PUBLICATIONS LIST

with embedded download links for PDFs and Flip Books

IN THE PDF VERSION OF THIS LIST ALL URLS ARE LIVE HYPERLINKS

The Raven's Perch Media website does not require log-ins. There is no tracking and no information will be asked for.

All publications are free.

MOST ITEMS FROM RAVEN'S PERCH MEDIA ARE **DOWNLOADABLE SEARCHABLE PDFs**. MANY OF THEM EMBED **ACTIVE HYERLINKS** THROUGHOUT. THE LINKS IN THIS PUBLICATIONS LIST WILL DOWNLOAD THESE PUBLICATIONS DIRECTLY FROM THE RAVEN'S PERCH MEDIA WEBSITE. FILE SIZE AND NUMBER OF PAGES ARE INDICATED FOR EACH. MOST PDFs ARE DESIGNED IN BOOK LAYOUT FOR OPPOSING-PAGE VIEWING ON WIDE SCREENS, BUT VIEWING AS SEQUENTIAL PAGES IS SATISFACTORY.

NEARLY ALL PUBLICATIONS ARE ALSO AVAILABLE AS ONLINE **FLIP BOOKS** — LINKS ARE PROVIDED. THE FLIP BOOKS ARE NOT DOWNLOADABLE BUT ARE FULLY SEARCHABLE, AND EMBEDDED HYPERLINKS ALL ARE ACTIVE. THE URLS FOR THE FLIP BOOKS CAN BE COPIED AND SHARED. LIMITED PAGE SAVING AND SHARING FROM THE FLIP BOOKS IS POSSIBLE.

Note: When "Item Numbers" are mentioned herein, they pertain to unique identification numbers that are applied to every citation in THE GRAND CANON. They appear as decimal numbers; for example, 19.3484. The prefix indicates the Part number in Volume 1/Part B (*Bibliography*); the suffix is applied when an Item Number is assigned during the process of compiling the bibliography. This is more fully explained in Volumes 1 and 2. (All Bibliography part numbers are shown in the [separate itemization](#) of downloadable sections and parts at the end of the main Publications List.)

THE GRAND CANON

A WORLDWIDE BIBLIOGRAPHY OF THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS OF THE UNITED STATES AND MEXICO — 16TH TO 21ST CENTURIES

canon — a standard or essential list of works

THE GRAND CANON is a worldwide bibliography of the Grand Canyon and lower Colorado River regions in the southwestern United States and northwestern Mexico (in Arizona, Nevada, California, Baja California, and Sonora). This **canon**—a single, essential resource and guide—saves the extensive record of general, creative and technical compositions about, or even just touching upon, the land, the river, and the people there.

The bibliography (Volume 1/Part B) is a historical record of activities and interests, divided into 32 subject areas—in Volume 1/Part B: Bibliography and a separate Cartobibliography (Volume 2)—containing 111,000 citations in 115 languages published during 490 years, from circa 1535 to 2025,¹ produced in countries from Afghanistan to Zimbabwe. Proving a long-lasting, worldwide engagement with this region, the items embrace general and specific subjects including history, biography, and geography; social, natural, physical, and environmental sciences; engineering projects and water management policies; administrative oversight; legislative and judicial affairs; concerns of public-interest and special-advocacy organizations; interests and activities of Indigenous peoples; and works for and by youth and young adults. Publications are commonplace, technical, and specialized; in inkprint, special media for the visually impaired, and audio, audio-visual, and physically produced digital media. They have been published in popular, academic, commercial, and governmental venues, and privately.

No comparable bibliography exists for any other historical, natural, recreational, or utilitarian area overseen by federal or state agencies of the United States or Mexico. Value-added products can be created by academics, professionals, and avocational enthusiasts—even now Artificial Intelligence practitioners. Trends in personal, professional, and official interests may be detected in citations spanning decades and centuries. It serves, too, as a unique evidentiary record for administrators and resource managers who work within federal, state, Native American, and other jurisdictions covered by this work, and for specialists in public advocacy and not-for-profit organizations that have concerns in this region. Subsets of citations from this bibliography may serve as foundations for specialized and applied uses, scholarly studies, and administrative analysis and record.

Additional sections within Volume 1/Part A introduce readers to the Grand Canyon and lower Colorado River regions, and to the continued value of bibliographies even in the digital age.

¹ The bibliography (Volume 1/Part B) now available in its 5th Edition (2025) records publications through 2024, with a few titles having 2025 dates that were compiled in late 2024 and early January 2025. Together with the *Cartobibliography* (Volume 2) publications are cited from ca. 1535–2024. See the section, “Notes About the Earliest Works (Mid-16th Century)” that appears in THE GRAND CANON Volume 1/Part A (pp. 95-101) and in Volume 2 (in the separately paginated Introduction, pp. 28-34).

<https://ravensperch.org/wp-content/uploads/2025/01/Carto-citation-explanation.pdf>

The primary purpose of this Cartobibliography is to record cartographical data that relate to the Grand Canyon and lower Colorado River regions—a so-called chorographical analysis. It is not meant to be fully a cartobibliography that preserves the overall context of the map, nor does it record nuances that are a part of more proper historiographical cartobibliographies. Dates generally reflect the dates of publication, more so than dates that may appear on a map. In many cases, dates are adopted from those that are recorded or inter-preted by cartobibliographers and cartographical librarians in their catalogs. The notes that accompany a citation here are mostly restricted to a general description of how the Colorado River, its tributaries, and the landscape along its course are portrayed. The citations are not so much geographical as they are chorographical. Although such focus can draw attention away from the map's *intended* function, in the context of THE GRAND CANON these chorographically focused points are of greater importance.

https://ravensperch.org/wp-content/uploads/2025/01/Colossal-Mirror_toc.pdf

This is a comprehensive list of the "other" Grand Canyons—physical, imaginary and literary—around the world and on other worlds. It identifies more than a thousand usages of the term, "Grand Canyon", and hundreds of variant usages of the term in analogy, metaphor and neology. Section 1 is geographically arranged, with a separate alphabetical listing of every geographically-reused "Grand Canyon" term. Section 2 is segregated according to analogy, metaphor, and neological construct. An appendix addresses the many variant names of the Colorado River.

THE GRAND CANON

EARLIER EDITIONS (2012–2022)

Each volume of THE GRAND CANON is cumulative, superseding earlier editions with added and revised citations, corrections, and revisions to format; but all volumes have variant front matter.

Enumerated volumes of THE GRAND CANON series were instituted in 2022.

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/ufyc/>

(From the Preface) Here I quote from early visitors' encounters with the Grand Canyon. If they had little to say, well and good, but those who gushed at length have had to be accommodated as well. Most were enthusiastic, as we might hope they would be, but there were a few who groused of their experience. They are all part of one story, a compilation of which has never before been made. There are anthologies, of course, that delve into a few of the works cited herein, but often even they curtail some of the additional interesting remarks that the writers had made. But I have no intention of replicating every word that they have written—especially those of the pioneer chroniclers, Balduin Möllhausen, Joseph C. Ives, John Wesley Powell, and Clarence E. Dutton in particular, who wrote entire books. I instead have had to arrange a transcript of worthwhile parts of their texts, which deliver specifically personal observations of their encounters with the Grand Canyon, going further than many of the time-honored (perhaps worn-out) series of quotations, although for comprehensiveness I must also embrace those exhausted scripts.

Beyond the luminaries, many if not most of the authors quoted here will be unknown; or perhaps just forgotten in the passage of years. Some were brief; others elaborated at such great length that the

RAVEN'S PERCH MEDIA : ANTHOLOGICAL WORKS

more essential accounts of their experiences had to be culled from even longer texts. They report observations, but better yet many of them go into personal reflections. Those who wrote in languages other than English are translated here, usually for the first time.

Arrangement:

Introduction

Part I: Primary Explorations

Part II: To, Into, and Expressing the Canyon

Part III: Down (and Up) the Colorado

For materials from the Public Domain as of 2022 (up to 1926), non-English sources are quoted in anthological fashion in their original languages and in English translation. Citations for publications after 1926 are annotated.

(From the Introduction) *The Grand Canyon!* is all about being at and interacting with the Grand Canyon. So much has been written about the Grand Canyon from personal experience that it may be surprising that a comprehensive record of these impressions has never been put together. Never has every reference been compiled —nor for that matter have so many items been forgotten from the very time they were published. Yes, there are bibliographies, but most of them are specialized or embrace the tremendous hail of everything that goes beyond personal records and impressions. *The Grand Canyon!* cites, quotes, and annotates the published records of personal encounters with the Grand Canyon, or accounts told on behalf of those who were there, from 1540 to 2022.

True, a number of items have been reprinted in whole or in part in anthologies and similar volumes of prepared reprintings, but they are selective; some repeat the “same old” things. Beyond that, seemingly innumerable writers have quoted the “same old” passages from “A-list” authors like John Wesley Powell and Joseph C. Ives, even though Powell, Ives, and the others had many more interesting things to say beyond those quotations. This volume has to use these standard works, too. But it goes far beyond them, gathering up things that have been forgotten or effectively never known. As for “B-list” writers (and lower), some of them probably should remain forgotten—for their unstimulated perceptions or tortured prose and verse—but this is not a work of critical analysis. Here is everything, as much as could be found, each someone’s personal experience, lavish and cursory alike, each a part of the Grand Canyon story, take it or leave it. Some things were published in languages other than English, which of course hid their discovery at least among readers of English. As many of these as possible have been found, too; and they are reprinted in their original languages *and* in English translation herein. To have subjectively edited out the “less worthy” or “overly wordy” publications, or those that simply are not in English, would dismiss the very administrative purpose of this volume—to document the world’s infatuation with—its “use” of—the Grand Canyon.

Puerto de Bucareli (1777-1884)

Big Canyon (1853-1910)

Great Canyon (1853-1879)

Grand Canyon (1868-present)

Mapping Grand Canyon, extensively illustrated, focuses on maps on which the Grand Canyon is labeled by one of its four Western-derived names during the past two and a half centuries, though without particular formality or consistency. (For a general introduction to the evolution of these names, see *Naming the Grand Canyon*.) This compendium may ignore important interpretive and human-focused information on the maps that might be more significant to cartographical historians; for example, the revision of political geographies. Instead, most citations herein contain chorographical points that concern the physical geography of the region; specifically, the Grand Canyon mapped by its various names, and its immediate surroundings. However, once maps of the 20th and 21st centuries are encountered in the chronological presentations, less focus is had on the descriptions of mapped physical features because by then the region is well mapped, correctly presented, and under one name (Grand Canyon), when this thus becomes a current cartobibliography for the canyon.

 5. Modified Linear Colorado
 6. The Egloffstein Model and Variants
 7. Parallel Green and Grand Rivers as Colorado Tributaries
 8. The Colorado's Bactrian Course Through the Grand Canyon
- Appendix—Selected Early Maps of Historical Importance.

(From the Introduction) This is an extensively illustrated catobibliographical primer on drawing the Colorado River during the sixteenth to nineteenth centuries. It contrasts contemporary understandings of geographical relationships with current knowledge. The examples here focus on the river; how its course, tributaries, and outlet to the sea were depicted over time. In some later cases a finer focus is had on the Grand Canyon region.

Eight basic styles are identified here that describe how the Colorado River's course was drawn across the North American Southwest, and how its mouth was depicted where the river meets the sea. For each particular style, the maps presented here are chosen from among many similar ones, without particular regard to the absolute range of years of production or publication for a given style, since maps were reused or reprinted for years without improvements to the physical geography portrayed on them. Further, it is not the purpose of this survey to produce a historiographical accounting of these styles. This volume utilizes illustrations that focus only on the Colorado River region, from maps which otherwise encompass far broader geographies. Users even of these detailed views will surely take note of interesting points or displays that are otherwise not relevant to this survey, which always is one of the pleasures of perusing maps. Although only cropped quadrangles are usually presented, the maps are fully cited from the much more comprehensive *Cartobibliography of the Grand Canyon and Lower Colorado River Regions in the United States and Mexico*.

The selected maps do not imply they are the "first" or "last" among such examples; they have been picked for clarity or special note. They do, however, help bracket the times when various styles were in vogue, and it is for this reason that within each style the examples are given in chronological order by dates of publication, which nonetheless does not represent a progression in geographical knowledge. In fact, recopying maps could be a slipshod affair, such as with careless identifications and placement of specific geographic localities, like towns. This aspect is not particularly of interest in this survey, though comparative studies of maps that do look at these placements are of great interest to historians and cartographical scholars. Such forms of erroneous presentations were partly due to the fact that printing blocks and plates were shared, inherited, and otherwise reused in various fashions, often copied, sometimes plagiarized; many with modifications, supported and baseless alike. In more recent times, in the nineteenth century notably, we sense the angst of ateliers who, to make a living, regularly turned out new maps and charts that posed as new, often barely revised if only to change the date. Sometimes there were multiple editions during a year that may have meant to keep up with rapidly revised political boundaries

RAVEN'S PERCH MEDIA : SPECIALIZED CARTOGRAPHICAL PRODUCTIONS

and civil concerns. Physical geography often fell to the wayside, with some maps relying on outdated bases on which newer boundaries and other data were printed.

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/aelp/>

(Abstract) In early January 1858, at Fort Yuma, California, Prussian baron Friedrich Wilhelm von Egloffstein joined an exploring expedition under the command of Lt. Joseph Christmas Ives. Their objective was to map the Colorado River and locate its head of navigation, thence explore overland across the northern tier of New Mexico Territory. The mission covertly scouted Mormon advances into the region and sought means by which to gain access to interior locations closer to Utah by way of the river. During the land expedition they hoped to locate the confluence of the Little Colorado River with the main Colorado; in the process they went into the Grand Canyon twice. A veteran of other expeditions in the West, Egloffstein created for Ives' 1861 final report many scenic illustrations and two shaded relief maps. "Map No. 2" depicts—for the first time—a visual concept of the physiography of the Grand Canyon ("Big Cañon" as it was known then). The technical means that he was still in the process of inventing to make these relief maps has been praised. It was a proprietary and still not wholly understood process of heliography, by which a sculpted plaster model was photographically processed as an engraving in steel. But the topographer has been unfairly criticized for geographical oddities on his map, and the present study aims to remove much of that disapproval. The map displays the results of field-based surveys and adds borrowed and hypothetical topographies. As this study demonstrates, the baron's survey work was reasonably accurate, and his interpretive work is explicable though he may have been affected by the geographic notions of available maps. Later, cartographers who depended on his map to help produce newer maps of the greater Southwest and North America redrew landscapes in and around the Grand Canyon that were less faithful to ground truth and were not corrected for years. These cartographical trajectories of "Map No. 2" have not been explored before. *A Big Misunderstanding* is a graphic study of the whole and details of the Grand Canyon map with comparisons to modern and period maps of the region. It rationalizes the limits of visual observation that Egloffstein faced during the land expedition and speculates on what motivated him to fill in the areas that he did not survey. Examples of apparent earlier influences on Egloffstein's cartographic presentation are illustrated, along with specimens of later maps that distorted his geographies.

Introduction

1. Trying Out the Canyon: First and Early Samples of Grand Canyon Art

1851 — Richard Kern

1858 — Balduin Möllhausen and Friedrich Wilhelm von Egloffstein

About 1872–1875 —Various artists, for J. W. Powell

1872–1873 — William Henry Holmes and Thomas Moran

1875 and later —Edwin E. Howell

1875 and later —Frederick S. Dellenbaugh

1891 — Henry Moubray Cadell

Turn of the Century — Thomas Moran

1903 — François E. Matthes

1906 — Louis Akin

1923 — Sven Hedin

2. Reusing and Reimagining Illustrations

3. An Unusual Piece of Government Artwork

Part 1. Complete Bibliography Arranged by Author of Publication

Part 2. Selected Bibliography Arranged by Names of Artists

The Introduction is a very brief, admittedly arbitrary, primer of Grand Canyon art for readers who may not be very familiar with the subject, highlighting some usual and some appealingly unusual aspects about well-known and obscure artists alike, and a few of their pieces. It also finds some new perspectives and makes a few comparisons that might be thought-provoking, perhaps unrealized. The annotated bibliography gathers citations for publications, beginning in 1853, that in some way mention or illustrate the work of Grand Canyon artists between 1851 and 2023. It serves as a documentary effort that confirms the breadth and depth of artistic interest in the Grand Canyon. It also introduces numerous artists who have not had the privilege of being “recognized” in the world of art, such as those whose work was contributed “on the fly” to various journals and magazines, who are not acclaimed artists in their own right.

- 4 Commercial Aviation
- 5 Military and Government Aviation
- 6 Rotorwing Aviation
- 7 Lighter-Than-Air Aviation
- 8 Wingsuit and Other Body Flight
- 9 Aerobatics and Stunts
- 10 Aviation Infrastructure (Airports, Airstrips, and Appurtenant Facilities)
- 11 Aviation Accidents, Medevacs, Aerial Searches, and Human-Safety Concerns

PART 2. 1956 Mid-Air Collision

PART 3. Administrative Matters Relating to Grand Canyon Aviation

Selected Postcard Aerial Views

Aerial Grand Canyon gathers the published record of all manner of aviation events, issues, and policies over more than a century—as many as have been found during the compiler's work of more than 50 years. The various categories of the topical bibliography in **Part 1** best bring to light the types of aviation that have taken place at Grand Canyon. Some of it may reveal new things to some readers; for example, the accounts of those who had (illegally) hang-glided into the canyon and (legally) flown over it wearing only body wingsuits of one sort or another. Aerobatic flying and stunts other than wingsuit flights, and items about aviation infrastructure likewise offer unusual perspectives not often thought about. These are in addition to categories that might be expected, including tourism; general, commercial, and military aviation, rotorwing and lighter-than-air aviation; and aviation accidents, medevacs, aerial searches, and human-safety records. **Part 2** is devoted to the 1956 midair collision of two commercial airliners over the Grand Canyon, in which 128 people died, and which instigated the beginnings of modern air traffic control. **Part 3** is a comprehensive bibliographical accounting of government administrative matters relating to Grand Canyon aviation.

BIOGRAPHICAL BIBLIOGRAPHY

"Too numerous to name." Noteworthy (and Unfamiliar) People of the Grand Canyon of Arizona

An Annotated Biographical Bibliography of Historic Connections, Individual Accomplishments, Records of Peculiar or Transient Interest, and Notable Visitors Since 1540

(2024)

10 MB, 1234 pp.

<https://ravensperch.org/wp-content/uploads/2024/08/Too-numerous-to-name.pdf>

FLIP BOOK NOT AVAILABLE

(From the Introduction) This biographical bibliography documents published records of the presence and activities of people (and a few animals) at the Grand Canyon and on the Colorado River. Some items are written by the people themselves, others contribute information about the subjects. To be a little more useful, as often as possible notes indicate when these people lived and briefly summarizes what they did more generally. This volume does not delve into the wealth of unpublished records (like administrators' reports, manuscripts, casual collations not distributed in multiple copies, and so forth), and thus many individuals who would otherwise be certain, topically, to be included herein are absent.

This is a first-effort project, one based solely on published material. The key objective of this collection is to provide conveniently citable sources, many of them easy to find. Most of them will also tell, if not directly then from their publication dates, specifically or within a range of time when these people were present or active at the canyon or on the river.

CAVES AND CAVE RESOURCES

Grand Canyon Underground

The Bibliographical Record of Caves in Grand Canyon National Park, Grand Canyon–Parashant National Monument, and Vicinity (Arizona)

2nd Edition (2025)

2.6 MB, 92 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Grand-Canyon-Underground_2nd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/qkcf/>

Arranged geographically by political units listed by names of caves and sites; with introductory notes:

Grand Canyon National Park

Grand Canyon–Parashant National Monument and Nearby Arizona Strip Locales

(including lands of the U.S. Bureau of Land Management Arizona Strip Office)

Navajo Nation

Extralimital Locales of Interest

"Grand Canyon Caverns" at "Dinosaur City"

Misleading and Fictional Items

The "Egyptian Cave" Rumor

This is not a "guide" to Grand Canyon caves; it is a bibliographical and historical record of *published materials* that pertain specifically or partly to each named cave. Locations are not given for the caves due to concerns for resource management and cultural sensitivity, although a few of them are very well known even if they are not accessible by the general public.

GRAND CANYON'S UNCONVENTIONAL PAST

Contrary Canyon

A Bibliographical Guide to the Grand Canyon's Unconventional Past
2nd Edition (2025)

2.3 MB, 118 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Contrary-Canyon_2nd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/ypiq/>

Arranged in topical chapters with introductions:

1. Ancient Asian Visitors
2. The Egyptian Cave and Underground Cities
3. UFOs, Alien Activities, and Other Celestial Connections
4. Geology Askew
5. Young-Earth Creationism
6. Counterpoints to Young-Earth Creationism, Old-Earth Creationism Alternatives, and Historical Perspectives

This volume is the first accounting devoted only to the exceptional or eccentric aspects of the Grand Canyon, as delivered through publications. It brings to attention the pool of books, magazine articles, and other productions that do not adhere to widespread conventions about the Grand Canyon's history and science. With the assistance of web searches, one may find a great many more resources that go much further into detail about any of the topics listed herein; but these often unsupervised items are ephemeral, so they are overlooked here. This guide is restricted to published records, which generally guarantees that there are multiple, identical copies of a work that will be accessible, somewhere, for a long time.

GROUNDWATERS

Groundwaters of the Grand Canyon Region, Arizona

**A Research Bibliography of Groundwater Hydrology and the Record of Environmental Issues, Legislative Oversight, and Native American Cultural Concerns of Groundwater Use: with annotations: 1880–2024
Plus: A Bibliography of Grand Canyon Springs Ecology
(2024)**

2.7 MB; 102 pp.

<https://ravensperch.org/wp-content/uploads/2024/11/Groundwaters.pdf>

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/qgab/>

Arrangement:

Part 1: Groundwater Hydrogeology

Part 2: Environmental Issues, Legislative Oversight, and Native American Cultural Concerns

Part 3: Springs Ecology of the Grand Canyon Region

This research bibliography is more than a list of publications. Its content—and more directly the content of the cited publications—displays the breadth of interest and activities in the ecology of Grand Canyon's springs, the hydrogeology of the karst groundwaters that are their sources. There are as well the concerns that the physical effects of the mining operation inside the plateau can alter the coursework of groundwaters and the ecologies of spring areas. When the spring waters are well used by people, the level of concern escalates. Concerns and reactions also appear among administrative, legal, and legislative agential bodies. In fact, interest in the Grand Canyon's groundwaters goes back at least to 1880, when it seems that the warm springs below Lava Falls of the Colorado River were already recognized, although in those days the reasons for interest were both scientific and commercial (therapeutic, supposedly).

HOOVER DAM

The Hoover Dam Bibliography

2nd Edition (2025)

With appendices:

Mike O'Callaghan–Pat Tillman Memorial Bridge; Selected Maps

General Guide to Documentation for Hoover Dam and Boulder City in Historic-Places Registers

General Guide to Commercially produced 3-D Transparency Products

4.5 MB, 354 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Hoover-Dam_2nd-ed_.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/jrqh/>

This bibliography focuses on the Hoover Dam, in the Colorado River on the Arizona–Nevada boundary, its power plant, and appurtenant structures. Coverage spans the twentieth century and the twenty-first to date. It includes all issues pertaining to conceptualization, planning, physical construction, and work force management. Also listed are publications concerning Boulder City, Nevada, principally during the period of construction. Many additional publications about more modern aspects of Boulder City will be found listed throughout Part 2 of THE GRAND CANON, although from among them selected items about historical subjects are cited herein, inasmuch as they reflect on the construction era. Items that pertain to the new Visitor Center at Hoover Dam (1995), specifically its construction, are included as a pragmatic matter, inasmuch as it is a part of the Hoover Dam infrastructural complex. Similarly included are publications about things that are a part of the dam and other infrastructure, such as plaques, memorials, and sculptures and other art work. Minor editing may have been made to some of the original citations taken from THE GRAND CANON, in order to eliminate comments that unnecessarily refer to places other than Hoover Dam.

Also cited are numerous brief notes that relate to contracts solicited and awarded (or rejected) for the construction of Hoover Dam and Boulder City. These appear in trade publications like *Building and Engineering News* and *Pacific Constructor*, among others. However, not all years of some publications were available to the compiler, so a representative selection of these notices are taken from the early and later years of dam construction. Users thus should be aware that intervening years will contain many more such bits of information. Those that are cited herein offer an engaging narrative of activities in themselves, as well as preserving interesting facts that might not be found elsewhere.

JAMES WHITE AND JOHN HANCE

"It was this way..." The Grand Canyon's Indubitable James White and John Hance

An Introduction and Annotated Bibliography

(2023)

7 MB; 134 pp.

https://ravensperch.org/wp-content/uploads/2023/05/It_was_this_way.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/oipy/>

At least in the annals of Grand Canyon history James White and John Hance need no introduction. Suffice to say, the experiences of these men are unbelievable!

Arrangement:

Introduction—Owning the Grand Canyon

Part I — James White

Introduction

1. James White, the Accounts
2. James White, the Illustrations
3. James White, the Inspirations
4. James White: An Annotated Bibliography

Part II — John Hance

Introduction

1. A John Hance Sampler
 - John Hance, In His Words, As Retold (a semi-bibliographical gathering)
 - Hance Buys a Mule (a verifiable, even if made-up, tale)
 2. About Miss Gardner's (?) Scrapbook
 3. John Hance: A Truthfully Annotated Bibliography
-

MULES AND OTHER EQUIDS OF GRAND CANYON

Miles and Miles of Mules

An Annotated Bibliographical Record of Grand Canyon's Assistants and Equine Associates

(2024)

6 MB, 114 pp.

<https://ravensperch.org/wp-content/uploads/2024/03/Mules.pdf>

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/nbjl/>

Arrangement:

Downtrail [introduction]

Mules

Donkeys*

Burros*

"Brighty of the Grand Canyon"—A Burro

Horses

"The Miniature Horse Hoax"

Feral Equids

Fossil Equids

(Excerpts from "Downtrail") It's something about the mules. *The Grand Canyon mules*. The epitome—no, the quintessence—of the Grand Canyon experience.

They're legendary, those mules. For well more than a century, "everyone" has heard about "the Grand Canyon mules" even if they have not been to the Canyon. Riding into the Canyon was something to aspire to. Ride a Grand Canyon mule and die. A lot of riders thought that was their fate once they were on the way down the trail, or so they reported afterward, for heroic effect, or perhaps truthfully—we might never know. Riding into the Canyon was not to be missed for the world, they said, but never again.

It's not *just* the mules that are rounded up in this annotated bibliography. Their many assistants, associates, and ancestors play as well in this small and sometimes just plain fun slot in Grand Canyon's history. Climb aboard anywhere and see.

**Note:* Donkeys and burros are the same, though the former is generally reserved for the domesticated animal, the latter for feral and formerly feral animals. They are segregated in this bibliography strictly for the informational value of an author's own usage.

NATIVE AMERICANS

Bibliography of Native Americans Traditionally Associated with the Grand Canyon

3rd Edition (2025)

5.4 MB, 551 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Native-Americans_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/imje/>

Arranged in separate chapters:

Havasupai Tribe
Hopi Tribe; Hualapai Tribe
Southern Paiute Peoples
Navajo Nation–Diné
Pueblo of Zuni
Yavapai–Apache Nation
Unaffiliated Tribes and Indigenous Peoples
Native Americans Generally

This special bibliography relates to Native Americans of, and their relation with, the Grand Canyon. By default of their residency at and in the canyon, the Havasupai and Hualapai people are the principal focus of this bibliography. In addition, there are citations that relate in some fashion to the cultural relationships and claims that other tribes have in the Grand Canyon. This is not a bibliographical listing for the tribes in general; only their relationships with the canyon, although more comprehensive material is cited regarding the Havasupai and Hualapai.

Some topics that may seem to be out of scope, insofar as the tribal relationships with Grand Canyon are concerned, are included here. For example, some citations pertain to Havasupai legal claims against Arizona State University, which relate to the unsanctioned uses of blood samples that were given by tribal members to a university researcher specifically for research on diabetes in this community (a disease that disproportionately afflicts many of these people, and notably other tribal peoples as well). While this in itself may seem unrelated to the Grand Canyon, additional studies were conducted with the samples, without the permission or knowledge of those from whom the blood was taken. These other studies arrived at scientific conclusions and social statements, which were published, that are decidedly contrary to the cultural beliefs of the Havasupai people and their relationship with the Grand Canyon. The resolution of these legal issues has provided some positive outcome for the individuals and the tribe. Now the affair remains the subject of worldwide cautionary and instructive attention among bioethicists and legal scholars, citations about which are included here because of that far-reaching impact. Many of these publications were produced during the progress of the legal case, and thus they provide evolving perspectives of the issues prior to the final resolution between the tribal litigants and the university. The effects of this case further emphasize the weight and truth of cultural beliefs.

The number of citations pertaining to the Hualapai Tribe is somewhat enlarged by international attention to the Grand Canyon Skywalk, constructed by the tribe at the locale now generally known as Grand Canyon West.

GRAND CANYON PHOTOGRAPHERS AND CINEMATOGRAPHERS

View Finders: Grand Canyon Photographers and Cinematographers

View Finders is a historical and bibliographical resource that complements a companion volume on the artwork of the Grand Canyon. This is Volume 1 comprises an introduction and an annotated photobibliography and filmography of photographs and films. Volume 2 [which is listed under "Historical Topics" herein] specially focuses on postcards that were produced from the early tourist years at Grand Canyon, about at the turn to the 20th century, through mid-century. Selective as it is, no such anthology of Grand Canyon postcards has hitherto been available.

Volume 1: Introduction and Annotated Photobibliography and Filmography (2023)

23 MB, 648 pp.

https://ravensperch.org/wp-content/uploads/2023/10/View_Finders_Vol-1.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/zemy/>

Arrangement:

Introduction

Some Views, Found—A Sampler

Part 1: Photobibliography Arranged by Author of Publication

Part 2: Selected Photobibliography Arranged by Credited Photographer

Part 3: Filmography Arranged by Attributable Source

Part 4: Selected Filmography of Action and Documentary Films Arranged by Title

The annotated photobibliography in Volume 1 gathers citations for publications beginning in 1872, that in some way mention or illustrate the photographic work of Grand Canyon photographers and cinematographers on the spot between that year and 2023. (Collectively these producers are referred to as "photographers" when there is not a need to distinguish the media one from the other.) It serves as a documentary effort that confirms the breadth and depth of interest in the Grand Canyon. It also introduces numerous photographers who have not had the privilege of being "recognized," such as those whose work was contributed "on the fly" to various journals and magazines, who are not acclaimed photographers in their own right.

The Introduction means to be informative specifically for the audience of Grand Canyon historians and aficionados. It is not a historiographical treatment of the subject, an admittedly arbitrary and teasingly brief primer on Grand Canyon photography and cinematography for readers who may not be very familiar with the subject. It highlights some usual, and mentions some appealingly unusual, aspects about well-known and obscure photographers alike, and a few of their products.

FOR VOLUME 2 SEE UNDER "[HISTORICAL TOPICS](#)"

SPECIALIZED BIBLIOGRAPHIES
(BIOLOGICAL TOPICS)
FOR THE GRAND CANYON REGION

These independent biologically-focused bibliographies are derived chiefly from Part 19 ("Biology and Ecology of the Grand Canyon Region") in THE GRAND CANON Volume 1/Part B (*Bibliography*). Segregating the citations that pertain to specific large groups of organisms is done for the benefit of biological and environmental researchers, and for the administrative uses of resources managers who made find the need to understand the breadth of uses pertaining to organismal assets in these fields within the politico-geographical areas under their purview.

The citations in these bibliographies are generally organismally focused. Material that is more broadly ecological in nature still will be identified throughout Part 19 of THE GRAND CANON. Also take note of the separate publications listed herein under "Environmentally Focused Bibliographies": *Kaibab Plateau Ecology*; *Bibliography of Biology, Ecology, and Environment of Lake Mead, Arizona–Nevada*; and *Bibliography of the Biology, Ecology and Environment of the Colorado River Limitrophe and Delta, and the Adjacent Part of the Upper Gulf of California (Mexico and United States)*. Also see *Groundwaters of the Grand Canyon Region*, which includes a separate section, "A Bibliography of Grand Canyon Springs Ecology".

The bibliography on "Ichthyology of the Lower Colorado River" is geographically expanded beyond the Grand Canyon region. It conceptually embraces the once-contiguous mainstem of the Colorado River, uninterrupted by dams and their impoundments (limited in THE GRAND CANON to the reach between Glen Canyon Dam and the Gulf of California). To it are added ichthyological publications that pertain to tributaries in the Grand Canyon and the lower reaches of the Virgin River watershed.

BOTANY

Bibliography of Botany of the Grand Canyon Region

3rd Edition (2025)

2.2 MB, 242 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Botany_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/owjx/>

Pertaining to research and casual observations about the plant life of the Grand Canyon and vicinity.

ENTOMOLOGY

Bibliography of Entomology of the Grand Canyon Region

Insects, Arachnids, and Other Arthropods

3rd Edition (2025)

1.2 MB, 95 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Entomology_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/wubq/>

Entomology is generally defined as the study of insects, although in the past—and as reflected in many research collections—the subject further embraced arachnids and some other arthropods. This broader definition is used for this bibliography.

ICHTHYOLOGY

Bibliography of the Ichthyology of the Lower Colorado River

Glen Canyon Dam to the Río Colorado Delta, Grand Canyon Tributaries, and Lower Virgin and Muddy Rivers (Arizona, Nevada, California, Baja California, Sonora)

3rd Edition (2025)

2.1 MB, 196 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Ichthyology_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/gxoz/>

Item Numbers for publications are typographically altered to visually distinguish between publications about the Grand Canyon and its tributaries, and publications about the Lower Colorado River (below Grand Canyon) and lower Virgin and Muddy Rivers.

INVERTEBRATES

Bibliography of Invertebrates of the Grand Canyon Region

Except Insects and Other Arthropods

3rd Edition (2025)

485 KB, 31 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Invertebrates_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/zvze/>

This bibliography is typically a matter of convenience, applying its breadth of coverage to all invertebrate organisms other than the large taxonomic groups of insects and other arthropods.

ORNITHOLOGY

Bibliography of Ornithology of the Grand Canyon Region

3rd Edition (2025)

1.1 MB, 104 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Ornithology_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/fxwh/>

Pertaining to research and casual observations about the birds of the Grand Canyon and vicinity. [See also the separate publication, *Kaibab Plateau Ecology*, for special attention to that ecoregion.]

PALEONTOLOGY

Bibliography of Paleontology of the Grand Canyon Region and in the Stratigraphic Continuity of Grand Canyon Formations

4th Edition (2025)

1.5 MB, 149 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Paleontology_4th-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/emdt/>

Culling these paleontology citations from THE GRAND CANON was an opportunistic effort, not originally a part of the main bibliography. (A paleontological bibliography for material that limits itself only to, or includes data from, Grand Canyon National Park alone would be a labor-intensive effort requiring page-by-page examinations of many of the citations, and more.) The publications listed here are those that have obvious reference to paleontology. There are many more citations that might have been added, particularly those that relate to broad stratigraphic, sedimentological, and paleogeological studies, which by implication should also contain references to fossils; and similarly, texts that embrace the general geology of the Grand Canyon that should include detailed or superficial commentaries on fossils. However, without a wholesale revisit to all of these publications it is not clear which among such titles do contain paleontological data. Part 21 of THE GRAND CANON Volume 1/Part B contains all citations that relate to the earth sciences for the greater Grand Canyon region.

Publications that relate to creationist and young-earth perspectives of Grand Canyon geology are included here with the understanding that this is an ongoing, sometimes tempestuous, field of study that contrasts ideas of faith with the tenets and methodologies of empirical and falsifiable science. Accordingly, some users of this bibliography may object to including creationist research with the science-based works of geology. However, these are topically identical so they are not segregated. To assist researchers looking for contrasting perspectives, both for and against creationist-held views pertaining to the Grand Canyon, these citations are denoted in the bibliography with Item Numbers in *italics*. Refer also to the separate publication from Raven's Perch Media, *Contrary Canyon* (listed herein under "Specialized Bibliographies (General Topics)", a bibliography of contrary viewpoints in the Grand Canyon region that includes two pertinent chapters: "Young-Earth Creationism" and "Counterpoints to Young-Earth Creationism, Old-Earth Creationism Alternatives, and Historical Perspectives".

PROTISTS

Bibliography of Protists and Other Microorganisms of the Grand Canyon Region

2nd Edition (2025)

283 KB, 8 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Protists_2nd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/oqgi/>

The publications listed in this bibliography are specifically about taxa in the Kingdom Protista (protists) and other "unconventional" taxa such as those of the Kingdom Chromista (photosynthetic eucaryotes), or topics that address them at least within the geographic scope of THE GRAND CANON.

TERRESTRIAL VERTEBRATES

Bibliography of Terrestrial Vertebrates of the Grand Canyon Region **Includes Bats, Excludes Birds**

3rd Edition (2025)

1.7 MB, 165 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Terrestrial-Vertebrates_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/rbba/>

This bibliography pertains principally to vertebrate animals of terrestrial habitat. As a matter of convenience, it includes the mammalian group of bats (Chiroptera), but for birds see the separate bibliography for Ornithology.

TAXONOMY

Bibliography and Annotated Checklist of Living Organisms First Named from the Grand Canyon and Vicinity (Northwestern Arizona)
2nd Edition (2024)

2.4 MB, 205 pp.

https://ravensperch.org/wp-content/uploads/2024/10/Species-Checklist__2nd-edition.pdf
FLIP BOOK: <https://online.fliphtml5.com/ryvqb/zffx/>

(From the Introduction) This checklist provides federal and Native American resource managers and historians of the Grand Canyon region of northwestern Arizona with a census of living (neontological) organisms that had been scientifically named based on collections made wholly on, or in part from, the lands that these managers oversee. Their original scientific names are recorded in this checklist. It does not use updated or otherwise “current” names for taxa that have been scientifically reidentified (taxonomically synonymized) or that were systematically transferred to other supra-specific biological groups than those under which they were first named. Providing such information is beyond the scope of a historically- and administratively-directed document such as this one; its inclusion would soon make the records herein out of date. For the same reasons no data regarding the biological attributes (descriptions) of the organisms are included herein.

The bibliography/checklist includes 334 species-level taxa named on type specimens collected in the greater Grand Canyon region of northwestern Arizona; 225 of those taxa are based at least in part on specimens from within, or are with good probability from within, the current boundaries of Grand Canyon National Park. Five taxonomic kingdoms are represented among them—animals, plants, fungi, photosynthetic eukaryotes, and protists. Only the name-bearing types from within the geographical boundaries of this checklist are listed; referred specimens (those not selected to be types) are generally omitted.

The checklist is also confined taxonomically to the original names of the organisms scientifically described for the first time by the authors cited in the bibliography. These names can disappear through taxonomic synonymy (and in many cases they have) when researchers in biological systematics have ascertained that one or another organism is actually the same as another, earlier named one, or if they move species-level taxa to different taxa than those in which they were originally placed. And in turn, genera can be forever “fiddled with”, moving them from one Family to another and often carrying its contained species with it (though this explanation is a bit simplified); and similarly among the higher taxa, clear up to the Kingdom level. In some measure this is reflected in the higher-systematics listed with the taxa herein, which information may not be the same as that originally attributed by the authors of these taxa.

There is also a chance that some organisms can disappear actually, through extirpation or extinction; and this checklist thus would provide the original data that were communicated about their presence and scientific discovery. Ecological memory is ephemeral, but taxonomic memory—right, wrong, and revised—is forever, part of the resource manager’s treasury. Thus this checklist serves these managers as a documentary list of organisms first named from the lands that they oversee and the resources that have been used; and it serves as a contribution to the history of the Grand Canyon and adjacent areas of northwestern Arizona.

ENVIRONMENTALLY FOCUSED BIBLIOGRAPHIES FOR THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

GROUNDWATERS

Groundwaters of the Grand Canyon Region, Arizona

**A Research Bibliography of Groundwater Hydrology and the Record of Environmental Issues, Legislative Oversight, and Native American Cultural Concerns of Groundwater Use: with annotations: 1880–2024
Plus: A Bibliography of Grand Canyon Springs Ecology
(2024)**

2.7 MB; 102 pp.

<https://ravensperch.org/wp-content/uploads/2024/11/Groundwaters.pdf>

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/qgab/>

Part 1: Groundwater Hydrogeology

Part 2: Environmental Issues, Legislative Oversight, and Native American Cultural Concerns

Part 3: Springs Ecology of the Grand Canyon Region

This research bibliography is more than a list of publications. Its content—and more directly the content of the cited publications—displays the breadth of interest and activities in the ecology of Grand Canyon's springs, the hydrogeology of the karst groundwaters that are their sources. There are as well the concerns that the physical effects of the mining operation inside the plateau can alter the coursework of groundwaters and the ecologies of spring areas. When the spring waters are well used by people, the level of concern escalates. Concerns and reactions also appear among administrative, legal, and legislative agential bodies. In fact, interest in the Grand Canyon's groundwaters goes back at least to 1880, when it seems that the warm springs below Lava Falls of the Colorado River were already recognized, although in those days the reasons for interest were both scientific and commercial (therapeutic, supposedly).

KAIBAB PLATEAU

**Kaibab Plateau Ecology****An Inclusive Research Bibliography with Annotations (1893–2024)**

(2024)

2.8 MB; 184 pp.

<https://ravensperch.org/wp-content/uploads/2024/11/Kaibab-Plateau-Ecology.pdf>FLIP BOOK: <https://online.fliphtml5.com/ryvqb/tzhf/>

Introduction

Part 1. Inclusive Bibliography (Grand Canyon National Park [North Rim] and Kaibab National Forest [North Kaibab Ranger District])

Part 2. Chronological–Historical Bibliography of Bioecology and Conservation of Kaibab Deer

(From the Introduction) The Kaibab Plateau of northern Arizona is a treasure. Once (and occasionally still informally) called the Buckskin Mountains, the plateau is part of the traditional homeland of the Paiute peoples, who know it as (in translation here) the Mountain Lying Down. The broadly arched plateau lies more or less at 8,000 feet in elevation (the apex is over 9,200 feet). Its eastern and southern edges rise over Marble Canyon and Grand Canyon and its western edge looks over the Kanab Plateau, while on its northern side it slopes toward the Utah–Arizona boundary. From Le Fevre Overlook along that downgrade one can see on the horizon the start of the geological stair-stepping Grand Staircase ascending to the north in Utah. The Kaibab's structural geology is the stuff of textbooks, beyond the scope of this bibliography. But its ecology is a differently enthralling story. Unlike the canyons and plateaus that surround it, the Kaibab is heavily forested and set with open parklands that divulge karstic limestone areas that are the source of numerous springs in Marble and Grand Canyons. Its stately ponderosa pines are home (and foodstuffs) to the Kaibab squirrel, found nowhere else on earth. Northern goshawks nest here, too, and have been the keen interest of environmental biologists for decades.

But the legacy that stands out is that of the deer—world-renowned as the “Kaibab deer” not because they are endemic to the plateau like the “Kaibab squirrel,” but for the remarkable lesson in which these ordinary mule deer featured in the early 20th century, when their environment was astonishingly altered by humans out to “protect” them. A protracted effort was made with the consent—the insistence even—of federal forest agencies to eradicate the top-of-the-food-chain animals, specifically wolves and mountain lions, that preyed on the deer. They were decimated by hunters (one of them, “Uncle Jim” Owens, became famous for his “lion hunts”; a few general-writing citations about him and his clients are added to this bibliography). The deer population soon surged—an irruption is the biological term—to the point that they far overgrazed their primary food plants; and then they too were decimated, by starvation. No less a figure than forester Aldo Leopold, exemplary and pioneering environmentalist and conservationist, said it was so.

Or so the lesson was told for decades. Later, biologists began to query the simplicity of predator–prey relationships in light of more broadly scoped ecological viewpoints that consider other impacts to the ecosystem, including wildfires. Some biologists (and game hunters) brand the lesson a myth. A (re)visionary biologist, Dan Binkley, countered the newer lessons, speculating that Leopold had been right after all. Such is the main pathway of science—accepting or rejecting postulates according to evidence or interpretations of data that support or refute a stated problem. The “lesson of the Kaibab” has been a mainstay of environmental education for a century, thus it is worthwhile to present here a separate chronological bibliography of the Kaibab deer literature. With it, the lesson's historical track can be traced more easily through its publications, year by year, and from which an idea can also be grasped as to the lesson's international breadth of interest.

COLORADO RIVER LIMITROPHE

Bibliography of the Biology, Ecology and Environment of the Colorado River Limitrophe and Delta, and the Adjacent Part of the Upper Gulf of California (Mexico and United States)

3rd Edition (2025)

4.2 MB, 302 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Limitrophe_Alto-Golfo_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/whcx/>

Publications that pertain only to Mexico are typographically distinguished by their Item Numbers printed in *italics*.

(From the Preface) This bibliography pertains to the ecology and environments of the Colorado River below Yuma, and the northern extremity of the Gulf of California. Generally, the gulf area considered herein is the area north of a line between San Felipe, Baja California, and Puerto Peñasco and Golfo de Santa Clara, Sonora, thus it particularly embraces Mexico's *Reserva de la Biosfera en el Alto Golfo de California y Delta del Río Colorado* and the *Área de Refugio para la Protección de la Vaquita Marina* (Upper Gulf of California and Delta of the Colorado River Biosphere Reserve, and the Refuge Area for the Protection of the Vaquita Marina). The environmentally protected areas at the northern end of the Gulf of California are considered because many species and environments are affected by historic and changing contributions of the Colorado River through its delta. With regard to the marine faunas there, the environmental changes caused by the effective cessation of Colorado River flows into the gulf, and the effects of fishing activities, intertwine to such a degree that it is imperative to cite publications that relate to these areas and subjects.

Material pertaining to the Ciénega de Santa Clara, in Sonora, is included in this bibliography due to its ecological and geographical relationship to the Colorado River Delta, although today it environmentally manifests itself by the receipt of brackish agricultural runoff from the United States via the “Main Outlet Drain Extension” canal.

This bibliography also includes items relating to U.S. efforts in desalinization of waters delivered to Mexico in the Colorado River (for example, items that pertain to the Yuma Desalting Plant). Items that pertain to Colorado River salinity in general, or specific studies of salinity in areas north of the delta and Yuma, are not included here. For such material see the more extensive Part 11/Section 1 of THE GRAND CANON Volume 1/Part B (Bibliography).

Numerous citations that relate to areas peripheral to the delta region—for example, the Yuma Valley, Arizona; Imperial Valley, California; Valle de Mexicali and Laguna Salada, Baja California; and the Reserva de la Biosfera El Pinacate y Gran Desierto de Altar, in Sonora—will be found in the separate bibliography from Raven's Perch Media, *Bibliography of Biology, Ecology and Environment of the Salton Sea and the Imperial–Mexicali Valley Region*.

LAKE MEAD

Bibliography of Biology, Ecology, and Environment of Lake Mead, Arizona–Nevada **Including Las Vegas Wash, Lower Virgin River, and Specific Localities in Lake Mead National Recreation Area**

3rd Edition (2025)

1.6 MB, 162 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Lake-Mead-Eco_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/cqzr/>

Environmentally, this bibliography necessarily includes material on the ecology and environment of Las Vegas Wash and the lower Virgin River. A few citations are also included that pertain to the Muddy River, tributary to the lower Virgin. Environmental issues include atmospheric and concerns of human health.

The southern portion of Lake Mead National Recreation Area, below Hoover Dam and administratively including Lake Havasu, is not embraced by this bibliography; to include Lake Havasu as an environmental feature would infer also that Lake Mohave, farther downstream, also would have to be considered—and by extension, also the Colorado River corridor in these areas—which would turn the focus too far from the Lake Mead bibliography’s original intent. Note, however, that some citations that refer to Lake Mead National Recreation Area could in fact pertain only to the southern portion of the unit and not to the area of Lake Mead-proper. It has not been possible to re-check all of those citations, many of which are legacies of early compilations during this bibliographical project.

Some works that obviously encompass the Lake Mead region, such as geographically broadly focused faunal or floral studies, are omitted for the reason that this special bibliography focuses on works that have specifically identified their pertinence to Lake Mead and adjacent areas. For individual authors, some citation lists may omit publications that do include Lake Mead but which fact was not determined for this bibliography. Readers with more in-depth focuses or historical perspectives may wish to consult the more comprehensive regional listings in Part 11/Section 1 of THE GRAND CANON Volume 1/Part B (Bibliography).

SALTON SEA REGION

Bibliography of Biology, Ecology and Environment of the Salton Sea and the Imperial–Mexicali Valley Region

3rd Edition (2025)

3.3 MB, 312 pp.

https://ravensperch.org/wp-content/uploads/2025/01/Salton-Sea_3rd-ed.pdf

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/yruf/>

Publications that pertain only to Mexico are typographically distinguished by their Item Numbers printed in *italics*. The Item Numbers are underscored to further distinguish those publications that pertain specifically to agriculture, horticulture, aquaculture, apiculture, and animal husbandry.

For citations that relate to biological, ecological and environmental matters of broader geographical focus, and of the lower Colorado River region in general, consult the much more comprehensive listings in Part 11/Section 1 of THE GRAND CANON, Volume 1/Part B (Bibliography). Environmental issues include atmospheric and concerns of human health.

Agricultural topics principally on the Imperial Valley and Mexicali Valley are included in this bibliography. The Yuma Valley region is not included.

As a matter of geographical–ecological necessity, citations pertaining to locales that are near to the Salton Sea and Imperial Valley are also included in this bibliography; specifically, the southern Coachella Valley, the Algodones Dunes, and peripheral ecological reserves (for example, Dos Palmas).

Items that pertain to the anthropogenic breakout of the Colorado during 1905-1907 are consolidated with water-management publications in Part 12/Section 1 of THE GRAND CANON Volume 1/Part B.

HISTORICAL TOPICS IN THE GRAND CANYON AND LOWER COLORADO RIVER REGIONS

RAVEN'S PERCH MEDIA INTRODUCTIONS

Introducing the Grand Canyon: Introductions to Grand Canyon's History from Raven's Perch Media

Earle E. Spamer
(2025)

38 MB, 342 pp.

<https://ravensperch.org/wp-content/uploads/2025/04/INTRODUCING-GC.pdf>

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/qpjt/>

When Raven's Perch Media began to produce historically focused publications, some were strictly narratives; others were built around bibliographies about their subjects. Extended informational introductions were added to offer something more interesting to read than a blur of citations—in other words, to give readers *something* to read. Viewpoints and observations were incorporated that never had been noticed in the published literature, occasionally spun with a bit of humor. Eye-catching illustrations were inserted, too. These, then, are meant to engage readers, even in those works that were built around a bibliography! But scattered as they are, they fail to impart the idea that Grand Canyon has many particular stories.

One may correctly argue that there are suitable introductions to Grand Canyon's history already in print. They are admirable, focusing on the canyon's rich past, highlighting prominent events and people. Yet they necessarily condense some stories, omit others—and retell for the umpteenth time the same old stories that must be given space in every canyon history book no matter its angle. Now Raven's Perch Media relieves the reader with specific historical aspects that are undetected in the regular histories or may have been bypassed as being beyond the editorial guardrails of structured narratives. It is the prefaces and introductions that hopefully stand out and stand alone.

While these preliminaries can vie for attention, the reader of one book might be unaware of the others, which locate little-occupied vantage points. Thus the purpose of *Introducing the Grand Canyon* is to assemble these preludes into an anthology. Here, readers can be let into fascinating special aspects that may differ from the regular attentions of Grand Canyon's history. It is a sampler, of course, but a means by which the Canyon—and the people who were there—can be seen in new light or, for some of them, sighted for the first time.

IVES EXPEDITION (1857–1858)

Explorer: Andrew J. Carroll on the Colorado River, 1857–1858

Including Transcriptions from the “General Report” of Lt. Joseph C. Ives’ *Report Upon the Colorado River of the West* (1861) and Translations from Balduin Möllhausen’s *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico* (1861)

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/aelp/>

(Abstract) In early January 1858, at Fort Yuma, California, Prussian baron Friedrich Wilhelm von Egloffstein joined an exploring expedition under the command of Lt. Joseph Christmas Ives. Their objective was to

map the Colorado River and locate its head of navigation, thence explore overland across the northern tier of New Mexico Territory. The mission covertly scouted Mormon advances into the region and sought means by which to gain access to interior locations closer to Utah by way of the river. During the land expedition they hoped to locate the confluence of the Little Colorado River with the main Colorado; in the process they went into the Grand Canyon twice. A veteran of other expeditions in the West, Egloffstein created for Ives' 1861 final report many scenic illustrations and two shaded relief maps. "Map No. 2" depicts—for the first time—a visual concept of the physiography of the Grand Canyon ("Big Cañon" as it was known then). The technical means that he was still in the process of inventing to make these relief maps has been praised. It was a proprietary and still not wholly understood process of heliography, by which a sculpted plaster model was photographically processed as an engraving in steel. But the topographer has been unfairly criticized for geographical oddities on his map, and the present study aims to remove much of that disapproval. The map displays the results of field-based surveys and adds borrowed and hypothetical topographies. As this study demonstrates, the baron's survey work was reasonably accurate, and his interpretive work is explicable though he may have been affected by the geographic notions of available maps. Later, cartographers who depended on his map to help produce newer maps of the greater Southwest and North America redrew landscapes in and around the Grand Canyon that were less faithful to ground truth and were not corrected for years. These cartographical trajectories of "Map No. 2" have not been explored before. *A Big Misunderstanding* is a graphic study of the whole and details of the Grand Canyon map with comparisons to modern and period maps of the region. It rationalizes the limits of visual observation that Egloffstein faced during the land expedition and speculates on what motivated him to fill in the areas that he did not survey. Examples of apparent earlier influences on Egloffstein's cartographic presentation are illustrated, along with specimens of later maps that distorted his geographies.

NEOLOGY

Naming the Grand Canyon with an Appendix, Grand Canyon Echoes (2024)

3 MB, 48 pp.

<https://ravensperch.org/wp-content/uploads/2024/12/Naming-GC.pdf>

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/zcfa/>

Historical review, 16th century to present; with extensive notes and sources.

The origin of the name “Grand Canyon” is unknown. It was not the neological invention of John Wesley Powell in 1869, as is often retold. Earlier in the 19th century it was known as “Big Canyon” and “Great Canyon,” perhaps the translation of the term by which French-speaking mountain men may have described it—*un grand cañon*. Both appellations inattentively survived the coming of “Grand Canyon,” but only for a couple of decades. The earliest known non-Indigenous term, *Puerto de Bucareli*, was conferred in the diary of the Franciscan friar Francisco Garcés when he visited the Havasupai people in 1776, the first non-Native person known to have reached the Grand Canyon since a party of Spanish conquistadores arrived on the rim 236 years earlier, in 1540 (who are not recorded as having given it a name). Ingenious misspellings of the *puerto* appeared on manuscript and printed maps in the 18th and 19th centuries but its association as Garcés’s mountain pass for the Colorado River was never remembered, nor did it label an entire canyon. The origins for each “Canyon” name, though, remain mysteries, including the first known appearance of “Grand Canyon” in 1857 that disappointingly lacked an admission of neologism or credit to another source. This has not dissuaded travelers and writers from exploiting the name for other landscapes around the world or from exercising it in a superfluity of analogies and metaphors. In the end, an answer to the question, “Who named the Grand Canyon?” may be unessential, given that Native peoples have had words from time immemorial that affirm long spiritual and cultural associations with the canyon.

GRAND CANYON PHOTOGRAPHERS AND CINEMATOGRAPHERS

View Finders: Grand Canyon Photographers and Cinematographers

View Finders is a historical and bibliographical resource that complements a companion volume on the artwork of the Grand Canyon. This is Volume 1 comprises an introduction and an annotated photobibliography and filmography of photographs and films. Volume 2 [which is listed under “Historical Topics” herein] specially focuses on postcards that were produced from the early tourist years at Grand Canyon, about at the turn to the 20th century, through mid-century. Selective as it is, no such anthology of Grand Canyon postcards has hitherto been available.

Arrangement:

Introduction

Some Views, Found—A Sampler

Part 1: Photobibliography Arranged by Author of Publication

Part 2: Selected Photobibliography Arranged by Credited Photographer

Part 3: Filmography Arranged by Attributable Source

Part 4: Selected Filmography of Action and Documentary Films Arranged by Title

The annotated photobibliography in Volume 1 gathers citations for publications beginning in 1872, that in some way mention or illustrate the photographic work of Grand Canyon photographers and cinematographers on the spot between that year and 2023. (Collectively these producers are referred to as “photographers” when there is not a need to distinguish the media one from the other.) It serves as a documentary effort that confirms the breadth and depth of interest in the Grand Canyon. It also introduces numerous photographers who have not had the privilege of being “recognized,” such as those whose work was contributed “on the fly” to various journals and magazines, who are not acclaimed photographers in their own right.

The Introduction means to be informative specifically for the audience of Grand Canyon historians and aficionados. It is not a historiographical treatment of the subject, an admittedly arbitrary and teasingly brief primer on Grand Canyon photography and cinematography for readers who may not be very familiar with the subject. It highlights some usual, and mentions some appealingly unusual, aspects about well-known and obscure photographers alike, and a few of their products.

Arrangement:

Introduction

Index to Postcard Views Credited by Publisher, Producer, Distributor, or Photographer

Postcard Messages From This Collection

Postcards (219 plates)

Illustrated herein are 359 postcards and 14 excerpts from postcard strips and miniature photo sets. The separate Table of Contents for the 219 plates of illustrations delineates the geographic and topical arrangement of these products in this volume. A few postcards show scenes near the Grand Canyon, which locations are included for their historical perspective as well as for their parts in regional history and tourist interest—the Kaibab Plateau, House Rock Valley, and the Navajo Bridge on the east, and the Grand Canyon portion of Lake Mead far to the west.

While postcards are an obvious genre of “photographs” ideally suited for *View Finders*, a systematic accounting of them is avoided simply because there are thousands produced by numerous commercial and specialty publishers, as well as small-run knock-offs by businesses and entrepreneurs. Even the very large collections held by academic institutions each is quite different in content. Further, the newer cards are still under copyright protection, thus any study that would illustrate a large and comprehensive set may be a logistically outrageous prospect, perhaps best left for a time when all of them are in the public domain.

There has until now been no such compilation for postcards of the Grand Canyon and nearby locales. In no sense is this an all-inclusive study of these regional postcards; it is not—cannot be—an inventory of canyon area postcards. There are many more that the author has seen, too, but has no copy to reproduce; beyond that, there are unquestionably hundreds of which he is unaware.

TRAVEL MEMOIR

Grand Canyon. By Sven Hedin. An English Translation of the Original 1925 Edition.

Earle E. Spamer, Editor

(2022)

No copyright is claimed for the translation and Hedin's illustrations; they may be used freely.

20 MB, 167 pp.

<https://ravensperch.org/wp-content/uploads/2022/08/SVEN-HEDIN.pdf>

FLIP BOOK: <https://online.fliphtml5.com/ryvqb/nebu/>

The watercolor and graphite illustrations by Hedin, as published in his book, are all reproduced.

Sven Anders Hedin (1865–1952) was a Swedish adventurer best known for his explorations across the Asian continent and for a tumultuous professional life. The publications stemming from his explorations are numerous, and he was also widely known for his popular travelogue for young readers, *Från Pol till Pol* ("From Pole to Pole," published in 1911) that was translated into many languages. But less well known is the entire book that he wrote about his three-week visit to the Grand Canyon in the summer of 1923, based on letters he had sent to his mother. It was published first in Swedish in 1925 with the simple title, *Grand Canyon*; today this is a scarce volume in the antiquarian book market. It was translated into German in 1926 and Russian in 1928. It never was translated into English, until now.

Few attempts have been made in this translation to offer the kinds of editorial annotations that correct, update, or explain information that Hedin presented or about people that he mentions. To do so at length would have destroyed the main purpose of making his 1923 visit to the canyon available to English readers for the first time; it is not meant to be a studious critique of his work, best left for another time. This translation is meant to be read with Hedin as he travels through the canyon; another translation can be the one with which we may study Hedin.

[For a review of this translation, see Don Lago, "Sven Hedin. 'Grand Canyon: An English translation of the original 1925 edition.' Translated and edited by Earle Spamer." *Swedish-American Historical Quarterly*, Vol. 74, no. 4 (October 2023), pp. 257-260.]

PARTS 1–32 OF THE BIBLIOGRAPHY

Most parts of the Bibliography include introductory comments and notes

BIBLIOGRAPHICAL PUBLICATIONS

Part 1: Bibliographies, Indices, and Comparable Publications for the Grand Canyon and Lower Colorado River Regions (2 MB) pp. 17-103

https://ravensperch.org/wp-content/uploads/2025/01/Part_01_extracted.pdf

GENERAL AND PARTICULAR-INTEREST SUBJECTS

Part 2: General Publications (Historical, Geographical, Social, Cultural, Biographical, Popular, and Commonplace Works Concerning the Grand Canyon and Lower Colorado River Regions) (26 MB) pp. 107-3742

https://ravensperch.org/wp-content/uploads/2025/01/Part_02_extracted.pdf

Part 3: *The New York Times* (2 MB) pp. 3743-4001

Section 1: Complete Chronological List Keyed to Parts of This Bibliography

Section 2: List of Articles That Have Author By-lines

https://ravensperch.org/wp-content/uploads/2025/01/Part_03_extracted.pdf

RAVEN'S PERCH MEDIA
SEPARATELY DOWNLOADABLE SECTIONS AND PARTS FROM "THE GRAND CANON"

Part 4: Memorials (2 MB) pp. 4003-4171

Section 1: Memorials Listed by Names of Authors

Section 2: Memorials Listed by Names of Decedents

https://ravensperch.org/wp-content/uploads/2025/01/Part_04_extracted.pdf

Part 5: Publications for People with Disabilities (2 MB) pp. 4173-4298

Section 1: Publications Produced Especially for the Blind and Vision-Impaired

Section 2: Conventional Publications That Relate to the Experiences of or Information of Interest to the Blind and Vision-Impaired

Section 3: Publications that Relate to People with Hearing Impairments

Section 4: Publications that Relate to People with Mobility or Activity Limitations, and Publications Pertaining to Special-Needs Resources

https://ravensperch.org/wp-content/uploads/2025/01/Part_05_extracted.pdf

Part 6: Publications For and By Youth and Young Adults (5 MB) pp. 4299-4522

Section 1: Non-Fiction

Section 2: Fiction

https://ravensperch.org/wp-content/uploads/2025/01/Part_06_extracted.pdf

Part 7: Fiction (4 MB) pp. 4523-4641

https://ravensperch.org/wp-content/uploads/2025/01/Part_07_extracted.pdf

Part 8: Verse (3 MB) pp. 4643-4750

https://ravensperch.org/wp-content/uploads/2025/01/Part_08_extracted.pdf

Part 9: Travel and Trail Guides (4 MB) pp. 4751-4931

https://ravensperch.org/wp-content/uploads/2025/01/Part_09_extracted.pdf

Part 10: Colorado River Guides (1 MB) pp. 4933-4963

https://ravensperch.org/wp-content/uploads/2025/01/Part_10_extracted.pdf

PARTS 11 & 12: SEPARATE-COVERAGE GROUP
SPECIALIZED MATERIAL ABOUT THE LOWER COLORADO RIVER (BELOW GRAND CANYON)

Parts 11 & 12 Introduction (2 MB) pp. 4965-4972

https://ravensperch.org/wp-content/uploads/2025/01/Part_1112_intro.pdf

RAVEN'S PERCH MEDIA
SEPARATELY DOWNLOADABLE SECTIONS AND PARTS FROM "THE GRAND CANON"

Part 11: Environment, Natural History, and Special Scientific, Technical, Or Cultural Issues of the Lower Colorado River Region (20 MB) pp. 4973-7554

Section 1: Environment, Ecology, Biology, and Public Health and Safety

Section 2: Geology, Paleontology, Hydrology, and Related Disciplines

Section 2A: Separately Published Geologic and Special Maps

Section 3: Archaeology, Indigenous Cultures and Issues, and Contemporary Cultural Resources and Preservation

Section 3A: General Guide to Documentation for Places in the Lower Colorado River Region Listed in or Nominated to the National Register of Historic of Historic Places and the National Historic Landmark System Administered by the U.S. National Park Service

https://ravensperch.org/wp-content/uploads/2025/01/Part_11_extracted.pdf

Part 12: Water Supply, Management, and Policy (13 MB) pp. 7555-8837

Section 1: Water Supply and Issues of Management and Policy Relating to the Lower Colorado River, and Associated Infrastructural Projects—with Expanded Coverage to Accommodate Basin-Wide Issues and Unrealized Projects in Lower Glen, Marble, and Grand Canyons

Section 2: Ancillary Coverage: Infrastructural Projects Along the Colorado River Between Lower Glen Canyon and Mexico That Are Note Related to Water Management Facilities

https://ravensperch.org/wp-content/uploads/2025/01/Part_12_extracted.pdf

HUMAN AFFAIRS

Part 13: Administrative and Management Issues in the Grand Canyon and Lower Colorado River Regions (6 MB) pp. 8841-9401

https://ravensperch.org/wp-content/uploads/2025/01/Part_13_extracted.pdf

Part 14: Sociology, Recreation, Education, Economics, and Related Subjects in the Grand Canyon–Lake Mead Region (4 MB) pp. 9403-9648

https://ravensperch.org/wp-content/uploads/2025/01/Part_14_extracted.pdf

Part 15: Health and Safety in the Grand Canyon–Lake Mead Region (3 MB) pp. 9649-9816

https://ravensperch.org/wp-content/uploads/2025/01/Part_15_extracted.pdf

Part 16: Archaeology and Cultural Resources in the Grand Canyon Region (3 MB) pp. 9817-10,042

Appendix to Part 16: General Guide to Documentation for Places in the Greateer Grand Canyon Region Listed in or Nominated to the National Register of Historic of Historic Places and the National Historic Landmark System Administered by the U.S. National Park Service

https://ravensperch.org/wp-content/uploads/2025/01/Part_16_extracted.pdf

Part 17: Native Americans in the Grand Canyon Region (6 MB) pp. 10,043-10,490

Appendix to Part 17: *The Weekly Supai News* and *The Supai News* (1957-1959)

https://ravensperch.org/wp-content/uploads/2025/01/Part_17_extracted.pdf

RAVEN'S PERCH MEDIA
SEPARATELY DOWNLOADABLE SECTIONS AND PARTS FROM "THE GRAND CANON"

ENVIRONMENTAL, BIOLOGICAL AND GEOLOGICAL SCIENCES

Part 18: Physical Environment of the Grand Canyon and the Southwest Region (5 MB) pp. 10,493-10,795

https://ravensperch.org/wp-content/uploads/2025/01/Part_18_extracted.pdf

Part 19: Biology and Ecology of the Grand Canyon Region (8 MB) pp. 10,797-11,642

https://ravensperch.org/wp-content/uploads/2025/01/Part_19_extracted.pdf

Part 20: GCES—Glen Canyon Environmental Studies Program (1 MB) pp. 11,643-11,666

https://ravensperch.org/wp-content/uploads/2025/01/Part_20_extracted.pdf

Part 21: Geology and Paleontology of the Grand Canyon Region (10 MB) pp. 11,667-12,692

https://ravensperch.org/wp-content/uploads/2025/01/Part_21_extracted.pdf

Part 22: Hydraulics and Hydrogeology of the Colorado River in Lower Glen, Marble, and Grand Canyons (3 MB) pp. 12,693-12,850

https://ravensperch.org/wp-content/uploads/2025/01/Part_22_extracted.pdf

Part 23: Geological Field Guides in the Grand Canyon Region (1 MB) pp. 12,852-12,877

https://ravensperch.org/wp-content/uploads/2025/01/Part_23_extracted.pdf

Part 24: Geologic and Special Topographic Maps in the Grand Canyon Region (2 MB) pp. 12,879-12,955

https://ravensperch.org/wp-content/uploads/2025/01/Part_24_extracted.pdf

GRAPHIC, AUDIO AND DIGITAL MEDIA

Part 25: Cartobibliography (General Information) (3 MB) pp. 12,959-12,999

https://ravensperch.org/wp-content/uploads/2025/01/Part_25_extracted.pdf

In early editions of the bibliography, Part 25 had been relegated to "General Maps." These were transferred to create Volume 2 (*Cartobibliography*) of THE GRAND CANON. As explained in the General Information, Volume 2 also cites specialized maps that are separately compiled in other parts of THE GRAND CANON, particularly Part 11/Section 2A and Part 24 (*see above*). Volume 2 also includes complete itemizations of topographic and other quadrangle systems used within the geographical bounds defined for THE GRAND CANON.

Part 26: Audio–Visual works and Photographic Publications on the Grand Canyon and Lower Colorado River Regions (4 MB) pp. 13,001-13,162

Appendix 1: General Guide to Commercially Produced 3-D Transparency Products

Appendix 2: General Guide to Commercially and Governmentally Produced Stereographs

Informational Addendum to the Appendices: 3-Dimensional Productions Other than Transparency Products or Stereographs

https://ravensperch.org/wp-content/uploads/2025/01/Part_26_extracted.pdf

RAVEN'S PERCH MEDIA
SEPARATELY DOWNLOADABLE SECTIONS AND PARTS FROM "THE GRAND CANON"

Part 27: Audio Works and Musical Scores on the Grand Canyon and Lower Colorado River Regions

(1 MB) pp. 13,163-13,212

Appendix: Musical Scores

https://ravensperch.org/wp-content/uploads/2025/01/Part_27_extracted.pdf

Part 28: Separate Imagery in the Grand Canyon and Lower Colorado River Regions (3 MB) pp. 13,213-13,383

https://ravensperch.org/wp-content/uploads/2025/01/Part_28_extracted.pdf

Part 29: Computer and Interactive Media on the Grand Canyon and Lower Colorado River Regions

(1 MB) pp. 13,385-13,410

https://ravensperch.org/wp-content/uploads/2025/01/Part_29_extracted.pdf

ADDITIONAL GUIDES

Part 30: Book Reviews and Similar Notices Regarding Publications About the Grand Canyon and Lower Colorado River Regions (3 MB) pp. 13,413-13,596

https://ravensperch.org/wp-content/uploads/2025/01/Part_30_extracted.pdf

Part 31: Newspaper Guide for the Grand Canyon and Lower Colorado River Regions (1 MB) pp. 13,597-13,625

https://ravensperch.org/wp-content/uploads/2025/01/Part_31_extracted.pdf

Part 32: Marginalia Relating to the Grand Canyon and Lower Colorado River Regions (2 MB) pp. 13,627-13,652

https://ravensperch.org/wp-content/uploads/2025/01/Part_32_extracted.pdf

APPENDICES

The appendices provide bibliographical data and points pertaining to variant editions of the indicated titles.

In the full volume of the Bibliography (THE GRAND CANON Volume 1/Part B) links are provided to related citations for these titles.

Appendices I-IV (complete section) (2 MB) pp. 13,655-13,707

https://ravensperch.org/wp-content/uploads/2025/01/Appendices_1-4_extracted.pdf

Appendix I: The Leipzig Imprints of Balduin Möllhausen's *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico* (1860, 1861) (2 MB) pp. 13,657-13,679

https://ravensperch.org/wp-content/uploads/2025/01/Appendix-1_extracted.pdf

Appendix II: Variants of Ellsworth L. Kolb's *Through the Grand Canyon from Wyoming to Mexico* (1914–2018). Richard D. Quartaroli, compiler. (1 MB) pp. 13,683-13,695

https://ravensperch.org/wp-content/uploads/2025/01/Appendix-2_extracted.pdf

(continued)

RAVEN'S PERCH MEDIA
SEPARATELY DOWNLOADABLE SECTIONS AND PARTS FROM "THE GRAND CANON"

Appendix III: Variants of N. H. Darton's *Story of the Grand Canyon* (1917–1987) (1 MB) pp. 13,697-13,702

https://ravensperch.org/wp-content/uploads/2025/01/Appendix-3_extracted.pdf

Appendix IV: Variants of Edwin D. McKee's *Ancient Landscapes of the Grand Canyon Region* (1931–2020) (986 KB) pp. 13,703-13,707

Note: The appendix includes an additional imprint from 2021 that was mistakenly omitted from the appendix title. That imprint is included in the main bibliography.

RAVEN'S PERCH MEDIA POLICY ON REPRODUCTION AND FAIR USE

This statement appears in most Raven's Perch Media publications.

A few publications are wholly or partly released without copyright (in the Public Domain), as indicated in those publications and as noted where pertinent in this Publications List.

© Earle E. Spamer • No commercial or for-profit use of this work, in whole or in part, is allowed without the author's permission. Not-for-profit organizations, educational institutions, government agencies, and Indigenous communities may with credit extract from this work for purposes of resource management and interpretation, education, and public outreach; they also may download the entire document for cataloging and inclusion in their digital products collections, and they may freely allow users to copy this document for their use if it does not violate either the conditions given here or specific limits of copyright law that may not be waived by this fair-use statement. Reuse of this work, in whole or in part, for any purpose, must cite author, title, publisher, and notice of copyright. Academic or other individual researchers may copy selections for personal reference and may quote from this work following best practices of acknowledgment in scholastic research.

Replication of the entire document is permitted in order to ensure preservation or to migrate to different software, or medium not now in existence, when the technology to use the original digital copy is unsupported, inadequate, or obsolete. Documentary copies of this work in a non-digital medium are permitted for reference use or to preempt the loss of the work due to technological change that may no longer permit this work to be accessed by the means for which it was originally designed.

This statement does not supersede copyrights held by the original sources of items cited or quoted in this work.

The RAVEN'S PERCH MEDIA colophon recalls this bird's habit of gathering and caching objects. Derived from original artwork by Balduin Möllhausen, it is a fine detail from the lithograph delineated by J. J. Young that is "General Report Plate VII" in Joseph C. Ives' *Report Upon the Colorado River of the West, Explored in 1857 and 1858* (Washington, 1861), which depicts a wintry camp just south of the Grand Canyon. The scene was sketched and described by Möllhausen on April 10, 1858, while he was perched in a nearby tree. He noted (in translation here), "a couple of ravens [*paar Raben*] croaked morosely on the bare branches of a dried-up fir tree as they waited impatiently for our departure, so that they could scout around the abandoned campsite for fat morsels." (Möllhausen, *Reisen in die Felsengebirge Nord-Amerikas bis zum Hoch-Plateau von Neu-Mexico, unternommen als Mitglied der im Auftrage der Regierung der Vereinigten Staaten ausgesandten Colorado-Expedition*. Hermann Costenoble, Leipzig, 1861, Vol. 2, p. 83.) Möllhausen's original watercolor painting is now in the Amon Carter Museum of American Art (Fort Worth, Texas; <https://www.cartermuseum.org/collection/character-high-table-lands-1988146>).

Raven's Perch Media was created in 2018, but Möllhausen's remarks on this very scene were not discovered until the translation was made for *Möllhausen's Grand Canyon*, another Raven's Perch Media production (2022).

About the Website Host and Principal Author

My first field of study was geology at Rutgers University in the 1970s. For several years afterward I was in commercial publishing, writing about computer technology — before personal computers. In the early '80s I began an established period of employment in natural history study collections, first at the New Jersey State Museum, then in the Academy of Natural Sciences of Philadelphia. My 18 years in the Academy's employ began in 1986; before that I had been for 12 years a student research assistant and volunteer there. While on staff I was at various times a collection manager in several departments and collections — invertebrate paleontology, paleobotany, mineralogy, malacology, general modern invertebrates (a collection of organisms other than mollusks, insects and arachnids), diatoms, and modern botany; and continued to volunteer in vertebrate paleontology. My publications have embraced each of these fields — as well as historical and bibliographical topics about the Grand Canyon and Colorado River regions. Concurrently, for seven years I was editor and managing editor of the Scientific Publications branch of the Academy, which publishes peer-reviewed articles and monographs from authors around the globe in America's oldest uninterrupted line of serials on natural history, from 1817. My last five years at the Academy was as its Archivist, for which I had studied in the graduate program of Temple University's Department of History. On leaving the Academy in 2005 I continued my affiliation as an elected Research Associate. For the next 14 years I was Reference Archivist in the research library of the American Philosophical Society, a polymathic institution in Philadelphia founded in 1743 by Benjamin Franklin, whose staff supports the society's membership, visiting researchers from around the world, and graduate level researchers on society fellowships. Since November 2018 I am enjoying an active retirement continuing all of these interests.

Following two visits to the Grand Canyon in 1974 that included my first canyon hikes, I began work on a bibliography of the canyon and the lower Colorado River country. In 1981, the Grand Canyon Natural History Association (now the Grand Canyon Conservancy) published the first edition as a part of its new Monograph series of scholarly publications. A second edition appeared in 1990, with a supplement in 1993. In January 2000, a completely revised bibliography was placed on the Association's website, with its own URL, as a searchable database. Frequently updated, it was discontinued in 2021. In 2012, I privately published the first edition of *THE GRAND CANON*, a much-embellished resurrection of the print monograph, in digital format (PDF) that can be viewed in book layout on-screen or printed to paper. The fifth edition (2025), significantly revised, embraces the 16th to 21st centuries and now cites 111,000 items in 115 languages. (The separate *Cartobibliography* includes citations for maps of this period, with extensive chorographical notations.)

In 1989, the 28th International Geological Congress convened in Washington, D.C., which also offered an ambitious series of field trips across the United States, two of them on the Colorado River through Grand Canyon. My first river trip was with an IGC group. In 1990, I began working as a geology interpreter on yearly summer trips in Grand Canyon with a Colorado River outfitter, continuing this until 2001. I participated in two scientific study trips through the canyon under the Glen Canyon Environmental Studies program administered by the U.S. Bureau of Reclamation, on one of which I prospected for living mollusks, the first such investigation ever to have been made along this canyon river. In 1994, I had attended a Penrose Conference sponsored by the Geological Society of America, "From the Inside and the Outside: Interdisciplinary Perspectives on the History of Earth Science." This conference for the first time brought earth scientists and historians together to discuss how each group approaches research in these complementary fields; from it I developed new perspectives in my research activities, which extended into revisions of the Grand Canyon–Lower Colorado River bibliography. In 2000, I attended a geology symposium at Grand Canyon on "The Colorado River: Origin and Evolution," the proceedings of which were edited by Richard A. Young and me. In 2012 I was honored with the annual Pioneer Award from the Grand Canyon Historical Society. Among many affiliations I hold life memberships with the Grand Canyon Conservancy, the Grand Canyon River Guides, and the Arizona–Nevada Academy of Science.
