyon between Glen Canyon Dam and Lees Ferry, which previously had been appended in the Belknap maps for Canyonlands (see Belknap and Belknap, 1974; Belknap *et al.*, 2006).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2018 10.133 **Belknap's waterproof Grand Canyon river guide : all new expanded edition : includes additional pages! : new read-as-you-run format : Glen Canyon Dam to Lees Ferry : expanded geology photo section.** Evergreen Colorado: Westwater Books, 127 [128] pp. ("Second printing of ALL NEW EXPANDED EDITION: 2018 (1/31/18)".)
- 2019 10.134 **2019 Belknap's waterproof Grand Canyon river guide : 50th anniversary edition commemorating: Grand Canyon National Park centennial (1919-2019), Major Powell's expedition sesquicentennial (1869-2019).** Evergreen Colorado: Westwater Books, 127 [128] pp. ("50th ANNIVERSARY EDITION: 2019 (1/31/19)".)
- 2020 10.135 **2020 Belknap's waterproof Grand Canyon river guide : over 50 years in print : expanded edition—updated yearly : read-as-you-run format.** Evergreen Colorado: Westwater Books, 127 [128] pp. ("OVER 50 YEARS IN PRINT: 2020 (1/1/2020)".)
- 2021 10.142 **2021 Belknap's waterproof Grand Canyon river guide : over 50 years in print : expanded edition—updated yearly : read-as-you-run format.** Evergreen Colorado: Westwater Books, 127 [128] pp. ("OVER 50 YEARS IN PRINT: 2020 (1/1/2021)".)
- 2022 10.147 **Belknap's waterproof Grand Canyon river guide : over 50 years in print : expanded edition—updated yearly : read-as-you-run format.** Evergreen, Colorado: Westwater Books, 127 [128] pp. ("OVER 50 YEARS IN PRINT: 2022".)
Inside front cover mistakenly printed upsidedown, but replaced with a correctly oriented paste-in.
- 2023 10.148 **Belknap's waterproof Grand Canyon river guide : over 50 years in print : expanded edition—updated yearly : read-as-you-run format.** Evergreen, Colorado: Westwater Books, 127 [128] pp. ("OVER 50 YEARS IN PRINT: 2023".)
Now printed on new paper, ViaStone, made from limestone (*fide* Richard D. Quartaroli).

- 1999 25.19 **USA 2 : American Southwest.** Fürstenfeldbruck, Germany: Berndtson und Berndtson GmbH, 1 sheet, 2 sides, cut and laminated, scale 1:3,000,000. [In German.]

Berthold, V. M., AND Reynolds, F. S., Jr.

- 1926 25.1961 **Main overland stage and mail routes 1849-1866 (West of the Mississippi River).** ("Compiled, drawn and published by Dr. V. M. Berthold, Laurelton, L.I., N.Y. and F. S. Reynolds, Jr. 13 Huxley Avenue, Queens Village, L.I., N.Y." Copyrighted 1926".)

Berton, Francis

- 1878 25.787 *Un voyage sur le Colorado : par Francis Berton[,] Membre Correspondant de la Société de Géographie de Genève.* San Francisco: [no imprint], 64 pp., **MAP**. [In French.]
 Cover title: *Un Voyage sur le Colorado.* 1878.
 Berton (p. [1]) indicated that just 50 copies were printed: "Je me suis donc décidé à en faire publier une cinquantaine d'exemplaires ici . . ."
 The brief references that are made *in passing* to "Big Cañon" (*i.e.*, Grand Canyon; pp. 22, 33) and "gorge de marbre" (Marble Gorge, or Marble Canyon; p. 22) are from Richard J. Hinton's (1878, **ITEM NO.** 2.3421 in Volume 1/Part B of **THE GRAND CANON**) *The Hand-Book to Arizona*, as was first noted by Charles N. Rudkin in his English translation of Berton (Berton, 1953, **ITEM NO.** 2.1443, wherein only some lithographic plates and the fold-out **MAP** in Berton, 1878, were also reproduced). Berton (1878, p. [1]) did acknowledge Hinton for the use of lithographic stones that had been used for the *Hand-Book*. Rudkin further pointed out that many of the scenes that were reproduced by Berton have nothing to do with the region through which Berton had traveled (for example, Berton did not go to the Grand Canyon). The extralimital lithographs that are pertinent to the present bibliography are: "The Grand Cañon of the Colorado" (facing p. 24) and "Grand Cañon of the Colorado—Mouth of Kanab Wash, Looking East" (facing p. 44) (legends both in English, thus, as on the lithographic stones).
- 1953 25.788 *A voyage on the Colorado—1878.* (Charles N. Rudkin, translator, ed.) Los Angeles: Glen Dawson, 103 [104] pp., map. (Early California Travels Series, no. 18.) ("300 copies have been printed at the Cole-Holmquist Press[,] Los Angeles[.] Binding by Earl Gray[.]")
 English translation of Berton (1878), *Un Voyage sur le Colorado* [see above]. Includes (p. 17) a facsimile illustration of the title-page of the very scarce 1878 ed. (and although not so noted by Rudkin, that volume is Berton's presentation copy to the Société de Géographie de Genève, of which Berton was a member). Some lithographic plates and the fold-out **MAP** in the 1878 ed. were reproduced from Richard J. Hinton's (1878, **ITEM NO.** 2.3421) *The Hand-Book to Arizona*, as so acknowledged by Berton. Rudkin pointed out that many of the scenes reproduced from Hinton by Berton have nothing to do with the region through which Berton had traveled (for example, Berton did not go to the Grand Canyon). The 1953 translated ed. does not reproduce all of the illustrations that appeared in the 1878 ed., and only that portion of Hinton's map that is pertinent to Berton's travels is reproduced. The two lithographs of Grand Canyon are among those *not* included in this 1953 ed. The selected illustrations and portion of **MAP** are thus more faithful to the range of Berton's

travels. The translated text, however, is complete and includes the brief references that are made *in passing* to “Big Cañon” and “gorge de marbre”.

|------|---------|---|
| 1871 | 25.1689 | <p>Nord-Amerika. (“Bibliographisches Institut in Hisburghausen”) [In German.] <i>In: Meyers Hand-Lexikon des allgemeinen Wissens in einem Band. Erste Hälfte.</i> Hildburghausen: Verlag des Bibliographischen Instituts. [Map follows p. 740.]</p> <p>► The river, “Colorado”, is depicted between “G. v. Californien” and the confluence of Green and Grand Rivers (not labeled), which meet improbably in south-central Utah from the northeast and east, respectively. The Colorado’s course between there and the confluence of the Virgin River (not shown) follows a course due southwest until turning northwestward at about where would be Diamond Creek (not shown). The Little Colorado River (not labeled) is shown reaching the Colorado from the southeast just before the Colorado’s turn to the northwest. At the confluence of “Gila” is a place name, “Arizona”, probably meant to be Arizona City since the territory of “Arizona” is also labeled.</p> |

- 2006 24.271 **Geologic map of the Peach Springs 30' × 60' quadrangle, Mohave and Coconino Counties, northwestern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2900*, 16 pp., 1 sheet, scale 1:100,000.

Billingsley, George H.; Felger, Tracey J.; AND Priest, Susan S.

- 2006 24.238 **Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2895*, 22 pp., 1 sheet, scale 1:100,000.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5' quadrangles (scales 1:24,000) within the Valle 30' × 60' quadrangle, all of which can be accessed directly from this webpage: <https://pubs.usgs.gov/sim/2006/2895/24k/images/> (accessed 10 July 2024). Quadrangles are as follows:

- 2006 24.239 **National Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.240 **Supai Camp quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.241 **Hualapai Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.242 **Baldy Basin quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.243 **Box K Ranch quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.244 **Metzger Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.245 **Tusayan West quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.246 **Tusayan East quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.247 **Dike Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]
- 2006 24.248 **Supai Camp SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895*. [7.5' quadrangle, scale 1:24,000.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2006 24.249 **Hazen Hole Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.250 **Rosebud Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.251 **Little Harpo Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.252 **Howard Hill quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.253 **Red Butte SW quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.254 **Red Butte quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.255 **Rose Well Camp West quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.256 **Rose Well Camp East quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.257 **Black Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.258 **Tin House quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.259 **Markham Dam quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.260 **Miller Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.261 **Valle Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.262 **Molly Ann Draw quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2006 24.263 **Rhodes Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.264 **Big Bud Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.265 **Bishop Lake quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.266 **Howard Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.267 **Red Hill Ranch quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.268 **Mixon Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.269 **Howard Lake quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]
- 2006 24.270 **Hobble Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Valle 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2895.* [7.5' quadrangle, scale 1:24,000.]

Billingsley, George H.; Goodwin, Gregory; Nagorsen, Sarah E.; Erdman, Monica E.; AND Sherba, Jason T.

- 2019 24.865 Geologic field photograph map of the Grand Canyon region, 1967-2010. *U.S. Geological Survey, General Information Product 189*, 11 pp.
<https://pubs.er.usgs.gov/publication/gip189>.
 This is a guide to an online collection of "1,211 geotagged photographs collected [by Billingsley] during 43 years of geologic mapping". "The photographs document some key geologic features, structures, and rock unit relations that were used to compile nine geologic maps of the Grand Canyon region published at 1:100,000 scale, and many more maps published at 1:24,000 scale." [For the online dataset and photo catalog, see: Billingsley *et al.* (2019), Geologic and related photographs of the Grand Canyon region (1967-2010): a photograph collection by George Billingsley. *U.S. Geological Survey, Data Release*, <https://doi.org/10.5066/F7WS8SHW>. (Link to USGS ScienceBase catalog: <https://www.sciencebase.gov/catalog/item/5a9751d5e4b06990606c5197>.)

Billingsley, George H.; Hamblin, W. Kenneth; Wellmeyer, Jessica L.; Block, Debra; AND Dudash, Stephanie

- 2001 24.223 **Geologic map of part of the Uinkaret Volcanic Field, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2368*, scale 1:31,680. [Mount Trumbull-Toroweap Valley area.]

Billingsley, George H.; Harr, Michelle; AND Wellmeyer, Jessica L.

- 2000 24.224 **Geologic map of the upper Parashant Canyon and vicinity, northern Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2343*, scale 1:31,680, text 27 pp. [Upper Parashant Canyon-Grassy Mountain area.]

Billingsley, George H.; Priest, Susan S.; AND Dudash, Stephanie L.

- 2002 24.366 **Geologic map of the Clayhole Wash and vicinity, Mohave County, northwestern Arizona.** *U.S. Geological Survey, Miscellaneous Field Studies Map MF-2394*, scale 1:31,680, text 20 pp.

Billingsley, George H.; Priest, Susan S.; AND Felger, Tracey J.

- 2004 24.360 **Geologic map of Pipe Spring National Monument and the western Kaibab-Paiute Indian Reservation, Mohave County, Arizona.** *U.S. Geological Survey, Miscellaneous Investigations Map I-2863*, scale 1:31,680, 1 sheet.

- 2007 24.274 **Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 2977*, scale 1:100,000, 1 sheet, 33 pp.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5' quadrangles (scales 1:24,000) within the Cameron 30' × 60' quadrangle, all of which can be accessed directly from this webpage: <https://pubs.usgs.gov/sim/2007/2977/24k/images/> (accessed 10 July 2024). Quadrangles are as follows:

- 2007 24.275 **Grandview Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.276 **Grandview Point NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.277 **Hellhole Bend quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.278 **Coconino Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.279 **Cameron North quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.280 **Cameron NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.281 **Goldtooth Point quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]
- 2007 24.282 **Appaloosa Ridge quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977*. [7.5' quadrangle, scale 1:24,000.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2007 24.283 **Harbison Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.284 **Peterson Flat quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.285 **Willows Camp quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.286 **Coconino Point SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.287 **Cameron South quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.288 **Cameron SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.289 **The Landmark quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.290 **Gold Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.291 **Dog Knobs quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.292 **Lockwood Canyon quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.293 **Campbell Francis Wash quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.294 **Gray Mountain.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.295 **Wupatki NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.296 **Badger Spring quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2007 24.297 **Rock Head quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.298 **Ebert Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.299 **Chapel Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.300 **SP Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.301 **East of SP Mountain quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.302 **Wupatki SW quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.303 **Wupatki SE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.304 **Standing Rocks.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.305 **White Water Tank quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]
- 2007 24.306 **Wupatki NE quadrangle.** [As part of 1:100,000 scale] Geologic map of the Cameron 30' × 60' quadrangle, Coconino County, northern Arizona. *U.S. Geological Survey, Scientific Investigations Map 2977.* [7.5' quadrangle, scale 1:24,000.]

- 2008 24.316 **Geologic map of the Fredonia 30' × 60' quadrangle, Mohave and Coconino Counties, northern Arizona.** *U.S. Geological Survey, Scientific Investigations Map 3035,* scale 1:100,000, 1 sheet, 23 pp.

Also available only as downloads from U.S. Geological Survey publications website are geologic maps of the thirty-two 7.5' quadrangles (scales 1:24,000) within the Fredonia 30' × 60' quadrangle, all of which can be accessed directly from this webpage: <https://pubs.usgs.gov/sim/3035/24k/images/> (accessed 10 July 2024). Bineteau, P.

- NO DATE 25.2314 **Amérique Septentrionale dressée sous la direction de M.M. Achille Meissas et Michelot par P. Bineteau Géographe. Paris à la Librairie Hachette Boulevard Saint-Germain, 79.** ("Imp. Lith. de V. Janson, rue Antoine Dubois, N^o 6, Paris.") 12 sheets. [Ca. 1844.] [In French.]
 ▶ A simple map. "Colorado F." (*sic*, on a French map thus) is shown as a single stream with headwater that would correspond to the Green River, its course southwesterly into Arizona, receiving one tributary from the east (not labeled, apparently the Grand River), receiving the Little Colorado River (not labeled) from the southeast, turning west-southwest to Nevada then southward to the gulf, receiving "R. Gila" from the east.
- 1860 25.1245 **Map Drawn to illustrate the travels & from the Documents of the Abbe Domenech showing the actual situation of the Indian Tribes of North America and the road described by the author[.] P. Bineteau geographer del 1860.** ("Gravé chez Erhard 42 R. Bonaparte".) ("Imp Bineteau R. Antoine-Dubois 6.")
WHEAT IV:1008 [credited to Domench]
In: Domenech, Em. (Abbé) [Domenech, Emmanuel Henri Dieudonne], Seven years' residence in the great deserts of North America. London: Longman, Green, Longman, and Roberts.
 ▶ "Old California" and "Sonora" and separated by "G. of California". "R. Colorado" (label on lower Colorado River) and "Rio Colorado of the West" (label on upper Colorado) is depicted between the head of the gulf and headwaters above the confluence of "R. Grande" (Grand River). The Colorado River in the Grand Canyon region is depicted by a dashed line between a tributary (not labeled) that is Cataract Creek and the confluence of "Rio Virgen". "R. S^t John" (San Juan River) is shown as a tributary from the east, with its lower end depicted by a dashed line, and "Red Riv." (Little Colorado River) is shown as a tributary from the southeast, with its lower end depicted by a dashed line). "B. Williams" (Bill Williams River) is shown as a tributary

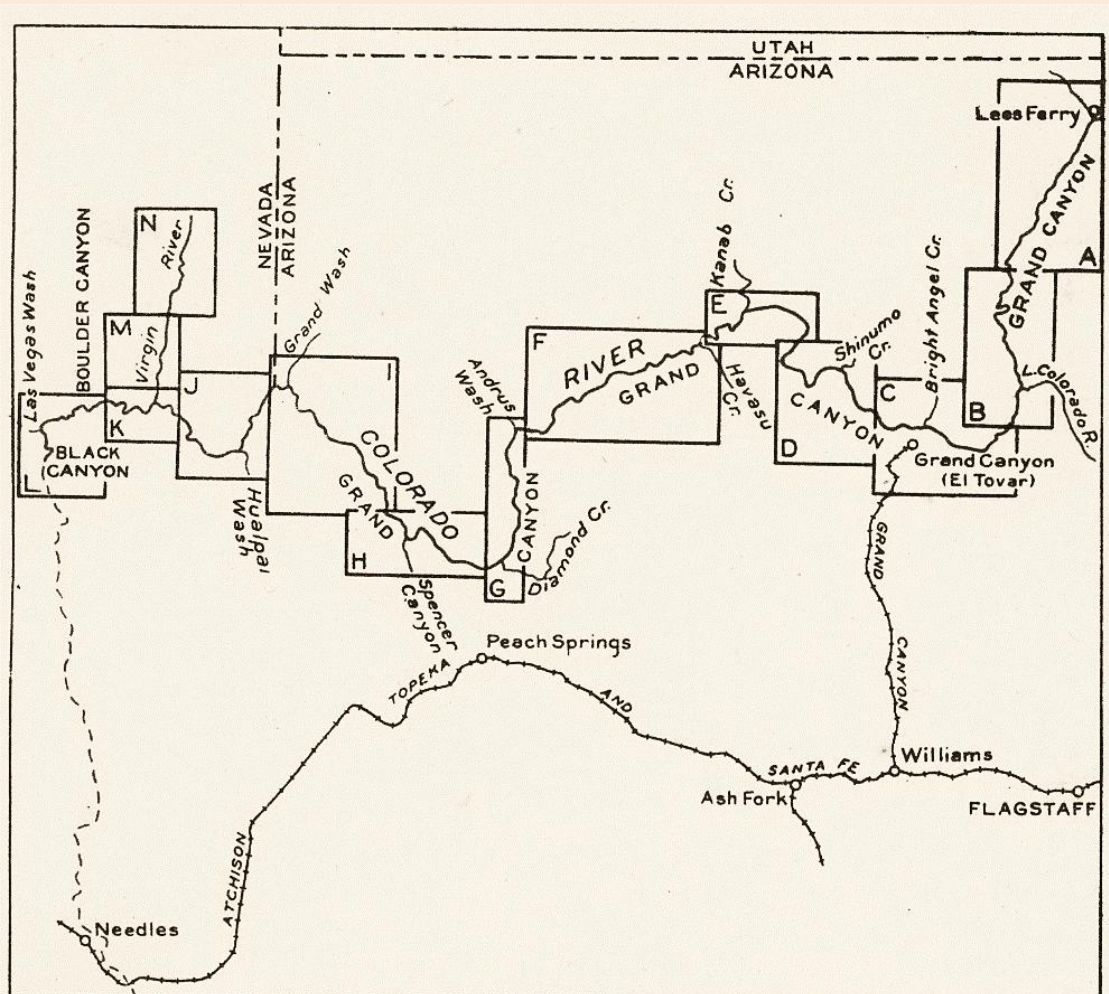

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

from the east and northeast. The Gila River (not labeled) reaches the Colorado at "F¹ Yuma".

Birdseye, Claude H.

- NO DATE 10.118 **Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.** Oakland, California: American River Touring Association, 1 map and 1 profile on 8 sheets, and mileage schedule sheet; scale [ca. 1:63,360]. [1966?]
 Reproduction from Birdseye (1924) at about one-half original size but without correcting the stated 1:31,680 scale.
- 1924 10.119 **Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.** (Topography by R. W. Burchard and C. H. Birdseye.) U.S. Geological Survey, 21 sheets consisting of 14 plans (maps, sheets A-N, scale 1:31,680, contour interval 50 feet, contour interval on river surface 5 feet; see key below) and 7 profiles (sheets O-U, scale 1:81:680, vertical scale 1 inch = 20 feet).
 Full set displays Colorado River Miles 0-356, and Virgin River Miles 0-28. Virgin River, between Colorado River and Muddy Creek, plans on sheets K, M, N. "Mileage [on Colorado River] is measured [downstream] from U. S. G. S. concrete gage well opposite mouth of Paria River".

NOTES: For continuation of series from Black Canyon to the southern international boundary, see U.S. Geological Survey (1927, *ITEM NO.* 10.123). Regarding Mile 0 [see note at beginning of this section.](#)

- 1943 10.120 **Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.** (Topography by R. W. Burchard and C. H. Birdseye.) U.S. Geological Survey, 21 sheets.
 Reprint of Birdseye (1924) but also noting, "Printed 1924".

Birdseye, Claude H., AND Gerdine, T. G.

- 1922 10.122 **Plan and profile of Colorado River from Lees Ferry, Ariz[.], to mouth of Green River, Utah; San Juan River to mouth of Chinle Creek, Utah; and certain tributaries.** (Topography by A. T. Fowler and V. E. Leech.) U.S. Geological Survey, 22 sheets consisting of 16 plans (maps, sheets A-P, scale 1:31,680; *see key below*) and 6 profiles (sheets Q-V).
 Within the geographical bounds of this Cartobibliography, see plan from Lees Ferry to Mile -15 on sheets A and B (contour interval 20 feet, contour interval on river surface 5 feet); corresponding profile on sheet Q, vertical scale 1 inch = 20 feet). C. H. Birdseye, Chief Topographic Engineer; T. G. Gerdine, Division Topographic Engineer; topography by A. T. Fowler and V. E. Leech; surveyed 1921.
 Full set displays Colorado River Miles 0 to -216, and San Juan River Miles 0-133. Mileage on Colorado River measured upstream from USGS concrete gage well opposite mouth of Paria River; usually by convention indicated as negative numbers. Regarding Mile 0 [see note at beginning of this section](#).

Blake, W. P. [Blake, William Phipps]

- 1856 11.17680 **U.S. Coast Survey A. D. Bache Supdt. Map of the Country Between San Diego and the Colorado River[,] California To accompany a report on the Physical Geography and Geology of the Coast By W. P. Blake Esq. Scale 1/1,608,228 1855.**
From: Appendix No. 65. Observations on the physical geography and geology of the coast of California, from Bodega bay [*sic*] to San Diego. (Prepared for Prof. A. D. Bache, Superintendent of the United States Coast Survey, by William P. Blake.)
In: Bache, A. D. [Alexander Dallas], Report of the Superintendent of the Coast Survey, showing the progress of the survey during the year 1855. Washington, D.C.: A. O. P. Nicholson, Printer, pp. 376-398, maps. (Volume: *U.S. 34th Congress, 1st Session, Senate Executive Document 22 AND House of Representatives Executive Document 6* (Cornelius Wendell, Printer, Washington).)
 Includes Colorado Desert and lower Colorado River region; see pp. 382, 396, Map 60. "This Map is copied by permission of the Hon. Jefferson Davis Sec. of War, from the unpublished geological map in the office of the Pacific Rail Road Explorations, prepared to accompany the report on the geology of the expedition under the command of Lieut. R. S. Williamson U. S. Top. Engrs." [Includes lowermost Colorado River region between Fort Yuma and the Gulf of California. Compare map with Blake (1856, ITEM NO. 11.10514).
- 1856 11.10514 **U.S.P.R.R. Explorations & Surveys War Department Geological Map of the Country Between San Diego and the Colorado River[,] California Prepared in Office of P.R.R. Exp & Surveys. By W. P. Blake Scale 1:608228. 1855.**
From: Geological report.
In: Williamson, R. S., *Reports of explorations and surveys, to ascertain the most practicable and economical route for a railroad from the Mississippi River to the Pacific Ocean made under the direction of the Secretary of War, in 1853-5, according to the Acts of Congress of March 3, 1853, May 31, 1854, and August 5, 1854. Volume V. Report of explorations in California for railroad routes, to connect with the routes near the 35th and 32d parallels of north latitude.* Washington, D.C.: A. O. P. Nicholson, Printer, pp. 1-358, plates. (Volume: *U.S. 32nd Congress, 2nd Session, House Executive Document 91.*)
 Geological Report dated 1853, separately paginated part in volume. This part of the volume also includes in its pagination part of the botanical reports of the survey. Map includes lowermost Colorado River region between Fort Yuma and the Gulf of California. Compare map with Blake (1856, ITEM NO. 11.17680).

Blanchard, Rufus

WHEAT V:1197

- 1869 25.1105 **Cabinet Map of the Western States and Territories on a rectangular project showing the location of gold[,] silver and other minerals[,] the rail roads and principal cities[,] the meridian lines[,] base lines and Congressional townships as far as public surveys have been extended[.] Compiled from government maps and published by Rufus Blanchard.** Chicago: Rufus Blanchard. ("Engraved by Jerome T. Gouget, at R. Blanchard's Map Establishment. No. 146, Lake St. Chicago, Ill.")
 ► "Colorado River" is depicted between "Gulf of California" and the confluence of "Gunnison River" [*sic*] and a river labeled confusingly far northward "Green River". At the western end of the Grand Canyon region is the label "Big Canon". More toward the middle of that region is shown the confluence of "Rio Colorado Chiquito Riv." [*sic*]

and "Cataract R.", although it is unclear by the labeling which of the two continues to its confluence with the Colorado. At "Colville" (Callville) is the label "Head of Navigation".

With isothermal and rain charts for each season, the extreme months, and the year. Including a summary of the statistics of meteorological observations in the United States, condensed from recent scientific and official publications.* Philadelphia: J. B. Lippincott and Co., and London: Trübner and Co., xvi, [17]-536 pp., Plates [I]-[XII] [fold-outs], XIII [facing p. 496].
 Spine title: *Blodget's Climatology of the United States.*
 See the citation for Blodget (ITEM NO. 2.17251 in Volume 1/Part B of THE GRAND CANON) for more complete bibliographical notes.
- *Remarks concerning the MAPS:* The fold-out maps present climatological data overprinted on base maps: *base map 1*) a world map of the northern hemisphere from 20° to nearly 80° N latitude, on which only very generalized portrayals of mountain ranges are shown; and *base map 2*) a map of North America between 25° and 50° North latitude. The sources of the base maps are not indicated in this book. The world map includes the lithographer's information, "Lit. of F. Bourquin & C^o. N^o 50 South Third S^t. Philad^a."; and for the North America map, "Fred. Bourquin & C^o. 50 S. 3^d St. Phila."
- ▶ The North America map displays generalized topography for mountainous areas, and rivers. "Great Colorado River" is shown between the head of the Gulf of California (not labeled) and the confluence of "Green River" and "Grand River". From that confluence, the Colorado flows along an arc trending southwest to west where it reaches the confluence of a very foreshortened Virgin River (not labeled), before turning southward to the gulf, receiving "Gila River" at "F^t. Yuma". Other rivers that are shown contributing to the Colorado (none of them labeled) are the San Juan River and Little Colorado River, which nearly converge in the area that is the eastern Grand Canyon region; and the Bill Williams River.
- See also the citation for Blodget in Part 18 of THE GRAND CANON (ITEM NO. 18.1288, in Volume 1/Part B of THE GRAND CANON), which includes an itemization of the fold-out maps of meteorological data.
- NOTE:* This publication contains what thus far is the earliest known record of the name "Grand Canyon" as applied to Arizona's canyon; specifically using the term, "the Grand Cañon" (p. 92) and "[t]he *Grand Cañon of the Colorado*" (p. 97 *note*, italics thus). However, it is uncertain that Blodget originated the name, thus the origin of the term "Grand Canyon" for this geographic feature remains unknown. [See Earle Spamer, "Once again, 'Who named the Grand Canyon?'"—and other obscure Grand Canyon 'firsts'", *The Ol' Pioneer* (Grand Canyon Historical Society), 24(2) (Spring): 4-16; and see ITEM NO. 2.18476 in Volume 1/Part B of THE GRAND CANON for an

extensive list of errata (editorially created) and emenda, all published there for the first time.] *

 Wall map, scale 1:3,168,000. General topography of mountains and canyons depicted. Routes of explorations delineated; in Grand Canyon area "Garcés 1776" and "Escalante 1776" are shown.

Bonaparte, Erhard R.

- NO DATE 25.1350 **Carta dell'Utah e de' suoi dintorni.** ("Dessiné par Visille—"[?] [*imperfect*]. "Gravé chez Erhard R. Bonaparte".) [**Map in French, with title in Italian; volume in Italian.**]
In: Burton, Riccardo [Burton, Richard F.], *I Mormoni e la città dei santi : viaggi del capitano Riccardo Burton*. Milano: Fratelli Treves, Editori (1875), facing p. 1.
 ► The map is in French, clearly borrowed for this translated edition of Burton even though its title panel is in Italian. It is a different map from the three maps that appeared in the 1861 and 1862 English editions (see Burton, 1861, **ITEM NO.** 25.1349). This map depicts western North America north of the confluence of the "R^o Colorado de Occidente" and "Rio Gila". In "Nouveau Mexique", "R^o Verde" (Green River) and "R^o Grande" are shown running in parallel from headwaters to the southwest, and "R^o [illegible] Juan" (San Juan River) is a tributary to the Grand from the east. The confluence of the Green and Grand is in the area where the Grand Canyon is situated. "Petit Colorado" (Little Colorado River) is shown as a tributary to the Grand, downstream from the San Juan, striking it from the southeast with its lower course delineated by a dotted line. In the central Grand Canyon area a sinuous, unlabeled stream (presumably Cataract Creek) strikes the Colorado from the southeast, with its lower course delineated by a dotted line. Where the Colorado turns from west to south is the confluence of a river (not labeled) coming from the north and northeast, which is the Virgin River. In the lower Colorado River course south of the Virgin a river (not labeled) strikes the Colorado from the northwest; presumably this is the supposed Mohave River. South of there a river (not labeled; Bill Williams River) reaches the Colorado from the east, with its headwaters off to the northeast. Both the Colorado and Gila Rivers pass off the map to the south before meeting.
NOTE: Wheat (1963, Volume V, p. 377) only mentions this map in the Italian ed. by title.

Borghi, A. B. [Borghi, Ab. Bartolommeo]

- 1819 25.2400 **Possessioni Spagnole nell' America Settentrionale cioè il Nuovo e Vecchio Messico e le Floride dell' A. B. Borghi Firenze 1818.** ("Gius. Poggiali inc.") [In Italian.]
In: Atlante generale dell' Ab: Bartolommeo Borghi corredato di prospetti storici-plitici-civili-naturali di ciascheduno stato Pubblicato a spese di Rosa Parigi, e del C^{te} Giulio Cesare Bertolini sotto la dilla Aristide Parigi e Comp^e dai medesimi dedicato alla Loro Patria. Firenze 1819. (Title page credits "inc.: nello Studio Giarre".)
 ▶ "Rio Colorado" is delineated between "Golfo di California, o di Cortes" and unlabeled headwaters. It follows an effectively straight southwesterly course to the head of the gulf, receiving three tributaries from the east. "Gila" arrives independently at the head of the gulf from the east. West of the Colorado and parallel to it is a long, unlabeled river without definitive headwater or confluence.
-

Boulder Dam Service Bureau

- NO DATE 25.162 **Free street guide of Boulder City.** Boulder City, Nevada: Boulder Dam Service Bureau, 1 sheet. [Ca. 1950.]
-

Bowles, Samuel

- 1869 25.2096 **Map to Accompany "Our New West" by Samuel Bowles.**
In: Bowles, Samuel, Our new West. Records of travel between the Mississippi River and the Pacific Ocean. Over the plains—over the mountains—through the great interior basin—over the Sierra Nevada—to up and down the Pacific coast. With details of the wonderful natural scenery, agriculture, mines, business, social life, progress, and prospects . . . including a full description of the Pacific railroad : and of the life of the Mormons, Indians, and Chinese. Hartford, Connecticut: Hartford Publishing Co.; New York: J. D. Dennison; Chicago: J. A. Stoddard; and Augusta, Georgia: E. Nebhut, p. [xxii] (facing p. 23, start of Chapter I).
 ▶ A diagrammatic map of most of the western U.S., west of the Great Lakes and the Mississippi River, except the tier south of the latitude of Albuquerque and Los Angeles. "Colorado R." is sketched generally from the confluence of "Green R" and "Grand R", which from there follows a southwestward course, arcing to the west just north of the Utah-Arizona boundary, along which the label, "Great Canyon", appears (the label is positioned entirely within "Utah". Thereafter the course turns south-southwest to cross the boundary, then southwest to "Callville", which is mispositioned in "Arizona", approximately where would be the confluence of Diamond Creek (not shown). Thereafter the Colorado turns northwest to the Nevada boundary, then generally southward to pass off the map. Only two tributaries to the Colorado are delineated (neither labeled); one from the north in Utah; the other is probably the Virgin R., which comes from the north to reach the upper portion of the lower Colorado below the great bend. Also of note is "Prescott", positioned east-southeast of "Callville" in the center of the territory of Arizona. The 35th parallel railroad route is shown very generally, delineated as an "unfinished" railroad.
-

Boyd, E. D.

- 1867 25.1520 **Map of Part of the United States Exhibiting the Principal Mail Routes West of the Mississippi River Compiled from the latest Information by E. D. Boyd 1867.**

This is the U.S. Post Office Department's first postal map of the western United States.]

► In the area of interest to this Cartobibliography, "Rio Colorado" is depicted generally along its lower course, and in what is the Grand Canyon region the relationships of it to "Colorado Chiquito" (Little Colorado River) are like that of the maps that reflect the Egloffstein geography reported by Ives (1861). Two mail routes are shown in this area: a southern route that crosses the Colorado at "Hardyville", just north of "Ft. Mohave", and a northerly route that reaches that point having come from Utah via "Callville" and through "Eldorado Cañon".

Brabb, Earl E.; Colgan, Joseph P.; AND Best, Timothy C.

Bradford, T. G. [Bradford, Thomas Gamaliel]⁵⁷

WHEAT II:408

- 1835 25.1729 **United States.**
In: Bradford, T. G., *A comprehensive atlas, geographical, historical and commercial*. Boston: W. D. Tichnor, and New York: Wiley and Long.
 ► "R. Colorado of the West" and "R. Gila" both converge at the head of "Gulf of California", from the northeast and east-northeast, respectively. The Colorado follows a gently arcing course from south to southwest; it receives en route one tributary (not labeled) from the east, which might be the San Juan River. "R. Matires" [*sic*] parallels the Colorado to the west, before arcing to a southeast course to enter the gulf below the mouth of the Colorado.

WHEAT II:409

- 1835 25.1730 **North America.**
In: Bradford, T. G., *A comprehensive atlas, geographical, historical and commercial*. Boston: W. D. Tichnor, and New York: Wiley and Long.
 ► "R. Colorado" and "R. Gila" both converge at the head of "Gulf of California", from the northeast and east-northeast, respectively. From headwaters, the Colorado follows a generally straight course to the gulf; it receives en route one tributary (not labeled) from the east, which might be the San Juan River.

WHEAT II:410

- 1835 25.1731 **Mexico, Guatemala, and the West Indies.**
In: Bradford, T. G., *A comprehensive atlas, geographical, historical and commercial*. Boston: W. D. Tichnor, and New York: Wiley and Long.
 ► "R. Colorado of the West" and "R. Gila" both converge at the head of "Gulf of California", from the northeast and east-northeast, respectively. From headwaters, the Colorado follows a generally straight course to the gulf; en route it receives the tributaries "R Nabajoa" (San Juan River) from the east, "R Jaquesila" (Little Colorado River) from the east, and a large tributary (not labeled) from the east that could be the Bill Williams River but is of comparable size and course to the San Juan and Little

⁵⁷ From the same 1835 volume (*A comprehensive atlas*) compare the three maps cited herein (ITEM NOS. 25.1729, 25.1730, 25.1731).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Colorado. Another river (not labeled) is west of the lower Colorado, with a course from southwest to south-southeast, which reaches the gulf below the mouth of the Colorado; this is likely meant to be the supposed Martyrs River.

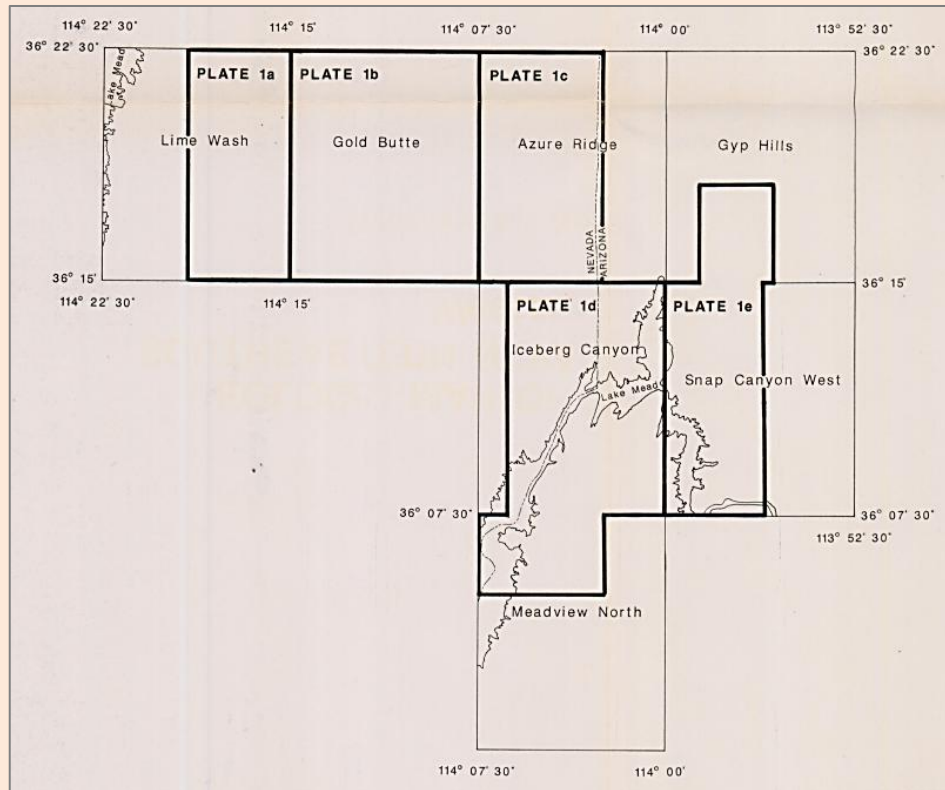

WHEAT II:431

- 1838 25.1329 **North America.** ("Engraved by G. W. Boynton." "Entered according to Act of Congress, in the year 1838, by T. G. Bradford, in the Clerks Office, of the District Court of Massachusetts.")
- In:* Bradford, T. G., *An illustrated atlas, geographical, statistical, and historical, of the United States, of the adjacent countries.* Boston: Weeks, Jordan, and Co.; and New York: Wiley and Putnam.
- ▶ "California" is separated from "Mexico" by "Gulf of California". "R. Colorado" is shown on a peculiarly sinuous course along a mostly direct northeast-southwest heading between the gulf and headwaters that are restricted to "Green R." and a short river (not labeled) from the east (Grand River?). The only other tributaries are "Nabajoa R." (San Juan River), "R. Jaquesila" (Little Colorado River), a river (not labeled; Bill Williams River), and "R. Gila", which meets the Colorado just before the head of the gulf.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

1851.] [Note: This atlas is completely independent of, and not actually produced by, Humboldt for his *Kosmos*.] [This map is no. 29.]

► “Rio Colorado” (labeled on lower course) and “Colorado R.” (labeled on upper course) is delineated between “Meerbus v. Californien od. Purpur Meer” and headwaters; the upper-course label overlaps the confluence of “Grand R. and “Yampah R.”, by which it is unclear whether the Colorado is meant to be continued upstream or if it should be considered to begin at a Yampah-Grand confluence. Enroute it receives the tributaries “Nabajoa R.” (San Juan River) from the east, “Yaquesilla R.” (Little Colorado River) from the east, “R. Virgin” from the north, and an unlabeled river (Bill Williams River) from the northeast. “Gila R.” arrives independently at the head of the gulf from the east.

WHEAT IV:828

- 1855 25.1021 **Die Staaten und Gebiete der West-Küste.** [In German.]
INSET ON: *Post-Kanal- und Eisenbahnkarte der Vereinigten Staaten von Nord-Amerika. Nach Smith, Tanner, Mitchell und den Berichten des General-Postamts bearbeitet von Traugott Bromme, in Stahl gestachen v. J. A. Bühler. Philadelphia[,] Chestnut-Street 195, John Weik, Publisher & Importer. 1855. Stuttgart, Hoffmann'sche Verlagshandlung. 1855.*
 The same map as in Bromme (1848, ITEM NO. 25.1020) with altered labels of political geography.
 ► In the region labeled “Utah oder Deseret” and “Neu Mexico”, “Rio Colorado of the Gulf of California” is depicted on a virtually straight southwesterly course along the east side of a high tableland between the confluences of “Grand R.” and “Rio Virgin”. Tributaries are “Nabajoa R.” (San Juan River) and “R. Yaquesilla” (Little Colorado River).
- 1864 25.2414 **Karte der Westlichen Staaten und Gebiete.** [In German.]
INSET on: *Neueste Eisenbahn-Kanal-u. Post-Karte für Reisende in den Vereinigten Staaten von Nord-Amerika[,] Canada, Texas sowie Californien und den westlichen Staaten u. Gebieten. Nach J. Calvin Smith, H. S. Tanner u. andern neuesten Quellen bearbeitet. Verlag der Buchner'schen Buchhandlung in Bamberg.* (“Stahlstich, Druck u. Illuminat. d. Kunst-u. geogr. Anst. v. Serz & C^{ie} in Nürnberg.”) (“Karte zu Tr. Bromes Handbuch f. Auswanderer”.)
 ► “R. Colorado” is delineated between the head of the Gulf of California (not labeled, which is off the map to the south) and the confluence of “Green R.” and “Grand R.” From that confluence the Colorado follows a course to the south, then southwest, receiving “Jabajoa R.” (San Juan River) from the east and “R. Yaquesilla” (Little Colorado River) from the southeast and east, where it turns west for a short distance then southwest, following an irregular and arcing course from southwest to west to the confluence of “R. Virgin” from the northwest and north, then turns south toward the gulf. “R. Gila” is a tributary from the east at “S. Pablo” and “S. Pedro”, where the river bifurcates, then rejoins at the head of the gulf. Of note is the misplacement of “Casas Grandes (Aztekasche Ruinen)” on the east side of the Colorado north of the Gila confluence.

"à Londres, chez Cary M^d de Cartes Géog." "à Milan, chez Betailli et Comp^le" "à Vienne, chez Artaria M^d d'Estampes.") [In French.]
 ► "R. Colorado" is delineated on an effectively straight southwesterly course between "G. de Californie ou Mer des Cortes" and the confluence of "R. Zaguuananas" (Green River) and "Nabajoa R." (San Juan River, though apparently mislabeled on the

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Grand River in as much as a tributary to it in turn is "R. Animas"); en route it receives "R. Jaquesila" (Little Colorado River) from the east (but which may be a mislabeled San Juan River), and a short unlabeled tributary from the east (Bill Williams River?). "R. Gila arrives independently at the head of the gulf from the east. Farther south on the west side of the gulf a river arrives, which is labeled "R. Piramides" in its upper reach, then becomes a dashed line which once it becomes a solid line again is labeled "R. Martires" (the course to here all being southwest and parallel to the Colorado), with its course then depicted again by a dashed line that turns south and south-southeast that becomes a solid line again on its approach to the gulf.

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

- 1826 25.2428 **Carte Physique et Politique de l'Amérique Septentrionale, Par A. H. Brué, Géographe de S. H. R. Monsieur. à Paris chez J. Goujon, Éditeur-Propriétaire, Rue du Bac, N° 6. près le Pont Royal. 1821 Revue, Corrigée et Augmentée d'après le nouvel Atlas Américain. en 1826. [In French.]**

One of a boxed set of six maps with box title, "**Cartes des Cinq Parties Du Monde**".

► "R. Colorado" is delineated on a straight southwesterly course from the confluence of "Zaguanas" [*sic*] and "R. Nabajoa", receiving en route "R. Jaquesilla" from the east and an unlabeled tributary (Bill Williams River?) from the east-southeast. "R. Gila" arrives independently at the head of "Golfe de Californie" from the east. Paralleling the Colorado to its west are "R. Pyramides" and "R. des Martyrs", both without defined headwater or confluence.

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

- 1830 25.2049 **Carte Générale des États-Unis, du Canada et d'une Partie des Pays Adjacents; par A. Brué, Géographe du Roi. Paris 1825. [In French.]**

In: Atlas de choix, ou recueil de cartes de géographie ancienne et moderne dressées par nos meilleurs auteurs. Paris: Chez J. Andriveau-Goujon. [1830.]

► "Vielle California" and "Sonora" are separated by "G. de Californie". "R. Colorado" is depicted between the head of the gulf and the confluence of "R. Zaguananas" (Green River) and "R. Nabajoa" (San Juan River). Its course from that confluence is effectively straight southwest until shortly before reaching the gulf, when it turns to the south. "R. Jaquesila" (Little Colorado River) is a tributary from the east. "R. Gila" arrives independently at the head of the gulf from the east. Paralleling the Colorado to the west are two rivers: "R. de las Pyramides Sulfureas", without confluence, shown with an arrow indicated flow to the southwest, and "R. de los Martires", also shown with a southwest-directed arrow, though after a reach delineated by a solid line it continues as a dashed line that joins up with a solid-lined river (not labeled) that reaches the Pacific Ocean at "S. Luis Rey".

WHEAT II:361

In: Atlas universel de géographie physique, politique, ancienne et moderne contenant les cartes générales et particulières de toutes les parties du monde : rédigé conformément aux progrès de la science pour servir à l'intelligence de l'histoire, de la géographie et des voyages. Paris: L'Auteur, 2nd ed., 1830.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► "Vieille Californie" is separated from "Sonora" by "Golfe de Californie ou Mer de Cortes". "R. Colorado de Occidente" follows a generally northeast-southwest course from headwaters to the head of the gulf. Among the headwaters neither the Green nor Grand rivers are portrayed. Tributaries en route to the gulf are "R. Nabajoa" (San Juan River) from the east (with tributaries to it in turn from the northeast), "R. Jaquesila" (Little Colorado River) from the east-northeast, "R. S. Maria" (Bill Williams River) as a minor tributary from the east, and "R. Gila, the confluence of which is in the Colorado north of the head of the gulf. At the confluence of Jaquesila is the label "Puerto Bucarelli" (Puerto de Bucareli). Paralleling the Colorado to its west, between headwaters at the latitude of R. Nabajoa and eventually reaching the Pacific at "S. Luis Rey" is a river labeled in its headwater "R. de las Piramides", joined by a dotted line to "R. de los Martires" farther downstream, which then is depicted by another dotted line progressing toward the coast before being drawn again as a solid line without label.

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

WHEAT II:401 [with illustration facing p. 144]

- 1833 25.678 **Nouvelle carte de l'Amérique Septentrionale, du Groënland et des îles qui en dépendent Œuvre Posthume.** Paris: Chez M^me V^ve Brué. [In French.]
- In "Mexique" the "Rio Colorado" flows southwestward from its confluence with "R. Nabajoas" to the head of "Golfe de California (Mer Vermeille) ou de Cortés". Includes the route of Jedediah Smith.
- 1833 25.1331 **Carte Physique et Politique de l'Amérique Septentrionale, Par A. H. Brué, Géographe du Roi. Publiée pour la première fois en 1821 par J. Goujon. "à Zurich, chez Fuessli et Comp^{ie}." "à Londres, chez Ja^s Gardner N^o 163 Regent Street." "à Milan, chez Betailli et Comp^{ie}.") [In French.]
- "Vieille Californie" is separated from "Sonora" by "Golfe de Californie". "R. Colorado" follows a generally northeast-southwest course from headwaters to the head of the gulf; above the confluence of "R. Nabajoa" (San Juan River) it is labeled "Zaguanas R." Among the headwaters neither the Green nor Grand rivers are portrayed. Other tributaries en route to the gulf are "R. Jaquesila" (Little Colorado River) from the east and northeast, a minor tributary (not labeled) from the east (Bill Williams River), and "R. Gila, the confluence of which is coincident with the Colorado's arrival at the head of the gulf. Paralleling the Colorado to its west, are two disjointed rivers without defined headwaters or confluences, "R. Pyramides" and "R. des Martyrs". Also of interest, though extralimital to the area covered by this Cartobibliography, is a lake in present-day Utah, "L. Teguayo ou Salé", which receives "R. S. Bonaventure" and the outlet of which is "R. S. Philippe ou del Colorado", which crosses southwestward the blank Great Basin area of the map as a dashed line before being shown as a solid line heading west that bifurcates before reaching the Pacific Ocean, with one outlet in "Monterey" (Bay) and the other south of "S. Carlos de Monterey".
- See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
- 1834 25.679 **Nouvelle carte du Mexique, et d'une partie des provinces unies de l'Amérique Centrale** Paris: Chez M^e V^e Brué. [In French.]
- In "Mexique" the "Rio Colorado" flows southwestward from its confluence with "R. Nabajoas" to the head of "Golfe de California (Mer Vermeille) ou de Cortés". Includes the route of Jedediah Smith.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1836 25.2378 **Mappe Monde En deux Hémisphères présentant l'État Actuel de la Géographie Par A. H. Brué, Géographe de S. H. R. Monsieur à Paris Ch. Picquet, Géographe du Roi et de M^{gr} le Duc d'Orléans, Propriétaire des Cartes et Atlas de Brué, Quai Conti N^o 17, près de l'Institut. Juin 1820. Augmentée et Revue pour les limites pr Ch. Picquet en 1836. [In French.]**
 ► Within the area of interest here this is the same as Brué (1820, ITEM NO. 25.2377) (also note the removal of the dedication to Cuvier): "R. Colorado" is delineated on an effectively straight southwesterly course between "G. de Californie ou Mer des Cortes" and the confluence of "R. Zaguanañas" (Green River) and "Nabajoa R." (San Juan River, though apparently mislabeled on the Grand River in as much as a tributary to it in turn is "R. Animas"); en route it receives "R. Jaquesila" (Little Colorado River) from the east (but which may be a mislabeled San Juan River), and a short unlabeled tributary from the east (Bill Williams River?). "R. Gila arrives independently at the head of the gulf from the east. Farther south on the west side of the gulf a river arrives, which is labeled "R. Piramides" in its upper reach, then becomes a dashed line which once it becomes a solid line again is labeled "R. Martires" (the course to here all being southwest and parallel to the Colorado), with its course then depicted again by a dashed line that turns south and south-southeast that becomes a solid line again on its approach to the gulf.
 See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
- 1837 25.2444 **Nouvelle Carte du Mexique, et d'une Partie des Provinces Unies de l'Amérique Centrale. Dédiée à l'Academie Royale des Sciences de l'Institut de France. par A. H. Brué, Géographe du Roi. [. .] Paris. 1834. Chez Ch. Picquet, Géographe du Roi et du Duc d'Orléans, Propriétaire des Cartes et Atlas de Brué, Quai Conti N^o 17, près de l'Institut. Œuvre Posthume. Revue et augmentée par Ch. Picquet, en 1837. [In French.]**
 ► "Rio Colorado" is delineated between a foreshortened head of "Golfe de California (Mer Vermeille) ou de Cortes" and mountainous headwater. From headwater it flows south, receiving "R. Nabajoas" (San Juan River, also labeled "R. Nabajoa") from the east, an unlabeled tributary from the east (Little Colorado River), then southwest to the gulf, receiving en route "R. S^a Maria" (Bill Williams River) from the east, and a river from the northwest that has its headwater labeled, "Seeds-Keeder, dont la source est inconnue elle renferme beaucoup de rapides." The headwater reach of the "Seeds-Keeder" is delineated by a dashed line, then a solid line in which reach it receives from the northwest [via a solid line] then becomes a dashed line again on its southwesterly course before arcing to the southeast to reach [via a solid line at the end] the western side of the gulf. The tributary to the "Seeds-Keeder" aforementioned arrives from the northwest depicted by a solid line, but begins much farther to the northeast as the solid-lined "R. Adams", which becomes a dashed line on its southwesterly course until arriving at the shorter southeasterly reach; this is the Virgin River, which is also denoted by the notation, "Caverne remarquable et Sel de Roche." Between the Colorado and the "Seeds-Keeder" the area is labeled "Pays stérile couvert de Montagnes et de Roches; and in this area is delimited a southwesterly trending river with a dashed-line lower course with no confluence, labeled, "Rio de las Piramids Sulfureas prob^t le Seeds Keeder de Smith." Includes the route of Jedediah Smith. "Rio Gila" arrives independently at the head of the gulf.
 See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
- 1839 25.680 **Nouvelle carte du Mexique, et d'une partie des provinces unies de l'Amérique Centrale Paris. [In French.]**
 ► In "Mexique" the "Rio Colorado" flows southwestward from its confluence with "R. Nabajoas" to the head of "Golfe de California (Mer Vermeille) ou de Cortes". Includes the route of Jedediah Smith.

- 1840 25.1332 **Carte Générale des États-Unis Mexicains de la République du Texas et des Etats de l'Amérique Centrale.** par A. Brué Géographe du Roi.(1825). *Revue et augmentée par Ch. Picquet, Géographe du Roi et de M^{re} le Duc D'Orléans.* Paris, 1840. Chez Ch. Piquet, Quai Conti, 17, près du Pont des Arts. ("Atlas, en 65 feuilles N^o 59.") [In French.]
- In:* *Atlas universel de géographie physique, politique, ancienne & moderne, contenant les cartes générales et particulières de toutes les parties du monde; rédigé conformément aux progrès de la science pour servir à l'intelligence de l'histoire, de la Géographie et des Voyages. Nouvelle Édition composée de Soixante cinq feuilles.* Par A. Brué, Géographe du Roi. revue et augmentée par Ch^{les} Picquet, Géographe du Roi et de M^{re} le Duc d'Orléans. Paris: Chez Ch. Piquet Géographe du Roi et de S.A.R. Mgr. le Duc d'Orléans, propriétaire des cartes et atlas de fonds de M^r Brué.
- ▶ "Vieille Californie" is separated from "Sonora et Cinaloa" by "Golfe de Californie ou Mer de Cortes". The remainder of the area of interest to this Cartobibliography is the same as that described in Brué's 1825 ed. (ITEM NO. 25.1330), with the exception of the course of "R. de los Martires": "R. Colorado *de Occidente*" follows a generally northeast-southwest course from headwaters to the head of the gulf. Among the headwaters neither the Green nor Grand rivers are portrayed. Tributaries en route to the gulf are "R. Nabajoa" (San Juan River) from the east (with tributaries to it in turn from the northeast), "R. Jaquesila" (Little Colorado River) from the east-northeast, "R. S. Maria" (Bill Williams River) as a minor tributary from the east, and "R. Gila, the confluence of which is in the Colorado north of the head of the gulf. At the confluence of Jaquesila is the label "Puerto Bucarelli" (Puerto de Bucareli). Paralleling the Colorado to its west, is a river labeled in its headwater "R. de las Piramides", joined by a dotted line to "R. de los Martires" farther downstream, which then is depicted by another dotted line that turns to the southeast to reach the lower Colorado River north of the confluence of the Gila.
- See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
- 1845 25.1655 **Nouvelle Carte du Mexique, du Texas et d'une Partie des États Limitrophes; Dédiée à l'Académie Royale des Sciences de l'Institut de France,** par A. H. Brué, Géographe du Roi, Membre de la comm^{on} centrale de la société de Géographie de Paris, membre-honoraire de celle de Londres, &c.; *Revue et augmentée par Ch. Picquet, Géographe du Roi et du Duc d'Orléans, Propriétaire des Cartes et Atlas de Brué, Quai Conti N^o 17, près de l'Institut.* Paris, 1845. ("Publiée en 1834; Revue en 1837, 1839, 1840, 1845.") [In French.]
- ▶ The peninsula, "Ancienne Californie", is separated from "Sonora et Cinaloa" by "Golfe de Californie (Mer Vermeille) ou de Cortes". "Rio Colorado" is depicted between the head of the gulf along an arcing course from headwaters in the "Sierra Verde". Between the confluence of the Little Colorado River (not labeled) and the confluence of "Rio Gila" it follows an essentially straight course to the southwest. Tributaries are "R. Nabajoas" (San Juan River, to the north of the confluence of the Little Colorado), "R. S^a Maria" (Bill Williams River), and, not far north from the confluence of the Gila, a river from the northwest of which except for its immediate course above the Colorado is depicted by a dashed line. That river in turn comes from the north and northeast, with a short tributary, "R. de los Martires", from the northeast not far from the Colorado confluence. Farther upstream on that river, at the latitude of the confluence of "R. Nabajoas", it is labeled "Seeds-Keeder, dont las source est inconnue elle renferme beaucoup de rapides"; at that point is the confluence of "R. Adams?" from the northwest, depicted by solid lines only here, which farther upstream had followed a course arcing from southwest to southeast. "R. Adams?" is the Virgin River, as corroborated by the notation on its lower course, "Caverne remarquable et Sel de Roche". Paralleling both the Colorado and the middle "Seeds-Keeder" in this area is a river with defined headwaters at the latitude of "R. Nabajoas", which follows a course to the southwest and south-southwest that becomes a dashed line with no confluence; this river is labeled "Rio de las Piramides Sulfureas prob^t le Seeds Keeder de Smith" (referring to the journeys of Jedediah

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Smith). Between the confluence of the Gila and the head of the gulf, the Colorado turns to the south-southwest and bifurcates to form "I. Thomas", before rejoining just before reaching the gulf. The delta region is labeled "Grande plaine basse".

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

- 1862 25.2445 **Nouvelle Carte du Mexique, du Texas et d'une Partie des États Limitrophes; Dédiée à l'Académie Impériale des Sciences de l'Institut de France, par H. Brué, Géographe [. .] Revue et augmentée par A. Vuillemin Paris A. Logerot, éditeur, Quai des Augustins 55. 1862. [In French.]**

► "Rio Colorado" is delineated between "Golfe de Californie (Mer Vermeille) ou de Cortes" and headwater in "Sierra Verde". It follows a course southward, receiving en route "R. Nabajoas" (San Juan River) from the east and "R. Jaquesila" (Little Colorado River) from the east, then turns westward through what is the Grand Canyon area (though passing north of "Oribe") to the confluence of "R. S. Clara" (Virgin River) from the northwest and northeast (its final reach to the Colorado delineated by a dashed line), then south-southwest to the confluence of "Rio Gila" from the east, below which the river bifurcates around "I. Thomas", rejoining at the head of the gulf.

Buchheit, Kim, AND Pollock, Gayle L.

- 1997 25.22 **Mapping the land: What is the Colorado Plateau?** *Plateau Journal*, [1(1)] (Summer): inside front cover [repeated inside back cover]; text, p. 64.
Map also repeated in subsequent issues.

Buchner'schen Buchhandlung (Verlag der) [Buchner, Carl Christian]

WHEAT III:744

- 1852 25.1239 **Karte von Oregon und Neu-Californien. [In German]**
INSET ON: *Neueste Eisenbahn-Kanal-u. Post-Karte für Reisende in den Vereinigten Staaten von Nord-Amerika[,] Canada, Texas u. Californien. Nach J. Calvin Smith, H. S. Tanner u. andern neuesten Quellen bearbeitet. Verlag der Buchner'schen Buchhandlung in Bamberg. 1852. ("Stahletich. Druck u. Illuminet. d. Kunst u. geogr. Anst. v. Serz & C^{ie} in Nürnberg.") ("Karte zu Tr. Bromes Handbuch f. Auswanderer" [i.e., Traugott Bromme].)*

Case title for the entire map: *Neueste Eisenbahn-, Post- und Kanal-Karte für Reisende in den Vereinigten Staaten von Nord-Amerika, Canada, Texas, Californien und dem Oregongebiet &c. Mit hauptsächlichlicher Berücksichtigung der Eisenbahnen, Telegraphen, Dampfschiffe und Posten, Angabe der Entfernungen, und Veigabe vieler praktischer Notizen für Reisende und Auswanderer. Nach J. Calvin Smith, J. H. [sic] Tanner und jeweilig andern neuesten Quellen bearbeitet, in Stahl gestochen in der Kunst- und geogr. Anstalt von Serz u. C. in Nürnberg. Bamberg, 1852. Verlag der Buchner'schen Buchhandlung. (New-York bei J. C. Stohlmann, 24 North Williamstr. und Gebr. Westermann, 290 Broadway.)*

► "R. Colorado" is depicted along an irregular but essentially straight course between headwaters and the head of the Gulf of California (not labeled, and barely shown at the bottom of the map). "Green R.", "Yampa R.", and "Grand R." are labeled in the headwaters. Tributaries include "Nabajoa R." (San Juan River), "R. Yaquesilla" (Little Colorado River), "R. Virgin", and "R. Gila". From the confluence of the Gila the Colorado is bifurcated, rejoining shortly before it reaches the head of the gulf.

Burr, David H.

1839 25.589

WHEAT II:441 [with illustration facing p. 167]

Map of the United States of North America with parts of the Adjacent Countries. By David H. Burr, Late Topographer to the Post Office, Geographer to the House of Representatives of the U. S.

In: The American atlas; exhibiting the post offices, post roads, rail roads, canals, and the physical and political divisions of the United States of North America; constructed from the government surveys and other official materials. Under the direction of the Post Master General, by David H. Burr. Geographer to the House of Representatives of the U. S. [London]: John Arrowsmith, 13 maps. ("Entered according to the Act of Congress, July 10th 1839, by David H. Burr, in the Clerks Office of the District Court of the District of Columbia.")

► The southwestern portion of the continent, a part of Mexico at that time, portrays the "Rio Colorado of the West" entering the head of the Gulf of California, just downstream from the confluence of the "Rio Gila or San Francisco"; at the head of the gulf is "S^t. Ignacio I." (today Isla Montague). Farther north is the confluence of the "Adams River" (Virgin River?); in the region occupied by what is the Grand Canyon is the confluence of "Rio Nabajoa" (San Juan River), and farther north the confluence of the "Grand River". Of particular note is the singular label, in the area between the Colorado River and the Adams River, "Marble", with no further explanation. This map also notably includes the travel routes of Jedediah Smith in the Southwest, about which Wheat (1958, Volume II, p. 167) supposes that "there can be no doubt that he [Burr] had an original Smith map before him while he worked on the portrayal of the Western country, for here are Smith's travels developed in considerable detail."

Bunzō, Maekawa, AND Junzō, Sakai

1970 25.1113

(COMPILERS) *Kaigai ibun : a strange tale from overseas, or a new account of America compiled by Maekawa Bunzō and Sakai Junzō from the narrative of Hatsutarō, a Japanese castaway.* (Richard Zumwinkle, translator; assisted by Tadanobu Kawai.) Los Angeles: Dawson's Book Shop, 143 [145] pp. (Baja California Travels Series, 20.) ("900 copies printed by Grant Dahlstrom at The Castle Press, Pasadena, California" (p. [145]).)

Spine title: 海外異聞 *Kaigai Iibun*.

Translation, with colored plates reproduced in facsimile, of the narrative of Hatsutarō, who in 1841 was with a crew of thirteen on a boat that left Hyogo but was stranded at sea by a storm until a Spanish vessel rescued them four months later, which abandoned them at Cabo San Lucas on the southern tip of Baja California. Hatsutarō and the ship's master eventually returned home in 1844 by way of Canton and Zhapu, China (others followed a year later). His account was taken down in manuscript and after ca. 1853 variants were published in at least two venues (compare Gyosō, 1854, ITEM NO. 25.1111, and Tsurumine, 1855, ITEM NO. 25.1112) based on Inoue Shun'yō's 1846 manuscript, *Ameriki shinwa*, which was compiled by Moekawa Bunzō and Sakai Junzō with data added from other sources known to them. The story itself has no bearing on any part of this Cartobibliography, but the ► facsimile reproduction of illustrations in this volume includes a double-page **MAP** of the North Pacific, which shows western North America only in outline, not even with any rivers represented.

• This title is cited here for its map, but also because it should not be confused with Wheat's (1959, Volume III, pp. 164, 326) citation (WHEAT III:786) of a "5-Volume work, entitled *Meriken Shinshi* (New Account of America), 108 leaves", published in Edo in 1853; Wheat lists it under "Gyofu", with the map cited as "Complete map of 31 states of the Republican government". The 1853 work cited by Wheat has not been located by Spamer. However, see the 1854 and 1855 works just cited; it is likely that Wheat referred in fact to the 1855 work. Richard Zumwinkle, in his introduction to this translation of the 1854 *Kaigai ibun*, states that the 1854 work is the first printing,

issued by Seifuen Juō, but which omits the manuscript's brief preface by Maekawa Bunzō. The first modern reprinting of the full text and all illustrations was published by 荒川秀俊 (Araakawa Hidetoshi), 異国漂流記続集 *Ikoku hyōryūki zokushū* (Tōkyō: 気象研究所 Kishō Kenkyūjo, pp. 149–209).

- It is beyond the purposes of this Cartobibliography (and its compiler) to sort out the bibliographical distinctions between these volumes, inasmuch as only the maps are of pertinence here, which clearly are the additions of the Japanese scholars.

Burgess, David

- 1839 25.1225 **Map of North America Designed to Accompany Smith's Geography for Schools.** ("Eng. by Stiles, Sherman & Smith. N.Y.") ("Entered according to Act of Congress in the year 1839, by David Burgess in the Clerks Office of the District Court of Connecticut.")
- ▶ "California" and "Mexico" are separated by "Gulf of California". "R. Colorado of the West" [with length of 700 miles indicated] is shown on the most general northeast-southwest course between the head of the gulf and "Cordilleras Mts" [*sic*]; no tributaries are indicated. "R. Gila", which has headwater forks the east, reaches the head of the gulf independently of the Colorado.
- NOTE:* This is a variant of [WHEAT II:440](#), who there remarks, "Mary's River (the Humboldt) occupies the Great Basin, with New Helvetia on the Sacramento." These features are not seen on the map cited here. Instead, the Great Basin area is marked with a stippled pattern with the label, "Great Sandy Plains".

Burr, David H.

- 1850 25.1235 **The World, on Mercator's Projection: by David H. Burr. Showing the different routes to California, and distance by each; Routes of diffeent Navigators, Route of the contemplated Pacific R. Road; Distances to China, Europe, &c. Published by J. Haven, 86 State St. Boston; 1850.**
- [WHEAT III:675](#) [credited to Haven]
- ▶ "California" and "Mexico" are separated by "G. of California". "R. Colorado is depicted on an irregular but mostly straight course between the head of the gulf and headwaters. Two tributaries (not labeled) from the east are shown, along with "R. Gila" that reaches the Colorado just above the gulf.

Burton, Richard F.

- 1861 25.1349 **North America.** ("Engraved by E. Weller 34. Red Lion Square.") ("London, Longman & Co.")
- [WHEAT V:1021](#)
- In: The City of the Saints, and across the Rocky Mountains to California.* London: Longman, Green, Longman, and Roberts, 707 [708] pp. [Fold-out sheet facing p. 1 includes three maps, including the one cited here.]
- ▶ "California" is separated from "Mexico" by "G. of California". The head of the gulf receives a generally sinuous river (Colorado River, not labeled) from the northeast; "R. Gila" is a tributary to it from the east, with its confluence north of the head of the gulf. Another map on this sheet, "Route from the Missouri River to the Pacific" (Burton's route is marked) shows the headwaters of "Green R." and "Grand R." to their confluence; the two rivers run largely in parallel to each other.] [This sheet is also printed in the 1862 ed. of Burton.
- For the map that appears in the 1875 Italian ed. of Burton, see Bonaparte (no date [1875], [ITEM NO. 25.1350](#)).

Cady and Burgess [firm]

- 1851 25.1236 **Map No. 10. United States.** New York: Cady and Burgess. WHEAT III:708
- ▶ "Rio Colorado" is depicted between the head of "Gulf of California" (only the head of the gulf is shown on this map) and the confluence of "Green Riv." and "Grand Riv." Tributaries are "S^t John's R.", "Rio Virgen", "Mohave R." (from the west in the lower Colorado region), a significant tributary (not labeled) from the northeast (Bill Williams River?), and "Rio Gila". The Little Colorado River may be depicted by a significant stream (not labeled) from the southeast that is a tributary to the San Juan just above its confluence with the Colorado. There also is a minor tributary (not labeled) with headwater forks, from the east and southeast with its confluence with the Colorado to the south of the San Juan confluence. The Colorado is portrayed as a north-south stream in its lower course, arcing from northeast to west in what is the Grand Canyon region.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Wheat (1959, Volume III, p. 305) notes that “This map is from the Cady & Burgess *Atlas* for 1851 and 1852. It was deposited in the Clerks Office for the Southern District of New York on December 4, 1851.”

- 1997 11.5376 **Geologic map of the Castle Mountains, San Bernardino County, California, and Clark County, Nevada.** *Nevada Bureau of Mines and Geology, Map 108*, 1 sheet, scale 1:24,000.

Cardona, S. Adalberto de

- 1890 25.1834 **Map of the Mexican Central Railway and Connections.** ("Eng'd by American Bank Note Co., New York.") [Maps are in English; volume is in Spanish.]
In: De México á Nueva York : guía para el viajero en que se describen las principales ciudades de México y los Estados Unidos del Norte. San Francisco: Imprenta de H. S. Crocker y Cia., pp. [2]-[3] of a [4]-p. insert between pp. 8/9.
 ▶ "Gulf of California" separates "Lower California" from "Mexico". "Colorado R." is depicted between the head of the gulf and "Green R.", where a confluence of a short river (not labeled) reaching there from the south may depict a poorly drafted Grand River. Only the states of California, Arizona, and New Mexico have their boundaries drawn; the remainder of the U.S. simply labeled "United States". Tributaries to the Colorado (none labeled) are the San Juan River (above "Lee's Ferry"), the Little Colorado River, and Gila River. Short, poorly depicted tributaries are obviously Kanab Creek, Grand Wash, Virgin and Muddy Rivers, and Las Vegas Wash.
- 1890 25.2175 **The Santa Fé Route and Connections. 1889.** ("Rand, McNally & Co., Engr's. Chicago.") [Maps are in English; the remainder of volume is in Spanish.]
In: De México á Nueva York : guía para el viajero en que se describen las principales ciudades de México y los Estados Unidos del Norte. San Francisco: Imprenta de H. S. Crocker y Cia., pp. [2]-[3] of a [4]-p. insert between pp. 72/73.
 ▶ "Gulf of California" separates "Lower California" from "Mexico". "Colorado River" is depicted between the head of the gulf and the confluence of "Green River" and (not labeled) Grand River. The reach of the Colorado through "Grand Canon" and "Marble Canon" is depicted as encanyoned. Tributaries to the Colorado include "San Juan R.", Little Colorado River (not labeled), and Gila River (not labeled). The Virgin River (not labeled) is curiously depicted, implying that what on other contemporary maps is the Sevier River in western Utah, flowing directly to the Colorado past "Overton", Nevada. The route of the "Atlantic & Pacific R. R." across northern Arizona is depicted.
- 1890 25.2176 **[Untitled map depicting the Southern Pacific railroad and connections.]** ("Poole Bro's. Chicago.") [Maps are in English; the remainder of volume is in Spanish.]
In: De México á Nueva York : guía para el viajero en que se describen las principales ciudades de México y los Estados Unidos del Norte. San Francisco: Imprenta de H. S. Crocker y Cia., pp. [2]-[3] of a [4]-p. insert between pp. 256/257.
 ▶ "Gulf of California" separates "Lower California" from "Mexico". "Colorado R." is depicted between the head of the gulf and the confluence of the Green and Grand Rivers (neither labeled). The only tributary to the Colorado that is shown is the San Juan River (not labeled).

Carey, Matthew see also **M. Carey and Son** [firm]

- 1814 25.2013 **A New and Accurate Map. of North America from the best Authorities.** ("Bower, Sc.")
In: Carey's general atlas, improved and enlarged: being a collection of maps of the world and quarters, their principal empires, kingdoms, &c. containing [58 maps listed]. Philadelphia: M. Carey. (T. S. Manning, Printer.)
 ▶ "Rio Colorado or North R." is delineated as a single stream on an effectively straight south-southwesterly course from a mountainous region to the head of "Gulf of California". Some distance upstream from the head of the gulf arrives from the east a tributary, labeled "Blue R." on its extreme northeasterly section that runs parallel to the Colorado, which actually is meant to portray the Gila River system.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1814 25.2177 **Missouri Territory formerly Louisiana.** ("Bower, Sc.")
In: Carey's general atlas, improved and enlarged: being a collection of maps of the world and quarters, their principal empires, kingdoms, &c. containing [58 maps listed]. Philadelphia: M. Carey. (T. S. Manning, Printer.)
 ► "R. Colorado" is delineated between the head of "Gulf of California" and the confluence of "R. Zanziguanos" [*sic*] and an unlabeled river that is the Grand River, below which the only tributaries are "R. Jasquevilla" (Little Colorado River) from the east and "R. Gilas" (Gila River) from the east. The entire Zanziguanos-Colorado system runs parallel to and on the east side of the linear "Nabajo Mountains".

Cartée, Cornelius S.

- 1856 25.2063 **Map of North America Designed to Illustrate Cartée's Physical & Political Geography.** ("Engraved by G. W. Boynton.") ("Entered according to Act of Congress in the year 1856 by Hickling, Swan & Brown in the Clerks Office of the District Court of Massachusetts.")
In: Cartée, Cornelius S., A school atlas of physical geography, illustrating, in a series of maps compiled from the celebrated atlases of A. Keith Johnston, and of Milner and Petermann, the elementary facts of geology, hydrology, meteorology, and natural history; and designed to accompany Cartée's "Elements of Physical Geography." Boston: Hickling, Swan, and Brown, Plate II.
 ► The river "Colorado" is delineated between the head of "Gulf of California" and headwaters in "S. Verde" (Sierra Verde). After a course initially to the southwest it turns to the south-southwest to the confluence of "Nabajoa" (San Juan River) from the east, then arcs nearly to the west, then south-southwest to the confluence of "Virgen" from the northwest, continuing to the postulated confluence (delineated by a dotted line) of an unlabeled tributary from the west) and eventually to the confluence of "Gila" from the east before continuing to the gulf.

Cary, John

- 1808 25.1290 **A New Map of North America, from the Latest Authorities By John Cary, Engraver. 1806.** ("London: Published by J. Cary, Engraver & Map seller N^o. 181, Strand Dec. 1. 1806.")
In: Cary's new universal atlas : containing distinct maps of all the principal states and kingdoms throughout the world, from the latest and beset authorities extant. London: printed for J. Cary, 55 maps (60 folded leaves).
 Dates vary for included maps, 1799-1807.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

▶ "Gulf of California" separates "California" and "New Navarra" (the label "California" appears only on the Baja peninsula; north of which is labeled "New Albion"). The head of the gulf receives "Colorado Riv.", which comes directly to it from the northeast, and independently to the head of the gulf a larger river system (not labeled) from the east and northeast.

1811 25.1504 **A New Map of North America, from the Latest Authorities By John Cary, Engraver. 1811.** ("London: Published by J. Cary, Engraver & Map seller N^o 181, Strand, April 28, 1811.")

▶ "Gulf of California" separates "California" and "New Navarra" (the label "California" appears only on the Baja peninsula; north of which is labeled "New Albion"). The head of the gulf receives "Colorado Riv.", which comes directly to it from the northeast, and independently to the head of the gulf a larger river system (not labeled) from the east and northeast.

Case, Tiffany and Company

1851 25.1003 **Map of the United States. Hart^d Published by Case Tiffany & Company 1851.** [Hartford, Connecticut: Case, Tiffany and Co.]

WHEAT III:664

▶ "Rio Colorado" is drawn roughly between "Gulf of California" and the confluence of "Rio Nabajoa" (San Juan River), which is on the boundary of "Utah Territory" and "Territory of New Mexico". The San Juan is the eastern river of that confluence, into which a stream (not labeled) flows from the north. The western river of the confluence (not labeled) loops northwestward to southwestward and ends at

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

unlabeled highlands in "Utah Territory". "Rio Gila" is shown flowing into the northeastern portion of the gulf, south of the Colorado's entry into the gulf.

- 1853 25.2142 **Map of the United States. Hart^d Published by Case Tiffany & Company 1853.** [Hartford, Connecticut: Case, Tiffany and Co.]
- ▶ Within the region of interest here, the map is identical to the 1851 ed.: "Rio Colorado" is drawn roughly between "Gulf of California" and the confluence of "Rio Nabajoa" (San Juan River), which is on the boundary of "Utah Territory" and "Territory of New Mexico". The San Juan is the eastern river of that confluence, into which a stream (not labeled) flows from the north. The western river of the confluence (not labeled) loops northwestward to southwestward and ends at unlabeled highlands in "Utah Territory". "Rio Gila" is shown flowing into the northeastern portion of the gulf, south of the Colorado's entry into the gulf.

Chandless, William

- 1857 25.985 **Map Shewing the Author's Route.** ("Standidge & C^o Lith., Old Jewry, London".) *In: A visit to Salt Lake; being a journey across the plains and a residence in the Mormon settlements at Utah.* London: Smith, Elder, and Co., 346 pp. + 16 pp. advertisements. [This is a frontispiece map.]
- ▶ "Colorado R." is shown following a generally direct path between Mexico and headwaters in "Rocky Mountains", with only three tributaries: "Mohave", "Las Vegas", and Virgin River (not labeled).

Chapin, William

- 1839 25.1221 **The Western Possessions of the United States Including Texas and part of Mexico.** WHEAT II:442
- INSET** on "*Chapin's Ornamental Map of the United States, New York, 1839.*"
- ▶ "Old California" is separated from "Sonora" by "Gulf of California". "Rio Colorado" is depicted following a generalized northeast-southwest course between the gulf and the confluence of "R Napajoa" [*sic*] (San Juan River). "Rio Gila" is shown reaching the head of the gulf with the Colorado. No other tributaries are shown except in the headwater areas.
- 1853 25.1222 **The Western States and Territories.**
- INSET ON: Steel Plates.** *Chapin's Ornamental Map of the United States with the New Western Possessions.* ("New York, Published by Horace, Thayer & Co. 1853.")
- ▶ "Lower Cali[ornia]" and "Mexico" are separated by "G. of [California]" (*the names are occluded by an oval ornamental portrait of Millard Fillmore*). "Rio Colorado" is drawn on a nearly north-south course between the head of the gulf and south of the New Mexico-Utah boundary, beyond which it traces a nearly straight northeast-southwest course from headwaters, of which only "Grand R." is labeled. "S^t Johns R." (San Juan River) is shown as a relatively minor tributary from the northeast, with its Colorado confluence just north of the territorial boundary. The Little Colorado River is absent(!), although two place names (as missions?) are indicated in the general region, "Jaquestrelle" [*sic*] and "Bucaretti" (Puerto de Bucareli). A river (not labeled) reaches the Colorado from the northeast arcing to the southeast, which is the Virgin River. "Mohavo R." [*sic*] is shown as a tributary to the lower Colorado from the northwest. "R. Gila" is shown as a tributary from the east, reaching the Colorado north of the gulf.

Chapman and Hall [firm]

WHEAT II:460

- 1842 25.1369 **Central America II. Including Texas, California and the Northern States of Mexico.**
 ("Published under the Superintendence of the Society for Diffusion of Useful Knowledge".) ("Published by Chapman & Hall 186 Strand 15 Oct. 1842.") ("J. & C. Walker Sculp^t")
- ▶ "California Vieja" is separated from "Sonora" by "Gulf of California Discovered in 1534 and called the Sea of Cortes". "R. Colorado" is depicted most generally on an essentially straight northeast-to-southwest course between headwater and the head of the gulf. The only tributaries are "R. Nabajoa" (San Juan River) from the east, "R. Yakesila" (Little Colorado River) from the east, "Pyramid or Adams R." (Virgin River) from the northwest, "R. S. Maria" (Bill Williams River) from the northeast, and "R. Gila" from the east. At the confluence of the Little Colorado is the place name "P^{to} Bucarelli" (Puerto de Bucareli).
- See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
- NOTE:* A variant of this map includes at bottom: "London. Cha^s Knight & Co. 22, Ludgate Street." and "J. & C. Walker Sculp^t."
- NOTE:* The same map as Charles Knight and Co. (1842, *ITEM NO.* 25.1367).
-

Charles Knight and Co.

- 1842 25.1367 **Central America II. Including Texas, California and the Northern States of Mexico.**
 ("Published under the Superintendence of the Society for Diffusion of Useful Knowledge".) ("J. & C. Walker".)
- ▶ "California Vieja" is separated from "Sonora" by "Gulf of California Discovered in 1534 and called the Sea of Cortes". "R. Colorado" is depicted most generally on an essentially straight northeast-to-southwest course between headwater and the head of the gulf. The only tributaries are "R. Nabajoa" (San Juan River) from the east, "R. Yakesila" (Little Colorado River) from the east, "Pyramid or Adams R." (Virgin River) from the northwest, "R. S. - ▶ "California Vieja" is separated from "Sonora" by "Gulf of California Discovered in 1534 and called the Sea of Cortes". "R. Colorado" is depicted most generally between the head of the gulf and the confluence of "Green R." and "R. Grand". The only tributaries are "R. Nabajoa" (San Juan River) from the east, "R. Yakesila" (Little Colorado River) from the east, "Sevier R." from the north (after having looped from a north-flowing course some distance to the west, and with its middle part depicted by a dashed line labeled "Probable Course"), "Rio Virgen" from the northwest with headwaters shared with the Sevier, "R. S. Maria" (Bill Williams River) from the northeast, and "R. Gila" from the east. At the confluence of the Little Colorado is the place name "P^{to} Bucarelli" (Puerto de Bucareli).
-

Chase, Ernest Dudley

- 1935 25.2134 **The United States of America by Ernest Dudley Chase Winchester, Massachusetts.** ("Copyright 1935 Ernest Dudley Chase".)
Pictorial map of artistic vignettes. Includes "Grand Canyon" and "Boulder Dam or Hoover Dam". The Grand Canyon vignette is stylized after a view of Grand Canyon Lodge, North Rim. The Hoover Dam vignette is drawn from an early artistic portrayal of architecture of dam and apurtinent structures, which were not built thus.
- 1939 25.2135 **World Wonders A Pictorial Map Designed and drawn by Ernest Dudley Chase Winchester, Mass. U.S.A.** ("Copyright 1939 Ernest Dudley Chase".)
Pictorial map with artistic vignettes on map and around border. Includes labels for "Grand Can." and (somewhat misplaced too far south on the Colorado) "Boulder Dam". Border vignettes include: "The Grand Canyon of Colorado [*sic*], Deepest[,] widest, most marvelous sigght on earth. A mile deep, 10 wide, 283 miles long (in Arizona)". "Boulder Dam, in Ariz[.], largest ever built, 730 feet high, 1300 feet at the crest. Seven million tons of concrete!"
- 1940 25.2136 **America the Wonderland A Pictorial Map of the United States Designed and Drawn by Ernest Dudley Chase of Winchester, Massachusetts.** ("Published and Copyrighted by Ernest Dudley Chase of Winchester, Mass. 1940.")
Pictorial map with artistic vignettes on map and around border. Includes Grand Canyon and Boulder Dam with vignettes on map; also note vignette at Overton, Nevada, which depicts the Lost City Museum. Also see vignette at upper left corner, "The Grand Canyon of Arizona. One of the Seven Wonders of the Natural World, 220 miles long, 10 to 12 miles wide. A Masterpiece of the Great Architect of Creation."; vignette is stylized after a view of Grand Canyon Lodge, North Rim.
- 1940 25.1747 **The United States as viewed by California (very unofficial) Distorted and Drawn by Ernest Dudley Chase Winchester, Mass.** ("Copyright 1940, Ernest Dudley Chase.")
Pictorial map labels Colorado River, Blythe, Needles, El Centro, Imperial Valley, and "Salton Lake 250 ft. below sea level". "Grand Canyon" is labeled (but not depicted) at the northwestern corner of an Arizona (not labeled) with stylized boundaries.
- 1945 25.2137 **A Pictorial Map of North America designed, drawn and published by Ernest Dudley Chase Winchester, Massachusetts, U.S.A.** ("Copyright 1945, Ernest Dudley Chase, Winchester, Mass.") ("Printed in U.S.A.")
Pictorial map with artistic vignettes on map and around border. Includes Grand Canyon and Boulder Dam with vignettes on map.
- 1947 25.2138 **Stamps of America Dedicated to Philatelists Everywhere designed, drawn and published by Ernest Dudley Chase Winchester—Massachuestts, U.S.A. Research by Charles Peck Kerr.** ("Copyright 1947, Ernest Dudley Chase, Winchester, Mass.")
Pictorial map reproducing U.S. postage stamps as vignettes at places on map, with more vignettes around borders. Includes 2¢ "Grand Canyon, 1934 *Red*" and 3¢ "Boulder Dam, 1935. to completion, *Purple*".

Clark, M. M.

- 1984 11.5297 **Map showing recently active breaks along the San Andreas fault and associated faults between Salton Sea and Whitewater River-Mission Creek, California.** *U.S. Geological Survey, Miscellaneous Investigations Map I-1483*, 2 sheets, scale 1:24,000.

Clark, Robert A.

- 1977 25.1319 [MAPS.]
In: The Southwest expedition of Jedediah S. Smith : his personal account of the journey to California, 1826-1827 (ed., introduction by George R. Brooks). Glendale, California: A. H. Clark Co.
 Frontispiece map (fold-out): "The Southwest Expedition of Jedediah S. Smith". ("Map prepared by Robert A. Clark, under supervision of George Brooks.") Routes of Smith overprinted in red on base map.
 Map, p. [81]: "Smith's Route Across the Mojave Desert 1826 & 1827". ("Map prepared by Robert Clark, under supervision of George R. Brooks.") Includes Colorado River between Willow Beach and below site of present-day Davis Dam.
-

Clark, William

- 1810 25.1882 **A Map of part of the Continent of North America.**
MANUSCRIPT, Yale University, last accessed 9 December 2024 (https://collections.library.yale.edu/catalog/2012144?child_oid=1053073).
 • As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest. This is a *draft* of an 1811 manuscript map of the Lewis & Clark expedition by William Clark, which in its published version did not embrace the Colorado River headwaters (in *History of the Expedition Under the Command of Captains Lewis and Clark: To the Sources of the Missouri, thence Across the Rocky Mountains and down the River Columbia to the Pacific Ocean*, Prepared for the Press by Paul Allen, Esquire [*historically known to have been edited by Nicholas Biddle*], Bradford and Inskoop, Philadelphia, 1814).
 ► The 1810 map includes "Rio Colorado" to the "G of California", which includes along the Colorado River between the confluences of "Rio Languanus" and "Rio Jasquevilla" the label "Puerto del Bacorilli" (Puerto de Bucareli) and its position that belie its having been copied, at least in this part, from Pike's 1810 map, which was there mislabeled as "Puerto del Bacorelli".

Clason Map Company

- NO DATE 25.1580 **Clason's Guide Map of United States Published by the Clason Map Co., Denver, Colo.**
 ("Copyrighted by the Clason Map Co. Denver, Colo.")
 Library of Congress Copyright Office's receipt copy stamped with date "Oct -7 1919".
 ► "National Old Trails Road" and "A. T. & S. F. Ry." are delineated across northern Arizona, with "G. C. Ry." spur between Williams and Grand Canyon at "Grand Canyon Nat. Park". Roadway shown from east of Flagstaff around eastern side of San Francisco Peaks to Grand Canyon, and between there and east of Williams. "Dixie Overland Highway" is shown crossing the Colorado at Yuma.
- 1907 25.2413 **Map of Nevada and Southern California 1907 The Clayson Map Company Publishers of Advertising and Reference Maps Denver, Colorado.** ("Copyrighted 1907 by Geo. S. Clason, Denver, Colorado.") ("The Denver Lith Co. Denver, Colo.") ("Price \$5⁰⁰".)
 ► Some topography, railways, and roads are sketched in on the otherwise blank portion of the adjacent Arizona. In the great bend of the Colorado River are labeled "Virgin Canyon", "Boulder Can.", and "Black Canon", where the Black Mountains are labeled "Colorado Range". Also denoted are roadways crossing the Colorado at "Scanlon Ferry", and "Rioville" at the mouth of the Virgin River. "Old Callville" is also denoted.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1914 25.284 **Clason's Guide Map of Arizona.** *In: Clason's guide to Arizona : with map.* Denver: Clason Map Co.
Map with index, in booklet form, map folding out. Scale ca. 1 inch = 20 miles. Also later printings.
- 1931 25.2140 **Clason's Road Map of Arizona and New Mexico Showing Paved roads, All Weather Roads and Other Thoroughfares U. S. Highways Shown in Red Published by the Clason Map Co., Chicago-Denver Copyrighted Clason Map.**
In: Clason's touring atlas of the United States and Canada. Denver: The Clason Map Company, p. 44. (Map No. R-235-A.)
▶ "Grand Canyon Natl. Park" is shown accessible from US 66 via roads from "Parks (Maine)" and Williams; also from Cameron via a roadway that connects to the Desert View drive east of "Grandview Pt". An unimproved road reaches the road from Williams from Ash Fork (but does not continue to "Bass Camp" as so shown on some other maps (Bass Camp is shown here as accessible by principal road from Grand Canyon village. The North Rim is accessible from US 89 at Jacobs Lake. Of interest is the depiction of "Lee's Ferry", accessible from both sides of the Colorado River off of US 89 (which itself passes over "Grand Canyon Bridge" (Navajo Bridge). On the lower Colorado River, "Pierce Ferry", "Greggs Ferry", and "Bonelli's Ferry" all are depicted, as also is "Hoover Dam Site (Boulder Dam)".

Cobb, Harriet F.

- 1937 25.1938 **The Harriet F. Cobb relief map of the State of Arizona.** ("Compiled, published and sold by Arizona Mapping Service, 903 N. 1st. St. Phoenix-Arizona Phone 42474, Drawn by Harriet F. Cobb, Copyright 1937-P. T. Reeve,-Phoenix, Ariz.")
- 1939 25.1939 **The Harriet F. Cobb relief map of the State of Arizona.** ("Compiled, published and sold by Arizona Mapping Service, 903 N. 1st. St. Phoenix-Arizona Phone 42474, Drawn by Harriet F. Cobb, Copyright 1937-P. T. Reeve,-Phoenix, Ariz." "Revised to 1939".)

Colby, Frank Moore, AND Sandeman, George

- 1907 25.796 **Cañons of the Colorado.**
In: Colby, Frank Moore, and Sandeman, George (eds.-in-chief), Nelson's encyclopaedia : everybody's book of reference. Vol. III, Ceve to Dende. New York, London, Edinburgh, and Dublin: Thomas Nelson and Sons, revised, 618 pp. (*Nelson's Perpetual Loose-Leaf Encyclopaedia.*) [Map is on p. 247A.]

Collot, Victor [Collot, Georges-Henri-Victor]

- 1826 25.1735 **General Map of North America.**
In: A journey in North America, containing a survey of the countries watered by the Mississippi [sic], Ohio, Missouri, and other affluing rivers, with exact observations on the course and soundings of these rivers, and on the towns, villages, hamlets and farms of that part of the New-World; followed by philosophical, political, military and commercial remarks and by a projected line of frontiers and general limits, illustrated by 36 maps, plans, views and divers cuts; by Victor Collot, late General in the French service, Governor of Guadaloupe. Atlas. Paris: sold by Arthus Bertrand, Bookseller.
This is Plate 1.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► Between “California” and “New Mexico” is shown “Great R. of the Apostles”, which descends from mountainous headwaters west of “S^ta Fe”, first on a westerly course, then turning nearly to the south, then bifurcating and arriving along independent courses at a northeast-trending head of “Gulf of California”. This is a peculiar combination of the Gila River and the Colorado River downstream from what is the confluence of those rivers, even though depicted as a single river.

NOTE: The *Atlas* accompanies a separate text volume. A cataloging note online indicates, “Sabin notes: ‘This work was printed both in French and English, but not published, at the time of General Collot’s death, which happened in 1805. More than twenty years afterwards, the whole impression came into the hands of M. Bertrand . . . The journey was undertaken in 1796, at the request of Adet . . .’ The work was published in 1826, but engraved and printed in 1805 based on a journey in 1796. The strange delay in publishing is explained best in Wagner Camp.” The *Atlas* cited here is the English ed. of that volume, seen from a copy in the Bibliotheque nacional de France.

A copy of the French ed. is online at the Library of Congress, *Voyage dans l’Amérique septentrionale, ou description des pays arrosés par le Mississipi* [sic], *l’Ohio, le Missouri, et autres rivières affluentes Atlas*. Paris: Arthurs Bertrand, Libraire, 1826. However, the LOC images online omit this map; whether it was purposely omitted or is lacking in that copy has not been determined here.

NOTE: With notes for a map not pertinent to this Cartobibliography, **WHEAT I:236** (1957, Vol. I, p. 244) remarks on the publication, “Although published posthumously . . . [i]t was actually printed in 1804, but the printed sheets were not bound and published (in a very small edition in both English and French) until 1826.”

Colorado River Historical Society Museum

- NO DATE 25.2498 **[Map of Mojave National Preserve, California.]** Bullhead City, Arizona: Colorado River Historical Society Museum. 1 sheet. **[2024.]**
- The eastern portion of the preserve lies within the boundaries of this cartobibliography. Base map with no credit reproduces a U.S. National Park Service map of the preserve. On it the Mojave Road is specially highlighted. **INSET MAP:** “Nearby Desert National Park System Areas”. Map plots facilities and specific sites. Large CRHS imprint on left margin. This is apparently a specially arranged printing, which is offered for sale by the museum.

Colorado River Irrigation Company

- 1893 25.340 **Map of the Colorado Desert, Sonora Mesa, and Delta of the Rio Colorado. 1893.** [No imprint], 1 sheet. (“Drawn by J. Hart, 680 Communipaw Ave. Jersey City N.J.”) Copyright Colorado River Irrigation Company.)
- Boundaries are delineated for “Irrigable Land” in the Salton Sink area of California and Baja California, and for “Land of the Colorado River Irrigation Company” in Sonora. “Rio Colorado” is shown with numerous channels, along with “Hardy’s Colorado”, throughout the delta, including the significant “L. de las Pasualitas”. The Colorado is delineated as far north as “Eureka Cañon”. “New River” and “East River” are delineated in Baja California and California. The “Colorado Canal” is delineated from “Potholes” on the Colorado in California into Baja California northeast of “Alamo Mocho”, from whence it divides into the “East Branch” and “West Branch” of the Colorado Canal that continues back into California on either side of “Salton Sink”. Topographic contours are shown only in the Salton Sink area. Mountainous regions are shown by generalized shaded relief. Township and Ranch quadrangles are also shown.

Colton see **Colton, J. H.** or **J. H. Colton and Co.** or **G. W. and C. B. Colton and Co.**

Colton, J. H. [Colton, Joseph Hutchins]

refer also to J. H. Colton and Co.

- 1848 25.27 **Map of the United States[,] the British provinces[,] Mexico &c. Showing the routes of the U.S. Mail[,] steam packets to California, and a plan of the gold region.** New York: Ackerman's Rooms, scale 1:15,000,000.
- 1848 25.2213 **Map of the United States of America, the British Provinces, Mexico and the West Indies. Showing the Atlantic to the Pacific Ocean. Published by J. H. Colton No. 86 Cedar St. New York 1848.** ("Drawn and Engraved by Sherman & Smith New-York".) ("Entered according to Act of Congress, December, in the year 1846, by Joseph H. Colton, in the Clerks Office of the District Court for the Southern District of New York.")
 ▶ Case map. The Colorado River, labeled "R. Colorado" on its lower course, "Rio Colorado of the Gulf of California" on its upper course, is delineated in an effectively straight course between the "Gulf of California" and the confluence of "Green R." and "Grand or Colorado R.", although by the labeling it is difficult to ascertain that the Green continues through the reaches where it receives numerous tributaries, the larger ones of which could be construed to be the main stream that meets the Grand. En route to the gulf from the Green-Grand confluence the Colorado receives an unlabeled tributary from the north-northwest, "Sevier River" from the northwest, "R. Nabajoa" (San Juan River) from the east, "R. Yaquisilla" (Little Colorado River) from the east (with at its confluence the label "P^{to} Bacarelli" [Puerto de Bucareli]), an unlabeled tributary from the north (which has a tributary to it in turn that extends from an unlabeled lake to the west), "R. San Maria" (Bill Williams River) from the east-northeast, "Rio Virgen" from the north and northwest (the confluence far too far south), and "R. Gila" from the east-northeast.
- 1849 25.622 **Map of the United States[,] the British provinces[,] Mexico &c. Showing the routes of the U.S. Mail[,] steam packets to California, and a plan of the gold region.** New York: J. H. Colton, 1 sheet. ("Drawn & Engraved by J. M. Atwood, New York.")
 ▶ The "Rio Colorado of the West" is only generally sketched between the "G. of California" and the confluence of "Green R." and "Grand R.", following a fancifully meandering but direct course southwest and south-southwest to the head of the gulf. The "Rio Virgen" likewise generally shown as a tributary to it from the north, with its confluence much too far south. "Rio Gila" joins the Colorado just north of the gulf. Of additional note is a place name, "St. Louis" at the confluence of the "Green R." and "Grand R."
- 1849 25.2098 **Map of the United States[,] Mexico &c. Showing the various Land and Water Routes from the Atlantic Cities to California. Compiled by J. H. Colton for "Last Leaves of American History."** New York, G. P. Putnam. 1849. Printed at Ackerman's rooms, 120 Fulton St. N.Y.
In: Willard, Emma, *Last leaves of American history: comprising histories of the Mexican war and California.* New-York: George P. Putnam; and London: Putnam's American Agency. ("Entered according to Act of Congress, in the year 1849, by J. H. Colton, in the clerks office of the District Court of the Southern District of New York.")
 ▶ "Rio Colorado of the West" follows an effectively linear course from the confluence of "Green R." and "Grand R.", southwest, receiving three tributaries (none labeled) from the east, the largest of which must be the San Juan River) to a point that seems to be the confluence of the Little Colorado River (not labeled, entering

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

from the east) and the confluence of a very short tributary (not labeled, from the northwest, at about where should be the Virgin River), thence south-southwest directly to the head of the "G. of California", receiving enroute "Rio Virgin" from the northeast and north-northeast, but with a confluence too far south) and "Rio Gila" from the east shortly before the head of the gulf. Along the Colorado's course from the San Juan to the supposed confluence of the Rio Virgin, the river hugs a tableland on its eastern bank, as it flows across yet another tableland that drops to the course of the Virgin.

NOTE: This map, a fold-out frontispiece in Willard (1849) was not used for Willard's 1853 ed. (New York: A. S. Barnes and Co., and Cincinnati: H. W. Derby and Co.), where a simple, one-leaf map replaced it. The map has, however, been variously reused in other publications as well; for example, Colton (1849, *ITEM NO.* 25.2099), and see notation with WHEAT III:592.

- 1849 25.2099 **Map of the United States[,] Mexico &c. Showing the various Land and Water Routes from the Atlantic Cities to California. Compiled by J. H. Colton for Geo. H. Derby & C^o's Edition of Fremont's Exploring Expedition. Buffalo, N. Y. 1849. Printed at Ackerman's rooms, 120 Fulton St. N.Y.**

In: Fremont, John Charles, *The exploring expediton to the Rocky Mountains, Oregon and California*. Buffalo, New York: George H. Derby and Co. ("Entered according to Act of Congress, in the year 1849, by J. H. Colton, in the clerks office of the District Court of the Southern District of New York.")

► "Rio Colorado of the West" follows an effectively linear course from the confluence of "Green R." and "Grand R.", southwest, receiving three tributaries (none labeled) from the east, the largest of which must be the San Juan River) to a point that seems to be the confluence of the Little Colorado River (not labeled, entering from the east) and the confluence of a very short tributary (not labeled, from the northwest, at about where should be the Virgin River), thence south-southwest directly to the head of the "G. of California", receiving enroute "Rio Virgin" from the northeast and north-northeast, but with a confluence too far south) and "Rio Gila" from the east shortly before the head of the gulf. Along the Colorado's course from the San Juan to the supposed confluence of the Rio Virgin, the river hugs a tableland on its eastern bank, as it flows across yet another tableland that drops to the course of the Virgin.

NOTE: This is the same map, except for altered title, as which is cited herein as Colton (1849, *ITEM NO.* 25.2098, Emma Willard's 1849 ed. of *Last leaves of American history*). While it is not reused in Willard's 1853 ed. (New York: A. S. Barnes and Co., and Cincinnati: H. W. Derby and Co.), where a simple, one-leaf map replaced it, the citation here is taken from a bookseller's 2023 catalog in which the map is shown to be the fold-out frontispiece to Frémont's 1853 ed. of *The exploring expedition to the Rocky Mountains*, with imprint as cited here, which is a reprinting of a new ed. of that title. Examinations of digitized books online show that other 1853 eds. of this title have different imprints, and likewise Frémont's new ed. appears in 1852 at least; but it is not clear whether the fold-out map appeared with any of those titles. The map has also appeared with other titles (not seen); for example, see notation with WHEAT III:592.

- 1849 25.1547 **Map of the United States of America, The British Provinces, Mexico, the West Indies and Central America with part of New Granada and Venezuela. New York, Published by J. H. Colton, No. 86 Cedar St. 1849.** ("Map Drawn by Geo. W. Colton.} Engraved by John M. Atwood.} Border Desig^d & Eng^d by W. S. Barnard.} New York." [George Woolworth Colton, Joseph Hutchins Colton, William S. Barnard.]) ("Entered according to Act of Congress in the year 1848 by J. H. Colton in the Clerks Office of the District Court for the Southern District of New York.")

► "Rio Colorado of the Gulf of California" is depicted effectively on a straight southwesterly course through "Upper or New California", from the confluence of "Green R." (though labeled only on its farthest headwater) and "Grand or Colorado R."

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

to the head of "Gulf of California" that separates "California" from "Sonora". "R. Gila" arrives independently from the east-northeast at the same point as which the Colorado arrives at the gulf. The head of the gulf there is depicted rather peculiarly, with two heads to accommodate the two rivers, between which is a small "I. Tomas". The narrow gulf then reaches a short distance to the south-southwest before turning due east for a short distance before reaching "I. Gore" and "Montagu I." at the proper mouth of the Colorado. The gulf itself correctly extends northwest-southeast. En route to the gulf, the Colorado receives the tributaries "R. Nabajoa" (San Juan River) from the east-southeast, "R. Yaquisilla" (Little Colorado River) from the east, a river (not labeled) from the northwest (which in turn shows two forks, one from the north-northeast, the other from the west that heads in a lake), "R. San Maria" (Bill Williams River) from the east-northeast, and (downstream from the Bill Williams) "Rio Virgen" from the north and northwest (which itself receives three tributaries from the northwest). At the Yaquisilla confluence is the label "P^{to} Bucarelli" (Puerto de Bucareli).

- 1849 25.2214 **Map of the United States[,] the British Provinces[,] Mexico &c. Showing the Routes of the U.S. Mail Steam Packets to California, and a Plan of the Gold Region. Published by J. H. Colton, 86 Cedar St: New York. 1849.** ("Drawn and Engraved by J. M. Atwood, New York.") ("Entered according to Act of Congress in the year 1848, by J. H. Colton. in the clerks office of the District Court of the Southern District of New York".)

▶ "Rio Colorado of the West" is delineated on an effectively straight course between "Gulf of California" and the confluence of "Green R." and "Grand R." Only "Rio Virgen" and "Rio" Gila" are labeled as tributaries of the Colorado (the Virgin showing its confluence far too far to the south), although recognizable unlabeled tributaries are the San Juan and Little Colorado Rivers.

- 1850 25.1548 **Map of the United States of America, The British Provinces, Mexico, the West Indies and Central America with part of New Granada and Venezuela. New York, Published by J. H. Colton, No. 86 Cedar St. 1850.** ("Map Drawn by Geo. W. Colton. } Engraved by John M. Atwood. } Border Desig^d & Eng^d by W. S. Barnard. } New York." [George Woolworth Colton, Joseph Hutchins Colton, William S. Barnard].) ("Entered according to Act of Congress in the year 1848 by J. H. Colton in the Clerks Office of the District Court for the Southern District of New York.")

This map is significantly revised from the 1849 ed. (ITEM NO. 25.1547).

▶ "Rio Colorado" is shown between the head of "Gulf of California" (that separates "California" from "Sonora") and the confluence of "Rio Virgen" following an effectively due south course until reaching the confluence of "R. Gila" (from the east), whereafter it flows southeast to the head of the gulf. The head of the gulf remains the same as in the 1849 ed.: The head of the gulf there is depicted rather peculiarly, with two heads, between which is a small "I. Tomas". The narrow gulf then reaches a short distance to the south-southwest before turning due east for a short distance before reaching "I. Gore" and "Montagu I." at the proper mouth of the Colorado. The gulf itself correctly extends northwest-southeast. In the area more toward headwaters, the principal confluence of the Grand and Green Rivers is confused by correctly labeling "Grand R." but labeling the Green as "Rio Colorado", even though the label "Green R." still appears on its farthest headwater. The Colorado still flows through the area labeled "Upper or New California". En route to the gulf, the Colorado receives the tributaries "S^t Johns R. from the east (San Juan River, of which one of its two headwater forks is labeled "R. S. Juan), "R. Yaguisilla" (Little Colorado River) from the east (the label for Puerto de Bucareli has been removed), a river (not labeled) from the northwest that at its headwater comes from a lake to the west, "Rio Virgen" (which flows southward before turning due east to the Colorado, still receiving tributaries from the northwest), and "R. San Maria" (Bill Williams River) from the northeast.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1851 25.650 **Map of the United States of America, the British provinces, Mexico, the West Indies and Central America: with part of New Granada and Venezuela.** New York: J. H. Colton, 1 sheet. (Map drawn by George W. Colton; engraved by John M. Atwood; border designed and engraved by W. S. Barnard.)
- ▶ New Mexico (territory) southern boundary with Mexico shown at the Gila River. "Rio Colorado" is drawn in conjecturally in the Grand Canyon region. The Green River in Utah is labeled "Rio Colorado"; the confluence of it and "Grand R." positioned in Utah; the confluence of the combined "Colorado"/"Grand" with "Rio Yaquisilla or Red R." (Little Colorado River) is positioned near the head of Grand Canyon.
- 1852 25.617 **Map of the United States of America, the British provinces, Mexico, the West Indies and Central America: with part of New Granada and Venezuela.** New York: J. H. Colton; New Orleans, Louisiana: John Ball; and Charleston, South Carolina: W. R. Babcock, 1 sheet. (Map drawn by George W. Colton; engraved by John M. Atwood; border designed and engraved by W. S. Barnard.)
- ▶ New Mexico (territory) southern boundary with Mexico shown at the Gila River. "Rio Colorado" is drawn in conjecturally in the Grand Canyon region. The Green River in Utah is labeled "Rio Colorado"; the confluence of it and "Grand R." positioned in Utah; the confluence of the combined "Colorado"/"Grand" with "Rio Yaquisilla or Red R." (Little Colorado River) is positioned near the head of Grand Canyon.
- 1854 25.649 **Colton's map of the United States of America, the British provinces, Mexico and the West Indies. (Showing the country from the Atlantic to the Pacific Ocean.)** New York: J. H. Colton, 1 sheet.
- ▶ New Mexico (territory) southern boundary with Mexico shown at the Gila River. "Rio Colorado of the Gulf of California" is drawn in conjecturally in the Grand Canyon region and notes "P^{to}. Bucarelli" (*sic*, Puerto de Bucareli) at the confluence of that river with "R. Yaquisilla" (Little Colorado River). The Green River in Utah is labeled "Rio Colorado", although farther upstream "Green R." and "Yampa River" are confusingly labeled on the same stream.
- 1861 25.1513 **Colton's Map of the United States Showing the Proposed Railroad Routes to the Pacific Ocean.**
- INSET ON:** *Colton's map of the Southern States. Including Maryland, Delaware, Virginia, Kentucky[,] Tennessee, Missouri, North Carolina, South Carolina[,] Georgia, Alabama[,] Mississippi, Arkansas, Louisiana[,] Texas. Showing also Part of Adjoining States & Territories Locating the Forts & Military Stations of the U. States & Showing all the Rail Roads, R.R. Stations, & Other Internal Improvements Published by J. H. Colton 172, William Street, New York. 1861. ("Printed by Lang & Laing 117 Fulton St. N.Y.")*
- ▶ On the inset map, "Rio Colorado" reaches the head of the "Gulf of California" between "Lower California" and "Sonora". Toward the headwaters, the "Green R." and "Grand R." follow parallel courses to the southwest. "Rio S. Juan" follows a course from the east, to which "Grand R." is a tributary. It is not clear from the labeling whether it is the Grand or the San Juan that continues westward to meet the Green at the beginning of the Colorado. "R. Virgin" is a tributary to the Colorado from the north and northeast, and "Rio Gila" from the east.
- 1861 25.2339 **Colton's North America Published by J. H. Colton, 172 William St. New York.** ("Entered according to Act of Congress in the year 1855 by J. H. Colton & Co. in the Office of the District Court of the United States for the Southern District of New York.")
- In: Colton's general atlas, containing one hundred and eighty steel plate maps and plans, on one hundred and eight imperial folio sheets, accompanied by one hundred and sixty-eight pages letter-press descriptions, geographical, statistical, and historical, by Richard S. Fisher, M. D. New York: J. H. Colton. ("Entered, according to*

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Act of Congress, in the year One Thousand Eight Hundred and Fifty-six, by J. H. Colton and Co., in the Clerk's Office of the District Court of the United States for the Southern District of the State of New York. Entered, according to Act of Congress, in the year 1860, by J[.] H. Colton, in the Clerk's Office of the District Court of the United States for the Southern District of the State of New York.") This is map No. 2.

► "Rio Colorado" is delineated between "Gulf of California" and confluence of "Green R." and "Grand R." in northern "New Mexico" (this map displays New Mexico Territory across the north of today's New Mexico and Arizona, and Arizona Territory across the southern part of these future states. The courses of the Green and Grand are in parallel through "Utah". "Rio S. Juan" is a tributary to the Grand in northern "New Mexico", from the east, with "Lit. Colorado R." a tributary to the Grand from the southeast. "R. Virgin" is a tributary to the Colorado from the north and northeast; two unlabeled tributaries arrive from the west-northwest (perhaps the supposed Mohave River tributary and the Bill Williams River), and "Rio Gila" from the east.

- 1861 25.2340 **Colton's The United States of America Published by J. H. Colton .Nº 172 William S! New York.** ("Entered according to Act of Congress, in the year 1855, by J. H. Colton, in the Clerks Office of the District Court of the United States for the Southern District of New York.")

In: Colton's general atlas, containing one hundred and eighty steel plate maps and plans, on one hundred and eight imperial folio sheets, accompanied by one hundred and sixty-eight pages letter-press descriptions, geographical, statistical, and historical, by Richard S. Fisher, M. D. New York: J. H. Colton. ("Entered, according to Act of Congress, in the year One Thousand Eight Hundred and Fifty-six, by J. H. Colton and Co., in the Clerk's Office of the District Court of the United States for the Southern District of the State of New York. Entered, according to Act of Congress, in the year 1860, by J[.] H. Colton, in the Clerk's Office of the District Court of the United States for the Southern District of the State of New York.") This is map No. 7/8.

► "Rio Colorado" is delineated between "Gulf of California" and confluence of "Green R." and "Grand R." in northern "New Mexico" (this map displays New Mexico Territory across the north of today's New Mexico and Arizona, and Arizona Territory across the southern part of these future states. The courses of the Green and Grand are in parallel through "Utah". "Rio San Juan" is a tributary to the Grand in northern "New Mexico", from the east, with "Rio de Lino" (Little Colorado River, also labeled "Colorado Chiquito") a tributary to the Grand from the southeast. Cataract Creek (not labeled) is shown as a tributary to the Colorado from the southeast, below the Green/Grand confluence, notably a decided departure from the usual Egloffstein depictions of this period where Cataract Cr. is a tributary to the Little Colorado. "Rio Virgen" is a tributary to the Colorado from the north and northeast; a meager unlabeled tributary arrives from the northwest (perhaps the supposed Mohave River tributary), "Bill Williams Cr." is a tributary from the east and north, and "Rio Gila" from the east-northeast.

- 1861 25.2341 **Colton's Territories of New Mexico and Utah Published by J. H. Colton, 172 William S! New York.**

In: Colton's general atlas, containing one hundred and eighty steel plate maps and plans, on one hundred and eight imperial folio sheets, accompanied by one hundred and sixty-eight pages letter-press descriptions, geographical, statistical, and historical, by Richard S. Fisher, M. D. New York: J. H. Colton. ("Entered, according to Act of Congress, in the year One Thousand Eight Hundred and Fifty-six, by J. H. Colton and Co., in the Clerk's Office of the District Court of the United States for the Southern District of the State of New York. Entered, according to Act of Congress, in the year 1860, by J[.] H. Colton, in the Clerk's Office of the District Court of the United States for the Southern District of the State of New York.") This is map No. 51.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “New Mexico” territory spans the northern parts of today’s states of New Mexico and Arizona, including the angle that today is southernmost Nevada, and “Arizona” territory spans the southern parts of today’s New Mexico and Arizona.. “Rio Colorado” is delineated between head of the Gulf of California (off the map) and confluence of “Green River” and “Grand River” in northern “New Mexico”. The courses of the Green and Grand are in parallel southwest through “Utah” territory, turning south at the Utah/New Mexico boundary. “Rio San Juan” is a tributary to the Grand in northern “New Mexico”, from the east, whereafter the Grand’s course turns west to the Green; en route it receives “Rio de Lino” (Little Colorado River, also labeled “Colorado Chiquito R.”) from the southeast, depicted on its lower course as a dashed line. Cataract Creek (not labeled though two headwater forks are “Parke Cr.” and “Cedar Cr.”) is shown as a dashed-line tributary to the Colorado from the southeast, below the Green/Grand confluence, notably a decided departure from the usual Egloffstein depictions of this period where Cataract Cr. is a tributary to the Little Colorado. “R. Virgen” is a tributary to the Colorado from the north and northeast; an unlabeled tributary arrives from the northwest (perhaps the supposed Mohave River tributary), “Bill Williams Cr.” is a tributary from the east and north, and “Rio Gila” from the east-northeast.

- 1862 25.596 **Colton’s rail-road and military map of the United States[,] Mexico, the West Indies &c.** New York: J. H. Colton, 1 sheet, scale ca. 1:6,500,000.
 ► Map labels the “Colorado or Red River” in the lower Colorado and Grand Canyon regions, and “Rio Colorado” in the upper reaches to below the confluence of the “Red River” (*sic*, Little Colorado River). The route of the “Proposed Pacific R. R.” is sketched in only as a reasonably straight line through the northern portion of “Arizona” and “New Mexico”, the boundaries of which are conflated and not clear from the lines drawn; and it passes farther to the north than the route as surveyed, including passing through the southernmost tip of what later would be the state of Nevada.
- 1863 25.1031 **Colton’s map of California, Nevada, Utah, Colorado, Arizona, and New Mexico.** New York: J. H. Colton.
 Also shows parts of Oregon, Idaho, Nebraska, Kansas, Texas, and Mexico.
- 1864 25.28 **Colton’s map of California, Nevada, Utah, Colorado, Arizona, and New Mexico.** New York: J. H. Colton.
 Also shows parts of Oregon, Idaho, Nebraska, Kansas, Texas, and Mexico.
- 1864 25.1250 **Colton’s Map of the States and Territories West of the Mississippi River to the Pacific Ocean Showing the Overland Routes, Project Rail Road Lines &c. Published by J. H. Colton, N^o 172 William St. New York. 1864.**
 WHEAT V:1099
 ► The Colorado River is labeled “Rio Colorado” in its lower reach between the head of the Gulf of California (not labeled) and the confluence of “Virgin River”; upstream from there it is labeled “Colorado River” to the confluence of “Green River” and “Grand River”. “Big Canon of the Colorado” is labeled between the Virgin and upstream of the confluence of “Colorado Chiquito River”. “Cataract Cr.” is a tributary to the Little Colorado. The main course of the Colorado comes into the Grand Canyon about where Kanab Creek is situated, although “Diamond Cr.” is shown as a tributary to the Colorado a short distance downstream of the confluence of the Little Colorado. “River San Juan” is shown as a tributary not far south of the confluence of the Green and Grand, in southern Utah. “Head of Navigation” is labeled at the mouth of the Virgin River. “Rio Vegas” (Las Vegas Wash) is a tributary to “Black Cañon.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1864 25.2472 **Map of the Atchison, Topeka & Santa Fe Rail Road. Prepared by J.H. Colton, 172 William Street, New York. 1864.** ("Printed by H. P. Cooper 117 Fulton St N.Y.")
- ▶ The rail routes are mostly projected. The base map depicts the "Colorado River" from the confluence of "Green River" and "Grand River", following a southwesterly course nearly to the Arizona-Utah boundary, thence westerly before turning again southwest into Arizona, after which it turns southeast to reach the confluence of "Colorado Chiquito River" just upstream from the confluence of "Diamond Cr." The geography follows decidedly a variant of Egloffstein's geography. The Little Colorado follows a course to the northwest before turning southwesterly to the "Cataract Cr." confluence and, eventually, the main Colorado. "Big Cañon of the Colorado" is labeled in the area between the Cataract Creek confluence and the confluence of "Virgin River".
- 1865 25.1703 **Colton's Map of California, Nevada, Utah, Colorado, Arizona & New Mexico. Published by J.H. Colton 172 William St New York.** ("Entered according to Act of Congress, in the Year 1855 [sic], by J. H. Colton—in the Clerks Office of the District Court of the United States for the Southern District of New York.")
- In: Colton's general atlas, containing one hundred and eighty steel plate maps and plans, on one hundred and eight imperial folio sheets, drawn by G. Woolworth Colton. Letter-press descriptions, geographical, statistical, and historical, by Richard Swainson Fisher. New York: J. H. Colton Co., and London: Bacon and Co.*
- ▶ The Arizona boundary is depicted with the Nevada angle of "Rio Arriba" county at northwest corner. The Gila River international boundary is labeled, "Surveyed by Mexican B^dy Commission", and the Gadsden Purchase boundary is labeled, "Boundary Line between United States & Mexico according to the Gadsden Treaty June 20th 1854. this line was run by Major Emory". In its lower course the Colorado River is labeled "Rio Colorado" and in its upper course "Colorado River". The river is depicted between the head of the Gulf of California (not labeled) and the confluence of "Green River" and "Grand River"; its reach in Mexico is shown on a very sinuous southward course, receiving "New River" from the northwest about one third of the distance above the gulf, and in this reach are various places labeled, including "Algodomes" [sic], "Willow Woods", "Ogdens Landing", and "Sierra Nevada Anchorage". "F^t Yuma", "Colorado C.", and "Arizona City" all are labeled at the "River Gila" confluence. From the Grand-Green confluence through "Big Cañon of the Colorado" the Colorado is labeled "Colorado River". Downstream from the Grand-Green confluence, the Colorado's course is southwestward, receiving "River San Juan" from the east; before reaching the Utah-Arizona boundary it turns due west, eventually turning southwestward and crossing that boundary due north of the mapped "Cataract Cr." confluence (see further), then turns southeastward to a point north-northwest of the "Diamond Cr." confluence, thence turns south-southwest to Diamond Creek and west-northwestward to the confluence of "Virgin River" at "Head of Navigation" above the confluence of "Rio Vegas" (Las Vegas Wash) and the head of "Black Cañon". "Colorado Chiquito River" (Little Colorado River) follows a northwestward course before turning sharply to the southwest, receiving "Cataract Cr." at "Yampais Vill." where it turns briefly northwestward before receiving a tributary (not labeled) from the northeast (a Kanab Creek extension?). From that point it turns southwestward to its confluence with the Colorado, at the point aforementioned north-northeast of the Diamond Creek confluence. All in all, a remarkable confusion not even closely following the courses suggested by the Egloffstein maps.

 ▶ "Rio Colorado" is delineated between "Gol^o di California" and the confluence of "Green R" and "Gr Riviera" (Grand River). Its course below that confluence is south-southwestward into the territory of "Nuovo Messico" where it receives on the Utah-New Mexico boundary "S. Giovanni" (San Juan River) from the east, a tributary (not labeled) from the east (Little Colorado River), then arcs from the south to west to the confluence of "Rio Virgen" which comes from the north-northwest, then turns due south to the gulf, receiving enroute "Mohave R." from the west-northwest, "R. S. Maria" (Bill Williams River) from the northeast) and "Rio Gila" from the east.

Showing all railroads, stations, cities, towns, villages, congressional townships, etc., etc. A complete shipper's guide. Drawn and engraved from the very latest government surveys.* New York and Chicago: The Cram Atlas Co., Western Office (Chicago).
 ▶ "Colorado River" is delineated between the U.S.-Mexico boundary and the Utah-Arizona boundary. Its unusual course arrives into Arizona from the northeast before turning due west, paralleling the Utah boundary, and on a landscape of peculiar geography receiving unlabeled tributaries from the southeast (possibly the San Juan), north (possibly the Paria River), and north-northeast from a Utah town, "Johnson"

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

(possibly Kanab Creek), although all of these are shown to be east of Kanab, Utah. The Colorado's course then turns due southwest, receiving at the start a large tributary from the southeast (likely the Little Colorado River), to which a tributary to it in turn is likely Cataract Creek. At the turn to the northwest, where would be Diamond Creek, no tributary is shown. The label, "Big Cañon of the Colorado Riv." is written alongside this southwest course. The intervening physical geography is fairly imaginary, delimiting mountainous areas and plateaus through which the Colorado and its tributaries flow. This is likely an illusory version of the Egloffstein arrangement. At the confluence of "Rio Virgin" the river turns southward to the gulf. Proposed railway routes are delineated roughly; the 35th parallel route crossing the Colorado south of "The Needles" but continuing a ways farther to the south before turning west; another route crossing the river at "LaPaz"; and the 32nd parallel route crossing at "Colorado Cy" and "Arazona Cy." [*sic*] by "F! Yuma".

- 1878 25.2124 **Cram's Rail Road & Township Map of Arizona. Published by Geo. F. Cram. Proprietor of the Western Map Depot, 66. Lake St. Chicago Ill! 1878.**

In: Cram's standard American atlas of the United States. Compiled from the very latest sources, showing railroads, rivers, counties, towns, villages, post offices, population, &c., to date. A complete guide for business men. Scale, 19 miles to an inch. Chicago: George F. Cram, Western Map Depot.

The peculiar geography of this map remains unchanged from that of Cram (1875, [ITEM NO. 25.2122](#)).

► "Colorado River" is delineated between the U.S.-Mexico boundary and the Utah-Arizona boundary. Its unusual course arrives into Arizona from the northeast before turning due west, paralleling the Utah boundary, and on a landscape of peculiar geography receiving unlabeled tributaries from the southeast (possibly the San Juan), north (possibly the Paria River), and north-northeast from a Utah town, "Johnson" (possibly Kanab Creek), although all of these are shown to be east of Kanab, Utah. The Colorado's course then turns due southwest, receiving at the start a large tributary from the southeast (likely the Little Colorado River), to which a tributary to it in turn is likely Cataract Creek. At the turn to the northwest, where would be Diamond Creek, no tributary is shown. The label, "Big Cañon of the Colorado Riv." is written alongside this southwest course. The intervening physical geography is fairly imaginary, delimiting mountainous areas and plateaus through which the Colorado and its tributaries flow. This is likely an illusory version of the Egloffstein arrangement. At the confluence of "Rio Virgin" the river turns southward to the gulf. Proposed railway routes are delineated roughly; the 35th parallel route crossing the Colorado south of "The Needles" but continuing a ways farther to the south before turning west; another route crossing the river at "LaPaz"; and the 32nd parallel route crossing at "Colorado Cy" and "Arazona Cy." [*sic*] by "F! Yuma".

- 1887 25.1555 **Railroad and County Map of Arizona. Geo. F. Cram, Engraver and Publisher, Chicago.**

In: Cram's unrivaled family atlas of the world. Chicago: George F. Cram.

Note that there are numerous eds. of this atlas. The map referred to here appeared on pp. 212-213 of the 1887 ed. Other eds. have not been examined.

► Map includes some Township and Range section information, boundaries of Indian reservations, and some bare physiographic information. The Havasupai reservation is labeled, remarkably, "Yava Pai Sapa Res." Most tributaries are depicted only diagrammatically with generally undulating lines, though principal rivers and tributaries are shown more accurately. "Colorado River" is shown as encanyoned in "Grand Canon" and "Marble Canon", although the "Grand Canon" label appears only in western Grand Canyon between the confluences of "Rio Virgin" and "Kanab Creek", while the "Marble Canon" label appears between the confluences of "Kanab Creek" and "Little Colorado" (the Little Colorado River is labeled only on a headwater fork). The Colorado is not depicted as encanyoned upstream from the confluence of the Little Colorado.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1899 25.2452 **Map of the United States of America Chicago, Ills.**
In: Cram's standard American railway system atlas of the world. Accompanied with a complete and simple index of the United States showing the true location of all railroads, towns, villages and post offices. New York and Chicago: Geo. F. Cram, pp. 508/509.
 Volume cover title: *Cram's standard American railway system atlas 1899.*
 A broad gap between "America" and "Chicago" in the map title seems to indicate that some text was deleted from an earlier edition.
 ► "Colorado River" is sketched generally; the reaches between the confluence of the Green and Grand Rivers to just below the confluence of "Virgin R." are depicted as encanyoned, as also are the lower reaches of "San Juan R." and "Little Colorado R." The label "Grand Canon" is written such that it spans the Grand Canyon and the canyons of southeastern Utah.
- 1899 25.2453 **Arizona.**
In: Cram's standard American railway system atlas of the world. Accompanied with a complete and simple index of the United States showing the true location of all railroads, towns, villages and post offices. New York and Chicago: Geo. F. Cram, pp. 364/365.
 Volume cover title: *Cram's standard American railway system atlas 1899.*
 ► "Colorado River" is delineated with a broad width with a broad river-flow-like artwork rather than a single line. Between the confluences of the Little Colorado River (not labeled) and "Rio Virgin" the river is depicted as encanyoned. The label "Grand Canon" is shown only in western Grand Canyon, between Parashant Canyon (not labeled) and "Grand Wash". The label "Marble Canon" is written between the confluences of the Little Colorado and "Kanab Creek"; "Coconino Forest" is written along the canyon rim opposite. Boundaries are indicated for "Hualpai Indian Res." and "Yava Pai-Sapa Res." (Havasupai Indian Reservation). The routes of the "Santa Fe Pacific" and "Southern Pacific" railways are delineated.
- 1901 25.2454 **Map of the United States of America.**
In: Cram's standard American railway system atlas of the world. Accompanied with a complete and simple index of the United States showing the true location of all railroads, towns, villages and post offices. Chicago and New York: Geo. F. Cram, pp. 518/519.
 ► This is the same map as which appears in the 1899 ed. (ITEM NO. 25.2453): "Colorado River" is sketched generally; the reaches between the confluence of the Green and Grand Rivers to just below the confluence of "Virgin R." are depicted as encanyoned, as also are the lower reaches of "San Juan R." and "Little Colorado R." The label "Grand Canon" is written such that it spans the Grand Canyon and the canyons of southeastern Utah.
- 1901 25.2455 **Arizona.**
In: Cram's standard American railway system atlas of the world. Accompanied with a complete and simple index of the United States showing the true location of all railroads, towns, villages and post offices. Chicago and New York: Geo. F. Cram, pp. 370/371.
 ► "Colorado River" is delineated with a broad width with a broad river-flow-like artwork rather than a single line. Between the confluences of the Little Colorado River (not labeled) and "Rio Virgin" the river is depicted as encanyoned. The label "Grand Canon" is shown only in western Grand Canyon, between Parashant Canyon (not labeled) and "Grand Wash". The label "Marble Canon" is written between the confluences of the Little Colorado and "Kanab Creek"; "Coconino Forest" is written along the canyon rim opposite. Boundaries are indicated for "Hualpai Indian Res." and "Yava Pai-Sapa Res." (Havasupai Indian Reservation). In this edition, in the Virgin River area, "Pierces Ferry", "Greggs Ferry", and "Bonnelis Ferry" are denoted. The routes of the "Santa Fe Pacific" (now with the "San. Fe & Grand Canyon" spur between

Williams and the Grand Canyon rim, with two section houses en route [“Coconino” and “Tourist”], though the village of Grand Canyon is not depicted) and “Southern Pacific” railways are delineated. From Kingman, a branch line of the Santa Fe is shown to “White Hills”.

The Cram Atlas Co. [see also Cram, George F.; see also George F. Cram Co.]

- 1875 25.2123 **New Railroad Map of the United States & Territories Published by The Cram Atlas Co.** (“Rand, McNally & Co., Printers and Engravers, 79 and 81 Madison St., Chicago.”)
In: *New commercial atlas of the United States and territories: (Scale, 21 miles to the inch.) Showing all railroads, stations, cities, towns, villages, congressional townships, etc., etc. A complete shipper’s guide. Drawn and engraved from the very latest government surveys.* New York and Chicago: The Cram Atlas Co., Western Office (Chicago).
 ► “Colorado River” is delineated between the head of the “Gulf of California” and the confluence of “Green River” and “Grand River”. Its course from that confluence is southwest, receiving “San Juan River” from the east, crossing into “Arizona” following a somewhat meandering course to the southwest and the west; where it turns again to the southwest it receives “Little Colorado or Flax river” from the southeast. Other than one other tributary from the north (not labeled, which may be the Paria River), no other tributaries are shown through the “Grand Cañon of the Colorado River” until the confluence of the Virgin River (not labeled even though its tributaries “Beaverdam Cr.” and “Muddy Cr.” are labeled). The general course is modified and simplified from Egloffstein’s.

Creuzbauer, Robert

- 1849 25.799 **No. 1. A map to illustrate the most advantageous communication from the Gulf of Mexico and the Mississippi Valley to California and the Pacific Ocean compiled by Robert Creuzbauer. 1849.** (Mayer and Korff, New York.)
 WHEAT III:597 [with illustration facing p. 68]
In: Creuzbauer, Robert (compiler), *Route from the Gulf of Mexico and the lower Mississippi Valley to California and the Pacific Ocean, illustrated by a general map and sectional maps: with directions to travellers.* New York: H. Long and Brother, and Austin, Texas: Robert Creuzbauer, 40 [41] pp., maps.
 ► “Rio Colorado” is depicted generally from the confluence of “Green River” and “Grand River” to “Gulf of California” with tributaries “St. Johns River” (San Juan River), “Red River” (Little Colorado River), “R. Virgen” (Virgin River), and “Mohahve R.” [*sic*, tributary from the west in lower Colorado River region].

Crocker, L. V.

- 1916 25.2418 **The Official Map of the United States Compiled from United States Government Surveys, Official State Surveys, and Original Sources. Published by The National Survey Co. Chester[,] Vermont L. V. Crocker, Topographer.**
 ► Map of railways, highways and towns. In the area of interest to this Cartobibliography are delineated the boundaries of “Grand Canyon Nat. Mon.”, “Hualpa [*sic*] Indian Res.”, and “Colorado Riv. Ind. Reserve”. The Bill Williams River is labeled “Ben Williams Fk.”
-

Crow, Ryan

- NO DATE 10.112 **Grand Canyon geologic map river guide : draft.** [No place]: U.S. Geological Survey, 19 leaves [cover sheet, pages 7-19 only (river strip maps)]. [2018.]
 "Geologic map data reformatted by the NPS (accessible from the NPS data store at <https://irma/nps.gov/DataStore/> [data not located 16 February 2019]) and again by Ryan Crow for display as a river guide. This product is preliminary and is subject to revision. It is being provided for testing purposes only. Although the geologic maps at its core have been reviewed and approved for distribution the guide itself has not been reviewed or approved formally by the U.S. Geologic Survey (USGS)."
 Maps created from several geologic maps: Billingsley and Hampton (2000, *ITEM NO.* 24.219); Billingsley and Priest (2013, *ITEM NO.* 24.370); Billingsley and Wellmeyer (2003, *ITEM NO.* 24.232); Billingsley, Block and Dyer (2006, *ITEM NO.* 24.271); Billingsley, Stoffer and Priest (2012, *ITEM NO.* 24.361).

Cruchley, G. [see also Laurie, R. H.]

- 1833 25.1011 **Fredonia Or the United States of North-America; Including also Cabotia, or the Canadian Provinces; the Western Territory To the Pacific Ocean; And the Northern Part of the Mexican States.** By G. Cruchley, Map Seller & Publisher, 81, Fleet Street, from 38, Ludgate St.^t [sic] London. Engraving & Printing in all its various Branches. 14th August, 1830. Additions, 1833.
 The portion of the title, "By . . . Branches." is a separately printed paste-down.
 ► "Rio Colorado" is sketched in very generally on a southwestward course between "Gulf of California" and the confluence of "Rio Zaguana" (Green River) and "R. Nabajoa" (San Juan River). The Little Colorado River is depicted but not labeled. The only other tributaries in this reach of the river are "R. S^{ta} Maria" (Bill Williams River?) and "River Gila". The western side of the head of the gulf has the notation, "Flat Sandy Coast".
- 1836 25.1012 **Fredonia Or the United States of North-America; Including also Cabotia, or the Canadian Provinces; the Western Territory To the Pacific Ocean; And the Northern Part of the Mexican States.** By G. Cruchley, Map Seller & Publisher, 81, Fleet Street, from 38, Ludgate St.^t [sic] London. Engraving & Printing in all its various Branches. 14th August, 1834. Additions, 1836.
 The portion of the title, "By . . . Branches." is a separately printed paste-down.
 ► "Rio Colorado" is sketched in very generally on a southwestward course between "Gulf of California" and the confluence of "Rio Zaguana" (Green River) and "R. Nabajoa" (San Juan River). The Little Colorado River is depicted but not labeled. The only other tributaries in this reach of the river are "R. S^{ta} Maria" (Bill Williams River?) and "River Gila". The confluence of the Gila is shown differently than shown in earlier ed., more northerly and above a bifurcation of the Colorado before the latter rejoins just above the head of the gulf. The western side of the head of the gulf has the notation, "Flat Sandy Coast".
-

Cummings and Hilliard [Cummings, Jacob Abbot, AND Hilliard, Timothy]

- 1817 25.2030 **North America.** ("Published at the Boston Bookstore by Cummings & Hilliard. No. 1. Cornhill. Boston.") ("M. Butler, Sculp.")
In: An ancient and modern atlas, containing thirteent ancient and eight modern maps. [Listed.] Published by Cummings and Hilliard, at the Boston Bookstore, No. 1, Cornhill.
 ▶ "North R." (*i.e.*, Colorado River) and "Blue R." (a tributary to the unlabeled Gila River) run parallel to each other from the north-northeast arcing to south-southeast. From the Blue's confluence with the Gila, that river's course is to the south-southwest, where it meets the North, then follows a course due south to the head of "G. of California".
 The "North R." is not to be confused with "R. del Norte or R. Bravo" (*i.e.*, the Rio Grande), which is also delineated on this map, a tributary to the Gulf of Mexico.

WHEAT IV:925

- 1857 25.1027 **A new map of the Union with the adjacent islands & countries, from authentic sources. Published by D. G. & A. J. Johnson. Trinity Buildings, 111 Broadway. New-York, 1857.**
 ▶ "Colorado or Red River" is depicted between the Gulf of California and the confluence of "Green R." and "Grand River". A different naming scheme is portrayed in the reach downstream from the confluence, but the entire Grand Canyon region on this map is replaced by an ornamental illustration of a steam locomotive with passenger cars and at sea in the distance a side-wheeled steamship. East of there are

shown the confluences of “S^t Johns R. (San Juan River) and “Red River” (Little Colorado River). The “Proposed Central Rail Road to the Pacific” is shown generally on the 35th parallel route; a wagon route is shown along the 32nd parallel.

- 1879 25.1126 **Map VI. United States. 1879.**
In: The illustrated history of methodism in Great Britain and America, from the days of the Wesleys to the present time. Sold only by subscription. Methodist Book Concern: Phillips and Hunt, New York; Hitchcock and Walden, Cincinnati (Ohio), Chicago, and St. Louis; J. P. Magee, Boston; H. H. Otis, Buffalo (New York); Joseph Horner, Pittsburgh (Pennsylvania); J. B. Hill, San Francisco; William Briggs, Toronto, Ontario; Humphrey Pickard, Halifax, Nova Scotia. (Copyright Phillips and Hunt, New York.) [Also later eds. and imprints; not seen.]
 ► This title is not pertinent to this Cartobibliography, but the map displays in the Southwest a very generalized “Rio Colorado” between the Gulf of California (not labeled) and headwater tributaries (not labeled, but which are the Green and Grand Rivers). Also shown diagrammatically are (not labeled) the San Juan, Little Colorado, and Gila Rivers. “Colorado Cy.” is plotted at the confluence of the Gila River; “Mohave Cy.” (*i.e.*, Fort Mohave) is plotted on the upper reach of the lower Colorado River. In the Grand Canyon region, the Colorado between the confluence of the Little Colorado and Nevada is depicted along an essentially straight line. This is likely only a stock map used in this production, lacking credits, which is cited here for its unusual portrayals and labels even at this late date.

▶ An oval **INSET** map portrays the southwestern portion of North America, with the U.S.-Mexico boundary on the Gila River. The "Rio Colorado" is shown generally from the confluence of "Green River" and "Grand River" to "Gulf of California", with tributaries "St. Johns' River" (San Juan River), "Red River" (Little Colorado River), and "R. Virgin".
- 1851 25.694 **J. De Cordova's map of the State of Texas compiled from the records of the General Land Office of the State by Robert Creuzbaur, Houston. 1851.** ("Engraved by J. M. Atwood, New York.")
▶ An oval **INSET** map portrays the southwestern portion of North America, with the U.S.-Mexico boundary on the Gila River. The "Rio Colorado" is shown generally from the confluence of "Green River" and "Grand River" to "Gulf of California", with

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- tributaries "St. Johns' River" (San Juan River), "Red River" (Little Colorado River), and "R. Virgin".
- 1853 25.695 **J. De Cordova's map of the State of Texas compiled from the records of the General Land Office of the State by Robert Creuzbaur, Houston. 1853.** ("Engraved by J. M. Atwood, New York.")
- ▶ An oval **INSET** map portrays the southwestern portion of North America, with the U.S.-Mexico boundary on the Gila River. The "Rio Colorado" is shown generally from the confluence of "Green River" and "Grand River" to "Gulf of California", with tributaries "St. Johns' River" (San Juan River), "Red River" (Little Colorado River), and "R. Virgin".
- 1856 25.696 **J. De Cordova's map of the State of Texas compiled from the records of the General Land Office of the State by Robert Creuzbaur, revised and corrected by Charles W. Pressler.** New York: J. H. Colton and Co.
- ▶ A quadrangular **INSET** map portrays the southwestern portion of North America with the border of the Gadsden boundary. "Green R." and "Grand R." are shown parallel to each other with their confluence embracing a small mountainous area. "Rio Colorado" extends to "Gulf of California". Tributaries to the "Grand" are "Rio San Juan" and "Rio de Lino", the latter of which is also labeled "Colorado Chiquito". Projected routes of the proposed 35th and 32nd parallel Pacific railroads are also shown.
- 1867 25.697 **J. De Cordova's map of the State of Texas compiled from the records of the General Land Office of the State by Robert Creuzbaur, Austin, 1867[.] New edition, revised and corrected to date.** New York: J. H. Colton and Co.
- ▶ A quadrangular **INSET** map portrays the southwestern portion of North America with state and territorial boundaries shown. The Green River (not labeled), "Grand R." and "R. San Juan" have a nearly coincidental confluence, downstream of which is "Rio Colorado", which passes through "Big Canon" (labeled only at its western end). What had been in the 1856 ed. at least, the formerly labeled "Green R." is shorter and without label, but otherwise in the same respective position with the "Grand R." and "Rio de Lino". Nearer the Gulf of California, "Ft. Yuma", "Colorado City", and "Gila City" are shown together. The 35th and 32nd parallel Pacific railroad routes are shown, though not labeled.

Derby. <i>From:</i> Report of the expedition of the United States transport "Invincible," (Capt. A. H. Wilcox,) made by order of Major General P. F. Smith, commanding Pacific division, to the Gulf of California and river Colorado, during the months of November, December, January, February and March, 1850 and 1851. By Geo. H. Derby, Brevet 1st Lieut., Topographical Engineers. <i>In:</i> Conrad, C. M., Report of the Secretary of War, communicating, in compliance with a resolution of the Senate, a reconnaissance of the Gulf of California and the Colorado river by Lieutenant Derby. <i>U.S. 32nd Congress, 1st Session, Senate</i> |

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Executive Document 81, Serial 620, 28 pp., map. [Includes letter of transmittal from Hon. C. M. Conrad to Hon. Wm. R. King, President of the Senate (p. 1), letter of transmittal from Col. J. J. Abert to Hon. C. M. Conrad (p. 1), and transcript of orders to Derby from Asst. Adjutant General J. Hooker (p. 2).
Fold-out map without plate number.

- 1969 25.804 *Derby's report on opening the Colorado, 1850-1851 : from the original report of Lt. George Horatio Derby* (ed., introduction by Odie B. Faulk). Albuquerque: University of New Mexico Press, 54 [60] pp., **MAP**. (Spanish Borderland Documents, no. 1.)
Reprint of Derby (1852).

Desilver, Charles

WHEAT IV:889

- 1856 25.1240 **A New Map of the United States of America by J. H. Young. Philadelphia Published by Charles Desilver 253 Market S^t** ("Engraved by J. L. Hazzard and E. Yeager.") ("Entered according [*sic*] to Act of Congress, in the year 1856, by Charles Desilver, in the Clerks Office of the District Court of the Eastern District of Pennsylvania.") Scale 1:8,750,000.

In: Mitchell's new traveller's guide through the United States and Canadas, containing the principal cities and towns alphabetically arranged, together with rail road, steamboat, stage, and canal routes, with tables of places, and distances from place to place. Illustrated by an accurate map of the United States, showing the lines of finished rail roads, and their more important connections. Philadelphia: Charles Desilver.

► "Colorado R." is depicted between the head of the Gulf of California (just off the map) and the eastern part of where the Grand Canyon is situated. There, in the eastern canyon area, is depicted the confluence of "Green R. Fork of the G^t Colorado" and "Grand R. Fork of the G^t Colorado", with "Sierra de la Lanterna" in between them. "Little Colorado R." is shown as a tributary to the "Grand", shortly above the confluence with the "Green". Other tributaries are "R. San Juan" (a tributary to the "Grand"); "Yampai C." shortly above the confluence of "Virgen R."; two minor tributaries (not labeled) from the east and one from the west; "Mohave R." from the west; "Williams' Fork" (Bill Williams River); and "R. Gila". The "Territory of New Mexico" embraces modern day New Mexico (with an extension to the north), Arizona, and southernmost Nevada. Proposed routes of the Pacific Railroad are depicted; the 35th parallel route by way of the "Williams' Fork" (Bill Williams River) to the Colorado.

Compare also the depiction in Desilver's *New Map of the State of California* (1856, **ITEM NO.** 25.1241).

NOTE: Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.

WHEAT IV:890

- 1856 25.1241 **A New Map of the State of California, the Territories of Oregon, Washington, Utah & New Mexico.** ("Published by Charles Desilver N^o 253 Market Street, Philadelphia.") ("Entered according to Act of Congress, in the year 1856 by Charles Desilver in the Clerks office of the District Court of the Eastern District of Pennsylvania.") [Map 37 in Mitchell's atlas.]

► The region of interest to this Cartobibliography is completely different from that as depicted in *Mitchell's New Traveller's Guide* (Desilver, 1856, **ITEM NO.** 25.1240). "Rio Colorado" is depicted between the head of "Gulf of California" and the confluence of "Green R." and "Grand R." north of the San Juan River. It is shown on a north-south course in its lower reach, and follows an arc from north around to northwest in what is the Grand Canyon region. Tributaries are "R. San Juan"; "R. de Chelly" (which normally is depicted on contemporary maps as a tributary to the San Juan); "Red R." (Little Colorado River); a minor tributary (not labeled) from the south in what is the western Grand Canyon region; "Virgen R."; a tributary (not labeled) from the

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

northeast that is the Bill Williams River; and "Rio Gila". The "Southern Route Pacific R.R." is shown in southern "New Mexico" territory, crossing the Colorado north of "Ft Yumas".

- 1857 25.2111 **A New Map of the United States of America by J. H. Young. Philadelphia Published by Charles Desilver 251 Market St 1857.** ("Engraved by J. L. Hazzard and E. Yeager".) ("Entered according to Act of Congress in the year 1856 by Charles Desilver in the Clerks office of the District Court of the Eastern District of Pennsylvania.")
In: A new universal atlas containing maps of the various empires, kingdoms, states and republics of the world. With a special map of each of the United States, plans of cities &c. Comprehended in eighty one sheets and forming a series of one hundred and forty five maps, plans and sections. Philadelphia: Charles Desilver, pp. 5/6.
- ▶ "Colorado R." is depicted between south of the U.S.-Mexico boundary and the confluence of "Green R. Fork of the G! Colorado and Grand R. Fork of the G! Colorado". Between the two forks is "Sierra de la Lanterna". "Little Colorado R. arrives from the southeast with a confluence on the Grand River fork. The Colorado follows a generalized arc from west to southwest before receiving "Yampai C." from the east and, shortly downstream from there, "Virgen R." from the north and northwest below the boundary of "Territory of New Mexico" and "California" (the former angle that is today southernmost Nevada). Only the southern wagon road is shown, passing through "Ft Yuma". The "Mohave R" is shown reaching the lower Colorado River from the northwest.
- NOTE:* Regarding the Sierra de la Lanterna see the [note](#) in the Introduction herein.
-

Desilver, Roberto

- 1827 25.2408 **Mapa del Mundo.** ("J. Bower. Sc.") **[In Spanish.]**
In: Un libro de mapas, que contiene las mapas siguientes: [ten maps listed]. Philadelphia: Roberto Desilver.
 The volume includes two maps by this title. Maps were inherited from the estate of Matthew Carey and translated.
- ▶ The Gulf of California (not labeled) separates the peninsula, "California" from "New Navarra". At its head arrives a single river (not labeled) from the north-northeast, to which two tributaries (not labeled) arrive from the northeast and (the Gila River) from the east.
- 1827 25.2409 **Mapa del Mundo.** ("J. Yeager Sc.") **[In Spanish.]**
In: Un libro de mapas, que contiene las mapas siguientes: [ten maps listed]. Philadelphia: Roberto Desilver.
 The volume includes two maps by this title. Maps were inherited from the estate of Matthew Carey and translated.
- ▶ "G. of California" separates the peninsula, "California" from "Nueva mexico". At its head arrives a single river (not labeled, the Gila River) whose course is west before turning south to the gulf; at that turn a short river (not labeled, the Colorado, probably) arrives from the north and northeast.
-

Dewald, G. A. St.

- 1851 25.2382 **Die östliche und wetliche Halbkugel der erde. Mit vielen Abbildungen aus der mathematischen und physischen Geographie. Entworfen und gezeichnet für den Schulgebrauch von G. A. Mayo, Civil Engineer—Chief of Draughting Division G.L.O. Photo lith. & print. by Julius Bien & Co. 139 Duane St. N.Y. ("Compiled and drawn by A. F. Dinsmore".)**
 ► Topography is illustrated. Includes county boundaries, Indian and military reservations, land grants, and 40- and 50-mile limits for railroad land grants (35th parallel only).

Dirwald, Joseph

- 1819 25.2086 **Charte von Nord America nach Arrowsmith; v. Humboldt und anderen verlässigen Hilfsmitteln entworfen von Joseph Dirwald. 1819. Verlegt in Wien bey Tranquillo Mollo. / Amerique Septentrionale d'apres Arrowsmith et de Humboldt &c. &c. 1819. à Vienne chez Tranquillo Mollo. [In German, with title cartouche also in French.]**
 ▶ "Collorado Fl." [*sic*] is delineated on a ragged but essentially straight southwesterly course between the head of "Meerbusen von Californien oder das Rothe Meer" and the confluence of "F. Zaguananas" (Green River) and "F. Animas" or "Fl. Pudra Parada" (labels poorly positioned); enroute it receives the tributaries "Fl. Jaquesila" (Little Colorado River) from the east, an unlabeled tributary from the east (oddly positioned, perhaps meant to be Cataract Creek), an unlabeled tributary from the east (undetermined, perhaps the Bill Williams River), and "Fl. Grande de los Apostolos" (Gila River) from the east. West of the Colorado and parallel to it is "Fl. Martyres", which turns southward then southeast to meet the northwestern head of the gulf. The entire basin is delineated being enclosed mountain ranges.

Disturnell, J. [Disturnell, John]

WHEAT III:507

- 1846 25.1067 **Mapa de los Estados Unidos de Méjico, segun lo organizado y definido por las varias actas del Congreso de dicha República: y construido por las mejores autoridades. Lo publican J. Disturnell, 102 Broadway. Nueva York. 1846. [In Spanish.]**
 ▶ "Rio Colorado" is drawn unsteadily along a generally southwesterly course between "Golfo de California" and the confluence of "Green R." and "Rio de N^a S^a de los Dolores", where the headwaters of the Green and other tributaries are peculiarly depicted. Upstream from the confluence with Rio Nabajoa (San Juan River) the Colorado is labeled "Rio Zaguananas". The only other tributaries to the Colorado are "Rio Jaquesita" (Little Colorado River) from the east, "Rio Virgin" from the west-northwest, "R. S. Maria" (Bill Williams River) from the east, and "Rio Gila" from the east-northeast. A short stream without defined headwater or confluence, "R. de los Martires" flows southwest some distance west of the lower Colorado.
- 1846 25.1714 **Mapa de los Estados Unidos de Méjico, segun lo organizado y definido por las varias actas del Congreso de dicha República: y construido por las mejores autoridades. Lo publican J. Disturnell, 102 Broadway. Nueva York. 1846. Revised Edition. [In Spanish.]**
 ▶ "Rio Colorado" is drawn unsteadily along a generally southwesterly course between "Golfo de California" and the confluence of "Green R." and "Rio de N^a S^a de los Dolores", where the headwaters of the Green and other tributaries are peculiarly depicted. Upstream from the confluence with Rio Nabajoa (San Juan River) the Colorado is labeled "Rio Zaguananas". Maria" (Bill Williams River) from the east, and "Rio Gila" from the east-northeast. A short stream without defined headwater or confluence, "R. de los Martires" flows southwest some distance west of the lower Colorado. Within the area of interest to this Cartobibliography, only minor points vary in this Revised Edition compared to the earlier ed. of 1846 (ITEM NO. 25.1067), including the label "P. Bucaretti" (Puerto de Bucareli) added at the Little Colorado confluence, and the place name "S. Pedro" at the Gila confluence.
- 1847 25.36 **Mapa de los Estados Unidos de Méjico, segun lo organizado y definido por las varias actas del Congreso de dicha República: y construido por las mejores autoridades. Lo publican J. Disturnell, 102 Broadway. Nueva York. 1847. Revised Edition. [In Spanish.]**
 ▶ "Rio Colorado" is drawn in uncertainly; upstream from the confluence with "Rio Jaquesita" (Little Colorado River) its name is shown as "Rio Zaguananas". At the confluence of Jaquesita is a place symbol labeled "P. Bucaretti" (Puerto de Bucareli).

WHEAT III:540

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Between Jaquesita and "R. S. Maria" (Bill Williams River), the Colorado's course is foreshortened along a south-southwest heading and receives mid-way "Rio Virgin", which flows some distance from the west-northwest to the Colorado (after having turned from a southwesterly course at the confluence of an unnamed tributary (Las Vegas Wash) that heads at "Vegas". At the latitude of the confluence of "R. S. Maria" and some distance west of it, a short, disjointed river, without definite headwater or confluence, "R. de los Martires", flows parallel to the Colorado.

WHEAT III:669

- 1850 25.1325 **Mapa de los Estados Unidos de Méjico, California &c. Segun lo organizado y definido por las varias actas del Congreso de dicha República: y construido por las mejores autoridades. Lo publican J. Disturnell, 157 Broadway. (Nueva York.) 1850. Revised Edition. [In Spanish.]**

► "Rio Colorado" is drawn in uncertainly; upstream from the confluence with "Rio Jaquesita" (Little Colorado River) its name is shown as "Rio Zaguanas". At the confluence of Jaquesita is a place symbol labeled "P. Bucaretti" (Puerto de Bucareli). Between Jaquesita and "R. S. Maria" (Bill Williams River), the Colorado's course is foreshortened along a south-southwest heading and receives mid-way "Rio Virgin", which flows some distance from the west-northwest to the Colorado (after having turned from a southwesterly course at the confluence of an unnamed tributary (Las Vegas Wash) that heads at "Vegas". At the latitude of the confluence of "R. S. Maria" and some distance west of it, a short, disjointed river, without definite headwater or confluence, "R. de los Martires", flows parallel to the Colorado.

Note that this map, in the area of interest here, replicates the 1847 Disturnell ed. (ITEM NO. 25.36) but varies substantially from the 1850 Disturnell map herein cited as ITEM NO. 25.1324.

WHEAT III:670

- 1850 25.1324 **Map of Oregon, California, New Mexico, &c.**
INSET ON: *Disturnell's New Map of the United States and Canada; Showing all the Canals, Rail Roads, Telegraph Lines and principal Stage Routes. Drawn by Henry A. Burr, Topographer to the Post Office Dep^t [sic] Washington, D.C. New York, Published by J. Disturnell, N^o 157 Broadway 1850. ("Engraved by J. M. Atwood. N.Y.")*

► The main map displays only as far as the western part of Texas and is likely the map by Burr, the inset perhaps having been added by Disturnell in so far that it does not show any of the routings promised by the main title and that it seems to have been cut from another plate. In the inset map, "Lower Cal." is separated from "Sonora" by "G. of Californ" [*cut off, thus*]. "Colorado R." is shown only very generally between the head of the gulf and the confluence of "Green R. and "Grand R." Two tributaries are shown from the east, "R. St. John" (San Juan River) and "Red R." (Little Colorado River). The Colorado follows a course generally south-southwest to this point before arcing through what is the Grand Canyon region westward to the confluence of "Rio Virgin", receiving one small tributary from the southeast near the Virgin confluence, whereafter it turns to an effectively straight course to the south, receiving "Mohave R." from the northwest, a tributary (not labeled) from the northeast (Bill Williams River), and "Rio Gila" more or less at the head of the gulf.

Published by Monk & Sherer College Buildings Cincinnati. 1847.** ("Drawn & Engraved by Doolittle and Munson. Lettering by Ed. O. Reed [Edwin O. Reed], Cincinnati, O.")
 ► The Gila River boundary between the U.S. and Mexico is shown. The head of the "Gulf of California" is drawn on a north-south line, tapering as like a simple estuary with the "Rio Colorado" coming directly to it on a straight course from the north. A very prominent, north-south oriented "I. de Ignacio" is shown at the head of the gulf. The Colorado is depicted from the confluence of "R. Gila" along a slightly meandering course crossing the Southwest from the northeast, from the confluence of the "Green R." and a short river (not labeled) coming from the south and east. "Grand R." is shown as a tributary to the Green coming due west from "Old Park" in northern "Texas". The Colorado receives as tributaries "R. Nabajoa" (San Juan River) and "Jaquesila R." (Little Colorado River), with at the confluence of the latter is the place name "P. Bacarelli" (Puerto de Bucareli). Between that confluence and the confluence of "Virgin R." (which comes to the Colorado from the northwest) are a short river (not labeled) from the north-northwest and a short river (not labeled) from the east. "R. Maria" (Bill Williams River) is also shown.

 WHEAT II:474 [with illustration facing p. 180]
 ▶ *Atlas* map; notes "Rio Colorado del Occidente *reconnu par Alarcon en 1540*", which flows into "Golfe de Californie ou Mer Vermeille de Cortès" after having passed conjecturally through the Grand Canyon region. (The remark pertaining to Alarcon's reconnaissance is written alongside the Colorado, from the river label that begins at the river's mouth, upstream about to where the Colorado's course changes from southwest to south-southwest, a considerably incorrect implication.) "Rio Colorado" heads at the confluence of two streams displayed as relatively minor ones, "R. Verte" and "R. Espagnale", both of which flow north to south. Downstream from that confluence, tributaries arrive: not labeled, from the east; not labeled, from the northeast, "Rio San Joaquin" from the northeast, "Rio de las Navajoas" from the east and northeast, and "Rio Gila" from the northeast. The Little Colorado River is absent! A meandering stream is depicted, without obvious source nor confluence, at the Colorado's turn southward; it could be a poorly defined Virgin River. At the confluence of the Gila and Colorado, which is depicted as if it is at a meandering head of the gulf, are three symbols labeled, "3 M^{ons} détruites" (3 missions *or* monastères détruites) [3 missions *or* monasteries destroyed], and the open mouth of the Colorado is occupied by "I^s de los 3 Reyes". The map also displays explorers' routes, including the route of Domínguez and Escalante in 1776 that is labeled "Recces des R.R.P.P. Escalante et Garcès en 1775 et 1777" [*sic*].

The "Amarillo" (*i.e.*, the supposed "Martyres") is shown paralleling the Colorado from a headwater north of the confluence of the San Juan and "Zaguanes", turning southward to join the Colorado a short distance north of the confluence of the Gila, which in turn is a short distance northeast of the mouth of the Colorado.

- 1836 25.1271 **Amérique du Nord. par A. H. Dufour, Paris, 1836. Chez J. Andriveau-Goujon, Editeur, Rue du Bac, N^o 6.** ("Flahaut sculp.", "Warin scrip.") [In French.]
 ▶ "Rio Colorado" is depicted between the head of "Golfe de Californie ou Mer Vermeille, ou Mer de Cortez" and headwaters in "Sierra Verde". The river flows very generally on a southwestward course across the region from the confluence of "R. Nabajoa" (San Juan River), receiving but one other tributary, "R. Jaquesila" (Little Colorado River) from the east but which is shown running north of the Hopi villages, before reaching the confluence of "Gila R." a short distance north of the gulf.
- 1838 25.1845 **Carte de l'Amérique par Herisson revue et corrigée par A.H. Dufour Paris 1838 Chez Hocquart Rue S^t Jacques N^o 64.** [In French.]
 ▶ The peninsula, "Vieille Californie", is separated from "Nouveau Mexique" by "G de Californie ou Mer Vermeille". "R. Colorado" arrives at the head of the gulf on a mostly straight southwesterly course, with but two small headwater forks and receiving a short stream (not labeled) from the east at a point about two-thirds of its course to the gulf. To that point, the Colorado is separated by a mountain range from another river running in parallel, which in turn turns to the southeast just prior to independently arriving at the head of the gulf. "R. Gila" is also shown arriving independently at the head of the gulf, from the east.
- 1848 25.2421 **Amérique du Nord. par A. H. Dufour, Paris, 1836. Chez J. Andriveau-Goujon, Editeur, Rue du Bac, N^o 6.** ("Flahaut sculp.", "Warin scrip.") [In French.]
 This is the same map as Dufour (1836, ITEM NO. 25.1271).
 ▶ "Rio Colorado" is depicted between the head of "Golfe de Californie ou Mer Vermeille, ou Mer de Cortez" and headwaters in "Sierra Verde". The river flows very generally on a southwestward course across the region from the confluence of "R. Nabajoa" (San Juan River), receiving but one other tributary, "R. Jaquesila" (Little Colorado River) from the east but which is shown running north of the Hopi villages, before reaching the confluence of "Gila R." a short distance north of the gulf.
- 1863 25.1015 **Mexique[,] Antilles, États-Unis, dressés par A. H. Dufour[,] gravés par Ch. Dyonnet. Paris. Abel Pilon, Editeur, Rue de Fleurus, 33.** ("Imp. Geny-Gros, r. de la Montagne S^{te} Genevieve, 34, Paris.") ("Atlas Universel, Pl. 39.") ("Géographie moderne Pl. 30.") [In French.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “Rio Colorado Occidentale” is depicted definitively between the Gulf of California and north of “R. Gila”. North of that point, the river is depicted only by a dashed line, including its confluent rivers, “Green (R. Verte)” and “R. Grande”. “R. Navajoa” (San Juan River), “R. Jaquesila (R. Rouge)” (Little Colorado River), and “R. S^a Clara (R. Vierge)” (Virgin River) each is depicted definitively, with the exception of the lowermost reach of the Virgin.

NOTE: The same map has been seen with a publisher’s attribution in the title panel, “Armand le Chevalier Rue Riobeheu, 61”. Other variants or eds. can be identified.

Dufour, A. H., AND Duvotenay, T.

- 1855 25.806 *El globo. Atlas historico universal de geografia antigua, de la edad media y moderna. Por SS. A. H. Dufour y T. Duvotenay. NOTE: Title-page carries date 1852, but included maps are dated 1855.] [“El golfo de California, mar Bermejo ó Cortés” and “río Colorado” noticed *in passing*, p. 172. Refer to the **MAPS**, “**Mejico Gaspar y Roig, Editores Madrid, 1855.**” and “**Estados-Unidos Gaspar y Roig, Editores Madrid, 1855.**”, which depict the area pertinent to this Cartobibliography.

Dutton, Clarence Edward

- NO DATE 24.789 **[Map of Kaibab Plateau and surrounding country.]** [New York]: Globe Stationery and Printing Co., 1 sheet. [1880s?]
 Notice by John Ward, Manager, Globe Stationery and Printing Co.; square brackets are part of the quotation: “This Map is copied from Powell’s Geological Survey [Tertiary History of the Grand Cañon District, by Clarence E. Dutton, U. S. A.] The Geological contours being followed exactly, only Topographical Map lines are inserted instead of the Geological lines, to show more clearly the elevations, depressions, natural boundaries and sub-divisions.”
 General boundaries of quadrangle: White Cliffs, Utah, on the north; Lees Ferry on the east; Kanab Cañon on the west; the Colorado River on the south.
- 1880 25.1042 **Map of Portions of Utah and Arizona Showing the Arrangement of Faults and Flexures in the Kaibabs [sic] and High Plateaus.**
In: Report on the geology of the high plateaus of Utah : with atlas. U.S. Geographical and Geological Survey of the Rocky Mountain Region, 307 pp.
 ► “Colorado River” is depicted between a point north of the confluence of “San Juan R.” and “Grand Wash”.
- 1882 24.61 **[Five geological maps on 12 sheets.]**
In: The Tertiary history of the Grand Cañon district; with atlas. *U.S. Geological Survey, Monograph 2*, 264 pp. [quarto]; **Atlas**, 23 sheets [double folio].
 Itemization of geological maps by Atlas sheet number:
II: Geological Map of the Western Part of the Plateau Province [scale nearly 1:1,000,000; colored] [“The topography of the colored portion is compiled by J. H. Renshawe, from data and surveys by the U.S. Geographical and Geological Survey of the Rocky Mountain Region, J. W. Powell in charge, and by the United States Geological Survey, Clarence King, Director. The topography of the uncolored portion is compiled largely from surveys under the direction of Capt. George M. Wheeler, U.S. Engineers. Geology by C. E. Dutton” (*from* Sheet I, “List of Atlas Sheets”).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

III: Sketch Map of the Western Part of the Plateau Province Showing Faults of the Grand Cañon District and High Plateaus [scale ca. 1:1,000,000] ["The topography is the same as that of the preceding sheet." (*from* Sheet I)].

VII–VIII (halves of one map): **Map of the Uinkaret Plateau North Half** [scale 1:63,360; colored] [topography by J. H. Renshawe, geology by C. E. Dutton]; **Map of the Uinkaret Plateau South Half** [scale 1:63,360; colored] [topography by J. H. Renshawe, geology by C. E. Dutton].

XII–XIV (quadrants of one map): **Geologic Map of the Southern Part of the Kaibab Plateau (Part I. North-Western Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish, geology by C. E. Dutton]; **Geologic Map of the Southern Part of the Kaibab Plateau (Part II. North-Eastern Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish; geology by C. E. Dutton]; **Geologic Map of the Southern Part of the Kaibab Plateau (Part III. South-Western Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish, geology by C. E. Dutton]; **Geologic Map of the Southern Part of the Kaibab Plateau (Part IV. South-Eastern Sheet.)** [scale 1:63,360; colored] [topography by Sumner H. Bodfish, geology by C. E. Dutton].

XX–XXIV (quadrants of one map; XX/XXI about East-West; XXI/XXIV about North-South): **Geologic Map Showing the South-Western Portion of the Mesozoic Terraces and the Vicinity of the Hurricane Fault** [scale 1:250,000; colored] [geology by C. E. Dutton]; **Geologic Map of the Mesozoic Terraces of the Grand Cañon District and the Southern Portion of the High Plateaus** [scale 1:250,000; colored] [geology by C. E. Dutton]; **Geologic Map Showing the Kanab, Kaibab, Paria and Marble Cañon Platforms** [scale 1:250,000; colored] [geology by C. E. Dutton]; **Geologic Map of the Colorado Plateau and San Francisco Mountains** [scale 1:250,000; colored] [geology by C. E. Dutton].

1885 24.856

[Five geological maps on 12 sheets.]

In: Tertiary history of the Grand Cañon district : with atlas. *48th U.S. Congress, 2nd Session, House of Representatives Miscellaneous Document 35*, 264 pp. [text, quarto]; *Atlas*, 24 sheets [folded, laid loose in three-quarter leather folder with cloth ties affixed to boards on three open edges, and spine labels affixed; quarto].

House series title-page accompanies text volume: *The Miscellaneous Documents of the House of Representatives for the Second Session of the Forty-eighth Congress, 1884-'85. In seventeen volumes. Volume 11.—No. 35. Washington: Government Printing Office. 1885.*

SPINE TITLE FOR TEXT VOLUME: [top] "HOUSE MISCELLANEOUS DOCUMENTS 2D SESS., 48TH CONG. 1884-'85 VOL. 11"; [bottom] "DUTTON [rule] TERTIARY HISTORY OF THE GRAND CANON DISTRICT [rule] WITH ATLAS".

SPINE TITLE FOR ATLAS: [top] "HOUSE MISCELLANEOUS DOCUMENTS 2d SESS., 48th CONG. 1884-'85 VOL. 11"; [bottom] "ATLAS".)

- A re-release of Dutton (1882, *ITEM NO.* 24.61, **which see for an itemization of the geological maps**). This re-release was a part of the collated series of House Miscellaneous Documents for 1884–1885, not mentioned by Farquhar or originally in *THE GRAND CANON* Volume 1. Text and Atlas title-pages are the same as for Dutton (1882), retaining date, but text volume adds the House Miscellaneous Documents series title-page (1885) cited above; atlas does not include a separate House Miscellaneous Documents title-page although it is identifiable from its spine labels. Atlas Sheets differ from 1882 publication in that the double-folio sheets are vertically and horizontally folded to accommodate quarto format (vertical fold in center as in original double-folio state, then folded horizontally to achieve quarto size). Quarto format also corroborated in *Checklist of Public Documents, Second Edition* (U.S. Government Printing Office, Superintendent of Documents, 1895, *ITEM NO.* 2.27756 in Volume 1/Part B of *THE GRAND CANON*), p. 76. *Folded* Atlas Sheets each are also stamped with a numeral on the exterior (sheet verso) corner, enumerated 0 to 23, to facilitate identification of Atlas Sheets without having to unfold them: "0" is the title-page, "1" is the "List of Atlas Sheets" (equivalent to Atlas Sheet I), followed by 2–23

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

(Atlas Sheets II-XXIII, comprising tinted and chromo-lithographic maps and scenic views). Atlas title-page: "Department of the Interior United States Geological Survey J.W.Powell Director Atlas to Accompany the Monograph on the Tertiary History of the Grand Cañon District by Capt. Clarence E. Dutton U.S.A. [vignette] Washington 1882 Julius Bien and Co. Lith. New York".)

Points relating to physical arrangement are provided with the assistance of Daniel F. Cassidy and Richard D. Quartaroli.

NOTE: Sets of loose Atlas sheets, not folded and not stamped with external numbers on verso, are known.

- 1886 25.807 *The Kaibab Division of the Grand Cañon of the Colorado River, in Yavapai County, Arizona. (On the line of the Atlantic and Pacific Railroad.)* Chicago: Rand, McNally and Co., 23 pp., **MAP**.
 Selections edited from Dutton (1882, *U.S. Geological Survey, Monograph 2* [ITEM NO. 21.918 in Volume 1/Part B of THE GRAND CANON]). Although the text is printed within quotation marks, significant editing is noticed; mostly, deleted passages are not indicated by ellipses.
- 1977 24.62 **[Five geological maps on 12 sheets.]**
In: Tertiary history of the Grand Cañon district; with atlas. *U.S. Geological Survey, Monograph 2*, facsimile reprinting, Layton, Utah: Peregrine Smith, Inc., 264 pp.; **Atlas**, 23 sheets [loose in slipcase].
 Edition of 1,500 sets (text and atlas), with introduction by Wallace Stegner.
 Reprinting of Dutton (1882, ITEM NO. 24.61, **which see for an itemization of the geological maps**).

Eastman, S.

WHEAT III:781

- 1853 25.1708 **Map of the South western part of New Mexico Compiled from the latest Explorations and drawn by Capt. S. Eastman, U.S.A. 1853.** ("Published by Lippincott, Grambo & Co. Philad^a") ("Illman & Sons")
In: Schoolcraft, Henry R., *Information respecting the history, condition and prospects of the Indian tribes of the United States: collected and prepared under the direction of the Bureau of Indian Affairs, per Act of Congress of March 3d, 1847, by Henry R. Schoolcraft, LL. D. Illustrated by S. Eastman, Capt. U. S. A. Published by authority of Congress. Part III.* Philadelphia: Lippincott, Grambo and Co. (Ethnological Researches, Respecting the Red Man of America.)
 ▶ "Colorado River" is shown between the "Gila R." confluence and the general Grand Canyon region (not labeled), where arrive "Grand R." (the confluence is off the top of the map, but which reflects those portrayals of parallel Green and Grand Rivers both arriving in the Grand Canyon region from the northeast). "Rio de San Juan" arrives from the east-southeast, and, not far downstream from there, "Little Colorado R." arrives from the southeast. "Rio Virgin" is shown as a short tributary to the Colorado, paralleling the Colorado after the Colorado turns to the south before joining it. "Bill Williams Fork" is shown arriving from the east-northeast.
- 1853 25.1709 **Map showing the locations of the Indian tribes within the United States. Compiled and Drawn by Capt^l S. Eastman U.S.A. 1852.** ("Lippincott, Grambo & C^o Phil^a") ("Engr^d by W. Williams Phil^a")

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Henry R. Schoolcraft, LL. D. Illustrated by S. Eastman, Capt. U. S. A. Published by authority of Congress. Part III. Philadelphia: Lippincott, Grambo and Co., between pp. 96/97.

► Regarding the base map: "Colorado River" is shown following a course from the confluence of "Green R." and "Grand R." in Utah, following a continuous arc from there south eventually to west-northwest, where it receives a tributary (not labeled) from the northwest that has headwaters in central Utah. Midway along the lower Colorado a tributary (not labeled) arrives from the west-northwest, and "Gila R." from the east. The Colorado approaches the head of the Gulf of California (not labeled) on a southerly course, before arriving from due west at a western prong of the head of the gulf.

WHEAT IV:842 [with illustration facing p. 13]
▶ Map subject is extralimital to this Cartobibliography, but base map depicts “Rio Colorado” between the confluence of “Green R.” and “Grand R.” and the head of the Gulf of California (not labeled). The Colorado receives “San Juan R.” from the east, then arcs from south to west through what is the Grand Canyon region (otherwise blank), deviating en route once; receives “Rio Virgin” from the northwest and northeast, then turns south to the gulf, with one southwestward reach en route, receiving midway “Mojave R.” from the west and northwest and “Rio Gila” from the east. Neither the Little Colorado River nor Bill Williams River are shown. The head of the gulf is depicted as twisting due west, at the end of which the Colorado River

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

arrives from the northeast, where a short tributary(?) is also shown arriving from the northeast.

- 1861 25.493 WHEAT IV:947 [with illustration between pp. 98/99]
Map No. 1. Rio Colorado of the West, Explored by 1st Lieut. Joseph C. Ives, Top^l Eng^{rs} under the direction of the Office of Explorations and Surveys, A. A. Humphreys, Capt. Top^l Eng^{rs} in charge, by order of Hon. John B. Floyd, Secretary of War. 1858. drawn by Fr^{hr} F. W. v. Egloffstein. Topographer to the Expedition. Scale of 6 miles to one Inch or 1:380160.

Newberry; see Newberry, 1861 [[ITEM NOS. 11.9465, 24.378](#)]) that accompanied only the Senate version).
 ► This map is well known for its highly conjectural depiction of the greater Grand Canyon region. "Big Cañon of the Colorado" is labeled prominently. "Colorado Plateau" is labeled on the south side of the Colorado. Notably, "Cataract Creek" is a tributary to "Little Colorado or Flax River", which in turn reaches the "Colorado River" nearly at longitude 113° W. "Yampais Village" is also labeled here. At that confluence the Colorado is depicted arriving from the northeast, although its course is shown only a short distance before fading into unmapped territory. A short distance northeast of the confluence of "Diamond River" a prominent tributary (not labeled) arrives from the

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

northwest. Between the Colorado and that unlabeled tributary the features of the plateau are labeled "North Side M^{ts}"

NOTE on collation of maps. Although some sources may indicate that the maps are laid in loose, the copy of the Senate variant of Ives held in the American Philosophical Society, presented by J. S. Newberry, is in its original binding, wherein the two Egloffstein topographic maps are fold-outs following the second free leaf of the volume, preceding the plate titled "General Report; Profile" and the frontispiece.

Ehrenberg, Herman

- 1858 25.706 **Map of the Gadsden Purchase[,] Sonora and portions of New Mexico, Chihuahua & California.** by Herman Ehrenberg, C.E. From his private notes, and those of Major Heinzelman[,] Capt^l Sitgreaves, Lieut^t Derby; Bartlett; Gray; Julius Froebel and others. Lith^y by Alex. Zakreski. at his Topolgr^t Office No 100, Merchant Street, Bolton Barron's Building. 1854. [Lithographed in San Francisco?]
[WHEAT III:803](#) [with illustration facing p. 166]
▶ "Colorado R." is delineated between the head of "Gulf of California" and confluence of "Little Colorado"; it is wholly conjectural in the Grand Canyon region. "Captain Sitgreaves Route" is delineated. Projected routes for the 32nd parallel Pacific railroad are shown. At the mouth of the Colorado River is noted, "Bar 10 to 15 feet at low tide 2 Fathoms".
- 1858 25.603 **Map of the Gadsden Purchase[,] Sonora and portions of New Mexico[,] Chihuahua & California** by Herman Ehrenberg C.E. From his private notes and those of Colonel Gray[,] Maj: Heinzelman, Lieut: Parks and others. The Yaqui, Mayo and Fuerte Valleys are by A. Fleury Millitary [*sic*] Eng: of Sonora. Middleton, Strobridge & Co., Lithographers, Cincinnati, O.
[WHEAT IV:941](#) [with illustration facing p. 110]
▶ "Colorado R." is delineated between the head of "Gulf of California" and confluence of "William's Fork" (Bill Williams River); the Grand Canyon region is not depicted. The entire region north of the Gila River is labeled "Barren waste and rugged Mountains". Projected routes for the 32nd parallel Pacific railroad are shown. At the mouth of the Colorado River is noted, "Bar 12-15 feet at low tide".

By W. H. Emory, Brevet Major, Corps of Topographical Engineers. Made in 1846-7, with the advanced guard of the "Army of the West". *U.S. 30th Congress, 1st Session, Senate Document 7, Serial 505*, 416 pp., map. [Variant.]

NOTE: The Senate version is more scarce than the House version.

► "Rio Colorado" is depicted between the head of "Gulf of California" and a point north of the confluence of "Rio Gila". Comparative coastlines of the northernmost gulf are superimposed, one delimiting "From English Chart", the other "From Old Spanish Chart"; the "English Chart" includes a sketch of the course of the Colorado. Camp dates are shown along the route of travel, with topography sketched in only along the route. The Colorado River is crossed downstream from the confluence of the Gila River, south of "Pilot Knob", west of which the route crosses "Sandy Desert".

Emslie, John

- NO DATE 25.2263 **Geographical Diagram of the Earth Adapted for Illustrating its Movements &c.** ("London: Published by J. Reynolds, 174, Strand. ___Rock &c. C^o Reeves & Sons. Peacock & Mansfield.")
Portfolio title: "Geological Diagrams". ("Drawn and engraved by John Emslie. London. Published by James Reynolds 174 Strand.")

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Pastedown on inside cover: "Physical Geography." (with list of map nos. 13-24, which includes this map, "13. Geographical Diagram, moveable; showing the rotation of the earth, &c.", that displays two polar projections of the world that may be rotated on small pins).] [Those maps that are dated are between 1846-1851.]

► On the western side of "North America" there is delineated an exceptionally long north-south river (not labeled) that reaches "California G."; near the river's head the course is interrupted by what apparently is a large lake.

- 1844 25.2379 **Geographical Diagram of the Earth Adapted for Illustrating its Movements &c. and exhibiting the Chief Mountains & Rivers in the World.** ("Drawn & Engraved by John Emslie 1844.") ("London J. Reynolds, 174, Strand Ackermann & C^o Reeves & Sons, Rocks & C^o Peacock & Mansfield.") ("S₁/ Plain "S₁/6 Colored.")
- Two polar projections of the world that may be rotated on small pins. Includes graphic charts of the comparative lengths of rivers for each hemisphere; for the western hemisphere it includes "Colorado" in "New Albion".
- On the western side of "North America" there is delineated an exceptionally long north-south river (not labeled) that reaches "California G."; near the river's head the course is interrupted by what apparently is a large lake; its origin is in another lake in the far west on the boundary of "British Territory" and "Mexico" that is labeled "L. Superior".
- 1850 24.878 **Geological Map of the World.** ("Drawn & Engraved by John Emslie", "Published by James Reynolds, 174 Strand London.")
- In: Introduction to natural philosophy, comprising a popular account of the properties of bodies; mechanical powers; motion and machinery. The sciences of hydrostatics; hydraulics; pneumatics; acoustics; optics; electricity; magnetism; and chemistry. A companion to Reynolds's series of popular diagrams of natural philosophy, comprising two hundred and fifty illustrations.* London: James Reynolds, 24 pp., 37 plates.
- Very generalized. In the southwestern part of North America, a single river (the Colorado, not labeled) follows an effectively straight course from the north-northeast to enter the head of the Gulf of California (not labeled). The geology in its lower course is mapped as "Alluvium sand, gravel"; in its upper course, "Secondary Lower Coal, Limestone, Devonian".

- 1848 25.1009 **Map of the United States and Mexico.** ("Bowe & Ward, 12 Cornhill, Boston." "Published by Ensign, Thayer, & Co., 50 Ann Street, New York, and 127 Main St., Buffalo.")
Caption: "Ornamental Map of the United States & Mexico."
▶ "Rio Colorado" is sketched in only generally, in a direct route from the head of the "Gulf of California and the confluence of "Green R." and "Grand R." Tributaries are "R. St. John" (San Juan River), "Red R." (Little Colorado River), and "R. Virgin". "Utah" and "N. Mex." embrace what is today Nevada, with the U.S.-Mexico boundary on the Gila River.

Ensigns and Thayer [firm]

- 1847 25.716 **World at one view.** New York: Ensigns, and Thayer.
▶ At this map scale on the western hemisphere, "Colorado R." is shown essentially at a straight course from "Rocky Mts." to "G. of California".
- 1847 25.2221 **Pictorial Map of the United States 1847 Published by Ensigns, & Thayer, 36 Ann Street, New York.** ("Drawn & Engraved by J. M. Atwood, New York.") ("Entered according to Act of Congress in the year 1847 by Phelps, Ensigns & Thayer, in the Clerks Office of the District Court for the southern District of New York.")
BROADSIDE format wall map, with the map centered and pictorial vignettes of U.S. history surrounding it. The sheet notes, "Printed by Miller & Boyle, N^o 102[?] Broadway, N.Y."
▶ "Rio Colorado" (labeled on its lower course) and "Rio Colorado of California" (labeled on its upper course) is delineated between the head of "Gulf of California" and the confluence of "Green R." and "Grand R." Its course follows an effectively straight southwest course, receiving the tributaries "R. San Juan" from the east, "Sevier R." from the north-northwest, "Rio Jaguesita" (Little Colorado River) from the east (with "Bucaretti" [Puerto de Bucareli] positioned as a point-place at the confluence, which was so shown presumably mistaking it as one of the campsites of the Domínguez-Escalante expedition in as much as "St Bartolomo" is shown as a point-place just upstream and "concepcion" at the San Juan confluence). Farther downstream the Colorado receives "Rio Virgin" from the north and northwest, an unlabeled river from the east (Bill Williams River), "Mohave R." from the west-northwest, and "R. gila from the east and northeast. At the confluence of the Gila are "S. Pedro" on the west and "S. Pablo" on the east.
- WHEAT II:609 [with illustration facing p. 69]
- NO DATE 25.698 **Map of the Gold Regions of California. Showing the Routes via Chagres and Panama, Cape Horn, &c.** ("Published by Ensigns & Thayer, 50 Ann Street New-York.") [1849.]
▶ This is a large sheet with much textual material in its lower part. The map area is divided between a map of the Americas and a detail map of the western portion of the continental United States. In "Upper or New California", which embraces much of today's California, Nevada, Utah, and Arizona, the Colorado River is

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

shown only generally, tracing northeast to southwest; in its lower course it is labeled "Rio Colorado", in its upper course below the confluence of "Green R." and "Grand R." it is labeled "Rio Colorado of California". The Colorado passes off the map to the south at the confluence of "R. Gila" at "S. Pedro" and "S. Pablo". "R. San Juan" and "Rio Jaquesita" (Little Colorado River) are tributaries from the east. Between these two confluences is the confluence of "Sevier R", which is shown striking the Colorado from the northeast after having looped wholly around from where it is shown as a north-flowing river with headwaters at "Vegas de Sa. Clara". These headwaters are also the headwaters of the southwest-flowing "Rio Virgin", which in turn arcs to the southeast to join the Colorado. At the confluence of "Rio Jaquesita" is the place name, "Bucuretti" (Puerto de Bucareli).

On the separate map of the Americas, in "California", "R. Colorado" is shown very generally on a southwesterly flowing course; its only headwater is "S. Raphael R.", with tributaries "R. Nabajoa", "R. Jaguesila", and "R Gila" (labeled in its headwater "Gila R."

Faden, William

- 1821 25.2024 **North America, including the West Indies.** ("Published by W. Faden, Charing Cross Jan^y1st 1821.") ("Hatchett sc.")
In: Atlas minimus universalis, or a geographical abridgement ancient and modern of the several parts of the earth, in fifty-eight maps. Composed principally for the use of schools &c. London: Wm. Faden. 2nd ed. January 1, 1821. Map 53.
 ▶ "R. Colorado" is depicted on a straight south-southwesterly course from a region labeled "Teguayo" to "Sea of Cortes"; enroute it receives two tributaries (not labeled) at the same point, one from the east-northeast, the other from the east.
- 1821 25.2179 **Mexico or Spanish Territories in North America.** ("Published by W^m. Faden, Jan^y1st1819.") ("T. Starling, sculp^t")
In: Atlas minimus universalis, or a geographical abridgement ancient and modern of the several parts of the earth, in fifty-eight maps. Composed principally for the use of schools &c. London: Wm. Faden. 2nd ed. January 1, 1821. Map 55.
 ▶ "Rio Colorado" is delineated between "Gulf of California" and headwaters, receiving enroute "R. Jaquesila" from the east and "R. Gila" from the east. Paralleling the course of the Colorado to the west are two disjointed streams without delimited headwaters or confluences; the southerly one is labeled "R. Martyres".

Falconer, Thomas

WHEAT II:479 [1845 ed. = II:493]

1844 25.1089

North America. Published under the Superintendence of the Society for the Diffusion of Useful Knowledge. ("London, Cha^s Knight & C^o 22, Ludgate Street." "Engraved by J. & C. Walker.")

In: On the discovery of the Mississippi, and on the south-western, Oregon, and north-western boundary of the United States. With a translation from the original ms. of memoirs, etc. relating to the discovery of the Mississippi, by Robert Cavalier de la Salle and the Chevalier Henry de Tonty. London: Samuel Clarke, pp. i-iv, 5-96, 1-100, 97-99 [sic], [1], map.

► "R. Colorado" is depicted mostly along a straight line between the "Gulf of California" and headwaters in "Sierra Madre" east of "L. Youla" (Great Salt Lake). The only tributaries along its entire length are "R. Nabajoa" (San Juan River), "R. Jaquesila" (Little Colorado River), "R. Pyramid" (the Virgin River, also confused with the so-called, misrepresented and mistranslated, river of the "sulfurous pyramids"), "R. S. Maria" (Bill Williams River), and "R. Gila". At the confluence of the Jaquesila is a place marker for "P^{to} Bucarelli" (Puerto de Bucareli).

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

Farley, Minard H.

WHEAT V:1026 [with illustration, cropped, facing p. 35]

1861 25.982

Farley's map of the newly discovered Trumontane silver mines in southern California and western New Mexico, comprising those of Coso, Washington, Tiachipa, Russ, Potoso[,] Esmeralda, Holbomb and Bear Valley Districts, together with the most practicable route thereto and a correct table of reference, embracing distances &c. ("Compiled from the Official Maps in the U.S. Surveyor General's Office, from the Surveys of the late U.S. and California Boundary Commission, and from his own private explorations. J. H. Wildes, Draughtsman, U.S. Surv^r Genl^s Office.", "Published by W. Holt, Ag^t American Institute, N^o 305 Montgom^y St. San F^{co}") (Lith. of Nagel, Fishbourne & Kuchel, S.F.)

► The eastern edge of the map depicts "Colorado River" between "F^t Yuma" and "F^t Mojave". The Colorado is drawn from a blind point just short of 36° N latitude and follows an indistinctly meandering course southward.

Farnham, Thomas J.

WHEAT II:494 [with illustration facing p. 189]

1845 25.815

Map of the Californias by T. J. Farnham.

In: Travels in the Californias, and scenes in the Pacific Ocean. New York: Saxton and Miles, 416 pp. [Colorado River, see pp. 302-303, 321.] [Issued in four parts; parts 2-4 are enumerated; part 4 with date 1845.]

► Map, with date 1845, shows in "Upper California" the "Rio Colorado" flowing wholly conjecturally southwestwardly through "Paiuches Desert" from unlabeled headwaters; enroute "R. S. Juan" is a tributary. What is likely the Little Colorado River (not labeled) flows east to west; at its confluence with the Colorado is the notation, "Ruins". "R. Mojaves" is drawn with a dashed line as a tributary to the Colorado in its lower course. "R. Gila" is also shown flowing into the gulf, separately from the Colorado.

1845 25.1001

Map of the Californias by T. J. Farnham. ("Entered according to the act of Congress in the year 1845, by Thomas J. Farnham in the Clerks Office of the Southern District of New York.")

In: Morse, Sidney E., and Breese, Samuel, The cerographic atlas of the United States. New-York: Sidney E. Morse and Co. "1843." ("Supplement to the New-York Observer.)

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► In “Upper California” the “Rio Colorado” is shown flowing wholly conjecturally southwestwardly through “Paiuches Desert” from unlabeled headwaters; enroute “R. S. Juan” is a tributary. What is likely the Little Colorado River (not labeled) flows east to west; at its confluence with the Colorado is the notation, “Ruins”. “R. Mojaves” is drawn with a dashed line as a tributary to the Colorado in its lower course. “R. Gila” is also shown flowing into the gulf, separately from the Colorado.

NOTE: Wheat (Volume 2, p. 270) remarks: “[The] *Atlas* was published in sheets, showing various copyright dates. The map in question is the same as [Farnham (1845, *ITEM NO.* 25.815)], without underlay of color. It was also published in *A System of Geography for the use of schools . . . By Sidney E. Morse, A. M. New York: Published by Harper & Brothers, No. 82 Cliff-Street. 1844.* This shows how misleading these dates can be.”

NOTE: 1845 and 1848 eds. (both copyright 1844) of Morse’s *A System of Geography* seen by Spamer do not include the Farnham map. However, compare also Morse (1844, *ITEM NO.* 25.1002).

WHEAT III:508

1846 25.1326 **Mexico, Texas & California by Tho^s. J. Farnham Author of Travels in Oregon, California &c.&c.** (“Lith. of Lewis & Brown, 272 Pearl St^t N.Y.”)

In: Farnham, Thomas J., *Mexico: Its geography—its people—and its institutions: with a map, containing the result of the latest explorations of Fremont, Wilkes, and others.* New-York: H. Long and Brother.

► “Old California” is separated from “Occidente or Sonora” by “Gulf of California or Sea of Cortes”. “R. Colorado” follows an effectively straight course from headwater nearly in Oregon (!) to the head of the gulf, where it meets at the same point “R. Gila”. En route it receives only a tributary (not labeled) from the east (presumably the San Juan River), “R. Jaquesila” (Little Colorado River), and a minor tributary from the northeast (Bill Williams River?). To the west of the Colorado’s entire course is labeled “Paiuches Desert”.

Wheat (1959, Volume III, p. 250) remarks, “This, so far as the American West is concerned, is a sad performance.”

Ferguson, Orlando

1893 25.1585 **Map of the Square and Stationary Earth. By Prof. Orland Ferguson, Hot Springs, South Dakota. Four Hundred Passages in the Bible that Condemn the Globe Theory, or the Flying Earth, and None Sustain It. This Map is the Bible Map of the World.** copyright by Orlando Ferguson, 1893. ("Louis H. Everts & Co.—Litho. Phila.")

The projection is such that the entire earth is presented with a northern hemisphere sitting in a saucer that envelopes the southern hemisphere, the whole of which is positioned on a plane. Even at this scale the features noted are shown.

▶ This most unusual projection displays a single river (not labeled) reaching "Gulf of California" from headwaters between Salt Lake City and Denver. Its course passes generally through mountains before turning south to the gulf.

Fergusson, Erna

1940 25.817 *Our Southwest.* (Photographs by Ruth Frank and others.) New York and London: Alfred A. Knopf, 376 pp., fold-out **MAPS**.

Fernández Leal, Manuel

1899 25.2354 **Carta General de la República Mexicana Formada en la Secretaría de Fomento, con mejoramiento de datos, por disposición del Secretario del Ramo Ingeniero Manuel Fernández Leal 1899.** ("Imp. Monrocq, 3, Rue Sugar_Paris.") 1 sheet. Scale 1:2,000,000. **[In Spanish.]**

▶ The Colorado River delta area simplistically depicts the estuary with two broadened rivers (not labeled) contributing to it (which are the Rio Colorado and Rio Hardy. Confusingly, it seems that the area between these two rivers displays highlands.

Ferris, Warren Angus

1940 25.818 *Life in the Rocky Mountains : a diary of wanderings on the sources of the rivers Missouri, Columbia, and Colorado from February, 1830, to November, 1835, by W. A. Ferris, then in the employ of the American Fur Company, and supplementary writings by Ferris, with a detailed map of the fur country, drawn by Ferris in 1836. Edited, and with a life of Ferris, and a history of explorations and fur trade, by Paul C. Phillips.* Denver: F. A. Rosenstock, Old West Publishing Co., xcv, 365 pp., **MAP**.

Preface indicates that diary was first published in *Western Literary Messenger*, July 13, 1842, to May 4, 1844.

See in Appendix: "Supplementary Articles. Number 1. Chanion of the Colorado", pp. 319-320, which transcribes Ferris (1842, **ITEM NO.** 2.11635 in Volume 1/Part B of **THE GRAND CANON**) that generally refers to the canyons below the confluence of the Grand and Green Rivers.

▶ **MAP:** The 1836 manuscript map by Ferris, without title, was first published in this volume. The map includes a prominent stretch of the "Rio Colorado" embraced by boxes on either side, labeled, "Great Chanion of the Colorado", which is placed below the confluence of "Green River or Soos Ke de" [*i.e.*, "Seeds-ke-dee"] and "Rio Grand"

and extends between “Rio St. Michael” and “Rio Dolores”. Despite the map’s clear portrayal of the landscape of Upper Basin only, some references point to the obvious labeling that is an early and inferred use of the term “Grand Canyon”, although it is not in reference to the canyon of Arizona. Wheat (Volume 2, 1958, pp. 155-157, 241-242), provides significant remarks pertaining to this map.

Ferry, Hypolite

- WHEAT III:673 [with illustration facing p. 140]
- 1850 25.819 **Carte de la Nouv^{le} Californie dressée d’après les travaux géographiques de M^r Duflot de Mofras et du Colonel Fremont. Par Hypolite Ferry. Paris 1850. [In French.]**
In: Description de la Nouvelle Californie : géographique, politique et morale.
 Paris: L. Maisson, 386 pp., map.
 Colorado River, see pp. 60, 76-77; Gila River, pp. 77-79.
 ► “Rio Colorado” is shown between “Mer Vermeille” and headwaters that are in fact the Green River, although labeled “Rio Colorado”; the Grand River is not labeled. The Colorado is drawn most generally, with an erratically sinuous line throughout. The Little Colorado River and Virgin River do not appear at all.
 Also a **MAP** with “Deuxieme Edition” noted on it, with same date.
NOTE: Although there are overall differences on the map, the Colorado is drawn in a fashion remarkably similar to that shown on the map by E. Housse (1850, **ITEM NO.** 25.703) *Carte de la Nouvelle Californie.*

- WHEAT III:714 [with illustration facing p. 141]
- 1851 25.820 **Nuova California (Stati Uniti dell’America Settentrionale). [In Italian.]**
In: La California : descrizione geografica, politica e morale che contiene la storia della scoperta di questa terra. Quadro delgi avvenimenti politici che vi si effettuano. Dettagli sulla sua topografia, sul clima, e sulle produzioni minerali, vegetabili. Venice: Dalla Tipografia Fontana, 340 pp.
 Map is a greatly different map than that with Ferry (1850, **ITEM NO.** 25.819), with extensive text in the margins.
 ► “Rio Colorado” is shown between “Mare Vermiglio o Golfo di California” and headwaters that are in fact the Green River, although labeled “Rio Colorado”; the Grand River is not labeled. The Colorado is drawn most generally, with an erratically sinuous line throughout. The Little Colorado River and Virgin River do not appear at all. Ironically, in the Grand Canyon region the Colorado has the notation (which clearly pertains to the lower Colorado River), “in generale poco profondo e soggetto a grandi trabocamenti”.

Fiala, John T.

- 1859 25.621 **General Map of the United States & Their Territory between the Mississippi & the Pacific Ocean 1 Shewing the different Surveyed Routes from the Mississippi valley to the coast of the Pacific Ocean, 2 the new established & proposed Post Routes, 3 the recently discovered Gold, Silver and Copper Region in Kansas, Nebraska and Arizona. Compiled from the various P.R.R. Surveys & the best authorities which could be obtained by John T. Fiala C.E. (“Lith. by A. McLean 15 Chesnut [sic] St.”) (“Engraved on Stone by A. Janicke.”) (“Entered in the Clerks Office of the U.S. District Court of Missouri, January 1859 by John T. Fiala, According to Act of Congress respecting Copy rights.”)**
 ► “Rio Colorado” is shown diagrammatically from the confluence of “Green R.” and “Grand R.” to the head of “Gulf of California” that separates “Lower California” from “Sonora”. It receives the tributaries “R. San Juan” from the east-southeast, “Colorado Chiquito” (Little Colorado River) from the southeast, a tributary (not labeled; Cataract Creek, which heads at “Bill Williams Mt”) from the southeast, “R. Virgin” from the north, “Mohave” from the west, “Bill Williams” from the east, and “Rio Gila” from the east-northeast. The proposed route of the “Albuquerque” railway is

shown on the 35th parallel, and the region between it and the Colorado is labeled "Unexplored Territory".

Finley, Anthony

- 1826 25.1521 **Map of North America including all the Recent Geographical Discoveries 1826.** ("Drawn by D. H. Vance", "Engraved by J. H. Young", "Published by A. Finley Philad^a 1826.")
In: A new American atlas, designed principally to illustrate the geography of the United States of North America; in which every county in each state and territory of the union is accurate delineated, as far as at present known: the whole compiled from the latest and most authentic information. Philadelphia: Anthony Finley.
 ▶ "R. Colorado of the West" is shown on an imaginative, effectively straight course between the confluence of "R. Zaguuananas" and "R. Nabajoa" (San Juan River) and the head of "Gulf of California", receiving en route only the tributaries "R. Jaquesila" (Little Colorado River) from the east and "R. S Maria" (Bill Williams River, shown as a significant stream from the east). Note: It is possible that it is the Grand River that is mislabeled as R. Nabajoa, that the San Juan is mislabeled as R. Jaquesila, and that the Little Colorado River is mislabeled as R. S Maria.) "R. Gila" arrives independently at the head of the gulf from the east-northeast. Also of note is "R. Martires", which parallels the Colorado to its west and arrives at the western side of the gulf some distance from the mouths of the Colorado and Gila.
- 1827 25.2288 **North America.** ("Published by A. Finley Philad^a") ("Young & Dellker Sc.")
In: A new general atlas comprising a complete set of maps, representing the grand divisions of the globe. Philadelphia: Anthony Finley, map 4.
 ▶ "R. Colorado follows an effectively straight course form headwates to "Gulf of California", receiving en route one tributary (not labeled) from the east. "R. Gila" arrives independently at the head of the gulf from the east.
- 1827 25.2289 **Mexico.** ("Young & Dellker Sc.")
In: A new general atlas comprising a complete set of maps, representing the grand divisions of the globe. Philadelphia: Anthony Finley, map 31.
 ▶ "R. Colorado of the West" is shown between the head of "Gulf of California" and the confluence of "R. Zaguuananas" (Green River) and "R. Nabajoa" (San Juan River). It seems that the Grand River is mislabeled "R. Nabajoa" (= San Juan River), and the San Juan River mislabeled as "R. Jacquesila" (= Little Colorado River). The Little Colorado River appears without a label.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1831 25.711 **Mexico.** ("Young & Dellker Sc.").
In: A new general atlas comprising a complete set of maps, representing the grand divisions of the globe. Philadelphia: Anthony Finley, map 32.
 ► "R. Colorado of the West" is shown between the head of "Gulf of California" and the confluence of "R. Zaguanas" (Green River) and "R. Nabajoa" (San Juan River). It seems that the Grand River is mislabeled "R. Nabajoa" (= San Juan River), and the San Juan River mislabeled as "R. Jacquesila" (= Little Colorado River). The Little Colorado River appears without a label.

Flemming, C. [Flemming, Carl]

1845 25.1023 **Mexico, Mittel America, Texas.** ("Lithographie, Druck u. Verlag von C. Flemming in Glogau." "entw. u. gez. [entworfen und gezeichnet] von A. Theinert".) [**In German.**]
▶ "Rio Colorado" is depicted on a mostly straight southwesterly course between "Golf v. Californien" and the confluence of "Rafel", having come to that point northwesterly from headwaters in "Sierra Verde". Tributaries along the Colorado are "Nabajoas" (San Juan River), "Jaquesila" (Little Colorado River), "Maria" (Bill Williams River?), and Gila. In addition, north of the confluence of the Gila is a river depicted by a dotted line labeled "Seeds Keeder", into which also flows "Martires" near the Colorado confluence. Parallel to the Colorado and Seeds Keeder is another river, drawn partly definitively and partly with a dotted line, labeled "Sulsureas". The last noted label likely refers to the so-called "river of the sulfurous pyramids"; and "Seeds Keeder" is probably a confusion with that form of name for the Green River, apparently misplaced as well.

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

1848 25.1024 **Californien, Oregon, Utah and Neu-Mejico.** ("Druck u. Verlag von. C. Flemming in Glogau." "Entw. u. gez. v. [entworfen und gezeichnet von] F. Handtke".) [**In German.**]
▶ "Rio Colorado del Occidente" is depicted between the head of the Gulf of California (not labeled) and "R. Virgen". In the area of the confluence of "R. Virgen" the Colorado and the lower reach of the Virgin are depicted by dotted lines. The lower reaches of "Green R. Gräner Fl." and "Grand R. (Gr. Fl.)", as well as the Colorado

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

through the canyon country, are depicted by dotted lines. Along the way, definitively drawn tributaries are "R. Navajoas (S^t Juan)" (San Juan River) and "R. Jaquesila Red R. (Rother Fl.)" (Little Colorado River).

- 1849 25.1128 **Vereinigte Staaten von Nord-America.** ("Entw. u. gez. v. [entworfen und gezeichnet von] F. Handtke".) [In German.]
 ▶ "Rio Colorado del Occidente" is depicted between "Meerb. von Californien" and the confluence of "Green R. Grüner Fl." and "Grand R. Grosse Fl."; the entire course of the Colorado from north of the confluence of "R. Gila" to and including the lower reaches of tributary "R. Virgen" and the Green and Grand are shown by dotted lines, although the tributaries "R. Nabajoas, S. Juan" and "R. Jaquesilla Red R. Rother Fl." (Little Colorado River) are shown by solid lines. Also, "Mohave, R. de las Animas" is shown as dotted-line tributary to the lower Colorado River.
- 1850 25.1079 **Vereinigte Staaten von Nord-America.** ("Entw. u. gez. v. [entworfen und gezeichnet von] F. Handtke".) Glogau. [In German.]
 ▶ "Rio Colorado del Occidente" is depicted between "Meerb. von Californien" and the confluence of "Green R. (Grüner Fl.)" and "Grand R. (Grosse Fl.)"; the entire course of the Colorado from north of the confluence of "R. Gila" to and including the lower reaches of tributary "R. Virgen" and the Green and Grand are shown by dotted lines, although the tributaries "R. Nabajoas S. Juan" and "R. Jaquesilla Red R. Rother Fl." (Little Colorado River) are shown by solid lines. Also, "Mohave, R. de las Animas" is shown as dotted-line tributary to the lower Colorado River.
- 1854 25.1025 **Vereinigte Staaten von Nord-America.** ("Lith. Druck u. Verlag von C. Flemming in Glogau.") [In German.]
 ▶ "Rio Colorado" is depicted between "Golf von Californien" and the confluence of "Green" and "Grand". Tributaries are "S. John's Fl." (San Juan River), "Rother Fl." (Little Colorado River), "Virgen", "Mohaves" from the west, "Maria" (Bill Williams River?), and "Rio Gila".
- 1868 25.1080 **Vereinigte Staaten von Nord-America.** ("Lith. u. Druck u. Verlag v. C. Flemming in Glogau.") [In German.]
 ▶ "Rio Colorado del Occidente" is depicted between "Meerb. von Californien" and the confluence of "Green R." and "Grand River". Tributaries are "R. del Novajo od R. S. Juan", "R. Colorado Chiquito od Flax R." (Little Colorado River), "R. de la Virgen", and "Gila". The Little Colorado is shown as a tributary to the far western portion of where the Grand Canyon is situated. The entire reaches of these rivers, including their tributaries, are depicted with hachures as encanyoned.

Fletcher, Colin

France. Dépôt des Cartes et Plans de la Marine

1904 25.1923 **Côte Ouest d'Amérique. Partie Nord de la Basse Californie et du Golfe de Californie, d'après les derniers levés des Etats-Unis. Dépôt des Cartes et Plans de la Marine. 1879.** ("Edition de Juillet 1904".) ("Gravé par Millian." "Ecrit par Vialard." "3720.") [In French.]

Principally a bathymetric map of the coastlines. A notice on the map, signed "A. Bouquet de la Grye, *Ing^r. Hyd^{ph}e^{re}*", reads in part: "Les Sondes sont exprimées en Mètres et reduites au niveau des basses mers moyennes; il est fait une exception pour les sondes de l'entrée du Colorado, qui sont réduites au niveau des plus basses mers." (*transl.* "Soundings are expressed in meters and reduced to mean low tide level; an exception is made for soundings at the entrance to the Colorado, which are reduced to the level of the lowest tides.")

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► Soundings include portions of the channels on either side of “I. Montague”. “Rivière Colorado” with its intricate meanderings and some channels are depicted from the mouth to the confluence of “Rivière Gila”.

NOTE: Map no. 3720 in 1879 seems to have begun its title, “Côtes du Mexique . . .”; not seen but notice of it seen in a contemporary publication.

France. Dépôt-générale de Marine

- 1828 25.709 **Carte Réduite des Côtes et du Golfe de Californie Depuis le Cap Corrientes jusqu’au Port St. Diego D’après des Observations faites à bord des Corvettes la Descubierta et l’Atrevida et celles de plusieurs Officiers de la Marine Espagnole Madrid 1825. Publiée par ordre du Roi Sous le Ministère de Son Excellence M. le Comte Chabrol de Crousol Pair de France, Secrétaire d’Etat au Département de la Marine et des Colonies. Au Dépôt-générale de la Marine 1826.** (“Gravé par Vieq.” “Ecrit par Besançon.”) (“N^o 326⁽¹⁾.”) [*In French.*]
In: *Neptune des côtes occidentales d’Amérique sur le Grand Océan.* Paris: Dépôt-générale de Marine, [Volume 7].
NOTE: There are different eds. of this atlas, and variants.
 ► “R. Colorado” and “R. Gila” are depicted as independently entering the head of “Golfe de Californie” (no modern scale on map but the mouths are separated by approximately 40 minutes of latitude and 40 minutes of longitude). Interestingly, an island is positioned at the mouth of the Gila, but the mouth of the Colorado has no island. The head of the gulf is an outline sketch only, with no details.
- 1835 25.2447 **Carte Hydrographique des Parties Connues de la Terre Dressée sur la Projection de Mercator, Par C. L. Gressier, Ingénieur Hydrographe de la marine. Publiée par Ordre du Roi Sous le Ministère de M. le Baron Duperré, Amiral, Pair de France, Secrétaire d’Etat au département de la Marine et des Colonies. Au Dépôt-général de la Marine en 1835.** (“Gravé par Michel.”) (“Ecrit par J. M. Hacq.”) (“N^o 818.”) (“Prix. Deux Francs.”) [*In French.*]
 ► “R. Colorado” is delineated on an effectively straight course from headwaters, first south then southwest, to the head of “G. de Californie”. No tributaries are depicted.
- 1851 25.2448 **Carte Générale de l’Océan Pacifique Dressée par M^r C. A. Vincendon-Dumoulin Ingénieur Hydrographe de la marine Publiée Sous le Ministère de M^r Romain-Desfossés, Contre-Amiral, Secrétaire d’Etat au Département de la Marine et des Colonies, au Dépôt Générale de la Marine en 1851.** (“Le plan gravé par Jacobs.”) (“Ecrit par J. M. Hacq et V. Carré.”) (“N^o 1264.”) (“Prix. Deux Francs.”) [*In French.*]
 ► “Rio Colorado” is delineated from headwater in the range “Mont[s] Anahuac”, its course south to the confluence of an unlabeled tributary from the northeast, thence west, arcing to south at the head of “Golfe de Californie”, at the start of which reach it passes north of “Oribe”; no other tributaries are depicted. “R. Gila” arrives independently at the head of the gulf from the east-northeast.
- 1851 25.2449 **Océan Pacifique, Feuille 2^e** (“Pl. 2. N^o 1093.”) (“Le plan gravé par Jacobs, la lettre par Hacq.”) (“(1851)”.) (“Prix. Deux Francs.”) [*In French.*]
 One sheet of a larger map, the other sheets not seen for this Cartobibliography.
 ► “Rio Colorado” is delineated from headwater in the range “Monts Anahuac”, its course south, receiving an unlabeled tributary from the northeast, to the confluence of “R. de los Navajoas” (San Juan River) from the northeast, thence west, arcing to south at the head of “Golfe de Californie”, at the start of which reach it passes north of “Oribe”; no other tributaries are depicted. “R. Gila” arrives independently at the head of the gulf from the east-northeast.

[In French.]
- ▶ In the area of interest to this bibliography, the map is unchanged from the 1820 ed. (ITEM NO. 25.1060). "Rio Colorado" is depicted between the head of "Mer de Cortes", where also "R. Gila" converges, to the confluence of "R. Nabajoa" and "R. Zaguánagas". "Jaquesila R." is shown as a tributary from the east. West of the Colorado, "R. de Pyramides" is shown as a conjectural tributary to "R. des Martires", which in turn is shown as a conjectural tributary to the northwestern gulf below its head.
- See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

Frémont, John Charles

- 1845 25.2404 **Map of an Exploring Expedition to the Rocky Mountains in the Year 1842 and to Oregon & North California in the Years 1843-44 by Brevet Capt. J. C. Frémont of the Corps of Topographical Engineers Under the orders of Col. J. J. Abert, Chief of the Topographical Bureau.** ("Lith. by E. Weber & Co., Baltimore, Md.")
- Accompanying:* Frémont, J. C., *Report of the Exploring Expedition to the Rocky Mountains in the Year 1842, and to Oregon and North California in the Years 1843-'44* (Gales and Seaton, Printers, Washington, 1845 [U.S. 28th Congress, 2nd Session,

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Senate Document 174]; Blair and Rives, Printers, Washington, 1845 [House of Representatives Document 166]).

▶ Although the subjects of the map are extralimital to this Cartobibliography, the substantial blank area on its southern side depicts with a dotted line the course of "Rio Colorado of the Gulf of California" before it passes off the map to the south. The "Green River" is delineated in the main surveyed portion of this map but becomes a dotted line when it passes into the blank area, where it joins with the similarly dotted "Grand R." The Colorado then continues southwestward until it meets the dotted-lined "Rio Virgen" (which itself has its upper course delineated by a solid line, and a dotted-lined tributary to it in turn in the blank area heads at "Vegas" in the surveyed area, which is the Las Vegas Wash.

WHEAT III:559 [with illustrations facing pp. 56, 57]

- 1848 25.826 **Map of Oregon and Upper California From the Surveys of John Charles Frémont And other Authorities Drawn by Charles Preuss under the order of the Senate of the United States Washington City 1848. Scale 1:3,000000.** ("Litho by E. Weber & Co., Balto.")
In: Geographical memoir upon Upper California, in illustration of his map of Oregon and California, by John Charles Frémont: addressed to the Senate of the United States. *U.S. 30th Congress, 1st Session, Senate Miscellaneous Document 148*, 67 pp., map.
 ▶ "Upper California" is everything south of Oregon Territory and west of Missouri Territory and New Mexico, with the international boundary with Mexico depicted as indicated by the Treaty of Guadalupe Hidalgo. Map depicts "Rio Colorado". The vast area north of the Colorado River is labeled "Unexplored", with only some topography drawn in along routes of travel, or as interpreted from distant sightings. Between the confluence of "Green River" and "Grand River" and "Gulf of California" tributaries to the Colorado are "St. John's River" (San Juan River) from the east, "Red River" (Little Colorado River) from the east, "R. Virgen" (Virgin River) from the northwest and north, an unlabeled tributary from the northwest (the supposed "Mohave" of other maps), an unlabeled tributary from the northeast (Bill Williams River), and "Rio Gila" from the east.
- 1880 25.827 **California, Oregon, Idaho, Utah, Nevada, Arizona and Washington.**

Reprint of Frémont (1848, Geographical memoir upon Upper California, in illustration of his map of Oregon and California, by John Charles Frémont: addressed to the Senate of the United States. *U.S. 30th Congress, 1st Session, Senate Miscellaneous Document 148*, 67 pp., map).

Freyhold, Edward

WHEAT V:1185

- 1868 25.347 **Head Quarters Corps of Engineers. War Department. Territory of the United States from the Mississippi River to the Pacific Ocean: Originally prepared to accompany the Reports of the explorations for a Pacific Railroad Route; Made in accordance with the 10th and 11th sections of the Army Appropriation Act of March 3rd 1853; Compiled from authorized explorations and other reliable data by Lieut. G. K. Warren, Top'l. Eng'rs, In the Office of Pacific R.R. Surveys, War Dept. under the direction of Bvt. Maj. W. H. Emory, Topl. Eng'rs, in 1854. Capt. A. A. Humphreys, Top'l. Eng'rs. in 1854-1858. Recompiled and redrawn under the direction of the Chief of Corps of Engineers by Edward Freyhold 1865-66-67-68.** ("Engraved & printed by Julius Bien, N.Y.") Scale 1:3,000,000.

► "Rio Colorado" is depicted from the "Gulf of California" to the confluence of "Green River" and "Bunkara River" (Grand River); in the upper course the Colorado is labeled "Rio Colorado Grande". From near "Wallapi Valley" (Hualapai Valley) to "Supposed junction of the Rio Colorado & Flax Riv.", the Colorado is depicted by a dashed line, to the north of which, to "Rio Virgin" is blank on this map. On the south side of the river in the Grand Canyon area are two tributaries that are shown heading toward the Colorado: "Lava Cr." and "Parke Cr."; on other maps these are shown as tributaries to one or the other, or a single tributary, that is Cataract Creek. The "Little Colorado or Flax River" is depicted flowing northwestward to the Colorado. Various routes of exploration are also delineated.

NOTE: It is this map that John Wesley Powell likely had available prior to his 1869 Colorado River expedition (*vide* Richard Quartaroli).

- 1869 25.1535 **Office of the Chief of Engineers War Department Military Map of the United States compiled and drawn by E. Freyhold 1869.** ("Engraved & printed by Julius Bien, N.Y.") ("Note. In the compilation of this map the Authorities designated on the map of the Western Territories as well as others of more recent date have been used.")
- Topography is represented by shaded relief. "Rio Colorado or Grand River" (the label is on the area that is the canyon regions of northern Arizona and southeastern Utah) runs to the head of the "Gulf of California" that separates "Lower California" from "Sonora". East of the confluence of "R. Virgin" the course of the Colorado is depicted by dotted lines except for 1) a reach around the confluence of Diamond Creek (not labeled), 2) a reach around the confluence of "Flax River" (Little Colorado River), 3) around the confluence of Paria River (not labeled), and 4) a reach around the confluence of "Green River" and what actually is the Grand River (labeled farther upstream "Grande River"). The "Flax River" (part of its lower course marked by a dotted line) reflects the geography of Egloffstein in Ives (1861), meeting the Colorado from the east in the central part of where the Grand Canyon is situated, and which shortly before it meets the Colorado receives from the southeast "Park Cr." that is labeled on a fork of what is Cataract Creek (not labeled).

WHEAT V:1295

- 1879 25.1102 **Map of the Territory of the United States, West of the Mississippi River. Prepared by authority of of [sic] the Hon. the Secretary of War in the Office of the Chief of Engineers under the direction of Brig. General A. A. Humphreys Chief of Engineers and Brevet Maj. Gen. U.S. Army. By Edward Freyhold 1879 Scale 1/2000000.** 6 sheets, each in covers.
- ("Note. This map has been compiled chiefly for Military purposes from the best available data obtained by the several departments of the government. Critical exactness has, in some instances, been disregarded in order to adapt the most recent information to portions compiled before its reception. [¶] Telegraph Lines, having

been established along all-most all Rail Roads, are shown only where the latter terminate.”)

► The lowermost reach of “Colorado River”, between the “Gulf of California” and “F. Yuma”, and a short reach farther north between “Eureka” and “Rodes Rch.”, are shown on Sheet 4. The remainder of the area of interest to this Cartobibliography is shown on Sheet 5. The title panel is shown on Sheet 6. “Grand Cañon of the Colorado” is labeled between “Grand Wash” and “Kanab Wash”; “Marble Cañon” is labeled between “Kanab Wash” and confluence of “Colorado Chiquito Cañon”/“Rio Colorado Chiquito”. West of Grand Canyon “Iceberg Cañon” and “Black Cañon” are labeled. The Salton Basin is labeled “Dry Bed of Lake” and “New River” is shown reaching it. Routes of exploration, surveyed railroad routes, and the military telegraph line between San Diego and Fort Yuma is depicted graphically.

Freytag & Berndt [firm]

- 1926 24.867 **Übersicht von Nord_Amerika nach den geologischen Vermessungen von Canada, der Vereinigten Staaten und anderen Quellen.** (Caption: “Nord_Amerika”.) (“Berghaus’ Physikal. Atlas N^o 13.”) (“Entw. v. Herm. Berghaus 1886, Ausg. 1887.”) (“Nebenkarten gez. v. M. Risch.”) **[In German.]**
- Geological map. The main map restricts labeling principally to large-scale geographical features and does not label rivers; in the area of interest here only “Colorado Plat.” appears across the Grand Canyon area.
- An **INSET MAP**, “**Cañons des Colorado 1:5000 000**” provides some rather antiquated labeling: “Grand Cañon” appears in the western Grand Canyon, while “Marble Cañon” is in the area between the confluences of “Colorado Chiquito” and “Kanab Cañ.” Most physiographic features and the course of “Rio Colorado” are correct but while “Cataract Cr.” is correctly delineated, “Parke” Cr.” parallels it just to the east, passing around the west side of “Red Butte” before turning northeastward to reach the Colorado.

Froiseth, B. A. M.

- 1878 25.1103 **Second Edition Thoroughly Revised. Re Engraved and Brought Down To Date. Froiseth’s New Sectional & Mineral Map of Utah[.] Compiled from the latest U.S. Government Surveys and other authentic sources. Exhibiting the Sections. Fractional.Sections. [sic] Counties. Cities. Towns. Settlements. MiningDistricts . [sic] Railroads and other Internal Improvements.** Salt Lake City: B. A. M. Froiseth. (“A. L. Bancroft & Co. Lit^hs [sic]”.)
- The very northernmost part of Arizona is shown at the bottom of the map (which is not so displayed in other eds.). In the area of interest to this Cartobibliography, “Colorado River” is shown at the boundary in “Monument Cañon” (Glen Canyon), approximately to the site of Lees Ferry. Also of note is a label for “The Temple of Music” (Music Temple) just south of the confluence of “San Juan River”.

Fuis, Gary S., AND Blair, J. Luke

- 2022 11.18985 **Preliminary geologic map of Early Miocene felsic eruptive centers in the Aquarius Mountains, west-central Arizona.** *U.S. Geological Survey, Open-File Report 2022-1016*, 1 sheet, scale 1:15,000.
- “The first author, Gary S. Fuis, conducted this mapping in the summer of 1967 in partial fulfillment of the entry requirements into the Ph.D. program of the Division of Geological and Planetary Sciences of the California Institute of Technology, Pasadena, Calif. The area mapped lies wholly within the Fort Rock Ranch, a private ranch spanning ~50 square miles in Mohave and Yavapai Counties, Arizona. Access to the ranch is limited, and it is uncertain whether a detailed geologic map of the

Aquarius Mountains can be recreated today. Therefore, we are making this map available to the public in this Open-File Report.”

Fullarton see **A. Fullarton and Co.**

Furne, Jouvét et Cie. [firm]

- 1882 25.1992 **Amérique Septentrionale.** (“Atlas S^t Cyr.”) (“Furne, Jouvét et C^{ie} éditeurs ___ Imp. Lemerrier et C^{ie} Paris.”) [In French.]
In: Atlas universel de géographie moderne : physique, politique, historique, industriel, commercial et militaire : adopte par le Ministère de la Guerre pour l'École de Saint-Cyr. Paris: Furne, Jouvét et Cie, Éditeurs (Jouvét et Cie, successeurs).
 ► “Colorado Occid!” is depicted between “Golfe de Californie” and the confluence of “Colorado Vert” (Green River!) and “Grand Colorado” (Grand River!), following a south-southwesterly course until reaching the Grand Canyon area, where it arcs to the west-northwest before turning south at the confluence of the Virgin River (not labeled).
- 1882 25.2182 **Carte Militaire des Etats-Unis (Partie Occidentale.)** (“Furne, Jouvét et C^{ie} éditeurs ___ Imp. Lemerrier et C^{ie} Paris.”) (Corrigé par J. Geisendörfer 12, r. de l'Abbaye: Paris’.) [In French.]
In: Atlas universel de géographie moderne : physique, politique, historique, industriel, commercial et militaire : adopte par le Ministère de la Guerre pour l'École de Saint-Cyr. Paris: Furne, Jouvét et Cie, Éditeurs (Jouvét et Cie, successeurs).
 ► “Rio Colorado” is delineated between “Golfe de Californie” and the confluence of “Green R.” and “Bunkara R.”(!); its passage from these upstream sources to the confluence of “Virgen R.” is depicted as encanyoned; its course through the Grand Canyon (not labeled) is approximately correct; enroute it recieves the tributaries “Sⁿ Juan R.”, “Petit Colorado (Flax.)”, and “Kanab Carson” (*sic!*). In its lower reach the Colorado receives “William R.”, which is labeled on an upstream fork “R. S^a Maria”, and “Rio Gila”.

Furse, Peter R.

- 1966 25.2019 **Some of the Explorers of North America by:—Peter R. Furse. Hampton. New Brunswick. 1966.** (“©1966 Maclean-Hunter Publishing Company Limited.”) (“Litho’d in Canada.”)
 ► A strictly pictorial map with legends accompanying the artwork. Includes Cardenas at Grand Canyon, Alarcón at the Colorado River delta, Ulloa in the Gulf of California, and the Coronado *entrada*.
-

G

G. and W. B. Whittaker [firm]

- 1822 25.2386 **America.** (“Published 1st Jan^y. 1819, by Pinnock & Maunder Strand.”) (“Neele Sculp^t”)
In: Pawley’s minor atlas, consisting of a complete set of maps. Compiled from the best authorities, and includng all the new discoveries engraved by Samuel & George Neele. London: G. and W. B. Whittaker. Map XXXVIII.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “Colorado R.” is delineated on a straight southwesterly course from headwater to “Gulf of California”. The Gila River basin (not labeled) is shown with its confluence with the Colorado from the northeast.

- 1822 25.2387 **N. America.** (“Published Jan^y. 1st 1819, by Pinnock & Maunder Strand.”) (“Neele sculp.”)
In: Pawley’s minor atlas, consisting of a complete set of maps. Compiled from the best authorities, and including all the new discoveries engraved by Samuel & George Neele. London: G. and W. B. Whittaker. Map XXXIX.
 ► The Colorado River appears to be absent. A single stream with three headwater forks (apparently the Gila River, not labeled) follows a westerly course before bifurcating with both branches proceeding independently to the “G. of California”.

G. Freytag und Berndt A. G. [firm]

- 1926 24.876 **Freytag & Berndt’s Tektonische Schulwandkarte der Erde.** Wien: Druck und Verlag der Kartog. Anstalt G. Freytag & Berndt A. G. (“Bearbeitet von Prof. Dr. Max Fritz.”) (“Laut Erlaß des Bundesministeriums für Unterricht vom 16.Juli 1926 Z. 6445/g-II, für Mittelschulen, Lehrer-u. Lehrerinnenbildungsansalten zulässig erklärt.”) Scale 1:16,000,000. [In German.]
 An early tectonic map of the world, supporting the new theory of plate tectonics. Within the area of interest here are two symbols west of the San Francisco Peaks and south of the Colorado River, indicating “Epizentren solcher Erdbeben, welche eine Reichweite von mehr als 4000 km mikroseismisch, beziehungsweise mehr als 300 km makroseismisch aufweisen. (vorwiegend nach A. Sieberg)” (*transl.* ‘Epicenters of some earthquakes, which have a range of more than 4000 km microseismically or more than 300 km macroseismically. (mainly based on A. Sieberg)’). These symbols lie within, and are the only ones within, the delimited area of “Colorado-Plateau”. Also there is a single symbol immediately northwest of Yuma, indicating, with a question mark, “Vulkane mit Ansbrüchen in historischer Zeit” (*transl.* ‘volcanoes with eruptions in historical times’).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Verso display panel reads: **Easy to read : Arizona : large print state map.** Larger print is used for principal geographic names, but local features are in more conventionally sized print.

INSET maps include "Grand Canyon Village".

G. W. and C. B. Colton and Co.

refer also to Colton, J. H.

refer also to J. H. Colton and Co.

- 1865 25.1584 **Map showing the relation of Mobile & New Orleans to the Ports of Mexico[,] Central America and the West Indies".**
INSET ON: *Map Showing the New Orleans, Mobile & Chattanooga Railroad and its Connections. prepared by G. W. & C. B. Colton & C^o 172 William St^e New York.* ("Entered according to Act of Congress in the year 1865 by G. W. & C. B. Colton & C^o in the Clerks Office of the District Court of the United States for the Eastern District of New York.") ("Maps of Every Description to accompany Reports, Prospectuses etc. Drawn and Engraved, Printed & Colored at G. W. & C. B. Colton & Co's Map Establishment 172 William St. New York.")
▶ The inset map portrays parts of North and South America. "R Colorado" is shown quite generally from the confluence of "Green R." and "Lit. Colorado R." to the head of "Gulf of California". "Grand R." and "R. S. Juan" have a common confluence from which the stream flows west a short distance to enter the Little Colorado River a short distance above the Little Colorado's confluence with the Colorado. "R. Gila" is a tributary to the Colorado some distance before the latter reaches the gulf.
These base maps also seem to have been used for other railroads during this time period.
- 1870 25.1514 **Plan of the Western Portion of the United States.**
INSET ON: *Colton's Railroad Map (Intermediate Size) of the United States Reduced from "Colton's Railroad & Commercial Map of the United States". Published by G. W. and C. B. Colton & Co. 172 William St^e New York.*
Map on four sheets. This inset is on lower-right sheet.
▶ "Colorado R." is depicted reasonably accurately along its lower course. In the Grand Canyon region it is clear that it follows the depictions presented by Egloffstein in Ives (1861). The "Lit. Colorado" arrives from the east-southeast, into which several tributaries (not labeled) feed from the southeast; the entire stretch between the Virgin River (not shown!) and the Little Colorado River, including the Little Colorado and its tributaries, is depicted as encanyoned. Between that confluence and a point downstream from the confluence of "Green River" and "Grand R." the Colorado is depicted by a dotted line.
NOTE: The 1870 ed. of "Colton's Railroad & Commercial Map of the United States" has thus far not been seen for this Cartobibliography, but see the 1871 ed. (ITEM NO. 25.1516).
- 1870 25.1515 **Karte der Verschiedenen Pacific Eisenbahnen und deren Verbindung mit anderen Bahnen Für die "N.Y. Handels Zeitung" gezeichnet. von G. W. & C. B. Colton & Co. N^o 172 William St^e New York. Juni 1870. [In German.]**
Caption: **Beilage zur N.Y. Handels Zeitung.**
This map was produced as a supplement to the *New-Yorker Handels-Zeitung*, by its date intended for a June issue of that then-weekly periodical. In weeks during June the map was advertised, but production delays, which were noted, interfered with the planned distribution date. It finally was available with the July 9 issue (Volume 19, No. 1112); a page 1 notice is headed, "Hierzu eine Beilage und als Extra-Beilage erhalten unsere Herren Abonnenten mit dieser Nummer eine Karte

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

sämtlicher Pacific-Eisenbahnen und deren Verbindungen." It also was offered for sale at \$1.50 per copy, with discounts for larger numbers.

► This reasonably detailed map shows a meandering course of "Rio Colorado" between "F: Yuma" and the head of the Gulf of California (not labeled, and only the northernmost part of which is depicted). The Salton Sea is labeled "G: Dry Lake". The course of the Colorado is shown reasonably accurately in its lower course, but between the confluence of "Virgin R." and "Colorado Chiquito R." it follows a conjecturally wild course, having proceeded to that point directly from the northeast. Of particular note on this map are the labels for Colorado River canyons as cited by John Wesley Powell, interesting that despite the conjectural course of the Colorado it was less than a year after Powell's expedition. These canyons are: "Mound Cañon" and "Monument Cañon" (together later Glen Canyon), Marble Cañon (the stretch between "Paria R." and "Bright Angel R."), and "Grand Cañon of the Colorado River". "Black Cañon" is also noted on the lower Colorado below Callville, although that settlement is shown along the Colorado some distance southwest of the confluence of "Virgin R." at the confluence of "Rio Vegas" (Las Vegas Wash), where also is the label "Head of Navigation". In the Grand Canyon area, a tributary (not labeled) from the north-northwest meets the river in the western part of the canyon; and downstream from there is the confluence of "Yampa Cr.", which flows through "Red Lake" en route to the Colorado. "Hualapais Spr." is marked at the head of one of the forks of Yampa Creek. "Yampais Vill." (Supai) is, peculiarly, marked well on the north side of the Colorado, southwest of the confluence of Bright Angel Creek.

- 1871 25.1516 **General Map of the United States showing the Railroad routes across the Continent.**
INSET ON: *Colton's Railroad & Commercial Map of the United States & Canada.* ("Compiled[,] Engraved and Published by G. W. & C. B. Colton & Co. N^o 172 William St. New York. 1871.") [Map on six sheets; the inset is on the lower-right sheet]
 ► "Colorado R." is depicted reasonably accurately along its lower course. In the Grand Canyon region it is clear that it follows the depictions presented by Egloffstein in Ives (1861). The "Lit. Colorado" arrives from the east-southeast, into which several tributaries (not labeled) feed from the southeast; the entire stretch between the Virgin River (not shown) and the Little Colorado River, including the Little Colorado and its tributaries, is depicted as encanyoned. Between that confluence and a point downstream from the confluence of "Green River" and "Grand R." the Colorado is depicted by a dotted line.
- 1871 25.1717 **Map Showing the Telegraph Lines in Operation, Under Contract and Contemplated, to Complete the Circuit of the Globe.** ("Maps of Every Description Prepared and Largest Assortment of Atlases & Maps etc. in the Country at Colton's Geographical Estab^t G.W.&C.B. Colton& C^o New York.") ([base map] "Entered according to Act of Congress in the year 1855 by J. H. Colton & Co. in the Clerks office of the District Court for the Southern District of New York.")
 ► The base map depicts "R. Colorado" following a curved course from headwater south-southwest to west-southwest, where at a tributary (Virgin River, not labeled) it turns south nearly to the head of "G. of California" before turning southeast to meet the gulf. En route it also receives from the east a tributary (not labeled, either the San Juan River or Little Colorado River), and "R. Gila from the northeast and east.
- 1871 25.2412 **Colton's Map of the United States of America, the British Provinces, Mexico and the West Indies. Showing the Country from the Atlantic to the Pacific Ocean. Published by G. W. and C. B. Colton & Co. 172 William St. New York. 1871. Scale 1:5,274,720.**
 The David Rumsey map collection notes: "Unlisted Colton map, which looks like an English map with Colton's imprint. Colton has applied his standard title for his large U.S. map to a map that we have never seen and is not in any references. It must be an English map for which he acquired publishing rights. [. . .] Another

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

possibility is that it is an Edward Freyhold map—it has similarities to the Railway survey maps, except that its scale is smaller.”

► “Rio Colorado” is delineated between “Gulf of California” and the confluence of “Green River” and “Grand River”. From that confluence its course is to the southwest, receiving “Rio San Juan” from the southeast, crossing the Utah-Arizona boundary where it turns to the west for a distance then again to the southwest, receiving “Little Colorado” from the east-southeast, then passing through the area where would be the confluence of Diamond Creek and proceeding northwest to the confluence of “Santa Clara R.” (Virgin River) from the north and northeast, thence south to the gulf. Cataract Creek (not labeled) is shown as a tributary to the Little Colorado from the south-southeast. The routes of the “Atlantic & Pacific R.R.” and “Southern Pacific R.R.” are delineated.

- 1873 25.1561 **Maps showing the Connections of the Little Rock and Fort Smith Railroad and its Land Grant. Prepared by G. W. & C. B. Colton & Co. 172 William Street New York.** (“Entered according to Act of Congress in the year 1873 by G. W. & C. B. Colton & Co. in the Office of the Librarian of Congress, at Washington.”)
- Half of the sheet comprises a map of the United States. The “35th Parallel Route” is haphazardly delineated across northern Arizona, south of “Colorado River” that shows an encanyoned stretch between “Callville” (the Virgin River is not delineated) and where the confluence of Diamond Creek is situated (not depicted). The Colorado’s course through central and eastern parts of Grand Canyon (not labeled) is wildly conjectural, although surprisingly the course and confluence of “Colorado Chiquito” is approximately correct.
- 1873 25.1583 **Maps showing the Atlantic & Pacific Railroad and leased lines. Engraved[,] Printed & Published by G. W. & C. B. Colton & Co. New York.** (“Entered according to Act of Congress in the year 1873 by G. W. & C. B. Colton & Co in the Office of the Librarian of Congress, at Washington.”)
- The route of “Atlantic & Pacific R.R.” is delineated across northern Arizona. “Colorado R.” through what is the Grand Canyon (not labeled) is wildly conjectural, although the confluence of “Colorado Chiquito” is generally correct.
- 1873 25.1562 **Colton’s New Mexico and Arizona Published by G. W. and C. B. Colton & Co. N^o 172 William S^t New York.** (“Entered according to Act of Congress in the year 1873 by G. W. & C. B. Colton & Co. in the Office of the Librarian of Congress, at Washington.”) Scale 1:2,090,880.
- “Colorado R.” in the western part of “Grand Canon of the Colorado” is depicted as encanyoned, as also is the tributary “Diamond R.” Through the central and eastern parts of the canyon the course of the river is wildly conjectural, though with “Kanab Cr.” meeting it from the north midway. “Flax R. or Colorado Chiquito” reaches the Colorado in eastern Grand Canyon. Also shown on the map is the “Surveyed Line Atlantic & Pacific R.R.”
- 1873 25.1704 **Colton’s California, Nevada, Utah, Colorado, Arizona & New Mexico. Published by G.W. and C.B. Colton & Co., N^o172 William S^t New York. 1873.**
In covers with embossed stamping, “Colton’s Map of California, Nevada, Utah, Colorado, Arizona, and New Mexico. G.W. & C.B. Colton & C^o”
- “Rio Colorado” is depicted between head of Gulf of California (not labeled) and the confluence of “Green River” and the Grand River (see further); its reach in Mexico is shown on a very sinuous southward course, receiving “New River” from the northwest about one third of the distance above the gulf, and in this reach are various places labeled, including “Algodomes” [*sic*], “Willow Woods”, “Ogdens Landing”, and “Sierra Nevada Anchorage”. “F^t Yuma” and “Arizona City” are labeled at the “River Gila” confluence. (Regarding the Grand River, it is labeled “Grand Riv.” on its upper course but confusingly “Bunkara R.” downstream from there before receiving “South Fork of Grand R.”, then after receiving the combined “Rio San Miguel” and “Dolores

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

R." it is not definitively labeled until it meets the Green at the head of "Cataract Canon".) Downstream from the Grand-Green confluence the Colorado passes through "Narrow Canon", "Mound Canon", and "Monument Canon", after which it receives "Paria R." from the north-northwest. It passes into "Marble Canon" where it receives "Colorado Chiquito" from the east-southeast, before passing on a wildly conjectural course through "Grand Canon of the Colorado", first receiving a tributary (not labeled) from the south that must be meant Cataract Creek (seriously misplaced) before turning northward and then, before turning southwestward, receives at that point "Bright Angel R." from the north (perhaps confused with Kanab Creek, which is not shown). In the western part of Grand Canyon the Colorado along a southwesterly course receives a tributary (not labeled) from the north before turning sharply north-northwestward, having received at that point "Yampa Cr." from the southwest (at the head of which, to the east, is "Hualpais Spr.") that is clearly confused with Diamond Creek (not present). At the western end of Grand Canyon the Colorado follows a westerly course, arcing eventually to its southerly course, receiving a tributary from the north and northeast (not labeled except for the presence of "Salt Mountainn [*sic*]", but which is Virgin River); however, the reach between that confluence and "Callville" and "Head of Navigation" the river is labeled "Virgin R.!" Also shown are the routes of "Atlantic & Pacific" and a 32nd parallel wagon road.

- 1874 25.2422 **New County Map of the United States of America. Drawn[,] Engraved & Printed by G. W. & C. B. Colton & Co. New York. 1874.** ("Entered according to Act of Congress, in the year 1873, by G.W. & C. B. Colton & Co. in the office of the Librarian of Congress, at Washington.")

Case title: **Colton's Map of the United States.**

► The Colorado River is labeled "Rio Colorado" on its lower course, "Colorado R." on its upper course; delineated between the southerly U.S.-Mexico boundary and the confluence of "Green River" and "Grand River". From that confluence the Colorado follows a course to the southwest, with "Cataract Cañon", "Narrow Cañon", "Dirty Devil R." tributary from the northwest, "Mound Cañon", "Rio San Juan" tributary from the east-southeast, an unlabeled tributary from the northwest, "Monument Cañon", crosses the Utah-Arizona boundary, "Paria R." tributary from the northwest, "Marble Cañon", and "Colorado Chiquito River" tributary from the east-southeast. At the confluence of "Cataract Cr. from the south and southeast the river begins a wildly serpentine course thorough "Grand Canon of the Colorado River", but the apparent confluence is misengraved, in that the course of the Colorado follows it for a short distance before looping northeast around to southwest to where the remainder of the Cataract course is drawn, with the label "Yampais Vill." positioned some distance to the northwest of the Cataract confluence and on the north side of the Colorado. At the apex of the aforementioned loop, the Colorado receives "Bright Angel R." from the north (an error for Kanab Creek). In the western part of the Grand Canyon an unlabeled tributary arrives from the north (at about where would be the Parashant Canyon configuration on Egloffstein's map, and "Yampa Cr." from the southwest (after having passed through "Red Lake" and its source reach to the east of there). The Colorado then follows a course due north before turning abruptly west to reach the confluence of "Virgin R." from the north and northeast, with "Callville" mrked some distance downstream on a course arcing from southwest to south, receiving "Rio Vegas" (Las Vegas Wash) from the west-northwest and passing into "Black Cañon".

- 1874 25.2423 **North America Showing the Territory of Alaska Ceded by Russia to the United States 1867.** ("Entered according to Act of Congress, in the Year 1860 [*sic*] by J. H. Colton in the Clerks Office of the Dis [interrupted by a scale bar] t of New York.")

INSET on Colton, 1874, *New County Map of the United States of America*, **ITEM NO.** 25.2422).

► "R Colorado" is delineated between the confluence of "Green R." and "Grand R.", which two tributaries have southwest courses in parallel. The Grand receives "R. S. Juan" from the east before turning west to meet the Green, along which reach it

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

also receives "Lit. Colorado R." from the southeast. The Colorado arcs to the south, receiving an unlabeled tributary (Bill Williams River) from the east and north and "R. Gila" from the east.

- 1875 25.604 **Maps showing the southern Pacific Railroad and its connections.** New York; G. W. and C. B. Colton and Co., 2 maps on 1 sheet, scales 1:2,090,880 and 1:8,000,000.
 ▶ The Colorado River is depicted reasonably correctly in its lower reach and western portion of "Grand Cañon of the Colorado", but in the central and eastern portions of the Grand Canyon the course is far more conjectural. Black Canyon is also labeled.
- 1876 25.1517 **Colton's Railroad Map of the United States and Canada, Published by G. W. and C. B. Colton & Co. 172 William St. New York. 1876.**
 ▶ The course of "Colorado R." is shown reasonably accurately in its lower course, but between the confluence of the Virgin River (not shown!) and "Colorado Chiquito" it follows a conjecturally wild course, having proceeded to that point directly from the northeast from the confluence of "Green River" and "Grand R." In the westernmost part of the Grand Canyon (not labeled), to Calville near the Virgin confluence, there is a vague representation of the river being encanyoned.
- 1876 25.1563 **Map of the Texas and Pacific Railway and Its Connections. Prepared by G. W. & C. B. Colton & C^o 172 William St. New York.** ("Entered according to Act of Congress in the year 1876 by G. W. & C. B. Colton & Co. in the Office of the Librarian of Congress, at Washington.")
 ▶ The route across southern Arizona is shown passing through "Arizona City" on the "Rio Colorado". Also shown is the route of the "Atlantic & Pacific R.R. across northern Arizona, crossing at "Needles". The Colorado in what is the Grand Canyon region between the confluence of "Santa Clara R." (Virgin River) and the confluence of "Green River" and "Grand River" is conjectural. "Little Colorado" is shown reaching the Colorado close to the western part of the canyon, with Cataract Creek (not labeled) a tributary to the Little Colorado.
- 1876 25.1582 **Map of California To accompany printed argument of S. O. Houghton as to the rights of the Southern Pacific R.R. Co. of Cal. to Government lands under Acts of Congress Passed July 27, 1866 and March 3, 1871. made before the Committee on the Judiciary of the Senate and Ho. of Rep^s in May 1876.** ("Prepared by G. W. & C. B. Colton & C^o 172 William St. New York".) ("Entered according to Act of Congress in the year 1876 by G. W. & C. B. Colton & Co. in the Office of the Librarian of Congress, at Washington.") Scale 1:2,090,880.
 ▶ The lower "Colorado River" is depicted from its mouth (at map edge) to "Grand Wash" and "Iceberg Cañon", where also is the label "Colorado R. Cross.", its course occasionally passing through the ornamental right border of the sheet, and passing off the map entirely at that point. "Virgin Canon", "Boulder Cañon", and "Black Canon" are also labeled (thus). The boundaries of mining districts are also shown. In California, Township and Range sections are delineated. Various railway lines are colored.
- 1880 25.2342 **Colton's North America Published by G. W. and C. B. Colton & Co., N^o 172 William St. New York.** ("Entered according to Act of Congress in the year 1855 by J. H. Colton & Co. in the Clerks Office of the District Court of the United States for the Southern District of New York.")
In: Colton's general atlas of the world, containing two hundred and twelve maps and plans, on one hundred and forty-two imperial folio sheets, drawn by G. Woolworth Colton. Accompanied by geographical, statistical, and historial letter-press descriptions. New York: G. W. and C. B. Colton and Co. ("Entered according to Act of Congress, in the Year 1876, by G. W. & C. B. Colton & Co., in the Office of the Librarian of Congress, at Washington.") This is map No. 15.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- "Colorado R." is delineated between "Gulf of California" and the confluence of "Green R." and "Grand R." From that confluence the Colorado follows a southwesterly course into Arizona, receiving en route an unlabeled tributary from the northwest, "San Juan R." from the east, and "Lit. Colorado R." from the southeast, then turns more or less westward to the confluence of the Virgin River (not labeled) from the northeast, then south to the gulf, receiving en route an unlabeled tributary from the northeast, the Bill Williams River (not labeled) from the east, and "Gila R." from the east-northeast.
- 1880 25.2343 **Colton's United States of America. Published by G. W. and C. B. Colton & Co., N^o 172 William S^t New York.** ("Entered according to Act of Congress in the year 1876 by G. W. & C. B. Colton & Co in the Office of the Librarian of Congress, at Washington.")
In: Colton's general atlas of the world, containing two hundred and twelve maps and plans, on one hundred and forty-two imperial folio sheets, drawn by G. Woolworth Colton. Accompanied by geographical, statistical, and historial letter-press descriptions. New York: G. W. and C. B. Colton and Co. ("Entered according to Act of Congress, in the Year 1876, by G. W. & C. B. Colton & Co., in the Office of the Librarian of Congress, at Washington.") This is map No. 24/25.
 ► "Colorado R." is delineated between "Gulf of California" and the confluence of "Green River" and "Grand R." From that confluence the Colorado follows a southwesterly course toward Arizona, receiving en route the San Juan River (not labeled) then arcs due south to the confluence of "Colorado Chiquito" from the southeast. From there the Colorado follows a wildly undulating course westward to "Callville", with the Virgin River wholly omitted from the map. The only tributaries south of thee are "Bill Wms. Fk." from the east and "Rio Gila" from the east-northeast. The route of the "Atlantic & Pacific R.R." is delineated, as also is the "Southern Pacific".
- 1880 25.2344 **Colton's New Mexico and Arizona Published by G. W. and C. B. Colton & Co. N^o 172 William S^t New York.** ("Entered according to Act of Congress in the year 1873 [date seems to be reengraved] by G. W. & C. B. Colton & Co in the Office of the Librarian of Congress, at Washington.") Scale 1:2,090,880.
In: Colton's general atlas of the world, containing two hundred and twelve maps and plans, on one hundred and forty-two imperial folio sheets, drawn by G. Woolworth Colton. Accompanied by geographical, statistical, and historial letter-press descriptions. New York: G. W. and C. B. Colton and Co. ("Entered according to Act of Congress, in the Year 1876, by G. W. & C. B. Colton & Co., in the Office of the Librarian of Congress, at Washington.") This is map No. 88/89.
 ► The course of the "Colorado River" follows its modern mapped route through "Grand Cañon of the Colorado", so labeled between the confluences of "Kanab Cañon" and "Grand Wash", though "Marble Cañon" is labeled both on its proper reach as well as between the confluences of "Colorado Chiquito Cañ." and "Kanab Cañon" West of Grand Canyon the canyons are labeled in squence, "Iceberg Cañon", "Virgin Cañon", "Boulder Cañon", and "Black Canon" [*sic*]. Of note is the dual label at the mouth of "Paria Cañon", "Colorado Dell Lees Ferry".
- 1882 25.605 **Map Showing the California and Nevada Railroad and its Extensions and Connections.** ("Drawn, Engraved & Printed by G. W. and C. B. Colton and Co. 182 William S^t New York.") Scale 1:2,090,880.
 ► Colorado River canyons in the region covered by this Cartobibliography are labeled: "Marble Cañon" between "Lees Ferry" and "Kanab Cañon", "Grand Cañon of the Colorado" between "Kanab Cañon" and "Grand Wash" (where appears the label, "Colorado R. Cross."); "Virgin Cañon", "Boulder Cañon" and "Black Cañon" (where the Colorado goes off the map to the south). Also of note is that Lees Ferry is labeled both as "Lees Ferry" and "Colorado Dell". The Paria River is labeled simply "Cañon", although "Paria Plateau" is labeled, with "Vermillion [*sic*] Cliffs". Also labeled are "Kaibab or Buckskin Plateau" and "Houserock Vall.", and to the west, "SHI WITZ

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

PLATEAU" (typographically thus). "Colorado Chiquito Cañ." reaches the Colorado directly from the southeast. Northeast of Lees Ferry but south of the Arizona-Utah boundary a short tributary reaches the Colorado from the east-southeast, "Navajo Cr.", while the San Juan River (not labeled) is depicted reaching the Colorado from the east in Utah. Numerous other labels appear.

- 1883 25.608 **Map Showing the New Transcontinental Route of the Atlantic & Pacific Railroad and its Connections.** ("Prepared by G. W. & C. B. Colton & C^o 182 William S^t New York".) ("Entered according to Act of Congress in the year 1883 by G. W. & C. B. Colton & Co. in the Office of the Librarian of Congress, at Washington.") Scale 1:3,800,000.
Caption: Extra-Beilage zur New-Yorker Handels-Zeitung.
 ► The trace of the railroad is broadly marked "Atlantic & Pacific Western Division" in Arizona and western New Mexico, although the trackway itself is labeled "Atlantic & Pacific" here and "Southern Pacific" in California. The trace also lays out the railroad's land grant boundaries between the eastern boundary of Indian Territory and the Colorado River." Also shown is the 32nd parallel route, labeled "Southern Pac." "Big Cañon of the Colorado" is labeled thus, even at this late date. The "Virgin Range" is depicted adjacent to the "Rio Virgin" by the Arizona-Nevada boundary, and immediately parallel to it on the east is depicted "Buckskin Mts." The region of the central and eastern Grand Canyon is blank except for the Colorado River, unlabeled tributaries, and the label "Marble Cañon" (properly positioned). At the confluence of "Green R." and "Grand R." is the label, adjacent to the Green, "Canon of the Green Riv." Between this confluence and the confluence of "R. San Juan" the Colorado is labeled "Rio Colorado or Grand R." (The lower Colorado River is labeled "Colorado R.") The only other labeled tributaries in the Grand Canyon area are "Paria R." and "Colorado Chiquito R." "Painted Desert" is labeled on the north side of the Little Colorado. The unlabeled tributaries differ compared to the 1883 Colton map of the Atchison, Topeka and Santa Fe (ITEM NO. 25.1658).
- 1883 25.1658 **Map Showing the Atchison, Topeka and Santa Fe Railroad System. with its Connections.** ("Prepared by G. W. & C. B. Colton & C^o 172 William S^t New York".) ("Entered according to Act of Congress in the year 1883 by G. W. & C. B. Colton & Co. in the Office of the Librarian of Congress, at Washington.") ("Rufus Adams & C^o Stationers & Printers 4 & 6 Pine S^t New York.") Scale 1:3,800,000.
 ► The trace of the 35th parallel railroad is marked "Southern Pacific" [*sic*] in California and "Atlantic & Pacific" in Arizona and western New Mexico. Also shown is the 32nd parallel route, labeled "Southern Pacific". "Big Cañon of the Colorado" is labeled thus, even at this late date. The "Virgin Range" is depicted adjacent to the "Rio Virgin" by the Arizona-Nevada boundary, and immediately parallel to it on the east is depicted "Buckskin Mts." The region of the central and eastern Grand Canyon is blank except for the Colorado River and unlabeled tributaries. At the confluence of "Green R." and "Grand R." is the label, adjacent to the Green, "Canon of the Green". Between this confluence and the confluence of "R. San Juan" the Colorado is labeled "Rio Colorado or Grand R." (The lower Colorado River is labeled "Colorado R.") The only other labeled tributaries in the Grand Canyon area are "Paria R." and "Colorado Chiquito R." "Painted Desert" is labeled on the north side of the Little Colorado. The unlabeled tributaries differ compared to the 1883 Colton map of the Atlantic & Pacific Railroad (ITEM NO. 25.608), as also notably the label for Marble Canyon is absent from the AT&SF map. The AT&SF map also includes railway lines in northern Mexico and displays part of the Gulf of California, with the label "Desert of Avena" to the east of the mouth of the Colorado River.
- 1887 25.1564 **Map Showing the Pacific Railways and Their Branches. Prepared for the United States Pacific Railway Commission.** ("Prepared by G. W. & C. B. Colton & C^o 182 William S^t New York.") ("William Mann & Son Stationers & Printers, 88 Maiden Lane, New York.") ("Entered according to Act of Congress in the year 1887 by G. W. & C. B. Colton & Co. in the office of the Librarian of Congress, at Washington.")

► The “Atlantic & Pacific” railroad route is shown across northern Arizona. “Colorado R.” is delineated as encanyoned in “Big Canon of the Colorado” in the reach west of the confluence of Diamond Creek (not delineated). The Colorado’s course through the canyon is approximately correct, although the reach between Kanab Creek (not labeled) and the confluence of “Colorado Chiquito” is labeled “Mable [*sic*] Canon”.

Gallatin, Albert

1836 25.1057

WHEAT II:417 [with frontispiece illustration]

Map of the Indian Tribes of North America about 1600 A.D. along the Atlantic; & about 1800 A.D. westwardly. Published by the Amer: Antiq: Soc: From a drawing by Hon: A. Gallatin. (“Pendleton’s Lithography.”)

In: Gallatin, Albert, A synopsis of the Indian tribes within the United States east of the Rocky Mountains, and in the British and Russian possessions in North America. *American Antiquarian Society, Transactions and Collections*, 2: 1-422. (Archæologia Americana, 2.)

► The paper and the ethnographic data portrayed on the map are extralimital to this Cartobibliography. The base map, however, portrays “Rio Colorado of the West” with it and “Rio Gila” converging together at the head of the Gulf of California (not labeled). The headwaters of the Colorado are shown at a mythical “3 Peaks” common to the headwaters also of the Missouri and Columbia Rivers. Also shown on the map is “J. B. Smith’s route 1826”.

García Conde, Pedro

WHEAT II:492

1845 25.1327

Carta Geografica General de la Republica Mexicana, Formada el Ano de 1845 con los datos que reunio la seccion de Geografia del Ministerio de la Guerra por el General de Brigada, Pedro Garcia Conde, Ministro de la Guerra y Marina, Deputado, Director del Colegio Militar, individuo de la Academia Nacional de San Carlos, vocal de la junta general de instruccion publica, Agrimensor y Ensayador titulado y Miembro de otras varias sociedades cientificas de la Republica. Nota Esta edicion se hace provicionalmente mientras se concluye la Carta en Escala mayor. [facsimile signature] **Pedro García Conde.** ("Engraved by B.R.Davies, 16 George Str. Euston Squ. London. From the original survey made by order of the Mexican government.") ("Published by James Wylde Leicester Sqre. & Charing Cross".) [In Spanish.]

► "California" is separated from "Sonora" by "Golfo de Californias". The Colorado River in its lower course is labeled "Rio Colorado de las Balzas" and in its upper course as "Rio Colorado"; it is shown between the head of the gulf and headwaters north of "Rio del Navajos" (San Juan River), although neither the Green nor Grand Rivers are indicated among the several in this country. This map is interesting for its heavy use of hachures to indicate numerous mountainous areas, while to the west of the lower Colorado the map is featureless. The Colorado is shown with its course beginning from the confluence of west-flowing headwaters, to turn south-southwestward to the confluence of "Rio del Navajos", where it turns southwest on a steady course to the 15th degree of longitude (as measured from the meridian of Mexico City), where it turns to the south and arcs through a course southeasterly thence south-southwesterly before arriving due southward at the head of the gulf where it feeds into a northeasterly headed embayment after having bifurcated around a relatively minor island. "Rio Gila" is received some distance above this point. Between "Rio del Navajos" and its turn to the south, the Colorado receives, in turn, a small tributary (not labeled) from the east-southeast, a tributary from the northwest with forks labeled "Rio Itinpahensis" (western fork) and "Rio San Teresa" (northern fork), and a tributary (not labeled) from the east that could be meant to be the Little Colorado River. Midway between the turn to the south and the confluence of the Gila River, a significant tributary is received from the northeast, to which is contributed a large area that embraces a substantial area of today's Arizona; its northern fork is labeled "Rio de los Coninas", the headwaters of which are labeled as "Sierra del Chegui". Northwest of the Colorado's turn from southwest to south courses is a disjointed river without defined headwater or confluence, labeled "R. Sulfureo o de las Piramides", which is an interesting, though somewhat correct, relabeling of the misrepresented "river of the sulfurous pyramids" of other maps; in addition to which is a nearby area toward its presumed headwaters that is appropriately labeled "Las Piramides" and thus mixing the river's true relationship with the Zion area of the Virgin River.

See [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

NOTE: There is also a *variant* of this map with the printed notation, "Published by Edward Stanfrod [sic], 12, 13 & 14 Long Acre, London. W.C." and the pasted-on label, "Edward Stanford, 12, 13, & 14, Long Acre, W.C. Geographer to the King. London Agent by Appointment for the Sale of the Ordnance Survey Maps. Agent for the Admiralty Charts, the Indian Government Maps &c." Wheat does not distinguish between the Wylde and Stanford variants.

García y Cubas, Antonio [García Cubas, Antonio]

1858 25.1293

Carta I. Cuadro Geográfico y Estadístico de la Republica Mexicana [which features] Carta General de la República Mexicana Formada para el estudio de la configuracion y division interior de su territorio. ("Imp. litog. de H. Iriarte y C^a calle de Sta Clara N^o 23.") ("J. M. Muñozgúren litografió.") [In Spanish.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

In: García y Cubas, Antonio, *Atlas geográfico, estadístico é histórico de la República Mexicana, formado por Antonio García y Cubas*. Mexico: José Mariano Fernandez de Lara.

► Both the Gila River and Gadsden boundaries between the U.S. and Mexico are delineated. "Rio Colorado" is shown approaching the head of "Golfo de California" on a slightly sinuous course from the northeast, receiving "Rio Gila" from the east at the international boundary. No places are labeled along these rivers. "I. de S. Ignacio" is shown at the mouth of the Colorado.

NOTE: There are substantial differences in the portrayal of the lowermost Colorado River at the northwest corners of the four maps cited from this atlas (maps 1, 2, 25, and [31]), *ITEM NOS.* 25.1293-25.1296.

1858 25.1294 **Carta II. Sonora.** ("Imp. litog. de Iriarte y C^A c^e de Sta Clara N^o 23.") ("Muñozgúren litog^o") [*In Spanish.*]

In: García y Cubas, Antonio, *Atlas geográfico, estadístico é histórico de la República Mexicana, formado por Antonio García y Cubas*. Mexico: José Mariano Fernandez de Lara.

► Both the Gila River and Gadsden boundaries between the U.S. and Mexico are delineated. "Rio Colorado" is shown approaching the head of "Golfo de California" from the north, with a decided bend prior to receiving "Rio Gila" from the east at the international boundary by "F. Yuma". A small island, "Farallon del Norte", is shown at the mouth of the Colorado.

NOTE: There are substantial differences in the portrayal of the lowermost Colorado River at the northwest corners of the four maps cited from this atlas (maps 1, 2, 25, and [31]), *ITEM NOS.* 25.1293-25.1296.

1858 25.1295 **Carta XXV. Baja California.** ("Imp. Litog. de H. Iriarte. C^e de S^{ta} Clara N^o 23.") ("Muñozgúren lito.") [*In Spanish.*]

In: García y Cubas, Antonio, *Atlas geográfico, estadístico é histórico de la República Mexicana, formado por Antonio García y Cubas*. Mexico: José Mariano Fernandez de Lara.

► The Colorado River (not labeled) is shown approaching the head of "Mar de Cortés" on a generalized course from the north-northeast, receiving a similarly generalized and short Gila River from the east-northeast at the international boundary. No places are labeled along these rivers. A large "I. de S. Ignacio" is shown at the mouth of the Colorado.

NOTE: There are substantial differences in the portrayal of the lowermost Colorado River at the northwest corners of the four maps cited from this atlas (maps 1, 2, 25, and [31]), *ITEM NOS.* 25.1293-25.1296.

1858 25.1296 **[Carta XXXI.] Carta General de la República Mexicana Formada en vista de los datos mas recientes y exactos que se han reunido con tal objeto, y coustan en la noticia presentada al Exmo. Sr. Ministro de Fomento, por Antonio García y Cubas.** (Printer's credit at lower left seems to have been obliterated.) ("Lit. de Salazar.") [*In Spanish.*]

In: García y Cubas, Antonio, *Atlas geográfico, estadístico é histórico de la República Mexicana, formado por Antonio García y Cubas*. Mexico: José Mariano Fernandez de Lara.

► Only the Gadsden boundary between the U.S. and Mexico is delineated. "R. Colorado" is shown approaching the head of "Mar de Cortés" on a slightly sinuous course from the northeast, with a decided bend prior to receiving "R. Gila" from the east at the international boundary by "F.^{te} Yuma". A road is shown approaching Fort Yuma from Sonora along a path from the southeast. A small island, "Farallon de S. Ignacio", is shown at the mouth of the Colorado.

NOTE: There are substantial differences in the portrayal of the lowermost Colorado River at the northwest corners of the four maps cited from this atlas (maps 1, 2, 25, and [31]), *ITEM NOS.* 25.1293-25.1296.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1863 25.717 **Carta general de la República Mexicana formada por Antonio García y Cubas. 1863.** México: Iriarte y C^ª [In Spanish.]
This colored map is noted by catalogers and sellers as the first large map of Mexico published in the recently independent country.
▶ A sinuous Río Colorado is not labeled but on close examination is well depicted between its lowermost stretch in the United States and “Mar de Cortés”, including the addition of marshy landscapes along its reach in Mexico.
- 1884 25.1297 **Sonora.** (“Atlas Mexicano por Antonio García Cubas. Carta I.”) (“Queda asegurada la propiedad de esta obra conforme á las leyes en la República Mexicana y en los Estados Unidos. Copyright, 1884, by S. Voisin.”) Scale 1:2,000,000. [In Spanish.]
This series of maps produced as individual sheets.
▶ “Río Colorado” is depicted between the head of “Golfo de California” and “Fuerte Yuma” at the confluence of “Río Gila”. A road is shown approaching Fort Yuma from Sonora along a path from the southeast. “I. Gore” and “I. Montegue” are shown at the mouth of the Colorado, and just upstream from there are shown a series of undefined channels and two small islands.
- 1885 25.1543 **Atlas Pintoresco é Historico de los Estados Unidos Mexicanos por Antonio Garcia Cubas Publicado por Debray Sucesores Mexico 1885.** [In Spanish.]
Atlas of 13 sheets, each featuring an inset map and embellished with marginal illustrations pertinent to the map. Most, but not all, of these sheets will be pertinent to the area of the Colorado River delta that is portrayed at the northwestern corner of each map (all titles are actually printed in capital letters that omit diacritical marks): “I CARTA POLITICA”, “II. CARTA ETNOGRAFICA”, “III CARTA ECLESIASTICA”, “IV VIAS DE COMUNICACION Y MOVIMIENTO MARITIMO”, “V. INSTRUCCION PUBLICA”, “VI CARTO OROGRAFICA”, “VII CARTA HIDROGRAFICA”, “VIII CARTA AGRICOLA”, “IX. CARTA MINERA”, “X. CARTA HISTORICA Y ARQUEOLOGICA”, “XI REYNO DE LA NUEVA ESPAÑA A PRINCIPIOS DEL SIGLO XIX.” (among numerous portraits is that of “D. Ant. Ma. Bucareli”), “[XII] VALLE DE MEXICO”, “XIII MEXICO Y SUS CERCANIAS”.
- 1885 25.1298 **Carta general de los Estados Unidos Mexicanos formada por el Ingeniero, Antonio García Cubas.** (“Atlas Mexicano por Antonio García Cubas. Carta General.”) (“Publicado por Debray Suc^ª Imprenta Litográfica, México. Queda asegurada la propiedad de esta obra conforme á las leyes en la República Mexicana y en los Estados Unidos. Copyright, 1885, by S. Voisin.”) Scale 1:4,400,000. [In Spanish.]
This series of maps produced as individual sheets.
▶ “R. Colorado” is depicted between the head of “Golfo de Cortés” and a point north of “Yuma”. The route of the Southern Pacific Railroad (not labeled except for section names) is shown.
- 1886 25.1299 **Baja California.** (“Atlas Mexicano por Antonio García Cubas. Carta XXVIII.”) (“Publicado por Debray Suc^ª Imprenta Litográfica, México. Queda asegurada la propiedad de esta obra conforme á las leyes en la República Mexicana y en los Estados Unidos. Copyright, 1886, by S. Voisin.”) Scale 1:3,000,000. [In Spanish.]
This series of maps produced as individual sheets.
▶ “Río Colorado” is depicted as a meandering channel between the head of “Golfo de California” and a point some distance north of “Fuerte Yuma” at the confluence of “Río Gila”, with a decided bend just upstream from that confluence. “I. Montegue” is shown at the mouth of the Colorado.
- 1874 25.2321 **Sonora.** (“Carta N^º 5.”) *In:* Garcia Cubas, Antonio, *Atlas metodico para la enseñanza de la geografia de la Republica Mexicana . . .* Mexico: Sandoval y Vazquez, Impresores. [In Spanish.]
▶ The Colorado River delta area is only cursorily shown; the river is not labeled.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1874 25.2322 **Territorio de la Baja California.** ("Carta N^o 33.")
In: Garcia Cubas, Antonio, *Atlas metodico para la enseñanza de la geografia de la Republica Mexicana* Mexico: Sandoval y Vazquez, Impresores. [In Spanish.]
 ► The Colorado River delta area generally depicts "R. Colorado" entering "Golfo de California", along which the area is indicated to be agricultural.
- 1972 25.1544 **Atlas Pintoresco é Historico de los Estados Unidos Mexicanos.** México: Editorial del Valle de México. [In Spanish.]
 Facsimile reprint of Garcia Cubas (1885, ITEM NO. 25.1543). Atlas of 13 sheets, each featuring an inset map and embellished with marginal illustrations pertinent to the map. Most, but not all, of these sheets will be pertinent to the area of the Colorado River delta that is portrayed at the northwestern corner of each map (all titles are actually printed in capital letters that omit diacritical marks): "I CARTA POLITICA", "II. CARTA ETNOGRAFICA", "III CARTA ECLESIASTICA", "IV VIAS DE COMUNICACION Y MOVIMIENTO MARITIMO", "V. INSTRUCCION PUBLICA", "VI CARTO OROGRAFICA", "VII CARTA HIDROGRAFICA", "VIII CARTA AGRICOLA", "IX. CARTA MINERA", "X. CARTA HISTORICA Y ARQUEOLOGICA", "XI REYNO DE LA NUEVA ESPAÑA A PRINCIPIOS DEL SIGLO XIX." (among numerous portraits is that of "D. Ant. Ma. Bucareli"), "[XII] VALLE DE MEXICO", "XIII MEXICO Y SUS CERCANIAS".
- 1992 25.1545 **Atlas Pintoresco é Historico de los Estados Unidos Mexicanos.** México: Inversora Burásatil, S.A. de C.V., Casa de Bolsa, Grupo Financiero Inbursa. ("Edición: Cálamo Corrente S.A. de C.V.; coordinación editorial: Sofía Urrutia y Julia de la Fuente") (Prólogo por José E. Iturriaga.) [In Spanish.]
 Facsimile reprint of Garcia Cubas (1885, ITEM NO. 25.1543). Atlas of 13 sheets, each featuring an inset map and embellished with marginal illustrations pertinent to the map. Most, but not all, of these sheets will be pertinent to the area of the Colorado River delta that is portrayed at the northwestern corner of each map (all titles are actually printed in capital letters that omit diacritical marks): "I CARTA POLITICA", "II. CARTA ETNOGRAFICA", "III CARTA ECLESIASTICA", "IV VIAS DE COMUNICACION Y MOVIMIENTO MARITIMO", "V. INSTRUCCION PUBLICA", "VI CARTO OROGRAFICA", "VII CARTA HIDROGRAFICA", "VIII CARTA AGRICOLA", "IX. CARTA MINERA", "X. CARTA HISTORICA Y ARQUEOLOGICA", "XI REYNO DE LA NUEVA ESPAÑA A PRINCIPIOS DEL SIGLO XIX." (among numerous portraits is that of "D. Ant. Ma. Bucareli"), "[XII] VALLE DE MEXICO", "XIII MEXICO Y SUS CERCANIAS".

Garollo, G.

- NO DATE 25.1691 (DIRETORE) **Stati Uniti d' America meta' [sic] Occidentale.** ("Stab. Lit. Galileo Milano"; "Casa Edit. D. Francesco Vallardi Proprieta Letteraria"; "G. Garollo dir.") [In Italian.]
From: Porena, Filippo, *L'America del nord; o America Anglo-Sassone.*
In: Marinelli, G., ed altri scienziati Italiani, *La terra : trattato popolare di geografia universale.* Milano, Napoli, Roma, Torino, Palermo, Pisa, Bologna, Catania, Firenze, Genova, Padova, Cagliari, Sassari, Bari, and Pavia: Casa Editrice Dottor Francesco Vallardi, between pp. 176/177. [Ca. 1885.]
 ► "Colorado R." is shown between "Golfo di California" and the confluence of "Gannison [sic] R." and "Dolores R." in eastern Utah; downstream of that confluence is the confluence of "Green R." Its course through "Gr. Canon of the Colorado" shows the currently mapped course, although downstream from the confluence of the Little Colorado River (not labeled) is marked as "Marble C." Cataract Creek is also shown (not labeled). The route of the "Atlantic Pacific R.R." is shown; the 32nd parallel route is shown but not labeled.

George F. Cram Company [see also The Cram Atlas Co.; see also Cram, George F.]

- 1920 25.2429 **Arizona.**
In: Auto trails and commercial survey of the United States. Chicago and New York: The George F. Cram Co., map 13. [See also map 14, the same map with "Main Traveled Highways" overprinted, including roads to Grand Canyon from Flagstaff, Williams, and Ashfork.
► Of note on this map is the delineation of boundaries of "Colorado River Irrigation Project" along the lower Colorado River from Yuma to the Grand Wash Cliffs. The river from the Utah boundary is depicted as encanyoned through "Marble Canyon", "Grand Canyon of the Colorado", and "Black Canyon". Despite this map being published a year after the Grand Canyon National Park was designated, only the boundaries of "Grand Canyon Forest Reserve" are delimited. The route of the "A. T. & S. F." is delimited, with the label also appearing on the Grand Canyon branch from Williams; stations and section houses are marked. The boundaries of the "Walapai

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Indian Res.” are marked, and the “Havasupai Ind. Res.” is labeled but without boundaries and within the forest reserve.

- 1930 25.2381 **Cram’s Paved Road Map of the United States An accurate survey of the main highways showing mileage and character of all important roads.** Indianapolis, Indiana: The George F. Cram Company.
 Pamphlet, front title: **The Columbus Dispatch Information and Service Bureau Official Paved Road Map of the United States and Canada.** [Probably a customized publication to promote the *Columbus Dispatch*, thus there are likely to be other variants with the same map.]
 ► In Arizona the boundary of “Grand Canyon Nat. Park” is delineated. U.S. Rt. 66 is shown through the area with both paved and improved surfaces; U.S. Rt. 89 is an improved road in the area. Improved roads are shown to Grand Canyon from Maine and Williams, and on the north from “Jacobs Lake”. From Hackberry, Rt. 12 (improved) is shown crossing the Colorado River at Pierce Ferry en route to St. Thomas, Nevada.

George Philip and Son [firm]

- 1851 25.1019 **Mexico & Texas.** (“Printed by J. Gellatly, Edin:”)
In: Philips’ new general atlas : comprehending seventy four maps and charts, delineating the natural and political divisions of the empires, kingdoms, and states of the world : constructed from most recent authorities. Liverpool: George Philip and Son, map 58.
 ► “Colorado R.” is depicted more or less in a straight course between the “Gulf of California” and the confluence of “R. Nabojoa S. Juan”. At the confluence of “R. Jaquesila” the Colorado is labeled “R. Colerado”, where also is the label “Puerto de Bucarelli” (Puerto de Bucareli). “Virgin R.” is shown as a tributary from the west, and near its confluence with the Colorado, “R. de los Martyres is shown as a tributary to the Virgin. In the lower reach of the Colorado, a dashed line represents a tributary from the west labeled “Inconstant R.”
- WHEAT III:732
- 1851 25.1238 **United States including California, Texas &c.** (“Liverpool; Published by George Philip & Son, 1851.”) (“Note. Corrected according to the American Maps of Fremont, Emory, Wizlizenu[s], and the records of the General Land off of the State of Texas, and other authorities. May 1851.”)
 ► “Rio Colorado” is depicted generally between the head of the Gulf of California and the confluence of “Green R.” and “Grand R.” Tributaries are “Nabojoa R.” (San Juan River), “Red River” (Little Colorado River), “Virgin R.”, “Mohahue R.” [sic] from the west, a river (not labeled) from the northeast (Bill Williams River), and “R. Gila”. The Colorado is depicted on a north-south course in its lower reach below the Virgin, and arcs from the north to west in what is the Grand Canyon region. The headwaters of “R. S. Francisco”, a tributary to the Gila, are shown reaching nearly to the Colorado the area of the confluence of the Little Colorado.
- 1910 25.2432 **(United States, N^oII (Western Division) The Pacific States, the Territories and a Portion of the North-Western States.** (“George Philip & Son, L^{td}”) (“The London Geographical Institute.”)
In: Philips’ general atlas of the world : a series of new and authentic maps. Engraved from original drawings compiled from the latest surveys and the works of eminent travellers and explorers. [London]: George Philip & Son, Ltd.; London: The London Geographical Institute; Liverpool: Philip, Son & Nephew.
 ► This map is based on that of Bartholomew (ca. 1873, ITEM NO. 25.2399), including most of the title block but eliminating Bartholomew’s name, with updates but with some astonishingly outdated features, most notably the label “Big Canon” at the

westernmost part of Grand Canyon (which is otherwise not labeled). The course of "Rio Colorado" is essentially correct, although it passes by "Buckskin Plateau" on the east and "Swamp Pl." (Sanup Plateau, surely) on the west. "Painted Desert" is labeled across the entire Arizona Strip; and tributaries on the south side of the canyon display antique geography. On the lower Colorado the label for "Explorers R.^k", which originated with the Egloffstein map of 1861, is retained.

Giardina, Salvatore, Jr.

- 1980 24.73 **Atlas of late Quaternary-Tertiary faults of the State of Arizona.** *Arizona Oil and Gas Conservation Commission, Special Publication 5*, 48 pp.

Gibbes, Charles Drayton

WHEAT V:1240

- 1873 25.1352 **Map of the States of California and Nevada. Carefully Compiled from the Latest Authentic Sources.** By Chas. Drayton Gibbes, C.E. Comprising Information obtained from the U.S. Coast and Land Surveys; State Geological Surveys, by Prof. J. D. Whitney; Railroad Surveys and the Results of Explorations Made by Brevet. Lieut. Col. R. S. Williamson, U.S.A., Henry De Groot, C. D. Gibbes, and Others. Published by Warren Holt. No. 607 Clay Street, San Francisco, Cal. 1873. ("S. B. Linton Formerly of the U.S. Coast Survey Draughtsman & Lithographer 148½ S. Fourth Street Philadelphia, Pa.")
- ▶ A very detailed map. "Colorado River" is shown between a point just south of the lower international boundary with Mexico and on the northern end passing off the map to the east precisely on the 36th parallel. Includes numerous places name and mining districts. Just to the east of the Arizona-Nevada common point "Yampa Creek" is shown as a tributary to the Colorado, having run into and from "Red Lake" in "Hualpai Val." The Colorado River at this point is marked "Supposed Head of Navigation".
- 1878 25.1353 **Map of the States of California and Nevada. Carefully Compiled from the Latest Authentic Sources.** By Chas. Drayton Gibbes, C.E. Comprising Information obtained from the U.S. Coast and Land Surveys; State Geological Surveys, by Prof. J. D. Whitney; Railroad Surveys and the Results of Explorations Made by Brevet. Lieut. Col. R. S. Williamson, U.S.A., Henry De Groot, C. D. Gibbes, and Others. Published by Warren Holt. No. 717 Montgomery St., San Francisco, Cal. 1878. ("S. B. Linton Formerly of the U.S. Coast Survey Draughtsman & Lithographer 148½ S. Fourth Street Philadelphia, Pa.")
- ▶ A very detailed map. "Colorado River" is shown between a point just south of the lower international boundary with Mexico and on the northern end passing off the map to the east at approximately 36°10' N. Includes numerous place names and mining districts. Just to the east of the Arizona-Nevada common point "Yampa Creek" is shown as a tributary, having run into and from "Red Lake" in "Hualpai Val.", but its confluence with the Colorado is just off the map. The Colorado River at this point is marked "Supposed Head of Navigation".

Gilbert, G. K.; Marvine, A. R.; AND Howell, E. E.

- 1876 24.74 **Parts of northern and north western Arizona and southern Utah.**
In: Geological atlas projected to illustrate geological explorations and surveys west of the 100th meridian of longitude, under the command of First Lieut. Geo. M. Wheeler. New York, sheet 67, scale 1:506,880.
- ▶ Physiographic map. Prominently displays the eastern and central Grand Canyon, and Marble Canyon.

Gilbert, James

- 1839 25.2331 **Gilbert's New Map of the World, 1839.** ("London, Published by the Proprietor, E. Grattan, 51 Paternoster Row, Novr. 15th 1838".)
 ► "R. Colorado" is delineated on an effectively straight southwesterly course between "Gulf of California" and unlabeled headwaters, receiving en route two unlabeled tributaries from the east. "R. Hila" arrives independently at the head of the gulf from the east. The western hemisphere map also graphically depicts a "Comparative Chart of the Principal Rivers in the Western Hemisphere", which includes "Colorado (G. of California)", passing through "New Albion" with the place-name near the headwater, "San Saba", which name does not appear on the map.

Gilliam, Albert M.

WHEAT III:510

- 1846 25.833 **Map of Gilliam's travels in Mexico including Texas and parts of the United States.**
In: Travels over the table lands and cordilleras of Mexico during the years 1843 and 44 : including a description of California, the principal cities and mining districts of that Republic and the biographies of Iturbide and Santa Anna. Philadelphia: John W. Moore, 455 pp., maps.
 ► Although Gilliam's travels took him across the Colorado River between Sonora and San Francisco (as shown in his travels map), relatively little comment is made of this country. This map roughly delineates "Rio Colorado" passing southwestwardly from unlabeled headwaters to "Mar de Cortes".
- 1846 25.2183 **Map of Oregon[,] Upper and Lower California, with part of British-America, the United States and Mexico.**
 WHEAT III:511 [with illustration facing p. 32]
In: Travels over the table lands and cordilleras of Mexico during the years 1843 and 44 : including a description of California, the principal cities and mining districts of that Republic and the biographies of Iturbide and Santa Anna. Philadelphia: John W. Moore, 455 pp., maps.
 ► "R. Colorado" to "Gulf of California" similarly delineated as in the "Map of Gilliam's Travels" (ITEM NO. 25.833) but with labeled tributaries from the east, "Nabalio R." and "Jukesla R." The Gila River, with confluence just north of the gulf, is labeled "R. Cita".

Gird, Richard

WHEAT IV:1122

- 1865 25.43 **Official Map of the Territory of Arizona. With all the recent explorations Compiled by Richard Gird C. E. Commissioner. Approved by John N. Goodwin, Governor. In accordance with an act of the legislature, approved Oct. 23^d 1864. We hereby certify that this is the Official Map of the Territory of Arizona, and approve the same. John N. Goodwin [signature] Governor. R. C. McCormick [signature] Secretary. Prescott October 12th 1865. Published by A. Gensoul. Pacific Map Depot N^o 511 Montgomery St. San Francisco. ("Lith. Britton & Co. San Francisco.")** Scale 1 inch = 15 miles.
 Folded, in case. Case title: **Gird's Official Map of the Territory of Arizona. A. Gensoul, Publisher.**
 ► Arizona is figured with its original northwest angle that today is southern Nevada. "Colorado River" is delineated between the head of "Gulf of California" (that separates "Lower California" from "Sonora") and the Utah boundary. In the Grand Canyon region the geography represents that of the Egloffstein map in Ives' volume (1861) on the Colorado River exploration. The river and tributaries in this region are delineated by single contours that suggest canyon reaches. "Big Cañon of the Colorado River" is labeled in the western and central parts of the canyon, where "Flax River or Colorado Chiquito" (Little Colorado River) reaches the Colorado. "Cataract

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Cr." is a tributary to the Little Colorado; its upper reaches are separately labeled "Park Cr.", "Lava Cr.", and "Cedar Cr." Features in the northern part of the Lower Colorado River area are labeled according to the Egloffstein map but include "Callville" at "Present Head of Navigation", above "Fortification Rock", and farther upstream at the confluence of "Yampa Cr." from the south is labeled "Supposed Head of Navigation"; there also "Road to Salt Lake" is labeled arriving from the north. In the Colorado River delta region, "Hardys Colorado" is shown arriving with the Colorado at the head of the gulf, and "Cocopa Slough" connects the two streams. Below "Ogdens Landing" a separate stream departs from the Colorado and proceeds to "Victoria Bay" that is an inlet of the gulf at "Port Isabel". "Fort Yuma", "Colorado City", and "Arizona City" are all labeled near the confluence of "Gila River".

Very detailed manuscript map in blue-line reproduction.

Goldthwait, J. H. [Goldthwait, Jonathan H.]

- 1861 25.1586 **Goldthwait's Map of the United States[,] British Provinces, Mexico, Central America, W. India Is. &c Exhibiting the Railroads with their distances, single and double tracks & width of gauge by J. H. Goldthwait. Published by D. Chester, 119 & 121 Nassau St New-York.** ("Entered according to Act of Congress, in the year 1861, by J. H. Goldthwait, in the Clerks Office of the District Court of the United States for the Southern District of New York.")
▶ The territories of "New Mexico" and "Arizona" are respectively north and south of each other, although the boundary between the two is not shown. In "New Mexico", "Colorado R." is shown as encanyoned, as also is the lower course of "Lit. Colorado" and tributaries to it. The geography is that from Egloffstein in Ives (1861), which portrays the Little Colorado reaching the Colorado River in what is the central part of Grand Canyon (not labeled), while the Colorado comes from the northeast directly to the central Grand Canyon. The course from the confluence of "Green River" and "Grand R." to the Little Colorado confluence is depicted mostly by a dashed line. The Little Colorado is labeled "Colorado Chiquito" in its headwater area. Railways, of course, are not depicted in this area.
- 1865 25.1251 **Map of the Territories & Pacific States to accompany "Across the Continent" by Samuel Bowles.** ("Engraved by J. H. Goldthwait".) ("Printed by Cooper & Stone 100 Nassau St.") ("Entered according to Act of Congress in the year 1865 by J. H. Goldthwait in the Clerks Office of the district Court of the U.S. for the Southeⁿ District of New York".)
In: Bowles, Samuel, *Across the continent: A summer's journey to the Rocky Mountains, the Mormons, and the Pacific States, with Speaker Colfax.* By Samuel Bowles, Editor of *The Springfield (Mass.) Republican*. Springfield, Massachusetts: Samuel Bowles and Co.; New York: Hurd and Houghton, 438 pp. + advertisements, map. [This book is extralimital to this Cartobibliography, except for the map.]
▶ "Colorado R." is depicted between the head of the "Gulf of California" and north of the confluence of "Lit. Colorado". The upper portion of the Little Colorado is labeled "Colorado Chiquito". "Bill Wms. Fk." and "Rio Gila" are the only other tributaries shown. The Virgin River (not labeled) is suggested by a faint, short tributary drawn from the west at the great bend of the Colorado, north of "Explorers Rock". Between the confluence of the San Juan River (not labeled) and a point north of the confluence of the Little Colorado, spanning the "Utah"- "Arizona" boundary, the river is depicted by a dashed line. A short distance north of the San Juan confluence, in southernmost Utah, is depicted the confluence of "Green River" and "Grand R." The

WHEAT V:1115

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Colorado, between the great bend and north of the Little Colorado confluence, as well as the lower course of the Little Colorado and tributaries to it (not labeled), is demarcated by hachures that indicated an encanyoned stretch.

NOTE: Wheat (1963, Volume V, p. 397) indicates for the printer of the map, "Printed by G. W. & C. B. Colton N. Y.", which differs from the information seen for this citation; it may be a variant.

Goldwater, Barry M.

 Verso of folded oversize sheet titled, *A vision for the greater Grand Canyon*; recto comprises text and illustrations. Also distributed in unfolded format on request.]
-

Grässl, J.

- 1852 25.1081 **Vereinigte Staaten von Nord-America: Californien, Texas und die Territorien New Mexico u. Utah Nach den neuesten Hilfsmitteln gezeich. von J. Grässel. 1852. [In German.]**
 Map caption: "Meyers Zeitungs-Atlas", "N^o 120".
 ► "Rio Colorado" is depicted only generally between "G. of California" (in English) and headwaters. Its upper reach is labeled "Rio Zagagnanas", to which "Green R." is a tributary from the north and east. A minor tributary (not labeled) to the Green from the east may be the Grand River. At the confluence of the "Rio Jaquesita" (Little Colorado River) is a place marker for "P. Bucaretti" (Puerto de Bucareli). A very prominent, but confused and unlabeled tributary to the Colorado from the northwest is the Virgin River; and trapped between it and the Colorado/Zagagnanas is a straight-lined river without discernable headwater or outlet, labeled "R. of the Sulphurous Pyramids" (in English).
 See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
-

Gray, Andrew B.

- 1855 25.1086 **Map of that portion of the boundary between the United States and Mexico from the Pacific coast to the junction of the Gila and Colorado Rivers, surveyed under the direction of Hon. John B. Weller U. S. Commissioner, and the Rio Gila from near its intersection, with the southern boundary of New Mexico, surveyed under the direction of John R. Bartlett Esq. U.S. Commissioner, All in accordance with the decision of the Joint Commⁿ and conformably to the Treaty of Guad. Hidalgo, Showing also the Limits of the Territory acquired under the Treaty negotiated by the Hon. James Gadsden, U. S. Minister at the City**
 WHEAT III:821* [with illustration facing p. 229], IV:840 [with reference to III:821*]
 [NOTE: Wheat's illustration in Vol. III mislabels the cartobibliography cross-reference as "(820*)" 1855 Gray, 1"; it should be "(821*)" 1855 Gray, 2'.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

of Mexico, 1854. From *Explorations and Surveys made by, and under the direction of Andrew B. Gray as authorized to be added by the Resolution of the U. S. Senate, February 19th 1855. Vide accompanying Report, Senate Ex. Doc. No. 55. 33rd Congress 2nd Session.* ("Ackerman Lith. 379 Broadway N. Y.")

Accompanies: Explanatory report of A. B. Gray of his proceedings while a member of the "United States and Mexican Boundary Commission," appointed to run and mark the boundary line under the treaty of Guadalupe Hidalgo, 1853.

In: McClelland, R[obert]., Report of the Secretary of the Interior, in compliance with A resolution of the Senate, of January 22, communicating a report and map of A. B. Gray, relative to the Mexican boundary. *U.S. 33rd Congress, 2nd Session, Senate Executive Document 55*, 52 pp., maps.

Gray's report is dated "Washington, May, 1853."

► "Rio Colorado" is depicted between "Gulf of California" and "Bill Williams Fork". The head of the gulf includes hydrographic soundings, and a notation along the lower river, "Tide ceases".

WHEAT IV:893 [with illustration facing p. 48]

- 1856 25.970 **Preliminary Map to Accompany Report of A. B. Gray of the Route of the Texas Western Railroad Now Changed to Southern Pacific Railroad Compiled from Explorations by A. B. Gray and Others. 1856.** ("Middleton, Wallace & Co. Lithog^{rs}, Cincinnati Ohio".)
- In:* *Survey of a route for the Southern Pacific R. R., on the 32nd parallel, by A. B. Gray, for the Texas Western R. R. Company.* Cincinnati, Ohio: Wrightson and Co.'s ("Railroad Record",) Print., 110 pp., 36 plates, 3 maps.

WHEAT IV:930 [with illustration between pp. 52/53]

- 1857 25.974 **Map of proposed Arizona Territory from explorations of A. B. Gray and others, to accompany memoir by Lt. Mowry, U.S. Army, Delegate elect.** ("Middleton, Wallace & C^o Litho^s. Cin.")
- Accompanies:* Mowry, Sylvester, *Memoir of the proposed Territory of Arizona.* Washington: Henry Polkinhorn.
- Southern and northern boundaries at the Gadsden line and 34° N latitude; eastern boundary off the map; "New Mexico" to the north. Includes projected railway routes to the West Coast. "Colorado City" noted. "Rio Colorado" depicted in its lower reach, to the Gulf of California. In the limitrophe reach are the labels, "Cane Willow and Cottonwood" and "Tide ceases Heintzleman's [sic] Pt."

Gray, C. P. [Gray, Charles P.]

- 1898 25.1551 **Gray's New Trunk Railway Map of the United States[,] Dom. of Canada and portion of Mexico. Compiled from Latest Official Sources, showing carefully selected list of Cities & Towns in readable type for quick reference. Published by C. P. Gray 89 Fulton St. New York.** ("Robert A. Welcke Photo-Lith. 178 William St. N.Y.") ("Copyrighted 1898 by C. P. Gray N.Y.")
- The Library of Congress Office of Register of Copyrights stamp on the LOC copy of this map is dated January 7, 1899.
- The "Atchison Topeka & Santa Fe" route is shown across northern Arizona. On "Colorado River", "Grand Canon" is figured as encanyoned. Of note is a dashed line that depicts a road connection between "Flagstaff" and "Hances" [sic]. The spot position of the John Hance ranch locale is shown at the area now known as Desert View, and in fact displays as in the canyon. This may be in part due to Santa Fe advertising, since also by Flagstaff are noted "Cave Dwellings" and "Cliff Dwellings"; no other such notes are shown.
-

Gray, Frank A.

1884 25.46 **Arizona and New Mexico.** [No imprint] Frank A. Gray, scale 1:3,168,000.

Gray, O. W.

- 1873 25.2067 **Gray's Atlas Map of North America.**
In: Gray's atlas of the United States, with general maps of the world. Accompanied by descriptions geographical, historical, scientific, and statistical. Philadelphia: Stedman, Brown and Lyon, p. 83.
 ► "Rio Colorado" is delineated between "Gulf of California" and the confluence of "Green R." and "Grand R." The Green's lower course and the Grand run southwesterly in parallel, with the Grand turning west to meet the Green, receiving enroute "Rio S. Juan" from the east and "Lit. Colorado R." from the southeast. From the Green-Grand confluence the Colorado's course is west-southwest to the confluence of "R. Virgin" from the north and northeast, before turning south, along which reach two tributaries are noted (not labeled, one from the northwest, the other from the east and north [Bill Williams River], eventually reaching the "Rio Gila" confluence from the east.
- 1873 25.2185 **Gray's Atlas Map of the United States of America 1873.**
In: Gray's atlas of the United States, with general maps of the world. Accompanied by descriptions geographical, historical, scientific, and statistical. Philadelphia: Stedman, Brown and Lyon, p. 87.
 ► "Colorado R." is delineated between the Gulf of California (not labeled, and only the head appears at the bottom of the map) and the confluence of "Green River" and "Grand R." From the Green-Grand confluence the Colorado's course arcs from southwest to south, reaching the confluence of "Colorado Chiquito" from the southeast. Through the area that is the eastern and central Grand Canyon the Colorado's course is wildly serpentine—bactrian in fact—before proceeding northwest to "Callville" (the Virgin River does not appear on this map), then turns southward toward the gulf, receiving enroute "Bill Wms. Fk." from the east and north, and "Rio Gila" from the east-northeast. The western Grand Canyon is depicted as encanyoned.
- 1873 25.2186 **Gray's Atlas Map of New Mexico and Arizona.**
In: Gray's atlas of the United States, with general maps of the world. Accompanied by descriptions geographical, historical, scientific, and statistical. Philadelphia: Stedman, Brown and Lyon, p. 146.
 ► In Arizona, "Colorado Riv." is depicted from the Utah boundary to the lower international boundary with Mexico. It appears that the Paria River (not labeled) is displayed upstream from the confluence of "Little Colorado or Flax Riv." The Colorado's course through the Grand Canyon region is rather wildly serpentine, with tributaries (not labeled) from the north (Kanab Creek), southeast (Cataract Creek), northwest (undetermined, apparently a remnant of Egloffstein-style reaches of the Colorado River coming from the north in west-central Grand Canyon), and south (Diamond Creek, generalized). "Rio Virgin" is a tributary from the north and northeast. "Bill Williams Fork" is a tributary from the east and north. "Gila Riv." is a tributary from the east-northeast.

Great Pacific Recreation and Travel Maps

- NO DATE 25.315 **Grand Circle road and recreation : Arches, Bryce Canyon, Canyonlands, Grand Canyon, Zion national parks of southern Utah and northern Arizona. 1st edition. Large scale, fully indexed, scenic byways.** Bellevue, Washington: Great Pacific Recreation and Travel Maps, 1 sheet, 2 sides. [2010?]
Maps credited to California State Automobile Association, San Francisco.
- 2019 25.1864 **Grand Circle road and recreation : ideal for trip planning & touring : Arches, Bryce Canyon, Canyonlands, Grand Canyon, Zion national parks of southern Utah and northern Arizona : large scale, fully indexed, scenic byways.** Issaquah, Washington: Great Pacific Recreation and Travel Maps, 2nd ed., 1 sheet, 2 sides.

Green Trails Maps

- 2021 25.2512 **Valley of Fire : Moapa Valley : Hike, Horseback, Mountain Bike, OHV, Boat, Walk, Lake Mead Nat'l Recreation Area, Valley of Fire State Park, Gold Butte National Monument, BLM Rangeland : Hike, Walk, Moapa Valley Nat'l Wildlife Refuge, Mormon Mountains Wilderness and more : boots on the ground accuracy, field mapped by Green Trails crews : solar powered! no batteries required!** [No place]: Green Trails Inc., 1 sheet, 2 sides.
Recto area map scale 1:200,000, contour interval 100 ft, with informational text; verso detail map scale 1:45,000, contour interval 40 ft ("Provisional Edition 2020") with inset map, "Valley of Fire State Park : White Domes, Seven Wonders", scale 1:15,000.

Greenhow, Robert

WHEAT II:481

- 1844 25.835 **Map of the Western & Middle Portions of North America, to Illustrate the History of California, Oregon and the Other Countries on the North-West Coast of America by Robert Greenhow. Compiled from the best Authorities by Robert Greenhow. Drawn by George H. Ringgold, Engraved by E. F. Woodward, Philad^a**
In: Greenhow, Robert, The history of Oregon and California, and other territories on the North-West coast of North America : accompanied by a geographical view and map of those countries, and a number of documents as proofs and illustrations of the history. London: John Murray, 482 pp. + advertisements.
▶ A single, generalized course of the Colorado River is labeled "R. Colorado" at its lower end and, without interruption, "Green R." at its upper end, with tributaries from the east, "Nabaho R." (San Juan River), "Jaquesila R." (Little Colorado River), and "R. Gila". Other tributaries (not labeled) are a stream from the north and northwest (likely the Virgin River) and from the east (Bill Williams River).
NOTE: This map also appears, photolithographically reproduced, in *Alaskan Boundary Tribunal : British Atlas : Maps and charts accompanying the case of Great Britain* (U.S. Government Printing Office, Washington, D.C., 1904, Plate 16). Also, as a matter of disambiguation, take note that a portion of this map (showing Greenhow's title panel and only the west coast of North America from California to Alaska, and all of Alaska, omitting the area of interest to this Cartobibliography) appears, photolithographically reproduced, in *Alaskan Boundary Tribunal : United States Atlas : Maps and charts accompanying the case and counter case of the United States* (U.S. Government Printing Office, Washington, D.C., 1904, Plate 15) (caption in top margin of this map: "Alaskan Boundary Tribunal, 1903".) These atlas volumes are a part of the series issued as *U.S. 58th Congress, 2nd Session, Senate Document 162*.

WHEAT II:512

- 1846 25.1388 **Map of the Western & Middle Portions of North America, to Illustrate the History of California, Oregon and the Other Countries on the North-West Coast of America by Robert**

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Greenhow. Compiled from the best Authorities by Robert Greenhow. Drawn by George H. Ringgold, Engraved by E. F. Woodward, Philad^a

In: Calhoun, John C., Buchanan, James, and Pakenham, Richard, *Oregon: The claim of the United States to Oregon, as stated in the letters of The Hon. J. C. Calhoun and the Hon. J. Buchanan, (American Secretaries of State,) to The Right Hon. R. Pakenham, Her Britannic Majesty's Plenipotentiary. With an appendix, containing the counter statement of Mr. Pakenham to the American Secretaries of State. And a map, showing the boundary line proposed by each party.* London: Wiley and Putnam, 55, 16 pp., map.

This is the same map as Greenhow (1844, ITEM NO. 25.835).

► A single, generalized course of the Colorado River is labeled "R. Colorado" at its lower end and, without interruption, "Green R." at its upper end, with tributaries from the east, "Nabaho R." (San Juan River), "Jaquesila R." (Little Colorado River), and "R. Gila". Other tributaries (not labeled) are a stream from the north and northwest (likely the Virgin River) and from the east (Bill Williams River).

NOTE: This map also appears, photolithographically reproduced, in *Alaskan Boundary Tribunal : British Atlas : Maps and charts accompanying the case of Great Britain* (U.S. Government Printing Office, Washington, D.C., 1904, Plate 16). Also, as a matter of disambiguation, take note that a portion of this map (showing Greenhow's title panel and only the west coast of North America from California to Alaska, and all of Alaska, omitting the area of interest to this Cartobibliography) appears, photolithographically reproduced, in *Alaskan Boundary Tribunal : United States Atlas : Maps and charts accompanying the case and counter case of the United States* (U.S. Government Printing Office, Washington, D.C., 1904, Plate 15) (caption in top margin of this map: "Alaskan Boundary Tribunal, 1903".) These atlas volumes are a part of the series issued as *U.S. 58th Congress, 2nd Session, Senate Document 162*.

Greenleaf, Jeremiah

1848 25.2011

North America.

In: *A new universal atlas; comprising separate maps of all the principal empires, kingdoms and states throughout the world: and forming a distinct atlas of the United States. Carefully compiled from the best authorities extant by Jeremiah Greenleaf. a new edition revised and corrected to the present time.* [No imprint], p. 29.

► "R. Colorado" is delineated from headwaters to "Gulf of California" following an effectively straight course to the southwest; it receives two tributaries (unlabeled) from the east; "R. Gila" arrives independently at the head of the gulf from the east.

1848 25.2187

The United States of Mexico.

In: *A new universal atlas; comprising separate maps of all the principal empires, kingdoms and states throughout the world: and forming a distinct atlas of the United States. Carefully compiled from the best authorities extant by Jeremiah Greenleaf. a new edition revised and corrected to the present time.* [No imprint], p. 57.

► "R. Colorado" is shown on an effectively straight course southwestwardly to the head of "Gulf of California"; it comes in from off the top of the top at an unlabeled tributary, below which only "R. Jaquesila" (Little Colorado River) arrives from the east and an unlabeled tributary (Bill Williams River) from the east and northeast; "R. Gila" arrives independently at the head of the gulf from the east-northeast. West of the Colorado, "R. de los Martires" parallels the Colorado while gently arcing westward to the Pacific Ocean; along its course its headwaters are delineated by solid lines, while its intermediate course is depicted by dotted lines interrupted once by a reach of solid line.

Grigg, John

- 1830 25.2061 **North America.** ("J. H. Young sc.")
In: Grigg's American school atlas, exhibiting the different grand divisions of the globe, together with a set of maps particularly adapted to illustrate the geography of North and South America, according to the political divisions of the present time. Drawn and engraved from the latest and best authorities. Philadelphia: John Grigg.
 ► "R. Colorado" is delineated between the head of "Gulf of California" and headwaters; its course is effectively straight to the southwest to the head of the gulf; enroute it receives two tributaries (not labeled) from the east. "R. Gila" arrives independently at the head of the gulf from the east.
- 1830 25.2189 **United States.** ("J. H. Young sc.")
In: Grigg's American school atlas, exhibiting the different grand divisions of the globe, together with a set of maps particularly adapted to illustrate the geography of North and South America, according to the political divisions of the present time. Drawn and engraved from the latest and best authorities. Philadelphia: John Grigg.
 ► "R. Colorado of the West" is delineated between the head of "Gulf of California" and headwaters; its course is effectively straight to the southwest to the head of the gulf; enroute it receives one tributary (not labeled) from the east. "R. Gila" arrives independently at the head of the gulf from the east. To the west of and parallel to the Colorado "R. Matires" has a course to the southwest before arcing to the southeast to arrive at a point on the western side of the gulf some distance from the head.
- 1830 25.2190 **Mexico and Guatemala.** ("J. H. Young sc.")
In: Grigg's American school atlas, exhibiting the different grand divisions of the globe, together with a set of maps particularly adapted to illustrate the geography of North and South America, according to the political divisions of the present time. Drawn and engraved from the latest and best authorities. Philadelphia: John Grigg.)
 ► "Rio Colorado is delineated between the head of "Gulf of California" and the confluence of "R. Zaguanas" (Green River) and "Nabajoa R." (San Juan River); its course from there is to the southwest before turning southward near the head of the gulf; enroute it receives "Yaguesila R." (Little Colorado River) from the east. "R. Gila" arrives independently at the head of the gulf from the east. To the west of and parallel to the Colorado are two rivers without defined headwaters or confluences: "R. Pyramides" and "R. Matires", the latter which, unlike in map [2], does not reach the gulf, nor does it go off toward the Pacific Ocean as delineated in other maps, its course blocked by a linear mountain range.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► The 35th parallel rail line is not labeled other than an indication in northern Arizona, "Sitgraves Route" [*sic*]. The 32nd parallel line across southern Arizona is labeled "Proposed Southern Pacific R.R." and "Former Overland Route". "Colorado River" is depicted between the head of the "Gulf of California" and the confluence of "Green R." (labeled on a headwater branch) and "Grand R." Its lower course is reasonably well portrayed; however, its course between the Green-Grand confluence and the confluence of "Virgin Riv." is remarkable. From the Green-Grand it heads southwesterly on an arc that becomes a due west heading just north of the Utah-Arizona boundary; had it continued without turning west it would have crossed into Arizona at about where it does in fact. Southwest of Rockville, Utah, before it conflicts with the Virgin River, the Colorado turns to the southwest, crossing the Utah-Arizona boundary, then flows around the west side of "North Side Mt." to a southeast heading where in "Great Canon of the Colorado" it receives "Colorado Chiquito or Flax Riv." (Little Colorado River). The Colorado then arcs back to a northwest heading, receiving in the middle of that arc Diamond Creek (not labeled), and heads northwest to the great bend. Arcing to the south, it passes "Colville" and receives "Virgin Riv." from the northwest (which in turn had first come southwest from Utah). At Callville is the label, "Long Rapids, Head of Navigation". The course of the Little Colorado River is just as remarkable, passing northeastward to the 36th parallel before turning west-northwest toward the east side of "North Side Mt." (the mountain being 50 miles southeast of St. George, Utah), then turns southwest to strike the Colorado River. A few miles before the Little Colorado turns southwest it receives "Cataract Cr." from the southeast, at which point also is labeled "Yampais Village". Confusing matter more, paralleling Cataract Creek some 30-40 miles to the east are two smaller tributaries (not labeled), on one of which is labeled "Cascade", which is reminiscent of the presentation on other maps of Cataract Creek. Indeed, despite the misalignments of the rivers that are a reflection of Egloffstein's geography in Ives (1861), that entire system has been transposed miles to the west.

NOTE: Compare also Watson (1875, *ITEM NO.* 25.597), which attempts to make corrections in the Grand Canyon area.

Glen Canyon Dam to Pearce Ferry.

"These data represent the centerline and measured increments at hundredths, tenths and whole miles, along the centerline of the Colorado River beginning at Glen Canyon Dam near Page, Arizona and terminating near the inflows of Lake Mead in the Grand Canyon region of Arizona, USA. The centerline was digitized using Color Infra-Red (CIR) orthophotography collected in March 2000 as source information and a LiDAR-derived river shoreline representing 8,000 cubic feet per second (CFS) as the defined extent of the river. Every effort was made to follow the main flow of the river while keeping the line approximately equidistant from both shorelines. The centerline feature class has been created to more accurately map locations along the Colorado River downstream of the Glen Canyon Dam. River miles and river kilometers were

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

developed from measurements along this line. The incremental point feature classes were derived from the centerline of the Colorado River datasets. Specifically, the points were generated from nodes extracted from the centerline endpoints of the tenth mile line feature class. The Grand Canyon Monitoring and Research Center (GCMRC) river mileage was cross-checked with commercially available river guides and always fell within one mile of the guides, usually corresponding within a half mile. Additionally, these data were subjected to internal review by GCMRC scientists and commercial boatmen with decades of river travel experience on the Colorado River. River Mile 0 was measured from the USGS concrete gage and cableway at Lees Ferry, Arizona—as per the Colorado River Compact of 1922—with negative river mile numbers used in Glen Canyon and positive river mile numbers downstream in Marble and Grand Canyons. These data were updated in March 2015 using newer orthorectified imagery collected in May of 2009 and 2013, both at approximately 8,000 CFS. Due to extended drought conditions that have persisted in the U.S. Southwest, lake levels have dropped dramatically, especially at Lake Mead. A stretch of the Colorado River corridor that was part of Lake Mead in year 2000 has returned to a flowing river once again, and with a different channel that has not previously existed. All changes to the original centerline are downstream of River Mile 260 which is just upstream of Quartermaster Canyon in western Grand Canyon. New river miles and river kilometers were developed from this updated centerline.”

Gutierrez, Carlos; Bryant, William; Saucedo, George; AND Wills, Chris [AND Jennings, Charles W.]

2010 11.5891 (UPDATERS) **California Geological Survey 150th anniversary geologic map of California.** *California Geological Survey, Geologic Data Map 2*, scale 1:750,000, 1 sheet, and text, 13 pp. (Original compilation by Charles W. Jennings, 1977. Digital preparation by Milind Patel, Jim Thompson, Barbara Wanish, and Milton Fonseca.)

Gyofu, Kaisei *see* **Tsurumine, Shigenobu**

Gyosō, Aiko [靄湖漁叟]

1854 25.1111 海外異聞：一名，亞墨利加新話 [Kaigai ibun : ichimei, Amerika shinwa] [**A strange tale from overseas : a new account of America**]. (初太郎口述 [Hatsutarō, narrator].) [Japan]: Seifuen Juō, 5 volumes, [26], [20], [21], [18], [15] woodblock leaves. [**In Japanese.**]

Date published as “嘉永甲寅” [Kaei kōin].

This is the narrative of Hatsutarō, who in 1841 was with a crew of thirteen on a boat that left Hyogo but was stranded at sea by a storm until a Spanish vessel rescued them four months later, which abandoned them at Cabo San Lucas on the southern tip of Baja California. Hatsutarō and the ship’s master eventually returned home in 1844 by way of Canton and Zhapu, China (others followed a year later). His account was taken down in manuscript and after ca. 1853 variants were published in at least two venues (this one, and compare Tsurumine, 1855, **ITEM NO.** 25.1112) based on Inoue Shun’yō’s 1846 manuscript, *Ameriki shinwa*, which was compiled by Moekawa Bunzō and Sakai Junzō with data added from other sources known to them. The story itself has no bearing on any part of this Cartobibliography, but the illustrations in this volume include a double-page **MAP** of the North Pacific, which shows western North America only in outline, not even with any rivers represented.

This 1854 publication was reprinted in an English translation, with plates in facsimile; see Bunzō and Junzō (1970, **ITEM NO.** 25.1113). The first modern reprinting of the full text and all illustrations was published by 荒川秀俊 (Araakawa Hidetoshi), 異国漂流記続集 *Ikoku hyōryūki zokushū* (Tōkyō: 気象研究所 Kishō Kenkyūjo, pp. 149-209).

• This title is cited here for its map, but also because it should not be confused with Wheat's (1959, Volume III, pp. 164, 326) citation ([WHEAT III:786](#)) of a "5-Volume work, entitled *Meriken Shinshi* (New Account of America), 108 leaves", published in Edo in 1853; Wheat lists it under "Gyofu", with the map cited as "Complete map of 31 states of the Republican government". The 1853 work cited by Wheat has not been located by Spamer. However, an 1855 production under the same title has been found; see Tsurumine (1855, [ITEM NO. 25.1112](#)). It is likely that Wheat referred in fact to that work.

H

H. C. Carey and I. Lea [firm] [Henry Charles Carey and Isaac Lea]

- 1822 25.710 **Geographical, Historical, and Statistical Map of Mexico.**
In: A complete historical, chronological, and geographical American Atlas : being a guide to the history of North and South America, and the West Indies, exhibiting an accurate account of . . . their various kingdoms . . . together with the wars, celebrated battles, and remarkable events, to the year 1822. According to the plan of Le Sage's Atlas and intended as a companion to Lavoisne's improvement of that celebrated work. Philadelphia: H. C. Carey and I. Lea, [143] pp., 53 maps. [This is map 38.]
- ▶ "Mouth of the R. Colorado" is labeled at the head of "Gulf of California"; the river is labeled "Rio Colorado" between there and the confluence of "Rio Zaguuanas" (Green River) and "Rio Nabajoa" (San Juan River). The Little Colorado River is mislabeled "Rio Nabajoa" (again); at its confluence with the Colorado is the label "Puerto de Bucarelli" (Puerto de Bucareli).
- 1822 25.1532 **North America.**
In: The juvenile atlas, or a series of maps, to illustrate the Old and New Worlds. Philadelphia: H. C. Carey and I. Lea.
- ▶ A relatively short river (not labeled) follows a course south, then west-southwest, then south to south-southeast to arrive at the head of "Gulf of California" that separates "California" from the "Internal Provinces" of "Mexico or New Spain". On its final southward course it runs along the east side of a mountain range all the way to the gulf. Some distance north of its mouth it receives a river (not labeled) with several headwater tributaries from the east-northeast.

- Accompanying:* Brockett, L. P., *The commercial traveller's guide book : being a complete manual for the use of commercial travellers and sellers of goods by sample, giving the history of commecial travelling, the laws of states and cities affecting the business* New York: H. Dayton and Co., 378 pp.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► The “Colorado R.” is depicted reaching “P^t. Invincible” at the head of the “Gulf of California”. The stretch between the western Grand Canyon (not labeled) and the confluence of “Lit. Colorado” (also labeled “Colorado Chiquito” toward its headwaters) is shown as encanyoned, although the route followed by the Little Colorado is directly from the southeast, receiving two tributaries (not labeled but shown as encanyoned) from the south-southeast just before its confluence with the Colorado; one of these is Cataract Creek, heading near “Red Butte”, thus the depiction resembles that of the Egloffstein maps from the Ives expedition. Upstream from the Little Colorado confluence, the Colorado is depicted by a dashed line between there and the confluence of the San Juan River. Other than “Rio Gila”, the only tributary to the Colorado in its lower course is “Bill Wms. Fk.” No tributaries are shown on the north side of the river. The 35th and 32nd parallel routes are shown generally, as is also the “Spanish Trail”.

H. H. Bancroft and Co. [Bancroft, Hubert Howe] *see also* Knight

WHEAT V:1060 [with illustration facing p. 66]

1863 25.983 **Bancroft's map of the Colorado mines published by H. H. Bancroft and Co., San Francisco, Cal. 1863.**

In: Guide to the Colorado mines. San Francisco: H. H. Bancroft and Co., 16 pp., map. [Volume is principally a travel guide.] [Reprinted 1933; see Hubert Howe Bancroft *et al.* (1933, ITEM NO. 2.29141 in Volume 1/Part B of THE GRAND CANON).]

► The river, “Colorado”, is depicted between Mexico and the Grand Canyon region only. Grand Canyon is labeled “Big Canon of the Colorado”. The main stem of the Colorado is shown as coming from the north approximately where Kanab Creek is situated, and “North Side Mts.” are labeled between the Colorado-Little Colorado confluence, thus portraying the erroneous geography of Egloffstein.

WHEAT V:1093

1864 25.1248 **Bancroft's, Map of California, Nevada, Utah and Arizona, Published By H. H. Bancroft, & Comp^y Booksellers & Stationers San Francisco Cal. 1864.** (“Entered according to Act of Congress A.D. 1863, by H. H. Bancroft and Company”)

► “Colorado River” is depicted between a point south of the international boundary and southeastern Washington County, Utah, where it passes off the map to the east. “Big Cañon of the Colorado” is labeled, with “Colorado Chiquito (Little Colorado) or Flax R.” a tributary from the east. “Cataract Cr.” is shown as a tributary to the Little Colorado, near “Yampai's Village”; an upper tributary to Cataract is “Lava Cr.” A short distance downstream on the Colorado is the confluence of “Diamond R.” “North Side Mts.” are labeled between the Colorado-Little Colorado confluence, thus portraying the erroneous geography of Egloffstein. In western Grand Canyon “Yampais Cr.” is a tributary from the south. “Rio Virgin” is shown, with “Muddy R.” a tributary to it, and Las Vegas Wash (not labeled) is a tributary to the Colorado in “Black Cañon”.

H. H. Hardesty and Co.

1881 25.1402 **Map of Arizona.** (“Rand, McNally & Co., Engr's, Chicago.”)

In: Historical hand-atlas : illustrated : containing large scale copper plate maps of each state and territory of the United States, the provinces of Canada, together with a complete reference map of the world[,] topographical and railroad map of the United States, thirteen comprehensive maps of Bible geography, covering all the countries of Bible history, with a classified pronounciative index for each map, printed in colors from plates secured by letters patent, producing the clearest typographical effect of any known engraved plates, accompanied by a general survey of the world, history of the United States—history of each state and territory of the United States, nine farm maps, and history of Wells County, Indiana, illustrated, containing a

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

condensed history of the county; biographical sketches; general statistics; miscellaneous matters, &c. Chicago and Toledo (Ohio): H. H. Hardesty and Co.

Map appears on pp. 164-165.

NOTE: The title cited here is one of a series of atlases that were customized (commissioned?) for specific counties of the United States, which were published during the early 1880s at least. There are variances to all.

► “Colorado River” is shown fairly accurately between southern Utah (north of the confluence of the San Juan River) to the lower international boundary south of “Yuma City”. Specific items of interest on this profusely labeled map: “Lee’s Ferry” is shown to the east of the Colorado River on the “Mormon Wagon Road”; “Buckskin or Kaiba [*sic*] Plateau Buckskin Mountains” is labeled; between the confluences of “Little Colorado River” and “Kanab Wash” is labeled both “Marble Canon” and “White Bluffs”, and south of there is labeled “Coconino Forest”; “Suppai [*sic*] Indian Settlement” is located on “Cataract Creek”, with the adjacent notation, “Cascades”; “Peach Springs” is marked along with a separate marker northeast of there, “Indian Settlement”; north of Peach Springs are the labels “Cedar Forest” and “Colorado Forest”; the course of the Colorado between the confluences of “Kanab Wash” and “Grand Wash” is labeled “Grand Canon of the Colorado”; canyons downstream from there are labeled “Iceberg Canon”, “Virgin Canon”, and “Black Canon”; along the lower Colorado only “Canebreak Canon” is labeled, upstream from “Yuma City”, while the stretch between there and Yuma is labeled “Explorers Pass”.

H. H. Lloyd and Co.

1861 25.1565

United States.

INSET ON: *H. H. Lloyd & Co’s Military charts. Sixteen Maps On One Sheet.*

H. H. Lloyd & Co’s Military Campaign Charts Showing the Principal Strategic Places of Interest. Engraved Expressly to Meet a Public Want During the Present War.

Compiled from Official Data, by Egbert L. Viele and Charles Haskins, Military and Civil Engineers, Published Under the Auspices of the American Geographical and Statistical Society [BROADSIDE]. (“Published by H. H. Lloyd & Co., 25 Howard Street, New York. Agents Wanted.”) (“Entered, according to Act of Congress, in the year 1861, by H. H. Lloyd & Co.” “In the Clerk’s Office of the District Court for the Southern District of New York.”)

► The inset map depicts “Rio Colorado” on an effectively straight southwesterly course between from the confluence of “Green R. R. [*sic*]” and “Grand R.” and the head of “Gulf of California” that separates “Lower California” from “Mexico”. En route to the gulf it receives the tributaries “Sevier R.” from the northwest, “San Juan R.” from the east, “R. Jaquesila” (Little Colorado River) from the east, and “R. S^t Maria” (Bill Williams River) from the northeast, “Rio Virgin” from the northwest (downstream from the Bill Williams). “Rio Gila” arrives independently at the head of the gulf from the northeast. The Colorado its entire course as noted follows the east side of “Wahsatch M^{ts}”

1863 25.2426

Lloyd’s New County Map of the United States and Canadas showing Battle Fields, Railroads, &c. Compiled from the Latest Government Surveys & Other Reliable & Official Sources. Published by H. H. Lloyd & Co. 81 John St. New-York. 1863. (“Drawn and Engraved by Schönberg & Co. New York.”) (“Entered according to Act of Congress, in the Year 1863, by H. H. Lloyd & Co., in the Clerk’s office of the District Court of the United States for the Southern District of New York.”)

► “Arizona” is shown as including the angle that would later be the southernmost part of Nevada; counties are not delineated. The Colorado River (not labeled) is delineated between “Gulf of California” and the confluence of “Green River” and “Grand River”; the Green and Grand follow parallel southwest courses into Arizona, with the Grand receiving “Rio San Juan” from the east and southeast, an unlabeled tributary from the east-northeast, and “Rio de Lino” (Little Colorado River)

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

from the southeast before turning west-northwest to meet the Green. The Colorado continues on a southwest course to the confluence of "Rio Virgen", turning south to the gulf, receiving en route "Mohave R." from the northwest and west, "Bill Williams Cr." from the east, and "Rio Gila" from the east *below* "Colorado Cy." Of note is the display of the farthest headwaters of the Little Colorado and Gila as virtually touching and flowing away from each other.

- 1864 25.1519 **Map showing Loyal States in Green, what the Rebels still hold in Red, and what the Union Soldiers have wrested from them in Yellow.**
INSET ON: *Presidential Campaign, 1864* [**BROADSIDE**]. ("Published by H. H. Lloyd & Co., 21 John Street, New York. B. B. Russell, 515 Washington Street, Boston. R. R. Landon, 88 Lake Street, Chicago.")
 ► The base map depicts "Rio Colorado" on an effectively straight course from the confluence of "Green R." and "Grand R." to the head of "Gulf of California", receiving tributaries en route, "San Juan R." from the east, "R. Jaquesila" (Little Colorado River) from the east, "R. S^t Maria" (Bill Williams River) from the east-northeast; "Rio Virgen" from the northwest (note confluence is downstream from the Bill Williams), and "Rio Gila" from the northeast. The Colorado is depicted as running parallel to and on the east side of the "Wahsatch M^{ts}" from near the Grand-Green confluence all the way to the gulf(!), with the Virgin River cutting through a pass to reach it.
- 1866 25.1136 **New Map of the U.S. Territories and Pacific States Published by H. H. Lloyd and Co. 21 John St. New York. 1866.**
 One of two complementary maps in folder with cover title, **H. H. Lloyd & Co's New County Map of the United States**. The other map in this folder is *New Map of the United States*, which is restricted to the eastern U.S. as far as the Great Plains.
 ► In the Southwest on the map of the territories and Pacific states, the Colorado River is labeled "Colorado River" in its lower reach, "Rio Colorado" in its upper reach; between the "Gulf of California" and the confluence of "Green River" and "Grand River". Its course is drawn somewhat fancifully, a wavering line along its general course between the head of the Gulf of California and the great bend where "Rio Virgen" and a stream (not labeled; Las Vegas Wash) strike the Colorado independently. In the Grand Canyon area, the course is mostly east-west between the Virgin and the confluence of a stream (not labeled; Cataract Creek). Upstream from that point the Colorado follows a similarly fanciful wavering line northeast to southwest between the confluence of "Green River" and "Grand River", receiving en route "Rio San Juan" and "Colorado Chiquito R." [*sic*], both from the southeast.
- 1868 25.2330 **Atlas of the United States. Kansas and Southern Territories. Published for H. S. Stebbens by H. H. Lloyd & Co. New York.**
In: Atlas of the State of Ohio : from surveys under the direction of H. F. Walling, to which is added an atlas of the United States. New York: H. H. Lloyd and Co.
 There probably are other such customized products for other areas.
 ► "Rio Colorado" is shown on a southwesterly course from Utah into northern Arizona, directly to the confluence of Diamond Creek (not labeled). In that reach the Little Colorado River (not labeled) arrives from the southeast at "Yampais Vil.", with Cataract Creek (not labeled) a tributary to the Little Colorado shortly before reaching the Colorado. The Little Colorado seems to have been labeled but obliterated by hachures depicting canyon topography, through which apparently can be read in part, "Flax R". From the Diamond Creek confluence the river follows a northwesterly course to the confluence of the "Rio Virgen".
- 1874 25.2302 **North America By H. H. Lloyd & Co. N. Y.**

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

In: Lloyd's handy atlas, containing maps of the world, and its grand divisions, the United States, and the different states and territories of the union, etc., etc.
Concord, New Hampshire: D. L. Guernsey.

► A peculiarly mixed up presentation. The Colorado River is delineated as expected between the head of the "Gulf of California" and the confluence of "Green" and "Grand", but its *entire* course, and including the lower courses of the Green and Grand, are depicted by dashed lines, and the label "Colorado" appears only on the Little Colorado River, thus giving the impression that the Green (or possibly the Grand) continues southward to the (Little Colorado's) confluence while showing the Colorado along that course instead. The San Juan River (not labeled) is likewise presented with a dashed line, on its proper course. The Virgin River (not labeled) is also shown more or less properly, and with a solid line, dashed only at its closest approach to the Colorado. The Bill Williams River (not labeled) is shown by a solid line. "Gila", with a solid line, is a tributary to the Colorado at "Arizona City", below which the river course is presented by a solid line to the head of the gulf.

1874 25.2303

Railroad Map of the United States. Published by H. H. Lloyd & Co. New York.

In: Lloyd's handy atlas, containing maps of the world, and its grand divisions, the United States, and the different states and territories of the union, etc., etc.
Concord, New Hampshire: D. L. Guernsey.

► Only the 32nd parallel railroad route is shown in the area of interest here. "Rio Colorado" is delineated generally, between the "Gulf of California" and the confluence of "Green R." and "Grand R." From that confluence the Colorado follows a southwesterly course, receiving the San Juan River (not labeled) from the southeast, "Colorado Chiquito" from the southeast, and Cataract Creek (not labeled) from the southeast), beyond which the Colorado's course is west to the confluence of the Virgin River (not labeled), then southward to the gulf, receiving an unlabeled tributary from the west at "Ft. Mohave", the Bill Williams River (not labeled) from the east and north, and "R. Gila" from the east-northeast.

1874 25.2304

County Map of Arizona and Southern California.

In: Lloyd's handy atlas, containing maps of the world, and its grand divisions, the United States, and the different states and territories of the union, etc., etc.
Concord, New Hampshire: D. L. Guernsey.

► "Rio Colorado" is presented in the Grand Canyon region as decidedly on the model of Egloffstein, with peculiarities. The Colorado seems to come from Utah on a southwesterly course, where at the confluence of the Little Colorado River (not labeled?) is "Yampais Vil."; the Cataract Creek tributary (not labeled) is in position with its confluence along the Little Colorado just before the main confluence of the two Colorados. The rivers are depicted as encanyoned, and the hachures along the Little Colorado seem to eradicate a label that apparently ends with "or Flax R." From the main confluence the Colorado continues southwestward, noticeably receiving Egloffstein's Parashant Canyon tributary (not labeled) from the northwest, and Diamond Creek (not labeled) from the southeast. The river then turns northwestwardly toward the Virgin River (not shown as it is off the map). No name is indicated for the Grand Canyon.

H. M. Gousha Company

NO DATE 25.2494

Continental Oil Co. Official Road Map Utah. Chicago: H. M. Gousha Co., 1 sheet. ("C-148 J.C.") [1929.]

► Includes northern Arizona to embrace the Grand Canyon National Park. Also delineates the northern unit of Kaibab National Forest and Pipe Spring National Monument. Kaibab Indian Reservation and Havasupai Indian Reservation are delineated; Hualpi [*sic*] Indian Reservation [Hualapai Indian Reservation] partly delineated. A road from Bloomington, Utah, is shown crossing the Colorado River at

 Cover title: **Poor's Manual—1894. American Bank Note Co. No. 86 Trinity Place, New York, Engravers and Printers.**
 Two maps depict variant styles as of this date.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “Colorado R.” is depicted rather generally between the head of the Gulf of California (not labeled) and the confluence of “Grand River” and “Green River” (although the labels are erroneously switched). Tributaries received en route are “San Juan Riv” from the northeast and east-southeast (what might be the Paria River [not labeled] is shown reaching the Colorado from the northwest just north of the San Juan confluence), an unlabeled small tributary from the east reaching the Colorado just south of the Utah-Arizona boundary, “Little Colorado Riv.” from the east-southeast and southeast, Cataract Creek (not labeled) from the south and southeast, Kanab Creek (not labeled) from the north-northeast, an unlabeled tributary from the northeast, “Virgin River” from the northwest and northeast, Bill Williams River (not labeled) from the east and north, and “Gila River” from the east-northeast”. The course of the Colorado through the “Grand Canon” resembles the imaginative course partly reminiscent of that shown by Egloffstein and Ives. The route of the “Atl. & Pac.” railroad is depicted generally, as is also the “Sou. Pac.” railroad.

1894 25.2191

Atchison, Topeka and Santa Fé Railroad System.

In: Manual of the railroads of the United States for 1894. Twenty seventh annual number. New York: H. V. and H. W. Poor; London: Effingham Wilson; New York: American Banknote Company.

Cover title: **Poor’s Manual—1894. American Bank Note Co. No. 86 Trinity Place, New York, Engravers and Printers.**

Two maps depict variant styles as of this date.

► “Colorado R.” is depicted between the head of “Gulf of California” and the confluence of Green and Grand Rivers (neither is labeled). The only tributaries received en route are the Little Colorado and Gila Rivers (neither is labeled). The Colorado’s course through the Grand Canyon region is generalized but approximates the true course. The route of the “Atl. & Pac. R. R.” is shown generally.

Haack, W., AND Lautensach, H.

1940 25.2440

Verinigte Staaten, Mittelamerika, Westindien. (“Gotha: Justus Perthes”). (“Sydow-Wagners method. Schul-Atlas Nr. 56”). (“Bonne’sche Projektion. Radius des 30. Parallelkreises (in Proj. u. MBstb. d. Karte 1:20000000) = 553 mm”). **[In German.]**

In: Sydow-Wagners methodischer Schul-Atlas : 21. Auflage. Gotha: Justus Perthes.

► “Green R.” and “Grand R.”, with “Colorado” downstream, are delineated as encanyoned. The label “Cañon des Colorado” appears on the reach between the Grand-Green confluence and the confluence of “Kl. Colorado” (Little Colorado River). Note that the Colorado does not follow the course of the Grand River, which had been renamed two decades earlier. A line crossing the river, with the label “Staudamm”, appears at Boulder Canyon (not labeled), thus conveying old data for the location of what was, in 1940, the completed Hoover Dam in Black Canyon. The routes of the Santa Fe and the Southern Pacific railways are delineated.

1872 25.1569

1872. The American Union Railroad Map of the United States[,] British Possessions, West Indies, Mexico, and Central America. Published by Haasis & Lubrecht, 107 Liberty Street, New York. (“Smith & McDougal, Electrotypers, 82 Beckman St., New York.”)

► The 35th parallel rail line is not labeled other than an indication in northern Arizona, “Sitgraves Route” [sic]. The 32nd parallel line across southern Arizona is labeled “Proposed Southern Pacific R.R.” and “Former Overland Route”. “Colorado River” is depicted between the head of the “Gulf of California” and the confluence of “Green R.” (labeled on a headwater branch) and “Grand R.” Its lower course is reasonably well portrayed; however, its course between the Green-Grand confluence

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

and the confluence of "Virgin Riv." is remarkable. From the Green-Grand it heads southwesterly on an arc that becomes a due west heading just north of the Utah-Arizona boundary; had it continued without turning west it would have crossed into Arizona at about where it does in fact. Southwest of Rockville, Utah, before it conflicts with the Virgin River, the Colorado turns to the southwest, crossing the Utah-Arizona boundary, then flows around the west side of "North Side Mt." to a southeast heading where in "Great Canon of the Colorado" it receives "Colorado Chiquito or Flax Riv." (Little Colorado River). The Colorado then arcs back to a northwest heading, receiving in the middle of that arc Diamond Creek (not labeled), and heads northwest to the great bend. Arcing to the south, it passes "Colville" and receives "Virgin Riv." from the northwest (which in turn had first come southwest from Utah). At Callville is the label, "Long Rapids, Head of Navigation". The course of the Little Colorado River is just as remarkable, passing northeastward to the 36th parallel before turning west-northwest toward the east side of "North Side Mt." (the mountain being 50 miles southeast of St. George, Utah), then turns southwest to strike the Colorado River. A few miles before the Little Colorado turns southwest it receives "Cataract Cr." from the southeast, at which point also is labeled "Yampais Village". Confusing matters more, paralleling Cataract Creek some 30-40 miles to the east are two smaller tributaries (not labeled), on one of which is labeled "Cascade", which is reminiscent of the presentation on other maps of Cataract Creek. Indeed, despite the misalignments of the rivers that are a reflection of Egloffstein's geography in Ives (1861), that entire system has been transposed miles to the west.

NOTE: Compare also Watson (1875, *ITEM NO.* 25.597), which attempts to make corrections in the Grand Canyon area.

► Hand-colored map. Not a separately published map as such, but cited here for its portrayal of the Grand Canyon region prior to even the first geological exploration in 1858. The base map depicts "Rio Colorado" from the head of "Gulf of California" northward approximately to the confluence of the Virgin River (not labeled), at which point the line depicting the river becomes dashed, as also is the lower reach of the Virgin. In the Grand Canyon region (largely blank), the Colorado is depicted on a generalized east-west course, connecting directly to, and only to, "Colorado Chiquito", with but two tributaries from the south (not labeled), the easterly one of which is Cataract Creek. Geologically, only rocks of igneous centers are depicted in the region, although some generalized, broadly applied shading appears in the area to designate "Devonian" rocks. On the western side of the Colorado River, between "Ft. Yuma" and the head of the gulf, are depicted "Desert Quaternary" deposits.

Hall, Sidney

WHEAT II:381 [with date 1828]

- 1830 25.1219 **Mexico. and Guatemala. Corrected from original information communicated by Simon A. G. Bourne Esq. By Sidney Hall.** ("London, Published by Longman, Rees, Orme, Brown & Green, Paternoster Row, March, 1828.")

-

Hardy, R. W. H. [Hardy, Robert William Hale] ⁵⁸

- 1829 25.634 **Plan of the Rio Colorado, By Lieut^t R. W. H. Hardy R.N.** (“Sid^y Hall sculp^t”) (“London, Published by Henry Colburn, New Burlington Str^t Aug^t 1829”)
In: Travels in the interior of Mexico, in 1825, 1826, 1827, & 1828. London: Henry Colburn and Richard Bentley, 540 pp. + advertisements, fold-out frontispiece map. [Half-title: *Hardy’s travels in Mexico.*]
 Volume includes exploration and first hydrographic survey of the Colorado River delta, see Chapters 13, 14 (pp. 312-373) and first portion (pp. 374-385) of Chapter 15.
 ▶ The “Plan” is between pp. 320/321. This was at the time the most substantive map of the Colorado River delta region. Despite the corroboration of depth soundings, it shows a severely foreshortened and hence erroneous course between the Gulf of California and the confluence of the Gila River. This is due to the fact that the supposed Colorado–Gila confluence is actually the confluence of what has been named the Rio Hardy, much closer to the head of the gulf. What is labeled as the “Rio Gila” is actually the course of the Colorado.
- 1829 25.2102 **A Map of Sonora, and Gulf of California, By Lieut^t R. W. H. Hardy R.N.** (“Engraved by Sid^y Hall, Bury Str^t Bloomsb^y”) (“London, Published by Henry Colburn, New Burlington Str^t Aug^t 1829.”)
In: Travels in the interior of Mexico, in 1825, 1826, 1827, & 1828. London: Henry Colburn and Richard Bentley, 540 pp. + advertisements, fold-out frontispiece map. [Half-title: *Hardy’s travels in Mexico.*]
 ▶ The map of Sonora and the gulf is a fold-out facing the title-page. “Rio Colorado” is displayed ending in a briefly sinuous course at the head of the “Gulf of California”, in the same fashion as that in Hardy’s “Plan of the Rio Colorado” [ITEM NO. 25.634]. “Rio Gila” approaches on a steady arc from the east. The point of land on the west side of the confluence of the Colorado and Gila is labeled “Newburgh Pt^t” The entire landscape north of the confluence of these rivers, to the north edge of the map, is blank, with only the label, “Axua Indians”. “Hardy’s Chan^t” is delineated on the west side of the broad river mouth, for a significant distance south of “Gore I.” and “Montagu I.”, even south of the latitude of “Adair’s Bay” and “Rocky Pt^t”
- 1977 25.845 *Travels in the interior of Mexico, in 1825, 1826, 1827, & 1828.* Glorieta, New Mexico: Rio Grande Press, 558 pp.
 Facsimile reprint of 1829 ed. Includes exploration and first hydrographic survey of the Colorado River delta, see Chapters 13, 14 (pp. 312-373) and first portion (pp. 374-385) of Chapter 15; plate **MAP** of Colorado River delta: “**Plan of the Rio Colorado, by Lieut. R. W. H. Hardy R.N.**”, “(Sid^y Hall sculp^t)”.

Harper and Brothers [firm]

- 1878 25.846 *Harper’s introductory geography : with maps and illustrations prepared expressly for this work by eminent American artists.* New York: Harper and Brothers, 112 pp.
 See pp. 71-72. See also **MAPS**, pp. 34, 69, each of which depicts the Colorado River in the Grand Canyon region differently.
- 1878 25.847 *Harper’s school geography.* New York: Harper and Brothers, 128+ pp.
 Grand Canyon and Colorado River, see pp. 61, 62; see also **MAP**, p. 58.

⁵⁸ While Hardy had been a Royal Navy officer, at the time when he made the survey of the Colorado River delta he was a civilian venturer in the employ of the General Pearl and Coral Company of London. The prospects he investigated in the gulf were not economically viable.

Jigsaw puzzle **MAP**, ca. 100 pieces.

Hartley, William B.

- NO DATE 25.50 **Hartley's map of Arizona from official documents. Office 32 Pine St. N.Y.** [No imprint.] [1865?]
Library of Congress copy includes manuscript notations, "[1865]" (square brackets thus) and "Drawn & Eng J.C. Smith N.Y."
▶ "Colorado River" depicted to the "Gulf of California". The river in the Grand Canyon region is labeled "Canon of the Colorado R". "Rio Colorado" is depicted along a most unusual route between the confluence of the "Green River" and "Grand River", passing to the west of the "North Side Mts." and reaching the confluence of "Little Colorado R". enroute Cataract Creek (not labeled) at "Yampas Village".) Farther downstream, still on a southerly course before turning westward, is the confluence of Diamond Creek (not labeled) and the notation "Hualpais Village". The lower Colorado River region includes labels taken from the Ives Expedition; "Head of Navigation" is noted north of "Fortification Rock". Also, there are no labels on the river in Mexico except "Point Invincible Head of Navigation".

Hartmann, Carl

Heck, J. G. [Heck, Johann Georg]

- 1834 25.2272 **Hémisphère du Nouveau Continent. (Ouest.)** ("dressée par J. G. Heck. Publiée par Engelmann et C^{ie} A Paris".) [In French.]
In: Atlas géographique, astronomique et historique servant à l'intelligence de l'histoire ancienne, du moyen âge et moderne et à la lecture des Voyages les plus recens. Dressé [sic] d'après les meilleurs matériaux tant français qu'étrangers conformément aux progrès de la science, par J. G. Heck. Gravé sur pieue sous sa Direction et publié par Engelmann & Compagnie. Paris, London and Mulhouse: Engelman & Compagnie.
▶ "Colorado R" follows a straight southwesterly course from mountainous headwater to the head of the Gulf of California (not labeled), with the gulf's head twisting northeastward. The Gila River (not labeled) arrives independently at the head of the gulf from the east.
- 1834 25.2273 **Carte Générale des deux Amériques avec la circonscription politique des nouvelles républiques constituées jusqu'à ce jour redigrée par J. G. Heck et publiée par Engelmann & Comp.^{ie} à Paris 1833.** ("Atlas géograph^e et historique N^o 55 et 59." "Géographie physique et politique Pl. 31 et 35.") [In French.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

In: Atlas géographique, astronomique et historique servant à l'intelligence de l'histoire ancienne, du moyen âge et moderne et à la lecture des Voyages les plus recens. Dressé [sic] d'après les meilleurs matériaux tant français qu'étrangers conformément aux progrès de la science, par J. G. Heck. Gravé sur pieue sous sa Direction et publié par Engelmann & Compagnie. Paris, London and Mulhouse: Engelman & Compagnie.

► "Rio Colorado" follows a straight southwesterly course from mountainous headwater (labeled there "Color.") to the head of the "Colfe [sic] de Californie", receiving en route three tributaries (not labeled) from the east (presumably the San Juan, Little Colorado, and Bill Williams Rivers). "Gila R" arrives independently at the head of the gulf from the east-northeast.

- 1834 25.2274 **Carte des Républiques Unies du Mexique dressée par J. G. Heck publiée par Engelmann et Comp^{ie} à Paris 1834.** ("Atlas géograph^e astronom^e et hystorique N^o 57." "III Géographie physique et politique Pl. 33.") ("Gravée sous la Direction de l'Auteur".) ("Lithographie de Engelmann et Comp^{ie} à Paris".) [In French.]

In: Atlas géographique, astronomique et historique servant à l'intelligence de l'histoire ancienne, du moyen âge et moderne et à la lecture des Voyages les plus recens. Dressé [sic] d'après les meilleurs matériaux tant français qu'étrangers conformément aux progrès de la science, par J. G. Heck. Gravé sur pieue sous sa Direction et publié par Engelmann & Compagnie. Paris, London and Mulhouse: Engelman & Compagnie.

► "Rio Colorado" follows an arcing course from headwaters, first east-southeasterly then southerly, receiving "R. Nabajoa" (San Juan River) from the east and an unlabeled tributary (Little Colorado River) from the east), then turning southwesterly straight to the head of "Golfe de Californie", receiving en route an unlabeled tributary (Bill Williams River) from the east and an implied significant tributary from the northwest. This latter tributary is a confused inventive mixture, beginning in a headwater area following a southwesterly course (dotted on this long reach) before turning southeastward (with solid line) to join "R. Seeds Keeder" that has a short, dotted-lined upper reach but is a solid line at this confluence, which then continues south-southwesterly and southerly (with dotted line) receiving en route "R. d. I. Marties" (a short tributary from the northeast that has a solid-lined upper reach), finally turning southeastwardly to meet the Colorado (with solid line in the final reach). Alone between the Colorado and the "Seeds Keeder" is the "Rio de las Piramides sufureas", which parallels them, with multiple short tributaries (all solid-lined in this area) but becomes a dotted line without any confluence. Even more peculiarly, the relatively small area between the "Seeds Keeder" and the "pyramids" river is, without any relief, labeled "Montagnes Rocheuses". "Rio Gilo" [sic] reaches the head of the gulf independently from the east-northeast; between the Colorado and the Gila is labeled "Grande Plaine".

See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.

- 1849 25.2373 **Physikalische Karte von Nord-America.** ("Entwerfen u. gezeichnet v. Ph. Weber in Carlsruhe".) ("Gest. v. J. L. v. Baehr in Halle".) Scale 1:39,300,000. [In German.]
- In: Bilder-Atlas zum conversations-Lexikon. Ikonographische encyklopädie der Wissenschaften und Künste. Entworfen und nach den vorzüglichsten Quellen bearbeitet von Johann Georg Heck. Zweite Abtheilung: Geographie. Leipzig: F. A. Brockhaus.*

► Relief is depicted by hachures. The river "Colorado" follows an effectively straight course south and southwest to the head of "Meerb. v. Californien, receiving en route a short tributary (not labeled) from the east, a substantial tributary (not labeled) from the northeast and north, and shortly below that the "Gila" from the east.

Hedin, Sven

- 1925 25.854 **Karta över Grand Canyon i Arizona. [In Swedish.]**
In: Grand Canyon. Stockholm: Albert Bonniers Förlag, 295 [297] pp. Scale 1:500,000. ("Generalist. Litogr. Anstalt Stockholm 1925".)
 This fold-out map is affixed to leaf corresponding to p. [299] in advance of the rear free flyleaf. Base map is composed from U.S. Geological Survey topographic maps, without credit; with overprinting in blue of the course of Colorado River and principal geographical features. Also includes a geological profile with legend in Swedish.
- 1926 25.855 **Sonderkarte des Gran Cañon in Arizona. [In German.]**
In: Gran Cañon : Mein Besuch im amerikanischen Wunderland. Leipzig: F. A. Brockhaus, 245 pp. Scale 1:500,000. ("Druck von F.A. Brockhaus, Leipzig". "Generalist. Litogr. Anstalt Stockholm 1925".)
 Volume is a translation of Hedin (1925). The fold-out map is laid in with cloth strap inside rear cover. Photolithographically reproduced from Hedin (1925), with map title and legend for geological profile in German. Text adds a location sketch map of the Southwest, p. 14, without legend, scale 1:20,000,000.
- 1927 25.856 **Sonderkarte des Gran Cañon in Arizona. [In German.]**
In: Gran Cañon : Mein Besuch im amerikanischen Wunderland. Leipzig: F. A. Brockhaus, 2nd ed., 245 pp. Scale 1:500,000. ("Druck von F.A. Brockhaus, Leipzig". "Generalist. Litogr. Anstalt Stockholm 1925".)
 Translation of Hedin (1925). The fold-out map, unchanged from the 1st German ed. (1926) is laid in with cloth strap inside rear cover. Photolithographically reproduced from Hedin (1925), with map title and legend for geological profile in German. Text adds a location sketch map of the Southwest, p. 14, without legend, scale 1:20,000,000.
- 1928 25.857 **Восьмое чудо света : Большой Каньон [Vos'moe chudo sveta : Bol'shoi Kan'on]. [The eighth wonder of the world : Grand Canyon.]** (С. П. Кублицкой-Пиоттух [S. P. Kublitskoï-Piottukh], translator.) Москва и Ленинград [Moscow and Leningrad]: Государственное Издательство [Gosudarstvennoye Izdatel'stvo] [State Publishing House], 161 pp. [In Russian.]
 Author's name in Cyrillic characters is Свен Хедин. The publisher is most often cited in abbreviated format, "Гос. изд-во" [Gos. izd-vo].
 Translation of Hedin's *Grand Canyon*, although it is not determined here whether the translation was made from the 1925 Swedish ed. or the 1926 German translation. Not seen, thus uncertain whether this ed. includes the **MAP**.

Heffner, J. D., AND Hyder, M. L.

- 1980 24.79 **Marble Canyon 1° × 2° NTMS area, Arizona; hydrogeochemical and stream sediment reconnaissance.** U.S. Department of Energy, Grand Junction Office, Report GJBX-138-81, DPST-79-146-18, 36 pp., scale 1:250,000. [National Topographic Map Series.]
 Includes microfiche and a copy of U.S. Geological Survey, *Miscellaneous Investigations Map I-1003*.

Heiniger, Ernst A.

- 1971 25.858 **Anaglyphenkarte des Grand Canyon; Massstab 1:62 500. [In German.]**
In: Grand Canyon : Natur und Tierwelt in 157 Farbaufnahmen. Bern, Switzerland: Kümmerly and Frey Geographischer Verlag; and München, Bern, and

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Wien: BLV Verlagsgesellschaft, 236, [17] pp. (pagination continues through interleaved unpaginated leaves containing 157 photos); with anaglyphoscope.

Map is between pp. [124]/[125] and is to be viewed with the anaglyphoscope producing a three-dimensional image). Red/green plastic-lensed cardboard anaglyphoscope accompanying the volume has printed on it: "KÜMMERLY & FREY—GRAND CANYON", with image of a thumb printed on right-hand side of the card. Also a card laid in, "Grand Canyon Bildlegenden", 10 × 29.5 cm, which is keyed to the map.

- 1973 25.859 *Grand Canyon du Colorado : suite pour nature et faune en 157 images.* (Pierre Champendal, translator.) Paris: Elsevier Séquoia, 244 [285] pp. (pagination continues through interleaved unpaginated leaves containing 157 photos); with anaglyphoscope. [In French, translated from German.]
 Translation of Heiniger (1971). Red/green plastic-lensed cardboard anaglyphoscope accompanying the volume has printed on it: "KÜMMERLY & FREY—GRAND CANYON", with image of a thumb printed on right-hand side of the card.
 Regarding the **MAP**, see also remarks with Heiniger (1971, **ITEM NO.** 25.858).
- 1975 25.860 *Grand Canyon.* (Ewald Osers, translator.) Washington, D.C., and New York: Robert C. Luce Co., Inc., 240 pp. (pagination continues through interleaved unpaginated leaves containing 157 photos); with anaglyphoscope. [In English, translated from German.]
 Translation of Heiniger (1971). [Red/green plastic-lensed cardboard anaglyphoscope accompanying the volume has printed on it: "KÜMMERLY & FREY—GRAND CANYON", with image of a thumb printed on right-hand side of the card.
 Regarding the **MAP**, see also remarks with Heiniger (1971, **ITEM NO.** 25.858).

Heintzelman, S. P. [Heintzelman, Samuel P.]

WHEAT III:721, V:721 [manuscript map]

- 1853 25.1129 [Report to Major E. D. Townsend, dated Headquarters, Fort Yuma, California, July 15, 1853.]
In: Pierce, Franklin, Indian affairs on the Pacific. Message from the President of the United States, transmitting Report in regard to Indian affairs on the Pacific. February 16, 1857.—Ordered to be printed. *U.S. 34th Congress, 3rd Session, House of Representatives Executive Document 76*, pp. 34-58.
 Includes general remarks concerning operations from Fort Yuma and climatological data, but principally concerning Indigenous peoples of the region.
 Regarding a **MANUSCRIPT MAP**, Heintzelman (p. 52) notes: "In January, 1851, I descended the Colorado in a small boat to meet the schooner *Invincible* sent around to try the mouth of the river with a small supply of provisions. From the notes I took, the sketch of the mouth of the river by Lieutenant Derby [see Derby, 1852, **ITEM NO.** 25.803], topographical engineers, and the notes taken by me on our expedition against the Indians in September, 1852, the accompanying sketch of the river for near 250 miles has been made. It is merely a rude reconnoissance, but sufficiently accurate to give an idea of its course for that distance. No railroad can follow its banks." The map is not published in the Congressional report.
 Wheat (1959, Volume III, pp. 213, 308; Volume V, p. 373) briefly comments on this manuscript map by Heintzelman, which is in the Emory papers at Yale University. Wheat had originally not found the map for examination and credited (p. 308) Dale Morgan for a brief description of the map (p. 213). In Vol. V (1963, p. 373) Wheat notes he had at last seen the map and catalogs it (in square brackets) as "[Map of the Colorado River from the mouth of the Gila to the Gulf of California, signed S. P. Heintzelman Capt. 2 Infy & Bvt. Major Jan. 1851. Manuscript; 10½ by 16⁹/₁₆ inches.]".
 • As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest.

Hemphill, W. R.

- 1956 24.80 **Photogeologic map of the Fredonia NW quadrangle, Mohave county, Arizona.** *U.S. Geological Survey, Miscellaneous Investigations Map I-33, scale 1:24,000.*

Henry, Everett

- 1930 25.2283 **Our United States.** New York: Washington Square Book Shop.
Pictorial map of the United States. Includes a meager depiction of Grand Canyon.

Henry T. Williams [firm]

- 1876 25.2518 **Williams' New Trans-Continental Map of the Pacific R.R. and Routes of Overland Travel to Colorado, Nebraska, The Black Hills, Utah, Idaho, Nevada, Montana, California and the Pacific Coast** Henry T. Williams, Publisher 46 Beekman St. N.Y. ("Entered according to Act of Congress in the year 1876 by H. T. Williams in the office of the Librarian of Congress at Washington.") ("Am. Photo-Litho.Co. N.Y. (Osborne's Process.)")
▶ In the Grand Canyon region the Colorado River is drawn fancifully, with Cataract Creek (not labeled) as a tributary to the Colorado between "Colorado Chiquito R." (Little Colorado River) and "Bright Angel R." (Bright Angel Creek). In the western part of the canyon, "Yampa Cr." is shown as a tributary to Red Lake, which in turn flows into the Colorado River in the "Grand Canon of the Colorado River". "Marble Canon" is shown between the Paria River extending to below the Little Colorado River.
- 1877 25.618 **Williams' New Trans-Continental Map of the Pacific R.R. and Routes of Overland Travel to Colorado, Nebraska, the Black Hills, Utah, Idaho, Nevada, Montana, California and the Pacific Coast** Henry T. Williams, Publisher 46 Beekman St. N.Y. ("Am. Photo-Litho.Co. N.Y. ("Entered according to Act of Congress in the year 1877 by H. T. Williams in the office of the Librarian of Congress at Washington.") ("Am. Photo-Litho.Co. N.Y. (Osborne's Process.)") [Second ed. of this map, emending rail routes.]
▶ Chorographical note same as that for 1876 ed. (ITEM NO. 25.2518).

Henze, Adolf

- 1891 25.2074 **Henze's Erd-Globus im Verhältniss wie 1/12,000,000 zur natürlichen Grösse.** Neustadt-Leipzig: Adolf Henze. [24 gores for a 106-cm globe. See "Section 17" ("Gratis-Beilage zum „Illustrierten Anzeiger für Contor und Bureau.“") ("Ausgeführt in Henze's karto-typographischen Anstalt Neustadt-Leipzig.") [In German.]
▶ The river "Colorado" is shown between "Golf v. Kalifornien" and the confluence of "Green R." and "Grand R.", following an accurately known course; enroute it receives the tributaries "R. San Juan", Little Colorado River (not labeled), Virgin River (not labeled), and "Rio Gila", the confluence of the last at "Arizona City (Yuma)". The area of the Arizona Strip and to the east of the Colorado there is labeled "Painted Desert".

Herbert, Charles E.

- 1885 25.719 **1885 mapa oficial del Estado de Sonora[,] Republica de Mexico[,] levantado y ejecutado de medidas, reconocimientos propios y de otras fuentes fidedignas.** Por el Ingeniero Civil C. E. Herbert. [No imprint]. [In Spanish.]

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Map includes copyright registration notice by Herbert in Washington, D.C. The title panel includes facsimile autograph notation, "Aprobado Luis E Torres. Gobernador de Sonora Hermosillo Octubre de 1884."

► "Rio Colorado" is shown between the U.S.-Mexico boundary and "Golfo de California". Also labeled are "Delta del Rio Colorado", "Montague" (Isla de Montague), and "Puerto Isabel", and from there a road, "camino para Yuma".

Note that this is a variant of the map cited here as Herbert (1885, *ITEM NO.* 25.720), which has title panels in Spanish and English. This map has only the Spanish title panel; in place of the English title panel is an informational box with caption, "Algunos Datos Oficiales sobre el Estado de Sonora." It is not determined here which state may have been published first.

- 1885 25.720 **1885 mapa oficial del Estado de Sonora[,] Republica de Mexico[,] levantado y ejecutado de medidas, reconocimientos propios y de otras fuentes fidedignas. Por el Ingeniero Civil C. E. Herbert. \ Official map of the State of Sonora[,] Republic of Mexico[,] compiled from surveys, reconnoissances and other sources.—1885—by Chas. E. Herbert C.E.** [No imprint]. [Title panels in Spanish and English.]

Map includes copyright registration notice by Herbert in Washington, D.C.] [In case with title, "Official Map of the State of Sonora, Mexico." The Spanish-language title panel includes facsimile autograph notation, "Aprobado Luis E Torres. Gobernador de Sonora Hermosillo Octubre de 1884."

► "Rio Colorado" is shown between the U.S.-Mexico boundary and "Golfo de California". Also labeled are "Delta del Rio Colorado", "Montague" (Isla de Montague), and "Puerto Isabel", and from there a road, "camino para Yuma".

See also the variant cited here as Herbert (1885, *ITEM NO.* 25.719). It is not determined here which state may have been published first.

- 1904 25.722 **1884 1904 mapa oficial del Estado de Sonora[,] Republica de Mexico[,] levantado y ejecutado de medidas, reconocimientos propios y de otras fuentes fidedignas. Por el Ingeniero Civil C. E. Herbert. \ New revised official map of the State of Sonora[,] Republic of Mexico[,] 1884-1904[,] compiled from surveys, reconnoissances and other sources by Chas. E. Herbert C.E.** Nogales, Arizona Territory: Sonora News Company. (Moss Engraving Co., New York.) [Title panels in Spanish and English.]

A colored map effectively a facsimile reprinting of the map by Herbert (1885, *ITEM NO.* 25.720). The Colorado River delta area is unchanged from that map.

- 1920 25.723 **1884 1920 mapa oficial del Estado de Sonora[,] Republica de Mexico[,] levantado y ejecutado de medidas, reconocimientos propios y de otras fuentes fidedignas. Por el Ingeniero Civil C. E. Herbert. \ New revised official map of the State of Sonora[,] Republic of Mexico[,] 1884-1920[,] compiled from surveys, reconnoissances and other sources by Chas. E. Herbert C.E.** Nogales, Arizona: Sonora News Company. [Title panels in Spanish and English.]

A colored map effectively a facsimile reprinting of the map by Herbert (1885, *ITEM NO.* 25.720). The Colorado River delta area is unchanged from that map.

Hereford, Richard

- 1993 24.81 **Map showing surficial geology and geomorphology of the Palisades Creek archeologic area, Grand Canyon National Park, Arizona.** *U.S. Geological Survey, Open-File Report 93-553*, 20 pp., 1 plate (scale 1:2,000).
- 1996 24.82 **Map showing surficial geology and geomorphology of the Palisades Creek area, Grand Canyon National Park, Arizona.** *U.S. Geological Survey, Miscellaneous Investigations Map I-2449*, scale 1:2,000, contour interval 1 m, 1 sheet (scale 1:2,000), text 12 pp.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 2000 24.229 **Map showing Quaternary geology and geomorphology of the Granite Park area, Grand Canyon, Arizona.** *U.S. Geological Survey, Geologic Investigations Series, I-2662*, scale 1:2000.
- 2000 24.230 **Map showing Quaternary geology and geomorphology of the Lees Ferry area, Glen Canyon, Arizona.** *U.S. Geological Survey, Geologic Investigations Series, I-2663*, scale 1:2333.

Hérisson (Géographe) [Hérisson, Eustache]

- 1811 25.1732 **Carte d' l'Amérique Septentrionale & Méridionale, Où se trouvent Les Trois Voyages de Cook et Ceux de Mackenzie, Vancourver et La Pérouse. Dresée par Hérisson, Elève de Bonne, ancien Ingénieur Hydrographe de la Marine. 1811.** ("A Paris chez Basset rue S.^t Jacques N^o 64.") **[In French.]**
▶ "Californie" is separated from "N^e Navarre" by "Mer Vermeille". "R. Colorado" is depicted between the gulf and a mountain range at about 36° N.; it follows a southwesterly course along which it receives "R. Gr. de los" (*sic*, Gila River) from the east, and downstream of that confluence the river bifurcates and reaches the head of the gulf along two independent, converging channels.
- 1820 25.1844 **Carte de l'Amérique Septentrionale et Méridionale, divisée en ses Principaux Etats; pour servir a l'instruction de la Jeunesse, par Hérisson Géographe. 1820. A Paris, chez Jean, rue S^t Jean de Beauvais, N^o 10. [In French.]**
▶ The peninsula, "Vielle Californie", is separated from "Intendance de Sonora" by "G. de Californie ou Mer Vermeille ou de Cortes". "F. Colorado" arrives at the head of the gulf, having followed an essentially straight southwesterly course from the confluence of "R. Zaguanas" and "R. Nabajoa" (San Juan River). Not far

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

downstream from that confluence is the confluence of an unlabeled river from the east, which passes by "Oraybe" and thus is the Little Colorado River. "R. Gila" arrives independently at the head of the gulf from the east.

WHEAT II:371

- 1826 25.1218 **Carte Générale des États-Unis de l'Amérique avec les Plans des principales Villes. par Hérisson Géographe. 1826. A Paris, chez Jean, rue S^t Jean de Beauvais, N^o 10.** ("Gravée par J. B. Tardieu.") [In French.]
 ▶ "Nouvelle Californie" and "Sonora" are separated by "Golfe de Californie". "R. Colorado" is depicted along a mostly straight northeast-southwest course between the head of the gulf and the confluence of "R. Nabajoa" (San Juan River) and "R. Zaguanas". "R. Jaquesila" (Little Colorado River) is a tributary from the east, with likewise "R. Sa Maria" (Bill Williams River). "R. Gila" joins the Colorado just before the head of the gulf.
- 1833 25.1733 **Carte d' l'Amérique Septentrionale & Méridionale, Où se trouvent Les Trois Voyages de Cook et Ceux de Mackenzie, Vancourver et La Pérouse. Parry et Franklin, Dresée par Hérisson, Elève de Bonne, ancien Ingénieur Hydrographe de la Marine. Revue Corrigée & Augmentée ca 1833.** ("A Paris chez Basset rue S^t Jacques N^o 64.") [In French.]
 ▶ "R. Colorado" follows a mostly straight southwesterly course from headwaters to "G. Californie ou Mer Vermeille", receiving en route "R. Gila" from the east-northeast. "R. des Martyres" parallels the Colorado before turning to the southeast to reach the head of the gulf alongside the Colorado.

Heubach, Emil

- 1879 25.620 **New rail road map of the United States and the Dominion of Canada, showing the Chicago, Rock Island and Pacific R. R.[,] the great overland route and short line to the West and South-West.** Chicago: [Chicago, Rock Island and Pacific Railroad], 1 sheet, scale *ca.* 1:5,000,000.
 ▶ Map depicts other rail lines, including the Union Pacific, Central Pacific, and Southern Pacific. In the Grand Canyon region the map depicts the Colorado River in the "Great Cañon", and the "Flax River" (Little Colorado River).

Higgins, Janice M. *see also* Hayden, Janice M.

- 1997 24.790 **Interim geologic map of the White Hills quadrangle, Washington County, Utah.** *Utah Geological Survey, Open-File Report 352*, 2 sheets (scale 1:24,000), text 94 pp.

-

Hinton, Richard J.

- 1878 25.52 **Map of Arizona prepared specifically for R. J. Hinton's hand book of Arizona. Compiled from official maps of military Division of the Pacific, Surveyor General's Office, A. T. & from the notes of Col. W. G. Boyle, Col. J. D. Graham, H. Ehrenberg, Prof. Pumpelly and Lieut. Philip Reade, U.S.A.**
In: Hinton, Richard J., The hand-book to Arizona : its resources, history, towns, mines, ruins and scenery. Amply illustrated. Accompanied with a new map of the territory. San Francisco: Payot, Upham, and Co., and New York: American News Co. ("Lith. Britton, Rey & Co. S.F."). Scale 1 inch = 16 miles.
 ► "Black Cañon", "Boulder Cañon", and "Iceberg Cañon" are labeled on the "Colorado River". Downstream from Black Canyon is labeled "Colorado Cañon". The western portion of Grand Canyon is labeled "Mouth of the Grand Cañon". The confluence of "Colorado Chiquito Cañon" is properly shown at the Colorado's westward turn around the "Buckskin or Kaibab Plateau", but "Marble Cañon" is marked on that first westward stretch. "Mormon Trail" is marked through what is Lees Ferry (labeled "Ferry") and through "House Rock Valley". At Iceberg Canyon is labeled "Virgin Cañon"

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Crossing". "Present Head of Steamboat Navigation" is marked at "Hardyville". The Colorado north of "Yuma City" is labeled "Canebreak Canon".

- 1954 25.863 *The hand-book to Arizona : its resources, history, towns, mines, ruins and scenery.* Tucson: Arizona Silhouettes, 431, ci, 43 pp.

- 2012 11.13946 **Preliminary geologic map of the Ireteba Peaks quadrangle, Clark County, Nevada.** Nevada Bureau of Mines and Geology, *Open-File Report 2012-09*, 1 sheet, scale 1:24,000.
Supersedes *Open-File Report 09-04* (Faulds et al., 2009, ITEM NO. 11.13945).

Hinz, Nicholas H.; Green, Heather L.; AND Faulds, James E.

- 2009 11.13945 **Preliminary geologic map of the west half of the Ireteba Peaks quadrangle, Clark County, Nevada.** Nevada Bureau of Mines and Geology, *Open-File Report 09-04*, 1 sheet, scale 1:24,000.
Superseded by *Open-File Report 2012-09* (Hinz et al., 2012, ITEM NO. 11.13946).

Hirose, Hakaki [広瀬はかき]

- 1862 25.1404 図 新路航海環 [read right to left] [Kankai kōro shinzu] [New map of sea routes]. [In Japanese.]

World map. Title displayed as printed on map; Library of Congress provides "other title", 環海航路新圖, which, besides reading left to right, differs somewhat in orthography.

Library of Congress gives publication data (with ellipsis and square brackets thus): "Kyōto : Katsumura Jiemon ... [and 2 others]; Edo : Suharaya Mohē ; Bunkyū 2 [1862]", with note, "Kotenseki sōgō mokuroku, 2013-09-11 (環海航路新図 (かんかいこうろしんず), 地図 1 枚; 著者: 広瀬包章; 出版事項: 須原屋茂兵衛 <江> 他 3, 文久 2)." (illustrated at <https://www.loc.gov/item/2013588000/>).

► On the map, "カリフォルニア" [California] (similar to the modern orthography, カリフォルニア) is separated from the mainland by "東紅海" [East Red Sea] [*i.e.*, Gulf of California]. Rivers on the continents are not labeled, but the Colorado River is shown reaching the head of the gulf, with a wildly imaginative drainage basin reaching far into the continent. In addition, the map seems to portray the routes of railroads in the United States, including in the Southwest the (proposed) 32nd parallel route.

Hitchcock, Charles H.

- 1882 11.17676 **Gray's geological map of the United States. By Prof. Charles H. Hitchcock, Ph. D.**
("Copyright 1882 by O. W. Gray & Son.")

Holdredge, Sterling M.

- WHEAT V:1123 [maps; with illustrations facing pp. 129, 136, 137
(Arizona map shown on page facing p. 129)]
- 1865 25.1107 **[Map of Arizona.]**
In: State, territorial and ocean guide book of the Pacific: Containing the time and distance tables, rates, fares and freight tariff, of all steamship, steamboat, railway, stage and express lines, on or connecting with the Pacific Coast and interior, including California, Oregon, Nevada, Washington, Idaho, Utah, New Mexico, Arizona, British Columbia, Vancouver's Island, Central and South America, and Mexico. Also, rates of postage to all parts of the world; time of arrival and departure of mails, etc. To which is added nine large and accurate maps, showing principal towns, routes of communication, etc. San Francisco: Sterling M. Holdredge, 160, xviii pp., 9 maps.
 Wrapper title: **State, territorial and ocean guide book of the Pacific.**
 The lower-case Roman numeral pages are advertisements, interleaved through the volume.
 ► On the Arizona map, "Colorado River" is depicted between "Gulf of California" and the Utah-Arizona boundary. It is peculiarly drawn in the Grand Canyon region between the confluences of "Rio Virgin" and "Colorado Chiquito", where in addition to "Cataract Cr." shown as a tributary to the Little Colorado there is a peculiar, unlabeled tributary headed southwest from Utah before turning southeastward to a confluence with the Colorado between the Little Colorado and "Diamond Riv", which is reminiscent of other maps that show the Green River reaching the Colorado in this area; and if so, then that part of the Colorado above that confluence would be the Grand River, to which the Little Colorado is a tributary.
- WHEAT V:1123 [maps; Wheat mentions the 1866 ed. as well as the 1865 ed.,
in which the maps are the same]
- 1866 25.1108 *State, territorial and ocean guide book of the Pacific, containing the time and distance tables, rates, fares and freight tariff, of all steamship, steamboat, railway, stage and express lines, on or connecting with the Pacific Coast and interior, including California, Oregon, Nevada, Washington, Idaho, Utah, New Mexico, Arizona, British Columbia, Vancouver's and Sandwich Islands, Central and South America, Mexico. Also, rates of postage to all parts of the world; time of arrival and departure of mails, etc. To which are added nine large and reliable maps, showing principal towns, routes of communication, etc.* San Francisco: Sterling M. Holdredge, XIII, 182, xlviii pp., 9 maps.
 Wrapper title: *State, territorial and ocean guide book of the Pacific.*
 The lower-case Roman numeral pages are advertisements, interleaved through the volume.
 Note p. V, notice of "A New **Map** of Arizona" (*i.e.*, Gird, 1865, **ITEM NO.** 25.43) that is "now in the hands of the lithographer", with the appended remark, "The map of Arizona accompanying the 'Guide Book' is compiled from Mr. Gird's map, and was pronounced by General Mason as correct in every particular"

Holland, Robert F.

- 2016 10.88 **Dr. Bob's map of Colorado River in Grand Canyon, Lee's Ferry to Separation Rapid, Coconino and Mojave [sic] Counties, Arizona.** [Auburn, California?]: [no imprint], 68 pp. (66 maps). ("Photobase from 2013 USDA NAIP county mosaics. Topography from USGS 24k series, various dates. Shaded relief from 2013 USGS 1/3 arc-second DEMs, calculated for noon on the summer solstice. UTM 12 NAD 27 coordinates in blue. Cartography by Dr. Bob Copyright © 2016 Robert F. Holland, Ph. D.")
 Spiral-bound, 11 × 17-inch format, on water-resistant paper.

Homberger, Eric

- 1995 25.867 *The Penguin historical atlas of North America*. New York: Penguin Books (published simultaneously by Viking), 144 pp.
See pp. 39, 88.

NOTE: **MAP** on p. 39, showing Spanish explorations in the Southwest, shows "Coronado's route with Tovar" passing south of Grand Canyon and extending to the Colorado River near the Toroweap area. Grand Canyon mentioned in passing, p. 88, on which page is a Holmes illustration at Point Sublime, taken from Dutton's (1882) atlas, but without noting it shows the Grand Canyon; it is labeled only, "A lithograph dated c. 1860 [*sic*]" (credits, p. 144, simply acknowledge U.S. Geological Survey).

Hometown Map and Guide Publication and Graphics Co.

- 1920 25.1848 **Road and Mine Map of Mohave County Arizona : Showing the highways and other public and private roads, together with the more important mining properties and ranches. Scale—1 inch equals 6 miles July 1920 Compiled by E. Ross Housholder Mining Engineer Kingman, Arizona.**
 Title cartouche on map is cited. Recto map with border text, with caption, **Mine and Road Map Mohave County, Arizona.**
 Verso displays advertisements mostly for Kingman businesses; also showing boxed title, **Road and Mine Map of Mohave County, Arizona : Showing the more important**

mines, ranches, highways, railroads, towns, mountain ranges, valleys, canyons, ferries, springs, Indian and forest reservations, etc.

Housse, E.

1850 25.703 **Carte de la Nouvelle Californie publiée par le Mineur, Compagnie Franco-Californienne des Mines d'or, 31, Boulevard Bonne-Nouvelle, Paris. [In French.]**

Caption title given. Key panel also indicates: **Nouvelle Californie Dressée par E. Housse. Paris. 1850.**

► "Rio Colorado" is shown between "Golfe de Californie" and headwaters that are in fact the Green River, although labeled "Rio Colorado"; the Grand River is not labeled. The Colorado is drawn most generally, with an erratically sinuous line throughout. The Little Colorado River does not appear at all. The Virgin River is shown as a short stream, not labeled. Also shown along the Colorado in the greater Grand Canyon region are symbols that the key identifies as "Villages (Pueblo)": "Conception", at the confluence of the Colorado with "Rio de las Navajoas" (San Juan River); and "Salsipuedes" some 25 "Lieues" (leagues) farther west.

NOTE: Although there are overall differences on the map, the Colorado is drawn in a fashion remarkably similar to that shown on the map that accompanies Hypolite Ferry's (1850, *ITEM NO.* 25.819) *Carte de la Nouvelle Californie*.

WHEAT III:676

1850 25.1084 **Carte de la Haute Californie ou Nouvelle Californie Dressée par E. Housse. Paris. 1850.** ("Lithographie de Bénard et Cie. 2 Place de Caire, Paris.") **[In French.]**

Map caption: **Supplément de l'Écho du Sacramento Journal mensuel des intérêts des associés de la Compagnie des Mines d'or de la Californie.**

► "Rio Colorado" is depicted rather erratically between "Golfe de Californie" and unlabeled headwaters. The only tributaries shown in the Grand Canyon region are "Rio de los Navajoas" (San Juan River) and an equally erratic, unlabeled tributary from the north that is the Virgin River; the Little Colorado River is absent. "Rio Gila" meets the Colorado at the head of the gulf.

Houzé, A. [Houzé, Antoine Philippe]

1844 25.2031 **Amérique Septentrionale, en 1840. Dressée sous la Direction de A. Houzé.** ("Atlas Historique et Géog^{que} (Amérique Septentrionale)." "Carte I.") **[In French.]**

In: Atlas universel historique et géographique composé de cent une cartes, donnant les différentes divisions et modifications territoriales des diverses nations aux principales époques de leur histoire. Avec une notice sur tous les faits importants, et l'indication des lieux où ils se sont passés; desinté à faciliter la lecture et l'intelligence de tous les ouvrages historiques, et rédigé d'après les meilleures sources par A. Houzé. Paris: Chez P. Duménil, Éditeur.

► "R. Colorado" is depicted following an essentially straight southwesterly course between the head of "Mer Vermeille" and headwaters, receiving enroute three tributaries from the east (not labeled, which presumably are the San Juan, Little Colorado, and Bill Williams Rivers). "R. Gilo" (*sic*, Gila River) follows a westward course, arriving independently at the head of the gulf. Paralleling the Colorado to its west is "R. Amarillo", which turns south then eastward to arrive independently at the head of the gulf.

Hovey, H. C. [Hovey, Horace Carter]

1892 25.1849 On the rim and in the depths of the Grand Canyon. *Scientific American*, 67(6) (August 6): 87-89.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

See **MAP**, p. 88, **Map of the Grand Cañon Region of the Colorado River, in Arizona.** ("American Bank Note Co. New York") ("42917".)

► Usually, maps within periodicals are not cited in this Cartobibliography, but this is cited for its interesting historical inclusions. The entire Grand Canyon region is displayed, with the route of the "Atlantic and Pacific Rail Road" running across the bottom of the map. Wagon routes and trails are marked: from Flagstaff, "Stage Route" follows around the eastern side of the "San Francisco Peaks" and reaches "Hance's" on the eastern end of the South Rim of Grand Canyon; and "Moqui Trail" departs from this route to cross "Little Colorado", at which point "Mormon Road" leaves for "Lee's Ferry" (with "Navajo Trail" also reaching the ferry, north of "Marble Cañon", although no trail is shown on the western side of the river. From "Williams" a road leaves northward to the canyon, dividing into "Rowe's Route" that reaches the canyon opposite "Bright Angel Cr.", and "Bass' Route" that parallels "Cataract Creek" and is shown going all the way to its confluence with the Colorado. At "Peach Springs" a road is shown heading north-northeastward to the Colorado; even though Diamond Creek is depicted arriving from the east and east-northeast it is not labeled.

Map is the frontispiece to Volume II.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “Rio Colorado” is drawn superficially as a single line between “Gulf of California” and headwater east of “Salt Lake City” in “Utah or Deseret”, with only one minor tributary (not labeled) from the northeast in southern Utah, and “Gila River” near the gulf.

Howell, Edwin E. ⁵⁹

- NO DATE 24.309 **The Grand Cañon of the Colorado of the West and the cliffs of southern Utah.** [No place]: U.S. Geological Survey, 3-dimensional map, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles (1:126,720). [1875; with different states at later dates.]
 The original, commercially produced model, measuring 6 feet, 6 inches × 6 feet 7 inches [see Merrill, George P., 1889, Report on the Department of Lithology and Physical Geology, in *Annual Report of the Board of Regents of the Smithsonian Institution for the year ending June 30, 1886, Part II*, Government Printing Office (1889)], indicated an imprint of the Geographical and Geological Survey of the Rocky Mountain Region, which is the Powell Survey of general parlance. A model was first exhibited at the Centennial Exposition in Philadelphia, 1876, and commercially produced thereafter. A photograph of the model, which the Library of Congress attributes date as “191-”, denotes “U.S. Geological Survey J. W. Powell, Director”; Powell was director during 1881-1894 (Geography and Map Division, call no. “G4332.G7 191-.G4 TIL”; digital view at <https://www.loc.gov/resource/g4332g.np000097/>). A model was also exhibited at the World’s Industrial and Cotton Centennial Exposition, New Orleans, 1884-1885 [see U.S. Bureau of Education, 1886, *Special report by the Bureau of Education. Educational exhibits and conventions at the World’s Industrial and Cotton Centennial Exposition, New Orleans, 1884-’85. Part I*. U.S. Government Printing Office]. See also McCalmont, Melanie Schleeter, *A wilderness of rocks : the impact of relief models on data science* (FriesenPress, Victoria, British Columbia, 2015).
 A photograph of the model, which the Library of Congress attributes date as “191-”, denotes “U.S. Geological Survey J. W. Powell, Director”; Powell was director during 1881-1894 (Geography and Map Division, call no. “G4332.G7 191-.G4 TIL”; digital view at <https://www.loc.gov/resource/g4332g.np000097/>). (The LOC’s 22 × 22 cm black-and-white [photograph](#) of this map is shown in the front matter herein.)
- 1931 24.783 **Grand Canyon of the Colorado and the cliffs of southern Utah.** [No place]: U.S. Geological Survey, 3-dimensional map, topography with colored time-stratigraphic outcrop markings, vertical and horizontal scales 1 inch = 2 miles (1:126,720). (“Modelled by E. E. Howell from maps of the United States Geological and Geographical Survey [*sic*] by J. W. Powell; revised by F. T. Thwaites and Fred Wilhelm in 1931 from geological maps of Arizona 1924 and Utah 1918”.)
 For original see Howell (no date, **ITEM NO.** 24.309).
-

⁵⁹ A biographically informative obituary for Edwin Eugene Howell (1845-1911), though it does not mention the Grand Canyon map, was written by G. C. Curtis, “Howell’s Relief Maps and the Naturalistic Land Model”, *Science*, new series, 34(863) (July 14, 1911): 45-47. Grove Karl Gilbert had also recently written an obituary notice that took brief note of his work for the Wheeler and Powell Surveys (“Edwin E. Howell”, *Science*, new series, 33(854) (May 12, 1911): 720-721.

- 1803 25.1877 **[Carta geográfica general del reino de Nueva España.] [In Spanish.]**
MANUSCRIPT, Real Academia de la Historia, Madrid; digitized online at <https://bibliotecadigital.rah.es/es/consulta/registro.do?id=12462>. [Copy by Juan Segura, 1804?]
• As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest. This is a copy of Humboldt's manuscript map, which copy was made apparently by Juan Segura of Guanajuato while Humboldt was working in Mexico.
▶ This map portrays the name, "Puerto de Bucareli", labeled at the confluence of unlabeled rivers, but obviously the Colorado and Little Colorado Rivers. (The Colorado is not labeled anywhere on the map; upstream from the puerto is the confluence of "Rio Saguananas" and "Rio de los Animas", as shown here.)

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Another copy, in the University of Texas at Arlington, is titled “Carta Geografica Gral del Reyno N.E. Sacada de la Original hecha en 1803 por el Sor. Baron de Humboldt. Y Dedicada al Sor. Conde de la Valenciana”, which “is possibly the earliest surviving version of Alexander von Humboldt’s personal manuscript map of New Spain”.⁶⁰

[See details from this map in the front matter herein.](#)

- 1804 25.627 **General Chart of the Kingdom of New Spain Betⁿ parallels of 16 & 38° N. From materials in Mexico at commencement of year 1804. by Humboldt.**
MANUSCRIPT, Library of Congress, map collection, call number G4410 1804.H8, 1 sheet; digitized online at <https://www.loc.gov/item/2001622416/>.
 • As a manuscript this would not be cited in this Cartobibliography, but it is important to the history of the Grand Canyon and the Southwest. This is a copy of Humboldt’s manuscript map, which copy was made (or ordered made) by Albert Gallatin, then Secretary of the Treasury under President Thomas Jefferson when Humboldt passed through Washington, D.C., en route to Europe after his Central American tour. The copy now in the Library of Congress seems to be a separate copy probably made by Joseph Goldsborough Bruff later in the 19th century, the Gallatin copy apparently no longer extant.
 ► This map portrays the name, “Puerto de Bucarelli” [*sic*], labeled at the confluence of Rio Colorado and Rio Jaquesita (Little Colorado River). *Puerto de Bucareli* is the earliest known non-Indigenous name for the canyon, given by Padre Francisco Garcés in 1776 during his visit to the Havasupai, honoring the Viceroy of New Spain, Antonio María Bucareli y Ursúa. The name was noted in contemporary correspondence, but Garcés’s journal was not published until 1900 (see Elliott Coues, *On the trail of a Spanish pioneer* [Francis P. Harper, New York, 1900]). Also, a river without defined headwater or confluence runs parallel to and west of the Colorado between the San Juan and Little Colorado, labeled “Rio de las Piramides Sulfureas” (see [remarks](#) on the “river of the sulfurous pyramids” in the Notes for Section 2).
 Humboldt did not publish his map until 1808, and redrawn versions were published in 1810 by two London publishers and in the U.S. by Zebulon Pike (1810, **ITEM NO. 25.560**, copied from the Gallatin copy of Humboldt’s manuscript map without credit). Note that the woodcut map by Manuel Villavicencio (1781, **ITEM NO. 25.510**), which, with credit to Padres Garcés and Font in 1777, likewise includes “Puerto de Bucareli” and is the first printed map to include a name for the Grand Canyon.
[See details from Humboldt’s manuscript map in the front matter herein.](#)
- 1808 25.2104 **Carte Générale du Royaume de la Nouvelle Espagne depuis la Parallele de 16° jusqu’au Parellele de 38° (Latitude Nord) Dressée Sur des Observations Astronomiques et sur l’ensemble des Matériaux qui existoient à Mexico, au commencement l’anée 1804. Par Alexandre de Humboldt.** 2 sheets. [**In French.**]
In: Atlas géographique et physique du Royaume de la Nouvelle-Espagne, fondé sur des observations astronomiques, des mesures trigonométriques et des nivellemens barométriques. Paris: Chez Fr. Schoell, rue des Fossés-S.-Germain-l’Auxerrois, N^o. 29; et a Tübingue, chez J. G. Cotta, libraire.
 In this edition, author given on title-page as “Al. de Humboldt”. It is the scarcer and true first edition (in contrast to the 1811 ed. often cited as the first). The 1808 atlas is digitized online at Universidad Complutense Madrid, <https://patrimoniodigital.ucm.es/s/patrimonio/item/83651> (last accessed 9 December

[2]: WHEAT I:275*, II:305* [which refers back to I:275*] (“Carte du Mexique”)

- 1811 25.547 **Carte Générale du Royaume de la Nouvelle Espagne depuis la Parallele de 16° jusqu’au Parellele de 38° (Latitude Nord) Dressée Sur des Observations Astronomiques et sur l’ensemble des Matériaux qui existoient à Mexico, au commencement l’anée 1804. Par Alexandre de Humboldt.** (“L^s. Aubert pere Scripsit.”.) 2 sheets. [In French.]
In: Atlas géographique et physique du Royaume de la Nouvelle-Espagne, fondé sur des observations astronomiques, des mesures trigonométriques et des nivellemens barométriques. Paris: Chez F. Schoell.

Often misattributed as the first edition, for which see the even scarcer 1808 ed., which this replicates with the variation of imprint. One map on two double-folio plates, which depict northern and southern halves. The bottom-left of the southern-half sheet notes: “Dessiné à Mexico par l’Auteur en 1804, perfectionné par le même, par MM. Friesen, Oltmanns et Thuilier 1809.”; and in the lower-right: “Gravé par Barriere—et l’écriture par L. Aubert pere, à Paris.”

In this edition, author given on title-page as “Al. de Humboldt”. This folio atlas complemented the *Political Essay* on New Spain that had been published in sections during 1808-1811 (see Humboldt, 1808, [ITEM NO. 2.21363](#) in Volume 1/Part B of [THE GRAND CANON](#)); the original editions are in French. The first English translation made by John Black, 1811; German edition, 1809-1814; Spanish edition, 1822; and numerous others thereafter.

► “Vieja California” is separated from “Intendencia de Sonora” by “Golfe de Californie ou Mar de Cortes (Mer Vermeille)”. “Rio Colorado” is depicted following a generally uniform southwesterly course from the confluence of “Rio Zaguanañas” and “Rio Nabajoa” (San Juan River) to the head of “Mer de Cortes”. *Of note:* On the northern half (specifically, the northwestern quadrant), the confluence of Rio Colorado and Rio Jaquesila is marked, “Puerto de Bucarelli” (*sic*, Puerto de Bucareli). It is this map that is occasionally mis-cited as the first to portray this name for the Grand Canyon (see instead Manuel Villavicencio, 1781, [ITEM NO. 25.510](#)). Also on this map is the first appearance of a disjointed river to the west of the Rio Colorado, paralleling it between the confluences of the Nabajoa and Jaquesila, which is labeled “R. de las Pyramides Sulfureas” [see [remarks](#) on the “river of the sulfurous pyramids” in the Notes for Section 2], as well as another disjointed river west of and paralleling the lower Colorado, here somewhat separated by mountains, “R. de los Martires”. What is

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

further significant in this map and its contemporaries is that it publishes the geography of the Domínguez-Escalante expedition of 1776, before known only in manuscript by the cartographer Miera y Pacheco as redrawn by others.

See also “*Carte du Mexique et des Pays Limitrophes Situés au Nord et à l’Est, Dressée d’après la Grande Carte de la Nouvelle-Espagne de M^r. A. de Humboldt, et d’autres Matériaux, par J. B. Poirson. 1811.*” The bottom-left of the sheet notes, “Gravé par Barriere”; bottom-right notes, “et l’écriture. [*large space*] par L. Aubert.”

► This broader view of southern North America is less detailed in the Southwest and does not label “Puerto de Bucarelli” at the confluence of “R. Jaquesila. “Vieja California” is separated from “Intendencia de Sonora” by “Mer de Cortes”. “Rio Colorado” is depicted following a generally uniform southwesterly course from the confluence of “Rio Zaguuanas” and “R. Nabajoa” (San Juan River) to the head of the gulf.

NOTE: This second map also appears at the end of Volume 1 of Humboldt’s (1811) *Essai politique sur le royaume de la nouvelle Espagne* (Paris: Chez F. Schoell).

[See remarks concerning the 1808 and 1811 editions with Figure 18 in the Introduction herein](#) (INTRODUCTION p. 57).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Huntoon, Peter W.; Billingsley, George H., Jr.; Breed, William J.; Sears, J. W.; Ford, Trevor D.; Clark, Malcolm D.; Babcock, R. S.; Brown, E. H.; et al.

- 1976 24.93 **Geologic map of the Grand Canyon National Park, Arizona.** Grand Canyon Natural History Association, and Museum of Northern Arizona, 1 sheet, scale 1:62,500.
NOTE: Map embraces the limits of the national park prior to the Grand Canyon National Park Enlargement Act (88 Stat. 2089). Later revisions of this map note as “eastern Grand Canyon National Park”. This and other eds. is the so-called “Blue Dragon” map.⁶¹
 See also Muir Way (firm) (no date, *ITEM NO.* 24.852), a print-on-demand fine art product with “Digital Elevation Data with shaded relief applied” to create a 3D appearance.
- 1980 24.784 **Geologic map of the eastern part of the Grand Canyon National Park, Arizona.** Grand Canyon Natural History Association, and Museum of Northern Arizona, 1 sheet, scale 1:62,500. [2nd ed. of this map.]
 This and other eds. is the so-called “Blue Dragon” map. This ed. also reproduced in smaller facsimiles; see [2024], *ITEM NO.* 24.902.
- 1986 24.785 **Geologic map of the eastern part of the Grand Canyon National Park, Arizona.** Grand Canyon Natural History Association, and Museum of Northern Arizona, 1 sheet, scale 1:62,500. [3rd ed. of this map.]
 This and other eds. is the so-called “Blue Dragon” map.
- [2024] 24.902 **Geologic map of the eastern part of the Grand Canyon National Park, Arizona.** Grand Canyon, Arizona: Grand Canyon Association, 1 sheet.
 Facsimile of 1980 ed. (*ITEM NO.* 24.784), reproduced—not separately dated—by Museum of Northern Arizona as a poster in two sizes, 24 × 16 inches or 36 × 24 inches (original measures 60 × 42 inches); commemorated by a special exhibit, “The Grand Canyon Dragon Map”, about the making of the map, on display at the museum 25 May 2024 through January 2025. Reproduction on heavy stock shows scale but faithfully reproduces the “1:62,500” indicator, which of course is not correct for these facsimiles. This and other eds. is the so-called “Blue Dragon” map.
 (See also an article by Wayne Ranney, “Grand Canyon’s ‘blue dragon’ rises again”, *The Ol’ Pioneer* (Grand Canyon Historical Society), 35(3) (Summer): 6-7.)

Huntoon, Peter W.; Billingsley, George H.; Sears, James W.; Ilg, Bradley R.; Karlstrom, Karl E.; Williams, Michael L.; Hawkins, David; Breed, William J.; Ford, Trevor D.; Clark, Malcome D. [*sic*, Clark, Malcolm D.]; Babcock, R. Scott; AND Brown, Edwin H.

- 1996 24.94 **Geologic map of the eastern part of the Grand Canyon National Park, Arizona.** Grand Canyon, Arizona: Grand Canyon Association, 1 sheet, scale 1:62,500. [4th ed. of this map.]
 This and other eds. is the so-called “Blue Dragon” map.

⁶¹ The “blue dragon” map takes that informal name from the colorful appearance of the Grand Canyon’s geology as displayed thereon. It is also the “best-selling geologic map in the United States (over 100,000 copies sold in its approximate 30-year existence)” (Wayne Ranney, “Grand Canyon’s ‘blue dragon’ rises again”, *The Ol’ Pioneer* (Grand Canyon Historical Society), 35(3) (Summer 2024): 6-7). The original edition (1976) embraced the old boundaries of the Grand Canyon National Park; after the enlargement of the park “Eastern” was added to the title.

Hutawa, Julius

- WHEAT III:547
- 1847 25.1304 **Map of Mexico[,] New Mexico, California & Oregon Compiled for Chambers & Knapp from the latest authorities and revised and corrected by Officers of the U.S. Army, engaged in the various expeditions against Mexico, and Lith^o expressly for the Missouri Republican, by Jul^s Hutawa Lithographic Estbl^t Second St N 45 St. Louis, Mo.** ("Supplement to the Missouri Republican Oct. 1st 1847 St^t Louis, Mo".)
- ▶ "Lower California" is separated from "Sonora" and "Sinaloa" by "Gulf of California". "Rio Colorado" is shown between the head of the gulf and headwater rivers, the only one of which labeled is "Green R." After receiving two tributaries (not labeled), one of them being the Grand River, the Colorado turns sharply to the south and follows a mostly south-southeastward course to the confluence of a river from the east (not labeled; Bill Williams River?, although depicted as heading near the pueblo of Zuni) before turning southwestward directly to the gulf. "R. Nabajoa" (San Juan River) and "R. Jaquesila" (Little Colorado River" are shown as tributaries from the east. At the confluence of R. Jaquesila is the label "Puerto Bucarelllo" (Puerto de Bucareli). "Rio Virgen" is shown as a disjointed stream without definite headwater or confluence, and a stream (not labeled) heading at "Vegas" (Las Vegas Wash) is shown on an eastward course before turning north toward the Rio Virgen and for a while flowing parallel to it. Both of these latter streams are a considerable distance from the Colorado. Between them and the Colorado is another short, disjointed stream on a northeast-southwest course, likewise without definite headwater or confluence. "Rio Gila" is a tributary from the east some distance north of the head of the gulf.

- WHEAT III:621 [with illustration facing p. 181]
- 1849 25.734 **Map and profile sections showing the railroads of the United States, the several projected Railways to the Pacific, and their connections, exhibiting the lines of the States, and the natural features of the Cuountry [sic], from the Mississippi to the Pacific. From the latest official authorities, furnished from the Office of the Topographical Bureau at Washington. Drawn and Lithograhped [sic] by Julius Hutawa, to accompany J. Loughborough^s project for a Pacific Railway Laid before the St. Louis Convention Octth [sic] 15 1849. [No imprint.]**
▶ "Rio Colorado" is shown very generally between "California Gulf" and the confluence of "Green R." and "Grand R."
- WHEAT III:809
- 1854 25.718 **Map of the United States shewing the principal steamboat routes and projected railroads connecting with St. Louis. Compiled for the Missouri Republican Jan^y 1854. Jul^s Hutawa Lith^t Second St. 49 bet. Pine & Olive Sts. St. Louis Mo.**
▶ "Rio Colorado" is drawn generally between the head of the Gulf of California (not labeled) and the confluence of "Green R." and a river (not labeled; presumably the Grand). "Virgin R." is shown as a tributary; "Mohave R." as a tributary from the west at the upper end of the lower Colorado River region; and an unlabeled tributary comes from the east to the Colorado between the Mohave and "Gila R." South of the Colorado is labeled "Aubreys Route", with the notation, "Sandy Hills on each side".
- WHEAT III:562
- 1863 25.715 **Map of Mexico & California Compiled from the latest authorities by Jul^s Hutawa Lith^t. Second St. 45 St. Louis, Mo. 2nd Edition 1863. St. Louis, Missouri: Jul^s Hutawa.**
A reissue of the 1848 2nd ed. The date "1863." seems to have been stamped on the copy seen.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

► “Rio Colorado” is drawn on a straight course between the head of the Gulf of California (not labeled) and “R. Jaquesila” (Little Colorado River). At the confluence of the Colorado and Jaquesila is the label “Puerto Bucareli” (Puerto de Bucareli). “Rio Virgen” is shown flowing from the northeast, then turning westward to “Vegas”, where it ends.

NOTE: The 1863 version is mentioned with **WHEAT III:562** (which is the 1848 2nd ed., see **ITEM NO.** 25.1836). A copy seen by Spamer from the Beinecke Library at Yale varies even from that description in that although it displays the “1863” overprint it lacks the “New Mexico” overprint mentioned by Wheat (which has been seen by Spamer from another copy at Baylor University as “NEW MEXICO” [*sic*]). Neither of those copies seen lacks the St. Louis address that is noted by Wheat as having been “imperfectly erased from the original plate”. The political boundaries of the Beinecke map are significantly different as well, retaining the pre-New Mexico delineation. Thus, there are variants even of the 1863 release.

- 1817 25.1199 **North America.** (WHEAT II:319 [with 1814 date]) ("N. R. Hewitt, Sc.10 Broad St^{rt}. Bloomsbrd. London.") ("Drawn and Engraved for Thomsons New General Atlas 1814.")
In: A new general atlas, consisting of a series of geographical designs, on various projections, exhibiting the form and component parts of the globe; and a collection of maps and charts, delineating the natural and political divisions of the empires, kingdoms, and states in the world. Constructed from the best systematic works, and the most authentic voyages and travels. With a memoir of the progress of geography, a summary of physical geography, and a consulting index to facilitate the finding out of places. Edinburgh: Printed by George Ramsay and Co. for John Thomson and Co., Edinburgh; Baldwin, Cradock, and Joy, London; and John Cumming, Dublin.
 The 1817 ed. is the first ed. of this completed atlas.
 ► "California" and "New Navarra" are separated by "Gulf of California."
 "Colorado River" is depicted roughly on a northeast-southwest course to the head of the gulf. A large river system (not labeled; on other contemporary maps variously as Gila or Blue rivers) is depicted arriving at the head of the gulf independently of the Colorado. The Colorado and this more prominent, unlabeled river have headwaters in common.

- 1817 25.1200 **Spanish North America.** (WHEAT II:320 [with 1814 date]) ("Drawn and Engraved for Thomsons New General Atlas 1814.")
In: A new general atlas, consisting of a series of geographical designs, on various projections, exhibiting the form and component parts of the globe; and a collection of maps and charts, delineating the natural and political divisions of the empires, kingdoms, and states in the world. Constructed from the best systematic works, and the most authentic voyages and travels. With a memoir of the progress of geography, a summary of physical geography, and a consulting index to facilitate the finding out of places. Edinburgh: Printed by George Ramsay and Co. for John Thomson and Co., Edinburgh; Baldwin, Cradock, and Joy, London; and John Cumming, Dublin.
 The 1817 ed. is the first ed. of this completed atlas.
 ► This map is adapted from Humboldt and Pike. The Colorado River region is decidedly different from the portrayal on the "North America" map in this atlas (ITEM NO. 25.1199). "California" is separated from "Sonora" by "Gulf of California". "Colorado R." is portrayed between the head of the gulf and the confluence of "R. Nabajoa" (San Juan River) and "R. Zaguanaas". At the confluence of "R. Jasquesila" is the label "Puerto de Bucarelli" (Puerto de Bucareli). "R. Gila is a tributary from the east directly to the northeastern part of the gulf.

Griffing Johnson in the Clerks Office of the District Court for the Southern District of New York.")
 ▶ "River Colorado" is delineated on an effectively straight southwesterly course between "Gulf of California" and headwater that must be the Green Green (not labeled), receiving en route the tributaries "Uintah R" from the west, "Grand R." from the northeast, an unlabeled tributary from the east, "Sevier R. from the northwest, "San Juan R." from the east, "R. Jaquesila" (Little Colorado River) from the east, two unlabeled tributaries from the north generally, an unlabeled tributary (Bill Williams River, probably) from the east, and "R. Gila" from the east.
- 1854 25.1536 **Colton's Illustrated & Embellished Steel Plate Map of the World on Mercator's Projection, Compiled from the latest & most Authentic Sources. Exhibiting the recent Arctic and Antarctic Discoveries & Explorations. Compiled, Drawn & Engraved by D. G. Johnson, Published by J. H. Colton, N° 86 Cedar St New York, 1854.** ("Entered according to Act of

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Congress in the year 1848 by J. H. Colton in the Clerks Office of the District Court for the Southern District of New York.”)

► “Rio Colorado” is depicted between the confluence of “Green R.” and “Grand R.” and the head of “Gulf of California” that separates “Old California” from “Sonora”. It receives “R. St. John” (San Juan River) from the east, “Red R.” (Little Colorado River) from the east-southeast, “R. Virgin” from the north, a river (not labeled) from the northwest (presumably the supposed course of the Mohave River), a river (not labeled) from the northeast (Bill Williams River), and “R. Gila” from the east-northeast.

- 1859 25.576 **Johnson’s new illustrated and embellished county map of the republics of North America with the adjacent islands and countries, compiled drawn and engraved from the latest land and coast surveys, British Admiralty and other reliable sources.** New-York and Washington, A. J. Johnson, 1 sheet [scale 1:3,041,280]. (“The part of this Map, between the Mississippi River and Pacific Ocean, was taken (with the consent of Capt. A. A. Humphreys) principally from the following authorities by Lieut. G. K. Warren, Topl Engrs . . . In the Office of Pacific Rail Road Surveys, War Department.”)
- “Colorado River” is labeled in the Grand Canyon region; “Rio Colorado” along the lower Colorado region. Although the streams of the Grand Canyon region are stylized, Cataract Creek (not labeled) is noticeable, and “Colorado Chiquito River” enters the Colorado along a steadily northeast-to-southwest trending route. Various locales are labeled in the Colorado River delta area. A notice is printed in the otherwise blank area between the “River Gila” and “Bill Williams F.” on the north and south, and between the “Rio Colorado” and “Rio San Francisco” on the west and east: “In the vicinity of this place a tract of country is found which is said by Trappers to be exceedingly fertile and abundantly timbered and well watered.”

- “Colorado R.” is shown between “Gulf of California” and the confluence of “Green R.” and “Grand R.”

Johnson and Browning [firm]

WHEAT IV:978

- 1859 25.1244 **Map of the United States and Mexico. Published by Johnson & Browning, under the direction of Col. Carlos Butterfield. December 1859.** New York: Johnson and Browning.
- The boundary between “Arizona” and “New Mexico” is that one which runs east-west south of the 35th parallel, dividing the former Territory of New Mexico, with Arizona to the south of New Mexico. The Colorado River is depicted between the head of the “Gulf of California” and the confluence of “Green R.” and “Grand River”. In its lower course, the Colorado River is labeled “Colorado or Red River”, in what is the Grand Canyon region it is labeled “Colorado or Red R.”, and in what is the eastern Grand Canyon area and northward it is labeled “Rio Colorado”. Tributaries are “St. Johns R.” (San Juan River); “Red River” (Little Colorado River); a minor tributary (not labeled) from the south in what is the western Grand Canyon; “Rio Virgen”, “Mohave River” (from the west in the lower Colorado region), “Sta. Maria R.” (Bill Williams River); and two tributaries (not labeled), one from the west and one from the east. “River Gila” meets the Colorado at “Ft. Yuma”. The 35th and 32nd parallel routes are both labeled “Proposed Pacific R. R.”

This ed. further delineates all of Arizona Territory (divided from and south of New Mexico Territory, a Confederate States declaration) and Nevada even though not part of the map title.
- 1864 25.1870 [CITATION FOR ATLAS VOLUME THAT INCLUDES ITEM NOS. 25.1871-25.1876 (below)]
Johnson's new illustrated (steel plate) family atlas, with physical geography, and with descriptions geographical, statistical, and historical, including the latest federal census, a geographical index, and a chronological history of the civil war in America. By Richard Swainson Fisher, M.D., Maps compiled, drawn, and engraved under the supervision of J. H. Colton and A. J. Johnson. ☞ The new plates, copyrighted by A. J. Johnson, are made exclusively for Johnson's New Illustrated Family Atlas. Others are the same as used in "Colton's General Atlas." New York: Johnson and Ward, successors to Johnson and Browning (successors to J. H. Colton and Company,) No. 113 Fulton Street, 123 pp. ("Entered, according to Act of Congress, in the year One Thousand Eight Hundred and Sixty-four, by A. J. Johnson, in the Clerk's Office of the District Court of the United States for the Southern District of New York.")
Cover title: *Johnson's New Illustrated Family Atlas of the World with Descriptions.* (with ornamental "United States Seal").
Ornamental half-title: *American Atlas.*
NOTE: Due to the number of maps cited from this volume, and the remarkably diverse, contrasting chorographical notes made of them, each map is cited separately herein.
- 1864 25.1871 **Johnson's Western Hemisphere** By Johnson and Ward.
In: *Johnson's new illustrated (steel plate) family atlas* [see ITEM NO 25.1870 for full citation], p. 11.
▶ "G. of California" separates "Penin^a of California" from "Chihuahua". "Colorado R." follows a generalized, southwesterly course before turning southward to the "R. Gila' confluence. En route it receives one tributary (not labeled, Little Colorado River?) from the southeast, at the confluence of which the Colorado bypasses a mountainous region to its north.
- 1864 25.1872 **Johnson's Map of the World on Mercator's Projection by Johnson and Ward.**
In: *Johnson's new illustrated (steel plate) family atlas* [see ITEM NO 25.1870 for full citation], pp. 13-14.
▶ "Gulf of California" separates "L. California" from "Mexico". "Colorado R." follows a generalized, south-southwesterly course before turning southward to the "R. Gila' confluence. En route it receives a small tributary from the east (not labeled, probably either the San Juan River or the Little Colorado River), a tributary from the north (where the Colorado turns to the south, thus probably the Virgin River), and a tributary from the northwest (probably the supposed course of what is shown on some

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

contemporary maps at the Mohave River). Along most of its course to the Virgin confluence, the Colorado flows on the west side of a single cordilleran spine.

- 1864 25.1873 **Johnson's North America by Johnson and Ward.**
In: Johnson's new illustrated (steel plate) family atlas [see ITEM NO 25.1870 for full citation], pp. 15-16.
 ► "G. of California" separates "Lower California" from "Sonora". "Rio Colorado" arrives at the head of the gulf from the north. "Green R." and "Grand R." are depicted flowing parallel to each other; the Green's confluence with the Colorado is downstream from a short river reach where is known to be the eastern Grand Canyon. The "Grand R." receives "Rio San Juan" from the east, downstream of which arrives "Rio de Lino" (Little Colorado River) from the southeast. The Colorado follows a generalized west-southwesterly course through the region where the Grand Canyon is known to be, then receives "R. Virgen" from the northeast and north. Downstream from the Virgin confluence the Colorado is shown passing through a mountain range, which it then follows on the eastern side for most of its course to the Gila confluence.
- 1864 25.1874 **Johnson's New Military Map of the United States Showing the Forts, Military Posts &c. with Enlarged Plans of Southern Harbors From Authentic Data Obtained at the War Department Washington, Johnson and Ward.**
In: Johnson's new illustrated (steel plate) family atlas [see ITEM NO 25.1870 for full citation], pp. 20-21. ("Entered, according to Act of Congress in the Year One Thousand Eight Hundred & Sixty One, by Johnson & Browning, in the Clerk's Office of the District Court, of the United States for the Southern District of New York.")
 ► "Rio Colorado" arrives at the head of the Gulf of California (not labeled) from the north, along which are labeled "Ft. Mohave" and "Ft. Yuma". "Green R." and "Grand R." are depicted flowing parallel to each other; the Green's confluence with the Colorado is downstream from a short river reach where is known to be the eastern Grand Canyon. The "Grand R." receives only "Rio de Lino" (Little Colorado River) from the southeast. The Colorado follows a generalized west-southwesterly course through the region where the Grand Canyon is known to be, then receives "Virgin R." from the northeast and north. In the Grand Canyon region the river is shown to flow bounded by mountainous areas.
- 1864 25.1875 **Johnson's California, with Territories of Utah, Nevada, Colorado, New Mexico, and Arizona, Published by Johnson and Ward.**
In: Johnson's new illustrated (steel plate) family atlas [see ITEM NO 25.1870 for full citation], pp. 66-67.
 ► "Colorado River" arrives at the head of "Gulf of California" from the north, at "Montague I." Numerous place names are inscribed along the lower Colorado, which is itself labeled passing through "Great Colorado Val." In this reach it receives "Pah-ute Cr." from the west, and "Bill Williams Fk." from the east. The course of the Colorado River is remarkable for its implied definitive course that directly reflects the cartography of F. W. von Egloffstein of the J. C. Ives expedition of 1858, and published in 1861. The river follows a southwesterly course in Utah to the confluence of "Rio San Juan", which arrives from the east. From that confluence the river turns westward, continuing in Utah to a point south of "Virgin City", where it then turns southwesterly into Arizona where it flows on the west side of "North Side Mts." At the southern end of those mountains the Colorado turns to the southeast where it receives from the northeast the "Colorado Chiquito or Flax R." (which itself arrives originally on a northeastward course, receiving "Ctyaract Cr." at "Yampais Village". Here also is labeled "Colorado Cañon". South of the supposed Colorado-Little Colorado confluence, at the confluence of "Diamond R.", the Colorado turns northwestward to the confluence of "Rio Virgen", where is labeled "Head of Navigation". Also shown on the map are the routes of "Spanish Trail from Los Angeles to Albuquia New Mexico" and "Cap^t. Sitgreaves 1851".

- 1864 25.1876 **Johnson's Mexico by Johnson and Ward.**
In: Johnson's new illustrated (steel plate) family atlas [see **ITEM NO 25.1870** for full citation], p. 68.
 ▶ "Gulf of California" separates "California" from "Sonora". "Rio Colorado" arrives at the head of the gulf at "Montague I." from the north and from off the map, receiving en route "Williams Fork" from the east and northeast and "Rio Gila" from the east and east-northeast. "Camp Yuma" is labeled at the Gila confluence. The region south of the Gila and east of the Colorado is labeled "Desert (Uninhabited) Isolated Mountains, without grass, wood or water. Vegetation chapparal and cacti".

Johnston, Alexander Keith [Johnston, Keith]

- 1846 25.1286 **North America by A. K. Johnston, F. R. G. S.** ("Edinburgh, John Johnstone, and W. & A. K. Johnston; Glasgow, Robert Weir, Lumsden & Son." "Engraved by W. & A. K. Johnston.")
In: The national atlas of historical, commercial and political geography. Edinburgh: John Johnstone; W. and A. K. Johnston, map 37.
 ▶ "R. Colorado" is shown very sketchily on a southwestward course from headwaters by the "Anahuac Mts." to the head of "Gulf of California", entirely within "Upper or New California". Just two tributaries are noted: a river (not labeled) coming from the east, which could be either the San Juan or Little Colorado River; and "R. Gila", which reaches the Colorado just before the latter reaches the gulf. The map takes data originally provided by Humboldt, in that most of the route taken by the Domínguez-Escalante Expedition of 1776 is shown, with a number of its camp names given to honor saints. Of note here is the singular label, "Pyramids", precisely in the area where the Grand Canyon is situated. It clearly is a further confusion of Miera y Pacheco's so-called sulfurous river of the pyramids, given to what is the Virgin River, which Humboldt and all subsequent cartographers later corrupted in varying forms to read as the river of the sulfurous pyramids—with this (unique?) instance by Johnston, for whatever reason, eliminating all but the "pyramids" portion of the name, and not applied to any river. However, there is, a short distance to the west of the "Pyramids" label an awkward, forked, short stream (not labeled) without defined headwater or confluence, that is similarly portrayed on other period maps as that river of the sulfurous pyramids.
 See also [remarks](#) on the "river of the sulfurous pyramids" in the Notes for Section 2.
- 1848 25.1829 **The River Systems of America, Extended from the Designs of Professor Berghaus; with the addition of detailed maps of some of the principal hydrographical phenomena of the New World by A. K. Johnston, F.R.G.S.**
In: The physical atlas : a series of maps and notes illustrating the geographical distribution of natural phenomena : by Alexander Keith Johnston F.R.G.S. F.G.S. Geographer at Edinburgh in Ordinary to Her Majesty . . . based on the Physikalischer Atlas of Professor H. Berghaus Divisions : Geology, Hydrography, Meteorology, Natural History. Edinburgh and London: William Blackwood and Sons. (Hydrology N^o 6.)
 ▶ "Colorado" is shown from headwaters that include "Jaquesila" (Little Colorado River), meandering southwestward all the way to the head of "Gulf of California", receiving northeast of which the "Gila" and between which confluence and the gulf it is a southwest-flowing bifurcated stream, rejoining at its entrance to the gulf. Also shown are a river (not labeled) that is tributary to the north side of the Colorado from the northeast, shown with a dashed line close to its confluence (Virgin River?) and "de los Martires", shown almost entirely by dashed lines coming from the north and northeast to its confluence with the Colorado a short distance upstream from the confluence of the Gila. Of special note on this map is the delineation of

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

drainage basins for all principal streams, including the Colorado; the figure 169,200 is presumably the square miles for this basin.

In: The physical atlas : a series of maps and illustrations of the geographical distribution of natural phenomena embracing I Geology. II Hydrography. III Meteorology. IV Natural History. By Alexander Keith Johnston F.R.G.S. F.G.S. Geographer at Edinburgh to her Majesty. Honorary Member of the Geographical Society Berlin &c with the co-operation of men eminent in the different departments of science. Edinburgh and London: William Blackwood and Sons. (Hydrology N^o 6.)
 ► "Colorado" is shown from headwaters that include "Jaquesila" (Little Colorado River), meandering southwestward all the way to the head of "Gulf of California", receiving northeast of which the "Gila" and between which confluence and the gulf it is a southwest-flowing bifurcated stream, rejoining at its entrance to the gulf. Also shown are a river (not labeled) that is tributary to the north side of the Colorado from the northeast, shown with a dashed line close to its confluence (Virgin River?) and "de los Martires", shown almost entirely by dashed lines coming from the north and northeast to its confluence with the Colorado a short distance upstream from the confluence of the Gila. Of special note on this map is the delineation of drainage basins for all principal streams, including the Colorado; the figure 169,200 is presumably the square miles for this basin.
- 1856 25.2062 **The River Systems of America, Extended from the Designs of Professor Berghaus; with the addition of detailed maps of some of the principal hydrographical phenomena of the New World by A. K. Johnston, F.R.G.S. Corrected to 1855.**
In: The physical atlas of natural phenomena. A new and enlarged edition. Edinburgh and London: William Blackwood and Sons. [1856.] ("Hydrology N^o 6.") ("Physical Atlas", "Plate 17".) ("Engraved by W. & A. K. Johnston.") ("William Blackwood & Sons, Edinburgh & London.")
 ► "Colorado" is shown between the head of "Gulf of California" and the confluence of "Green" and "Grande" [*sic*]. The Green and Grand Rivers, except for the upper Green, run closely parallel on southwesterly courses; the Grand turns west to meet the Green, receiving enroute "S. Johns" (San Juan River) from the east. From the confluence, the Colorado arcs from southwest to west to the confluence of "Virgen" from the northwest and north before turning nearly due south until turning south-southeast at the "Gila" confluence from the east), continuing to the gulf. Between the Virgin and Gila, the Colorado receives "Mahave" [*sic*] from the west-northwest and an unlabeled tributary (Bill Williams River) from the northeast. Of special note on this map is the delineation of drainage basins for all principal streams, including the Colorado; the figure 170,000 is presumably the approximated square miles for this basin.
- 1858 25.1372 **United States of North America (Western States) by Keith Johnston, F.R.S.E.** ("William Blackwood & Sons, Edinburgh & London.") ("W. & A. K. Johnston, Edinburgh.")
 Caption: "Keith Johnston's General Atlas", "44". Scale 1:6,047,811, 95 miles to an inch.
 ► "Lower California" is separated from "Sonora" by "Gulf of California". The boundary of "New Mexico" includes the angle that later would be southernmost Nevada. "Rio Colorado" is depicted with a solid line between the head of the gulf and a point north of the confluence of "Rio Gila", a dotted line from there to a point south of the confluence of "Bill Williams Fork"/"Rio S. Maria" [labeled as both], a solid line from there to the boundary point at the angle (today's California-Nevada-Arizona triple point), and upstream from there as a dotted line to the confluence of "Green River" and "Grand River", which also are depicted in their lower courses by dotted lines. The lower courses of tributaries "Rio San Juan", "Rio Colorado Chiquito" (Little

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Colorado River), "Yampais Cr.", and "Santa Clara" (Virgin River) are all depicted by dotted lines, although their upper courses are drawn with solid lines. A tributary (not labeled) from the south in the Grand Canyon area (Cataract Creek) is likewise drawn with a dotted line in its lower reach. The Colorado's course through the Grand Canyon is only figurative, although the placement of principal tributary confluences convey information that is remarkably (luckily?) more accurate than that of Egloffstein's 1858 map (published with Ives, 1861).

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

"Scales Geographical & Italian Miles 60–1 degree English Statute Miles 69.16–1 degree".

Other than the updating of "Arizona" with its western boundary along the "Rio Colorado" and "Santa Clara" (Virgin River), the area of interest to this Cartobibliography the map is (incredibly) unchanged from the 1858-1863 eds. (ITEM NOS. 25.1372-25.1374).

► "Lower California" is separated from "Sonora" by "Gulf of California". The boundary of "New Mexico" includes the angle that later would be southernmost Nevada. "Rio Colorado" is depicted with a solid line between the head of the gulf and a point north of the confluence of "Rio Gila", a dashed line from there to a point south of the confluence of "Bill Williams Fork"/"Rio S. Maria" [labeled as both], a solid line from there to the boundary point at the angle (today's California-Nevada-Arizona triple point), and upstream from there as a dashed line to the confluence of "Green River" and "Grand River", which also are depicted in their lower courses by dashed lines. The lower courses of tributaries "Rio San Juan", "Rio Colorado Chiquito" (Little Colorado River), "Yampais Cr.", and "Santa Clara" (Virgin River) are all depicted by dashed lines, although their upper courses are drawn with solid lines. A tributary (not labeled) from the south in the Grand Canyon area (Cataract Creek) is likewise drawn with a dashed line in its lower reach. The Colorado's course through the Grand Canyon is only figurative. Confusingly, in this ed. the label for the Little Colorado River omits now "Chiquito", thereby inferring that this river is actually the course of "Rio Colorado".

- 1873 25.1376 **United States of North America (Western States) by Keith Johnston, F.R.S.E.** ("Engraved, Printed and Published by W. & A. K. Johnston, Edinburgh & London.")
Caption: "Keith Johnston's General Atlas", "44". Scale 1:6,047,811, 95 miles to an inch.
► At last, with this ed. the "Rio Colorado" (a bit crudely overdrawn) is depicted by a solid line, as are the lower courses now of the tributaries to it. Although "Rio Colorado" is now labeled along its entire course from the confluence of the "Green River" and "Grand River", its course through the Grand Canyon remains figurative. The western boundary of "Arizona" is now refigured to its modern placement.
- 1875 25.1377 **United States of North America (Western States) by Keith Johnston, F.R.S.E.** ("Engraved, Printed and Published by W. & A. K. Johnston, Edinburgh & London.")
Caption: "Keith Johnston's General Atlas", "46". Scale 1:6,047,811, 95 miles to an inch.
► With this ed. "Rio Colorado" is refigured to represent its recognizable course through the Grand Canyon (not labeled, although the area is labeled "Colorado Plateau"), and the Virgin River is properly labeled. Tributaries to the Colorado in the Grand Canyon below the confluence of "Rio Colorado Chiquito" are "Parke Cr." on the south side east of the confluence of "Kanab Cr." (on the north side), and "Cataract Cr." from the southeast more or less in its proper placement. Interestingly, Diamond Creek is not figured, although there is a place name, "Hualapais". The entire Arizona Strip area and some land to the east of the Colorado is labeled "Painted Desert". "El Vado de los Padres" is misplaced at a point south of the Utah-Arizona boundary.
- 1890 25.1378 **United States of North America (Western States) by Keith Johnston, F.R.S.E.** ("Engraved, Printed and Published by W. & A. K. Johnston, Edinburgh & London.")
Caption: "Keith Johnston's General Atlas". Scale 1:6,047,811, 95 miles to an inch.
► Within the area of interest to this Cartobibliography, this ed. of the map is (amazingly) effectively unchanged from the 1875 ed. (ITEM NO. 25.1377), with the exception that the 35th and 32nd parallel railroads are delineated, the inclusion of "Mineral Park" as a place name in northwestern Arizona, the label "Grand Cañon" appears on the "Rio Colorado" in the western part of the canyon, the label "Marble Cañon" on the Colorado between "Rio Colorado Chiquito" and "Kanab Cr." (and

“Cataract Cañon” in Utah upstream from “Rio San Juan”); else all is the same including the retention of the peculiar “Parke Cr.”, and the absence of Diamond Creek even though “Pariah” has been added downstream from the still-misplaced El Vado de los Padres—all in all, a most peculiar map for its “antedated” updates on a base map long out of date.

- ____ 10.115 **Lower Granite Gorge: Grand C.** Midway, Utah, Leslie Allen Jones [Western Whitewater Co.], continuous scroll, photostatically reproduced. [Date undetermined.]
Diamond Creek to Temple Bar, Lake Mead, with title (thus) at Temple Bar and (as rolled) Diamond Creek at the end. Scroll perhaps originally produced for the use of upstream power boaters. This scroll also seems to have been appended later to variants of the main Grand Canyon scroll (see Jones, 1962, *ITEM NO.* 10.14) so as to extend its Grand Canyon coverage from Diamond Creek to Lake Mead. Copy seen produced on Mylar.
- 1962 10.14 **[Les Jones' scroll map of the Colorado River in Grand Canyon.]** Heber City, Utah: Leslie Allen Jones [Western Whitewater Co.], continuous scroll, photostatically reproduced, scale *ca.* 1:33,500. [Later issued by Jones from Midway, Utah.] **[Numerous variants without date change; no complete compendium yet exists.]**
-

⁶² Jones privately produced numerous sheet and scroll maps for use on various western rivers. All maps were produced on an as-needed basis. Those that relate specifically to the area covered by this bibliography are cited here. Information significantly contributing to these citations and this note was obtained from Richard D. Quartaroli in January/February 2020. Two price lists from Jones, dated March 20, 1982, and July, 1989, indicate products that were available at those times. The known set of maps are (quoted from the price lists and *numbered here for convenience, not as record*; Grand Canyon products noted in **bold**):

1982 LIST — “Colorado River Basin”: [1] “Desolation-Red C.” [and] “Lodore-Split Mtn.”, [2] Moab-Green R.”, [3] “Westwater Canyon (Granite C. to Moab)”, [4] “Cataract Canon (From Moab)”, **[5] “Grand Canyon”**, [6] Yampa River (Maybell-Echo Park), [7] “Dolores River (Dolores to Colo. River)”. “Oregon Rivers”: [8] “Rogue River”, “Mc Kenzie River” [*sic*]. “Idaho-Wyo. Snake River Basin”: [9] “Lt. Gr. C. of Snake (Moran to Alpine)”, [10] “Hells C. (Snake River), [11] “Middle Fork of Salmon”, [12a] “Main Salmon” (12-inch-wide scroll), [12b] “Main Salmon” (5-inch-wide scroll), [13] “Selway, Lochsa, Clearw.”. “British Columbia-Canada”: [14] “Columbia River (Golden-Revelstoke)”.

1989 LIST — “Colorado R. Basin”: [1] “Yampa River, Maybell thru Cross Mtn.”, [2] “Blue Mtn. C. to Echo Park”; [3] “Green & Colorado R. Red C., Lodore, Split Mtn.”; [4] “End Split Mtn.-Sand Wash”, [5] “Desolation & Grey Canyons”, [6] “Moab-Green R. City (Canyons)”, [7] “Westwater C. (Westw.-Moab)”; [8] “Colorado River, Cataract Canyon.: Moab-Dark C.”, **[9] “Grand C.: Lee’s Fy.-Diamond Cr.”**, **[10] “Grand C.: Diamond Cr.-Lake Mead”** [this is the “Lower Granite Gorge” map noted herein as *ITEM NO.* 10.115]; [11] “San Juan River, Chinle Cr.-Lake Powell”. “Snake River Basin”: [12] “Moran to Jackson: Snake R.”, [13] “Hoback & Greys Rrs & Little Grand C. of the Snake”, [14] “Palisades Res. & Swan Valley”, [15] “Hell’s C.: Brownley-Lewiston”, [16] “Selway: Whitecap Cr.-Lochsa R.”, [17] “Lochsa R.: Crook Cr.-Mouth”, [18] “Clearwater: Lochsa R.-Mouth”. “Salmon R. Basin” [19] “Middle Fk. of Salmon 1990”, [20] “Salmon: M. Fk.-Vinegar Cr.”. “Oregon Rivers”: [21] “Rogue River to the Ocean”, [22] “McKenzie River”.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

All maps were reproduced on an as-needed basis. Earlier variants blue-line reproduced on roll paper, later variants reproduced in black on more water-resistant and sturdier roll stock such as Mylar.

No title *per se* and often referred to as “Les Jones’ Scroll” or “the Les Jones Scroll”. Library catalog records generally record catalogers’ contrived titles; for example, “Grand Canyon river guide scroll map”, “Grand Canyon”, “Grand C.”, and “Rafting map of Colorado River and Grand Canyon from Lees Ferry, Arizona to Diamond Creek”). Start of scroll notes, “This map is by Leslie A. Jones, 1962”. Separate sheet, “Handling Instructions”, notes “Copyright 1960”. Distributed in plastic bag with instructions on use in bag so as to allow continuous scrolling while on the river. Note that the earlier reproductions on paper were subject to rapid fading in sunlight.]

- Jones’ Grand Canyon map is based on the U.S. Geological Survey’s 1924 *Plan and profile of Colorado River from Lees Ferry, Ariz., to Black Canyon, Ariz.-Nev., and Virgin River, Nev.* (see Birdseye, 1924, ITEM NO. 24.46); the separate Birdseye plans and profiles are reproduced in continuous parallel views. Profusely annotated by Jones with ratings of rapids, notes of river flows during historic trips, miscellaneous historical notes and notes from trips taken by Jones, occasional inset sketch maps of rapids with boat run lines at the times when mapped, and geological notes. Also noted for this citation is a table of data for a kayak run of the river, Lees Ferry to Pearce Ferry, September 1962 (table in two separate sections on scroll). Annotations emended occasionally, sometimes with keyed dates affixed.

Other specifically interesting annotations, added after 1962, include table, “All time record low water run: 1000 cfs very fine rock exposed”, October 1963; table appears in two separate sections on scroll. Scroll concludes with graphical data for river flows according to weeks of the year.

Widths of scrolls can vary between ca. 7-10 inches, depending upon the amount of free space on the medium used. Variants include coverage Lees Ferry to Diamond Creek (a 1995 reproduction, a signed copy acquired by Spamer in 1995, measures 6¾ inches × 29 feet, 4 inches). Other measurements noted from library catalog records are: Lees Ferry to Lake Mead, Temple Bar (7 inches × 43 feet, 4½ inches); and Lees Ferry to Lake Mead, Overton Arm (8 inches × 51 feet, 5 inches).

- *Other points* (taken from the 1995 variant noted above) — Scroll head notes: “Western Whitewater Snake, Salmon, Colorado, Green, Madison, Yellowstone, Missouri; ride the wilderness whitewaters in reverence before God—with a prayer his strength will be in you—Leslie Allen Jones, 3451 N. River Rd., Midway, Utah, 84049”. “Whitewater exploration and mapping—Colorado Basin”. Start of scroll headed “To: (226 mi.) Diamond Cr.” The 1995 production seems to have been prepared in order to add notations of photo numbers from the Grand Canyon “Legends” river trip of September 1994 (also known as the “Old Timers Trip”). An asterisk notes on the margin, “The Grand Canyon Continuous Photo Album Set is available at the Historical Libraries: Cline Library, Flagstaff, Az., BYU [Brigham Young University], Utah, Univ. of Utah, and from Leslie A. Jones”.

- Richard Quartaroli’s partial record (January/February 2020) of Jones scrolls notes for Grand Canyon the following variants (numbered here for convenience and not for record, parenthetical dates indicate dates interpreted from annotations): [1] Lees Ferry to Virgin River, Colorado River miles 0-330, 1962 (1963?), 11¼-inch paper; [2] Lees Ferry to Virgin River, miles 0-330, 1962 (1964), 7¾-inch paper; [3] Lees Ferry to Lake Mead, miles 0-315, 1962 (1963), 7-inch Mylar; [4] Lees Ferry to Lake Mead, miles 0-315, 1962 (1965), 7½-inch Mylar; [5] Lees Ferry to Diamond Creek, 0-226, 1962 (1995), 6½-inch Mylar; [6] Lees Ferry to Diamond Creek, 1962 (1995), 8½-inch Mylar. Quartaroli also reports (July 2020) [7] a poorly reproduced 7-inch Mylar scroll with many splices that had been acquired by a previous user in 2001, with signs of having been used on the river, which *begins* at Spring Canyon, and at the end of which is the labeling and notations, “Lower Granite Gorge: Grand C. M.P. 225.5 → 246.5 11.2’/mi. : L. Mead Silting In Begins Abv. Separation Rapid: M. P. 240” and “Out → Temple Bar”.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

- 1964 10.114 **Lake Powell : Lee's Ferry to GR Jct.** [Lee's Ferry to Green River junction]. Bountiful, Utah: Leslie A. Jones, blue-line photostatically reproduced sheet, scale 1:31,680. (One map in 20 sections on one sheet, 3 feet × 16 feet, 5½ inches.)
 Base map reproduced from the U.S. Geological Survey's 1922 *Plan and profile of Colorado River from Lees Ferry, Ariz[.], to mouth of Green River, Utah . . .* (see Birdseye and Gerdine, 1922, **ITEM NO.** 24.816), with shading for the planned extent of Lake Powell at high, mean, and low operating levels of Glen Canyon Dam.
 Cited here for the portion of lower Glen Canyon (below Glen Canyon Dam) that is included within the boundaries defined for this Cartobibliography.

Jones, Stan

- 1989 25.366 **Everything you want to know about Lake Havasu country and the Colorado River, Parker Dam to Davis Dam : Stan Jones' boating and exploring map.** Lake Havasu City, Arizona: Lake Havasu Area Chamber of Commerce, 1 sheet.

Joslin, Gilman

- NO DATE 25.1506 **Joslin's Six Inch Terrestrial Globe. Containing the latest Discoveries. Boston. Gilman Joslin. Drawn and Engraved by W. B. Annin.** [William B. Annin].
 Library of Congress describes this globe: "hand col., paper goes over papier-mâché and plaster, mounted in a three-legged wooden stand 17 cm. high, supporting a wooden zodiacal circle and a brass meridian ring; 16 cm. in diam." [Ca. 1840.]
 ► The California peninsula is labeled "Old California". Even at this scale the river, "Colorado", and "R. Gila" are depicted, with tributaries.

Joyce, Lan

- 2011 25.335 (ED.-IN-CHIEF) **Route 66 : the Mother Road : scale 1:1,840,000 : travel atlas.** Richmond, British Columbia, Canada: ITMB Publishing, Ltd., 64 pp.
 Detail maps at other scales.

K

Kamilli, Robert J., AND Richard, Stephen M.

- 1998 24.98 (EDS.) **Geologic highway map of Arizona.** *Arizona Geological Survey, Map 33*, scale 1:1,000,000, 1 sheet, 2 sides.

Kanab/Kane County Office of Tourism and Film Commission

- NO DATE 25.325 **Southern Utah area map : Kanab/Kane County : "The Heart of the Parks".** Kanab, Utah: Kanab/Kane County Office of Tourism and Film Commission, 1 leaf (2 sides).
 Recto map contains generalized map, including northern Arizona.
 Verso contains map of Kanab, Utah.

Kansas Pacific Railway, et al.

WHEAT V:1186

- 1868 25.1110 **Map of the routes of the Union Pacific Railroads with their eastern connections.**
In: The Union Pacific Railway Eastern Division, or (Kanas Pacific Railway.)
Importance of its route to all sections of the country. Petition of sixty railroad presidents, memorials of boards of trade of St. Louis, Chicago, Cincinnati, Pittsburg, and Philadelphia; resolutions of state legislatures, conventions, etc. Washington, D.C.: Joseph L. Pearson, Printer, 50 pp., map.
 ► Along the 35th parallel route is shown "U.P.R.W.E.D." A connecting route (not labeled) from New Mexico to California via the 32nd parallel route is also shown. The base map displays a generalized "Colorado River", with "Colorado Chiquito" a prominent tributary to it in the western part of the Grand Canyon region.

Karto+Grafik

- NO DATE 25.55 **Hildebrand's travel map : United States : the Southern Rockies and Grand Canyon country.**
 Frankfurt, West Germany: Karto+Grafik, 1 sheet, 2 sides.
 One online catalog listing gives date as "[1988?]" . Other eds.
 Four Corners region.
- 1995 25.639 **Hildebrand's travel map : United States : the southern Rockies and Grand Canyon Country.**
 Frankfurt am Main: Karto+Grafik Verlagsgesellschaft, 1 sheet, 2 sides. Scale 1:700,000; general map of the Southwest, 1:3,500,000.
- 2000 25.157 **Hildebrand's Urlaubskarten-Road Map-Carte Routiere : USA : Colorado Plateau : Canyonlands : Südliche Rocky Mountains.** Frankfurt am Main: Karto+Grafik, scale 1:700,000. [In German.]

Keeler, W. J.

WHEAT V:1170

- 1867 25.56 **National map of the territory of the United States from the Mississippi River to the Pacific Ocean. Made by the authority of the Hon. O. H. Browning, Secretary of the Interior, in the Office of the Indian Bureau, chiefly for government purposes under the direction of the Hon. N. G. Taylor, Commis^r of Indian Affairs & Hon. Chas. E. Mix Chief Clerk of the Indian Bureau: Compiled from authorized explorations of the Pacific rail road routes, public surveys, and other reliable data from the departments of the government at Washington, D.C. by W. J. Keeler, civil engineer.** ("N. Du Bois, Draughtsman.") ("J. F. Gedney, Lithographer, Engraver & Plate Printer, Washington, D.C.")
 ► "Colorado River" is shown between the confluence of "Green River" and "Grand River" and the "Gulf of California". Between the confluence of the "Rio San Juan" and what is the western Grand Canyon region, the Colorado's course is conjecturally southwest, receiving "Cataract Cr." from the east where the river turns south-southwestward toward Diamond Creek (not labeled). "Colorado Chiquito" is shown as a tributary to Cataract Creek from the east-southeast just above Cataract's confluence with the Colorado. Closer to Diamond Creek a tributary (not labeled) reaches the Colorado from the northwest.

WHEAT V:1171 [with illustration facing p. 205]

- 1867 25.1034 **Map of the Routes of the Union Pacific Railroads with their Eastern Connections. Compiled from authorized Explorations, Public Surveys, and other reliable data from the Departments**

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

of the Government. by W. J. Keeler, Civil Engineer. November, 1867. ("Lith by J. F. Gedney, Washington.")

► The projected 35th parallel route of the "U.P.R.W.E.D." [Union Pacific Railway Eastern Division] is shown. "Colorado River" is depicted between "Pt. Invincible" at the head of the Gulf of California and the confluence of "Green River" and "Grand River". The river is drawn conjecturally in the Grand Canyon region. "Colorado Chiquito" (Little Colorado River) is shown as a tributary from the east, with its confluence more or less in the middle Grand Canyon; and "Cataract Cr." is shown as a tributary to the Little Colorado. Also on this map, hand colored, are gold, silver, copper, and quicksilver mining areas, which include prospects in the lower Colorado River area, and also several silver prospects on the northwestern and western side of the San Francisco Peaks (not labeled) and south of "Walapi Sprs." (Peach Springs), which notably are along the projected 35th parallel railway.

WHEAT V:1187

1868 25.1253 **National map of the territory of the United States from the Mississippi River to the Pacific Ocean. Made by the authority of the Hon. O. H. Browning, Secretary of the Interior, in the office of the Indian Bureau, chiefly for government purposes under the direction of the Hon. N. G. Taylor, Commis^r. of Indian Affairs & Hon. Chas. E. Mix Chief Clerk of the Indian Bureau: Compiled from authorized explorations of the Pacific rail road routes, public surveys, and other reliable data from the departments of the government at Washington, D.C. by W. J. Keeler, civil engineer. ("N. Du Bois, Draughtsman.")**

► The projected 35th parallel route of the "U.P.R.W.E.D." [Union Pacific Railway Eastern Division] is shown. "Colorado River" is depicted between "Pt. Invincible" at the head of the Gulf of California and the confluence of "Green River" and "Grand River". The river is drawn conjecturally in the Grand Canyon region. "Colorado Chiquito" (Little Colorado River) is shown as a tributary from the east, with its confluence more or less in the middle Grand Canyon; and "Cataract Cr." is shown as a tributary to the Little Colorado. Also on this map, hand colored, are gold, silver, copper, and quicksilver mining areas, which include prospects in the lower Colorado River area, and also several silver prospects on the northwestern and western side of the San Francisco Peaks (not labeled) and south of "Walapi Sprs." (Peach Springs), which notably are along the projected 35th parallel railway.

Kiepert, H. [Kiepert, Heinrich]

WHEAT III:723

- 1851 25.1237 **Mexico[,] Texas und Californien.** ("Bearbeitet und gezeichnet von H. Kiepert.") ("WEIMAR, Verlag des Geographischen Instituts 1851.") ("Situation und Schrift gestochen von K. Mädcl, Terrain von C. Jungmann.") **[In German.]**
- ▶ "Baja (Nieder) California" and "Sonora" are separated by "Golf von California Mar Bemeja d.i. Rothes Meer oder See des Cortez". "Rio Colorado del Occidente" is depicted by dashed lines through nearly its entire length, from the confluence of likewise conjectured lower courses of "Green R." and "Grand R." Only between a point north of the confluence of "R. Gila" and the gulf is the Colorado portrayed by a solid line; and south of that confluence the river bifurcates before rejoining at the head of the gulf. Tributaries to the Colorado are "R. Navajoas (S. Juan)", depicted by a solid line; "R. Jaquesila (Red R.)" (Little Colorado River), depicted by a solid line; "R. Virgen" (depicted by a solid line but dashed before its confluence with the Colorado; a dashed-line river (not labeled) from the west; and an unlabeled river from the northeast (Bill Williams River), with a solid line toward its headwaters but dashed at the confluence with the Colorado.

⁶³ Rolled and folded states seen of Kieffer's hydraulic maps; folded maps were distributed in printed paper sleeves.

- 1855 25.682 **Die Vereinigten Staaten von Nord America nebst Canada. Neue berichtigte Ausgabe. [In German.]**
In: Geographisches Institut, Allgemeiner Hand-Atlas der Erde und des Himmels nach den besten astronomischen Bestimmungen, neuesten Entdeckungen und kritischen Untersuchungen entworfen. Weimar: Verlag des Geographischen Instituts. Scale 1:8,000,000. ("Beirbeitet und gezeichnet von H. Kiepert." "Situation und Schrift gestochen von C. J. Mädell, Terrain von W. Weiler.")
 ► "R. Colorado" extends from "R. Verde (Green R.)" to "Golf v. Californien (Mar Bermejo) d. i. Roches Meer" but is indicated conjecturally by dashed lines in the Grand Canyon region. "R. Verde" extends conjecturally to the Colorado in the canyon region. "Grand R." parallels the Green River and reaches a short "definitively" drawn stream that is a tributary to "R. Colorado Chico [sic]"; in turn, the Little Colorado is drawn conjecturally to the Colorado. At "Yuma" is also labeled, "Hattaiki (Casas Grandes)". A trail from Santa Fe to the West Coast by way of Yuma is labeled, "Gewöhnliche Strasse der Aus wanderer."
 For a revision, see Kiepert and Gräf (1865, ITEM NO. 25.683).
- 1855 25.726 **Mexico[,] Texas und Californien. [In German.]**
In: Geographisches Institut, Allgemeiner Hand-Atlas der Erde und des Himmels nach den besten astronomischen Bestimmungen, neuesten Entdeckungen und kritischen Untersuchungen entworfen. Weimar: Verlag des Geographischen Instituts. Scale 1:6,000,000. ("Beirbeitet und gezeichnet von H. Kiepert." "Situation und Schrift gestochen von K. Mädell, Terrain von C. Jungmann.")
 ► "Rio Colorado del Occidente" extends from "Golf von California Mar Bermeja d.i. Rothes Meer oder See des Cortez" to a conjectural confluence with "R. Virgen". A dotted line continues the Colorado through the Grand Canyon region to a conjectural confluence of the "Green R." and "Grand R." En route are noted "R. Jaquesila (Red R.)" and "R. Navajoas (S. Juan)".
- 1856 25.2315 **Erdkarte in Mercators Projection bearbeitet von H. Kiepert, gestochen von C. L. Ohmann Berlin, Verlag von D. Reimer, 1856. 8 sheets. [In German.]**
 ► "Green R." is delineated on a southeasterly course then southwesterly after the confluence of "Bear R." in "Utah". "R. Grande" (the Grand River, not the Rio Grande of the Gulf of California) parallels the Green from the "Blue R." confluence in Utah, receiving in northernmost "New Mexico" (today's Arizona) "R. Narajoas" (San Juan River) from the east, then turns southwestward a short distance to the "R. de Lino" confluence (Little Colorado River, from the southeast) then turns westward to reach the supposed Green which there is labeled (together with the remaining course of the Colorado River) "R. Colorado (R. Verde)". From the confluence of the Colorado/Verde and Grande the main stream continues westward to the Virgin River confluence (not labeled), turning southward to the gulf, receiving an undetermined (unlabeled) tributary from the east, the Bill Williams River (not labeled) from the north and east, and "R. Gila" from the east-northeast, finally arriving at the end of "Californischer MB."
- 1871 25.2327 **Westliches-Nordamerica.** ("H. Kiepert's Neuer Handatlas N^o 38") ("Berlin bei Dietrich Reimer".) ("Gestochen v. C. L. Ohmann.") ("Berichtigt 1867".) ("Druck v. F. Barth.") Scale 1:8,000,000. [In German.]
In: Neuer Hand Atlas über alle theile der Erde entworfen und bearbeitet Dr. Heinrich Kiepert. Zweite vollständig berichtigte und vermehrte Auflage. Berlin: Verlag von Ditrich Reimer.
 ► The Colorado River is labeled on its lower course "Rio Colorado del Occidente" and on its upper course "R. Colorado od. Verde (Green R.)"; delineated thus between "Mar Bermejo (Roths M.) od. Californischer MB" and headwater. "R. Grande" (Grand River) parallels the upper Colorado, with a confluence in the central Grand Canyon area following the modified Egloffstein model that shows the Colorado/Verde coming south-southwesterly into Arizona, arcing to the southeast

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

along the apparent Parashant Canyon course to meet the "Grande". "R. de Lino (Colorado Chico)" (Little Colorado River) arrives from the southeast to join the "Grande" just before the latter reaches the Colorado/Verde, and Cataract Creek (not labeled) is a tributary to the Little Colorado.

- 1871 25.2328 **Nord-America.** ("H. Kiepert's Neuer Handatlas N^o 36") ("Berlin, bei Dietrich Reimer".) ("Neue Bearbeitung.") ("Berichtigt 1867".) (W. L. v. Paris") (Stich von J. Sulzer. Druck von F. Barth.) Scale 1:20,000,000. **[In German.]**
In: Neuer Hand Atlas über alle theile der Erde entworfen und bearbeitet Dr. Heinrich Kiepert. Zweite vollständig berichtigte und vermehrte Auflage. Berlin: Verlag von Dietrich Reimer.
 ▶ "Rio Colorado del Occidente" (labeled "Green R." on its upper course) is delineated between the Gulf of California (not labeled) and headwater. "Grand R." parallels the Colorado/Green, with a confluence in the central Grand Canyon area following the modified Egloffstein model that shows the Colorado/Green coming south-southwesterly into Arizona, arcing to the southeast along the apparent Parashant Canyon course to meet the "Grande". In southern "Utah Terr." and northern "Arizona Terr." both rivers are delineated in those reaches by dashed lines. "R. Navajoas" (San Juan River) is a tributary to the Grand from the east. "R. de Lino (Flax River)" (Little Colorado River) arrives from the southeast to join the Grand just before the latter reaches the Colorado/Green, and Cataract Creek (not labeled) is a tributary to the Little Colorado.
- 1875 25.2231 **America.** ("Bearbeitet und gezeichnet von H. Keipert." "Gestochen v. C. Jungmann.") **[In German.]**
In: Kiepert, H., Weiland, C. F., Graef, C., Graef, H., Bruhns, C., and Delitsch, O. (eds.), Grosser hand-Atlas des Himmels und der Erde. Weimar: Geographisches Institut, 45th ed., map 59.
 ▶ "R. Colorado" is delineated between "Mar Bermejo (Roths Meer)" and the confluence of "R. Verde (Green R.)" and "S. Juan"; on this map the Green River label is extended to the San Juan confluence, with "Grand R." a tributary to the Green. The course of the Colorado arcs from south to west, receiving the San Juan from the east (and into which the Little Colorado River [not labeled] is a tributary near the "Green"- "San Juan" confluence), and the Virgin River (not labeled) from the northeast; thence turns southward to the gulf receiving the Bill Williams River (not labeled) from the north and east and "R. Gila" from the east-northeast. Just before reaching the gulf the river bifurcates.
- 1875 25.2232 **Nord America mit Westindien.** ("Gezeichnet v. H. Keipert. Revidirt v. C. Ohmann." "Gestochen v. Wibel und C. Poppey jun.") **[In German.]**
In: Kiepert, H., Weiland, C. F., Graef, C., Graef, H., Bruhns, C., and Delitsch, O. (eds.), Grosser hand-Atlas des Himmels und der Erde. Weimar: Geographisches Institut, 45th ed., map 60.
 ▶ "R. Colorado" is delineated between "Californischer MB. (Mar Bermejo od Roths Meer)" and the confluence of "R. Verde (Green R.)" and "R. Grande"/"Grand R.". The course of the Green and Grand rivers are parallel and southwesterly through Utah, portions of which are shown by dashed lines; in Arizona the Grand turns west-southwest while the Green turns south-southwest and shortly before reaching the "Grande" confluence turns southeast. Both courses are meant to follow the courses suggested by Egloffstein in 1861; with the confluence area in the far western part of Grand Canyon. "R. S. Juan" is a tributary to the Grande from the east in northernmost Arizona, its lower course depicted by a dashed line. "R. de Lino (Colorado Chico)" follows a northeasterly course to join the "Grande", with Cataract Creek (not labeled) joining just before the Little Colorado-Grande confluence; again repeating Egloffstein's model. The Virgin River (not labeled) arrives at the Colorado from the northeast, where the Colorado turns southward to the gulf, receiving the Bill Williams River (not labeled) from the northeast and "R. Gila" from the east-northeast.

- 1875 25.2233 **Die Vereinigten Staaten von Nord America nebst Canada.** ("Bearbeitet und gezeichnet v. H. Kiepert." "Gestochen v. C. Poppey jun.") [In German.]
In: Kiepert, H., Weiland, C. F., Graef, C., Graef, H., Bruhns, C., and Delitsch, O. (eds.), *Grosser hand-Atlas des Himmels und der Erde*. Weimar: Geographisches Institut, 45th ed.
 ► "R. Colorado" is delineated between "Golf v. Californien (Mar Bermejo) d. i. Rothes Meer" and the confluence of "R. Colorado od. R. Verde (Green R.)" and "R. Grande". The course of the Green and Grand rivers are parallel and southwesterly through Utah, portions of which are shown by dashed lines; in Arizona the Grand turns west-southwest while the Green turns south-southwest and shortly before reaching the "Grande" confluence turns southeast. Both courses are meant to follow the courses suggested by Egloffstein in 1861; with the confluence area in the far western part of Grand Canyon. "R. S. Juan" is a tributary to the Grande from the east in northernmost Arizona, its lower course depicted by a dashed line. "R. de Lino (Colorado Chico)" follows a northeasterly course to join the "Grande", with Cataract Creek (not labeled) joining just before the Little Colorado-Grande confluence; again repeating Egloffstein's model. The Virgin River (not labeled) arrives at the Colorado from the northeast, where the Colorado turns southward to the gulf, receiving the Bill Williams River (not labeled) from the northeast and "R. Gila" from the east-northeast.

Kiepert, H., AND Gräf, C. [Kiepert, Heinrich, AND Gräf, Carl]

- 1865 25.683 **Die Vereinigten Staaten von Nord America nebst Canada. Neue berichtigte Ausgabe.** [In German.]
In: Graf, C., Graf, A., and Bruhns, C. (eds.), *Hand-Atlas der Erde und des Himmels. In siebzig Blättern. Zweiundvierzigste Auflage*. Weimar: Verlag des Geographischen Instituts. Scale 1:8,000,000. ("Beirbeitet und gezeichnet von H. Kiepert. Revidirt von C. Gräf 1865". "Gestochen von C. Poppey jun.")
 ► In the region of interest to this Cartobibliography, this map is with the exception of changes in nomenclature effectively unchanged from the 1855 ed. (see Kiepert, ITEM NO. 25.682). The lower Colorado River is labeled "R. Colorado"; the river where it is conjecturally drawn in the Grand Canyon region is labeled "Colorado del Occidente". "R. Colorado" extends from "R. Verde (Green R.)" to "Golf v. Californien (Mar Bermejo) d. i. Roches Meer" but is indicated conjecturally by dashed lines in the Grand Canyon region. "R. Verde" extends conjecturally to the Colorado in the canyon region. "Grand R." parallels the Green River and reaches a short "definitively" drawn stream that is a tributary to "R. de Lino (Colorado Chico [*sic*]"); in turn, the Little Colorado is drawn conjecturally to the Colorado. At "Yuma" is also labeled, "Hattaiki (Casas Grandes)". A trail from Santa Fe to the West Coast by way of Yuma is labeled, "Gewöhnliche Strasse der Aus wanderer."

Kiepert, R. [Kiepert, Richard]

- 1887 25.1757 **Stati Uniti dell' America e Messico.** ("Ulrico Hoepli, Editore Librajo [*sic*] in Milano.") [In Italian.]
In: *Atlante geografico di 25 carte del dott. R. Kiepert con notizie geografiche e statistiche compilate dal dott.; G. Garollo. Sesta edizione completamente rifatta*. Milano, Napoli, and Pisa: Ulrico Hoepli, Editore-Libraio della Real Casa, 72 pp. (pp. 63-72 are advertisements), 25 maps + [4] pp. advertisements. (Manuali Hoepli.) [This is Map 23, scale 1:36,000,000.]
 ► "F. Colorado" is labeled on the lower Colorado River; upstream, "F. Green (R. Verde)" is labeled but the Grand and San Juan Rivers are not labeled; "F. Colorado Chiquito" and "F. Gila" are labeled but the Virgin and Bill Williams Rivers are not. The entire Green-Colorado is depicted as encanyoned from headwater nearly to the Gila

confluence. The mouth of the Colorado is depicted without any indication of islands there at the head of "Golfo di California".

King, Clarence

WHEAT V:1215

- 1870 25.1697 **Part of the U.S. Engineer Department's Map of the Western States and Territories, Showing Location of Mining Districts.**
In: Atlas accompanying Volume III on mining industry. U.S. Geological Exploration of the Fortieth Parallel [King Survey], Plate 1. (Title-sheet includes contents, listing Plate 1 as "General Map, Showing Location of Mining Districts, U.S. Engineer Department.") [Title-sheet adds, "Engraved and printed by Julius Bien, New York".]
 ▶ Volume is extralimital to this Cartobibliography. Plate 1, however, is cited here because it displays the region along the "Rio Colorado Grande" to the Utah-Arizona boundary. A vast expanse between the Virgin River and the Colorado is blank. "Green River" below the confluence of "San Rafael River" turns to the southeast before abruptly ending, with the remaining distance to the Colorado delimiting the northeastern edge of the blank area. Labeled also is the confluence, "Supposed junction of the Rio Colorado & Rio San Juan", downstream of which, at the Utah-Arizona boundary, is marked "El Vado de los Padres". The mapped portions of this map are shown with shaded (hachured) physiography.

WHEAT V:1270 [with illustration facing p. 327]

- 1876 25.1040 **Engineer Department U.S.A. Geological and topographical atlas accompanying the report of the geological exploration of the fortieth parallel made by authority of the Honorable Secretary of War under the direction of Brig. and Brvt. Major General A. A. Humphreys Chief of Engineers U.S.A. by Clarence King U.S. Geologist in Charge 1876.** [No place]: U.S. Army, Engineer Department. ("Julius Bien Lith.")
 The Fortieth Parallel Survey, or King Survey, is extralimital to this Cartobibliography; but see the chart "Cordilleras", scale 60 miles = 1 inch, which serves as an index sheet for the remaining charts in this volume.
 ▶ "Colorado River" is delineated between the "Gulf of California" and the confluence of "Green River" and "Grand River". In the Grand Canyon region, between "Rio Virgin" and "Little Colorado or Flax River", the Colorado is drawn roughly, with six tributaries (not labeled) on its south side, and the north side labeled only "North Side Mt".

King, Harry

- 1890 24.871 **United States. Compiled under the direction of Henry Gannett, Chief Topographer by Harry King, Chief Draughtsman. 1890.** U.S. Geological Survey. ("Engraved by Julius Bien & C^o New York.") Scale 1:2,500,000. ("Contour lines are drawn at the following elevations above Sea level 100, 500, 1000, 1500 (except in the Colorado Basin and the Great Basin) 2000 and thence upward at each 1000 feet.")
 Various credits are given. Grand Canyon is not labeled but the boundaries of "Hualpai Ind Res." and "Suppai Ind. Res." are delineated, as is also the route of the Atlantic & Pacific Railroad (not labeled).

King, Philip B.

- 1969 24.109 (COMPILER) **Tectonic map of North America.** U.S. Geological Survey, scale 1:5,000,000.

King, Philip B.; Beikman, Helen M.; AND Edmonston, Gertrude J.

- 1974 24.110 **Geologic map of the United States (exclusive of Alaska and Hawaii).** U.S. Geological Survey, scale 1:2,500,000; 2 sheets + 1-sheet legend. [King and Beikman, compilers; geologic cartography by Edmonston.]

Kingsley, John; Colvin, Rodney G.; McIntyre, Joseph; Currey, Betty Ann; Menasco, Thomas; AND Currey, Jack L.

- 1972 10.9 **Pictorial color map of Grand Canyon : geology, history, points of interest, river and rapids.** Salt Lake City: River Map, 31 pp. (includes colored geologic map), scale 1:87,000. (Geological research and cartography by John Kingsley, Rodney G. Colvin, and Joseph McIntyre; historical research by Betty Ann Currey and Thomas Menasco; photography by Jack L. Currey; graphics by Bailey-Montague, Salt Lake City; printed by Paragon Press, Salt Lake City.)
River guide, despite generalized title. Includes fold-out leaves; pagination continues across individual folds.

Kino, Eusebio Francisco

see principally [Kino](#) in Section 1 of this Cartobibliography for items published before the 19th century.

- 1878 25.2094 **Via terrestris in Californiam comperta et detecta Per R. Patrem Eusebium Fran. Chino è S.I. Gerutanum Adnotatis novis Missionibus ejusdem Soctis ab Anno 1698, ad annum 1701.**
Caption: "Tabula Californiæ, Anno 1702. Ex autopticà observatione delineata a R. P. Chino è S.I." [In Latin and German, with legend also in English.]
Bottom legend: "Jesuit Map of Arizona 1698." ("Lith. Britton, Rey & Co. S.F.")
In: Hinton, Richard J., *The hand-book to Arizona : its resources, history, towns, mines, ruins and scenery. Amply illustrated. Accompanied with a new map of the territory.* San Francisco: Payot, Upham, and Co., and New York: American News Co., facing p. 384.
Compare, and see also remarks with, Kino (1726, [ITEM NO.](#) 25.1049, in Section 1 of this Cartobibliography), from which this was copied in part, which in turn had copied the map published in Kino (1705, [ITEM NO.](#) 25.629), with the 1726 version offering labels in Latin and German. The cartouch title cited above differs in minor points from the 1726 map.
▶ "Coloratus fl. seu Nord. Strom" (Coloratus fluvius seu Nord-Strom, in mixed Latin and German) is delineated flowing directly from the northeast to enter the head of "Mare Californiæ", southwest of the confluence of "Azul oder Blaufluss", with "Hila fl." a tributary to it to the east. The gulf separates "Californiæ Pars" from "Novum Mexicum" and "Novæ Hispaniæ Pars". In addition, this map emends Kino's by extending it southward to include the mouth of the gulf. The marginal notation in print divides the upper four-fifths of the map as "Tabula Geographica R. P. Eusebÿ Franc. Kino Tridentini é Soc. IESU"; the one-fifth (which is extralimital to this Cartobibliography) as "Tabula Chartæ Patris Chino adiax."
- 1878 25.2095 **Via terrestris in Californiam comperta et detecta Per R. Patrem Eusebium Fran. Chino è S.I. Gerutanum Adnotatis novis Missionibus ejusdem Soctis ab Anno 1698, ad annum 1701.**
Caption: "Tabula Californiæ, Anno 1702. Ex autopticà observatione delineata a R. P. Chino è S.I." [In Latin and German, with legend also in English.]
Bottom legend: "Jesuit Map of Arizona 1698." ("Lith. Britton, Rey & Co. S.F.")
In: Berton, Francis, *Un voyage sur le Colorado : par Francis Berton[,]* Membre Correspondant de la Société de Géographie de Genève. San Francisco: [no imprint], frontispiece (following the title-page).
Volume cover title: *Un Voyage sur le Colorado. 1878.*

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

Berton (p. [1]) indicated that just 50 copies were printed: “Je me suis donc décidé à en faire publier une cinquantaine d’exemplaires ici” The lithographic stones used in this volume, including this map, were with permission reused from Richard J. Hinton, *The hand-book to Arizona : its resources, history, towns, mines, ruins and scenery* (see the citation immediately above, [ITEM NO. 25.2094](#), with which see also the chorographical notes for this version of Kino’s map).

- 1902 25.1284 **Mapa de la California su Golfo y Provincias fronteras en el continente de Nueva España.**
[In Spanish.]
In: Hernández, Fortunato, *Las razas indigenas de Sonora y la guerra del Yaqui*. México: Talleres de la Casa Editorial “J. de Elizalde”, between pp. [vi]/[viii].
 Without credit, map reproduces the Kino (1701/1705) map after Venegas (1759, [ITEM NO. 25.1127](#)). It reproduces the cartouche, “Al Rey N.S. la Provincia de la Compañia de JHS de Nueva españa lo S. D.y C 1757.”
- 2014 25.2465 **Land Passage to California.**
In: Brotton, Jerry, *Great maps*. New York : DK Publishing (Penguin Random House), pp. 160-161.
 Based on Kino 1710, which text unfortunately implies that this is the first date for the publication of California as a peninsula (*refer to [Kino](#) in Section 1*).

Kipferling, K. J.

- 1806 25.2087 **America Nach dem neuesten geographischen und politischen Zustande zum Gebrauche der österreichischen Schulen entworfen Wien, Im Verlage des Kunst u. Industrie Compoirs. 1806.** (“G. von K. J. Kipferling.”) (Zur 3^{ten} Abtheilung des 2^{ten} Theils der neuesten Geographie.”) (“gestochen von F. T. Müller.”) **[In German.]**
 ► In “Neu Navarra” the head of “Busen Mar Vermejo das rothe oder purpur Meer” adds a long, very peculiarly shaped embayment to the west-northwest, which receives an erratically drawn river (not labeled) that approaches the embayment’s head from the east, which apparently is meant to be the Gila River. The Colorado River is absent; the entire region north of this stream is blank, with the label “Quivira” to the north.

Kirkwood, Robert

- 1817 25.2026 **The World on Mercator’s Projection.**
In: *Kirkwood’s general atlas, consisting of the following maps [45 listed]. Constructed from the best authorities extant. by Rob^t. Kirkwood Engraver Edinburgh, John Smith and Son Booksellers Glasgow & W^m. Faden London 1817. [Map 3.]*
 ► The Colorado River (not labeled) is depicted as an essentially straight line from mountainous headwater south-southwest to “G. of California.” A tributary (not labeled) from the east extends to and linearly through the same mountain range; presumably this is meant to be the Gila River drainage.
- 1817 25.2195 **North America.** (“Projected & Engraved by Rob^t. Kirkwood Edin^t.”)
In: *Kirkwood’s general atlas, consisting of the following maps [45 listed]. Constructed from the best authorities extant. by Rob^t. Kirkwood Engraver Edinburgh, John Smith and Son Booksellers Glasgow & W^m. Faden London 1817. [Map 7.]*
 ► The Colorado River is absent; in fact, the entire region, between two mountain ranges, is blank. A river (not labeled, but is the Gila River) comes from the east before turning southwest and bifurcating, rejoining at the head of “Gulf of California”.

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

1817 25.2196 **Spanish Dominions in North America.** ("Published as the Act directs by Rob^t. Kirkwood Edinburgh 1817.")

In: Kirkwood's general atlas, consisting of the following maps [45 listed].

Constructed from the best authorities extant. by Rob^t. Kirkwood Engraver Edinburgh, John Smith and Son Booksellers Glasgow & W^m. Faden London 1817. [Map 44.]

► The Colorado River, as in map **ITEM NO. 25.2195**, is absent, although in the expanse that is blank on that map are four isolated place names; this area serves as the northern limit of this map. The Gila River (not labeled) is shown far more clearly (even if imaginatively) than in map **ITEM NO. 25.2195**, with its farthest headwaters, seemingly definitively plotted, are in an area otherwise labeled "Unknown Parts". The Gila's course is westward before turning due south and bifurcating, flowing into two distinct embayments at the head of "Gulf of California".

Knight, William H.

- 1863 25.1029 **Bancroft's map of the Pacific States. Compiled by W^m H. Knight. Published by H. H. Bancroft & Co. Booksellers and Stationers, San Francisco, Cal. 1863.** WHEAT V:1061 [with illustration facing p. 74]
- 1866 25.1247 **Bancroft's map of the Rocky Mountain States, and the Pacific coast. Compiled by W^m H. Knight. Published by H. H. Bancroft & Co. Booksellers and Stationers, San Francisco, Cal. 1866.** WHEAT V:1132
- ▶ "Colorado R." is depicted between "Mexico" and the confluences of "Green R.", "Grande R." (Grand River), and "San Juan R." South of "Fort Yuma" and "Arizona City" the river continues some distance into Mexico before passing off the map, with no indication of the Gulf of California. The "Green" and "Grande" parallel each other, both coming to "Big Cañon of the Colorado"; it is unclear from the drawings whether "Grande" is implied to be a tributary to the San Juan or vice versa. "Little Colorado or Flax R." is shown as a tributary to the Colorado in the eastern Grand Canyon. "Virgin R." is shown as a tributary, into which "Muddy Cr." is in turn a tributary. "Bill Williams Fork" is shown. "Gila R." is a tributary to the Colorado at Arizona City.
- 1867 25.1030 **Bancroft's map of the Pacific States. Compiled by W^m Henry Knight. Published by H. H. Bancroft & Co. Booksellers and Stationers, San Francisco, Cal. 1867.** WHEAT V:1164
- Wheat (1963, Volume V, p. 223) calls this the "mother map" of a series of Bancroft maps.
- ▶ "Colorado Riv." (label below Yuma), "Colorado River" (label upstream) depicted from the U.S.-Mexico border to the confluence of the "Grand River" and "Green River". Callville is noted as "Present Head of Navigation", downstream from the confluence of "virgin Riv." "Big Cañon of the Colorado River" is labeled. "Red Lake" ("dry except during raining Season") in "Wallapi Valley" (Hualapai Valley) is depicted with "Yampi Cr." as a source and with an outlet to the Colorado River in western Grand Canyon where it is labeled "Supposed Head of Navigation". A "Proposed Wagon Road to Salt Lake [City]" is shown reaching the Colorado from the north at this point. "Diamond R." is shown as well as a tributary (not labeled) from the north that has its confluence with the Colorado just upstream from Diamond Creek. "Colorado Chiquito or Flax River" (Little Colorado River) is depicted with its confluence in central Grand Canyon, and "Cateract [*sic*] Cr." is shown as a tributary to it. In the "Colorado Desert" the entire Salton Basin is shown as "Salt Lake Dry except during rainy season Supposed to be below the level of the Sea".

Kohl, C. H.

- 1860 25.1688 **Karte über die für eine Eisenbahn vom Mississippi nach dem Stillen Weltmeere aufgesuchten Routes.** (Lith. Anst. v. Steinmetz & Bornemann in Meissen".) [In German.]
- In:* Ueber die Pacific-Eisenbahn und den Suez-Canal. Vortrag gehalten am 18. September 1859 in der II. Jahresversammlung des sächsischen Ingenieur-Vereins zu Chemnitz. *Der Civilingenieur* (Freiberg), New Series, 6: columns 203-234, plates 11-14 at end of volume.
- The map is "Taf. 11_12" [*sic*].
- ▶ Portrays "Rio Colorado" between the confluences of "R. San Juan" and "Rio Virgin" on a course that arcs from south nearly to due west, with "Colorado Chiquito" a tributary on a straight course from the southeast. Also shown as tributaries in this reach (but not labeled) are Cataract Creek and probably Diamond Creek.

Köhler, A. H.

- 1847 25.1986 **Nord-Amerika und West-Indien. Nach den neuesten Bestimmungun und Reischerichten entworfen und gezeichnet von A. H. Köhler Oberleut. im K. S. Ingen. Corps. Leipzig, 1847. J. C. Hinrichs'sche Buch_und Landkartenhandlung.** ("H. Leutemann sc.") Scale 1:20,000,000. **[In German.]**
In: Stein, C. G. D., *Neuer Atlas der Ganzen Erde für die gehildeten Stände und für Schulen. Vierundzwanzigste vermehrte und verbesserte Auflage.* Leipzig: Verlagseigenthum der J. C. Hinrichs'schen Buch- und Landkartenhandlung.
 ► The river "Colorado" is depicted between "Meerbusen v. Californien od. das Purpur-Meer" and the confluence of "Zaguananas" (Green River) and "Nabajoa" (San Juan River), in which reach the Colorado flows almost directly to the southwest; en route it receives from the east "Joquesila" (Little Colorado River), from the east and northeast an unlabeled tributary (Bill Williams River), and "Gila" that arrives together with the Colorado at the head of the gulf. Paralleling the Colorado from the latitude of the "Nabajoa" confluence are two rivers that converge at a point where they then flow southward to reach the Colorado; the easterly of these two rivers begins and ends with a solid line, dotted though its middle reach, and the westerly one, which reaches the easterly stream along a dotted line, is suggested by a dotted line to begin at an unlabeled lake, downstream from which the line briefly is made solid where it receives a short, solid-lined tributary from the northeast.
- 1854 25.1987 **Nord-Amerika und West-Indien. Nach den neuesten Bestimmungun und Reischerichten entworfen und gezeichnet von A. H. Köhler Oberleut. im K. S. Ingen. Corps. Leipzig, 1854. J. C. Hinrichs'sche Buch_und Landkartenhandlung.** ("H. Leutemann sc.") Scale 1:20,000,000. **[In German.]**
In: Stein, C. G. D., *Neuer Atlas der Ganzen Erde für die gehildeten Stände und für Schulen. Siebenundzwanzigste Auflage.* Leipzig: Verlagseigenthum der J. C. Hinrichs'schen Buch- und Landkartenhandlung.
 This map is the same as that of Köhler (1847, **ITEM NO.** 25.1986).
 ► The river "Colorado" is depicted between "Meerbusen v. Californien od. das Purpur-Meer" and the confluence of "Zaguananas" (Green River) and "Nabajoa" (San Juan River), in which reach the Colorado flows almost directly to the southwest; en route it receives from the east "Joquesila" (Little Colorado River), from the east and northeast an unlabeled tributary (Bill Williams River), and "Gila" that arrives together with the Colorado at the head of the gulf. Paralleling the Colorado from the latitude of the "Nabajoa" confluence are two rivers that converge at a point where they then flow southward to reach the Colorado; the easterly of these two rivers begins and ends with a solid line, dotted though its middle reach, and the westerly one, which reaches the easterly stream along a dotted line, is suggested by a dotted line to begin at an unlabeled lake, downstream from which the line briefly is made solid where it receives a short, solid-lined tributary from the northeast.

Konferenz der kantonalen Erziehungsdirektoren

- 1969 25.2420 **Vereinigte Staaten und Mexiko.** **[In German.]**
In: *Schwizerischer MittelschulAtlas : herausgegeben von der Konferenz der kantonalen Erziehungsdirektoren, Fünfzehnte Auflage, 1969.* (Bearbeitung und Originalzeichnung, Eduard Imhof; Kartentechnische Erstellung und Druck, Art. Institut Orell Füssli AG, Zürich.) Zürich: Zu beziehen durch den Lehrmittelverlag des kantons Zürich, pp. 114-115. [Schweizerische Konferenz der kantonalen Erziehungsdirektoren (*transl.* "Swiss Conference of Cantonal Directors of Education").]
 Shaded relief map.
 ► The course of "Colorado" through the Grand Canyon is oddly generalized. The label, "Cañon des Colorado" is positioned between the western Grand Canyon and southeastern Utah. "Ind.-Res." is labeled twice on the area embracing southeast

Utah/southwest Colorado and northeastern Arizona/northwestern New Mexico, without boundaries; similarly "Ind.-R" is labeled where the Hualapai Indian Reservation is located, also without boundary, and no other reservation is shown in the area of interest to this Cartobibliography.

L. L. Poates Engraving Co. of New York

- 1906 25.1852 **Map of Arizona, engraved by the L. L. Poates Engraving Co. of New York especially for The American Bank Reporter. Copyright, 1906, by Steurer Publishing Co., New York Banking towns are in gothic type.**
In: The American Bank Reporter. February-March, 1907. New York: Steurer Publishing Co., between pp. 8/9. [The serial is produced semi-annually. Other issues have not been examined.]
- ▶ The base map is peculiar, in that the encanyoned "Colorado River" is shown along its correct course through the Grand Canyon region while tributaries reflect a much older source. "Marble Cañon" is labeled between "Lees Ferry" and downstream of the "Little Colorado River" confluence; "Grand Cañon" is labeled between the "Kanab R." confluence and "Virgin River" confluence. "Grand Wash" is peculiarly shown as a disjointed system of streams, not reaching the Colorado River. Diamond Creek (not labeled) is depicted reaching the Colorado from due east. Cataract Creek (not labeled) is shown prominently, but three additional streams (not labeled) are shown reaching the Colorado generally from the south. The Paria River is not shown, but there are two tributaries that reach the Colorado from the east in the Lees Ferry area. (The San Juan River, not labeled, is also depicted on the map.) "Red Butte" is shown *southwest* of "Grand Canyon" village. The "Atchison Topeka & Santa Fe" railroad is shown crossing Arizona, with the "Grand Canyon" spur between Williams and Grand Canyon passing to the east of Red Butte and twice crossing one of the unlabeled tributaries. Another rail spur is shown from a point west of Kingman to Mineral Park and Chloride. The "Southern Pacific" railroad is also delineated. Another rail line, "(Building) Arizona & California", is shown between Parker on the Colorado River and rail lines reaching Prescott from the north and south.
-

Lahainaluna [mission]

- 1840 25.1509 **Ha Palapala Honua No Ka Poepoe** [A map of the globe]. ("Lahainaluna Maui 1839".) [In Hawaiian.]
In: He mau palapala aina a me na niele e pili ana. Hookahi Ke pai ana. Lahainaluna, Maui, [Hawai'i].
- ▶ On the continent of "Amerikaa" the only river labeled is "Misisipi M." In "Mesiko", the Colorado River (not labeled) is sketched in, feeding to the Gulf of

California (not labeled); and the Gila River (not labeled), with tributaries, is sketched, reaching the northeastern head of the gulf. Both rivers head in "M. Pohaku" (*i.e.*, Mauna Pōhaku [[Rocky Mountains](#)]).

1999 25.126 **Mega Atlas Arizona 1: 400 000.** Fürst: Berndtson u. B. [[In German.](#)]

Lange, Henry

1854 25.2017 **Nord America.** ("H. Lange's Atlas v. Nord Amerika." "Blatt I.") ("Braunschweig. Verlag v. George Westermann.") ("Lith. Anst. von L. Kraatz in Berlin.") [[In German.](#)]

In: Atlas von Nord-Amerika. Nach den neuesten Materialien, mit besonderer Rücksicht auf physikalische Verhältnisse und genauer Angabe der County-Eintheilung, der Eisenbahnen, Canäle, Postrassen und Dampschiffahrt, in 18 Blättern mit erläuterndem Texte herausgegeben von Henry Lange. Braunschweig: Verlag von George Westermann.

► The river "Colorado" is delineated reaching the head of "Golf von Californien", with its prominent upstream extension labeled "Verde" (Green River, although the manner in which the labels are written makes it seem as if this entire stream is, ambiguously, the "Colorado Verde"); enroute it receives three unlabeled tributaries, one from the east (San Juan River?), one from the east meeting the Colorado where would be the central Grand Canyon (Little Colorado River, probably), and one from the northwest and north (Virgin River, probably). "Gila" arrives independently at the head of the gulf from the east.

1854 25.2197 **Oregon, Californien, Utah, Neu Mexico, etc.** ("H. Lange's Atlas v. Nord Amerika." "Blatt XIII.") ("Braunschweig. Verlag v. George Westermann.") ("Lith. Anst. von L. Kraatz in Berlin.") [[In German.](#)]

In: Atlas von Nord-Amerika. Nach den neuesten Materialien, mit besonderer Rücksicht auf physikalische Verhältnisse und genauer Angabe der County-Eintheilung, der Eisenbahnen, Canäle, Postrassen und Dampschiffahrt, in 18 Blättern mit erläuterndem Texte herausgegeben von Henry Lange. Braunschweig: Verlag von George Westermann.

► "Rio Colorado" is delineated between the head of "Golf v. Californien" and the confluence of "Green R." and "Grand R." The courses of the lower Green and Grand both, as well as the Colorado between that confluence and the confluence of "Virgen", are delineated by dotted lines. Enroute the Colorado receives "S. Juan" (a solid-lined tributary from the east, along with "Rio de Chelly", a dotted-lined tributary from the southeast with a confluence with the San Juan very tightly against the San Juan's confluence with the Colorado), "Red R." (Little Colorado River, a meager, dotted-lined tributary from the east with its upper extent shown with a solid line). Interestingly, "Rio de Zuñi", actually a tributary to the Little Colorado, is delineated some distance to the south, as a tributary headwater of the Salt River. The upper reach of the Virgin River is labeled "Rio S. Clara". Midway along the south-trending Colorado between the Virgin and the gulf arrives a long, dotted-lined tributary from the northwest and west labeled "Mohave Riv (de las Animas)".

Lange, I. E.

- 1809 25.2216 **Charte von Nord_Amerika. [In German.]**
In: Neuer hand_ und Elementar_Atlas von der ganzen bekanten Erde in 16 Blaettern zur bequemen Übersicht aller Welttheile in geographischer und politischer Hinsicht mit einem statistischen Repertorium begleitet. Entworfen von I. E. Lange Math. Leipzig 1809.
 ► At the head of "Rothe Meer" (Red Sea, or Gulf of California) converge two rivers (not labeled), one from the north, the other, draining a far larger area, from the northeast. By the form of this latter river basin, it depicts the Colorado and Gila basins. All of these rivers cross at least one mountain range. The presumed Colorado heads in an area labeled "Missurier" and "Quivira".

Lapie, P. [Lapie, Pierre]

- 1816 25.2337 **Amérique Septentrionale ou Colombie, Drésée par P. Lapie, Géographe, 1816.** ("Adam et Giraldon dirext.") **[In French.]**
In: Lapie (Monsieur), Atlas classique et universel de géographie ancienne et moderne, dressé [sic] pour l'instruction de la jeunesse, et notamment pour les collèges royaux, et les ecoles militaires. Paris: Chez Magimel, Anselin, et Pochard.
 ► "R. Colorado" is delimited between the head of "Mer de Californie Vermeille ou de Cortes" and the confluence of "R. Zaguuanas" (Green River) and "R. Nabajoa" (San Juan River). Below that confluence the river follows an essentially direct course to the southwest to the head of the gulf. "R. Jaquesila" (Little Colorado River) is a tributary from the east, as also is an unlabeled tributary from the east. "R. Gila" arrives independently at the head of the gulf from the east. "R. des Martyres" parallels the Zaguuanas-Colorado stream until arcing to the south-southeast to arrive on the western side of the head of the gulf; its middle course and the final course to the gulf are delimited by dotted lines.

Lapie, [Pierre]

- 1819 25.2073 **Amérique Septentrionale et Méridionale Dédinée et Présentée au Roi, Par son très-humble très-obéissant très-dévoué et fidèle Sujet Lapie. Gravée par Blondeau, Graveur du Roi, et premier Graveur du Dépôt de la Guerre. à Paris. chez Basset, M^d d'Estampere, Rue S^t Jacques, N^o 64.** ("Ecrit par Rameau.") ("Déposée au Bureau des Estampes.") **[In French.]**
 ► "R. Colorado" is delimited between the head of "Mer Vermeille ou de Cortes" and the confluence of "R. Zaguuanas" (Green River) and "R. Jaquesila" (Little Colorado River). Below that confluence the river follows an essentially direct course to the southwest to the head of the gulf. "R. Gila" arrives independently at the head of the gulf from the east. Another river (not labeled, but similar to one variously labeled as Martires) parallels the Zaguuanas-Colorado stream until arcing to the south-southeast to arrive on the western side of the head of the gulf.

Lapie (Monsieur), AND Lapie fils (Monsieur) [Lapie, Pierre, AND Lapie, Alexandre Émile]

- 1833 25.1921 **Carte des États-Unis du Mexique Dressée par M. Lapie 1^{er}. Géograph du Roi Et M. Lapie fils Géograph de S.A.R. M. le Dauphin. Paris 1829. chez Eymery Fruger & C^{ie} Rue Mazarine N^o 30.** ("La gravure dirigée et exécutée par Lallemand".) ("Atlas Universel" "44^e") **[In French.]**
 Map includes inset that is extralimital to this Cartobibliography, "Carte du Guatemala ou Provinces-Unies de l'Amérique Centrale".

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

In: Atlas universel de géographie ancienne et moderne, précédé d'un abrégé de géographie physique et historique. Paris: Eymery, Fruger et Cie [with opposite title-page imprint, Paris: Imprimerie De Casimir. [Volume dated 1829 but contains some maps with 1833 date.]

► "R. Colorado ou Rouge" is depicted on a mostly straight course between the head of "Golfe de Californie ou Mer Vermeille" and the confluence of "R. Zaguanas" (Green River, from the north) and "R. Nabajao" (San Juan River, from the east); enroute it receives tributaries "R. Jaquesila" (Little Colorado River, from the east), "R. S. Maria" (Bill Williams River, from the east and northeast), "R. Amarillo" (from the north-northwest but which is shown as a significant but peculiar tributary that mostly parallels the Colorado from a single headwater farther north than the Green-San Juan confluence), and, not far below the "Amarillo" confluence, "R. Gila" from the east.

1838 25.1920 **Carte des États-Unis du Mexique Dressée par M. Lapie Colonel d'Etat Major. Et M. Lapie fils Capitaine au même Corp. Paris 1842. chez P. C. Lehubey Lib^{re} Rue de Seine N^o 48.** ("Gravé par Pierre Tardieu." "Imp. chez Kaepelin et Cie^{re}") [In French.]

► The physical geography is the same as that of Lapie and Lapie (1829 [1833], ITEM NO. 25.1921. "R. Colorado ou Rouge" is depicted on a mostly straight course between the head of "Golfe de Californie ou Mer Vermeille" and the confluence of "R. Zaguanas" (Green River, from the north) and "R. Nabajao" (San Juan River, from the east); enroute it receives tributaries "R. Jaquesila" (Little Colorado River, from the east), "R. S. Maria" (Bill Williams River, from the east and northeast), "R. Amarillo" (from the north-northwest but which is shown as a significant but peculiar tributary that mostly parallels the Colorado from a single headwater farther north than the Green-San Juan confluence), and, not far below the "Amarillo" confluence, "R. Gila" from the east.

Map includes inset that is extralimital to this Cartobibliography, "Carte du Guatemala ou Provinces-Unies de l'Amérique Centrale".

1842 25.63 **Carte des États-Unis du Mexique Dressée par M. Lapie Colonel d'Etat Major. Et M. Lapie fils Capitaine au même Corp. Paris 1842. chez P. C. Lehubey Lib^{re} Rue de Seine N^o 53.** ("Gravé par Pierre Tardieu." "Imprimé par Kaepelin & Cie^{re}") ("Atlas Universel" "44^e") [In French.]

► The physical geography is the same as that of Lapie and Lapie (1829 [1833], ITEM NO. 25.1921, and 1838, ITEM NO. 25.1920). "R. Colorado ou Rouge" is depicted on a mostly straight course between the head of "Golfe de Californie ou Mer Vermeille" and the confluence of "R. Zaguanas" (Green River, from the north) and "R. Nabajao" (San Juan River, from the east); enroute it receives tributaries "R. Jaquesila" (Little Colorado River, from the east), "R. S. Maria" (Bill Williams River, from the east and northeast), "R. Amarillo" (from the north-northwest but which is shown as a significant but peculiar tributary that mostly parallels the Colorado from a single headwater farther north than the Green-San Juan confluence), and, not far below the "Amarillo" confluence, "R. Gila" from the east.

Map includes inset that is extralimital to this Cartobibliography, "Carte du Guatemala ou Provinces-Unies de l'Amérique Centrale".

1851 25.2357 **Carte des États-Unis d'Amérique, du Canada, du Nouveau Brunswick et d'une partie de la Nouvelle Bretagne. Dressée par M. Lapie Colonel et M. Lapie fils, Chef d'Esc^{adron} d'Etat Major. Paris 1851. Chez P. C. Lehubey. Rue de Seine N^o 55.** ("Gravée par Pierre Tardieu.") [In French.]

In: Atlas universel de géographie ancienne et moderne précédé d'un abrégé de géographie physique et historique. Paris: P. C. Lehubey, map 43e.

► "R. Colorado" is delineated between the head of the Gulf of California (which lies off the map to the south, occluded by the title block) and headwaters that lie on the present Green River (also labeled there as "R. Colorado"). Its course is south, receiving two unlabeled tributaries the "R. S. Joaquim" (*sic*, perhaps the Grand River) from the northeast, turning sharply to the west-southwest, receiving an unlabeled

SECTION 2: MAPS OF THE 19TH–21ST CENTURIES

tributary from the east (perhaps the San Juan River, judging by its position northeast of the Hopi pueblos), then arcs gradually to the southwest and south to reach the head of the gulf, receiving en route only "R. Mahave" [*sic*] from the west and "R. Gila" from the east. Note that the Little Colorado and Virgin Rivers seem to be entirely absent, although a disjointed stream without specific headwater or confluence lies on an east–southwest arc to the east of the Hopi pueblos, which could be a part of the Little Colorado basin. The route and campsites of the Domínguez–Escalante expedition are copied onto this map, suggesting an actual trail, which crosses the Colorado south of the unlabeled tributary that is here suggested to be the San Juan.

- 1851 25.2358 **Carte des États-Unis du Mexique Dressée par M. Lapie Colonel d'Etat Major. Et M. Lapie fils, Chef d'Esc^{on} au même Corps. Paris 1851. chez P. C. Lehuby Lib^{re} Rue de Seine N^o 55.** ("Gravée par Pierre Tardieu." [this has been reengraved over what previously had been "La gravure dirigée et exécutée par Lallemand".]) [*In French.*]
In: Atlas universel de géographie ancienne et moderne précédé d'un abrégé de géographie physique et historique. Paris: P. C. Lehuby, map 44e.
